STEVEDORES: Available, ordered by Agent, no ETA to stevedores necessary.

MEDICAL: Hospital and doctors available.

DENSITY: 1011.

FRESH WATER: Available, supplied from shore by hose, about 15 t.p.h. 25 t.p.h. in Oil Harbour.

FUEL: All grades available, 24 hours ETA required by truck or barge (Dansk Esso, BP).

FIRE PRECAUTIONS: No smoking allowed.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: See "General" before first port.

IDENTIFICATION CARDS: Not required.

CONSULS: Norway: Mr. Jorgen Moller, Consul. Tel: (03) 51.19.01.
Sweden: Mr. H. Meredin Petersen, Vice-Consul. Tel: (03) 51.00.51.

REPAIRS: All types of repairs available.

DRY DOCKS: None.

REPATRIATION: All facilities exist.

AIRPORT: Nearest at Copenhagen about 80 miles from Kalundborg. Served by regular airlines.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day; Easter Thursday; Good Friday; Easter Monday; Ascension Day; 1st May; Whit Monday; Prayer Day; 5th June; Christmas Day; 2nd Christmas Day. No work can be carried out.

SHORE LEAVE: Allowed.

POLICE/AMBULANCE/FIRE: Police (03) 51.14.48. Hospital: (03) 51.10.01.

BANK: Den Danske Bank, Kordilgade 18, DK – 4400 Kalundborg. Tel: (03) 51.08.00. Open 9.30 a.m. – 4.00 p.m. (closed Saturday and Sunday).

SHIP SUPPLY SERVICES: Schierbeck's Supply Service, Njalsgade 21, 2300 Copenhagen S. Tel: 01-57 00 66 (day and night). Cables: Schierbeck Copenhagen. Telex: 31143. Maximum cargo 8 and 40 tons. Maximum 12 passengers.

Kalundborg Supply Service, Ulshojvej 25, 4400 Kalundborg. Tel: 03-51 20 42 and 51 69 17. Maximum cargo 10 tons. Maximum 12 passengers.
Service: 24 hours.
Rendezvous position for deep draft vessels:
Lat. 55° 43.5′ N. Long. 10° 47.8′ E.
Notice: 6 hours' notice required through Agent.

Supply vessel: "Kalundborg Supply" is an ultra modern supply boat equipped to the standards approved by the Danish Government Inspection of Ships.

She was built and delivered in 1982 and has 2×150 h.p. engines with twin screw which delivers a service speed of 16.5 knots. Her loading capacity is 10 tons with a deck space of 5 m.×3 m.

Wulff's Eftf. I/S Skibshandel, 8 Skibbrogade, DK-4400 Kalundborg. *Tel:* (03) 510345. After office hours (03) 513706 and (03) 508720. *Telex:* 44359. *Cable Address:* Wulffsef Kalundborg Territory: Kalundborg, Kalundborg Roads, Great Belt and Stigsnaes. Can also deliver provision, bonded stores, deck and engine stores.

DELAYS: Due to ice between 15th December and 31st March.

AUTHORITY: Kalundborg Port Authority, P.O. Box 50, Radhuset, DK – 4400 Kalundborg, Denmark. *Tel:* Harbour Board (03) 51.33.11. Harbour Master (03) 51.01.88.

(B) DANSK ESSO A/S OIL TERMINAL:

LOCATION: Dansk Esso A/S's refinery is situated at the bottom of Kalundborg Fjord in the island of Zealand, at Lat. 55° 40.6′ N., Long. 11° 5.5′ E. Largest chart of Kalundborg Fjord: B.A. No. 2596/D.A. No. 145.

DOCUMENTS: The following documents are required on arrival and for clearance:
Ship's Registration.
Load-line Certificate.
Safety, Radio and Telephony Certificates.
Safety Equipment Certificate.
Derat Certificate.
Crew List.
Construction Certificate.
Tobacco and Spirits List.
Oil Pollution Certificate.
B/L (if carrying cargo).
Certificate of Origin (T2L.EUR1).

In addition, a list of tobacco and spirits must be presented to the Customs service, showing the ship's and crew's supply on arrival.

PILOTAGE: For vessels over 5,000 d.w.t., a Harbour Pilot must always be used. In case of special reasons, an exemption from this rule can be granted by the Pier Master.

A Harbour Pilot must be used for vessels under 5,000 d.w.t. in those cases where the Master of the vessel in question calls at the pier for the first time as Master of the ship.

ANCHORAGE: The anchorage is 4 – 5 nautical miles W.N.W. of the Oil Pier. Closer information concerning the anchorage will be given by the Pilot.

RESTRICTIONS: The pier is open to navigation day and night, apart from restrictions under special weather conditions.

Navigation Restrictions: The harbour is closed to traffic when the wind force is over 23 m./sec. (force 9), or when the visibility is less than one ship's length.

Pier A and B: If the wind direction is between S.W. and N.N.W., and the wind force is between 15 m./sec. (force 7) and 23 m./sec. (force 9), Pilot and tug must be used. An exemption from this rule can be given only in special cases.

Pier C: If the wind direction is between S.W. and North, and the speed is between 15 m./sec. (force 7) and 23 m./sec. (force 9), then Pilot and tug must be used. Only in special cases can there be granted exemptions from this rule.

MAX. SIZE: See "Berthing".

HEALTH: See "Section A".

RADIO: *Arrival Advice:* For crude and ocean-going vessels the Master is requested, through the ship's Agent, to inform the Refinery of the ETA 72 hours before arrival, and again 24 hours before arrival.

For vessels which operate in Northern waters, ETA is to be given 24 hours before arrival. For local traffic, ETA is to be given on departure for Kalundborg. If there should be changes in ETA, in excess of 2 hours, this has to be reported to the Refinery via the Agent or over VHF.

VHF: Calls to the pier are made on VHF Channel 16. The working frequencies of the pier are Channels 9 and 12.

About 5 nautical miles before arrival, the pier is called on VHF, and the vessel informs the Pier Foreman of the precise time of arrival.

TUGS: Tugs are to be ordered through the Agent according to the scheme below. The minimum requirements for tug assistance under normal weather conditions (wind force below 10 m./sec.) are as follows:

	Vessel's Size (k.d.w.t.)	*Number of Tugs*	*Total Min. h.p.*	*Min. Bollard Pull* (tonnes)
Pier A	10-16	1	2,000	18
Arrival	16-26	2	3,500	36
	26-56	3	5,000	75
	56-70	3	7,500	85
	70-90	4	9,500	120
	90-120	4	11,000	130
Pier A	10-16	1	1,800	17
Departure	16-56	2	3,500	36
	56-120	2	5,000	60
Pier B	10-16	1	2,000	18
Arr./Dep.	16-	2	3,500	36

For vessels over 16 k.d.w.t. equipped with bow thruster the number of tugs is reduced by 1, however, by not more than 1,500 h.p.

If the wind force exceeds 10 m./sec. then with due regard to the expected weather situation for the area, the Shipmaster, the Pilot of the watch and the Refinery must come to an agreement on whether the vessel shall wait for a weather improvement, or whether the tugboat capacity shall be increased.

Mooring Boats: Mooring boats and men must be used, and are available from Kalundborg Boat Service.

Speed: Ships, which call at the pier without tugboat assistance, must reduce their speed to an absolute minimum before passing the outer dolphins. Prior to this, a realistic astern movement must have been made in order to ensure that the reversing functions satisfactorily.

BERTHING:

PIER A:

Max. vessel size 120,000 d.w.t.

Max. vessel LOA – 262 m. (860 ft.).

Max. freeboard 46 ft.

Max. draft for vessels up to 70,000 d.w.t. 12.50 m. (41 ft.) in brackish water at normal water level.

Max. draft for vessels over 70,000 d.w.t. 12.19 m. (40 ft.) in brackish water at normal water level.

Discharge of crude oil takes place via 2×12 in. cargo hoses fitted with 12 in. ASA flanges for a 30 in. pipe-line to the Refinery. The 30 in. crude oil line to the Refinery is about 2 km. long. Discharge rate for crude oil is about 5,500 cu.m.p.h. at maximum pressure. Max. loading/discharge pressure on the product and crude oil line is 7 bar.

During discharging through the crude oil line, the line pressure will be monitored at the Pier Office.

The following products are available at Pier A:

JP1, JP4	loading/discharge	6 in. ASA flange
Naphtha	loading/discharge	6 in. ASA flange
Regular gasoline	loading	6 in. ASA flange
Premium gasoline	loading	6 in. ASA flange
Autodiesel	loading/discharge	6 in. ASA flange
Gas oil	loading/discharge	6 in. ASA flange
Marine gas oil/motor gas oil	bunkering	
Various fuel oil grades	loading/discharge	6 in. ASA flange

PIER B:

Max. vessel size 16,000 d.w.t.

Max. vessel LOA 171 m. (560 ft.).

Max. draft 10.06 m. (33 ft.) in brackish water at normal water level.

Max. loading/discharge pressure on crude oil and product lines is 7 bar.

The following products are available at Pier B:

JP1, JP4	loading/discharge	6 in. ASA flange
Naphtha	loading/discharge	6 in. ASA flange
Regular gasoline	loading	6 in. ASA flange
Premium gasoline	loading	6 in. ASA flange
Autodiesel	loading/discharge	6 in. ASA flange
Gas oil	loading/discharge	6 in. ASA flange
Marine diesel/motor diesel	bunkering	
Marine gas oil/motor gas oil	bunkering	
Various fuel grades	loading/discharge	6 in. ASA flange
Crude oil	loading/discharge	6 in./8 in. ASA flange

PIER C:

Max. vessel size 5,000 d.w.t.

Max. vessel LOA 110 m. (360 ft.).

Max. draft 6.4 m. (21 ft.) in brackish water at normal water level.

Max. loading/discharge pressure on the product line is 7 bar, however, max. pressure on the LPG system is 19 bar.

The following products are available at Pier C:

Naphtha	discharge	6 in. ASA flange
Regular gasoline	loading	6 in. ASA flange
Premium gasoline	loading	6 in. ASA flange
Autodiesel	loading	6 in. ASA flange
Gas oil	loading	6 in. ASA flange
Marine diesel	bunkering	
Marine gas oil/motor gas oil	bunkering	
HFO	loading	6 in. ASA flange
LSHFO	loading	6 in. ASA flange
Asphalt	loading	6 in. ASA flange
LPG	loading/discharge	4 in. ASA flange
Crude oil	discharge	6 in. ASA flange

CARGO HANDLING: On any receipt of cargo, a representative of Dansk Esso A/S will come on board on arrival of the ship, and together with the ship's Chief Officer make a complete cargo calculation, and also take out an average sample of all the ship's tanks intended for Dansk Esso A/S.

Measurement of ullage will be made to the nearest 0.125 in. or 1 mm.

Temperature measurement will be made electronically to the nearest 0.25°C of an average measurement of top, middle and bottom of all cargo tanks' content designated for Dansk Esso A/S.

Any measurement of free water on arrival, and also Remaining On Board (ROB) after discharging, will be corrected for possible trim.

If the quantity of ROB is more than 0.1% of the B/L, samples will be taken of the ship's tanks that contain relatively large ROB, for later reference, but in this connection it is important to point out that Dansk Esso expect that the ship does its utmost to drain both ship's tanks and pipe systems satisfactorily.

If the ship is not furnished with a satisfactory "Vessel Experience Factor", then this is calculated in concert with a Representative of Dansk Esso A/S, and this factor is used for cargo calculation. About 1 hour after finishing the discharge, a Representative of Dansk Esso A/S will come on board and present a preliminary statement of the discharged quantity, as compared with B/L and sea transport.

The following shipping documents are to be handed over to Dansk Esso A/S:

Tank Condition Certificate – Prior Loading.
Bill of Lading.
Quantity Certificate (Intake Certificate/Shoreside Measurement).
Quality Certificate (Laboratory Report of Tests).
Copy of Any Protest issued to Loading Terminal.
Vessel Ullage Report – Loading/Discharging.
Dry Certificate or Post Discharge Vessel Ullage Report.
2 Sealed Samples from Loading Port.

Static Electricity: Some of the oil products, which are shipped through the terminal, have poor conductivity, and therefore accumulate static electricity under certain conditions.

The electrostatic generation arises especially during flow in the pipe system at start of loading, as water and rust particles in pipes and tank bottom are stirred up. Turbulence and "splashing" are also a contributing cause. It is therefore necessary to observe special measures and precautions.

Handling of Statically Accumulating Products:

The following statically accumulating products are shipped at the pier:

Regular gasoline.
Premium gasoline.
Naphtha.
Jet fuel.
Gas oil.
Diesel oil.

Loading speed: If the ship is gas-free on arrival, the loading speed will normally be about 500 cu.m.p.h. It is a condition that the product to be loaded can meet the requirements of the scheme (see "Rules").

If the ship's tanks are kept inerted during loading, then static precautions are not necessary.

The following table can be used for calculating the flow velocity with different pipe-line dimensions:

Pipe Diameter	*Flow Velocity*
80 mm./ 2 in.	16 cu.m.p.h./m. per sec.
100 mm./ 4 in.	29 cu.m.p.h./m. per sec.
150 mm./ 6 in.	65 cu.m.p.h./m. per sec.
200 mm./ 8 in.	116 cu.m.p.h./m. per sec.
250 mm./10 in.	182 cu.m.p.h./m. per sec.
305 mm./12 in.	262 cu.m.p.h./m. per sec.

During loading and within 30 minutes after finishing loading, no conductive objects, such as thermometers, sounding tapes, etc., must be lowered into the tank, or be contained in the tanks.

It shall be noted that liners for thermometers and samplers shall be of a natural product; synthetic fibres must not be used.

After a period of 30 minutes, metallic equipment may be used for sounding, dipping, etc., but it is important that the equipment is grounded to the ship before it is lowered into the tanks, and that it remains grounded until it is removed from the tank hatch.

Firmly installed ullage measuring devices do not represent a static danger, provided that the float has conductive connection to the ship's deck, and metal guide wires are intact. Measurements and sampling with non-conducting equipment without metal parts are possible at any time. Measurements in sounding pipes are possible at any time, provided that the sounding pipe is below the liquid surface.

Rules for Handling Static Products: (With ullage measuring, sampling, temperature measuring, loading and discharge).

		Are static measures necessary?		
Product	Remarks	Tanks Inerted	Gas-free	Not Gas-free
Gas oil	Temperature lower than 45°C	No	No	Yes
Gas oil	Temperature higher than 45°C	No	Yes	Yes
Gasoline, Naphtha, Jet Fuel, Kero	Flashpoint below 60°C	No	Yes	Yes

LPG:

Propane (C_3H_8):	Colourless gas or liquid, almost odourless. Flash point: Less than −18°C. Explosive limit: 2% – 10% Health limit: 1,000 p.p.m.
Butane (C_4H_{10}):	Colourless liquid or white crystal-like dry matter. Flash point: Less than 0°C. Explosive limit: 1.5% – 9% Health limit: Not accessible

If this happens	*Do this*
Fire	Shut off the gas inlet, and use powder, CO_2 or other chemical extinguishing medium. Cool the tanks with sprinkler equipment or water fog.
Liquid in the eyes	Rinse the eyes carefully with clean water for at least 15 minutes. Go to see a doctor as soon as possible.
Liquid on the skin	Treat the exposed area with hot water until it is thawed. Go to see a doctor as soon as possible.
Inhaled vapour	Go out into the fresh air at once. If necessary, start resuscitation by "mouth-to-mouth" or "mouth-to-nose" method.
Spillage	Avoid contact with the liquid which will quickly evaporate. Avoid ignition. Contact the pier immediately if larger spillage should arise.

Working Procedure for LPG-Arm:

1. On arrival, attempts are to be made to position the ship in such a way that the Loading Arm gets the greatest possible freedom of motion when mounted on the manifold.
2. During cargo handling, the ship shall always lie within the operating range of the Loading Arm.
3. If one of the Loading Arm's limits is reached, an alarm consisting of a yellow quick flash signal, on a mast behind the Loading Arm will be activated. At the same time, an alarm will be activated at the pier office.
4. When the loading/discharging operation is complete, and the Loading Arm is drained empty, this is purged with nitrogen from ashore.
5. In case of a critical situation, the shore valve is closed by using the yellow actuator box placed onboard.

   There is no danger connected with the closing of this valve, as there are expansion systems at the pier.

IMPORTANT: The Loading Arm must only be operated when it is empty of liquid, as otherwise it will be out of balance.

Maximum operating pressure of the LPG-plant is 19 bar. If the maximum operating pressure is exceeded, an alarm bell will be activated at Pier C.

BALLAST: Ballast shall be discharged to a ballast tank ashore, with the exception of pure ballast water from clean permanent ballast tanks.

The ballast tank ashore can hold 4,500 cu.m.; there is usually about 2,000 cu.m. available.

It is important that all ships, which are to pump ballast water, as early as possible inform the Pier Foreman over VHF about the quantity of ballast water to be pumped ashore. Tankers of 7,000 d.w.t. and more, that wish to use the ballast facilities, shall as early as possible advise the pier via the ship's Agent of the quantity of ballast/purified water, which can be expected on arrival, as well as of the last cargo type.

The Refinery will only accept ballast water from ship's tanks, which on the previous voyage have contained mineral oil products. Ballast water, containing any kind of chemicals, cannot be accepted. While the ship is alongside the pier, all sea and overboard discharge valves in connection with the cargo system, must be kept closed and sealed. The sealing must only be broken in concert with the Pier Foreman.

On taking in ballast alongside the pier, sea valves must not be opened until the pump is working, and the other valves are open. Ballast tanks must not be filled higher than ullage 7 ft.

It is important in this connection to emphasise the danger of ballasting in tanks not free from gas. Watch out for gas concentrations both on the ship and at the pier, and reduce the ballast intake, if necessary.

Tank Inspection: Prior to loading, the tanks are to be inspected for water, impurities, and foreign matter by the pier personnel.

During the inspection, the loading valves must remain open so that there is no liquid in the pipes.

The inspection is to be done from the deck through the hatches or sounding holes by using torches or mirror.

The pier personnel are not allowed to enter ship's tanks without special permission.

Before entering a ship's tank, a permit must be obtained from the Pier Master or the Shift Supervisor, and only after having made sure personally and in concert with the Ship's Officer on duty that the situation is such that entering the tank is justifiable.

Inert Gas System and Tank Cleaning with Crude Oil: The Refinery does not make additional demands on Inert Gas Systems and tank cleaning with crude oil than those described in international regulations (IMO) and VIM 020-040-005.

It is the Master's direct responsibility to ensure that the inert gas plant is operated according to instructions, and that tank cleaning with crude oil is carried out safely and efficiently, and that loading officers, who are responsible for the cargo handling, are familiar with all rules and procedures for controlling the system.

The Refinery will normally always require a 100% COW of all cargo tanks designated for discharging in Kalundborg, in order to maximise the receiving quantity.

On arrival of the ship, a Pollution/Performance Inspector will go on board, and remain on board throughout the ship's stay.

The Inspector's task will be to assist the ship in all aspects, which can contribute to a safe and good operation alongside the pier, and to supervise that the stay proceeds within the existing safety/pollution limits, including a thorough check-up on tank cleaning with crude oil and the inert gas plant, and he will especially watch closely the percentage of oxygen in the ship's tanks, which at no time must exceed 8%, and that the inert gas plant always maintains a positive pressure in the cargo tanks during discharging.

If the ship is unable to maintain a positive pressure in the cargo tanks, or cannot maintain less than 8% oxygen in the tank atmosphere, the Shipmaster will be requested to shift to anchor until the inert gas plant is operative again, allowing for the risk of self-ignitable iron sulphides.

Prior to cargo handling, the responsible officer will be requested in concert with the Pollution/Performance Inspector, or the Pier Foreman, to fill in safety check lists and a check list for COW so that the ship as well as the Refinery may be sure that cargo handling can be commenced within the existing minimum safety regulations for the operation.

MEDICAL: Medical and dental treatment are arranged by the ship's Agent.

FRESH WATER: The ship can be provided with fresh water at a delivery rate of approximately 25 t.p.h.

FUEL: Bunkers and lubricating oils can be supplied through Dansk Esso A/S at cable address: Bunkeresso, Copenhagen, or through the Agent. Orders should be given in good time through the Agent before arrival.

TELEPHONE: A pay phone and a telephone for international calls are installed in the Pier Office building. There is a possibility of installing telephone on board for making international calls. Furthermore, a mobile telephone plant is set up with the Master. This gives access to the Refinery and the Danish authorities in case of an emergency. The telephone also gives access to Scandinavian calls.

SAFETY: *Mooring:* The ship shall be moored satisfactorily, and the ropes held taut during the entire stay at the pier. Steel wires must not be used for mooring unless they have rope tails and these are fastened on quick-release hooks. Wires and fibre ropes shall not be used together in the same direction.

Anchors not being used shall be secured.

Fire Wires: Fire wires shall be placed correctly fore and aft. Wire eyes shall be placed directly below the waterline, and adjusted regularly during cargo handling. The ends shall be properly secured to the ship's bollards, and have sufficient slack on deck. The slack of these wires shall be so secured that it can easily be broken by tugboats.

Access Between Ship and Pier: Immediately after completing mooring, the ship shall land a gangway ashore. The landing may consist of an adequately mounted gangway or accommodation ladder.

At Pier A, larger ships have a gangway from the shore. Special consideration has to be given to the difference in height between ship and pier which may grow large.

Emergency escape: In connection with the normal gangway/accommodation ladder described above, a safe and fast emergency escape possibility shall be readily accessible on both ship and pier.

On the ship, this can consist of a lifeboat ready for immediate use, placed aft.

GENERAL: *Duc d'Alba:* Ships must only moor at the pier, and not at the duc d'Alba.

Traffic at the pier: There is lively ferry traffic in the harbour. About 15 times in 24 hours, a ferry passes by the pier at a distance of 100 m. – 300 m. from the pier head.

Dry cargo ships up to 10,000 d.w.t. call at Kalundborg harbour at a distance of approximately 500 m. from the pier head. Sailing is done at reduced speed. Tankers and bulk carriers call at Asnaesvaerket in varying sizes up to about 160,000 d.w.t.

Sailing: As soon as loading/discharge is finished, all ships have to leave the pier on request.

Lightening: According to Order No. 472 of 21st September, 1978, by the Ministry of Commerce, lightening of tankers must only take place in position 55° 42.0′ N., 10° 59.8′ E., and within a radius of 0.3 nautical miles. When tankers lighten in Kalundborg Fjord, other vessels must pass the area with caution and at slow speed.

Lay-time: To expedite the turn-round of vessels, the Master is requested to co-operate with the personnel ashore in order to minimise the lay-time. Any delay arising, and which can be expected to drag on, must be reported to the Pier Office so that it can contribute to solving possible problems.

Portable Receiver: On arrival of the ship, the Officer on duty is handed a portable receiver. This radio must be turned on, and be carried during the entire stay at the pier. The radio is to be tested at regular intervals.

Lighters and Boats with Supplies: Lighters and boats with supplies are not allowed to lie alongside the quay or ship's side, unless they are properly equipped to work in a possible oil-containing atmosphere, and have permission respectively from the ship's Master and the Pier Master or his deputy.

Tide and Current: The difference between the average high tide and average low tide is about 0.3 m. A gale from N.W. can give a rise of 1.3 m. above the daily level, while a gale from S.E. can give a fall of 0.9 m. below the daily level. There is almost no current at the pier.

Winds: The predominant wind direction is West, but most of the gales come from N.W. Wind velocities which exceed 15 m./sec. (force 7) usually occur for about 20 hours a year from S.W., about 15 hours from West, 40 hours from N.W. and 25 hours from North.

Storage Supplies: For quantities exceeding 5 tons, supplies shall be arranged by sea via a special lighter (this rule does not apply to luboil supplies).

Repair of Nautical Equipment and Instruments: Repairs can be arranged through the Agent. It is recommended that the Agent receives such requests in good time.

Sanitary Measures: Standard regulations for Danish harbours regarding sanitary conditions apply at the Oil Pier. Waste must not be thrown overboard. Special waste containers are placed at the pier. Special consideration to avoid pollution of the pier from flushing of toilet, bathroom, etc., must be taken. If the ship wishes to pump sewage ashore, facilities are available at the pier, but a minimum notice of 6 hours is required. This is given via the Agent.

Mail: The Agent delivers and receives mail from the ship.

Visitors to the Ships: Only persons doing business may come to the pier. Visitors, such as guests of the Master, can get permission to come on board, on condition that the Master has made a request to the Pier Office. Further details on permission for visitors are available on application to the Pier Office.

On arrival of the ship, magnetic cards are handed out which give access to the gate into the pier area. It is the Master's responsibility together with the ship's Agent to ensure that cards are handed out to relevant members of the crew.

Oil Spillage: Attention is drawn to the fact that there have been bad experiences with regard to oil spillage, caused by opening sea valves before having started the ballast pumps, and by tanks overflowing during loading. Very small quantities of oil that get into the water have to be removed and this can become rather costly.

In order to spare the shipping company unnecessary expenses, the responsible persons are enjoined to have their attention directed to all conditions that can cause even small oil spillages. Oil spillage comes under the authorities' sphere, and that matters of dispute as to guilt can be referred to the police.

Air Pollution: The Master must take precautions against emitting large quantities of smoke from the funnel. Use of soot blowers whilst the ship is in port is not allowed.

Inspection: The Pier Master or his deputy must at any time be admitted to all ships to see that all directions are complied with.

Agent: Immediately after arrival of the ship, the ship's Agent goes on board so that the Master can inform him of the ship's necessities. Ships which are requested to anchor outside the harbour to wait for mooring space can possibly get an Agent on board at the anchorage. When the ship lies at the pier, telegrams and radiograms are to be delivered ashore. Contact the Agent for further information, and the Agent's representative for further dispatch via the facilities.

OPERATOR: Dansk Esso A/S, Refinery, DK-4400 Kalundborg, Denmark. *Tel:* (03) 511900. *Telex:* 44343. *Cables:* Essoraf. *Contact:* Pier Master.

KOGE: 55.27 N. 12.12 E. (See Plan)

DOCUMENTS: For Customs vessels require:

Vessels of 150 ton and upwards, Load Line Cert.

Vessels of 300 ton and upwards, Load Line Cert., Radio Safety Cert.

Vessels of 500 ton and upwards, Load Line Cert., Radio Safety Cert., Equipment Safety Cert.

For all passenger vessels also Safety Cert.

For stevedores vessel shall have Bills of Lading, Manifests and Loading plans.

PILOTAGE: Pilotage compulsory for all tankers and vessels over 300 g.r.t. or 750 d.w.t. Vessel to call Pilot 2 hours before arrival. VHF on pilot station and pilot boat. Watch on Channel 16. Normal international light and sound signals used. Pilot boat located about 2 nautical miles East of port. No difference in bad weather.

ANCHORAGES: 1–2 nautical miles East of port with good bottom conditions.

RESTRICTIONS: See "General" before first port.

MAX. SIZE: Max. permissible length, 150 m.; max. permissible draft, 7 m.

HEALTH: Normal quarantine rules.

RADIO: Lyngby Radio or any other radio station in Denmark.

TUGS: 1 tug of 300 h.p. available. Additional tugs can be obtained from Copenhagen.

STEVEDORES: Normal ETA and description of vessel required.

MEDICAL: Doctor and hospital assistance available; other facilities to be obtained from Copenhagen.

TANKERS: Only 1 tanker berth, no specific requirements. LPG also handled.

FRESH WATER: Water from wharf.

FUEL: Products are delivered in Koge, others from Copenhagen.

FIRE PRECAUTIONS: Normal fire precautions. Tankers cannot request to go to berth before loading/discharging. 2 fire watchmen from the fire department.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: See "General" before first port.

IDENTIFICATION CARDS: Not needed.

CONSULS: Nearest at Copenhagen.

REPAIRS: Small repairs.

DRY DOCKS: 2 small slipways for vessels up to 200 tons.

REPATRIATION: No facilities exist.

AIRPORT: Nearest in Kastrup Lufthavn; Copenhagen about 40 km. away.

TIME: GMT plus 1 hour.

HOLIDAYS: Normal Danish holidays, change from year to year. Normally work can be arranged.

POLICE/AMBULANCE/FIRE: Ambulance and Fire (03) 653300; Police 651448 or use alarm 000.

TELEPHONE: No arrangements exist for placing on board.

Tobacco and Spirit List, covering all goods on board belonging to crew, officers, Master, ship's bar or passengers.

PILOTAGE: Pilotage not compulsory. Pilot boards at the entrance of Isefjord and takes the vessel to the port and berths her. Pilots listening on VHF Channel 16.

Pilots to be ordered by ETA telegram to Agent at least 24 hours in advance.

ANCHORAGES: Larger vessels anchor in 15 m. – 20 m. of water either in the Isefjord or outside the entrance to the Isefjord. Holding ground good.

RESTRICTIONS: Arrival only by daylight. No tide under normal conditions. Vessel's draft entering Isefjord not to exceed 22 ft.

Also see "General" before first port.

HEALTH: No special restrictions as to Free Pratique, which will be granted by authorities on arrival. Suspected disease or fever must be telegraphed to Agents before arrival.

RADIO: Lyngby Radio.

VHF: Channel 16 to pilot station (also Skaw Pilot).

RADAR: No installation.

TUGS: Available. Join at Isefjord, outside the entrance to the port of Kyndby, ship's lines to be used.

BERTHING: One Oilberth: length 570 ft., draft 21 ft. 6 in. One Coalberth: 530 ft. long, draft 22 ft. Water brackish.

CRANES: As berth private, only handling own coal cargoes – 3 cranes available.

STEVEDORES: Private stevedores to be ordered through receivers – coal discharge – rate per crane per hour: about 200 tons.

MEDICAL: All medical and hospital facilities available, no advance notice necessary.

TANKERS: 2 discharge hoses, one of 12 in. and one of 16 in.

No slop facilities.

One tanker berth, safe arrival draft: 21 ft. 6 in. Average discharge rate: 1,000 t.p.h.

DENSITY: Brackish.

FRESH WATER: By hose from quay – 10 t.p.h., D. Kr. 2.50 per ton.

FUEL: Available from all bigger companies by trucks or barge from Copenhagen – about 40 miles from Kyndby.

FIRE PRECAUTIONS: No specific precautions.

CONSULS: Nearest Copenhagen about 40 miles from Kyndby.

REPAIRS: All types of smaller repairs can be carried out.

DRY DOCKS: No dry dock available.

SURVEYORS: All bigger Classification Societies represented in Copenhagen about 40 miles from Kyndby.

GANGWAY/DECK WATCHMEN: Watchmen not necessary but available.

OPENING/CLOSING HATCHES: To be carried out by crew.

CUSTOMS ALLOWANCES: See "General" before first port.

CARGO GEAR: Shore coal cranes.

REPATRIATION: Can be arranged normally via Copenhagen about 40 miles from Kyndby.

AIRPORT: About 40 miles to Airport in Copenhagen.

TIME: GMT plus 1 hour (from late September – late April). GMT plus 2 hours (from late April – late September).

HOLIDAYS: Saturday/Sunday normally no work, and further no work on holidays declared as official Danish holidays.

POLICE/AMBULANCE/FIRE: 0–0–0 all alarms.

TELEPHONES: No telephone connection on board.

SERVICES: No tank-cleaning facilities; all other services to ships can be arranged through specialists from Copenhagen.

SHORE LEAVE: No restrictions.

IDENTIFICATION: No shore passes necessary.

REGULATIONS: None.

DELAYS: None.

DEVELOPMENTS: None at the present time.

AUTHORITY: Private port owned by: Elektricitetsselskabet "Isefjordvaerket" I/S., Strandvejen 102, DK–2900 Hellerup. *Tel:* 451627100 and 452883200. *Telex:* 37500 IFV DK. *Cables:* Isekraft.

Local office: Kyndbyvaerket.

MASNEDOEVAERKET: 55.00 N. 11.53 E.

LOCATION: Masnedoevaerket is situated on the island of Masnedoe, which is connected to Sjaelland by a bridge 150 m. East of the harbour.

DOCUMENTS:

Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Derat Certificate or Exemption.
Bill of Lading.
Crew List.

Customs need a Tobacco and Spirit List, showing the vessel's and the crew's supply on arrival. Nearest Customs at Naestved.

PILOTAGE: Pilot boarding ground off Masnedo N.W. flak. Sea Pilots available from Spodsbjerg, Korsor or Gronsund.

APPROACHES: From West via Smalandsfarvandet depth of water 24 ft. From South East via Gronsund, max. draft permitted 16 ft. 6 in. From Pilot boarding ground, there is a buoyed channel, dredged to 7 m., with leading lights.

ANCHORAGES: Off the entrance channel.

MAX. SIZE: LOA 120 m., beam 25 m. and draft 6.8 m.

TUGS: Available on request, not normally used by vessels less than 4,500 d.w.t.

BERTHING: Power station quay 270 m. long, depth alongside 7 m.

CRANES: There are 2×7.5 ton travelling cranes and 1×100 ton crane.

BRIDGES: Storstromsbroen has a vertical clearance of 26 m. A new bridge was opened in 1985 across the Storstrom with a vertical clearance of 21 m. Power lines with 36 m. vertical clearance lie to the West of the harbour.

FRESH WATER: Available from hose on the quay.

FUEL: Available by tank truck.

REPAIRS: Minor repairs can be carried out at nearby machine shops.

AIRPORT: Copenhagen, 60 miles distant.

AUTHORITY: SEAS-Sydostsjaellands Elektricitets Aktieselskab, Tingvej 7, 4690, Haslev, Denmark. *Tel:* 03-692700. *Telex:* 40234. *Cables:* Seas. *Contact:* Peter Ramussen.

MIDDELFART: 55.30 N. 09.44 E. (See Plan)

DOCUMENTS: See "Copenhagen".

PILOTAGE: Not compulsory. Middelfart Pilot Station operates on Channel 16.

MAX. SIZE: 5,000 d.w.t. – 6,000 d.w.t., 6.5 m. draft.

TUGS: Available at short notice.

BERTHING: New Harbour: 2 quays, one of 190 m. length, depth 6.5 m., the other of 100 m. length, depth 5.7 m.

Old Harbour: 2 quays, one of 100 m. length, the other of 80 m. length, depth 6.5 m. at both quays. Ro-Ro ramp.

Private Wharves: A. C. Hansens Quay, length 90 m. max., draft 4.6 m. Open to public traffic.

Nordiske Kabel & Trpdfabrikkers Quay, max. length 100 m., depth 7 m.

CRANES: One 15 tonne mobile crane. One 3 tonne crane at A. C. Hansens Quay. Mobile cranes of all sizes available at short notice.

BULK CARGO FACILITIES: Cranes and forklifts of 2 – 15 tonnes. Crane at A. C. Hansens Quay for bulk stores.

STEVEDORES: Working hours: 0700 – 1600 (overtime possible). *Rates of Work:* Bulk Cargo: 200 t.p.h. Iron, etc.: 180 t.ph.

MEDICAL: Local hospital available.

FRESH WATER: Available.

FUEL: All grades of fuels and lubricants available at short notice.

DRY DOCKS: One slip for vessels up to 100 tonnes.

CUSTOMS REGULATIONS: See "General" before first port.

AIRPORT: At Billund and Beldringe, both 30 km. away.

TELEPHONES: This service is available aboard ships at all berths by prior arrangement through the Agent. Standard rates apply.

AUTHORITY: Middelfart Havnekontor, Havnegade 79, DK-5550 Middelfart, Denmark. *Tel:* 09-410253. *Contact:* Mogens Jensen, Harbour Master. Office hours 1100 – 1200 hrs.

AGENT: Middelfart Shipping, Havnegade 18, DK-5500 Middelfart. Tel: 09-410072. Telex: 58240 "Miship DK". Cable: Midship.

NAESTVED: 55.14 N. 11.45 E. (See Plan)

DOCUMENTS: See "Kalundborg".

PILOTAGE: Compulsory between the entrance to Karrebaeksminde and Naestved for all ships over 150 g.r.t. VHF Channel 16. Tel. 03 – 727366 and 03 – 742397.

ANCHORAGES: 1 – 2 miles S.W. of head light in Karrebaeksminde in 10 m. – 12 m. depth.

RESTRICTIONS: Only navigable from half hour before sunrise to half hour after sunset, and according to tides. Also see "General" before first port.

Use of tug compulsory through bridge for vessels over 1,800 d.w.t.

MAX. SIZE: Max. length 100 m. Max. draft 5.60 m. with breadth 12.20 m. Max. breadth 14.40 m. with draft 4.80 m.

HEALTH: See "Kalundborg".

RADIO: Lyngby Radio. VHF Channel 16.

TUGS: M/S "Eno" 360 h.p. VHF. Ship's lines. Also see "Restrictions".

BERTHING: No berthing in Karrebaeksminde. Naestved 3 quays: 365, 270, 170 m., all with depth 6 m.

BRIDGES: One in Karrebaeksminde, total width 22.0 m. with open bridge, free side height is 20.0 m. Also see "Restrictions".

MEDICAL: Hospital available.

FRESH WATER: Available from quay, 10 t.p.h.

FUEL: All grades. Deliveries by lorry only.

AIRPORT: Kastrup Airport, Copenhagen 90 km. away.

TIME: GMT plus 1 hour.

SHORE LEAVE: No restrictions.

AUTHORITY: Naestved Havnekontor, Toldbodgade 4, 4700 Naestved. *Tel:* 03 – 720056. *Contact:* E. Andersen, Harbour Master.

NAKSKOV: 54.50 N. 11.08 E. (See Plan)

DOCUMENTS:
Tonnage Certificate.
Load Line Certificate.
Valid Derat Certificate (renewal at Nakskov possible).
Crew Declaration.
3 Crew Lists.

PILOTAGE: At Albuen at the entrance of the firth. The pilot station named "Belt Pilot". VHF Channel 16. Notice of ETA to be given as early as possible and not later than 4 hours before arrival.

ANCHORAGES: Safe anchorage in port area for smaller vessels or outside on the Roads in Langelandsbaelt. The pilot station will advise best position depending on wind and current.

RESTRICTIONS: Sailing to and in the harbour at night-time with help of projector and with good visibility only. Also see "General" before first port.

MAX. SIZE: D.w.t.: Approx. 2,000 tons. Draft: 19 ft., Length: 660 ft., Breadth: 70 ft., Height: None – no bridges to pass.

RADIO: Lyngby Radio.

VHF: Operated by Harbour Office during daytime only on Channel 16.
Also communication via the pilot station on VHF Channel 16.
All movements to be reported to the Agent only.

TUGS: Tug available with 24 hours notice.

BERTHING: Protected from all winds. Depth up to 20 ft. 6 in. (6.3 m.) 7,500 ft. of quay. In the fairway leading up to the harbour there is a depth of 20 ft. 6 in. (6.3 m.), distance about 6 miles. Max. draft in Fairway 19 ft.

BRIDGES: No bridges to pass. Airdraft unlimited.

STEVEDORES: Arranging gangs for work after noon, notice to be given to the stevedores latest 0900 hrs. For work in the morning, notice to be given to the stevedores the day before latest noon.

CARGO HANDLING FACILITIES: Tracks along the quays in connection with the railway station and all Danish Railways. Also good road connections.

3 grain silos: 4,000, 12,000 and 15,000 tons. 3 grain elevators loading rate 120, 80 and 50 t.p.h. respectively. 1 grain elevator discharging rate 40 t.p.h.

4 mobile belt conveyors loading up to 110 t.p.h.
2 mobile cranes (22 and 32 tons capacity) – also grab and polygrab.
3 forklifts 2.0 – 3.5 tons available. Up to 4.5 tons on request.
3 miniloaders (Bobcats) for discharging of bulk cargoes.

MEDICAL: Treatment all kinds possible, including hospital. Medical attention at dentist, eye and ear specialist normally requires 24 hours notice if possible.

DENSITY: Fresh water.

FRESH WATER: Available from quay or by truck.

FUEL: Available.

CONSULS: Dutch, Finnish, French, Norwegian and Swedish.

REPAIRS: Blacksmith and electrical workshops available to carry out some repairs on deck and engine.

SURVEYORS: At present no surveyors at Nakskov. Must be ordered from Copenhagen.

GANGWAY/DECK WATCHMEN: Not necessary.

DRY DOCKS: Shipyard provided with 2 dry docks up to 32,000 d.w.t., building slips up to 35,000 d.w.t. Cranes to lift up to 100 tons.

OPENING/CLOSING HATCHES: Always carried out by crew.

CUSTOMS ALLOWANCES: 40 cigarettes or 40 grams tobacco, 0.25 litre spirits and 0.25 litre wine per man per day.

DELAYS: Normally no berthing delays.
DEVELOPMENTS: None.
AUTHORITY: Morsoe Kommune, Jernbanevej 7, 7900 Nykobing Mors. *Tel:* 07-721488. *Contact:* B. F. Nielsen, Harbour Master, Havnekontoret, 7900 Nykobing Mors. *Tel:* 07-720049.

ODENSE: 55.25 N. 10.23 E. (See Plan)

DOCUMENTS:
- Ship's Register.
- Load Line Certificate.
- Radio Safety Certificate.
- Safety Equipment Certificate.
- Derat Certificate or Exemption.
- 1 Crew List.
- 1 Stores List.
- 1 Crew Personal Effects List.
- 1 Cargo Manifest or Bills of Lading.

PILOTAGE: Compulsory for all tankers and for all other vessels of 750 d.w.t. and over. Odense Pilot boards just North of light-buoy 2A outside of Gabet. In bad weather the Pilot will board inside of Gabet between light-buoys 2 and 4. Send request for Pilot 6 hours and 1 hour in advance.
ANCHORAGE: Inside of Gabet in depths of 7.5 m. Larger vessels anchor outside of Gabet.
RESTRICTIONS: Port is entered through dredged canal, minimum 35 m. wide, 7.5 m. deep. Navigation usually throughout the year. Ice-breaker assistance available if necessary. Vessels over 3,000 d.w.t. enter in daylight only. Speed limit of 6 knots in entrance canal. Arriving ships must wait for vessels leaving port. Also see "General" before first port.
MAX. SIZE: Draft, max. 6.7 m. fresh water, length, max. 160 m. controlled by swinging basin and draft. Permissible draft for vessels over 100 m. in length to be obtained from Agent.
HEALTH: Pratique granted by Customs Officers who bring Health Declaration for Masters to complete. In event of suspected disease or fever on board radio details to Agent before arrival.
RADIO: Lyngby Radio.
VHF: Port Authority and tug communicate on Channel 12, Odense Pilot on Channels 16 and 12.
TUGS: Tug is available (660 h.p.). Not compulsory but necessary for large vessels. Tug normally joins vessels in port. Large vessels at Gabet. Ship's line.
BERTHING: Three harbour basins including 4,200 m. of quays with depth of 7.5 m. alongside. Coal quays at Fynsvaerket, depth 7.5 m. alongside.
CRANES: At Basin I: 1×3.5 ton crane with grab if needed.

At Basin II: 1×3.5 ton crane with grab if needed.

At Basin III: 2×6 ton cranes, 1 with grab if needed; 1×15 ton crane and 1×50 ton crane.

Quay along the canal: 4 private cranes with grab.

At Fynsvaerket: 2 cranes with grab and 1 continuous unloader.

Also available in the port: 1×6 ton mobile crane and 1×16.5 ton mobile with grab if needed. No floating cranes.
BULK CARGO FACILITIES: 5 private suction-installations for grain, etc. Coal and chemicals are handled by crane.
SPECIAL CARGO FACILITIES: Berths available for handling of containers and ro/ro traffic.
BRIDGES: No bridges but power lines max. height 45 m.
STEVEDORES: To be arranged through Agent.
MEDICAL: Doctors and hospital facilities anytime. Arrange through Agent.
TANKERS: One berth length 160 m., depth 7.5 m. also one jetty, depth 6 m.
DENSITY: 1003.
FIRE PRECAUTIONS: In addition to the usual precautions a firefighter is posted at the vessel while in the port when the cargo is petrol, kerosene, etc.
AIRPORT: Situated 15 km. from the harbour. 3 – 5 flights a day to and from Copenhagen.
POLICE/FIRE/AMBULANCE: Dial 000 and ask for service required.
CONSULS: All European countries represented.
FRESH WATER: Available by pipe-line at all berths. Rate: 10 – 15 t.p.h.
FUEL: All grades available by road transport.
CUSTOMS ALLOWANCES: See "General" before first port.
TIME: GMT plus 1 hour. Summertime GMT plus 2 hours.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Prayer Day; Ascension Day; Whit Monday; Christmas Day; Boxing Day.

Half-holidays: May 1st, June 5th and December 24th. Work can be arranged.
REPAIRS: All engine and boiler repairs can be effected.
DRY DOCKS: One 500,000 d.w.t. and two 100,000 d.w.t. dry docks in Lindoe Shipyard.
SURVEYORS: N.V. and Lloyd's.
HATCHES: Normally opened by ship's crew.
REPATRIATION: Can be arranged.
TELEPHONES: No telephones on board.
SERVICES: Compass adjustment can be arranged.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not necessary.
REGULATIONS: Nothing unusual.
DELAYS: None.
AUTHORITY: Odense Port Authority, Londongade 1, DK-5000 Odense C, Denmark. *Tel:* (09) 120025. *Contact:* Harbour Master.

OREHOVED: 54.57 N. 11.51 E. (See Plan)

PILOTAGE: Pilots may be ordered through Masnedo Pilot on VHF Channel 16 or through the Harbour Authorities.
MAX. SIZE: Max. LOA 150 m., Max. draft 6.5 m.
VHF: Harbour Office on Channel 16 during office hours and when vessel expected. Working on Channels 13 and 12.
TUGS: To be ordered 12 hours in advance.
BERTHING: Length of quay 165 m. Depth alongside 5.0 m. – 7.0 m. Depth in basin 7.0 m.
CRANES: 1×20 ton travelling crane.
FRESH WATER: Available
AUTHORITY: Orehoved Shipping and Stevedoring Aps., Orehoved Havn, DK-4840, Nr. Alslev. *Tel:* (03) 84 61 58. After Hours: (03) 84 63 61, (03) 83 47 42. *Telex:* 40104. *Cables:* Shipohoj.

RANDERS: 56.29 N. 10.04 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Lists with statement of each crew member's cigarettes, tobacco and spirits.

PILOTAGE: Apply for Pilot 6 hours before arrival. VHF Channel 16, one hour before. Pilot station, Tel: 06-485024.
ANCHORAGE: Outside Entrance buoy in 8 m.
RESTRICTIONS: Only vessels less than 1,000 d.w.t. may enter at night. Also see "General" before first port.
MAX. SIZE: Max. length, 475 ft.; breadth, 57 ft.; draft, 19 ft.
HEALTH: No special requirements.
RADIO: Lyngby Radio and Skaw Radio.
VHF: VHF service from Harbour Office, Channel 16, icebreaking 16.
TUGS: 900 h.p. tugs available – use ship's lines.
BERTHING: 76 berths available. Depth alongside 7 m.
STEVEDORES: Ordered by Agents. Working periods: Monday to Friday 0730 – 1130 hrs., 1200 – 1615 hrs. Saturday no work.
MEDICAL: Hospital facilities available.
TANKERS: 6 in. and 8 in. discharge lines; no slop facilities.
DENSITY: Brackish in port area. No tide.
FRESH WATER: Shore installations.
FUEL: All grades. Deliveries by lorry only.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Tonnage Certificate, Derat Certificate, Load Line Certificate.
CUSTOMS ALLOWANCES: See "General" before first port.
IDENTIFICATION CARDS: Not required.
CONSULS: Norway (06) 42 61 00, Finland (06) 42 51 11, Sweden (06) 420022, Iceland (06) 42 55 55.
REPATRIATION: Several hotels and Seamans' Home.
REPAIRS: Engine repairs and minor repairs.
SURVEYORS: Arranged by Agent.
AIRPORT: Tirstrup Airport 40 km. from Randers, 5 – 7 daily connections with Copenhagen.
TIME: GMT plus 1 hour in Winter. Summertime from April-October.
HOLIDAYS: 1st January (New Year); Maundy Thursday, Good Friday, Easter Monday; 1st May from 1200 hrs. (Labour Day); Whit Monday from 1200 hrs.; 24th December from 1200 hrs.; 25-26th December (Christmas).
POLICE/AMBULANCE/FIRE: Tel. 000.
AUTHORITY: Harbour Master, Randers Havnevaesen, Ostervold 46, 8900 Randers. *Tel:* 06 – 421057. *Contact:* G. Drachmann, Harbour Master.

RODBY: 54.39 N. 11.20 E. (See Plan)

DOCUMENTS:
1 Crew List.
1 Passenger List.
1 Stores List.
1 Manifest or Bill of Lading.

PILOTAGE: As the harbour is so easily accessible there is no Pilot. A person with local knowledge may be engaged by calling ferry "Danmark" VHF 16.
ANCHORAGES: At a distance of 1.5 – 2 miles, bearing S.E. – S.S.E. of approaching buoy, depth of water 10 m.
RESTRICTIONS: See "General" before first port.
REGULATIONS: Ferries owned by D.S.B. or D.B. (Train ferries) have priority using the entrance.
MAX. SIZE: Largest vessel: Length 80 m. Draft 4.5 m. Depth of water in North and West Basin: 5 m. N.E. Storm can give rise of up to 1.5 m. S.W. Storm can give fall of 1.2 m. on daily depth.
HEALTH: No Certificates required.
RADIO: All messages via "Lyngby Radio" and Port Radio, VHF Channel 16, working Channels, 8, 10 and 11.
TUGS: None.
BERTHING: Quay length 518 m. equipped with 1 mobile crane 25 tons capacity. Two grain silos, loading capacity 60 – 90 t.p.h.
STEVEDORES: Provided by "LF Shipping" Tel: 03.905522. Telex: 40022; Shipbroker A. Hovmand, Tel: 03.888011, Telex: 40256; Shipbroker H. Kristiansens Eftf, Sakskobing, Tel: 03.894434.
MEDICAL: 2 hospitals available.
FRESH WATER: Can be supplied alongside the quay.
FUEL: Obtainable alongside the quay.
OPENING/CLOSING HATCHES: By crew or stevedores, ship's option.
CERTIFICATES: On arrival, ship's register only.
CUSTOMS ALLOWANCES: See "General" before first port.
IDENTIFICATION CARDS: Not required.
AIRPORT: Maribo Airport, 14 km.
SHORE LEAVE: After clearing inwards, Crew members are allowed to go ashore without special permission.
AUTHORITY: Havnekontoret, Ostre Kaj 3, 4970 Rodby. *Tel:* 03.905722. *Contact:* Johs Rasmussen, Harbour Master, *Tel:* 03.855522 (private). Assistant *Tel:* 03.900407.

RONNE: 55.06 N. 14.42 E. (See Plan)

DOCUMENTS:
1 Crew List.
1 Passenger List.
1 Customs Declaration.
1 Declaration for crew's tobacco, spirits, etc.
1 Declaration of Health.
1 Declaration to Police, number of crew, passengers, etc.
1 Bill of Lading (or Manifest).

PILOTAGE: Apply for Pilot via Ronne or Lyngby Radio, advance notice not less than 1 hour. Pilot listens continuously on VHF. Call Ronne Pilot or Ronne Harbour. Area where Pilot to be taken on board is by Ronne Light Buoy, 2 miles S.W. of the harbour; if weather bad pilot boat guides the ship inside the breakwater and then Pilot boards.
ANCHORAGE: No safe anchorages outside the harbour.
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Max. length 400 ft. – 450 ft., draft 22 ft. There is no tide.
HEALTH: No special procedure necessary, but if there is suspected disease or fever on board or ship comes from area with fever, etc., call for quarantine doctor. If ship's last call was Danish port Pratique automatic.
RADIO: Ronne Radio, call-sign OYE; or Lyngby Radio, call-sign OXZ.
VHF: Listens on Channel 16. Working Channels 12 and 13. Same in tug and Pilot boat. Mainly traffic concerning pilotage and harbour operations.
RADAR: Located at pilot station, mostly look-out aid, but advice on entering can be given.
TUGS: Normally join the vessel inside breakwater; ship's lines to be used.
BERTHING: 3 berths equipped with hydraulic ramps for roll-on/roll-off traffic via stern or head only, one of which is suitable for ships up to 450 ft. length, 65 ft. beam, draft 21 ft.

3 berths for sand loading 400 – 600 t.p.h., for vessels up to 350 ft. length, 21 ft. draft.

2 berths for macadam loading 400 t.p.h., for vessels up to 300 ft. length, 21 ft. draft.

3 mobile cranes with capacities up to 60 tons are available for both hook and grab operations.

Also berths for handling coal and grain.

STEVEDORES: To arrange gangs Monday morning, advices have to be given Friday before 1100 hrs. To arrange work other days, notice must be given before 1600 hrs. the day before.
MEDICAL: Hospital facilities are available. It is not necessary to give advance notice.
TANKERS: Two berths for coastal tankers draft up to 22 ft., length up to 300 ft. For tankers of 1,500 d.w.t. and upwards, Pilot is compulsory when entering and leaving the port.
FRESH WATER: Available 10 – 12 t.p.h.
FUEL: Light fuel, Redwood 200 sec. Heavy fuel 3500 sec., also 1000 and 1500 sec. Notice 6 hours ETA.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Carried out by crew.
CERTIFICATES: Nationality Certificate, Derat Certificate, Load Line Certificate, Radio Certificate. (Safety Certificate for passenger ships only).
CUSTOMS ALLOWANCES: see "General" before first port.
IDENTIFICATION CARDS: Not needed.
CONSULS: The following countries are represented in Ronne: Sweden, Finland, France, Netherlands, Norway and Germany (F.R.).
REPAIRS: All kinds of repairs can be carried out.
SURVEYORS: Available from Copenhagen. The Harbour Master has from time to time been appointed by insurance companies and surveyors to carry out hull and cargo surveys.
DRY DOCKS: Only small ships up to 350 tons.
REPATRIATION: Possible.
AIRPORT: 3 miles, served 3 – 5 times per day by SAS to Copenhagen.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours from April 6th to September 28th.
HOLIDAYS: New Year's Day; Easter, 3 days Thursday, Friday, Easter Day (Monday); May 1; Whit Monday; June 5; Christmas Eve; Christmas Day; 2nd Christmas Day. Cargo work only possible for foodstuff, etc.
SERVICES: Compass adjustment at Duc d'Albe in Southern part of Forhavn.
BANKS: No American or European banks in this area, most Danish banks have connections with the major international banks.

Kobenhavns Handelsbank, Ronne Branch. Tel: (03) 95 22 11, Telex: 48155 Roco Dk.

Bornholmerbanken, Ronne. Tel: (03) 95 00 61, Telex: 48117 Bornbk Dk. Connected to Den Danske Provinsbank, Copenhagen, American Express International Banking Corp., London and Midland Bank Ltd., London.

Andelsbanken, Ronne. Tel: (03) 95 20 01. This bank is a branch of Andelsbanken, Copenhagen, which has Telex: 27086 Dk. Connected to London & Continental Bankers Ltd., London, Internationale Genossenschaftsbank, Basel Switzerland and Europaischer Genossenschaftsbank, Zurich, Switzerland.

STORING: See "Prelims".

1. Vessels can be stored both by truck and by barge, but as all loading and discharging is taking place alongside piers, barges are never used for storing ships. Furthermore, no special barges are available for that purpose.
2. There are no special regulations concerning the storing of ships. Normally ships do not take large quantities of stores at Ronne.
3. Trucks can proceed alongside ships on all piers except on Pier 12 (oil pier), where the truck must remain about 80 yards from the ship.
4. Likewise fork lifts can be used on all piers except Pier 12.
5. Customs regulations regarding bonded stores only.
6. Normally only the ship's crew employed.

EMERGENCY CO-ORDINATION CENTRE: Emergency operations in Danish waters are co-ordinated by the Royal Danish Navy. Emergency operations in the area around Bornholm are co-ordinated and guided by the Royal Danish Navy Surface Rescue Centre. Tel: (03) 95 20 11. No telex number is available, but on request by telephone the rescue centre can answer by telex.
SHORE LEAVE: Allowed.
AUTHORITY: Ronne Havnevaesen, Havnekontoret, Finlandsvej 3, 3700 Ronne, Denmark. *Tel:* 03-950678. *Contact:* John Lou, Harbour Master.
Harbour Board (Municipal): Ronne Kommunes Havneudvalg, Landemaerket 26, 3700 Ronne, Denmark.

SKAELSKOR: 55.15 N. 11.18 E. (See Plan)

Admiralty Charts 2597 and 2118 cover the approaches to and the port of Skaelskor. Depth at the entrance to port is 4.5 m.
DOCUMENTS: See "Copenhagen".
PILOTAGE: Not compulsory. Pilot to be ordered via Agents with minimum 6 hrs. notice. Pilot vessel is equipped with VHF; Channels 16, 12, 10 and 6.
ANCHORAGES: Available outside Skaelskor Fjord.
RESTRICTIONS: Entering the port at night is permitted only by vessels equipped with a searchlight.
MAX. SIZE: Max. draft 4.2 m., max. length 60 m., max. beam 10 m.
HEALTH: Usual Danish regulations apply.
RADIO: Lyngby Radio.
VHF: See "Pilotage".
TUGS: None.
BERTHING: Outer harbour: depth 4.5 m., 200 m. quayage. Inner Harbour: depth 3.8 m., 120 m. quayage.
CRANES: 1 mobile crane with 7 tons lifting capacity.
BULK CARGO FACILITIES: 1 belt conveyor available for loading grain.
MEDICAL: Facilities available.
TANKERS: No dirty ballast facilities available.
DENSITY: Varies from 1007 to 1023.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Can be undertaken.
DRY DOCKS: None.
SURVEYORS: Available.
REPATRIATION: Can be arranged.
AIRPORT: Nearest at Copenhagen.
TIME: GMT plus 1 hr.; Summertime (March – September) GMT plus 2 hrs.
TELEPHONES: No facilities for placing telephones on board vessels exist.
AUTHORITY: Municipality of Skaelskor: Skaelskor Kommune, Naestvedvej 15, DK-4230, Skaelskor. *Tel:* (03) 594271. *Contact:* J. Boas or R. Larsen.

AGENT: Aage C. Frederiksen I/S, P.O.Box 4, DK. 4230 Skaelskor. Tel: 453 594002. Cables: "Shipbroker". Telex: 40222 (ACF DK).

SKAERBAEK: 55.31 N. 09.37 E. (See Plan)

DOCUMENTS:
- Ship's Register.
- Load Line Certificate.
- Radio Safety Certificate.
- Safety Equipment Certificate.
- Derat Certificate or Exemption.
- 1 Crew List.
- Stores List.
- Crew Personal Effects List.
- Cargo Manifest or Bills of Lading.

PILOTAGE: Not compulsory. Pilot joins at mouth of Kolding Fjord. Can be contacted by VHF Channel 16.
Bigger ships usually take Pilot by Skaw L/V. Pilots to be ordered by ETA-telegrams to Skawpilot Skagen, at least 12 hours in advance. Skawpilot listening on VHF Channel 16.
ANCHORAGE: Off Skaerbaek in depths of 39 ft.
RESTRICTIONS: See "Tankers" and "General" before first port.
MAX. SIZE: LOA 250 m. Max. draft 38 ft.
RADIO: Lyngby Radio.
TUGS: Available, at short notice.
BERTHING: Power station wharf: 253 m. length; depth alongside 23 ft. Oil Jetty: depth 39 ft.
CRANES: 2×12 ton coal cranes.
STEVEDORES: Working hours: Monday to Friday 0700 – 1530 hrs.
TANKERS: One berth, depth 39 ft. (11.9 m.). Max. length between bow/stern and manifold 127 m. (417 ft.). 3×12 in. discharge arms, rate 4,000 t.p.h.
MEDICAL: Medical attention available, nearest hospitals at Kolding and Fredericia.
DENSITY: 1017 (approx.).
REPAIRS: Local machine shops can manage small repair jobs.
DRY DOCKS: None.
FRESH WATER: Obtainable from quay.
FUEL: Available by barge from Fredericia.
CONSULS: Nearest at Kolding. Distance 15 km.
REPATRIATION: Possible.
AIRPORT: Billund or Odense, both approximately 50 km. distant, and with daily flights to Copenhagen.
CUSTOMS ALLOWANCES: See "General" before first port.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Prayer Day; Ascension Day; Whit Monday; Christmas Day; Boxing Day. Half holidays: May 1st, June 5th and December 24th.
AIRPORT: Billund Airport, 40 km. distant.
AUTHORITY: I/S Den Sydostjydske Faellescentral Skaerbaekvaerket, DK 7000 – Fredericia. *Tel:* 05/562466 or 05/562733. *Telex:* 51145. *Cables:* Elship Fredericia.

SKAGEN: 57.43 N. 10.36 E. (See Plan)

DOCUMENTS: Crew List, Tobacco List, Stores List, Derat Certificate, Health, Tonnage, Nationality and Cargo documents.
PILOTAGE: Local Harbour Pilot available on request to the Harbour Office. Sea Pilot may take vessels to all harbours on the East coast of Jutland, to the Sound, and through the Great Belt to the Baltic Sea. Tel: 08445566 or VHF Channel 16.
ANCHORAGES: Off the harbour entrance.
APPROACHES: The entrance between the outer moleheads is 75 m. wide and facing S.E. Approaching vessels should – when 400 m. from the entrance – keep the leading lights in line bearing 334°. Entering vessels have right of way over departing vessels. Maximum speed inside the outer harbour is 3 knots.
Tides and Current: Tidal range 0.3 m. Gale from W. may raise the sea level by 1.4 m. and from E. lower it by 0.9 m. Winds from S.S.W. – W. cause N.E. going current and those from N. – E. – S.E. cause S.W. going current. The prevailing current runs N.E., up to 2 knots.
MAX. SIZE: Largest vessels which can enter Skagen Harbour: Length 125 m., beam 18 m., draft 5.7 m.
VHF: Day and night watch on Channel 16 by Port Captain's Office.
BERTHING: The harbour consists of 6 basins. Depths: Outer Harbour 6.0 m.; East Basins I & II 6.0 m.; Auction Basin 5.0 m.; Middle Basin 4.5 m.; West Basin 4.5 m.; Pound Net Basin 3.5 m.
FRESH WATER: Available.
FUEL: Available by barge.
DRY DOCKS: Yards with slips for vessels up to 50 m. length and 600 tonnes displacement.
GENERAL: Imports: Oil; Exports: Fishmeal and other fish products.
AUTHORITY: Skagen Havn, Havnekontoret, Havnevagtsvej 30, DK 9990 Skagen, Denmark. *Tel:* No. 08–441060. *Contact:* Bruno Thaibert, Harbour Captain.

SONDERBORG: 54.55 N. 09.47 E. (See Plan)

DOCUMENTS:
- Ship's Register.
- Crew List.
- Radio Safety Certificate.
- Load Line Certificate.
- Safety Equipment Certificate.
- Customs Declaration.

PILOTAGE: Vessels exceeding 6.5 m. in draft or 4,000 gross tonnage use Northern entrance where Pilot boards vessels North of Snogbaek Hage, or further North if required.
Vessels coming from South, Pilot boards off the Middelgrund.
VHF: Radio on pilot station, Channel 16, 12 and 13. For Pilot and Harbour Master tel: 04-422765.
RESTRICTIONS: No restrictions on night entry. No tide. Current mostly North-going with a maximum speed of 3 knots. N.E. to Easterly winds raise water level up to 1 m. West to North-Westerly winds lower the water level by the same amount.
MAX. SIZE: From South passing through the harbour bridge, 4,000 g.r.t., draft 6.5 m.
From North 30,000 g.r.t., draft 9.5 m., airdraft 33 m., LOA 200 m.
TUGS: Available; 6 hours notice required.
BERTHING: *South Harbour:* Mainly used by passenger vessels and fishing boats.
North Harbour: Concrete quay about 800 m. long, depth alongside 7.5 m. Plywood factory, dolphin moorings with depth of 9.0 m.
Mooring facilities at heavy dolphins over 650 m., 25 m. from shore and along paved road, water depth 9.0 m. Generally used for laying up.
CARGO GEAR: Discharging and loading by ship's own gear or by mobile cranes of which the harbour have three, with a max. lifting capacity of 30 tons (60 ton crane).
BRIDGES: King Chr. X's Bridge divides Sonderborg port into South-Harbour and North-Harbour. The bridge is a double wing bascule bridge with an opening width of 30 m. For passage call "Sonderborg Bridge" on VHF Channel 16 regarding opening times.
North of the harbour, the Alssundbridge crosses the sound. The bridge has a horizontal clearance of 150 m., and a vertical clearance of 33 m.
MEDICAL: Full hospital facilities available without prior notice.
FRESH WATER: Supplied by pipe-line to berths.
FUEL: Available day and night.
REPAIRS: Routine maintenance and smaller engine repairs can be carried out. There is no shipyard or slipways in port.
CONSULS: Finland, Netherlands and Norway.
AIRPORT: In Sonderborg, with regular flights to Copenhagen.
TIME: GMT plus 1 hour.
STORING: Vessel may be stored by truck or barge. Trucks may proceed alongside, fork lift trucks and riggers may be used.
DEVELOPMENTS: New Quay with length 120 m. and depth alongside 7.5 m. under construction in the South Harbour.
AUTHORITY: Sonderborg Havnekontor, Norrebro 1, 6400 – Sonderborg, Denmark. *Tel:* 04-422765. *Contact:* Lass Andersen, Harbour Master and Pilot.

STEGE: 54.59 N. 12.17 E. (See Plan)

LOCATION: Stege is situated in a sheltered bay on the N.W. coast of Moen.

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Derat Certificate or Exemption.
Bill of Lading (if cargo).
Crew List.

Customs need a Tobacco and Spirit List, showing the vessel's and the crew's supply on arrival. Customs clearance effected at Naestved.

APPROACHES: From the West, Stege is approached via Masnedsund. From the Baltic via Bogestrom Channel (2.1 m. depth). There is an entrance channel, 5 miles long and dredged to 4.1 m., leading to the port.

PILOTAGE: Local Pilots from Masnedoe, meet the vessel off the entrance channel. Sea Pilots can be taken from Spodsbjerg, Korsor or Gronsund.

ANCHORAGES: In Ulvsund, off the entrance channel.

RESTRICTIONS: Daylight navigation only. During winter, harbour may close due to ice.

MAX. SIZE: LOA 80 m. and 3.8 m. draft. Tidal range 0.3m.

VHF: Pilots can be contacted by VHF.

BERTHING: 800 m. of quayage in a series of basins.

Depths are: (i) N. Harbour 3.7 m. – 4.2 m.
(ii) Outer Harbour up to 4.3 m.
(iii) Sugar Factory Harbour 4.4 m.
(iv) Inner Harbour 3.7 m.

CRANES: 1 crane, 3.5 tons, at Sugar Factory harbour. 1 5 ton mobile crane.

BRIDGES: Storstromsbroen has a vertical clearance of 26 m. A new bridge has been constructed across the Storstrom with a vertical clearance of 21 m. Power lines with 36 m. vertical clearance lie to the West of Masnedoevaerket. To the East of Masnedoevaerket, there is a bascule bridge with 25 m. horizontal clearance. Dronning Alexandrines Bridge has a vertical clearance of 26 m. across Ulvsund.

STEVEDORES: Working hours: 0700 – 1600.

MEDICAL: Local hospital available.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Machine shop available.

DRY DOCKS: None. 1 slip for vessels up to 150 tons.

AIRPORT: Copenhagen, 110 km. distant.

AUTHORITY: Mon Kommune, Ved Stranden 4, DK-4780 Stege, Denmark. *Tel:* 03-815525. *Contact:* Gunner Andersen, Harbour Master.

AGENT: Ole H. Jorgensen, Box 7, DK-4780, Stege. Tel: 03-814018. Telex: 40301 (Ohjstg Dk).

STIGNAESVAERKETS: 55.12 N. 11.15 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
2 Crew Declarations.
2 Ship's Stores Lists.
Usual Ship's Documents.

PILOTAGE: Vessels to apply for a Pilot through their Agent. ETA to be given 48, 24 and 12 hours prior to arrival.

Pilot boat equipped with VHF Channels 16, 13 and 12. It is painted orange on hull and wheelhouse and is stationed at Agersoe.

For vessels coming from the North, Pilots board at Korsoer. For vessels coming from the South, Pilots board at Egholm Flak.

ANCHORAGES: Korsoer Roads, depth 20 m., bottom sand, good holding ground. With area of about 2 nautical square miles.

Gulfhavn Roads, depth 30 m., bottom clay, good holding ground.

Area – 1.5 nautical miles long and 0.5 nautical miles wide.

RESTRICTIONS: None.

MAX. SIZE: Coal berth: Length 300 m. Max. beam. 43 m. Max. draft 17 m.

Oil Pier: Draft 15 m.

Ash Berth: Max. draft 7.5 m.

HEALTH: Usual regulations.

RADIO: Skagen Radio or Lyngby Radio.

VHF: Stigsnaesvaerkets Havn, Channels 16, 14 and 12.

RADAR: None.

TUGS: No tugs stationed at Stigsnaes, ship's lines to be used. Minimum of 12 hours to arrange tugs.

BERTHING: Coal Berth: length 300 m., depth 18 m., max. draft 17 m. – discharging by shore equipment.

Oil Pier: Length no restrictions, depth 16 m., max. draft 15 m., discharge by shore equipment.

Ash Berth: Depth 8.0 m.

CRANES: 2×20 tonne cranes at coal berth, travel 245 m., height from water 22 m. Outlay 31.5 m. Designed average discharging about 850 tonnes/p.h.

BULK CARGO FACILITIES: See "Berthing" and "Cranes".

SPECIALISED CARGO/HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: None.

MEDICAL: If not urgent, no notice required. Doctor, dentist and hospital available.

TANKERS: 1 Berth, depth 16m., max. draft 15 m. Average discharge 60,000 tonnes/24 hour.

1×12 in. and 2×16 in. booms. The 12 in. boom can hydraulically connect to 8 in., 10 in. and 12 in. flanges, all standards. The 16 in. boom can hydraulically connect 12 in., 14 in. and 16 in. flanges, all standards.

DENSITY: 1007 – 1023.

FRESH WATER: By hose, 15 tonnes/p.h. 10 dkr/tonne.

FUEL: Not available.

FIRE PRECAUTIONS: No special precautions.

CONSULS: Norwegian and Finnish consuls nearby, others in Copenhagen (120 km.).

REPAIRS: Small repairs can be carried out.

DRY DOCK: None.

SURVEYORS: 1. Caleb Brett and S.G.S. have local representatives.

2. Lloyd's Register, American Bureau and Bureau Veritas must be requested from Copenhagen (120 km.).

GANGWAY/DECK WATCHMAN: None.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: 1 bottle of spirits, 1 bottle of wine, 200 gm. tobacco or 200 cigarettes.

CARGO GEAR: Coal Berth, Oil Pier and Ash Berth, all by shore gear.

REPATRIATION: Possible.

AIRPORT: Distance to Copenhagen airport 120 km. Served regularly by all international airlines.

TIME: GMT plus 1 hour. Summertime (from end March to end September) GMT plus 2 hours.

HOLIDAYS: Depending on situation.

POLICE/AMBULANCE/FIRE: Tel: 000.

EMERGENCY CO-ORDINATION CENTRE: None.

TELEPHONES: None.

SERVICES: Most services can be ordered through Agent.

BANKS: Skaelskoer Bank a/s. Tel: (03) 596070. Telex: 40139.

STORING: See "Prelims".
1. By truck.
2. Yes.
3. Yes.
4. Yes.
5. None.
6. Yes.

SHIP SUPPLY SERVICE: See "Kalundborg".

SHORE LEAVE: Crew can always leave vessel and go ashore.

IDENTIFICATION CARDS: Seamens' book sufficient.

REGULATIONS: None.

DELAYS: None.

AUTHORITY: S.E.A.S., Stigsnaesvaerket, DK-4230 Skaelskoer. *Tel:* (03) 596011.

AGENT: T. C. Christensen & Co. (Stigsnaes), P.O.Box 69, 4230 Skaelskoer. Tel: (03) 594816. Telex: 40221 (Teecee Dk).

STUDSTRUP: 56.15 N. 10.21 E. (See Plan)

LOCATION: The harbour is located in Aarhus Bay in Kalo Inlet.

The harbour of Studstrupvaerket is a private harbour owned by I/S Midtkraft, Aarhus, and is run by Studstrupvaerket.

PILOTAGE: Pilot assistance is imperative for navigation through the prohibited zone on entering Kalo Vig (inlet).

Pilot station: State pilot station, Udbyhoj. Tel: (06) 48 50 24.

ANCHORAGE: Ships can anchor in the inlet outside the channel.

APPROACHES:

Leading Marks: On the harbour territory: 2 red fixed lights on bearing 304° 45′ 40″ (T). lead into the harbour.

Rear Light: On boilerhall: Red triangle with down-turned apex.

Front Light: On the berth: Trellis mast with triangle with upturned apex.

RESTRICTIONS: The harbour is not accessible without special permission from the works management, and it must only be used for purposes concerning operation of the power stations under I/S Midtkraft, and, for the delivery and shipping of fuel to or from the power stations of the companies within Elsam, co-operating with I/S Midtkraft.

The harbour is navigable day and night. The anchor can be used on arrival as well as on departure.

Depth of Water: On entering: 11.3 m. (37 ft.). At the Eastern 405 m. of the quay: 11.3 m. (37 ft.). At the innermost 90 m. of the quay: 7.7 m. (25 ft.).

Water Level: The difference between MHW and MLW is 0.15 m.

Western and Northwestern wind may give HW up to 1.25 m.

Eastern and Southeastern wind may give LW up to 0.9 m.

MAX. SIZE: *Largest Vessels:* Coal: LOA 245 m., beam 33 m. and draft 36 ft. Tankers: LOA 245 m., beam 33 m. and draft 33 ft.

TUGS: Tugs not available locally. An agreement on tug assistance has been made with Svitzer to whom applications can be made. Cable address: Svitzersalvage. Tel: (01) 155195. Telex: 15983.

Tug assistance is normally not required for vessels up to 16,000 d.w.t. capacity.

The harbour supplies a mooring boat for assistance on entering.

BERTHING: Length of quay 495 m. Depth alongside 7.7 m. – 11.3 m.

CRANES: *Discharging of Coal:* 2 travelling cranes with a capacity of 12 tons. A third crane with same capacity will be available in 1986.

MEDICAL: First-Aid Station: Falck, Hornslet.

Nearest Hospital: Aarhus K/H (Municipal Hospital).

Nearest Doctor: Laegehuset, Skudstrup.

TANKERS: 1×12 in. discharge line for oil. Capacity 1,500 t.p.h. (approx.).

Connections available for 8 in., 10 in. and 12 in. hoses.

FRESH WATER: Available. Rate 14 cu.m.p.h.

FUEL: The port has no stock of bunker oil. If ordered through a broker, bunker oil may be loaded from a tank truck alongside the quay.

REPAIRS: No facilities, however, assistance can be ordered from the repair shop of the power station.
TELEPHONES: See "General".
IDENTIFICATION CARDS: For passing through the main gate a harbour pass is required.

Blank harbour passes for filling in by the ship's personel will be handed over by plant representative upon arrival.

GENERAL: *Clearance:* Nearest Custom House at Aarhus.
Supplies: The nearest towns are Skudstrup (3 km.) and Lugten (4 km.).
Telephone: Telephone calls can be made from the main gate. Payment will be collected by the gatekeeper.

The telephone on quay is for plant purposes and emergency calls only.

Special Regulations: Traffic to and from the port takes place through the gate of the main driveway of the plant by using the direct route from the quay.

Traffic is not permitted to stay or drive in the port.

Instructions from the gatekeeper or from factory employees must be obeyed.

Relatives of ship's crew are permitted to visit the ship provided that the above regulations are observed.

Dealing in commodities of any kind is prohibited in the area of the power station.

Safety Precautions: The port has no special personnel or equipment for fire fighting or life-saving. There is, however, a plant protection unit who handle limited fire fighting and life-saving equipment. There are a number of men trained in first-aid.
In Case of Fire or Accidents: Use the quay telephone. Dial extension 52 (Control Room of the station) and make your report. The Control Room is the alarm centre of the station, and can send for fire fighting assistance, ambulances, and medical attention along with first-aid.
AUTHORITY: I/S Midtkraft – Studstrupvaerket, 8541 Skudstrup, Denmark. *Tel:* (06) 991700.

SVENDBORG: 55.03 N. 10.38 E. (See Plan)

DOCUMENTS:
Certificate of Registry.
Freeboard Certificate.
Radio Safety Certificate.
Derat Certificate.
Crew List.

PILOTAGE: Telegraphic address, "Pilotstation, Svendborg". For contacting pilot boat on VHF, use Channel 16. International signals for Pilot. In Eastern entrance Pilot boards at Thuro Rev. In Western entrance Pilot boards at Lehnskov, or if ordered at, Skrams Flak.
ANCHORAGES: At Lunkebugt (Eastern entrance) and by Lehnskov (Western entrance).
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Longest ship ever docked was 541 ft. long, 67 ft. breadth, draft 21 ft. 06 in. Shorter ships may enter with deeper draft.
HEALTH: Pratique automatic.
RADIO: All Danish coast stations can be used. (See "Horsens".)
TUGS: Normally tugs stationed in Svendborg, ships wanting tugs order through Agent before arrival.
BRIDGES: 1 mile West of harbour a bridge crosses the sound. Free height 33 m.
STEVEDORES: Ordered by Agent.
MEDICAL: Doctors and hospital service always available.
DENSITY: Approx. 1024.
FRESH WATER: Available at all piers. 20 t.p.h.
FUEL: No bunker lines. Diesel can be delivered by tank lorries.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: See "General" before first port.
IDENTIFICATION CARDS: Not needed.
CONSULS: Vice-Consulates: Norway, Tel: 09 21 31 17; Sweden, 09 21 14 10; Finland, 09 21 22 21; W. Germany, 09 21 15 39; Iceland, Tel. 09 21 18 83.
REPAIRS: All repairs to deck and machinery carried out by shipyard.
DRY DOCKS: Floating docks for ships up to 10,000 tons weight.
REPATRIATION: Facilities exist.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; the day before Good Friday; Good Friday; Easter Monday; May 1st; Ascension Day; May 5th; Prayer Day; Whit Monday; June 5th; 25th and 26th of December.
FIRE/AMBULANCE/POLICE: Call 000.
TELEPHONE: No telephone for ships.
SERVICES: Compass adjusting.
SHORE LEAVE: No restrictions concerning shore leave for crew. Dogs not allowed to go ashore.
AUTHORITY: Port Authority of Svendborg, Jessens Mole 9, 5700 Svendborg, Denmark. *Tel:* 09-210657. *Contact:* Kurt Hansen, Harbour Master.

TUBORG HAVN: 55.44 N. 12.35 E. (See Plan)

DOCUMENTS: Same as Copenhagen.
PILOTAGE: Not compulsory except for tankers loading with petrol. For Pilot call Copenhagen Pilot (see Pilot Information for Copenhagen).
ANCHORAGES: See "Copenhagen".
MAX. SIZE: Max. draft 6.0 m., 4,000 d.w.t.
HEALTH: See "Copenhagen".
RADIO: Lyngby Radio: OXZ. VHF Channel 16 to all installations. ETA cables to Agents and receivers preferably by Lyngby Radio.
TUGS: Can be obtained from Copenhagen.
CRANES: Mobile cranes up to 110 tons can be obtained from Copenhagen.
SPECIALISED CARGO-HANDLING FACILITIES: Shore ramp for Ro/Ro traffic. Modern container-handling equipment available.
MEDICAL: No advance notice necessary. Hospitals available.
FRESH WATER: From water boat.
FUEL: All grades available by lighter. 10 hours notice preferred.
CONSULS: See "Copenhagen".
GANGWAY/DECK WATCHMEN: Not necessary.
HATCHES: Opening and closing carried out by ship's crew.
REPAIRS: All forms of deck and engine repairs can be effected.
CUSTOMS ALLOWANCES: 200 cigarettes. 1 bottle wine, 1 bottle spirits.
REPATRIATION: See "Copenhagen".
AIRPORT: Copenhagen airport 14 miles (23 km.) from Tuborg port. Connections to all parts of the world.
TIME: GMT plus 1 hour. Summertime is kept.
HOLIDAYS: See "Copenhagen".
POLICE/AMBULANCE/FIRE: Dial 000.
TELEPHONES: Not available on board.
SERVICES: Services available for compass adjusting, radio and radar repairs.
SHORE LEAVE: No restrictions.
AUTHORITY: Tuborg Harbour, 50 Strandvejen, DK-2900 Hellerup, Denmark. *Tel:* (1) 29 59 25. *Telex:* 16347 Tubor DK. *Cables:* Tuborg Copenhagen. *Contact:* K. Guldgerg Mikkelsen, Harbour Master – Tuborg Havn.

VEJLE: 55.42 N. 09.33 E. (See Plan)

DOCUMENTS: Required on arrival:
2 Crew Lists.
2 Passenger Lists.
1 Tobacco List.
1 National Reg. Certificate.
1 Load Line Certificate.
1 Tonnage Certificate.
1 Manifest.
1 Bill of Lading.
1 Derat Certificate.
1 Radio Safety Certificate.
1 Clearance inward and outward.
1 Safety Certificate.

PILOTAGE: Pilot station now at Juelsminde, radio Pilot Vejle VHF Channel 16 – 3 hours notice of ETA. The Pilot will embark and disembark at Rosenvold Hage on the N-side of the fjord.
ANCHORAGES: (1) At Rosenvold Hage, (2) at Traeskohage.
RESTRICTIONS: See "General" before first port and "Developments".
MAX. SIZE: Max. length 550 ft., max. draft 23 ft.
HEALTH: Pratique procedure is carried out by Customs dept.
RADIO: Lyngby Radio, OXZ, Blaavand Radio OXB.
TUGS: Available inside port, ship's lines.
STEVEDORES: Available. 0700 hrs. start must be informed 24 hours in advance.
MEDICAL: Hospital facilities available day and night with doctors available 24 hours per day.
TANKERS: 2 tanker berths, max. draft 23 ft. No slop tank available. Diameter of discharge lines 8 in. and 6 in.
DENSITY: Average density 1020.
FRESH WATER: Delivered from lines on piers. 14 t.p.h.
FUEL: All grades available. No advance notice required.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: See "General" before first port.
IDENTIFICATION CARDS: Not needed.
CONSULS: Vice-Consuls: Greece, 821929; Norway, 829122; Spain, 820233; Germany F.R., 820011.
REPAIRS: Deck and engine repairs can be undertaken.
DRY DOCKS: None.
REPATRIATION: No facilities.
AIRPORT: Billund 32 km., 3 flights per day.
TIME: GMT plus 1 hour.
HOLIDAYS: New Year's Day; Easter; 1st May, Whit Sunday, Christmas holidays. Cargo work can be done on overtime except 1st May (Labour Day).
POLICE/AMBULANCE/FIRE: Police, tel. 821744; Ambulance, 822244; Fire, 822244.
TELEPHONES: No arrangements exist for placing on board.
SHORE LEAVE: Allowed.
DEVELOPMENTS: A highway-bridge is built over the fjord over the entrance-channel about 1 mile outside the harbour entrance.

Max. height over the channel, 40 m.

AUTHORITY: Vejle Havn, 7100 Vejle, Denmark.

VORDINGBORG (South Harbour – formerly Masnedsund): 54.59 N. 11.54 E. (See Plan)

DOCUMENTS: See "Copenhagen".
PILOTAGE: Available from Masnedoe Pilot Station, Tel: 03-772170.
ANCHORAGE: Vordingborg Roads.
RESTRICTIONS: See "General" before first port.
MAX. SIZE: Draft 21 ft. max., breadth 25 m. (depending on vessel's height) owing to passage of bridge before entering harbour. Width of bridge opening 25 m. At a height of 25 m., width of opening 22 m. due to angle of raised bridge.
RADIO: Lyngby Radio.
TUGS: Available from Nakskov, Korsoer, Copenhagen. Notice for towage about 6 – 8 hours.
BERTHING: Berths equipped for handling grain, ore, coal, liquid chemicals and LPG carriers.
Masnedoe Power Station: See "Port of Masnedoevaerket."
BRIDGES: Passage of bridge 25 m. wide, opening day and night. Bridge normally in radio contact with pilot station. Fully lighted. Approach to power station from the West – pier situated just to the West of opening bridge, and therefore no passage.

In the approach to Vordingborg and power station passage are overhead power cables, max. airdraft 36 m.
STEVEDORES: Local stevedores ordered by Agent.
MEDICAL: Hospital available.
FRESH WATER: Supplied by pipe-line to berths.
FUEL: All common fuels available.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close, otherwise as per C/P.
CERTIFICATES:

Registered Certificate of Tonnage.
Derat Certificate.
Construction Certificate.
Load Line, and Equipment Certificate on first call.

CUSTOMS ALLOWANCES: See "General" before first port.
CARGO GEAR: 2 mobile cranes, one grain-sucker and elevator.
IDENTIFICATION CARDS: Not required.
CONSULS: At Copenhagen.
REPAIRS: Most repairs, engine and equipment available. Electronic service only available from Copenhagen.
DRY DOCK: No local dry dock. Nakskov/Copenhagen nearest.
HOLIDAYS: See "Copenhagen".
POLICE/AMBULANCE/FIRE: Police 03-771448; Ambulance, Fire Brigade 0-0-0.
AUTHORITY: Vordingborg Kommunes, Havnevaesen, 4760 Vordingborg.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Djibouti

DJIBOUTI: 11.36 N. 43.08 E. (See Plan)

PORT LIMITS: *Maritime Limits:* The reference data for the delimitation of the maritime zone coming under the port of Djibouti are as follows:

Point I:	The pyramid situated on the right bank of the mouth of the Oued Ambouli.
Point II:	Lat. 11° 36′ N., Long. 43° 08′ E.
Point III:	Lat. 11° 39′ N., Long. 43° 06′ E.
Point IV:	Lat. 11° 39′ N., Long. 43° 10′ E.
Point V:	Lat. 11° 37′ N., Long. 43° 08′ E.

DOCUMENTS: Crew List for ship's Agent. Crew Manifests and Manifests of Passengers in transit or for disembarkation, for whom disembarkation cards are to be completed. Presentation of Health Declaration and verification of compulsory immunisations by the health representative.

The following documents are required, preferably prior to the arrival of the vessel.

	Cargo Manifest	*Freight Manifest*	*Dangerous Cargo List*	*Stowage Plan*	*Hatch List*
For Djibouti Port Authorities	6	—	2	—	—
For Stevedores	3	—	—	1	1
For Agent	1	2	—	—	—
If transhipment, additional	2	—	—	—	—
To be despatched by airmail or airfreight in due time, prior ship's arrival at Djibouti	3	1	1	1	1
On board vessel and if impossible by airmail or airfreight	7	1	1	—	—

Derat Certificate: At the present time Derat cannot be carried out at Djibouti, but the Port Health Authority, after inspection, are empowered to extend expired certificates by one month.

PILOTAGE: Pilotage is compulsory for all vessels with a nett tonnage in excess of 300 tons and is available 24 hours a day, throughout the year.

Pilots board inward bound vessels between No. 1 Buoy and No. 2 Buoy. Outward bound vessels normally disembark their Pilot between No. 2 Buoy and No. 4 Buoy. Pilot boats are painted white and carry the flag "H" by day and the usual lights by night.

An internationally approved pilot ladder on the lee side with manropes, and suitably illuminated at night time, must be available.

Vessels calling for Pilots at departure if unable to contact the pilot station on VHF should sound 3 long blasts on whistle or siren half an hour prior to sailing, this signal also calls the tug and mooring gang.

ANCHORAGE: Anchorage zone is within following limits:

1. Eastern limit: a line parallel to and 0.25 miles West of the North passage.
2. Southern limit: Latitude 11° 37′ N.
3 Western limit: a bearing with the Western extremities of Penguin and Ambouli Banks in alignment.

It is forbidden to anchor 1.5 cables on each side of the alignment of Ambouli and d'Ayabele Lights.

Average depth is of 15 m. to 20 m. Anchor holding is excellent, even with a strong S.W. monsoon when there is often a heavy swell.

It should be noted that anchorages within a quarter of a mile of either side of the entry transit line is strictly prohibited.

APPROACHES: Djibouti Bay can be reached from 2 channels – North and East. Only the Northern one is marked.

The Traditional Channel – The "North" Pass: The port, which has easy access by day or night, is normally entered by the North Channel, vessel after rounding Ras Bir, passing to the Northwards of Musha and Maskali Islands until the transit towers situated to the Westward of the town are sighted. The two transit towers, when in line, bear 184° (T) from seaward. Both towers exhibit quick flashing lights which at night time may be easily seen at a distance of 9 miles. In daytime the two towers may be located by first sighting Mount Direction, a distinctive conical hill to the Southward. The nearest transit tower is a white rectangular building with a single wide vertical black stripe while the further tower is a white rectangular building with two broad horizontal stripes.

When on the leading line proceed to Buoy No. 2 on the Heron Bank, where the Pilot will board; the Master is advised to await the Pilot slightly North of Buoy No. 2.

The "South" or "East" Channel: The Southern or Eastern approach for vessels entering passes South of Musha and the Maskali Islands after clearing the Arab Bank. Vessels using this approach must keep at least 1 mile North of the Heron Bank until they reach the transit line described above. The Pinqouin Bank Buoy situated West of the transit line makes a good check point.

The Northern channel is usually used for vessels proceeding in a N.N.E. direction.

The Eastern channel is not marked, and is not recommended for vessels approaching the port. Approaching from the East of the island of Musha by day can be dangerous if visibility is poor.

RESTRICTIONS: Entry during the day or night. Highest tide 2.90 m. Mean tide is approximately 1.60 m., and lowest are 0.20 m. Tidal currents are very weak in bay and rarely exceed 1 knot.

MAX. SIZE: Entrance to inner roads dredged to 11 m. depth.

Max. Draft: Cargo vessels 32 ft. Vessels bunkering 36 ft. Tankers (white products) 32 ft. Tankers (black products) 36 ft.

HEALTH: Generally Free Pratique by radio can be granted to all ships applying through Coast Station Djibouti Radio. Ships must radio in plain or international code, a maximum of 12 hours and a minimum of 4 hours prior to arrival in port. In all cases, when Pilot boards vessel he gives Master a copy of Maritime Health Declaration which must be filled in by Master and countersigned by ship's doctor, if the crew includes one. An examining official comes on board when vessel arrives to receive the Maritime Health Declaration. Cholera and Yellow Fever Certificates required from all travellers coming from an infected area, excepting children of under 6 months of age.

RADIO: *Via the Harbour Master's Office:* For short distance communications, ships can link up with the Harbour Master's Office, by VHF radio-phone: the Harbour Master's traffic unit is equipped with a VHF station for broadcasting and receiving on Channel 12 (156.6 MHz) and Channel 16 (156.8 MHz). These links are solely for the exchange of nautical information between the Harbour Master's Office and vessels (confirmation of ETA; ship's draft; and orders concerning the boarding time of the Pilot and dropping the anchor to wait for Pilot.)

Via Djibouti Coastal Station: For medium or long distance communications, ships can link up with the shore through the coast station at Djibouti, by radio telephone or telegraph. This station can meet all requirements from ships using the port of Djibouti. It handles official and private communications and is permanently on watch.

Call sign J2A maintains a continuous 24 hours listening watch on 500 kHz and replies on 464 kHz.

For long distance communication using the call sign "J2A8", the station maintains listening watches between 0400 hrs. and 1000 hrs. GMT and 1200 hrs. to 1715 hrs. GMT on 8682 kHz. Traffic lists are transmitted at 0400 hrs., 0600 hrs., 0800 hrs., 1200 hrs., 1400 hrs. and 1600 hrs. GMT.

In the 12 megacycle band using the call sign "J2A9", the station works on the frequency 12,782 kHz between 1000 hrs. and 1200 hrs. GMT. Traffic lists are transmitted at 1000 hrs. and 1100 hrs. GMT.

Radio-telephony: Djibouti Radio (J2A) service covers the following:

(a) The station can cover medium distances through radio-telephone, from 1605 kHz to 2850 kHz.

Call sign: Djibouti/Radio/J2A.
Call frequency: 2182 kHz.
Working frequency: 2586 kHz.
Power: 1 Kw.
It is open for the international calls (2182 kHz) at the following times:
From 0500 – 0900 hrs., and from 1300 – 1500 hrs. GMT.

(b) VHF
Listening Channel 16 (156.8 MHz).
Working Channel 20 and 24 (24 hours).

Vessels can link up with subscribers of the automatic telephone system in Djibouti.

Radio telegrams sent to ships at sea must be delivered to the telegraphic section at the post office, Ave de la Republique, during office hours.

TUGS: In Winter (slight Easterly monsoon), a single tug is generally sufficient for manoeuvring. In Summer during the Khamsin period, berthing or sailing often requires 2 tugs. There is a 1,500 h.p. diesel tug *Aboubaker Pacha;* a 1,800 h.p. tug, *A. Rimbaud;* a 1,400 h.p. diesel tug *Henri Lambert;* a 1,000 h.p. tug *Administrateur Bernard* and 1 auxiliary 600 h.p. tug. All tugs equipped with fire fighting equipment.

The Port Authority of Djibouti is planning to purchase a new tug of 2,200 h.p. (diesel).

BERTHING:

Quay	*Length* (m.)	*Depth* (ft.)	*Usage**
No. 1	180	31	L, D, B
No. 2	220	39	L, D, B, Containers
No. 5	230	24	L, D, B
Boutre Quay	120	18	
No. 6	170		L, D, B, Ro-Ro
No. 7	263	26	L, D, B
No. 8	202	31	L, D, B, Refrig.
No. 9 (dolphins)	200	27	B, Lay-by Berth
No. 10 (dolphins)	270	36	B, Discharge Black Oils
No. 11 (dolphins)	170	36	B
No. 12 (dolphins)	270	39	B, Discharging Black and White Products
No. 13	210	32	L, D, B, Discharge of White Products and Liquid Gas and Loading of Molasses in bulk

*KEY = L = Loading.
D = Discharging.
B = Bunkering.

CRANES: There are no cranes on quays, but the port has 3 mobile cranes of 15 tons, 25 tons and 35 tons capacity plus a floating crane for the handling of heavy-lifts of 80 tons capacity.

BULK CARGO FACILITIES: Molasses can be handled.

SPECIALISED CARGO HANDLING FACILITIES: Open ground and shedded areas for containers, Roll-on/Roll-off traffic and Quay for the traffic of lighters.

BRIDGES: None.

STEVEDORES: Two companies available, office hours from 0700 to 1730 hrs. Stevedoring 24 hours.

Working Hours: Normal working hours are 0700 – 1200 hrs. and 1300 – 1800 hrs. Overtime can be worked between 1900 – 2400 hrs., and if necessary to finish a vessel, between 0100 – 0600 hrs. It should be noted that Friday is the normal day of rest and all work on this day is at overtime rates.

MEDICAL: Port Medical Service directed by medical practitioner specialised in industrial medicine is situated in a building neighbouring the port offices. It operates a dispensary. Passengers and sailors in transit are treated by private doctors from town who may visit the ships. Serious cases can be hospitalised in Djibouti's civil or military hospitals.

TANKERS: Reception lines: Berth Nos. 12 to 13 specially equipped for reception of bunkering products are linked with installations of the petroleum companies by a 16 in. dock-line and 12 in. (FO) and another of 12 in. (DO). Pier No. 10 is connected to the installation with a dock-line of 12 in. Rate of discharging can reach between 2,000 and 2,500 t.p.h. Reception of white products is assured from Quay No. 13 by an 8 in. line; for gas there is a 4 in. line.

Shipmaster's Report: July 1982.
Pilot advises max. draft for loaded tankers is 14.0 m.

FRESH WATER: Each quay provided with 3 – 5 (200 mm.) water-hydrants. Delivery of 40 cu.m. of water per hour. Regardless of the season, there is never any shortage of fresh water.

FUEL: A complete range of different viscosities and products is available. Meets all the usual requirement of bunkering vessels. Ample supplies of fuel and diesel oil are always available. Normal rate 200 – 300 t.p.h. but 800 t.p.h. possible.

Suppliers: B.P., Caltex, Esso, Mobil, Mory, Shell and Total.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

IDENTIFICATION CARDS: Required.

CONSULS:

EMERGENCY CO-ORDINATION CENTRE: Being formed.

STORING: In the port of Djibouti, vessels are bunkered at all the quays, and are supplied with fresh water (without limitation as to the amount requested), whilst they are carrying out their commercial operations of loading or discharge of cargo).

DEVELOPMENTS: *Extension of Equipment for Containerised Traffic:*

1. In 1984, two jib cranes on rails were installed on Quay Nos. 1 and 2. Max. lifting capacity under spreader 35 tonnes.
2. Mobile land equipment: 4 heavy front-loading fork-lifts of 32 tonnes capacity; 2 light front-loading fork-lifts of 12 tonnes capacity; 8 tractors and trailers, of which 6 trailers for 20 ft. and 40 ft. containers.
3. Construction of a refrigerated store. This store has been built to the South of Quay No. 8, and brought into service. It controls the distribution of fresh and deep-frozen food to local traders, ships and redistribution to country areas (variation of temperature of 45°: from –30°C to +15°C). The covered area is 1,530 sq.m. with a storage capacity of 2,450 cu.m.
4. The placing into service of a duty-free shop.
5. Quay Nos. 1, 2, 7 and 12 out of service from 1984 due to construction work.
6. New Tug on order.

GENERAL:

Tides: The highest tides reach 2.9 m., the average tide is around 1.6 m., and the lowest drop to 0.20 m.

Tidal currents are very weak in the bay, only rarely exceeding one knot. They usually move Eastwards during the ebb tide, and Westwards during the flood tide.

Winds: From October to the beginning of May moderate Easterly winds dominate. During the S.W. monsoon, from the middle of June to early September, there are frequent gales from the West (Khamsin), when the sea becomes rough or very rough. There is little or no wind in May and September.

Swell: The sea is usually very calm in the outside roadstead, in the anchoring zone protected in the East by the Heron Bank. In normal weather the swell does not exceed 1 m. During the Khamsin period, it can reach 2.0 m. – 2.5 m. However, there is no undertow inside the port.

SHIPMASTER'S REPORT: September, 1979.

Approaches: After passing Muskali Beacon on approaching, the leading lights, during daytime (183.5° True) are often not visible due to the sun's glare. At night these make an excellent approach.

Pilotage: Do not proceed beyond No. 2 Heron Bank Buoy. Pilot boat 12 m., blue hull, white top and displaying Pilot signals.

Radar/VHF: Channel 12 for calling and operations. No Port radar.

Hatches: Opening/Closing normally carried out by ship's crew.

General: Provisions both fresh and dry available, but expensive.

AUTHORITY: Port Autonome International de Djibouti, P.O.Box 2107, Djibouti, Republique de Djibouti. *Tel:* 35 23 31/37. *Telex:* Portauto 5836 DJ. *Cables:* Dirport Djibouti and Comport Djibouti. *Contact:* M. Djilani Ali Bourhan, Port Director/General Manager. Michel Daniel, Port Commandant.

NOTES

Dominica

PORTSMOUTH: 15.32 N. 61.29 W. (See Plan)

Portsmouth is an anchorage port principally engaged in the export, by lighter, of bananas and the export of agricultural produce by small inter-island vessels.

Documentation required is as for "Roseau". Safe anchorage is available anywhere within the port with distance off dependent on the size of vessel. Pilotage is not compulsory and if required must be obtained at the Roseau Pilot Station.

No alongside facilities (except those for lighters) exist and no cargo handling equipment is maintained.

A steel piled/concrete decked "L" shaped pier 225 ft. long, 40 ft. wide with 12 ft. of water at the head provides lighterage berthing and accommodates inter-island sloops, schooners and motor vessels. Final planning of upland and equipment is yet to be undertaken.

All enquiries in the respect of the use of the port of Portsmouth should be addressed to the Port Authority, Roseau.

MEDICAL: A Cottage Hospital is available.
POLICE/AMBULANCE/FIRE: Police Tel. 5222. Ambulance Tel. 5237 (Hospital). Fire Tel. 5215. Custom House Tel. 5255.
BANKS: See "Roseau".
EMERGENCY CO-ORDINATION CENTRE: See "Roseau".
STORING: See "Roseau".
SURVEYORS: See "Roseau".

SHIPMASTER'S REPORT: January, 1979.
Pilotage: Not compulsory or required.
Restrictions: Vessels may enter or leave at any stage of the tide during day or night.
Tugs: None available.
VHF: Not available.
Anchorage: Vessel anchored with the lighter jetty bearing 100°, distance 4 cables. Depth of water 70 ft. Cargo is delivered to the vessel by small lighters which are towed from a timber and steel jetty owned by Geest Line. Loading of bananas is carried out through side doors only. The quality of work was good.
Services Available: Doctor and airport (fresh water, fuel and other services are not available).

AUTHORITY: Dominica Port Authority, P.O.Box 243, Roseau, Dominica. *Tel:* 4431/2/3. *Cables:* Domport. *Contact:* O. M. Norris, General Manager (Home *Tel:* 4375).

ROSEAU: 15.17 N. 61.24 W. (See Plan)

PORT LIMITS:
Lat. 15° 19′ 00″ N., Long. 61° 24′ 29″ W.;
Lat. 15° 21′ 00″ N., Long. 61° 24′ 29″ W.;
Lat. 15° 21′ 00″ N., Long. 61° 23′ 09″ W.

DOCUMENTS: Port Authority requires before commencement of discharge, 2 copies of the vessel's manifest, and 1 stowage plan or hatch block sheet. Masters are advised that these should be airmailed ahead of the arrival. On arrival, documents required are:

Port Authority:
- Ship's Register to sight.
- International Health Declaration.
- 1 Crew List.
- 1 Passenger List.
- 1 Hazardous Cargo List.

Customs:
- Clearance from last port.
- 1 Stores List.
- 2 Personal Effects Declaration.
- 1 Manifest.
- 1 Crew List.
- 1 Passenger List.

Immigration:
- 1 Crew List.
- 1 Passenger List.

PILOTAGE: Pilotage is compulsory for berthing all vessels in excess of 100 g.r.t. Pilotage is available for anchorage on request. Pilots will board in approx. position Lat. 15° 17′ 54″ N., Long. 61° 24′ 50″ W. The pilot boat will display International code "H" by day and a white light over red light by night. Requests for Pilots should be made 24 hours in advance either through the vessel's Agent or by cable to "Domport". Vessels may contact the Port Authority through Dominica Port Radio on VHF Channel 16 from 0800 – 1600 hrs., and for 2 hours in advance of the vessel's ETA.

ANCHORAGES: A restricted area exists in Woodbridge Bay between:
Lat. 15° 19′ 00″ N., Long. 61° 24′ 15″ W.,
Lat. 15° 18′ 00″ N., Long. 61° 24′ 15″ W.,
Lat. 15° 18′ 00″ N., Long. 61° 24′ 00″ W.
and vessels may not anchor therein, except under General Manager's instructions. Anchorage may be taken South of this area and in Roseau Roadstead 1.5 – 2 cables offshore in 15 – 30 fathoms depending on the vessel's size. All anchorages are steep-to and care should be exercised so as not to drag off the bank when anchoring.

MAX. SIZE: See "Berthing".
HEALTH: International Declaration of Health. In addition any death, fever or suspected contagious disease should be notified in advance to Agents or Port Authority by cable or radio.
RADIO: HF/SSB. 8281.2 – Monday – Friday 1200 – 2000 hrs. Also see "Pilotage".
TUGS: None.
BERTHING: Woodbridge Bay Ocean Berth Length 500 ft., min. depth 36 ft. MLWOST.

Schooner berth 120 ft. with a depth alongside of 9 ft. (inshore) to 36 ft.
Roseau Jetty, Length 93 ft. min. depth 18 ft. (Out of commission due to hurricane damage).

STEVEDORES: Stevedores and longshoremen arranged by Dominica Stevedores Ltd.
CARGO HANDLING FACILITIES:
Mechanised Cargo Handling: Breakbulk cargo is handled palletised on ships/shippers/port pallets. Adequate forklift trucks, trailers, and tractors are available to work all berths, Small inter-island vessels can be discharged by 15 ton Lorain crane. Containers up to 20 d.w.t. can be handled ashore if placed on port trailers by ship's gear. Ro-Ro barges capable of trimming to ramp height of +10 ft. are accommodated on the South end of Woodbridge Bay Pier.

TANKERS: Petroleum products are presently handled at 5 different anchorages on the West coast.
L.P.G.: Woodbridge Bay (2) max. draft 12 ft. floating hose from vessel.
Mogas – Gasoil (Dieselene), Kerosene, Sprayoils:
Rockaway (2), 1 mile North of Woodbridge Bay, draft 18 ft. 800/900 ft. floating hose from ship.
Boiler Fuel (Bunker C): Belfast, 2 miles North of Rockaway, max. draft. 18 ft. (up to 25 ft., if vessel equipped for stern discharge) 4 in. submarine line.
Bulk Edible Oils and Soap Chemicals: Belfast max. draft 14 ft., 4 in. floating hose (200 ft.) from shore.

The above are single anchor, stern-to berths with stern lines to shore posts. Vessels should have at least 4 ropes available aft and provision to bend 2 lines together.

The above are private facilities but pilotage is available. In the case of Woodbridge Bay (L.P.G.) pilotage is compulsory. Tankers in their ETA advice should include their cargo by products and their draft.

MEDICAL: One Government general hospital, one private group medical clinic and one private dental clinic are available.
On board visits by a doctor can be arranged.
Where possible advance notice should be given.
DENSITY: Approx. 1025.
FRESH WATER: Available alongside all berths at a cost of EC $20.00 for 1,000 gals.
FUEL: Dieselene (Gas oil) available in limited quantities ex-tank wagon at all berths. Other grades not available.
GANGWAY/DECK WATCHMEN: Available if required.
OPENING/CLOSING HATCHES: Beam and board hatches, crew or stevedores; Ship's option. Patent Hatches; ship's crew.
CERTIFICATES: Previous port clearance; ship's register, to sight.
CUSTOMS ALLOWANCES: 200 cigarettes, or 0.5 lb. tobacco or 25 cigars, 26 ounces of spirits per crew member.
IDENTIFICATION CARDS: Dock passes for crew members will be issued through the vessel's Agents.
CONSULS: (Or Consular Agents).

		Business	Residence
France	C. A. Butler	Tel. 2033	Tel. 1146
Netherlands	W. A. Astaphan	3221	2524
Belgium	Achille L. Pinard	2781	2756

REPAIRS: Minor and emergency repairs can be arranged. Engines and deck gear cannot be put out of service without permission of the Port Manager.
SURVEYORS: Lloyd's Agent available for cargo survey. A non-assigned Hull Surveyor is available.
REPATRIATION: Limited inter-island flight capacity to nearest international airports – Guadeloupe, Martinique, Antigua, Barbados.
AIRPORT: Melville Hall 37 miles. Inter-island services only. Canefield Airstrip 2 miles – Charter aircraft and Air Guadaloupe.
TIME: GMT minus 4 hours.
HOLIDAYS: New Year's Day, Carnival (Mardi Gras) 2 days. Good Friday, Easter Monday, Labour Day, Whit Monday, August Monday, National Day (Nov. 3rd – 4th), Union Conference Day (A Sunday in November), Christmas Day, Boxing Day.
Minimum working: Can be arranged on these days, but it is not advised over the Carnival or National Day Holidays.
POLICE/AMBULANCE/FIRE: Police Tel. 2222 or call on 2182 kHz., Fire Tel. 2888, Ambulance Tel. 2321.

At anchor or away from a telephone, blow 3 short and 1 prolonged blast at frequent intervals until acknowledged on VHF Channel 16 or by lamp.

TELEPHONES: On board service can be provided at the Ocean Wharf, Woodbridge Bay (discontinued at present due to hurricane damage).
SERVICES: Assistance can be given for emergency repairs to electronic equipment, compass adjusting and D/F calibration subject to advance notice. Provisions can be obtained, but advance notice should be given especially for fruit and vegetables of high quality.
SHORE LEAVE: After inward clearance, there are no restrictions on shore leave. Masters are advised to note that immigration law holds the vessel/owner/agent, financially reponsible for any crew member or intransit passenger left behind (for whatever cause). Vessel's having no accredited Agent will be required to satisfy Immigration Authorities before outward clearance is granted.
BANKS: Barclays Bank International Ltd., Royal Bank of Canada, Bancque Antilles Francais. The National Commercial & Development Bank of Dominica has international correspondents.
EMERGENCY CO-ORDINATION CENTRE: Port Authority connected with other Regional Port Authorities and U.S.C.G. VHF Channel 16, HF, S.S.B. Standby 2182 and 8281.2. Working 4136.3, 4139.5, 8284.4, 12421.0, 12424.5, 16565.0 and16568.5.
STORING: Vessel can store by truck. No facilities to store by barge. Trucks may proceed alongside for direct delivery/discharge, subject to Port Authority agreement. Fork lift trucks may be used. Vessels must be cleared outward for duty free concessions. Riggers available to assist with storing.

SHIPMASTER'S REPORT: 1979.
Pilotage: Compulsory. Pilot boards 0.5 miles off the quay and requires two hours notice of vessel's arrival.
Restrictions: Vessel is able to enter or leave at any stage of the tide day or night.
Max. Size: M.V. "Oriana". LOA – 804 ft., draft 30 ft.
Tugs: Not available. Vessels able to dock and undock without the aid of tugs.
VHF: Channel 16.
Berthing: One berth only available with wooden fenders. A heavy swell may be experienced whilst alongside berth as it is very exposed. Loading rate for bananas is 16 t.p.h. per gang. There is ample mechanised equipment for loading palletised cargoes. There is also storage space for breakbulk and palletised cargoes. The quality of the labour was good. There is no equipment for handling containers and there is no storage space for containers (containers can be handled ex-ship's gear at about 10 units per hour). Accommodation ladder required.
Services Available: Fresh water, fresh provisions, airport, hospital and doctor (no fuel, repair facilities or other services available).

AUTHORITY: Dominica Port Authority, P.O.Box 243, Roseau, Dominica. *Tel:* 4431/2/3. *Cables:* Domport. *Contact:* O. M. Norris, General Manager (Home *Tel.* 4375).

NOTES

Please also advise Shipping Guides Ltd.

Dominican Republic

GENERAL

DOCUMENTS:

Vessels calling at Dominican ports require a complete Dominican consular despatch from every loading port as well as from the last foreign port of call. Should there be no Dominican Consulate at the respective loading port, the Agents should prepare 3 copies of the manifest to be delivered to Customs. If no Dominican Consulate at the last foreign port of call, the Agent will attend to all the formalities required by the local port authorities.

Derat Exemption Certificate will be required by the Port Doctor.

Additional papers, besides consular despatch, required by authorities are as follows:

Port Doctor:
- 1 copy crew list.
- 1 copy landing/transit passenger list.

Harbour Master:
- Port clearance from last port of call.
- 3 copies crew list.
- 3 copies landing/transit passenger list.
- 3 copies negative passenger list (if none landing).
- 3 copies arms list.

Customs:
- 2 copies crew list.
- 2 copies arms list.
- 2 copies landing/transit passenger list.
- 2 copies negative passenger list (if none landing).
- 2 copies stores list.
- 1 copy tallybook.

Immigration:
- 2 copies crew list.
- 2 copies landing/transit passenger list.

Police:
- 1 copy crew list.
- 1 copy landing/transit passenger list.

Department of Agriculture:
- 1 copy stores list.
- 1 copy tallybook.

Agency:
- 1 copy crew list.
- 1 copy landing/transit passenger list.
- 4 copies manifest (if not airmailed previously).
- 2 copies each B/L (if not airmailed previously).
- 7 copies tallybook.

Additional lists, etc., required are:
- 10 crew lists.
- 10 landing/transit passenger lists.
- 5 negative passenger lists (if none landing).
- 5 arms lists.
- 3 stores lists.
- 9 tallybooks.
- 4 copies cargo manifest (if not previously airmailed).
- 2 copies B/L (if not previously airmailed).

HOLIDAYS: New Year's Day (January 1st); Our Lady of High Grace (January 21st); Duarte's Day (January 26th); Independence Day (February 27th); Good Friday (Variable); Labour Day (May 1st); Corpus Christi (Variable); Restoration of Independence (August 16th); Our Lady of Mercy (September 25th); Christmas Day (December 25th).

Regular working hours of stevedores: 0800–1200 hrs., 1400–1800 hrs., Mondays to Fridays and 0800–1200 hrs. Saturdays.

Regular working hours of the Port Authority are from 0800–1600 hrs. Mondays to Fridays and 0800–1200 hrs. on Saturdays.

Saturday: Overtime is payable to labour for work performed after 1200 hrs. Pilots and government officials are paid overtime rates all day, but Customs personnel are only paid overtime rates after 1200 hrs.

The above holidays are legal in the Dominican Republic and for the diplomatic and consular representations abroad.

Work can be performed on all Sundays and holidays against payment of overtime to labour, Pilots, Customs and government officials.

TIME: GMT minus 4 hours all year round.

SPARES: Same can be withdrawn same day of arrival via air express. No Customs duties assessed as brought under Customs custody on board vessel. Airwaybill should be addressed to Agent, with clear indication that it covers spares for such and such a vessel.

SECURITY: Stevedores board vessel with special passes issued for vessel in question. Any other visitors must obtain pass from Harbour Master's Office. Nevertheless it is definitely recommended that all cabins be kept locked. This also applies to hatches that are not being worked.

POLLUTION: No garbage, refuse, etc., can be thrown overboard. Vessels liable to heavy fines for oil pollution, etc.

PLAGUE CONTROL: All lines leading to shore must be protected by ratguards. Non-compliance subject to Customs fines.

AGENCY: *Contact:* Asociacion de Navieros de Santo Domingo, Calle Jose Contreras No. 108, P.O.Box 923, Santo Domingo, Republica Dominicana. Tel: (809) 533-4931.

AZUA (Puerto Viejo): 18.30 N. 70.40 W.

See "General" before first port.

PILOTAGE: Ordered by Agent; vessel should wait for Pilot at a distance of 0.5 miles from the port.

ANCHORAGES: In the approaches, depth is 28 ft.

RESTRICTIONS: Berthing during daylight only.

HEALTH: Pratique is obtained by Agent. In case of infectious illness the whole crew is put in quarantine.

TUGS: Not available.

BERTHING: Finger pier, length 650 ft., width 120 ft. Dredged to 35 ft.

MEDICAL: Necessary for Agent to receive advance notice of required medical attention. Doctor available.

FRESH WATER: Delivered by truck.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Required.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: Bonded stores are sealed.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: Minor repairs only.

REPATRIATION: Facilities available.

AIRPORT: Situated 170 miles from port.

POLICE/AMBULANCE/FIRE: Tel: 175.

TELEPHONES: None available on board.

SHORE LEAVE: Allowed.

AUTHORITY: Comandancia de Puerto de Azua.

AGENT: See "General" before first port.

BARAHONA: 18.10 N. 71.10 W.

See "General" before first port.

PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Agents can be contacted by radio telephone frequency 2738. Pilot boards approximately 1.5 miles outside the port. Pilot also on VHF Channel 16.

ANCHORAGES: Deep water anchorage available outside port. Pilot will advise best location.

RESTRICTIONS: No entry or departure at night.

MAX. SIZE: 575 ft. length; 29 ft. draft.

HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.

RADIO: When within range, Santo Domingo Radio.

TUGS: One small tug available, ship's lines used.

BERTHING: Sugar molasses wharf, depth 28 ft. General gypsum wharf, depth 30 ft.

STEVEDORES: ETA's required 24 and 12 hours before arrival to arrange gangs.

MEDICAL: Medical attention can be arranged after vessel is cleared, preferably ashore. Minor cases are dealt with locally, more serious cases are transported to Santo Domingo.

TANKERS: Discharge at molasses wharf.

DENSITY: Salt water inside harbour.

FRESH WATER: Pipe-line at wharves, ship's hoses used.

FUEL: Small quantities of diesel available by truck from Santo Domingo.

GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.

OPENING/CLOSING HATCHES: Can be performed by crew or stevedores.

CUSTOMS ALLOWANCES: Bond is sealed, but can be opened at Master's request.

IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.

CONSULS: All Consuls at Santo Domingo.

REPAIRS: Minor repairs only.

REPATRIATION: Can be arranged.

AIRPORT: Distance to airport 230 km.

POLICE/FIRE/AMBULANCE: Police, Tel: 417; Ambulance, Tel: 441; Fire, Tel: 348 or 398.

TELEPHONES: Shore telephone alongside ship connected to Sugar Mill.

SHORE LEAVE: Allowed.

GENERAL: No boats to be lowered without official permission.

AUTHORITY: Comandante de Puerto.

AGENT: See "General" before first port.

BOCA CHICA: 18.27 N. 69.35 W.

See "General" before first port.

PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Agents can be contacted by radio telephone frequency 2738 kHz, and 2638 kHz. Pilot also on VHF Channel 16. Pilot boards 1 mile outside the harbour.

ANCHORAGES: Deep water anchorage available outside port. Pilot will advise best location.

RESTRICTIONS: No entry or departure at night.

MAX. SIZE: 400 ft. length; 25 ft. draft.

HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.

RADIO: When within range, Santo Domingo Radio.

TUGS: One small tug available, ships lines used for docking.

BERTHING: Depth alongside 24 ft.

STEVEDORES: ETA's required 24 and 12 hours before arrival to arrange gangs.

MEDICAL: Medical attention can be arranged after vessel is cleared, preferably ashore. Minor cases are dealt with locally, more serious cases are transported to Santo Domingo.

TANKERS: Only small propane gas tankers can be accommodated.
DENSITY: Salt water inside harbour.
FRESH WATER: Pipe-line connection at dock, low pressure, ship's hoses used.
FUEL: Only available by truck from Santo Domingo.
GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.
OPENING/CLOSING HATCHES: Can be performed by crew or stevedores.
CUSTOMS ALLOWANCES: Bond is sealed, but can be opened at Master's request.
IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.
CONSULS: All Consuls at Santo Domingo.
REPAIRS: Minor repairs only.
REPATRIATION: Can be arranged.
AIRPORT: 6 km. to airport, served by regular airlines with numerous flights daily.
POLICE/FIRE/AMBULANCE: At Santo Domingo.
TELEPHONES: No connection to vessels.
SHORE LEAVE: Allowed.
AUTHORITY: Comandante de Puerto.
AGENT: See "General" before first port.

CABO ROJO: 17.55 N. 71.39 W.

See "General" before first port.
PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Agents can be contacted by radio telephone, frequency 2738. Pilot boards 2 miles off the port.
ANCHORAGES: Deep water anchorage available outside port. Pilot will advise best location.

CONSULS: All Consuls at Santo Domingo.
REPAIRS: Not possible.
REPATRIATION: Can be arranged.
AIRPORT: Distance to airport 360 km.
POLICE/FIRE/AMBULANCE: Contact Port Authority.
TELEPHONES: Telephone on dock connected to Alcoa office.
SHORE LEAVE: Allowed.
GENERAL: No boats to be lowered without official permission.
AUTHORITY: Comandante de Puerto.
AGENT: See "General" before first port.

LA ROMANA: 18.27 N. 69.01 W.

See "General" before first port.
PILOTAGE: Compulsory. Ordered by Agents on receipt of vessel's ETA, 72, 48 and 24 hours before arrival. Pilot launch painted white with grey cabin and with letters "LP-24" painted on sides. Pilot boards 1.5 miles from port entrance (N.E. of Catalina Island). Contact Pilot on 2738 and 2638. Pilot also on VHF Channel 16.
ANCHORAGES: West of Isla Catalina in depths of 15 to 18 fathoms.
RESTRICTIONS: No entry or sailing in hours of darkness.
MAX. SIZE: Length: 580 ft. Draft: arrival 25 ft., sailing 28 ft.
HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.
RADIO: Santo Domingo Radio, HIX2, frequency 2738 kHz. Near the port, use Centromana Radio on same frequency.
TUGS: One tug of 620 h.p. available. Extra charge for use of tugs line.
BERTHING: One concrete pier 720 ft. long. Depth 28 ft.
STEVEDORES: To be ordered 4 hours before commencing work.
MEDICAL: Doctors and hospital facilities available. Medical attention can be arranged after vessel is cleared, preferably ashore. Minor cases are dealt with locally, more serious cases are transported to Santo Domingo.
TANKERS: Berth for 1 tanker at the pier. Discharge lines 10 in., 8 in., and 4 in.

DENSITY: 1025.
FRESH WATER: Available from 2 in. pipe-line on pier. Very low rate of supply.
FUEL: Available by truck from Santo Domingo.
WATCHMEN: To be provided by vessel. Compulsory gangway watch kept by Customs Guards.
OPENING/CLOSING HATCHES: Generally by ship's crew.
CUSTOMS ALLOWANCES: Seamen may take ashore only 2 packets of cigarettes and no alcohol.
IDENTIFICATION CARDS: Shore passes issued by Immigration Officer.
REPAIRS: Only minor repairs can be effected.
REPATRIATION: Arranged via Santo Domingo.
AIRPORT: Distance 70 km.
POLICE/FIRE/AMBULANCE: Police, 235; Ambulance, 455; Fire, 455.
TELEPHONES: In dock office, ask Sugar Mill for number required.
SHORE LEAVE: Allowed.
AUTHORITY: Comandante de Puerto.
AGENT: See "General" before first port.

MANZANILLO: 19.43 N. 71.45 W.

See "General" before first port.
PILOTAGE: Compulsory. Pilot comes from Puerto Plata. Boards incoming vessels about 1 mile from the dock. (The Pilot's working hours from 0800 to 1200 hrs., 1400 to 1700 hrs.; a fee charged after working hours. A fee is also charged for movements in harbour.) Ships will be received Saturdays and Sundays and at night for the same rate for the Pilot. Contact Pilot on 2738 and 2638, also on Channel 16 VHF.
ANCHORAGES: Vessels that cannot be docked on arrival will find safe anchorage to the East of the dock where there is plenty of swinging room, in about 20 fathoms of water, with good holding ground of mud and sand.
APPROACHES: Coast Guard Service recommend that a ship, entering Manzanillo Bay from the East, should stay well out until it has rounded shoals surrounding Seven Brothers Islands. At approximately Lat. 19° 58′ N. a course of 127° will bring it into the bay near the wharf. A ship arriving from the West should stay about 6 miles off Cape Haitian Light. When abreast the light a course of 111° will lead into the Bay a short distance North of the pier.
RESTRICTIONS: Entry and departure day and night.
RADIO: Radio Station HIL31. This station is private and for the use of Grenada Co. only. Messages of ETA, etc. from vessels should be sent via Miami WAX or New Orleans Radio WNU.

Vessels bound for Manzanillo, should radio their ETA to Santo Domingo Pilot Station daily, from 0600 to 1800 hrs. on frequency 2738 and 2182.

Vessels having single sideband equipment may also contact Radio Instituto Agriario Dominicano at Manzanillo, at wavelength 2670 and 2638 kHz from 0700 to 1200 hrs. and 1400 to 1700 hrs. EST.
TUGS: No heavy duty tugs available but there is a launch for the handling of ship lines. Tug available from Puerto Plata if required due to size of vessel.
BERTHING: Prevailing winds are Easterly and sometimes interfere with docking or undocking. On the East side vessels should dock bow in, since there is not enough room to swing vessels safely around for a port docking. On the West side vessels can dock either side to the pier, depending on the direction and force of the wind. In general banana vessels will be docked on West side of the pier and cargo vessels on the East side. Pier has a concrete deck 744 ft. long, 72 ft. wide. Both sides of the pier are protected with a pine fender system. The water depth at land end of pier is 10 ft. and at the seaward end 40 ft.
MEDICAL: Small dispensary in Manzanillo. Hospital facilities in Monte Cristi, 30 km. away.
STEVEDORES: Available.
FRESH WATER: Available for ships calling at this port only.
FUEL: None available.
GANGWAY/DECK WATCHMEN: Carried out by crew.
OPENING/CLOSING HATCHES: Crew or stevedores.
CUSTOMS ALLOWANCES: Each crew member will be allowed to take ashore one only opened package of cigarettes.
CREW IDENTIFICATION CARDS: Required.
REPAIRS: Small repairs carried out only.
REPATRIATION: Facilities available.
SHORE LEAVE: Members of crew are allowed to go ashore at this port, but Masters should caution them not to take on their persons any dutiable articles, as the Customs will search such men upon landing and should any such articles be found on their persons, this will be treated as an attempt to smuggle; severely punishable offence.
AUTHORITY: Comandante de Puerto.
AGENT: See "General" before first port.

PALENQUE: 18.12 N. 70.11 W.

SHIPMASTER'S REPORT (1976). Updated 1984.

The vessel called at Punta Palenque to discharge a cargo of feedstock from Venezuela. The SBM is located in position 18° 12.2′ N. 70° 11.3′ W. and operated by Refineria Dominicana.

DOCUMENTS:
7 Crew Lists.
2 Store Lists.
1 Crew Effects List.
2 Passenger Lists.
2 Lists of Arms & Ammunition.
2 Lists of Narcotics.
1 Health Declaration.
Clearance last Port.

PILOTAGE: Pilotage is compulsory. Mooring and unmooring 24 hours a day. Pilot boards about 1 mile Southwest of SBM.

Pilot boat, a small tug with black hull and white superstructure, is equipped with VHF Channels 16 & 14, call sign Punta Palenque Pilot. Pilot moors the vessel with the assistance of the Loading Master who gives directions on the focs'le. The tug delivers the mooring gear consisting of 2 nylon tails put on vessel's bits and shackles. The nylon tail will be shackled to SBM mooring lines. These mooring lines consist of about 100 ft. nylon rope and 10 ft. chain. The chain is heaved inboards by means of 1 wire and 1 nylon or polyprop messenger and connected to nylon tails on vessel's bits.

MAX. SIZE: Vessels up to 260 m. in length with max. draft of 14.6 m. A circle of 2000 ft. around the buoy with a min. depth of 50 ft.

HEALTH: Radio Pratique not available.

RADIO: As crude is supplied from Punta Cardon, Venezuela, Masters to send ETA Punta Palenque before sailing from Cardon, handing the message to Cardon Agents for them to transmit via telex system. Messages should include draft on arrival, number of crew, whether any sickness on board. Messages to be sent to Refidomsa, Santo Domingo and copy to Agent.

TUGS: Not available for mooring itself. Messengers to and from SBM are handled by a small work boat.

BERTHING: Single Buoy Mooring, property of Refineria Dominicana S.A. (Telegraphic Address: Refidomsa), located about 2,500 m. offshore, or 2.5 miles S.W. of Punta Palenque light. Nature of bottom: sand over coral. Buoy fitted with Radar Reflector and flashing red light.
Loading Master plus 3 men remain on board.
Connection amidships, port side.

LOADING: Shore Line System: From shore to ship:
1×28 in. line from tank farm to shore 750 m.
1×28 in. submarine line 2,550 m.
2×16 in. underwater hose systems from seabed to buoy.
2×16 in. floating hoses, about 165 m. long.
2×12 in. hoses to ship's manifold 27.5 m. long.
Maximum rate of discharge: 4,800 cu.m./hr.
Maximum back pressure: 150 p.s.i.
Product: Crude oil discharge.
Storage: 450,000 barrels.

REPAIRS: None available.

GENERAL: No navigational hazards approaching Punta Palenque from the South. SBM shows on radar at a distance of about 11 miles.
Reference: B.A. charts 3689, 471; West Indies Pilot Volume 1, Supplement No. 3 1975.
Weather: Wind: N.E. Trades
Current: Predominating from East to West but sometimes shifting to opposite direction for short periods. Velocity about 1.5 knots.
Services: Fresh water, provisions, fuel oil and diesel oil not available. No medical assistance. Shore leave not permitted, repatriation not possible.
Master's Remarks: When approaching from the South, the coast of Dominican Republic gives a good radar target. SBM could be picked up at about 11 miles distance, however, the red flashing light of SBM is very poor. Punta Palenque Pilot could be contacted at a distance of 30 miles.
Authorities: After vessel is moored Pilot acts as Agent together with a senior Custom Officer who came on board with the Pilot. Two junior Custom Officers will stay on board during the stay in port, also Loading Master and/or his assistant. Pilot delivers outward clearance.

SHIPMASTER'S REPORT: (1977). Updated 1984

DOCUMENTS: Last port clearance.
8 Crew lists.
6 Passenger Lists (nil).
3 Stores lists.
5 Firearms declarations.
1 Vaccination list.

To be legitimised by Dominican Consulate if possible, otherwise notarised by the Chamber of Commerce at sailing port or pay local requirements fee.

PILOTAGE: Pilotage compulsory. Pilot boards 1 mile S.W. of S.B.M. which is the waiting area. ETA required by Pilot at least 6 hours before arrival. The vessel cannot under any circumstances dock without the Pilot as the Loading Master is stationed on the forecastle head and advises Pilot of helm and engine requirements when approaching S.B.M.

ANCHORAGES: Temporary anchorage on the coastal bank to the West of S.B.M. to suit vessel's draft.

RESTRICTIONS: A vessel may enter and leave the port during hours of darkness and at any stage of the tide.

MAX. SIZE: Max. length 854 ft. Max. draft 48 ft.

TUGS: 1 tug available, tug attends on arrival and departure bringing to and removing from the vessel all the gear required for mooring (Snotters, Strops, etc.). At night the tug also illuminates the hose string as the buoy light is poor.

RADAR: The radar reflector on the S.B.M. is excellent and gives out a good echo at 10 miles.

BERTHING: Position of S.B.M. 18° 12′ N., 70° 11.4′ W.
Terminal Operator: Refineria Dominicana De Petroleo S.A. (Refidom SA).

At the time of berthing depth of water under the keel by echo sounder was 45 ft., the nature of the bottom at the berth was sand and coral.

As stated above the vessel is able to dock and un-dock at any stage of the tide day or night.

When 1 mile from the S.B.M. (waiting area) vessel approaches the buoy on a N.E. heading parallel to the hose strings and then turns the vessel to stem the current flow.

Moorings: Plaited ropes with cable chafing lengths shackled between the two plaited ropes. Snotters to the bitts from the central panama lead.

The port derrick to be rigged in advance to accept mooring gear from the tug and lift hoses (2×12 in. string).

Hoses: S.B.M. hoses connected to the ship's manifold (2×12 in.). Distance from the S.B.M. to the shore tanks is 1.5 miles. Shore booster pump not available, steam jacket or similar facilities not available. Max. pressure on line 125 p.s.i., max. weight to be lifted 5 tons. Product Handled: Crude Oil. Ship's accommodation ladder not required.

DENSITY: 1025.

SERVICES: None of the following are available; fresh water, provision, repairs, airport, surveyors, fuel oil, doctor, hospital, laundry, slop facilities.

TIME: Pilot advises time is GMT minus 4 hours (throughout the year).

GENERAL: Vessel's ETA by telex to be given to Santo Domingo from the last port of call, any changes should be passed to the Agent through 'Curacao Radio' as at no time whilst on passage from Punta Cardon could traffic be passed through 'Santo Domingo Radio'. The Pilot acts for Agent, Customs and Immigration (with Port Captain in attendance) leaving with papers, cables and telex, consignees documents etc., after the vessel is all fast. The ship's official documents were not examined. 2 custom guards and the Loading Master remain on board and should be provided with cabins and meals.

The Loading Master accepts the Notice of Readiness and ullages, specific gravity and temperatures of the cargoes given by ship's staff, he also maintains VHF contact with the Agent in Santo Domingo through the refinery.

The Loading Master, Berthing Master and Sailing Pilot all speak English. VHF contact made with the refinery when 45 miles from the S.B.M. who then passed our amended ETA to the Pilot.

SHORE LEAVE: Not possible.

AUTHORITY: Refineria Dominicana De Petroleo, S.A., Apartado 1439, Santo Domingo, Republica Dominicana. *Tel:* 533-3161. *Telex:* 3460342 (ITT), 3264320 (RCA). *Cables:* Refidom. *Contact:* D. Roffel, Superintendent.

PUERTO DUARTE (El Botado): 19.12 N. 69.26 W.

See "General" before first port.

PILOTAGE: Pilot will board vessels between No. 2 Buoy and No. 4 Buoy.

TUGS: Not available.

BERTHING: Finger pier, length 230 m. Depth alongside 30 ft.

FUEL: Available by truck.

REPAIRS: Not possible.

GENERAL: *Chart:* No. 917.

AUTHORITY: Captain of the Port.

PUERTO PLATA: 19.49 N. 70.41 W.

See "General" before first port.

PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Agents can be contacted by radio telephone, frequency 2738 and 2638. Pilot boards 0.5 miles from port entrance. Pilot also on VHF Channel 16.

ANCHORAGE: Deep water anchorage available outside port. Pilot will advise best location.

RESTRICTIONS: Night entry not recommended.
Depth at entrance 42 ft., depth on bar 37 ft. HW and 34 ft. LW, depth in harbour 30 ft. to 35 ft.

HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.

RADIO: When within range, Santo Domingo Radio.

TUGS: Tugs not available.

BERTHING: One wharf 30 ft. alongside. Pier 496 ft. long, 135 ft. wide. Facilities include water, electricity, warehouses. New pier recently constructed is 934 ft. long, with depth alongside 35 ft., also 144 ft. wide.

CRANES: Not available.

STEVEDORES: ETAs required 24 hours and 12 hours before arrival to arrange gangs.

MEDICAL: Medical attention can be arranged after vessel is cleared preferably ashore. Minor cases are dealt with locally, more serious cases are transported to Santo Domingo.

TANKERS: Berth at molasses/petroleum berth.

DENSITY: Salt water inside harbour.

FRESH WATER: Pipe-line at wharves. Ship's hoses used.

FUEL: Diesel and fuel oil available by truck from Santo Domingo.

GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.

OPENING/CLOSING HATCHES: Can be performed by crew or stevedores.

CUSTOMS ALLOWANCES: Bond is sealed, but can be opened at Master's request.
IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.
CONSULS: Germany (F.R.) – Mr. E. T. Heinsen.
REPAIRS: Minor repairs only.
REPATRIATION: Can be arranged.
AIRPORT: Distance 250 km.
POLICE/FIRE/AMBULANCE: At Santo Domingo.
TELEPHONES: Nearest in Customs House alongside wharves.
SHORE LEAVE: Allowed.
GENERAL: No boats to be lowered without official permission.
AUTHORITY: Comandante de Puerto.

AGENT: See "General" before first port.

RIO HAINA: 18.25 N. 70.01 W. (See Plan)

See "General" before first port.
PILOTAGE: Pilot boards from small boat flying a flag with a white "P" on a black background, about 1.0 mile from harbour entrance. Contact Pilot on 2738 or 2638 and Channel 16 VHF.
RESTRICTIONS: It is recommended to sail during daylight only.
MAX. SIZE: Max. draft 30 ft. 6 in.
TUGS: 2 tugs, 1,200 h.p. and 850 h.p.
BERTHING: 12 berths available. Vessels going to load sugar swing inside the harbour with the aid of a tug, and berth starboard side to the quay. Ship's gangway is recommended. There is sometimes quite a swell running inside the harbour. The port anchor is used for berthing and unberthing.
LOADING: Sugar is loaded by 3 mechanical loaders which are fixed so that large vessels are required to shift along the quay to load in end hatches. Loading rate is quoted as being 350 t.p.h. Cargo quantities are given in short tons.

At least one beam has to be removed from each hatchway to allow loader to enter.

Possible to load 8,500 ton vessel within 24 hours.
SPECIALISED CARGO HANDLING FACILITIES: Roll-on/Roll-off facilities on East bank of river. Container gantry crane destroyed by hurricane. Mobile cranes available for container and bulk cargo discharge.
FRESH WATER: *Shipmaster's Report:* October 1982. Fresh water can be supplied alongside fertiliser plant and container quay only, ship's hoses used.
FUEL: Fuel oil, diesel and intermediate fuels available from bunker barge.
REPAIRS: Minor repairs in Santo Domingo.
DEVELOPMENTS: Berth under construction. On completion there will be 750 m. of berthing space for 3 Ro/Ro vessels.

SHIPMASTER'S REPORT: March 1984.

Four Buoys have been installed in front of the entrance to the port and are not in line with the leading lights when entering. On the starboard side there are 2 red buoys (Fl. red) and on the port side 2 black buoys (Fl. green).

AUTHORITY: Autoridad Portuaria Dominicana.

AGENT: See "General" before first port.

SAN PEDRO DE MACORIS: 18.30 N. 69.12 W.

See "General" before first port.
PILOTAGE: ETA required 24 hours before arrival. Pilot meets vessels 0.5 miles from buoy. Pilot Radio Station frequency is 2738 and 2638 also VHF Channel 16. In the event of bad weather vessel should remain 3 miles South of the buoy. Pilot boards from small unmarked motor boat.
ANCHORAGES: One mile South of the lighthouse; depth 60 ft.
RESTRICTIONS: Channel depth 28 ft. Up to 480 ft. length, no restrictions. Arrival is preferable during daylight hours. Departure daylight hours only.
MAX. SIZE: Vessels of 600 ft. length have berthed alongside. Draft up to 27 ft. maximum.

Larger vessels leaving port after loading may require to use port anchor to manoeuvre around sharp bend in buoyed channels just inside harbour entrance.
HEALTH: In case of illness or death on board, send a cable before arrival; doctors available.
RADIO: Radio Station, frequency 2738, call Radio Pilot de San Pedro de Macoris.
TUGS: Compulsory. Tug joins vessel inside the port – 150 ft. from the quay. One tug 500 hp.
BERTHING: Quay No. 1, 900 ft. long, 25 ft. depth; Quay No. 2, 600 ft. long, 25 ft. depth; Quay No. 3, 600 ft. long 24 ft. depth.

Large vessels arriving to load swing inside the harbour using starboard anchor and berth port side to quay. At a later date barges are placed between the ship and quay, to permit greater draft, and Pilot receives extra payment for doing so. Use of gangway is recommended.
LOADING: Vessels loading sugar use ship's gear and ship has to supply rope slings. The chains on the centre sections of MacGregor hatches are broken, and a gap of about 2 ft. made, through which the bags of sugar are bled into the holds at the rate of about 220 tons per gang per day. Only 6 bags per sling are lifted at a time. Stevedores cover hatch openings with tarpaulins when loading is completed for the day. They will make up any extra slings that are required if ship supplies rope.

TANKERS: Oil line diameter 8 in. Max. pressure 60 p.s.i.
FRESH WATER: Available.
FUEL: Supplied by truck.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Crew.
CUSTOMS ALLOWANCES: Only sufficient for port consumption. Allowed take only 2 open packets cigarettes ashore.
IDENTIFICATION CARDS: Required.
CONSULS: Great Britain Vice-Consul only. Others at Santo Domingo.
REPAIRS: Minor repairs only.
AIRPORT: Airport is located at 40 km. distance.
TELEPHONES: No telephones on board.
REGULATIONS: Rat guards to be fitted on all ropes. No boats to be lowered without official permission.
REPATRIATION: Can be arranged.
SHORE LEAVE: Allowed.
AUTHORITY: Comandante de Puerto.

AGENT: See "General" before first port.

SANTO DOMINGO: 18.28 N. 69.53 W. (See Plan)

See "General" before first port.
PILOTAGE: Pilot arranged by Agent on basis of Master's advance notice of ETA. Pilot and Agents can be contacted by radio telephone, frequency 2738, 2182, and 2638 kHz. Pilot boards 1.5 miles off breakwaters. Pilot also on VHF Channels 12 and 16.
ANCHORAGES: Deep water anchorage available outside port. Pilot will advise best location.
RESTRICTIONS: If draft over 24 ft., Master should advise Agent before arrival. Berthing after dark not advisable for petroleum and grain berths.
MAX. SIZE: Length over 650 ft. inadvisable. Max. draft 30 ft. 06 in. at grain berth, 29 ft. for tankers at 28 ft. at general cargo berth.
HEALTH: Pratique granted after Health Authorities have boarded and cleared vessel. In case of disease aboard notify Agents before arrival. Pratique is automatic when proceeding from another port in the same country.
RADIO: When within range, Santo Domingo Radio.
TUGS: Join vessel inside port. Ship's lines used. 2 tugs available, 1,200 h.p. and 800 h.p.
BERTHING: 7 berths for vessels up to 600 ft. length. Depths 18 ft. – 28 ft.

Daylight berthing only for vessels proceeding to private Tallow/Soda terminal and Cement Wharf. Shore cranes up to 80 tons capacity available.
BRIDGES: Vessels proceeding up river, height limited to 95 ft. above waterline.
STEVEDORES: ETA's required 24 and 12 hours before arrival to arrange gangs.
MEDICAL: Medical attention can be arranged after vessel is cleared, preferably ashore.
TANKERS: One berth, draft 29 ft., at Sans Souci.
DENSITY: Brackish inside harbour. Effect of tide negligible.
FRESH WATER: Pipe-line alongside berths. Ship's hoses used.
FUEL: Fuel oil, intermediate fuel and diesel available ex-tanker berth. At other berths by bunker barge.
GANGWAY/DECK WATCHMEN: Compulsory gangway watch kept by Customs guards.
OPENING/CLOSING HATCHES: Performed by crew or stevedores.
CUSTOMS ALLOWANCES: Bond stores are sealed.
IDENTIFICATION CARDS: Shore passes are provided by Immigration Authorities.
CONSULS: All Consuls at Santo Domingo.
REPAIRS: Minor repairs only.
DRY DOCK: Can accept vessels up to 320 ft. long, 50 ft. beam and 17 ft. draft.
REPATRIATION: Can be arranged.
AIRPORT: Distance, 26 km.; served by regular airlines with numerous flights daily.
POLICE/FIRE/AMBULANCE: Police, San Domingo 682-3000; Ambulance, San Domingo 682-4288; Fire, San Domingo 682-2000.
TELEPHONES: No connection to vessels.
SHORE LEAVE: Allowed.
GENERAL: No boats to be lowered without official permission.
DEVELOPMENTS: Santo Domingo's Sans Souci tourism wharf, phase 1, is now under construction on the Eastern side of Santo Domingo harbour.

Phase 1 of the project comprises the construction of a dock with a platform measuring 250 m. in length by 31.40 m. in width. Totally made out of precast prestressed concrete members, it is designed to accommodate simultaneously two 20,000 metric ton displacement passenger ships or one of 50,000 metric tons. Besides the dock itself, there is a 20,000 sq. ft. passenger terminal building to be built which will be equipped with all the services and facilities necessary to allow cruises to originate in the new port.

Also under construction is a 1,000 metric ton potable water reservoir with a 50,000 g.p.h. pumping station.

The site selected, the Eastern shore of Ozama River, is 15 minutes by car from Santo Domingo's Las Americas International Airport.

The entire harbour will be dredged to a minimum depth of 35 ft. below mean sea level.

The Sans Souci tourism wharf completed. Depth 28 ft.

Phase 2 and Phase 3 consist of berthing facilities for one 20,000 metric ton displacement passenger ship each; construction of these additional berths has not yet been ordered by the Government.
AUTHORITY: Comandante de Puerto.

AGENT: See "General" before first port.

Ecuador

GENERAL

REPORTING: All vessels on entering within 200 miles of the Ecuadorian coastline should contact Guayaquil Naval Radio Station HCG on 8360 MHz and advise ETA at port and name of Master. If no contact is made, keep a copy of message and log on times it was intended to be passed. This copy must be given to the Agent on arrival.

DOCUMENTS:

Consular Documents:

In the port of origin of the voyage to Ecuador or in the last foreign port where there is a consulate before the vessel's arrival in the country, the following documents are to be submitted to the Consul for approval on model forms DIMERC 100 to 107, in 5 copies:

(a) Cargo Manifest.
(b) Crew List.
(c) Passenger List or "no passenger" declaration.
(d) In-transit Passenger List or "no in-transit passenger" declaration.
(e) Ship's Stores List.
(f) Crew's Effects Declaration.
(g) Maritime Health Declaration.
(h) Mail List.

The original set of these documents remains on board the vessel, the duplicate and triplicate are submitted to the Customs Administration, if they refer to cargo, and to the Captain of the Port, if they refer to the crew or passengers. The quadruplicate is sent to the Ministry of Foreign Affairs, and the quintuplicate remains in the Consul's files.

Prior to Arrival:

Arrival Notice: 72 hours before the vessel's arrival in the pilot waiting area, the shipping agency shall submit to the Port Authority the arrival notice form, on a special port format or its own format, containing basic data on the vessel and the request for services (pilotage, towage, berthing, etc.).

The vessel's arrival time should be communicated to the following authorities 24 hours in advance: Captain of the Port, Customs, Customs Police, Migration and Maritime Health.

Information on cargo for the port: The agency shall submit to the Port Authority the following documents by the deadlines indicated:

(a) General Import Cargo Manifest, in triplicate	24 hours before start of operations
(b) Import Bill of Lading, complete set	At the time operations start
(c) Cargo Stowage Plan by hatch	24 hours before start of operations
(d) Cargo List (breakdown of cargo)	24 hours before start of operations
(e) Container Contents List	24 hours before start of operations
(f) Dangerous cargo List	48 hours before vessel's arrival in the pilot waiting area
(g) Tally books, 15 copies (must be true copy of Bills of Lading and have an alphabetical index)	6 hours before start of operations.

On Arrival:

On entrance of the vessel, the following documents should be submitted on DIMERC forms 100 to 107, which, although they follow LAFTA/OAS forms 1 to 6, differ from them in that they bear the seal of Ecuador and must satisfy the following requirements:

Type of Documents	*Number and Distribution of Documents*					
Basic Forms:	*Captain of Port*	*Customs Police*	*DIMERC*	*Migration*	*Maritime Health*	*Total*
1. General Declaration	1	1	–	–	–	2
2. Cargo Manifest	1	2	1	–	–	4
3. Crew Roll	1	2	–	1	1	5
4. Passenger List (a)	1	2	–	1	1	5
5. Ship's Stores (b)	1	2	–	–	–	3
6. Crew's Effects Declaration (c)	–	2	–	–	–	2
7. Maritime Health Declaration (e)	–	–	–	–	1	1
8. Mail List	–	2(d)	–	–	–	2
Additional Documents:						
9. Clearance Permit from Last Port	1	–	–	–	–	1
10. In-transit Cargo Manifest	1	1	1	–	–	3
11. "No Passenger" Declaration	1	2	–	1	1	5
12. "No Passenger" Declaration or In-transit Passenger List	1	2	–	1	1	5
13. Cargo Manifest (e)	–	2	–	–	–	2
14. Crew List (e)	2	–	–	–	–	2
15. Passenger List (e)	2	–	–	–	–	2
16. Ship's Stores (b)	–	2	–	–	–	2
17. Crew's Effects Declaration (c)	–	2	–	–	–	2
18. Maritime Health Declaration	–	2	–	–	–	2
19. Mail List (e)	–	2	–	–	–	2
20. Cargo Bill of Lading	–	–	1 set	–	–	1 set
21. Passengers' Baggage List	1	2	–	–	–	3
22. List of Unaccompanied Baggage or "no baggage list"	1	2	–	–	–	3

(a) Does not indicate sex.
(b) Has additional column for storage place.
(c) Omit crew signature column.
(d) One copy for the Postal Service.
(e) With Consular visa.

Prior to Departure:

Before departure, a complete set of the general export cargo manifests and a complete set of the export loading bills of lading are submitted to the Port Authority.

Clearance of vessel shall be requested from the Captain of the Port on a special form, which is submitted in 2 copies, each of which is to be accompanied by the following documents:

General Declaration	1
Crew List	1
List of Passengers or "No Passenger" Declaration	1
Stores List	1

The Captain of the Port returns to the ship the original clearance permit, duly certified, and retains one copy for his file.

In addition, 2 hours before departure, a clearance form must be submitted to the Customs Police, and a list of embarked passengers or a "no passenger" declaration and a list of crew changes is to be submitted to Migration.

PRATIQUE: Radio Pratique is not normally granted. Notice of arrival should be given at least 24 hours prior to arrival to Radio Naval Guayaquil, call sign HCG. Listens on 500 kHz, 8,385 kHz and 8,320 kHz. Answers back on 8,472 kHz and 8,475 kHz.

The message should read as follows:

CAPUERTO
MEDICO SANIDAD
ADMINISTRADOR ADUANA followed by name of port
IMMIGRATION
"vapor . . . 1 . . . 2 . . . procedente . . . 3 . . . no enfermos abordo, no explosivos, no pasajeros para . . . 4 . . . pasajeros en transito . . . 5 . . . tons carga para descargar . . . 6 . . . sacos correo para descargar eta boya . . . 7 . . . agencia . . . 8 . . . 9 . . . Capitan. or in translation (original must be sent in Spanish).
SS . . . 1 . . . 2 . . . from . . . 3 . . . no sick on board, no explosives, no passengers for Guayaquil (or name of port) . . . 4 . . . passengers in transit . . . 5 . . . tons cargo to discharge . . . 6 . . . bags of mail to unload ETA Sea Buoy . . . 7 . . . Agency . . . 8 . . . 9 . . . Captain.

1. Name of the vessel.
2. Nationality of the vessel.
3. Last port and port of call.
4. Number of passengers in transit (logically, if there are passengers for the port call, instead of saying (no pasajeros para . . . the correct number would be indicated).
5. Number of weight tons of cargo for the port.
6. Number of bags of mail.
7. Estimated hour of arrival at Sea Buoy, or Buoy No. 1 off Data.
8. Agent's name.
9. Master's name.

The same message should be sent to the ship's Agent.

When quoting arrival times use GMT or Ecuadorian Time (GMT minus 5 hours). Summer time is not kept.

The boarding party usually arrives on berthing.

The Vaccination Certificates should be ready in the same order as the Crew Lists.

FLAG: The national flag has yellow, blue and red horizontal stripes. The yellow is twice the width of the others. Government vessels show the national Arms in the centre of the flag.

All foreign vessels will fly the flag from the highest mast.

PILOTAGE: Pilotage is compulsory for all vessels over 500 tons gross. Vessels should await the Pilot off the Sea Buoy at all ports unless instructed to the contrary. The Pilot must be requested by the Agent at least 12 hours in advance. They are available 24 hours a day, every day of the year.

STEVEDORES: The stevedores are drawn from the 4 respective unions in rota. The foremen are generally selected by the Agent. The same gang will work the ship until completion, working around the clock if necessary. Gangs will start work at virtually any hour.

Opening and closing of ship's hatches is undertaken by the stevedores and also the rigging of gear. Even though the stevedores receive payment for rigging anyway, it is advisable to use the ship's crew.

Cold fresh water and lavatories must be made available to the stevedores.

Tally clerks are selected in a similiar way to the stevedores.

WATCHMEN: 1 or 2 Customs guards will remain on duty, nevertheless the use of watchmen is advised.

GARBAGE: Before docking all vessels should cover all discharge points to prevent material or water being deposited on the quayside. The dumping of any waste is strictly forbidden except in an emergency. No oil may be dumped within 50 miles of the coast, and Ecuador strictly enforces the Anti-Pollution laws.

RAT GUARDS: These must be placed on all mooring lines while the vessel is in port. This rule is strictly enforced.

FIRE DRILL: Periodical fire drills are held. The signal is 6 short blasts. Smoking on dock is prohibited, and cigarettes must not be thrown through port holes.

CREW: Shore leave is permitted except at the tanker berths. Each man must carry an identity card. It is difficult to sign on a foreign crew member in Ecuador, unless he has been left behind by another company vessel. A visa is not required for replacements arriving from abroad, but the crew member must have a passport or seaman's book, together with a letter from the ship operator stating name of vessel to be joined.

In declaring personal effects, all new purchases must be listed, as well as electrical devices, typewriters, sextants, etc.

The Master has the right to issue or annul boarding passes if he has the approval of the Port Authority.

As a rule visitors are not allowed entry to the Port Area, although special permits are given to certain vendors. They may come on board solely at the discretion of the Master.

PIRACY: Acts of piracy have taken place on vessels alongside in the Port of Quayaquil.

BALAO TERMINAL (Esmeraldas): 01.02 N. 79.44 W.

(See Plan)

LOCATION: The Terminal Petrolero de Balao is comprised of the area between the following geographical co-ordinates:

Lat. 00° 55′ 00″ N, Long. 79° 40′ 00″ W.
Lat. 01° 04′ 00″ N, Long. 79° 40′ 00″ W.
Lat. 00° 55′ 00″ N, Long. 79° 46′ 00″ W.
Lat. 01° 04′ 00″ N, Long. 79° 46′ 00″ W.

The Terminal Petrolero de Balao consists of 2 mooring areas: The SBM area for loading crude oil; and the TEPRE area for loading refined products.

The terminal has a storage area for crude oil situated on a hill 180 m. above sea level made up of 6 storage tanks that constitute the final leg of the Trans-Ecuadorian Oil pipe-line.

Each of the tanks has a 332,000 barrel capacity (or 13,524,000 gallons, 42 gallons per barrel). The tanks are 18 m. high and 60 m. in diameter.

Manifolded to each tank are 2 pipes that gravity feed the SBM's. One is 42 in. in diameter and the other 36 in.

The Offshore Terminal at Balao is made up of 2 SBMs nominated "X" and "Y" Buoys and a terminal for refined products (TEPRE).

Relative Location: "X" Buoy (SBM – West) designed for ships up to 100,000 d.w.t., is located 4.5 miles N.W. of the mouth of the Esmeraldas River (Rio Esmeraldas). "Y" Buoy (SBM – East), designed for ships up to 100,000 d.w.t., is situated 3.3 miles from the coast at its closest point and 1 mile on True bearing 081° from "X" Buoy. Both are at a minimum depth of 120 ft. LWS.

Tankers with a maximum of 1,000 ft. between perpendiculars, a maximum beam of 135 ft., and a maximum draft of 52 ft., can moor at the buoys. There should be between 400 ft. and 525 ft. between the bow of the tanker and the underwater manifold.

The TEPRE area is composed of a Conventional Buoy Mooring System (CBM), and forms a parallelogram with an East-West axis.

The mooring facility can receive ships between 6,000 d.w.t. and 20,000 d.w.t. A tolerance of 10% less for ships in the lower range is provided for. The minimum depth of available water is 14 m. DLWS and the greatest admissible draft that will not cause damage to the underwater installations is 10 m.

Geographical Location:

SBMs:

Buoy "X" (SBM – West) Lat. 01° 02′ 03″ N., Long. 79° 42′ 57″ W.
Buoy "Y" (SBM – East) Lat. 01° 02′ 12″ N., Long. 79° 41′ 52″ W.

Terminal for Refined Products (CBM):

Buoy A – Lat. 01° 01′ 3″ N., Long. 79° 40′ 7″ W.
Buoy B – Lat. 01° 01′ 3″ N., Long. 79° 40′ 5″ W.
Buoy C – Lat. 01° 01′ 1″ N., Long. 79° 40′ 5″ W.
Buoy D – Lat. 01° 01′ 1″ N., Long. 79° 40′ 7″ W.

DOCUMENTS: For the official reception of the vessel, the Port Authorities, presided over by the Superintendent and Shipping Agent, will come aboard immediately upon arrival of the ship. In order to be declared in Free Pratique, the tanker must have the following documents ready:

Sailing documents from the last port of call.
Crew List (4 copies).
Declaration of Stores.
Declaration of Personal Effects of Crew Members (2 copies).
List of Passengers (6 copies).
Cargo Manifest (4 copies).
Bill of Lading (2 copies).
General Declaration (5 copies).
Ship's Register.
TOVALOP or P&I Insurance.

PILOTAGE: Pilotage is compulsory. The ship will approach to a distance of 1.5 miles North of Buoy "X".

According to Ecuadorian law pilotage is mandatory and Masters must obey all Statutory Laws and Regulations such as: The Code of Maritime Police; the Pilotage Regulations; and the Operations Regulations for Oil Terminals.

The following dispositions must also be followed:

(a) The officer responsible for boarding and putting ashore the Pilot is the officer on duty.
(b) The vessel must have an accommodation ladder and/or a pilot ladder.
(c) The length of the ladder must not exceed 30 ft. If the distance between the water level and the access point to the main deck is greater than 30 ft., a combination of one section of pilot ladder and another of accommodation ladder must be used.
(d) The pilot ladder must be properly secured and placed on both sides of the vessel.
(e) At night the pilot ladder and its immediate vicinity must be adequately illuminated.
(f) The top of the ladder must be so arranged that the Pilot can safely pass on to the deck of the vessel.
(g) The ladder must be maintained in good condition and its rungs must remain horizontal upon boarding and going ashore. The surface of the rungs must be rough.
(h) The ladder must be stable in such a way that each step rests on the side of the vessel and with spacers placed at least every 10 ft. in order to prevent the ladder from turning.
(i) Nylon ladders must not be used.

Pilotage Area: This area is within the following co-ordinates:

(a) Lat. 01° 00′ 00″ N., Long. 79° 40′ 00″ W.
(b) Lat. 01° 00′ 00″ N., Long. 79° 46′ 00″ W.
(c) Lat. 01° 04′ 00″ N., Long. 79° 40′ 00″ W.
(d) Lat. 01° 04′ 00″ N., Long. 79° 46′ 00″ W.

The waiting area, the anchorage area and the berthing area are included in this zone.

The Waiting Area: The area to wait for the Pilot is 1 mile North of Buoy "X".

The Anchorage Area: The vessels that must anchor upon arrival will proceed to the waiting area 1.5 miles North of Buoy "X" (SBM – West) and with the Pilot on board will navigate to the anchorage area found between:

(a) Lat. 01° 00′ 30″ N., Long. 79° 44′ 00″ W.
(b) Lat. 01° 00′ 30″ N., Long. 79° 46′ 00″ W.
(c) Lat. 01° 02′ 00″ N., Long. 79° 44′ 00″ W.
(d) Lat. 01° 02′ 00″ N., Long. 79° 46′ 00″ W.

Operation Area for Tankers: This area, where mooring Buoys "X" and "Y" are found, is located between:

(a) Lat. 01° 00′ 00″ N., Long. 79° 40′ 00″ W.
(b) Lat. 01° 00′ 00″ N., Long. 79° 44′ 00″ W.
(c) Lat. 01° 03′ 00″ N., Long. 79° 40′ 00″ W.
(d) Lat. 01° 03′ 00″ N., Long. 79° 44′ 00″ W.

LIGHTS: *SBM Lights:*

Characteristics:

Buoy "X" (SBM – West)		Buoy "Y" (SBM – East)	
Light	Amber	Light	Amber
Flash	1.2 secs.	Flash	0.7 secs.
Dark	6.8 secs.	Dark	0.3 secs.
Period	8.0 secs.	Period	1.0 sec.
Range	5.3 miles	Range	5.3 miles

Lights at the terminal for refined products:

Light	Yellow
Flash	1 sec.
Dark	3 secs.
Period	4 secs.
Range	5 miles

APPROACHING: The most outstanding sights approaching Balao are: The Coquito Lighthouse, located 2 miles West of Punta Este (entrance of Rio Esmeraldas); the crude storage tanks in Balao on a hill (186 m. above sea level) visible from approximately 20 miles; and Punta Gorda, a craggy rise situated approximately 4.4 miles S.W. of Punta Coquito. The prominent points are easily detected by radar.

From Punta Las Palmas to Punta Gorda the coast consists of cliffs and small valleys for about 5 miles in a West by S.W. direction.

Punta Gorda, a craggy rise with nearby cliffs, has a reef that extends half a mile offshore North of the point. From Punta Gorda to Punta Sua, about 9.5 miles East by S.E., the coastline is low except for the cliffs close to Punta Gorda.

ANCHORAGE: While awaiting berthing at the offshore terminal ships can anchor in the following area:

(1) Lat. 1° 00′ 30″ N., Long. 79° 44′ 00″ W.
(2) Lat. 1° 00′ 30″ N., Long. 79° 46′ 00″ W.
(3) Lat. 1° 02′ 00″ N., Long. 79° 44′ 00″ W.
(4) Lat. 1° 02′ 00″ N., Long. 79° 46′ 00″ W.

MAX. SIZE: Maximum 100,000 d.w.t., max. load 100,000 tons/730,000 bbls., max. LOA 274.3 m., max. beam 39.6 m., max. draft 15.2 m., and max. distance aft/manifold 137.1 m.

Therefore tankers up to a maximum of 100,000 d.w.t. will be moored. Acceptance of tankers' dimensions and d.w.t. must be obtained in advance.

RADIO: Vessels bound for Balao must advise their ETA to the Superintendencia and their Agents, 72 hours and 24 hours before arrival. The message must contain vessel's name, ETA, Master's name.

VHF: The Pilots listen on Channel 16 (VHF) then change to Channel 14 once contact has been established.

The Terminal maintains a 24 hour watch on VHF-FM frequency 156.800 kHz, Channel 16, with an approximate range of 40 – 60 miles. Once contact has been made with the tanker, either Channel 14 or any other channel designated by the radio operator will be used.

TUGS: 5 tugs available, all radio equipped.

MOORINGS: *(SBM's):* The SBMs "X" and "Y" have rotating tables on which the oil handling and mooring devices are mounted. These can turn in the direction of the tanker.

The mooring ropes: Each buoy has 2 mooring ropes for securing to the bow and these are permanently attached to the buoy. Each rope is 185 ft. long and 15 in. thick and is connected to 30 ft. of 2 in. chain that is secured to the bitts of the ship with cable grommets and mooring shackles provided by the Terminal.

TEPRE CBM: The underwater manifold is located 2.1 miles from shore at the end of the product pipe-line. Its function is to distribute the products from the dispatch lines to the tanker or to the product re-cycling lines, whatever the case may be. The underwater manifold also houses the deballasting line.

The tankers are loaded by underwater hoses connected to the product loading outlets on the underwater manifold. The hoses are hoisted onboard the tanker once it is properly moored to the buoy field.

How the buoy field is secured: Stud Link grade U2 0.5 in. chain.
Rupture Tension 223 tons.
Working Tension 159 tons.

Anchors: Conventional, according to design specifications recommended by R.I.N.A. (Italian National Register).

Each buoy is secured by a chain to the anchor in order to avoid displacement by wind, current, or the tension of the ship. They are anchored with enough weight to avoid drifting.

BERTHING: Mooring operations will take place during daylight hours under normal weather conditions.

The unmooring operations will take place 24 hours a day.

Mooring Turn (Arrival): Priority for tying up is determined by the ship's time of arrival in port. In any case, those that arrive first have priority if and when they have received authorisation from the Direccion General de la Marina Mercante y del Litoral to operate freely.

The port derrick must be rigged and ready for use on arrival and vessels should be warned that the weight of each hose is at least of 5 tons under favourable conditions. This will be used to lift the floating deballasting/loading hoses as well as crates of materials that will be delivered by a terminal tugboat at the anchorage before the mooring operations begin.

For the mooring operations the ship must provide the following personnel and materials, which must be ready on the foredeck:

Personnel:
First Officer on deck
Boatswain
2 winch operators
2 seamen to handle the ropes.

Materials:
2 winches that work
2 mooring lines 2.5 in. in diameter; 600 ft. long
2 nylon mooring lines 1 in. × 10 ft.
2 manila heaving lines 0.25 in. diameter × 30 ft.
1 nylon or polypropylene mooring line 2.5 in. in diameter and 300 ft. long centre astern.

Mooring: The approach and mooring of the tanker will take place with the aid of the Pilot from Balao and the Loading/Mooring Master from the CEPE-TEXACO Consortium in accordance with the Operation and Tariff Regulations for Oil Terminals.

When the vessel is at a reasonable distance from the berth, the mooring tugboat will take 2 of the ship's warping lines. Tie these to the mooring lines which are attached to the buoy and bring them on board. As the buoy ropes come clear of the water, it will be noted that chains are attached to them. These chains are to be secured to the bitts in such a manner that the nylon is outside of the external length of the ship so the chains absorb any chafing if the buoy lines cross the bow. There are 2 buoy lines. Power must be available at all times on all deck winches and windlass while the vessel is at the berth.

A mooring line must be available aft, secured to the bitt and of sufficient length to enable a tug boat to pick up the eye and tow it off to re-position the vessel if necessary.

Mean Time For Operations At The Terminal: Subject to the differences of each ship, the following times can serve as a guide:

1. Approach to the buoy from anchorage	50 minutes
2. Approach from waiting area	30 minutes
3. Loading the equipment used for mooring and connecting the hoses	20 minutes
4. Mooring	30 minutes
5. Lifting and connecting the hoses	80 minutes
6. Disconnecting the hoses	40 minutes
7. Casting off from buoys	10 minutes
8. Unloading personnel and equipment	25 minutes

HOSES: *Buoys "X" and "Y":* Lifting, connecting, disconnecting, lowering and other operations will be performed by a special team from shore under the Loading/Mooring Master's orders with assistance of the ship's deck officer. Port derrick must be rigged and ready for use before mooring operation begins.

Members of the ship's crew will be required to operate the winch or winches. Particular care should be taken during the hose handling operation in order to avoid serious damage to the hoses, the plastic floats and buoys on the plate edges, rails, etc.

BALLAST: *Deballasting:* The Terminal is not able to receive slops on shore, therefore its discharge is prohibited.

All clean ballast must be pumped ashore, with the exception of vessels especially equipped with clean segregated systems which are reserved for ballast only. Vessels so equipped will be permitted to pump segregated ballast overboard after being accepted and approved by shore inspectors.

After the tanks have been inspected and approved by the Terminal, deballasting will commence under the supervision of the Loading/Mooring Master. Upon completion the tanks will be inspected again and if ready for loading, a certificate will be signed by a representative of the consortium.

For the water processing of ballasted tankers, the Balao Terminal has an adequate system that starts in the hoses of the buoys and passes through a submarine pipe going to a pre-separator, where it hits and separates: first the water of the hydrocarbons, then goes to a decantation pool, where it stays 48 hours and after goes to a final separator in which are collected the last traces of hydrocarbons and finally the clean water is drained to the sea.

LOADING: Loading is through SBM's which are 49.5 ft. in diameter and held, each one in position by fixed chains secured to piles sunk into the sea bed.

Buoy "X" is equipped with a 750 ft. length and 20 in. self float loading hose which is manifolded to two 105 ft. length and 12 in. tail hoses. Buoy "Y" is equipped with a 20 in. hose and is manifolded in the same fashion as Buoy "X".

1. Loading ratio. Not withstanding greater capacity, currently the loading rate has been reduced to 32,000 bbls.p.h. at both buoys with a minimum of 10,000 bbls.p.h. and maximum pressure of 100 p.s.i. on land.

2. Under no circumstances will the vessel be loaded at a rate greater than that requested by the Master. It is the Terminal's responsibility to maintain the requested loading rate.

3. The load on top system is accepted at this terminal and vessels are requested to arrive with slop tanks "settled out".

UNMOORING: The Loading Master will advise to Texaco Control the estimated time for the completion of loading and will ask for Official Pilot. Then, hose disconnecting operation is undertaken aboard ship. After the unmooring takes place, the tug boat comes alongside the ship to transfer all materials and personnel that have been used during the operation. Then the vessel will proceed to the anchorage area where anchored it will await loading and sailing documents.

TEPRE OPERATIONS: *Mooring and Unmooring at the Terminal for Refined Products:* The Pilot on duty will be in charge of mooring and this will take place according to the wind and current conditions.

Loading: Once the vessel is secured, loading will be directed by the State Petroleum Corporation of Ecuador (CEPE). For this, 3 divers, 4 hosemen and 1 loading supervisor will come to the vessel and together with the ship's crew, connect the hoses.

Description of the Operation: Once the tanker's derrick is ready, a diver will dive to the ocean floor with a hook that will be attached to the hose of the product to be loaded. Once on deck, the hose will be connected to the ship's manifold.

Loading rates:

Product	*Designed Rate* (cu.m.p.h.)	*Admissable Rate* (cu.m.p.h.)
Gasoline	636	700
Kerosene/Diesel	477	650
Fuel Oil	800	1,100

Deballasting	(d.w.t.)	
Tanker	6,000	300
Tanker	12,000	400
Tanker	20,000	600

Diameter of Flexible Product Hoses	(in.)
Fuel Oil	10
Gasoline	10
Kerex/Diesel	10

Deballasting: The same system used for loading will be employed for deballasting differing only in that the ship will pump to shore.

Products: The products that are currently being loaded at the TEPRE terminal are: Gasoline, diesel, kerex and bunker.

MEDICAL: The city has two hospitals: Hospital Delfina Torres de Concha and Hospital Franlin Tello Mercado.

FRESH WATER: Available in limited quantities. If more than 200 tons are needed, this must be requested 72 hours in advance.

FUEL: Limited availability and only in emergencies.

CONSULS: Colombia: Calle Sucre s/n entre Piedrahita y Manuela Cãnizarez. Tel: 713-661.
Chile: Calle Colon y 10 de Agosto. Tel: 710-045.
France: Av. Eloy Alfaro y Salinas.
Panama: Av. Kennedy 1100, Las Palmas. Tel: 710-370 and 711-180.

REPAIRS: Only minor repairs can be carried out and this is with the exclusive authorisation of the Superintendencia. These must not jeopardise the safety of the vessel or the installations.

REPATRIATION: Only if the person has all the necessary documents (passport, certificates, etc.).

TIME: GMT minus 5 hours.

SHORE LEAVE: Considering local operating conditions, permission to come ashore is subject to the approval of Migracíon y Extranjeria (Immigration) and must be requested by the vessel's Agent. Transportation must be provided by the Agent and subject to the rates established by the respective authorities.

SERVICES: Yagua General Services Ltd. can offer the following services:
Launch services.
Water supply.
Hospital medical attention.
Shipchandler.
Crewmember exchange, etc.

They could also be appointed as protecting Agent of any particular vessel.

GENERAL: *Flags:* The quarantine flag must be flown by the vessel when approaching the Balao Terminal. It must be lowered once the ship has been declared in Free Pratique.

The National Flag of Ecuador will be permanently flown while the ship is at the Terminal.

Contraband: Ecuadorian law is rigorous in reference to contraband. The Master must instruct his subordinates to avoid taking cigarettes, cigars, tobacco, alcoholic beverages, drugs, etc. to the shore.

These articles must be reported before arriving at the Terminal and with their respective lists put under the Master's custody during the ship's stay.

In no way will commercial transactions between crew members and Terminal employees or third parties be tolerated.

Visitors: With the exception of Terminal personnel and other employees whose duties require them to board (Port Authorities, Ministry of Natural Resources Inspectors etc.), all visitors are strictly forbidden. Exceptions to this rule will require the authorisation of the Superintendencia.

Watches: Permanent watches must be maintained on board; on deck as well as in the engine room. These watches must have sufficient crew members to move the ship in case of emergency.

Charts: National charts: I.O.A. 1002 Port of Esmeraldas. Ed. December 20, 1982. Foreign charts: N. 021033 (HO-1176).

Wind and Currents: The predominant wind and marine currents throughout the year are S.W. During the rainy season (December – May), however, the wind and current suffer a slight change and at times come from the N.E. and North.

In the berthing area the currents often vary and will oppose the direction of the wind and cause the ship to yaw strongly.

Tide: The tide in syzygy comes up 13 ft., in quadrature 11.5 ft. The tidal currents have been reported (1956) at a rate of 1.5 knots, a little stronger during low tide.

REGULATIONS: (Not all Regulations printed). Due to the fact that Balao is very close to Las Palmas, Atacames, Śua, etc., any pollution will cause serious damage to the beaches and fishing grounds. Therefore, ships are obliged to avoid any possible pollution of local waters that would be caused by pumping crude oil, diesel, or other fuels or oily mixtures from the engine room bilges.

In the piloting area the traffic of small craft such as fishing vessels, coasting vessels engaged in cabotage is absolutely prohibited with the sole exception of small craft used in the reception and mooring of tankers and these must be authorised by the Superintendencia.

Masters Responsibility: While the ship is at this Terminal, the Master will continue to be responsible for the security of the vessel.

While the ship remains at the buoys, its main engines must be ready for any emergency. If they are turbines they must be in reverse.

Vessel's Obligations in Port:

1. It is the obligation of the Master of the ship, or his representative, to receive the Pilot and the Loading/Mooring Master at the gangway, and provide them with all the information they may need.

2. The Master will delegate the First Officer or another responsible officer to receive the Port Authorities at the gangway and provide them with the documents and other information they may request while on board.

3. The Master must present the Superintendencia with a Certificate of Pollution Insurance issued by TOVALOP, the Ship's Register and any other document that may be required.

4. Meals must be provided for Superintendencia personnel and Customs, Police, etc. that are on duty.

5. A cabin and meals must be provided for the Loading/Mooring Master on duty during the loading operation.

6. The ship must provide meals for the 4 hosemen on board.

7. Meals and cabins must be provided for the Superintendencia's Safety and Pollution Control Inspectors when necessary.

8. Meals and a cabin must be provided for the Pilot if on board at mealtime.

9. All required materials and personnel must be placed at the disposition of the Terminal's Representative so that he can adequately carry out his job especially for easy and safe access of personnel on board.

10. The ship must provide personal assistance and other facilities required by the Ministry of Natural Resources Engineers on duty, so that they can efficiently control and inspect the oil being loaded and the tanks used.

Reports to the Superintendencia: During their stay in Port, the Master of the tanker must report any problem on board concerning:

1. Breaches in safety measures during mooring, deballasting, loading and unmooring operation.

2. Oil spills produced by bad hose connections, breaks in the hoses, filtration due to improper plugging of scupper holes, or any other reason.

3. Pollution caused by bilge pumping, tank washing, or any other operation that is not permitted.

4. Any abnormal situation that might affect the operating safety of the tanks.

5. Personnel accidents during work.

6. Theft on board or discovery of commercial transactions between crew members and Terminal workers etc. (contraband)

7. A copy of the measurements on board once the vessel is loaded.

Safety Regulations: The deck officer on duty must check the list of questions one by one to make sure the vessel's safety measures are in order. Some of the points that must be observed are as follows:

11. Are the mooring lines in good condition? (TEPRE – 12 nylon or polypropylene lines according to the tonnage of the tanker. SBM – 2 nylon or polypropylene lines, 600 ft. long.)

12. Are the short lines in good condition? (TEPRE: 12 short nylon lines, 1 in. thick and 10 ft. long each one.)

13. Is the derrick in good condition and has capacity for at least 5 tons?

24. Is the hydrocarbon log up-to-date? Check it!

25. Is the Master aware of the port regulations?

Safety Precautions for Ships:

1. Verify that mooring conditions are in accordance with Terminal requirements.

2. As a safety measure during operations, ships headed for Balao to load crude oil must arrive with enough ballast to correspond to 25% to 30% of its cargo capacity and down no more than 10 ft. by the stern.

9. The red flag, BRAVO, must be raised during the day and a red light must shine at night.

10. Ashtrays in the smoking room must contain water.

11. Due to the underwater chains, pipes and hoses, it is absolutely forbidden to use anchors close to the buoys.

12. All of these rules will be enforced by the Safety and Pollution Control Inspectors, along with the Loading and Mooring Masters.

AUTHORITY: Superintendencia del Terminal Petrolero de Balao, Casilla 286, Esmeraldas, Ecuador. *Tel:* 711-100, 712-100. *Telex:* 7579. *Contact:* Fernando Gavilanes Granja, Superintendent.

AGENT: *Main Office:* Yagua Ltd., Shipping Agency, P.O.Box No. 69, Quito, Ecuador. Victor Hugo 114e, Isla Pinzon, (Jipijapa), Quito, (Ecuador). Cable: Yagua Quito (Ecuador). Telex: 022220 Yagua Ed (Monday through Friday. See Operations Office for Saturdays and Sundays). Tel: 554-484, 554-485, 543-429.

Operations Office: Avenida Kennedy 1100 (Las Palmas). Cable: Yagua Esmeraldas (Ecuador). Tel: 710-370, 711-180 (available 24 hours a day). Telex: 7589 Yagua Ed.

Also on VHF Channels 16, 6, 12 and 71.

ESMERALDAS: 01.00 N. 79.39 W. (See Plan)

PORT LIMITS: Between the meridians 79° 38′ W. and 79° 39′ W. and the parallels 00° 59′ N. and 01° 02′ N.

NAVIGATION AIDS: The port complex of Esmeraldas has navigational aids consisting of the installation of 6 lighted buoys which mark the access channel to the port; 1 landfall buoy in the waiting area for Pilots; 4 lights located at the head of quays, 2 on the 2 breakwaters (principal and secondary) which limit the commercial quay and in the accesses to the dock of the Fishing Port and 2 pairs of leading lights – one pair at the top of Coquito Hill to the S.W. of the port and another pair near to the residential area of Tachina towards the S.E. of the port.

DOCUMENTS: The documents required by the Port Authorities on arrival of vessels are as follows:

Clearance From Last Port.
4 General Declarations.
1 Health Declaration.
5 Lists of Crew Members.
5 Lists of Passengers.
6 Sets of Cargo Manifests.
4 Sets of Bills of Lading.
1 Stevedoring Plan.
Certificate of tonnage and radio to be checked.

PILOTAGE: Pilotage is compulsory.

Prior to commencement of manoeuvring and navigation, the Pilot will require from the Master the following information: conditions of steering, conditions of ship machinery, condition of the aids to navigation, conditions which may limit the manoeuvres which are about to be effected, the draft forward and aft, nature of the cargo, availability of mooring lines and the system of anchorage.

The Pilot will require the presence of the Master of the vessel on the bridge at all times during manoeuvres.

ANCHORAGE: The area for awaiting the Pilot and quarantine is located between meridians 79° 39′ 15″ W. and 79° 40′ 00″ W. and the parallels 01° 01′ 00″ N. and 01° 01′ 50″ N.

MAX. SIZE: The port is limited to receiving vessels not greater than 200 m. LOA and 35 ft. max. draft.

RADIO: The Port of Esmeraldas currently has no radio service, but the Terminal of Balao: Lat. 01° 02′ N., Long. 79° 44′ W., which is relatively close, has a radio service.

To communicate through Balao, vessels arriving at Esmeraldas must advise or communicate their ETA to the Naval Superintendency of Esmeraldas, 72 and 24 hours prior to arrival. Messages must contain the names of the vessel, ETA and name of the Master.

24 hours listening out is maintained on HF-SSB-2182 – 2136.3 kHz call-up frequency and 4139 – 6210 kHz working frequency and on Channel 16. Generally vessels will have contact with this channel at a distance of 20 to 30 miles from the port. Channel 14 will be used for contact between the vessel and the Naval Superintendency before arrival in port.

BERTHING: All systems of maritime transport of general cargo (Ro/Ro lash, USO multiple and containers with own crane equipment) can be used in the Port of Esmeraldas, since there is:

An ample dock of some 35 hectares with direct access. The port is not affected by winds, tides or undertow.

A marginal quay, 350 m. long and 26 m. wide at its forward part, giving facilities for handling and transfer of any kind of cargo.

Areas of free spaces for the storage of containers, semi-trailers and other types of cargo with an area of 66,000 sq.m. A closed warehouse of some 6,000 sq.m. area, and areas reserved for future usage of 110,000 sq.m.

A ramp for Ro/Ro vessels whose position is perpendicular to the quay designed so that vessels operating in loading and unloading are not interrupted by tidal differences.

Equipment for handling containers, semi-trailers, palletised cargo and others. Mobile cranes 2×60 tons, 2×35 tons, 2×15 tons, 20 loaders of 7.5, 6 and 3 tons and 8 trucks with platforms.

STEVEDORES: The port offers services to vessels without any restrictions and uninterrupted during all days of the year, 24 hours a day, with the exception of the 24th December when work is interrupted from 1700 hrs. until 0800 hrs. on the 26th December and the 31st December from 1700 hrs. until 0800 hrs. on the 2nd January.

MEDICAL: Doctors available.

FRESH WATER: Available.

FUEL: Available.

DEVELOPMENTS: The second stage of port works which have been projected, comprise:

Construction of a container quay 210 m. long with a storage area of 8 hectares.

A marginal quay 140 m. long with the same characteristics as the quay of 350 m. long and is a continuation of it, which will permit the berthing of 3 deep-sea vessels at one time.

Two additional warehouses of 6,000 sq.m. each.

Open air storage surface areas covering 3.5 hectares.

Extension of electric and sanitary services to the new areas.

SHIPMASTER'S REPORT: June 1979.

Navigation: Two orange coloured beacons on the land to the East side of the river, act as leading marks (bearing 166°T) from approx. 4 miles to seaward, right up to the entrance of the port. They are not lit. Depths along this line were not less than 100 m.

Off the entrance to the port, two orange coloured beacons on the West side near Coquitos Point Lighthouse, are the leading marks into the harbour. They are not lit. Entering the harbour, the deep water shoals rapidly to about 12 m., but at no time were echo soundings of less than 11.5 m. MLWS encountered either in the entrance, or in the manoeuvring area inside, or alongside. Beacons mark the extremities of the breakwaters but they are not lit.

Two buoys mark the East and West edges of the deep water channel outside of the breakwater. They are lit. Further buoyage is planned to mark the deep water area.

Pilots: 2 Pilots on board, 1 to communicate with each tug. Only 1 Pilot and 1 tug equipped with 'walkie-talkie' radios.

Tugs: 2 square bowed American type river-barge pusher tugs are available and they have adequate power to assist in manoeuvring on and off the berths. Unfortunately, the 2 vertical posts on their bows are likely to cause sharp indentations in vessels' bow and stern plating when the tugs are used for pushing. They should only push against the flat vertical surfaces of the hull.

Berthing/Facilities: There are 2 berths and a Ro/Ro facility, but only 2 large vessels can be accommodated alongside at any one time. A large cargo shed is under construction opposite Berth No. 2, and the container and open cargo areas have been surfaced. Both berths are to be supplied with bunkering and fresh water facilities, but these are not operative at present time. No actual assessment of cargo handling equipment could be made, but it was noted that there were 2×30 ton mobile cranes and 5×7.5 ton forklift vehicles in the parking area in the compound. The Agent reported that low-loaders and trailers were available for the movement of containers and that forklifts could be hired for use in the hatches.

The loading of bundles of balsawood was carried out directly from lorries which brought the cargo alongside and the rate of loading was about 165 bundles (20,600 board feet) per gang hour.

At present the harbour is somewhat obstructed by anchored fishing boats and small craft, but these are to be shifted to the new fishing port being constructed to the South of the main harbour.

AUTHORITY: Autoridad Portuaria de Esmeraldas, Casilla 280, Avda. Jaime Roldos-Las Palmas, Esmeraldas, Ecuador. *Tel:* 711-910, 710-800, 711-996. *Telex:* 7586 Aupesm-Ed. *Cables:* Aupesm. *Contact:* Ing. Teddoro Moroan Moran, Manager.

GUAYAQUIL: 02.12 S. 79.52 W. **(See Plan)**

DOCUMENTS:

Port Doctor:

Derat Certificate.
Maritime Declaration of Health.
Crew Roll.
Passenger List.
Passenger List in Transit.

Harbour Master's Office:

Voyage Report.
Clearance from last port.
Crew Roll with original visa from Ecuador Consul in first port of voyage (3 copies).
Passenger List with original visa from Ecuador Consul in embarking port, or declaration that they have no visa, signed by Master (2 copies).
Passenger List in transit signed by Master or declaration that they have no passengers in transit (2 copies).
Provisions List, Stock and Medicines on ship (3 copies).
Cargo Manifest in transit (1 copy).
Combustible or inflammable Cargo (1 copy).

Customs:

8 copies of Manifest.
Sealed envelope of Manifests, consular and commercial invoices and non negotiable vouchers.
Cargo index and copy of Cargo Manifest in direct transit (8 copies).
A Register (8 copies) of spare parts for vessel and provisions.
Crew Roll and detailed list (8 copies) of personal belongings of officers and crew.
Passenger List, with indication of their suitcases and list of suitcases that travel without their owners; in this case should be specified the port where they were put on board and personal declaration of each passenger (8 copies).
If the vessel with ballast, Master will be obliged to produce (besides the ballast certificate) documents already mentioned in each respect. Master or Maritime Agency will produce a written statement to Customs within 12 hours from arrival of vessel whether they decide to take any cargo for exporting. If not loading vessel must leave within the following 24 hours.

Immigration:

Crew List signed by Master.
Passenger List of those who disembark there or a declaration of none for this port, signed by Master.
Passenger List in transit, or a negative declaration signed by Master.
In case of having passengers to disembark in this port, Master should produce passports and visas.
Crew identification cards or similar documents.
Inspection of ship by Authorities will be done (compulsory) within 3 hours of arrival, usually as soon as ship berths, or in quarantine.

PILOTAGE: Vessels approaching port to notify their arrival by Naval Radio Station HCG, 24-hour service, frequency 8476 kHz and 500 kHz. Traffic list broadcast every hour on 8476 kHz.

Advance notice of not less than 12 hours required, addressed to Capuerto Aportuaria Agencia in either English or Spanish with the following details: date, and time of ETA, destination (whether Buoy No. 1 or Puna), maximum draft, cargo details, details of passengers or mail, and if Pilot required.

Pilot Station for Puerto Maritime: Situated in position Lat. 02° 43′ 18″ S., Long. 80° 17′ 30″ W. Pilot boat needs 1 hour to go from pilot station to Buoy No. 1. Contact by VHF Channel 16, 24-hour service. Pilot boat is wooden, 45 ft. long, black hull, white cabin, with letter "P" on sides. During day carries blue flag with letter "P" and by night has regulation pilot lights.

Pilot Station for River Guayas: Situated in village of Puna. Pilot boat requires a minimum of 30 minutes to move from pilot station to vessel. Vessels requiring Pilot signal Morse letter "X" by lamp or sound.

Pilot boat has grey iron hull, white cabin with Lancha de Practicos written on both sides. By day carries blue flag with letter "P". By night regulation pilot lights.

ANCHORAGES: *Puerto Maritime:* 1 mile South and 2 miles West of Sea Buoy in position Lat. 2° 44′ 26″ S., Long. 80° 24′ 44″ W. Min. depth in the area is 35 ft.

Guayas River: Inside area between bearings 180° and 135° from the lighthouse of Punta Mandinga at Puna, 1 mile from the lighthouse.

MAX. SIZE: Max. length for ships entering Puerto Maritime is 650 ft., with a max. draft of 33 ft. Vessels of deepest draft should begin to enter 1 hour before high tide. For Guayas River max. length 600 ft., max. draft 23 ft. 6 in.

HEALTH: Procedure to obtain Free Pratique is to produce health certificates to port doctor upon arrival. To get Free Pratique by radio, ship must radio to port doctor any changes in health situation on board since leaving last port.

TUGS: Normally join vessel beyond Buoy No. 80. Tugs are compulsory, also use of their lines is compulsory. Cost of both services is included in total cost of port duties.

BERTHING:

Berth	*Length* (m.)	*Depth* (ft.)	*Remarks*
Marginal Pier	960	31	5 berths
New Port			
Berth 1A	185	33	Bananas, General, Containers.
1B	185	33	
1C	185	33	
1D	151	33	Bulk, sugar, grain, vegetable oil.

BRIDGES: No bridges that restrict traffic either in Estero Salado nor in Guayas River, but ships that are to berth in village of Eloy Alfaro (Duran) should take into consideration height of telephone lines between Guayaquil and El Islote, minimum height 48 ft.

STEVEDORES: Radio message to ship's Agent will give agency enough data to make all arrangements required for operations of loading/discharging. In Maritime Terminal an average discharge/loading rate of 25 tonnes/p.h. per hook.

MEDICAL: If ship requires medical attention, a notice of 12 hours should be given to Agents. Guayaquil Hospital and clinics are available.

TANKERS: Discharge asphalt in Guayas River at a special quay, max. draft 23 ft. 6 in. Discharge of petrol for aviation in Puerto Maritime is to lighters, max. draft permitted is 33 ft.

DENSITY: 1012.

FRESH WATER: Available. Three pipes at each berth delivering at a rate of about 20 tonnes/p.h. each.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Capitania del Puerto provides members of the Policia Maritima. Ships to supply watchmen with food.

Piracy: Acts of piracy have taken place alongside. The pirates boarded from a speedboat and threatened crew with knives.

OPENING/CLOSING HATCHES: Carried out by crew.

CERTIFICATES: All ship's certificates required.

CUSTOMS ALLOWANCES: Each member of crew allowed 600 cigarettes. Each Crew member or passenger allowed 1 litre of wine and 1 litre of spirits.

IDENTIFICATION CARDS: Not required.

CONSULS:

Argentina
Belgium
Bolivia
Brazil
Chile
Colombia
Costa Rica
Denmark

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: Dry dock with capacity of 3,600 tonnes.

REPATRIATION: Facilities for effecting crew changes and arranging any necessary repatriation.

AIRPORT: Airport is 8 miles from Maritime Terminal and has scheduled international flights.

TIME: Local time is GMT minus 5 hours. There are no alterations during year.

HOLIDAYS: 1st January; Good Friday, 1st and 24th May; 24th and 25th July; 10th August; 9th and 12th October; 2nd and 3rd November; 25th December. Only on the 1st January and 25th December is there no working in port.

POLICE/AMBULANCE/FIRE: For any of these services call 211 (interno del Puerto).

TELEPHONES: Arrangements for placing telephone on board ships on request.

SHORE LEAVE: Allowed.

PURSER'S REPORT: (March 1975)
The government have now issued their own set of papers. These must be made out in sets of 7 i.e.: 7 Crew Lists. 7 Passenger Lists, 7 Crew Customs Declaration Forms, 7 Cargo Manifests, 7 Dangerous Cargo Manifests (if carried), 7 Lists of Mail (if none – nil returns on sheet), 7 General Declarations, 1 Maritime Health Form, 7 Stores Lists.

All Forms should be certified by Ecuadorian Consul or friendly Nation at Port of departure.

AUTHORITY: Capitan del Puerto de Guayaquil, Puerto Maritimo.

LA LIBERTAD: 02.12 S. 80.55 W. (See Plan)

DOCUMENTS: Port clearance is effected at La Libertad.

The following papers must be ready for presentation to the authorities on arrival:

1 Bill of Health signed by the Master and visaed by the Ecuadorian Consul at port of departure.
1 Ballast Certificate visaed by Ecuadorian Consul at port of departure.
6 copies of Cargo Manifest (if any cargo for the port).
6 copies Bills of Lading.
9 Crew Lists (original visaed by Ecuadorian Consul at port of departure).
9 Passenger Lists for the port (if no passengers state "without passengers"). If applicable, the list should show names, sex, age, nationality, port of embarkation, occupation and whether married or single. Passengers must make a declaration of their luggage on Ecuadorian Form No. 94.
9 Stores Lists.
5 Lists of Crew's personal effects (new articles only).
4 Lists of unaccompanied baggage (if none, state "without them").
4 Lists of Encomiendas (list of small private parcels to be landed in Ecuador – if none, state "without them").
4 Lists of Mail (if none, state "without them").

If there is no Ecuadorian Consul at the port of departure, the documents must be visaed by the Consul of a friendly nation.

PILOTAGE: Compulsory. Pilots boarding in position Lat. 2° 08′ S. – Lat. 2° 10′ S. and Long. 80° 55′ W. – Long. 80° 56′ W. ETA should be given to port 12 hours before arrival. Open roadstead.

ANCHORAGE: No limitations except depth 36 ft.

Vessels proceeding to oil terminal should anchor about 1 mile N.N.E. of the mooring buoys (which are about 15,000 ft. off-shore) where the Port Authorities and Mooring Master board. The anchorage is an open roadstead with sandy bottom.

RESTRICTIONS: *Tankers:* Daylight berthing only.

MAX. SIZE: *Tankers* – LOA 650 ft. Beam 84 ft.
Loaded draft 34 ft. 6 in.
Depth MLWS at mooring is 43 ft.

HEALTH: Vessels arriving from foreign ports should fly appropriate International Code signals to advise state of health and request Free Pratique. Vessels put in quarantine required to fly signal "QL" all the time they are in port until Port Health Authority advises to the contrary.

RADIO: ETA messages may be sent by radio to Radio Naval, HCG Guayaquil Radio, 8476 kHz, 500 kHz. Radio Naval would then repeat the message to the Naval Station in Salinas, or to the Telegraph Office. Radio Naval has VHF/RT and Telex.

TUGS: Only tankers require tugs to berth at the buoys. Other vessels work cargo at anchor.

BERTHING: No wharves for large vessels, only for coasters.

STEVEDORES: Arranged by Agent; separate ETA not required.

MEDICAL: If urgent medical attention required, Master should radio details in advance. All facilities available.

TANKERS: The Anglo-Ecuadorian Oil Fields Terminal is located in Santa Elena Bay. Four small marker buoys indicate the seaward end of the submarine pipe-line. An Easterly current usually prevails, rate being from 0.5 to 1.5 knots. There is 1×14 in. submarine pipe-line fitted with 2×10 in. flexible hoses for connecting to ship. Max. loading rate is about 450 t.p.h, and max. pressure is about 150 p.s.i.

Mooring Master assists in berthing vessels. Vessels are moored port side to, using starboard anchor off the starboard bow and mooring buoys for lines to the port bow and astern. Vessels moored during daylight hours only; however, they may unmoor at any hour of the day or night. Recommended that at least 1 tank of clean ballast be retained on board vessels until mooring has been completed. Ballast will then be pumped overboard. Vessels should be equipped with three 9.5 in. or 10 in. (circ.) – 200 fathom hawsers for use in mooring and 7 rope stoppers each at least 3 fathoms long. The following signals are used in connection with the loading of cargo.

By Day: Start loading 2 long blasts of vessel's whistle or siren, 1 red flag hoisted; stop loading 4 long blasts of vessel's whistle or siren, flag hauled down.

By Night: Start loading, 2 long blasts of vessel's whistle or siren, 1 red light hoisted; stop loading, 4 long blasts of vessel's whistle or siren, 1 red light hauled down.

To summon the launch, 3 long blasts are to be blown on the vessel's whistle.

DENSITY: 1028

FRESH WATER: Not available.

FUEL: Bunkers available, but have to be requested 72 hours prior to arrival in order to make transport arrangements.

CONSULS: There is no consular representation of any country at La Libertad. The nearest are at Guayaquil.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Can be done by the crew or stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits per man.

IDENTIFICATION CARDS: Required.

REPAIRS: Anglo-Ecuadorian Oil Fields Company can effect small repairs.

REPATRIATION: Can be effected from port of Guayaquil.

AIRPORT: At Guayaquil, 130 km. away, served by regular airlines.

TIME: GMT minus 5 hours.

HOLIDAYS: January 1st; Carnival; Good Thursday; Good Friday; May 1st; May 24th; July 24th; August 10th; October 9th; October 12th; November 2nd; November 3rd; December 25th.

TELEPHONES: No connections to vessels possible, except at tanker moorings which is direct to loading installation only.

SHORE LEAVE: Permitted.

GENERAL: Dirty ballast or slops not admissible at La Libertad.

AUTHORITY: Terminal Superintendence La Libertad.

MANTA: 00.56 S. 80.43 W. (See Plan)

DOCUMENTS:

A. List of documents, 1 copy.
B. Sailing Permit from last port. Original to Captain of Port.
C. General Declaration, 5 copies – Health Department 1, Captain of Port 1, Immigration 1, Custom House 1, and Port Authority 1. (See Note No. 2 below):
  1. Health Declaration.
  2. Stores Declaration.
D. List of passengers destination Manta, including list of their baggage, 2 copies – Customs 1, Immigration 1.
E. List of Passengers in transit, 2 copies – Immigration 1, Port Authority 1.
F. Crew List (including and indicating any members leaving vessel at Manta), 4 copies – Customs 1, Immigration 1, Captain of Port 1, Port Authority 1.
G. Manifest of Cargo for discharge at Manta including transhipment 4 copies – Customs original and copy, Port Authority 2.
H. Checking Books, 5 copies, plus 1 copy for each point of possible discharge of cargo from vessels for Port Authority.
I. Bills of Lading, 1 complete set for Port Authority.
J. List of vessel supplies including liquors, cigars, cigarettes, other tobacco products, matches, lighters, clothes, novelties, and provisions will be maintained in Purser's Office for review by Custom House.
K. Tissue Manifest, hatch list and cargo plan. 1 copy of each for Port Authority prior to arrival of vessels. These papers to be sent by air mail as per regulations.
M. General Manifest. This manifest will include all cargo loaded during voyage which will include all cargo in transit – 1 copy. General manifest will be maintained in Purser's Office for review by Custom House, and be accessible for Customs at all times.

Note No. 1: Port Authority reserves the right to refuse berthing facilities until all documents received. Of course, this authority will be handled with discretion to avoid unnecessary or unwarranted delay to vessels, passengers, and cargo.

Note No. 2: General Declaration should contain the following:

A. Name of vessel, length and registered tonnage.
B. Owners.
C. Voyage number and ports of call on voyage.
D. Total number of passengers aboard.
E. Total tonnage (of 1,000 kilos) of cargo aboard.
F. Total number of passengers for Manta.
G. Total tonnage (of 1,000 kilos) of cargo for Manta.
N. Health Declaration.
O. Stores Declaration that ship's consumable foodstuffs and consumable supplies are under lock and key; that the slop chest, shop, and store-rooms containing liquors, cigars, cigarettes, other tobaccos, matches, lighters, clothes, novelties, sports material, toilet articles, cosmetics, medicines, etc. have been locked and sealed with metallic non re-usable seals with serial numbers. The seals are identifiable by their non-repeat numbers.

All vessels should have these seals aboard and should equip doors and door frames with suitable secure hardware through which seals can be passed. (Model of the form for the above document may be obtained from the Port Authority).

PILOTAGE: Compulsory. Pilot boat by day will show Pilot flag at mast head; by night red light 2 ft. 6 in. below mast head light, both visible around the horizon.

Pilot will board at point located at distance of 1 mile, 000° from Manta Breakwater Light (Lat. 00° 56′ 20″ S., Long. 80° 43′ 02″ W.). He will immediately proceed to conduct ship to inner harbour and dock at assigned pier or anchor in assigned anchorage.

Vessels will not have to anchor, but will reduce speed to steerageway and stop propeller. Lower pilot ladder so Pilot may board safely on port side of vessel. Pilot will act as Representative of Port Authority. Other Officials and Representative of steamship Agency will embark once ship has tied up.

Pilotage compulsory for all foreign vessels over 500 tons, with following exceptions:

(1) Fishing craft, yachts, tugs, barges and other craft of less than 500 tons total displacement whose handlers are suitably licensed by Captain of the Port of Manta.

(2) Vessels of the Ecuadorian Navy.

Note: Masters of large vessels and handlers of small craft who do not follow all rules of safety, including Rules of the Road may lose their right to navigate within jurisdiction of the Port Authority and may be subject to additional sanctions.

ANCHORAGES: Free anchorage area located around a point 1 mile from Manta Lighthouse (Lat. 00° 56′ 03″ S., Long. 80° 43′ 01″ W.). Depth 45 ft. Anchorage inside breakwater will be assigned by Pilot.

RESTRICTIONS: No restrictions upon entry. Vessels up to 33 ft. draft may enter at any time of day or night.

MAX. SIZE: Max. permissible length 600 ft., breadth 60 ft., draft 33 ft.

HEALTH: Radio Pratique granted all ships in accordance with International Sanitary Regulations. Health documents will be delivered to boarding officer of Port Authority. When Pratique granted by radio, not necessary for port doctor to board vessel.

In request by radio for Pratique, vessels should give following data 12 to 24 hours before arrival.

A. Date and hour of expected arrival.
B. Number of Ecuadorian passengers.
C. Number of alien passengers.
D. Statement regarding existence or non-existence of communicable diseases aboard.

RADIO: Manta HCM 8372 kHz. Radio telephone 2182 kHz. VHF Channels 10 and 16 (Costera Manta).

TUGS: 2 tugs. 1×1,300 h.p. and 1×1,800 h.p. Tugs join vessel in vicinity of pier. Ship's lines usually used. Use of tug for docking and undocking is at discretion of Port Authority.

BERTHING: Berth will be assigned by Pilot at boarding time.

Berthing Facilities:

2 Piers Length 200 m. for vessels with draft up to 10 m. 2 Roll-on/Roll-off ramps, facilities at 2 piers., depth 22 ft.

Marginal Quay, length 150 m., for vessels with draft up to 7.5 m.
Marginal Quay, length 150 m., for vessels with draft up to 5.7 m.
Marginal Quay, length 150 m., for vessels with draft up to 3.8 m.

Cranes: Mobiles cranes with capacity 12 – 35 tons.

Storage Area: 100,000 sq.m. of open storage available.

STEVEDORES: Arrangement for stevedores made by ship's Agent prior arrival.

FRESH WATER: Fresh water available in small quantities.

FUEL: Diesel oil available in small quantities by truck.

FIRE PRECAUTIONS: Regular fire precautions should be taken by all ships. Smoking should be prohibited in any section of the ship used for cargo. No smoking on the weather deck, cargo decks, and the ship's holds, whether cargo being worked or not. Smoking around hatches or at cargo winches must be prevented.

Smoking should be restricted to the passenger section of vessels, and to officers' and crew's quarters where suitable receptacles are available.

Persons including officials can be fined or refused entrance to terminal at discretion of Port Authority for careless or intentional disregard of reasonable fire prevention precautions.

Port Authority reserves right to inspect cargo working sections of vessel, to check precautions against fire, and to determine whether there are any undue accumulations of combustible materials.

Pumps and other fire fighting equipment aboard should be maintained in a state of readiness as long as vessels are in the terminal.

GANGWAY/DECK WATCHMEN: Custom police keep watch at the gangway.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco, small amounts for personal use while in port. Wine and/or Spirits, wines and liquors by the glass for consumption on board while in port.

CARGO GEAR: Ship should have cargo nets, but Port Authority can provide cargo nets at extra cost.

IDENTIFICATION CARDS: Crew members should have identification cards while ashore at all times.

CONSULS:

Panama: Mr. Jorge Alava, Banco del Pichincha, Tel: 612411 – 611089.
Germany (F.R.): Mr. Wolf Harten, Industrias "Ales", Tel: 611760.
Spain: Mrs. Pilar Quilez de De Genna, Tel: 613548.

REPAIRS: Minor repair facilities available.

REPATRIATION: Repatriation of crew members through Port of Guayaquil.

AIRPORT: Airport with 2,500 m. runway. Flights to Quito at 0915 hrs. on Monday to Saturday. From Portoviejo (36 km.) flights to Quito on Monday to Friday at 1700 hrs. Air taxis on request.

TIME: Local time GMT minus 5 hours.

HOLIDAYS: No movement of cargo within the terminal on 1st May, Christmas Day, or after 2000 hrs. on the 31st December, or on New Year's Day.

POLICE/AMBULANCE/FIRE: Police 610900; Ambulance 612014; Fire 610100.

TELEPHONES: Telephone service can be obtained at Terminal Office, at same rate as public telephones.

SHORE LEAVE: Crew members are welcome ashore.

DELAYS: In rainy season, from January to April, irregular swell is present in the Manta Bay (3 days before and after full moon), also at new moon tides.

AUTHORITY: Autoridad Portuaria de Manta, Apartado 4768, Manta, Manabi, Ecuador. *Tel:* 613111.

PUERTO BOLIVAR: 03.14 S. 80.01 W.

DOCUMENTS:

3 Voyage Memorandums.
2 Maritime Health Declarations.
1 Consular Despatch.
1 Port of Origin Certificate.
10 Crew Lists.
8 Stores Lists.
3 Individual Declaration List for each member of the crew.
8 Lists Passengers Disembarking at this port.
8 Lists Passengers in transit.
4 Luggage, Mail and Commissions Lists.
4 Manifest of Cargo Lists.

Documents for Port's Authority should be supplied by Agents:

1. General Cargo Manifest in complete sets (Importation in triplicate, Exportation one set).
2. Bill of Lading, complete sets: Importation (one set), Exportation (one set) at time of sailing.
3. Export Customs House Clearance Document (one set). This document is replaced by the Bill of Lading.
4. Certificate of Ballasting.
5. Request for Mooring Berth.
6. Stevedore's cargo plan per hatch.
7. Muster-roll of cargo.
8. Tally books: 15 copies in Spanish. These must be in accordance with the current Tally Law.

PILOTAGE: Send ETA through Radio Naval of Guayaquil 24 hours before arrival. Pilot will board vessel on the port side 1 mile from the Sea Buoy on arrival and disembark on the starboard side. In case Pilot not available it is recommended to anchor 1 mile from "Punta Jambeli" between the buoy and the lighthouse of Lambeli. Pilot boat is steel, black hull and white cabin, it carries pilot signals in accordance with International Regulations. Service available 24 hours a day. Pilotage is compulsory.

ANCHORAGES: Pilot will indicate recommended anchorage.

RESTRICTIONS: Depths 30 ft. at LW, from 0600 to 1800 hrs. draft allowable 30 ft. From 1800 to 0600 hrs. draft allowable 27 ft.

MAX. SIZE: At Espigon Quay depths alongside 30 ft. inner end to 36 ft. at quay head.

HEALTH: On the arrival of vessel the authorities come on board. If there are no illnesses aboard, the doctor gives Free Pratique. In case of any illness, Master should advise by radio and the vessel waits in quarantine for the visit of Port Health Doctor.

RADIO: Radio Naval of Guayaquil, Radio Naval of Puerto Bolivar VHF available call pilot station on Channel 16, effective reception 30 miles.

TUGS: 2 tugs available one at 1,200 h.p. and one of 500 h.p Usually, ship's lines are used. This service is free.

BERTHING: At Espigon Quay should be carried out within 1 hour before or after slack water. Tidal currents of 1 – 3 knots in dry season and 3 – 5 knots in Winter are at right angles to berthing face of the quay.

Wind: From 000° in the morning, speed 3 – 5 knots. From 210° in the afternoon and night, speed 3 – 5 knots.

STEVEDORES: Agents take charge of gangs.

MEDICAL: Hospitals, clinics and dental surgery in Machala, 6 km. from the port. There is also a medical service for vaccination.

DENSITY: Salt water.

FRESH WATER: Only available by tanker truck, capacity 7 tons.

FUEL: No fuel in this port. In case required one has to contact Guayaquil and they send it by small tankers.

GANGWAY/DECK WATCHMEN: The Agent names 1 or 2 watchmen for the vessel besides the Maritime Police and Coast Guard.

OPENING/CLOSING HATCHES: Carried out by shore gang supervised by someone on board.

CERTIFICATES: Vessel's Register and Tonnage Declaration required.

CUSTOMS ALLOWANCES: 100 cigarettes per person and 1 bottle wine or spirits per person.

IDENTIFICATION CARDS: Not necessary.

CONSULS: Consul of Peru, Tel: 920608.

REPAIRS: There are no facilities in this port.

REPATRIATIONS: The Immigration Office can arrange.

AIRPORT: Distance to the airport is 6 km. It has 6 daily flights in connection with Guayaquil.

TIME: GMT minus 5 hours; there is no change.

HOLIDAYS: No work from 1700 hrs. on 24th December till 0800 hrs. on 26th December, and 1700 hrs. on 31st December till 0800 hrs. on 2nd January; Carnival; Maundy Thursday; Good Friday and Saturday; 1st May; 24th and 25th July; 9th October.

POLICE/AMBULANCE/FIRE: There are services.

TELEPHONES: Can be connected to the vessel.

GENERAL: When the vessel is anchored, landing service is done by launches. They are called by 1 long whistle and 2 short ones. This service works 24 hours a day.

At Night: A flashing light is to be used to call launches and not the whistle.

SHORE LEAVE: Passengers or crew do not need any special permit to land.

DEVELOPMENTS: A marginal pier for general cargo is being built. Length of pier 360 m.

SHIPMASTER'S REPORT: 1978

Fresh Water: Water is available at anchorage by a barge of 48 ton capacity, at a cost of 120 Sucre (US $4.80) per ton. For ships berthed alongside, water is delivered by modern trucks of 7 or 8 ton capacity, at a cost of 70 Sucre (US $2.80) per ton.

Surveyor: A non-exclusive surveyor acting for Lloyd's, Det Norske Veritas, and the Japanese Classification Society, is based at Guayaquil. Loadline survey and engine survey work done. He travels by air from Guayaquil (45 minutes).

Watchmen: One Customs and one Naval guard are obligatory, and should be fed and provided with room to sleep. Ship's crew should be employed day and night, one as accommodation watchman and one as deck watchman. Store-rooms should be locked up, and all loose equipment and lifeboat equipment stowed in lockers or accommodation. Only one accommodation door should be left unlocked, and a ship's watchman posted there, day and night.

Banana Cargoes: Loaded through side doors from the quay or from barges, or both together. No cranes, derricks or mechanised equipment used. About 400 men employed at one time. Very fast.

Casual Labour: This is freely available for painting hull, cleaning engine room, etc. The usual rate of $1 per hour with double for the foreman is now rising, some ships paying $1.50 during 1978. Overtime after 6 p.m., usually double. Possibly negotiable.

PURSER'S REPORT: See "Quayaquil".

AUTHORITY: Port Captain.

Arab Republic of Egypt

GENERAL

NAVIGATION REGULATIONS:

The following rules for ships navigating in the Gulf of Suez have been approved by IMO.

1.1 Ships should take into account that crossing traffic may be encountered in the traffic junction Eastward of Ain Sukhna and in the precautionary area off Ras Shukheir, and should be in a high state of readiness to manoeuvre in these areas.

1.2 Exceptional care is needed, when overtaking another ship within a lane, not to enter the separation zone or force the overtaken ship to do so.

1.3 Ships navigating in the Gulf of Suez are requested to keep continuous listening watch on the Suez Gulf Traffic Information Broadcasts and report any aids to navigation which are malfunctioning or are out of position and which are not already included in the Suez Gulf Traffic Information Broadcasts.

2.1 All ocean ships should have their radar in effective use by day and night throughout the passage between Shaker Island and Suez Port as an aid to achieving maximum feasible lane conformity and avoiding risk of collision. Particular care is required for strict adherence to the confines of relevant traffic lanes.

2.2 Ships proceeding South from Suez should be alert for tankers heading for the Sumed Oil Terminal off Ain Sukhna.

2.3 Northbound tankers heading for Sumed Oil Terminal should report their intention of using the traffic junction off Ain Sukhna on the appropriate frequencies.

2.4 All ships North and Southbound when navigating through the precautionary area off Ras Shukheir or in the vicinity of the July Oilfield should avoid overtaking in the traffic lanes in these areas.

2.5 All ships including service and supply craft serving the oil workings in July, Ramadan and Morgan Oilfields proceeding in and out of Ras Shukheir Oil Terminal, should only cross the South and Northbound traffic flow through the precautionary area off Ras Shukheir. Within the precautionary area local rules relating to crossing traffic apply.

2.6 Tankers leaving the Ras Shukheir Oil Terminal and intending to join the Northbound traffic lane should only do so when no through Southbound traffic is in the vicinity and should always report their movements to other ships beforehand on VHF.

2.7 Ships anchored in the designated waiting area for Ras Shukheir should ensure that they are never less than 0.25 miles from the edge of the Southbound traffic lane and should pay special regard to their correct light signals for ships at anchor. They should also show their deck lights.

AIN SUKHNA: 29.32 N. 32.24 E. (See Plan)

Also see "General" before first Port.

LOCATION: Ain Sukhna Sea Terminal is situated in the Northern end of the Gulf of Suez.

The position of the sea terminal is: Lat. 29° 32′ N., Long. 32° 24′ E. As a reference point, there is a light which is exhibited from a metal structure standing close to the seaward side of an old abandoned lighthouse on Ras Abou Darag.

DOCUMENTS: All vessels calling at Ain Sukhna have to deliver directly their official documents, as indicated below, to SUMED's Port Authority:

Certificate of Registry.
Load Line Certificate.
Safety Certificate.
Derat Certificate.
Radio Certificate.
Suez Canal Tonnage Certificate when applicable.
Panama Canal Tonnage Certificate when applicable.

Vessel's official documents, after being reviewed, will be handed to the vessel's Master after discharging and before vessel departs from SUMED's port.

LOCATION OF BUOYS: (SBMs)

S1: Lat. 29° 35′ 16″ N., Long. 32° 23′ 35″ E.
S2: Lat. 29° 34′ 12″ N., Long. 32° 22′ 42″ E.
S3: Lat. 29° 35′ 17″ N., Long. 32° 22′ 16″ E.

The 3 SBMs are painted orange and have the following characteristics:

Lights: A flashing light, activated by an automatic photo-electric sun switch.

Light frequencies are as follows:

SBM No. 1	Morse Code A
SBM No. 2	Morse Code B
SBM No. 3	Morse Code C

Fog Horn: An acoustic signal with an approximate range of 2 miles.

Hose Line Marker Beacons: 3 flashing lights with the following characteristics are fitted to the floating hose strings to mark the line during darkness.

Flashing character 1-10 at 20-60 flashes/minute activated by an automatic photo-electric sun switch. Lens: white.

Radar Reflector: Each buoy is provided with an octahedral radar reflector constructed in stainless steel with a diameter of 0.5 m. installed on top of the rope guard.

PILOTAGE: SUMED's Mooring Master and his assistant board the tanker 2 miles S.E. of Buoy "S2".

Notifications: ETA messages should be sent by cable via Alexandria/Port Said Radio on leaving previous port. Cables should be prefixed "For urgent delivery send via Telex 54108 or 54033 SUMED UN" and be confirmed 72, 48 and 24 hours prior to arrival. (Day and Night berthing and operation). Arrival draft should be indicated.

ANCHORAGES: Tankers can anchor to the S.E. of the buoyfield.

RESTRICTIONS: *Maximum Weather Conditions for Occupying SBMs:*

The SBMs are designed to accommodate tankers up to the following weather conditions.

Wind velocity (knots)	35 (65 km./hr.)
Maximum tidal range	2.0 m.
Maximum wave height	3.4 m.
Maximum surge/seiche conditions	0.5 m.
Current: Surface	2.0 knots.
Seabed	1.0 knot.

The above conditions are not relevant to the safety of the ship but to the safety of the buoys. Consequently the Mooring Master shall have the authority to decide whether the ship should remain moored or vacate the buoy due to adverse weather conditions.

MAX. SIZE: The three berths are spaced one from the other so that each has:

Mooring Area Radius: 410 m. for S1 and S2 (accommodates vessels up to 285,000 d.w.t.); 320 m. for S3 (accommodates vessels up to 13,000 d.w.t.); Manoeuvring Area Radius: For S1 and S2, 1,220 m.; For S3, 915 m.

Water Depth and Draft Limitations:

For S1 and S2:	85 ft. minimum water depth
	75 ft. maximum draft
For S3:	65 ft. minimum water depth
	55 ft. maximum draft

HEALTH: Vessels proceeding to Ain Sukhna must be in possession of the following documents:

(a) Maritime International Declaration of Health.
(b) Valid Derat or Derat Exemption Certificate.
(c) Valid Vaccination Certificates for all passengers and crew members.
(d) Certificates of inoculation against any communicable diseases prevailing at the Ports of departure.

Masters are required to immediately notify SUMED by cable in the manner outlined in "Radio – ETA" in case of any epidemic diseases or illness onboard while the vessel is bound for Ain Sukhna. The same message is to be conveyed to the terminal as soon as an HF or VHF contact is established, at least 6 hours before arrival.

RADIO: *ETA:* In order to avoid undue delays it is essential that Masters of vessels proceeding to Ain Sukhna terminal cable their ETAs to "SUMED" Alexandria.

The cable to be prefixed quote "to be conveyed via telex (54108) or (54033) SUMED UN operations office-oil movement" unquote.

ETA notifications to be sent as follows:

Immediately upon sailing from loading port/s
In case of a change in ETA exceeding 6 hours
72, 48 and 24 hours prior to arrival.

Confirmation of ETA: An additional contact can be made with the Ain Sukhna Terminal on HF 2182 kHz 24 hours before arrival.

Moreover, Masters are required to contact the terminal on VHF 6 hours before arrival on Channel 16 (or preferably Channels 78 and 79 if available).

Information from the Vessel: All vessels proceeding to unload their cargoes at Ain Sukhna are required to convey the following information to SUMED.

(a) Immediately upon sailing from loading port/s vessel is to cable, in the manner outlined in "Radio – ETA" the following information:

(i) ETA (in GMT) and expected arrival draft at Ain Sukhna, vessels are requested to arrive even keel.
(ii) All B/L data and ship's figures at loading port/s, stating quantity of free water on board after loading.
(iii) Whether the vessel loaded on top of slops stating grades of crude that were commingled with residues, quantity and API of contents of slop tank/s.
(iv) If the vessel is loaded with more than one grade of oil, Master is requested to confirm ability to unload according to the sequence agreed upon with the shipper (vessel's owner or charterer as the case may be).
(v) SUMED is to be immediately notified in the case any repairs are required that could delay commencement of discharging.
(vi) Estimated time for unloading the cargo if no restrictions are imposed by shore.

(b) On arrival at Ain Sukhna the following written information is to be handed to SUMED's Mooring Master:

(i) Whether vessel equipped with inert gas system. Vessels arriving with gas inerting blankets should, on arrival depressurise their system sufficiently to allow visual sampling and ullaging of cargo tanks. Upon completion of ullaging, pressurisation of inerting system shall be resumed and maintained throughout discharge.
(ii) Whether the vessel has external impressed cathodic protection.
(iii) Vessel's readiness to connect 2×16 in. hoses ASA 150.
(iv) The pressure which the vessel expects to maintain at the ship's rail and which is required to be a minimum of 100 p.s.i. unless otherwise specifically requested in writing by shore.
(v) Whether vessel requests to perform crude washing and in the affirmative the relevant check list should be filled in by the Master. See "Crude Oil Washing" under "Discharging".
(vi) Full names and addresses of Owners, Managers and Charterers of the vessel and their Agents in Egypt if any.
(vii) Whether the tanker's Owners/Bareboat Charterers are members of a P & I club stating name and address of such club, if available.

Information from Terminal:

The following information will be given to the vessel upon arrival at the anchorage area or when SUMED's Pilot boards the vessel:

(i) Any expected pre-mooring delays and their likely duration.
(ii) Any special mooring instructions.
(iii) Details of any restrictions on discharging rate.

All such restrictions and their duration will be confirmed in writing by SUMED.

VHF: Channels 16, 78 and 79.

TUGS: Tug "Sukhna" 3,200 h.p. with fire fighting and with anti-pollution equipment is available as required.

Mooring Launches: 500 h.p. mooring launches assist in mooring and hose operations.

BERTHING: Ain Sukhna Sea Terminal consists of 3 sea berths all of which are single point mooring buoys (SBMs).

2 large buoys for vessels up to 285,000 d.w.t. and 1 small buoy for vessels up to 120,000 d.w.t.

Subject to SUMED's prior approval and acceptance in each case the buoys can accommodate vessels larger than those specified above within the following limits:

Large Buoys (S1 and S2)	up to 350,000 d.w.t.
Small Buoy (S3)	up to 200,000 d.w.t.

maintaining all other length and draft limitations. Each of the larger buoys is connected to shore by a submarine line 48 in. (1.22 m.) in diameter and approximately 8 km. in length.

The small buoy is connected to shore by a submarine line 42 in. (1.067 m.) in diameter and approximately 5 km. in length.

Ropes: All SBMs are equipped with twin 15 in. circumference nylon ropes each 180 ft. long ending with a 20 ft. chafing chain 2.3125 in. diameter. A support buoy is connected to the chain.

The port side mooring rope has a 350 ft. polypropylene 10 in. pick-up rope with a 3ft. soft eye at the end.

The starboard side is the same but the pick-up rope is only 150 ft., 10 ft. or 12 ft. snotters with shackles are used for connecting the chafing chain to ship's bollard.

Mooring Master Duties: When the Mooring Master boards he will advise the ship's Master or officer in charge of the bridge on the approach to the berth, arrangements for mooring and unmooring, connecting and disconnecting of the hoses, and all other operations within the berthing area. The Mooring Master will submit and receive from the Master all forms, documents and papers required, to be filled and signed or received by the Master.

Adequate Lighting: There must be adequate search lights rigged on both wings of the bridge when mooring at night to facilitate running lines to the buoys.

VHF: The Mooring Master will be in direct charge of the portable VHF ship to shore radio telephone communications.

Mooring: Pick-up from the mooring boat:

2 wire rope snotters of 12 ft. or 20 ft. length (to suit tanker bollard location).

Weight of 12 ft. 80 kg	23.8 in. diameter
Weight of 20 ft. 135 kg.	23.8 in. diameter

2 bow shackles 55 tons SWL (weight of shackle = 43 kg.) or 2 bow shackles 75 tons SWL (weight of shackle = 68 kg.) for tankers over 130,000 d.w.t.

Tool box.

Move these items to bow.

Slip the soft eye of the snotter onto bollard having a good lead to forward fairlead. The forward winches should be tested, drained and be in good working order.

Ensure that both anchors are secured by stoppers in the hawse pipe. Anchors must not be dropped at the berth.

Prepare messenger line, (about 10 in. circumference × 500 ft. length polypropylene), and pass through the forward fairlead and lower as directed by Mooring Master, starting at the port side.

The mooring boat will fasten this messenger to the 10 in. 350 ft. polypropylene pick-up line on the buoy mooring system.

Upon the boat's signal, heave away until the chafing chain is in the fairlead or Panama lead with the support buoy close outside.

Shackle the free end of the wire snotter to the open end link of the chafing chain.

Ease back on the pick-up line until the weight falls on the bollard wire snotter.

Should the vessel have a "Smits" type towing bracket, release the pin, install the open link and lead the pick-up so that the end link of chain is directly fastened to the open link with the bow shackle.

Same procedure will be adopted to the starboard polypropylene pick-up rope of 150 ft. length connected to the buoy mooring system.

Mooring Sequence:

Prompt Berthing: SUMED will make every effort to moor ships arriving according to agreed schedules as promptly as operational circumstances permit.

Notice of Readiness: To be tendered when vessel arrives at Ain Sukhna anchorage area provided that vessel is ready in all respects to unload her cargo. NOR will be accepted according to SUMED's agreement with the relevant shipper.

Arrival Time: Arrival time will be considered at the time the vessel anchors.

Cargo Operations: Vessel moored to the SBMs must limit their stay to the allowed berth occupancy time stipulated in the transportation agreement between SUMED and the relevant shipper.

Unless vessel sizes are otherwise classified in the said agreement the allowed berth occupancy time is as follows:

KDWT	Hours
More than 285	52
Over 240 to 285	42
From 200 to 240	36
Less than 200	28

Delay due to weather: In the event that berthing delayed on account of adverse weather conditions the vessels will maintain their position in line.

Port Closure: Should vessels be requested to vacate the berth on account of adverse weather conditions closing the port, they shall keep in contact by VHF with the terminal in order to be readily available for re-entry as soon as the terminal so requires, after weather conditions permit.

Port Re-opening: When the port is re-opened discharging will recommence according to the firm schedules agreed upon with SUMED's shippers.

Vessel refusal: SUMED reserves the right to decline to berth a specific vessel should it consider that such vessel's condition or facilities are unsafe.

Unmooring: Take the weight of the moorings on the pick-up starting with the starboard side first, using windlass. Unshackle the wire snotter (or unpin the "Smits" brackets).

Slack the pick-up until the support buoy is in the water. Pay out the pick-up line (as ship clears from the berth). Return the wire snotters, bow shackles and tool box to mooring boat prior to Mooring Master's departure.

The tug and mooring launches will be in attendance.

HOSES: SBMs No. 1 and 2 contain twin crude floating hose strings each 297.2 m. (975 ft.) in overall length consisting of:

23 hoses	24 in. × 35 ft.
1 hose	24 in./20 in. × 35 ft.
1 hose	20 in./16 in. × 35 ft.
2 hoses	16 in. × 35 ft.
1 hose	16 in. × 30 ft.

SBM No. 3 contains twin crude floating hose strings each 243.9 m. (800 ft.) in overall length.

Each consists of:

19 hoses	20 in × 35 ft.
1 hose	20/16 in. × 35 ft.
2 hoses	16 in. × 35 ft.
1 hose	16 in. × 30 ft.

All tail hoses are 16 in. in diameter and the gear attached to each of the 16 in. crude oil hose tails consists of a lifting eye, butterfly valve, spool piece with camlock and light weight blind flange.

The camlock is suitable only for connections with tanker manifold flange of 16 in. ASA 150.

Quick Release Safety Couplings: Quick coupling (Camlock) are connected at each hose end and they will be used as follows:

In case of emergency the butterfly valve shall be immediately closed and the quick coupling immediately disconnected.

Hose Connecting and Disconnecting: The connecting and disconnecting of cargo hoses shall be performed by the crew of the vessel under instructions from SUMED's Mooring Master.

Preparations: The tanker crew are required to lift 2×16 in. crude hose strings and connect them to the vessel's port side manifold.

To avoid delays the following items should be prepared prior to berthing, otherwise the vessel will not be considered ready to discharge.

3×16 in. standard 150 ASA flange connections in position on selected lines for discharging crude oil.

Port derrick with a minimum 10 ton SWL rigged for maximum height and load lifting. The derrick shall be guyed to plumb the vessel's rail-hose bolster bar at the vessel's manifold.

If possible, the topping lift of the boom shall be on its own winch. All winches shall be tested, drained and in ready running condition.

Drip trays, sand bags, dispersant and fire fighting equipment in position.

A steel basket to contain tools, gaskets, nylon lifting slings and other equipment for lifting on board from the mooring boat.

Equipment to be Onboard Before Berthing: In order to expedite the connection of the hoses the following equipment must be available.

2 polypropylene messenger lines
(about 10 in. circumference 500 ft. long).
Sledge hammer.
Large crowbar.
Large marlin spike.
Large flashlight.
Bags of sand.

Manifold on the port side must be used:

All manifolds to be ready with 16 in. flange ASA 150.
Hose derrick rigged.
Derrick fall fitted with cargo hook 10 ton SWL.
Heaving line.
2 × 1-1-2 ton pullers.
Copper hammer.
Steel spike.
Spare bolts and 16 in. gaskets.
Nylon lifting slings.

DISCHARGING:

Terminal Design: The design of the discharging terminal is based on the following flow rates with crude oil characteristics as follows:

Viscosity	= 17 cst		
Specific gravity	= 0.867 kg/cu.cm.		
SBMs No. 1 & 2	Max.	12,500 tonnes/p.h.	200 p.s.i.
	Min.	7,400 tonnes/p.h.	100 p.s.i.
SBMs No. 3	Max.	7,400 tonnes/p.h.	120 p.s.i.
	Min.	5,900 tonnes/p.h.	100 p.s.i.

Inert Gas System: Vessels equipped with inert gas system are to depressurise tanks before berthing in order to allow for sampling and ullaging upon arrival and after completion of discharge to check remainders on board. Pressurisation of inerting system should be resumed as soon as ullaging and sampling are completed and throughout the discharge.

Crude Oil Washing: COW is usually acceptable if the ship can maintain an average flow rate of no less than 7,400 tonnes/p.h. (100 p.s.i. at ship's rail throughout discharging). However, COW is subject to the terminal's approval depending on both operational circumstance and if this operation has been previously carried out by the vessel.

When vessel requests permission to perform COW the Master must respond in writing to the "Crude Oil Wash Checkoff List".

COW of slop tank is prohibited.

Crude Oil Wash (COW) – Checkoff List: Vessels requesting permission to perform crude oil wash while unloading at Ain Sukhna, are requested to respond to the following checkoff list:

Inert gas system is fully operational and tested.

Each tank will be positively pressurised and method of recording pressure will be available.

Each tank will be kept below 8% oxygen before and during operation.

Inert gas system flue gas oxygen content will be continuously monitored and maintained below 8% oxygen.

Oxygen alarm in cargo control room set to give visual indication when to abort crude washing.

Pressures in cargo tanks are available to vessel's control room personnel.

Washing systems have permanent steel pipework and will be pressure tested to 10 to 15 p.s.i. above expected working pressure but to minimum of 150 p.s.i. prior to use.

All tank openings are sealed and remote tank gauging system is operational.

All necessary throttling of discharge for crude spraying will be done on vessel's valves.

There is a responsible designate person in charge of operation. (Give name.)

Effective communication will be maintained between vessel and shore.

Water will not intrude into the crude wash cycle.

Washing to be commingled and discharged at the same time with the rest of the cargo.

Previous crude wash exprience of key personnel is (list).

Tanks crude washed last 2 voyages are (list).

Any additional vessel requirements or comments.

Emergency Communication: If ship-to-shore communication fails the ship's whistle shall be sounded continuously. Discharging shall be immediately stopped and will not be resumed until communications have been re-established.

Overside Lighting: During night discharging sufficient overside lighting must be provided to readily detect any oil spill so that immediate appropriate action may be taken.

International Code of Signals: During discharging operations the following signals shall be displayed:

By Day	: The International Code flag "B".
By Night	: A red light visible all round the horizon for distance of at least 2 miles.

Unloading Procedures: Upon being informed by the vessel's Master or responsible officer that the vessel is ready to start discharging, the Mooring Master will contact the Terminal Control Room to co-ordinate the commencement of unloading in accordance with the terminal's instructions.

The control room operator will normally give a "standby warning" by VHF approximately 10 minutes before the shore tanks are ready to receive cargo.

When the request to commence discharging is received the Mooring Master will ensure that discharging commences at slow speed. This starting procedure will always be adhered to.

Discharging will commence utilising 1 pump only with circulating system and when it has been confirmed that there is no significant rise in pressure on the discharging line which could indicate a blocked or closed valve on the shore or ship's discharging system, the crude oil will be discharged at the steady operating flow previously agreed upon.

Should there be any significant rise in pressure, discharging must be immediately stopped. The ship will be advised to check the on-board systems, take any necessary remedial steps and inform the terminal's control room.

At the same time the underwater and floating hoses should be checked to ensure that there are no obstructions.

Should the Master be requested to increase or decrease the cargo discharging rate this should be promptly implemented provided the vessel's pumps are capable of an increased rate.

SUMED may allow vessels to simultaneously ballast while unloading provided they are equipped to properly segregate the ballast and avoid any possible commingling with the cargo. Pumping ballast water into the sealine is strictly prohibited.

Any suspension and subsequent resumption of discharging of cargo must be logged both ashore and in the "Tanker Time Sheet".

All events regarding mooring, commencement, termination of unloading, stoppages, if any, and unmooring are both logged and recorded ashore at the terminal's control room as and when they are received from the Mooring Master.

These events shall jointly be logged in the Tanker Time Sheet by the vessel's Master and SUMED's Mooring Master.

Vacating Berth: Vessels shall vacate berth immediately after disconnection of hoses, allowing the least possible time to take ballast if essential for the safe manoeuvering of the vessel while vacating the berth.

Emergency Shut-Down: In case of emergency such as fire, sudden deterioration of sea and weather conditions, failure in ship to shore communications, etc, the discharging operations must be immediately suspended at the request of the Mooring Master. The ship's discharging pumps must be stopped immediately, the butterfly valves of the floating hoses and the manifold valves must be closed.

Depending upon the reasons causing the emergency, the ship's Master and Mooring Master will decide whether or not to disconnect the hoses and vacate the berth. In case of dispute the final decision will be taken by the Mooring Master.

Sampling: Representative samples of the cargo will be taken either from the vessel's cargo tanks or from the online automatic samplers.

The samples will be divided into 3 equal portions of about 1 gallon each, one portion will be handed to the quality control laboratory, the second to the ship's Master (sealed by SUMED) and the third retained by SUMED for 60 days (sealed by the Master).

The ship's Master will sign a receipt on receiving the ship's sealed and stamped container of the sample.

MEDICAL: Neither medical nor hospital facilities are provided by SUMED. In case urgent medical assistance is required the vessel should contact SUMED's Harbour Master by VHF radio. Private doctors and facilities are available at Suez.

REPAIRS: Masters of vessels discharging at Ain Sukhna Terminal are instructed that under no circumstances may engines be shutdown for repairs whilst their vessel is moored to the SBMs. There are no facilities at Ain Sukhna Terminal for repairs. Repair facilities are available at Suez.

It is emphasised that all vessels at the SBMs must be prepared to clear immediately on instructions from the Mooring Master.

CONSULS: Consular or diplomatic representatives for most maritime nations are in Cairo.

REPATRIATION: Crew changes are only permitted in cases of emergency.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at Terminal.

WEATHER:

Climate: The climate in the Ain Sukhna area is generally good. Summers are hot and dry and winters are relatively cool.

The visibility is usually excellent with few sand storms and infrequent fog. Sub-zero temperatures are unknown and there are very few rain squalls.

Summary of Weather Statistics (1884 – 1967):

Average rainfall year	0.8 in.
Mean maximum temperature	84°F (29°C)
Mean minimum temperature	62°F (16.7°C)
Extreme maximum temperature	111°F (44°C)
Extreme minimum temperature	35°F (1.7°C)
Average relative humidity	60%

Winds: The prevailing winds at Ain Sukhna are from the N.W. throughout the year.

Tides: The tidal range is up to a maximum of 7.4 ft.

Waves: The estimated characteristics of the 100 year extreme waves are:

Maximum height	12.0 ft. (3.7 m.)
Maximum crest elevation	11.0 ft. (3.3 m.)
Period	7.5 secs.
Length	280 ft. (85 m.)
Speed	22 knots (41 km./hr.)
Direction from	North

Tidal Streams: At Ain Sukhna the tidal streams set parallel to the coast line Northwards on the flood tide and parallel to the coast Southwards on the ebb tide. Maximum rate is 0.5 knots (0.9 km./hr.) at the surface.

Currents: There is no fixed current in this area and any flow is caused entirely by the prevailing tidal stream and winds.

Sea Salinity: The Red Sea and Gulf are extremely saline and salinity is around 40,000/50,000 parts per million.

Sea Temperature: The surface temperature of the sea ranges between 66°F (19°C) in February and 80°F (26.7°C) in August.

GENERAL:

Navigation: When entering, manoeuvering or leaving the Port Limits of Ain Sukhna, the Master has to conform with the conditions setforth in this Manual and has to adhere to the 1972 International Regulations for preventing Collisions at Sea which will be complied with at all times.

The Master guarantees that his vessel fulfils all navigational and worthiness conditions in particular those required for vessels carrying dangerous cargo, (crude oil) in accordance with the provisions setforth in the Appendix for vessels carrying Dangerous cargo annexed to Rules of Navigation of the Suez Canal Authority to the extent that such provisions are applicable.

Master should submit the respective certificate and declarations whenever required in this respect.

Helicopters (available in emergencies): Should the services of a helicopter be required by SUMED for any purposes whatsoever the vessel will be given a minimum of 30 minutes warning notice before the helicopter's approach in order that cargo operations can be stopped and all tanks and vents closed.

A responsible officer should be on deck to assist the helicopter in making the approach to the vessel. Although the safety of the helicopter remains at all times the responsibility of its pilot, helicopter services shall not be employed in any event without the express prior consent of Shipper and vessel's Master.

Supplies: Stores and supplies are available through an Agent and can be delivered from Suez to Ain Sukhna anchorage area after unloading but entirely at the vessel's own risk.

Government Officials: A.R.E. officials, such as Customs Director, Quarantine Officer and Immigration Officer are stationed at Ain Sukhna. Should Customs guards be stationed on board vessels whilst moored it is expected that vessels will extend all courtesies to them and or other officials while on board.

Ship's Readiness: This terminal is an open roadstead and therefore, during the time a ship is moored, the engines must be ready with full power for immediate use.

Vessels at berths must clear immediately upon advice of the Mooring Master or as directed by SUMED's terminal superintendent. Ship's personnel should be at their respective stations at all times during mooring, unmooring and cargo transfer operations.

Courtesy Flag: All vessels are required to fly A.R.E. Ensign on the foremast during daylight hours.

Quarantine Regulations: The rules governing quarantine regulations are the same as for Suez.

Unauthorised Craft: The presence of unauthorised craft alongside is extremely hazardous.

SUMED prohibits the boarding of individuals other than those authorised to do so in the bona fide conduct of the vessel's operation. No unauthorised person is allowed to board the vessel whether at anchorage or while moored.

Contraband: SUMED prohibits unauthorised craft from coming alongside vessels. To avoid the possibility of undesirable items getting aboard vessels, it is requested that Masters discourage craft coming alongside whilst the vessel is in the terminal.

AGENCY SERVICES: Not required under normal circumstances.

TIME: GMT plus 2 hours.

AUTHORITY: Arab Petroleum Pipeline Company (Sumed Un).

Headquarters: 9 Amin Yehia St., Zizinia, Alexandria. *Tel:* 61579, 64138, 64139. *Telex:* 54295, 54380 Sumed Un.

Central Operations: 16 Syria St., Roushdt, Alexandria. *Tel:* 42975, 43940, 44939. *Telex:* 54108, 54033 Sumed Un.

ALEXANDRIA (Including El Dekheila): 31.09 N. 29.53 E. (See Plan)

DOCUMENTS:

4 copies of Crew List.

Complete set of Manifests covering all cargo on board showing names of Shippers and Consignees.

4 copies List of Passengers in Transit.

Landing cards for passengers landing finally in A.R.E. and for those landing in A.R.E. in transit.

4 copies List of passengers finally landing in A.R.E. (if any) together with their addresses in A.R.E.

Deck log books showing date of last call at a A.R.E. port, completed up to the time of arrival.

For Quarantine: Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

For Immigration Officer:

Arrival Immigration Form, duly completed.

1 Passenger List.

List of Passengers Finally Landing, in duplicate.

Crew List.

Valid passport with entry visa is required for landing in A.R.E. for passengers landing. Emergency visa can be granted on arrival if so required.

For Customs Use:

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate.

PILOTAGE: Compulsory. Pilot boards off harbour entrance. International code signals used.

Vessels are not to proceed from the waiting area (Lat. 31° 12.6′ N., Long. 29° 44.5′ E. with radius of 1.5 miles) without a Pilot onboard.

RESTRICTIONS: Entrance channels 36 ft. depth, being dredged to 50 ft. Arriving vessels should keep 50 miles offshore between sunset and sunrise.

MAX. SIZE: Up to 32 ft. draft.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor. The Quarantine Doctor meets ships whilst entering the port and ships are boarded in turn.

In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at an A.R.E. port, the vessel is put under compulsory quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

(1) The vessel must be a regular liner known to the Quarantine Authorities and have a doctor on board.

(2) Details shown on the Quarantine Statement should be wirelessed to the Quarantine Authorities 24 hours prior to ship's arrival.

(3) Masters of vessels must declare before their arrival any accidents, which might have taken place on board prior to the arrival in port.

(4) The ship must not have called at any infected port.

RADIO: Alexandria Radio, call sign SUH, operating 24 hours daily on 444, 500 and 8578 kHz and between 0600 to 1800 GMT on 12,974 kHz. Also harbour VHF Channel 16.

TUGS: 5 tugs available up to 1,200 h.p.

BERTHING: Alongside quays in depths up to 34 ft.

Refrigerated cargoes should be direct delivery.

Ro/Ro facilities available.

Cement to silos and bagged in heavy cloth (no paper bags permitted).

Coal: Discharged at Berth Nos. 63 and 64. Max. draft 33 ft. 4×25 ton cranes. Rate 10,000 tonnes per day.

El Dekheila: Located 6 km. West of Alexandria and managed by Alexandria Port Authority.

Industrial Port: Access channel: Length 3.5 km. and depth 20.0 m. Turning circle: 750 m. diameter and 20.0 depth. Approach channel: Width 250 m., depth 20.0 m. One jetty (2 berths). Length 640 m. Depth alongside: Inner Berth 16.0 m. Outer Berth 20.0 m. Max. Size: 60,000 d.w.t. and 160,000 d.w.t. respectively. An additional berth to handle vessels up to 250,000 d.w.t. may be constructed later. 2×30 ton capacity grab cranes and 2 belt conveyors for handling iron ore pellet at 1,000 t.p.h. each (900 t.p.h. for coal). Port to be operational late 1986.

Commercial Port: Access channel 1.2 km. in length is a branch off the access channel to the industrial port. Depth of channel 14.0 m. Width 210 m. - 150 m. Commercial port will have over 1,500 m. of berthing space with 14.0 m. of water alongside. Port expected to be operational late 1987. Cargoes to be handled will include containers, general cargo, timber, chemicals and Ro/Ro vessels.

CONTAINER FACILITIES: Length 700 m., depth alongside 14.0 m. 2×32 tonne container gantry cranes, 2×32 tonne transtainers and 4×42 tonne forklifts.

TANKERS: Petroleum Basin: in West part of Outer Harbour, Berth Nos. 3 and 4, depth alongside 38 ft., max. length 700 ft., draft 34 ft. Berth Nos. 3 and 4: in East part of Outer Harbour. Stern to moorings.

It has been reported that tankers are required to take on ballast in excess of that deemed to be necessary by the Master, even in fine weather. One Master was ordered to bring his forward draft to 21 ft. Once the vessel was alongside a charge was made for deballasting the vessel.

FRESH WATER: Available by barge, and alongside most quays.

FUEL: Available by barge.

MEDICAL: All facilities available. International Vaccination Certificates required.

REPAIRS:

Alexandria Shipyard: Builds vessels up to 40,000 tons. One drydock capacity 85,000 d.w.t., cranes with up to 30 tons capacity. One drydock capacity 20,000 d.w.t., cranes with capacity up to 30 tons. Fully equipped engineering workshops capable of carrying out extensive repairs alongside quays length 1,200 m. Depth alongside 11 m.

Alexandria Ship Repair Co.: Ship repairs including engine repairs and boiler repair. Fully equipped workshops.

The Egyptian Shipbuilding and Repairs Co.: Floating dock for ships up to 12,000 d.w.t. 100 ton floating crane. All types of hull and machinery repairs possible.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Suez Canal".

DEVELOPMENTS: Grain elevator (Berth Nos. 81/82) to be constructed. Capacity 6,000 tonnes. Grain silo of 100,000 tonnes to be constructed. Completion mid-1985.

Control tower with radar and VHF being constructed.

Approach channel to be widened to 220 m. and deepened to 13 m.

Dekheila: See "Berthing".

SHIPMASTER'S REPORT: 1976

Approaches: Ships making the passage from Port Said to Alexandria are obliged to keep to the route laid down by the Egyptian Authorities. The coastline is rather featureless and a good operational radar is invaluable. Radar conspicuous objects were found to be – Ras el Barr Lighthouse and fort, forts numbers 2 & 4, the forts and lighthouses at Brulos and at Rosetta Mouth and also Nelson Island.

The anchorage can be identified from a considerable distance by the number of ships at anchor off the port – often more than fifty. The prohibited area marked on Chart No. 243 to the East of Great Pass is ignored and ships anchor as convenient but as near to the pilot ground as possible. Ras el Tin Lighthouse, Great Pass Beacon and the Minaret (248) were found to be good marks. There is a latticed beacon to the West of Great Pass Beacon which should not be confused with the latter. The new beacon is not marked on the chart and was stated by the Pilot to be for a new channel which is being constructed.

Arrival Procedure: It is important to register one's arrival with the Alexandria Port Control as soon as possible. This is done by means of VHF.

At 1100 hrs. (approx.) a traffic list is broadcast and ships mentioned should contact Port Control and obtain berthing instructions. They will probably be told to move in to the pilot boarding ground 2 miles N.W. of Great Pass Beacon. When there, they should anchor again and await either further instructions or the unannounced arrival of the Pilot.

Berthage is decided at a meeting held around Noon so there may be a supplementary traffic list around 1400 hrs. In any case, it is a good idea to call Port Control at least once a day to remind them that you are still awaiting a berth.

A Pilot will take the ship into the anchorage in the Outer Harbour where Health, Immigration etc. officials board and clearance given. The Agent may also board. The main radio transmitter is sealed at this time. The ship will then await allocation of a berth.

Anchorages: At the anchorage outside the port depths vary from 20 to 30 fathoms but the holding ground seems to be good. This ship lay comfortably with 7 shackles of cable out. Ships usually leave each other ample room in case of bad weather. There are good anchor bearings.

The anchorages inside the Outer and Inner Harbours are very congested and the holding ground (said to be sand) is not good. Time spent at anchor here can be a very anxious period.

The ship was anchored in the Inner Harbour just off the end of the Passenger Quay. When it was pointed out to the Pilot that, in the Master's opinion, she was too close to the 3 fathoms line at the old Aircraft Moorings, the Pilot stated that it would be all right because the ship wouldn't swing that way. If the vessel had swung the other way she would have gone aground.

At 0300 hrs. the following morning the ship began to swing onto the sand bank. Fortunately there was no wind and it was possible to turn her, weigh anchor and find another anchorage. A call to Port Control on VHF was made for a tug and Pilot but was not acknowledged.

Crude Oil Washing: COW is usually acceptable if the ship can maintain an average flow rate of no less than 7,400 tonnes/p.h. (100 p.s.i. at ship's rail throughout discharging). However, COW is subject to the terminal's approval depending on both operational circumstance and if this operation has been previously carried out by the vessel.

When vessel requests permission to perform COW the Master must respond in writing to the "Crude Oil Wash Checkoff List".

COW of slop tank is prohibited.

Crude Oil Wash (COW) – Checkoff List: Vessels requesting permission to perform crude oil wash while unloading at Ain Sukhna, are requested to respond to the following checkoff list:

Inert gas system is fully operational and tested.

Each tank will be positively pressurised and method of recording pressure will be available.

Each tank will be kept below 8% oxygen before and during operation.

Inert gas system flue gas oxygen content will be continuously monitored and maintained below 8% oxygen.

Oxygen alarm in cargo control room set to give visual indication when to abort crude washing.

Pressures in cargo tanks are available to vessel's control room personnel.

Washing systems have permanent steel pipework and will be pressure tested to 10 to 15 p.s.i. above expected working pressure but to minimum of 150 p.s.i. prior to use.

All tank openings are sealed and remote tank gauging system is operational.

All necessary throttling of discharge for crude spraying will be done on vessel's valves.

There is a responsible designate person in charge of operation. (Give name.)

Effective communication will be maintained between vessel and shore.

Water will not intrude into the crude wash cycle.

Washing to be commingled and discharged at the same time with the rest of the cargo.

Previous crude wash exprience of key personnel is (list).

Tanks crude washed last 2 voyages are (list).

Any additional vessel requirements or comments.

Emergency Communication: If ship-to-shore communication fails the ship's whistle shall be sounded continuously. Discharging shall be immediately stopped and will not be resumed until communications have been re-established.

Overside Lighting: During night discharging sufficient overside lighting must be provided to readily detect any oil spill so that immediate appropriate action may be taken.

International Code of Signals: During discharging operations the following signals shall be displayed:

By Day : The International Code flag "B".
By Night : A red light visible all round the horizon for distance of at least 2 miles.

Unloading Procedures: Upon being informed by the vessel's Master or responsible officer that the vessel is ready to start discharging, the Mooring Master will contact the Terminal Control Room to co-ordinate the commencement of unloading in accordance with the terminal's instructions.

The control room operator will normally give a "standby warning" by VHF approximately 10 minutes before the shore tanks are ready to receive cargo.

When the request to commence discharging is received the Mooring Master will ensure that discharging commences at slow speed. This starting procedure will always be adhered to.

Discharging will commence utilising 1 pump only with circulating system and when it has been confirmed that there is no significant rise in pressure on the discharging line which could indicate a blocked or closed valve on the shore or ship's discharging system, the crude oil will be discharged at the steady operating flow previously agreed upon.

Should there be any significant rise in pressure, discharging must be immediately stopped. The ship will be advised to check the on-board systems, take any necessary remedial steps and inform the terminal's control room.

At the same time the underwater and floating hoses should be checked to ensure that there are no obstructions.

Should the Master be requested to increase or decrease the cargo discharging rate this should be promptly implemented provided the vessel's pumps are capable of an increased rate.

SUMED may allow vessels to simultaneously ballast while unloading provided they are equipped to properly segregate the ballast and avoid any possible commingling with the cargo. Pumping ballast water into the sealine is strictly prohibited.

Any suspension and subsequent resumption of discharging of cargo must be logged both ashore and in the "Tanker Time Sheet".

All events regarding mooring, commencement, termination of unloading, stoppages, if any, and unmooring are both logged and recorded ashore at the terminal's control room as and when they are received from the Mooring Master.

These events shall jointly be logged in the Tanker Time Sheet by the vessel's Master and SUMED's Mooring Master.

Vacating Berth: Vessels shall vacate berth immediately after disconnection of hoses, allowing the least possible time to take ballast if essential for the safe manoeuvering of the vessel while vacating the berth.

Emergency Shut-Down: In case of emergency such as fire, sudden deterioration of sea and weather conditions, failure in ship to shore communications, etc, the discharging operations must be immediately suspended at the request of the Mooring Master. The ship's discharging pumps must be stopped immediately, the butterfly valves of the floating hoses and the manifold valves must be closed.

Depending upon the reasons causing the emergency, the ship's Master and Mooring Master will decide whether or not to disconnect the hoses and vacate the berth. In case of dispute the final decision will be taken by the Mooring Master.

Sampling: Representative samples of the cargo will be taken either from the vessel's cargo tanks or from the online automatic samplers.

The samples will be divided into 3 equal portions of about 1 gallon each, one portion will be handed to the quality control laboratory, the second to the ship's Master (sealed by SUMED) and the third retained by SUMED for 60 days (sealed by the Master).

The ship's Master will sign a receipt on receiving the ship's sealed and stamped container of the sample.

MEDICAL: Neither medical nor hospital facilities are provided by SUMED. In case urgent medical assistance is required the vessel should contact SUMED's Harbour Master by VHF radio. Private doctors and facilities are available at Suez.

REPAIRS: Masters of vessels discharging at Ain Sukhna Terminal are instructed that under no circumstances may engines be shutdown for repairs whilst their vessel is moored to the SBMs. There are no facilities at Ain Sukhna Terminal for repairs. Repair facilities are available at Suez.

It is emphasised that all vessels at the SBMs must be prepared to clear immediately on instructions from the Mooring Master.

CONSULS: Consular or diplomatic representatives for most maritime nations are in Cairo.

REPATRIATION: Crew changes are only permitted in cases of emergency.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at Terminal.

WEATHER:

Climate: The climate in the Ain Sukhna area is generally good. Summers are hot and dry and winters are relatively cool.

The visibility is usually excellent with few sand storms and infrequent fog. Sub-zero temperatures are unknown and there are very few rain squalls.

Summary of Weather Statistics (1884 – 1967):

Average rainfall year	0.8 in.
Mean maximum temperature	84°F (29°C)
Mean minimum temperature	62°F (16.7°C)
Extreme maximum temperature	111°F (44°C)
Extreme minimum temperature	35°F (1.7°C)
Average relative humidity	60%

Winds: The prevailing winds at Ain Sukhna are from the N.W. throughout the year.

Tides: The tidal range is up to a maximum of 7.4 ft.

Waves: The estimated characteristics of the 100 year extreme waves are:

Maximum height	12.0 ft. (3.7 m.)
Maximum crest elevation	11.0 ft. (3.3 m.)
Period	7.5 secs.
Length	280 ft. (85 m.)
Speed	22 knots (41 km./hr.)
Direction from	North

Tidal Streams: At Ain Sukhna the tidal streams set parallel to the coast line Northwards on the flood tide and parallel to the coast Southwards on the ebb tide. Maximum rate is 0.5 knots (0.9 km./hr.) at the surface.

Currents: There is no fixed current in this area and any flow is caused entirely by the prevailing tidal stream and winds.

Sea Salinity: The Red Sea and Gulf are extremely saline and salinity is around 40,000/50,000 parts per million.

Sea Temperature: The surface temperature of the sea ranges between 66°F (19°C) in February and 80°F (26.7°C) in August.

Cargoes to be handled will include containers, general cargo, timber, chemicals and Ro/Ro vessels.

CONTAINER FACILITIES: Length 700 m., depth alongside 14.0 m. 2×32 tonne container gantry cranes, 2×32 tonne transtainers and 4×42 tonne forklifts.

TANKERS: Petroleum Basin: in West part of Outer Harbour, Berth Nos. 3 and 4, depth alongside 38 ft., max. length 700 ft., draft 34 ft. Berth Nos. 3 and 4: in East part of Outer Harbour. Stern to moorings.

It has been reported that tankers are required to take on ballast in excess of that deemed to be necessary by the Master, even in fine weather. One Master was ordered to bring his forward draft to 21 ft. Once the vessel was alongside a charge was made for deballasting the vessel.

FRESH WATER: Available by barge, and alongside most quays.

FUEL: Available by barge.

MEDICAL: All facilities available. International Vaccination Certificates required.

REPAIRS:

Alexandria Shipyard: Builds vessels up to 40,000 tons. One drydock capacity 85,000 d.w.t., cranes with up to 30 tons capacity. One drydock capacity 20,000 d.w.t., cranes with capacity up to 30 tons. Fully equipped engineering workshops capable of carrying out extensive repairs alongside quays length 1,200 m. Depth alongside 11 m.

Alexandria Ship Repair Co.: Ship repairs including engine repairs and boiler repair. Fully equipped workshops.

The Egyptian Shipbuilding and Repairs Co.: Floating dock for ships up to 12,000 d.w.t. 100 ton floating crane. All types of hull and machinery repairs possible.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Suez Canal".

DEVELOPMENTS: Grain elevator (Berth Nos. 81/82) to be constructed. Capacity 6,000 tonnes. Grain silo of 100,000 tonnes to be constructed. Completion mid-1985.

Control tower with radar and VHF being constructed.

Approach channel to be widened to 220 m. and deepened to 13 m.

Dekheila: See "Berthing".

SHIPMASTER'S REPORT: 1976

Approaches: Ships making the passage from Port Said to Alexandria are obliged to keep to the route laid down by the Egyptian Authorities. The coastline is rather featureless and a good operational radar is invaluable. Radar conspicuous objects were found to be – Ras el Barr Lighthouse and fort, forts numbers 2 & 4, the forts and lighthouses at Brulos and at Rosetta Mouth and also Nelson Island.

The anchorage can be identified from a considerable distance by the number of ships at anchor off the port – often more than fifty. The prohibited area marked on Chart No. 243 to the East of Great Pass is ignored and ships anchor as convenient but as near to the pilot ground as possible. Ras el Tin Lighthouse, Great Pass Beacon and the Minaret (248) were found to be good marks. There is a latticed beacon to the West of Great Pass Beacon which should not be confused with the latter. The new beacon is not marked on the chart and was stated by the Pilot to be for a new channel which is being constructed.

Arrival Procedure: It is important to register one's arrival with the Alexandria Port Control as soon as possible. This is done by means of VHF.

At 1100 hrs. (approx.) a traffic list is broadcast and ships mentioned should contact Port Control and obtain berthing instructions. They will probably be told to move in to the pilot boarding ground 2 miles N.W. of Great Pass Beacon. When there, they should anchor again and await either further instructions or the unannounced arrival of the Pilot.

Berthage is decided at a meeting held around Noon so there may be a supplementary traffic list around 1400 hrs. In any case, it is a good idea to call Port Control at least once a day to remind them that you are still awaiting a berth.

A Pilot will take the ship into the anchorage in the Outer Harbour where Health, Immigration etc. officials board and clearance given. The Agent may also board. The main radio transmitter is sealed at this time. The ship will then await allocation of a berth.

Anchorages: At the anchorage outside the port depths vary from 20 to 30 fathoms but the holding ground seems to be good. This ship lay comfortably with 7 shackles of cable out. Ships usually leave each other ample room in case of bad weather. There are good anchor bearings.

The anchorages inside the Outer and Inner Harbours are very congested and the holding ground (said to be sand) is not good. Time spent at anchor here can be a very anxious period.

The ship was anchored in the Inner Harbour just off the end of the Passenger Quay. When it was pointed out to the Pilot that, in the Master's opinion, she was too close to the 3 fathoms line at the old Aircraft Moorings, the Pilot stated that it would be all right because the ship wouldn't swing that way. If the vessel had swung the other way she would have gone aground.

At 0300 hrs. the following morning the ship began to swing onto the sand bank. Fortunately there was no wind and it was possible to turn her, weigh anchor and find another anchorage. A call to Port Control on VHF was made for a tug and Pilot but was not acknowledged.

Crude Oil Washing: COW is usually acceptable if the ship can maintain an average flow rate of no less than 7,400 tonnes/p.h. (100 p.s.i. at ship's rail throughout discharging). However, COW is subject to the terminal's approval depending on both operational circumstance and if this operation has been previously carried out by the vessel.

When vessel requests permission to perform COW the Master must respond in writing to the "Crude Oil Wash Checkoff List".

COW of slop tank is prohibited.

Crude Oil Wash (COW) – Checkoff List: Vessels requesting permission to perform crude oil wash while unloading at Ain Sukhna, are requested to respond to the following checkoff list:

Inert gas system is fully operational and tested.

Each tank will be positively pressurised and method of recording pressure will be available.

Each tank will be kept below 8% oxygen before and during operation.

Inert gas system flue gas oxygen content will be continuously monitored and maintained below 8% oxygen.

Oxygen alarm in cargo control room set to give visual indication when to abort crude washing.

Pressures in cargo tanks are available to vessel's control room personnel.

Washing systems have permanent steel pipework and will be pressure tested to 10 to 15 p.s.i. above expected working pressure but to minimum of 150 p.s.i. prior to use.

All tank openings are sealed and remote tank gauging system is operational.

All necessary throttling of discharge for crude spraying will be done on vessel's valves.

There is a responsible designate person in charge of operation. (Give name.)

Effective communication will be maintained between vessel and shore.

Water will not intrude into the crude wash cycle.

Washing to be commingled and discharged at the same time with the rest of the cargo.

Previous crude wash exprience of key personnel is (list).

Tanks crude washed last 2 voyages are (list).

Any additional vessel requirements or comments.

Emergency Communication: If ship-to-shore communication fails the ship's whistle shall be sounded continuously. Discharging shall be immediately stopped and will not be resumed until communications have been re-established.

Overside Lighting: During night discharging sufficient overside lighting must be provided to readily detect any oil spill so that immediate appropriate action may be taken.

International Code of Signals: During discharging operations the following signals shall be displayed:

By Day : The International Code flag "B"
By Night : A red light visible all round the horizon for distance of at least 2 miles.

Unloading Procedures: Upon being informed by the vessel's Master or responsible officer that the vessel is ready to start discharging, the Mooring Master will contact the Terminal Control Room to co-ordinate the commencement of unloading in accordance with the terminal's instructions.

The control room operator will normally give a "standby warning" by VHF approximately 10 minutes before the shore tanks are ready to receive cargo.

When the request to commence discharging is received the Mooring Master will ensure that discharging commences at slow speed. This starting procedure will always be adhered to.

Discharging will commence utilising 1 pump only with circulating system and when it has been confirmed that there is no significant rise in pressure on the discharging line which could indicate a blocked or closed valve on the shore or ship's discharging system, the crude oil will be discharged at the steady operating flow previously agreed upon.

Should there be any significant rise in pressure, discharging must be immediately stopped. The ship will be advised to check the on-board systems, take any necessary remedial steps and inform the terminal's control room.

At the same time the underwater and floating hoses should be checked to ensure that there are no obstructions.

Should the Master be requested to increase or decrease the cargo discharging rate this should be promptly implemented provided the vessel's pumps are capable of an increased rate.

SUMED may allow vessels to simultaneously ballast while unloading provided they are equipped to properly segregate the ballast and avoid any possible commingling with the cargo. Pumping ballast water into the sealine is strictly prohibited.

Any suspension and subsequent resumption of discharging of cargo must be logged both ashore and in the "Tanker Time Sheet".

All events regarding mooring, commencement, termination of unloading, stoppages, if any, and unmooring are both logged and recorded ashore at the terminal's control room as and when they are received from the Mooring Master.

These events shall jointly be logged in the Tanker Time Sheet by the vessel's Master and SUMED's Mooring Master.

Vacating Berth: Vessels shall vacate berth immediately after disconnection of hoses, allowing the least possible time to take ballast if essential for the safe manoeuvering of the vessel while vacating the berth.

Emergency Shut-Down: In case of emergency such as fire, sudden deterioration of sea and weather conditions, failure in ship to shore communications, etc, the discharging operations must be immediately suspended at the request of the Mooring Master. The ship's discharging pumps must be stopped immediately, the butterfly valves of the floating hoses and the manifold valves must be closed.

Depending upon the reasons causing the emergency, the ship's Master and Mooring Master will decide whether or not to disconnect the hoses and vacate the berth. In case of dispute the final decision will be taken by the Mooring Master.

Sampling: Representative samples of the cargo will be taken either from the vessel's cargo tanks or from the online automatic samplers.

The samples will be divided into 3 equal portions of about 1 gallon each, one portion will be handed to the quality control laboratory, the second to the ship's Master (sealed by SUMED) and the third retained by SUMED for 60 days (sealed by the Master).

The ship's Master will sign a receipt on receiving the ship's sealed and stamped container of the sample.

MEDICAL: Neither medical nor hospital facilities are provided by SUMED. In case urgent medical assistance is required the vessel should contact SUMED's Harbour Master by VHF radio. Private doctors and facilities are available at Suez.

REPAIRS: Masters of vessels discharging at Ain Sukhna Terminal are instructed that under no circumstances may engines be shutdown for repairs whilst their vessel is moored to the SBMs. There are no facilities at Ain Sukhna Terminal for repairs. Repair facilities are available at Suez.

It is emphasised that all vessels at the SBMs must be prepared to clear immediately on instructions from the Mooring Master.

CONSULS: Consular or diplomatic representatives for most maritime nations are in Cairo.

REPATRIATION: Crew changes are only permitted in cases of emergency.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at Terminal.

WEATHER:

Climate: The climate in the Ain Sukhna area is generally good. Summers are hot and dry and winters are relatively cool.

The visibility is usually excellent with few sand storms and infrequent fog. Sub-zero temperatures are unknown and there are very few rain squalls.

Summary of Weather Statistics (1884 – 1967):

Average rainfall year	0.8 in.
Mean maximum temperature	84°F (29°C)
Mean minimum temperature	62°F (16.7°C)
Extreme maximum temperature	111°F (44°C)
Extreme minimum temperature	35°F (1.7°C)
Average relative humidity	60%

Winds: The prevailing winds at Ain Sukhna are from the N.W. throughout the year.

Tides: The tidal range is up to a maximum of 7.4 ft.

Waves: The estimated characteristics of the 100 year extreme waves are:

Maximum height	12.0 ft. (3.7 m.)
Maximum crest elevation	11.0 ft. (3.3 m.)
Period	7.5 secs.
Length	280 ft. (85 m.)
Speed	22 knots (41 km./hr.)
Direction from	North

Tidal Streams: At Ain Sukhna the tidal streams set parallel to the coast line Northwards on the flood tide and parallel to the coast Southwards on the ebb tide. Maximum rate is 0.5 knots (0.9 km./hr.) at the surface.

Currents: There is no fixed current in this area and any flow is caused entirely by the prevailing tidal stream and winds.

Sea Salinity: The Red Sea and Gulf are extremely saline and salinity is around 40,000/50,000 parts per million.

Sea Temperature: The surface temperature of the sea ranges between 66°F (19°C) in February and 80°F (26.7°C) in August.

GENERAL:

Navigation: When entering, manoeuvering or leaving the Port Limits of Ain Sukhna, the Master has to conform with the conditions setforth in this Manual and has to adhere to the 1972 International Regulations for preventing Collisions at Sea which will be complied with at all times.

The Master guarantees that his vessel fulfils all navigational and worthiness conditions in particular those required for vessels carrying dangerous cargo, (crude oil) in accordance with the provisions setforth in the Appendix for vessels carrying Dangerous cargo annexed to Rules of Navigation of the Suez Canal Authority to the extent that such provisions are applicable.

Master should submit the respective certificate and declarations whenever required in this respect.

Helicopters (available in emergencies): Should the services of a helicopter be required by SUMED for any purposes whatsoever the vessel will be given a minimum of 30 minutes warning notice before the helicopter's approach in order that cargo operations can be stopped and all tanks and vents closed.

A responsible officer should be on deck to assist the helicopter in making the approach to the vessel. Although the safety of the helicopter remains at all times the responsibility of its pilot, helicopter services shall not be employed in any event without the express prior consent of Shipper and vessel's Master.

Supplies: Stores and supplies are available through an Agent and can be delivered from Suez to Ain Sukhna anchorage area after unloading but entirely at the vessel's own risk.

Government Officials: A.R.E. officials, such as Customs Director, Quarantine Officer and Immigration Officer are stationed at Ain Sukhna. Should Customs guards be stationed on board vessels whilst moored it is expected that vessels will extend all courtesies to them and or other officials while on board.

Ship's Readiness: This terminal is an open roadstead and therefore, during the time a ship is moored, the engines must be ready with full power for immediate use.

Vessels at berths must clear immediately upon advice of the Mooring Master or as directed by SUMED's terminal superintendent. Ship's personnel should be at their respective stations at all times during mooring, unmooring and cargo transfer operations.

Courtesy Flag: All vessels are required to fly A.R.E. Ensign on the foremast during daylight hours.

Quarantine Regulations: The rules governing quarantine regulations are the same as for Suez.

Unauthorised Craft: The presence of unauthorised craft alongside is extremely hazardous.

SUMED prohibits the boarding of individuals other than those authorised to do so in the bona fide conduct of the vessel's operation. No unauthorised person is allowed to board the vessel whether at anchorage or while moored.

Contraband: SUMED prohibits unauthorised craft from coming alongside vessels. To avoid the possibility of undesirable items getting aboard vessels, it is requested that Masters discourage craft coming alongside whilst the vessel is in the terminal.

AGENCY SERVICES: Not required under normal circumstances.

TIME: GMT plus 2 hours.

AUTHORITY: Arab Petroleum Pipeline Company (Sumed Un).

Headquarters: 9 Amin Yehia St., Zizinia, Alexandria. *Tel:* 61579, 64138, 64139. *Telex:* 54295, 54380 Sumed Un.

Central Operations: 16 Syria St., Roushdt, Alexandria. *Tel:* 42975, 43940, 44939. *Telex:* 54108, 54033 Sumed Un.

ALEXANDRIA (Including El Dekheila): 31.09 N. 29.53 E. (See Plan)

DOCUMENTS:

4 copies of Crew List.

Complete set of Manifests covering all cargo on board showing names of Shippers and Consignees.

4 copies List of Passengers in Transit.

Landing cards for passengers landing finally in A.R.E. and for those landing in A.R.E. in transit.

4 copies List of passengers finally landing in A.R.E. (if any) together with their addresses in A.R.E.

Deck log books showing date of last call at a A.R.E. port, completed up to the time of arrival.

For Quarantine: Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

For Immigration Officer:

Arrival Immigration Form, duly completed.

1 Passenger List.

List of Passengers Finally Landing, in duplicate.

Crew List.

Valid passport with entry visa is required for landing in A.R.E. for passengers landing. Emergency visa can be granted on arrival if so required.

For Customs Use:

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate.

PILOTAGE: Compulsory. Pilot boards off harbour entrance. International code signals used.

Vessels are not to proceed from the waiting area (Lat. 31° 12.6′ N., Long. 29° 44.5′ E. with radius of 1.5 miles) without a Pilot onboard.

RESTRICTIONS: Entrance channels 36 ft. depth, being dredged to 50 ft. Arriving vessels should keep 50 miles offshore between sunset and sunrise.

MAX. SIZE: Up to 32 ft. draft.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor. The Quarantine Doctor meets ships whilst entering the port and ships are boarded in turn.

In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at an A.R.E. port, the vessel is put under compulsory quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

(1) The vessel must be a regular liner known to the Quarantine Authorities and have a doctor on board.

(2) Details shown on the Quarantine Statement should be wirelessed to the Quarantine Authorities 24 hours prior to ship's arrival.

(3) Masters of vessels must declare before their arrival any accidents, which might have taken place on board prior to the arrival in port.

(4) The ship must not have called at any infected port.

RADIO: Alexandria Radio, call sign SUH, operating 24 hours daily on 444, 500 and 8578 kHz and between 0600 to 1800 GMT on 12,974 kHz. Also harbour VHF Channel 16.

TUGS: 5 tugs available up to 1,200 h.p.

BERTHING: Alongside quays in depths up to 34 ft.

Refrigerated cargoes should be direct delivery.

Ro/Ro facilities available.

Cement to silos and bagged in heavy cloth (no paper bags permitted).

Coal: Discharged at Berth Nos. 63 and 64. Max. draft 33 ft. 4×25 ton cranes. Rate 10,000 tonnes per day.

El Dekheila: Located 6 km. West of Alexandria and managed by Alexandria Port Authority.

Industrial Port: Access channel: Length 3.5 km. and depth 20.0 m. Turning circle: 750 m. diameter and 20.0 depth. Approach channel: Width 250 m., depth 20.0 m. One jetty (2 berths). Length 640 m. Depth alongside: Inner Berth 16.0 m. Outer Berth 20.0 m. Max. Size: 60,000 d.w.t. and 160,000 d.w.t. respectively. An additional berth to handle vessels up to 250,000 d.w.t. may be constructed later. 2×30 ton capacity grab cranes and 2 belt conveyors for handling iron ore pellet at 1,000 t.p.h. each (900 t.p.h. for coal). Port to be operational late 1986.

Commercial Port: Access channel 1.2 km. in length is a branch off the access channel to the industrial port. Depth of channel 14.0 m. Width 210 m. - 150 m. Commercial port will have over 1,500 m. of berthing space with 14.0 m. of water alongside. Port expected to be operational late 1987. Cargoes to be handled will include containers, general cargo, timber, chemicals and Ro/Ro vessels.

CONTAINER FACILITIES: Length 700 m., depth alongside 14.0 m. 2×32 tonne container gantry cranes, 2×32 tonne transtainers and 4×42 tonne forklifts.

TANKERS: Petroleum Basin: in West part of Outer Harbour, Berth Nos. 3 and 4, depth alongside 38 ft., max. length 700 ft., draft 34 ft. Berth Nos. 3 and 4: in East part of Outer Harbour. Stern to moorings.

It has been reported that tankers are required to take on ballast in excess of that deemed to be necessary by the Master, even in fine weather. One Master was ordered to bring his forward draft to 21 ft. Once the vessel was alongside a charge was made for deballasting the vessel.

FRESH WATER: Available by barge, and alongside most quays.

FUEL: Available by barge.

MEDICAL: All facilities available. International Vaccination Certificates required.

REPAIRS:

Alexandria Shipyard: Builds vessels up to 40,000 tons. One drydock capacity 85,000 d.w.t., cranes with up to 30 tons capacity. One drydock capacity 20,000 d.w.t., cranes with capacity up to 30 tons. Fully equipped engineering workshops capable of carrying out extensive repairs alongside quays length 1,200 m. Depth alongside 11 m.

Alexandria Ship Repair Co.: Ship repairs including engine repairs and boiler repair. Fully equipped workshops.

The Egyptian Shipbuilding and Repairs Co.: Floating dock for ships up to 12,000 d.w.t. 100 ton floating crane. All types of hull and machinery repairs possible.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Suez Canal".

DEVELOPMENTS: Grain elevator (Berth Nos. 81/82) to be constructed. Capacity 6,000 tonnes. Grain silo of 100,000 tonnes to be constructed. Completion mid-1985.

Control tower with radar and VHF being constructed.

Approach channel to be widened to 220 m. and deepened to 13 m.

Dekheila: See "Berthing".

SHIPMASTER'S REPORT: 1976

Approaches: Ships making the passage from Port Said to Alexandria are obliged to keep to the route laid down by the Egyptian Authorities. The coastline is rather featureless and a good operational radar is invaluable. Radar conspicuous objects were found to be – Ras el Barr Lighthouse and fort, forts numbers 2 & 4, the forts and lighthouses at Brulos and at Rosetta Mouth and also Nelson Island.

The anchorage can be identified from a considerable distance by the number of ships at anchor off the port – often more than fifty. The prohibited area marked on Chart No. 243 to the East of Great Pass is ignored and ships anchor as convenient but as near to the pilot ground as possible. Ras el Tin Lighthouse, Great Pass Beacon and the Minaret (248) were found to be good marks. There is a latticed beacon to the West of Great Pass Beacon which should not be confused with the latter. The new beacon is not marked on the chart and was stated by the Pilot to be for a new channel which is being constructed.

Arrival Procedure: It is important to register one's arrival with the Alexandria Port Control as soon as possible. This is done by means of VHF.

At 1100 hrs. (approx.) a traffic list is broadcast and ships mentioned should contact Port Control and obtain berthing instructions. They will probably be told to move in to the pilot boarding ground 2 miles N.W. of Great Pass Beacon. When there, they should anchor again and await either further instructions or the unannounced arrival of the Pilot.

Berthage is decided at a meeting held around Noon so there may be a supplementary traffic list around 1400 hrs. In any case, it is a good idea to call Port Control at least once a day to remind them that you are still awaiting a berth.

A Pilot will take the ship into the anchorage in the Outer Harbour where Health, Immigration etc. officials board and clearance given. The Agent may also board. The main radio transmitter is sealed at this time. The ship will then await allocation of a berth.

Anchorages: At the anchorage outside the port depths vary from 20 to 30 fathoms but the holding ground seems to be good. This ship lay comfortably with 7 shackles of cable out. Ships usually leave each other ample room in case of bad weather. There are good anchor bearings.

The anchorages inside the Outer and Inner Harbours are very congested and the holding ground (said to be sand) is not good. Time spent at anchor here can be a very anxious period.

The ship was anchored in the Inner Harbour just off the end of the Passenger Quay. When it was pointed out to the Pilot that, in the Master's opinion, she was too close to the 3 fathoms line at the old Aircraft Moorings, the Pilot stated that it would be all right because the ship wouldn't swing that way. If the vessel had swung the other way she would have gone aground.

At 0300 hrs. the following morning the ship began to swing onto the sand bank. Fortunately there was no wind and it was possible to turn her, weigh anchor and find another anchorage. A call to Port Control on VHF was made for a tug and Pilot but was not acknowledged.

Crude Oil Washing: COW is usually acceptable if the ship can maintain an average flow rate of no less than 7,400 tonnes/p.h. (100 p.s.i. at ship's rail throughout discharging). However, COW is subject to the terminal's approval depending on both operational circumstance and if this operation has been previously carried out by the vessel.

When vessel requests permission to perform COW the Master must respond in writing to the "Crude Oil Wash Checkoff List".

COW of slop tank is prohibited.

Crude Oil Wash (COW) – Checkoff List: Vessels requesting permission to perform crude oil wash while unloading at Ain Sukhna, are requested to respond to the following checkoff list:

Inert gas system is fully operational and tested.

Each tank will be positively pressurised and method of recording pressure will be available.

Each tank will be kept below 8% oxygen before and during operation.

Inert gas system flue gas oxygen content will be continuously monitored and maintained below 8% oxygen.

Oxygen alarm in cargo control room set to give visual indication when to abort crude washing.

Pressures in cargo tanks are available to vessel's control room personnel.

Washing systems have permanent steel pipework and will be pressure tested to 10 to 15 p.s.i. above expected working pressure but to minimum of 150 p.s.i. prior to use.

All tank openings are sealed and remote tank gauging system is operational.

All necessary throttling of discharge for crude spraying will be done on vessel's valves.

There is a responsible designate person in charge of operation. (Give name.)

Effective communication will be maintained between vessel and shore.

Water will not intrude into the crude wash cycle.

Washing to be commingled and discharged at the same time with the rest of the cargo.

Previous crude wash exprience of key personnel is (list).

Tanks crude washed last 2 voyages are (list).

Any additional vessel requirements or comments.

Emergency Communication: If ship-to-shore communication fails the ship's whistle shall be sounded continuously. Discharging shall be immediately stopped and will not be resumed until communications have been re-established.

Overside Lighting: During night discharging sufficient overside lighting must be provided to readily detect any oil spill so that immediate appropriate action may be taken.

International Code of Signals: During discharging operations the following signals shall be displayed:

By Day	: The International Code flag "B".
By Night	: A red light visible all round the horizon for distance of at least 2 miles.

Unloading Procedures: Upon being informed by the vessel's Master or responsible officer that the vessel is ready to start discharging, the Mooring Master will contact the Terminal Control Room to co-ordinate the commencement of unloading in accordance with the terminal's instructions.

The control room operator will normally give a "standby warning" by VHF approximately 10 minutes before the shore tanks are ready to receive cargo.

When the request to commence discharging is received the Mooring Master will ensure that discharging commences at slow speed. This starting procedure will always be adhered to.

Discharging will commence utilising 1 pump only with circulating system and when it has been confirmed that there is no significant rise in pressure on the discharging line which could indicate a blocked or closed valve on the shore or ship's discharging system, the crude oil will be discharged at the steady operating flow previously agreed upon.

Should there be any significant rise in pressure, discharging must be immediately stopped. The ship will be advised to check the on-board systems, take any necessary remedial steps and inform the terminal's control room.

At the same time the underwater and floating hoses should be checked to ensure that there are no obstructions.

Should the Master be requested to increase or decrease the cargo discharging rate this should be promptly implemented provided the vessel's pumps are capable of an increased rate.

SUMED may allow vessels to simultaneously ballast while unloading provided they are equipped to properly segregate the ballast and avoid any possible commingling with the cargo. Pumping ballast water into the sealine is strictly prohibited.

Any suspension and subsequent resumption of discharging of cargo must be logged both ashore and in the "Tanker Time Sheet".

All events regarding mooring, commencement, termination of unloading, stoppages, if any, and unmooring are both logged and recorded ashore at the terminal's control room as and when they are received from the Mooring Master.

These events shall jointly be logged in the Tanker Time Sheet by the vessel's Master and SUMED's Mooring Master.

Vacating Berth: Vessels shall vacate berth immediately after disconnection of hoses, allowing the least possible time to take ballast if essential for the safe manoeuvering of the vessel while vacating the berth.

Emergency Shut-Down: In case of emergency such as fire, sudden deterioration of sea and weather conditions, failure in ship to shore communications, etc, the discharging operations must be immediately suspended at the request of the Mooring Master. The ship's discharging pumps must be stopped immediately, the butterfly valves of the floating hoses and the manifold valves must be closed.

Depending upon the reasons causing the emergency, the ship's Master and Mooring Master will decide whether or not to disconnect the hoses and vacate the berth. In case of dispute the final decision will be taken by the Mooring Master.

Sampling: Representative samples of the cargo will be taken either from the vessel's cargo tanks or from the online automatic samplers.

The samples will be divided into 3 equal portions of about 1 gallon each, one portion will be handed to the quality control laboratory, the second to the ship's Master (sealed by SUMED) and the third retained by SUMED for 60 days (sealed by the Master).

The ship's Master will sign a receipt on receiving the ship's sealed and stamped container of the sample.

MEDICAL: Neither medical nor hospital facilities are provided by SUMED. In case urgent medical assistance is required the vessel should contact SUMED's Harbour Master by VHF radio. Private doctors and facilities are available at Suez.

REPAIRS: Masters of vessels discharging at Ain Sukhna Terminal are instructed that under no circumstances may engines be shutdown for repairs whilst their vessel is moored to the SBMs. There are no facilities at Ain Sukhna Terminal for repairs. Repair facilities are available at Suez.

It is emphasised that all vessels at the SBMs must be prepared to clear immediately on instructions from the Mooring Master.

CONSULS: Consular or diplomatic representatives for most maritime nations are in Cairo.

REPATRIATION: Crew changes are only permitted in cases of emergency.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at Terminal.

WEATHER:

Climate: The climate in the Ain Sukhna area is generally good. Summers are hot and dry and winters are relatively cool.

The visibility is usually excellent with few sand storms and infrequent fog. Sub-zero temperatures are unknown and there are very few rain squalls.

Summary of Weather Statistics (1884 – 1967):

Average rainfall year	0.8 in.
Mean maximum temperature	84°F (29°C)
Mean minimum temperature	62°F (16.7°C)
Extreme maximum temperature	111°F (44°C)
Extreme minimum temperature	35°F (1.7°C)
Average relative humidity	60%

Winds: The prevailing winds at Ain Sukhna are from the N.W. throughout the year.

Tides: The tidal range is up to a maximum of 7.4 ft.

Waves: The estimated characteristics of the 100 year extreme waves are:

Maximum height	12.0 ft. (3.7 m.)
Maximum crest elevation	11.0 ft. (3.3 m.)
Period	7.5 secs.
Length	280 ft. (85 m.)
Speed	22 knots (41 km./hr.)
Direction from	North

Tidal Streams: At Ain Sukhna the tidal streams set parallel to the coast line Northwards on the flood tide and parallel to the coast Southwards on the ebb tide. Maximum rate is 0.5 knots (0.9 km./hr.) at the surface.

Currents: There is no fixed current in this area and any flow is caused entirely by the prevailing tidal stream and winds.

Sea Salinity: The Red Sea and Gulf are extremely saline and salinity is around 40,000/50,000 parts per million.

Sea Temperature: The surface temperature of the sea ranges between 66°F (19°C) in February and 80°F (26.7°C) in August.

GENERAL:

Navigation: When entering, manoeuvering or leaving the Port Limits of Ain Sukhna, the Master has to conform with the conditions setforth in this Manual and has to adhere to the 1972 International Regulations for preventing Collisions at Sea which will be complied with at all times.

The Master guarantees that his vessel fulfils all navigational and worthiness conditions in particular those required for vessels carrying dangerous cargo, (crude oil) in accordance with the provisions setforth in the Appendix for vessels carrying Dangerous cargo annexed to Rules of Navigation of the Suez Canal Authority to the extent that such provisions are applicable.

Master should submit the respective certificate and declarations whenever required in this respect.

Helicopters (available in emergencies): Should the services of a helicopter be required by SUMED for any purposes whatsoever the vessel will be given a minimum of 30 minutes warning notice before the helicopter's approach in order that cargo operations can be stopped and all tanks and vents closed.

A responsible officer should be on deck to assist the helicopter in making the approach to the vessel. Although the safety of the helicopter remains at all times the responsibility of its pilot, helicopter services shall not be employed in any event without the express prior consent of Shipper and vessel's Master.

Supplies: Stores and supplies are available through an Agent and can be delivered from Suez to Ain Sukhna anchorage area after unloading but entirely at the vessel's own risk.

Government Officials: A.R.E. officials, such as Customs Director, Quarantine Officer and Immigration Officer are stationed at Ain Sukhna. Should Customs guards be stationed on board vessels whilst moored it is expected that vessels will extend all courtesies to them and or other officials while on board.

Ship's Readiness: This terminal is an open roadstead and therefore, during the time a ship is moored, the engines must be ready with full power for immediate use.

Vessels at berths must clear immediately upon advice of the Mooring Master or as directed by SUMED's terminal superintendent. Ship's personnel should be at their respective stations at all times during mooring, unmooring and cargo transfer operations.

Courtesy Flag: All vessels are required to fly A.R.E. Ensign on the foremast during daylight hours.

Quarantine Regulations: The rules governing quarantine regulations are the same as for Suez.

Unauthorised Craft: The presence of unauthorised craft alongside is extremely hazardous.

SUMED prohibits the boarding of individuals other than those authorised to do so in the bona fide conduct of the vessel's operation. No unauthorised person is allowed to board the vessel whether at anchorage or while moored.

Contraband: SUMED prohibits unauthorised craft from coming alongside vessels. To avoid the possibility of undesirable items getting aboard vessels, it is requested that Masters discourage craft coming alongside whilst the vessel is in the terminal.

AGENCY SERVICES: Not required under normal circumstances.

TIME: GMT plus 2 hours.

AUTHORITY: Arab Petroleum Pipeline Company (Sumed Un).

Headquarters: 9 Amin Yehia St., Zizinia, Alexandria. *Tel:* 61579, 64138, 64139. *Telex:* 54295, 54380 Sumed Un.

Central Operations: 16 Syria St., Roushdt, Alexandria. *Tel:* 42975, 43940, 44939. *Telex:* 54108, 54033 Sumed Un.

ALEXANDRIA (Including El Dekheila): 31.09 N. 29.53 E. (See Plan)

DOCUMENTS:

4 copies of Crew List.

Complete set of Manifests covering all cargo on board showing names of Shippers and Consignees.

4 copies List of Passengers in Transit.

Landing cards for passengers landing finally in A.R.E. and for those landing in A.R.E. in transit.

4 copies List of passengers finally landing in A.R.E. (if any) together with their addresses in A.R.E.

Deck log books showing date of last call at a A.R.E. port, completed up to the time of arrival.

For Quarantine: Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

For Immigration Officer:

Arrival Immigration Form, duly completed.

1 Passenger List.

List of Passengers Finally Landing, in duplicate.

Crew List.

Valid passport with entry visa is required for landing in A.R.E. for passengers landing. Emergency visa can be granted on arrival if so required.

For Customs Use:

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate.

PILOTAGE: Compulsory. Pilot boards off harbour entrance. International code signals used.

Vessels are not to proceed from the waiting area (Lat. 31° 12.6′ N., Long. 29° 44.5′ E. with radius of 1.5 miles) without a Pilot onboard.

RESTRICTIONS: Entrance channels 36 ft. depth, being dredged to 50 ft. Arriving vessels should keep 50 miles offshore between sunset and sunrise.

MAX. SIZE: Up to 32 ft. draft.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor. The Quarantine Doctor meets ships whilst entering the port and ships are boarded in turn.

In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at an A.R.E. port, the vessel is put under compulsory quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

(1) The vessel must be a regular liner known to the Quarantine Authorities and have a doctor on board.

(2) Details shown on the Quarantine Statement should be wirelessed to the Quarantine Authorities 24 hours prior to ship's arrival.

(3) Masters of vessels must declare before their arrival any accidents, which might have taken place on board prior to the arrival in port.

(4) The ship must not have called at any infected port.

RADIO: Alexandria Radio, call sign SUH, operating 24 hours daily on 444, 500 and 8578 kHz and between 0600 to 1800 GMT on 12,974 kHz. Also harbour VHF Channel 16.

TUGS: 5 tugs available up to 1,200 h.p.

BERTHING: Alongside quays in depths up to 34 ft.

Refrigerated cargoes should be direct delivery.

Ro/Ro facilities available.

Cement to silos and bagged in heavy cloth (no paper bags permitted).

Coal: Discharged at Berth Nos. 63 and 64. Max. draft 33 ft. 4×25 ton cranes. Rate 10,000 tonnes per day.

El Dekheila: Located 6 km. West of Alexandria and managed by Alexandria Port Authority.

Industrial Port: Access channel: Length 3.5 km. and depth 20.0 m. Turning circle: 750 m. diameter and 20.0 depth. Approach channel: Width 250 m., depth 20.0 m. One jetty (2 berths). Length 640 m. Depth alongside: Inner Berth 16.0 m. Outer Berth 20.0 m. Max. Size: 60,000 d.w.t. and 160,000 d.w.t. respectively. An additional berth to handle vessels up to 250,000 d.w.t. may be constructed later. 2×30 ton capacity grab cranes and 2 belt conveyors for handling iron ore pellet at 1,000 t.p.h. each (900 t.p.h. for coal). Port to be operational late 1986.

Commercial Port: Access channel 1.2 km. in length is a branch off the access channel to the industrial port. Depth of channel 14.0 m. Width 210 m. - 150 m. Commercial port will have over 1,500 m. of berthing space with 14.0 m. of water alongside. Port expected to be operational late 1987. Cargoes to be handled will include containers, general cargo, timber, chemicals and Ro/Ro vessels.

CONTAINER FACILITIES: Length 700 m., depth alongside 14.0 m. 2×32 tonne container gantry cranes, 2×32 tonne transtainers and 4×42 tonne forklifts.

TANKERS: Petroleum Basin: in West part of Outer Harbour, Berth Nos. 3 and 4, depth alongside 38 ft., max. length 700 ft., draft 34 ft. Berth Nos. 3 and 4: in East part of Outer Harbour. Stern to moorings.

It has been reported that tankers are required to take on ballast in excess of that deemed to be necessary by the Master, even in fine weather. One Master was ordered to bring his forward draft to 21 ft. Once the vessel was alongside a charge was made for deballasting the vessel.

FRESH WATER: Available by barge, and alongside most quays.

FUEL: Available by barge.

MEDICAL: All facilities available. International Vaccination Certificates required.

REPAIRS:

Alexandria Shipyard: Builds vessels up to 40,000 tons. One drydock capacity 85,000 d.w.t., cranes with up to 30 tons capacity. One drydock capacity 20,000 d.w.t., cranes with capacity up to 30 tons. Fully equipped engineering workshops capable of carrying out extensive repairs alongside quays length 1,200 m. Depth alongside 11 m.

Alexandria Ship Repair Co.: Ship repairs including engine repairs and boiler repair. Fully equipped workshops.

The Egyptian Shipbuilding and Repairs Co.: Floating dock for ships up to 12,000 d.w.t. 100 ton floating crane. All types of hull and machinery repairs possible.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Suez Canal".

DEVELOPMENTS: Grain elevator (Berth Nos. 81/82) to be constructed. Capacity 6,000 tonnes. Grain silo of 100,000 tonnes to be constructed. Completion mid-1985.

Control tower with radar and VHF being constructed.

Approach channel to be widened to 220 m. and deepened to 13 m.

Dekheila: See "Berthing".

SHIPMASTER'S REPORT: 1976

Approaches: Ships making the passage from Port Said to Alexandria are obliged to keep to the route laid down by the Egyptian Authorities. The coastline is rather featureless and a good operational radar is invaluable. Radar conspicuous objects were found to be – Ras el Barr Lighthouse and fort, forts numbers 2 & 4, the forts and lighthouses at Brulos and at Rosetta Mouth and also Nelson Island.

The anchorage can be identified from a considerable distance by the number of ships at anchor off the port – often more than fifty. The prohibited area marked on Chart No. 243 to the East of Great Pass is ignored and ships anchor as convenient but as near to the pilot ground as possible. Ras el Tin Lighthouse, Great Pass Beacon and the Minaret (248) were found to be good marks. There is a latticed beacon to the West of Great Pass Beacon which should not be confused with the latter. The new beacon is not marked on the chart and was stated by the Pilot to be for a new channel which is being constructed.

Arrival Procedure: It is important to register one's arrival with the Alexandria Port Control as soon as possible. This is done by means of VHF.

At 1100 hrs. (approx.) a traffic list is broadcast and ships mentioned should contact Port Control and obtain berthing instructions. They will probably be told to move in to the pilot boarding ground 2 miles N.W. of Great Pass Beacon. When there, they should anchor again and await either further instructions or the unannounced arrival of the Pilot.

Berthage is decided at a meeting held around Noon so there may be a supplementary traffic list around 1400 hrs. In any case, it is a good idea to call Port Control at least once a day to remind them that you are still awaiting a berth.

A Pilot will take the ship into the anchorage in the Outer Harbour where Health, Immigration etc. officials board and clearance given. The Agent may also board. The main radio transmitter is sealed at this time. The ship will then await allocation of a berth.

Anchorages: At the anchorage outside the port depths vary from 20 to 30 fathoms but the holding ground seems to be good. This ship lay comfortably with 7 shackles of cable out. Ships usually leave each other ample room in case of bad weather. There are good anchor bearings.

The anchorages inside the Outer and Inner Harbours are very congested and the holding ground (said to be sand) is not good. Time spent at anchor here can be a very anxious period.

The ship was anchored in the Inner Harbour just off the end of the Passenger Quay. When it was pointed out to the Pilot that, in the Master's opinion, she was too close to the 3 fathoms line at the old Aircraft Moorings, the Pilot stated that it would be all right because the ship wouldn't swing that way. If the vessel had swung the other way she would have gone aground.

At 0300 hrs. the following morning the ship began to swing onto the sand bank. Fortunately there was no wind and it was possible to turn her, weigh anchor and find another anchorage. A call to Port Control on VHF was made for a tug and Pilot but was not acknowledged.

Crude Oil Washing: COW is usually acceptable if the ship can maintain an average flow rate of no less than 7,400 tonnes/p.h. (100 p.s.i. at ship's rail throughout discharging). However, COW is subject to the terminal's approval depending on both operational circumstance and if this operation has been previously carried out by the vessel.

When vessel requests permission to perform COW the Master must respond in writing to the "Crude Oil Wash Checkoff List".

COW of slop tank is prohibited.

Crude Oil Wash (COW) – Checkoff List: Vessels requesting permission to perform crude oil wash while unloading at Ain Sukhna, are requested to respond to the following checkoff list:

Inert gas system is fully operational and tested.

Each tank will be positively pressurised and method of recording pressure will be available.

Each tank will be kept below 8% oxygen before and during operation.

Inert gas system flue gas oxygen content will be continuously monitored and maintained below 8% oxygen.

Oxygen alarm in cargo control room set to give visual indication when to abort crude washing.

Pressures in cargo tanks are available to vessel's control room personnel.

Washing systems have permanent steel pipework and will be pressure tested to 10 to 15 p.s.i. above expected working pressure but to minimum of 150 p.s.i. prior to use.

All tank openings are sealed and remote tank gauging system is operational.

All necessary throttling of discharge for crude spraying will be done on vessel's valves.

There is a responsible designate person in charge of operation. (Give name.)

Effective communication will be maintained between vessel and shore.

Water will not intrude into the crude wash cycle.

Washing to be commingled and discharged at the same time with the rest of the cargo.

Previous crude wash exprience of key personnel is (list).

Tanks crude washed last 2 voyages are (list).

Any additional vessel requirements or comments.

Emergency Communication: If ship-to-shore communication fails the ship's whistle shall be sounded continuously. Discharging shall be immediately stopped and will not be resumed until communications have been re-established.

Overside Lighting: During night discharging sufficient overside lighting must be provided to readily detect any oil spill so that immediate appropriate action may be taken.

International Code of Signals: During discharging operations the following signals shall be displayed:

By Day : The International Code flag "B".
By Night : A red light visible all round the horizon for distance of at least 2 miles.

Unloading Procedures: Upon being informed by the vessel's Master or responsible officer that the vessel is ready to start discharging, the Mooring Master will contact the Terminal Control Room to co-ordinate the commencement of unloading in accordance with the terminal's instructions.

The control room operator will normally give a "standby warning" by VHF approximately 10 minutes before the shore tanks are ready to receive cargo.

When the request to commence discharging is received the Mooring Master will ensure that discharging commences at slow speed. This starting procedure will always be adhered to.

Discharging will commence utilising 1 pump only with circulating system and when it has been confirmed that there is no significant rise in pressure on the discharging line which could indicate a blocked or closed valve on the shore or ship's discharging system, the crude oil will be discharged at the steady operating flow previously agreed upon.

Should there be any significant rise in pressure, discharging must be immediately stopped. The ship will be advised to check the on-board systems, take any necessary remedial steps and inform the terminal's control room.

At the same time the underwater and floating hoses should be checked to ensure that there are no obstructions.

Should the Master be requested to increase or decrease the cargo discharging rate this should be promptly implemented provided the vessel's pumps are capable of an increased rate.

SUMED may allow vessels to simultaneously ballast while unloading provided they are equipped to properly segregate the ballast and avoid any possible commingling with the cargo. Pumping ballast water into the sealine is strictly prohibited.

Any suspension and subsequent resumption of discharging of cargo must be logged both ashore and in the "Tanker Time Sheet".

All events regarding mooring, commencement, termination of unloading, stoppages, if any, and unmooring are both logged and recorded ashore at the terminal's control room as and when they are received from the Mooring Master.

These events shall jointly be logged in the Tanker Time Sheet by the vessel's Master and SUMED's Mooring Master.

Vacating Berth: Vessels shall vacate berth immediately after disconnection of hoses, allowing the least possible time to take ballast if essential for the safe manoeuvering of the vessel while vacating the berth.

Emergency Shut-Down: In case of emergency such as fire, sudden deterioration of sea and weather conditions, failure in ship to shore communications, etc, the discharging operations must be immediately suspended at the request of the Mooring Master. The ship's discharging pumps must be stopped immediately, the butterfly valves of the floating hoses and the manifold valves must be closed.

Depending upon the reasons causing the emergency, the ship's Master and Mooring Master will decide whether or not to disconnect the hoses and vacate the berth. In case of dispute the final decision will be taken by the Mooring Master.

Sampling: Representative samples of the cargo will be taken either from the vessel's cargo tanks or from the online automatic samplers.

The samples will be divided into 3 equal portions of about 1 gallon each, one portion will be handed to the quality control laboratory, the second to the ship's Master (sealed by SUMED) and the third retained by SUMED for 60 days (sealed by the Master).

The ship's Master will sign a receipt on receiving the ship's sealed and stamped container of the sample.

MEDICAL: Neither medical nor hospital facilities are provided by SUMED. In case urgent medical assistance is required the vessel should contact SUMED's Harbour Master by VHF radio. Private doctors and facilities are available at Suez.

REPAIRS: Masters of vessels discharging at Ain Sukhna Terminal are instructed that under no circumstances may engines be shutdown for repairs whilst their vessel is moored to the SBMs. There are no facilities at Ain Sukhna Terminal for repairs. Repair facilities are available at Suez.

It is emphasised that all vessels at the SBMs must be prepared to clear immediately on instructions from the Mooring Master.

CONSULS: Consular or diplomatic representatives for most maritime nations are in Cairo.

REPATRIATION: Crew changes are only permitted in cases of emergency.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at Terminal.

WEATHER:

Climate: The climate in the Ain Sukhna area is generally good. Summers are hot and dry and winters are relatively cool.

The visibility is usually excellent with few sand storms and infrequent fog. Sub-zero temperatures are unknown and there are very few rain squalls.

Summary of Weather Statistics (1884 – 1967):

Average rainfall year	0.8 in.
Mean maximum temperature	84°F (29°C)
Mean minimum temperature	62°F (16.7°C)
Extreme maximum temperature	111°F (44°C)
Extreme minimum temperature	35°F (1.7°C)
Average relative humidity	60%

Winds: The prevailing winds at Ain Sukhna are from the N.W. throughout the year.

Tides: The tidal range is up to a maximum of 7.4 ft.

Waves: The estimated characteristics of the 100 year extreme waves are:

Maximum height	12.0 ft. (3.7 m.)
Maximum crest elevation	11.0 ft. (3.3 m.)
Period	7.5 secs.
Length	280 ft. (85 m.)
Speed	22 knots (41 km./hr.)
Direction from	North

Tidal Streams: At Ain Sukhna the tidal streams set parallel to the coast line Northwards on the flood tide and parallel to the coast Southwards on the ebb tide. Maximum rate is 0.5 knots (0.9 km./hr.) at the surface.

Currents: There is no fixed current in this area and any flow is caused entirely by the prevailing tidal stream and winds.

Sea Salinity: The Red Sea and Gulf are extremely saline and salinity is around 40,000/50,000 parts per million.

Sea Temperature: The surface temperature of the sea ranges between 66°F (19°C) in February and 80°F (26.7°C) in August.

GENERAL:

Navigation: When entering, manoeuvering or leaving the Port Limits of Ain Sukhna, the Master has to conform with the conditions setforth in this Manual and has to adhere to the 1972 International Regulations for preventing Collisions at Sea which will be complied with at all times.

The Master guarantees that his vessel fulfils all navigational and worthiness conditions in particular those required for vessels carrying dangerous cargo, (crude oil) in accordance with the provisions setforth in the Appendix for vessels carrying Dangerous cargo annexed to Rules of Navigation of the Suez Canal Authority to the extent that such provisions are applicable.

Master should submit the respective certificate and declarations whenever required in this respect.

Helicopters (available in emergencies): Should the services of a helicopter be required by SUMED for any purposes whatsoever the vessel will be given a minimum of 30 minutes warning notice before the helicopter's approach in order that cargo operations can be stopped and all tanks and vents closed.

A responsible officer should be on deck to assist the helicopter in making the approach to the vessel. Although the safety of the helicopter remains at all times the responsibility of its pilot, helicopter services shall not be employed in any event without the express prior consent of Shipper and vessel's Master.

Supplies: Stores and supplies are available through an Agent and can be delivered from Suez to Ain Sukhna anchorage area after unloading but entirely at the vessel's own risk.

Government Officials: A.R.E. officials, such as Customs Director, Quarantine Officer and Immigration Officer are stationed at Ain Sukhna. Should Customs guards be stationed on board vessels whilst moored it is expected that vessels will extend all courtesies to them and or other officials while on board.

Ship's Readiness: This terminal is an open roadstead and therefore, during the time a ship is moored, the engines must be ready with full power for immediate use.

Vessels at berths must clear immediately upon advice of the Mooring Master or as directed by SUMED's terminal superintendent. Ship's personnel should be at their respective stations at all times during mooring, unmooring and cargo transfer operations.

Courtesy Flag: All vessels are required to fly A.R.E. Ensign on the foremast during daylight hours.

Quarantine Regulations: The rules governing quarantine regulations are the same as for Suez.

Unauthorised Craft: The presence of unauthorised craft alongside is extremely hazardous.

SUMED prohibits the boarding of individuals other than those authorised to do so in the bona fide conduct of the vessel's operation. No unauthorised person is allowed to board the vessel whether at anchorage or while moored.

Contraband: SUMED prohibits unauthorised craft from coming alongside vessels. To avoid the possibility of undesirable items getting aboard vessels, it is requested that Masters discourage craft coming alongside whilst the vessel is in the terminal.

AGENCY SERVICES: Not required under normal circumstances.

The Egyptian Shipbuilding and Repairs Co.: Floating dock for ships up to 12,000 d.w.t. 100 ton floating crane. All types of hull and machinery repairs possible.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Suez Canal".

DEVELOPMENTS: Grain elevator (Berth Nos. 81/82) to be constructed. Capacity 6,000 tonnes. Grain silo of 100,000 tonnes to be constructed. Completion mid-1985.

Control tower with radar and VHF being constructed.

Approach channel to be widened to 220 m. and deepened to 13 m.

Dekheila: See "Berthing".

SHIPMASTER'S REPORT: 1976

Approaches: Ships making the passage from Port Said to Alexandria are obliged to keep to the route laid down by the Egyptian Authorities. The coastline is rather featureless and a good operational radar is invaluable. Radar conspicuous objects were found to be – Ras el Barr Lighthouse and fort, forts numbers 2 & 4, the forts and lighthouses at Brulos and at Rosetta Mouth and also Nelson Island.

The anchorage can be identified from a considerable distance by the number of ships at anchor off the port – often more than fifty. The prohibited area marked on Chart No. 243 to the East of Great Pass is ignored and ships anchor as convenient but as near to the pilot ground as possible. Ras el Tin Lighthouse, Great Pass Beacon and the Minaret (248) were found to be good marks. There is a latticed beacon to the West of Great Pass Beacon which should not be confused with the latter. The new beacon is not marked on the chart and was stated by the Pilot to be for a new channel which is being constructed.

Arrival Procedure: It is important to register one's arrival with the Alexandria Port Control as soon as possible. This is done by means of VHF.

At 1100 hrs. (approx.) a traffic list is broadcast and ships mentioned should contact Port Control and obtain berthing instructions. They will probably be told to move in to the pilot boarding ground 2 miles N.W. of Great Pass Beacon. When there, they should anchor again and await either further instructions or the unannounced arrival of the Pilot.

Berthage is decided at a meeting held around Noon so there may be a supplementary traffic list around 1400 hrs. In any case, it is a good idea to call Port Control at least once a day to remind them that you are still awaiting a berth.

A Pilot will take the ship into the anchorage in the Outer Harbour where Health, Immigration etc. officials board and clearance given. The Agent may also board. The main radio transmitter is sealed at this time. The ship will then await allocation of a berth.

Anchorages: At the anchorage outside the port depths vary from 20 to 30 fathoms but the holding ground seems to be good. This ship lay comfortably with 7 shackles of cable out. Ships usually leave each other ample room in case of bad weather. There are good anchor bearings.

The anchorages inside the Outer and Inner Harbours are very congested and the holding ground (said to be sand) is not good. Time spent at anchor here can be a very anxious period.

The ship was anchored in the Inner Harbour just off the end of the Passenger Quay. When it was pointed out to the Pilot that, in the Master's opinion, she was too close to the 3 fathoms line at the old Aircraft Moorings, the Pilot stated that it would be all right because the ship wouldn't swing that way. If the vessel had swung the other way she would have gone aground.

At 0300 hrs. the following morning the ship began to swing onto the sand bank. Fortunately there was no wind and it was possible to turn her, weigh anchor and find another anchorage. A call to Port Control on VHF was made for a tug and Pilot but was not acknowledged.

Crude Oil Washing: COW is usually acceptable if the ship can maintain an average flow rate of no less than 7,400 tonnes/p.h. (100 p.s.i. at ship's rail throughout discharging). However, COW is subject to the terminal's approval depending on both operational circumstance and if this operation has been previously carried out by the vessel.

When vessel requests permission to perform COW the Master must respond in writing to the "Crude Oil Wash Checkoff List".

COW of slop tank is prohibited.

Crude Oil Wash (COW) – Checkoff List: Vessels requesting permission to perform crude oil wash while unloading at Ain Sukhna, are requested to respond to the following checkoff list:

Inert gas system is fully operational and tested.

Each tank will be positively pressurised and method of recording pressure will be available.

Each tank will be kept below 8% oxygen before and during operation.

Inert gas system flue gas oxygen content will be continuously monitored and maintained below 8% oxygen.

Oxygen alarm in cargo control room set to give visual indication when to abort crude washing.

Pressures in cargo tanks are available to vessel's control room personnel.

Washing systems have permanent steel pipework and will be pressure tested to 10 to 15 p.s.i. above expected working pressure but to minimum of 150 p.s.i. prior to use.

All tank openings are sealed and remote tank gauging system is operational.

All necessary throttling of discharge for crude spraying will be done on vessel's valves.

There is a responsible designate person in charge of operation. (Give name.)

Effective communication will be maintained between vessel and shore.

Water will not intrude into the crude wash cycle.

Washing to be commingled and discharged at the same time with the rest of the cargo.

Previous crude wash exprience of key personnel is (list).

Tanks crude washed last 2 voyages are (list).

Any additional vessel requirements or comments.

Emergency Communication: If ship-to-shore communication fails the ship's whistle shall be sounded continuously. Discharging shall be immediately stopped and will not be resumed until communications have been re-established.

Overside Lighting: During night discharging sufficient overside lighting must be provided to readily detect any oil spill so that immediate appropriate action may be taken.

International Code of Signals: During discharging operations the following signals shall be displayed:

By Day : The International Code flag "B".
By Night : A red light visible all round the horizon for distance of at least 2 miles.

Unloading Procedures: Upon being informed by the vessel's Master or responsible officer that the vessel is ready to start discharging, the Mooring Master will contact the Terminal Control Room to co-ordinate the commencement of unloading in accordance with the terminal's instructions.

The control room operator will normally give a "standby warning" by VHF approximately 10 minutes before the shore tanks are ready to receive cargo.

When the request to commence discharging is received the Mooring Master will ensure that discharging commences at slow speed. This starting procedure will always be adhered to.

Discharging will commence utilising 1 pump only with circulating system and when it has been confirmed that there is no significant rise in pressure on the discharging line which could indicate a blocked or closed valve on the shore or ship's discharging system, the crude oil will be discharged at the steady operating flow previously agreed upon.

Should there be any significant rise in pressure, discharging must be immediately stopped. The ship will be advised to check the on-board systems, take any necessary remedial steps and inform the terminal's control room.

At the same time the underwater and floating hoses should be checked to ensure that there are no obstructions.

Should the Master be requested to increase or decrease the cargo discharging rate this should be promptly implemented provided the vessel's pumps are capable of an increased rate.

SUMED may allow vessels to simultaneously ballast while unloading provided they are equipped to properly segregate the ballast and avoid any possible commingling with the cargo. Pumping ballast water into the sealine is strictly prohibited.

Any suspension and subsequent resumption of discharging of cargo must be logged both ashore and in the "Tanker Time Sheet".

All events regarding mooring, commencement, termination of unloading, stoppages, if any, and unmooring are both logged and recorded ashore at the terminal's control room as and when they are received from the Mooring Master.

These events shall jointly be logged in the Tanker Time Sheet by the vessel's Master and SUMED's Mooring Master.

Vacating Berth: Vessels shall vacate berth immediately after disconnection of hoses, allowing the least possible time to take ballast if essential for the safe manoeuvering of the vessel while vacating the berth.

Emergency Shut-Down: In case of emergency such as fire, sudden deterioration of sea and weather conditions, failure in ship to shore communications, etc, the discharging operations must be immediately suspended at the request of the Mooring Master. The ship's discharging pumps must be stopped immediately, the butterfly valves of the floating hoses and the manifold valves must be closed.

Depending upon the reasons causing the emergency, the ship's Master and Mooring Master will decide whether or not to disconnect the hoses and vacate the berth. In case of dispute the final decision will be taken by the Mooring Master.

Sampling: Representative samples of the cargo will be taken either from the vessel's cargo tanks or from the online automatic samplers.

The samples will be divided into 3 equal portions of about 1 gallon each, one portion will be handed to the quality control laboratory, the second to the ship's Master (sealed by SUMED) and the third retained by SUMED for 60 days (sealed by the Master).

The ship's Master will sign a receipt on receiving the ship's sealed and stamped container of the sample.

MEDICAL: Neither medical nor hospital facilities are provided by SUMED. In case urgent medical assistance is required the vessel should contact SUMED's Harbour Master by VHF radio. Private doctors and facilities are available at Suez.

REPAIRS: Masters of vessels discharging at Ain Sukhna Terminal are instructed that under no circumstances may engines be shutdown for repairs whilst their vessel is moored to the SBMs. There are no facilities at Ain Sukhna Terminal for repairs. Repair facilities are available at Suez.

It is emphasised that all vessels at the SBMs must be prepared to clear immediately on instructions from the Mooring Master.

CONSULS: Consular or diplomatic representatives for most maritime nations are in Cairo.

REPATRIATION: Crew changes are only permitted in cases of emergency.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at Terminal.

WEATHER:

Climate: The climate in the Ain Sukhna area is generally good. Summers are hot and dry and winters are relatively cool.

The visibility is usually excellent with few sand storms and infrequent fog. Sub-zero temperatures are unknown and there are very few rain squalls.

Summary of Weather Statistics (1884 – 1967):

Average rainfall year	0.8 in.
Mean maximum temperature	84°F (29°C)
Mean minimum temperature	62°F (16.7°C)
Extreme maximum temperature	111°F (44°C)
Extreme minimum temperature	35°F (1.7°C)
Average relative humidity	60%

Winds: The prevailing winds at Ain Sukhna are from the N.W. throughout the year.

Tides: The tidal range is up to a maximum of 7.4 ft.

Waves: The estimated characteristics of the 100 year extreme waves are:

Maximum height	12.0 ft. (3.7 m.)
Maximum crest elevation	11.0 ft. (3.3 m.)
Period	7.5 secs.
Length	280 ft. (85 m.)
Speed	22 knots (41 km./hr.)
Direction from	North

Tidal Streams: At Ain Sukhna the tidal streams set parallel to the coast line Northwards on the flood tide and parallel to the coast Southwards on the ebb tide. Maximum rate is 0.5 knots (0.9 km./hr.) at the surface.

Currents: There is no fixed current in this area and any flow is caused entirely by the prevailing tidal stream and winds.

Sea Salinity: The Red Sea and Gulf are extremely saline and salinity is around 40,000/50,000 parts per million.

Sea Temperature: The surface temperature of the sea ranges between 66°F (19°C) in February and 80°F (26.7°C) in August.

GENERAL:

Navigation: When entering, manoeuvering or leaving the Port Limits of Ain Sukhna, the Master has to conform with the conditions setforth in this Manual and has to adhere to the 1972 International Regulations for preventing Collisions at Sea which will be complied with at all times.

The Master guarantees that his vessel fulfils all navigational and worthiness conditions in particular those required for vessels carrying dangerous cargo, (crude oil) in accordance with the provisions setforth in the Appendix for vessels carrying Dangerous cargo annexed to Rules of Navigation of the Suez Canal Authority to the extent that such provisions are applicable.

Master should submit the respective certificate and declarations whenever required in this respect.

Helicopters (available in emergencies): Should the services of a helicopter be required by SUMED for any purposes whatsoever the vessel will be given a minimum of 30 minutes warning notice before the helicopter's approach in order that cargo operations can be stopped and all tanks and vents closed.

A responsible officer should be on deck to assist the helicopter in making the approach to the vessel. Although the safety of the helicopter remains at all times the responsibility of its pilot, helicopter services shall not be employed in any event without the express prior consent of Shipper and vessel's Master.

Supplies: Stores and supplies are available through an Agent and can be delivered from Suez to Ain Sukhna anchorage area after unloading but entirely at the vessel's own risk.

Government Officials: A.R.E. officials, such as Customs Director, Quarantine Officer and Immigration Officer are stationed at Ain Sukhna. Should Customs guards be stationed on board vessels whilst moored it is expected that vessels will extend all courtesies to them and or other officials while on board.

Ship's Readiness: This terminal is an open roadstead and therefore, during the time a ship is moored, the engines must be ready with full power for immediate use.

Vessels at berths must clear immediately upon advice of the Mooring Master or as directed by SUMED's terminal superintendent. Ship's personnel should be at their respective stations at all times during mooring, unmooring and cargo transfer operations.

Courtesy Flag: All vessels are required to fly A.R.E. Ensign on the foremast during daylight hours.

Quarantine Regulations: The rules governing quarantine regulations are the same as for Suez.

Unauthorised Craft: The presence of unauthorised craft alongside is extremely hazardous.

SUMED prohibits the boarding of individuals other than those authorised to do so in the bona fide conduct of the vessel's operation. No unauthorised person is allowed to board the vessel whether at anchorage or while moored.

Contraband: SUMED prohibits unauthorised craft from coming alongside vessels. To avoid the possibility of undesirable items getting aboard vessels, it is requested that Masters discourage craft coming alongside whilst the vessel is in the terminal.

AGENCY SERVICES: Not required under normal circumstances.

TIME: GMT plus 2 hours.

AUTHORITY: Arab Petroleum Pipeline Company (Sumed Un).

Headquarters: 9 Amin Yehia St., Zizinia, Alexandria. *Tel:* 61579, 64138, 64139. *Telex:* 54295, 54380 Sumed Un.

Central Operations: 16 Syria St., Roushdt, Alexandria. *Tel:* 42975, 43940, 44939. *Telex:* 54108, 54033 Sumed Un.

ALEXANDRIA (Including El Dekheila): 31.09 N. 29.53 E. (See Plan)

DOCUMENTS:

4 copies of Crew List.

Complete set of Manifests covering all cargo on board showing names of Shippers and Consignees.

4 copies List of Passengers in Transit.

Landing cards for passengers landing finally in A.R.E. and for those landing in A.R.E. in transit.

4 copies List of passengers finally landing in A.R.E. (if any) together with their addresses in A.R.E.

Deck log books showing date of last call at a A.R.E. port, completed up to the time of arrival.

For Quarantine: Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

For Immigration Officer:

Arrival Immigration Form, duly completed.

1 Passenger List.

List of Passengers Finally Landing, in duplicate.

Crew List.

Valid passport with entry visa is required for landing in A.R.E. for passengers landing. Emergency visa can be granted on arrival if so required.

For Customs Use:

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate.

PILOTAGE: Compulsory. Pilot boards off harbour entrance. International code signals used.

Vessels are not to proceed from the waiting area (Lat. 31° 12.6′ N., Long. 29° 44.5′ E. with radius of 1.5 miles) without a Pilot onboard.

RESTRICTIONS: Entrance channels 36 ft. depth, being dredged to 50 ft. Arriving vessels should keep 50 miles offshore between sunset and sunrise.

MAX. SIZE: Up to 32 ft. draft.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor. The Quarantine Doctor meets ships whilst entering the port and ships are boarded in turn.

In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at an A.R.E. port, the vessel is put under compulsory quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

(1) The vessel must be a regular liner known to the Quarantine Authorities and have a doctor on board.

(2) Details shown on the Quarantine Statement should be wirelessed to the Quarantine Authorities 24 hours prior to ship's arrival.

(3) Masters of vessels must declare before their arrival any accidents, which might have taken place on board prior to the arrival in port.

(4) The ship must not have called at any infected port.

RADIO: Alexandria Radio, call sign SUH, operating 24 hours daily on 444, 500 and 8578 kHz and between 0600 to 1800 GMT on 12,974 kHz. Also harbour VHF Channel 16.

TUGS: 5 tugs available up to 1,200 h.p.

BERTHING: Alongside quays in depths up to 34 ft.

Refrigerated cargoes should be direct delivery.

Ro/Ro facilities available.

Cement to silos and bagged in heavy cloth (no paper bags permitted).

Coal: Discharged at Berth Nos. 63 and 64. Max. draft 33 ft. 4×25 ton cranes. Rate 10,000 tonnes per day.

El Dekheila: Located 6 km. West of Alexandria and managed by Alexandria Port Authority.

Industrial Port: Access channel: Length 3.5 km. and depth 20.0 m. Turning circle: 750 m. diameter and 20.0 depth. Approach channel: Width 250 m., depth 20.0 m. One jetty (2 berths). Length 640 m. Depth alongside: Inner Berth 16.0 m. Outer Berth 20.0 m. Max. Size: 60,000 d.w.t. and 160,000 d.w.t. respectively. An additional berth to handle vessels up to 250,000 d.w.t. may be constructed later. 2×30 ton capacity grab cranes and 2 belt conveyors for handling iron ore pellet at 1,000 t.p.h. each (900 t.p.h. for coal). Port to be operational late 1986.

Commercial Port: Access channel 1.2 km. in length is a branch off the access channel to the industrial port. Depth of channel 14.0 m. Width 210 m. - 150 m. Commercial port will have over 1,500 m. of berthing space with 14.0 m. of water alongside. Port expected to be operational late 1987. Cargoes to be handled will include containers, general cargo, timber, chemicals and Ro/Ro vessels.

CONTAINER FACILITIES: Length 700 m., depth alongside 14.0 m. 2×32 tonne container gantry cranes, 2×32 tonne transtainers and 4×42 tonne forklifts.

TANKERS: Petroleum Basin: in West part of Outer Harbour, Berth Nos. 3 and 4, depth alongside 38 ft., max. length 700 ft., draft 34 ft. Berth Nos. 3 and 4: in East part of Outer Harbour. Stern to moorings.

It has been reported that tankers are required to take on ballast in excess of that deemed to be necessary by the Master, even in fine weather. One Master was ordered to bring his forward draft to 21 ft. Once the vessel was alongside a charge was made for deballasting the vessel.

FRESH WATER: Available by barge, and alongside most quays.

FUEL: Available by barge.

MEDICAL: All facilities available. International Vaccination Certificates required.

REPAIRS:

Alexandria Shipyard: Builds vessels up to 40,000 tons. One drydock capacity 85,000 d.w.t., cranes with up to 30 tons capacity. One drydock capacity 20,000 d.w.t., cranes with capacity up to 30 tons. Fully equipped engineering workshops capable of carrying out extensive repairs alongside quays length 1,200 m. Depth alongside 11 m.

Alexandria Ship Repair Co.: Ship repairs including engine repairs and boiler repair. Fully equipped workshops.

The Egyptian Shipbuilding and Repairs Co.: Floating dock for ships up to 12,000 d.w.t. 100 ton floating crane. All types of hull and machinery repairs possible.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Suez Canal".

DEVELOPMENTS: Grain elevator (Berth Nos. 81/82) to be constructed. Capacity 6,000 tonnes. Grain silo of 100,000 tonnes to be constructed. Completion mid-1985.

Control tower with radar and VHF being constructed.

Approach channel to be widened to 220 m. and deepened to 13 m.

Dekheila: See "Berthing".

SHIPMASTER'S REPORT: 1976

Approaches: Ships making the passage from Port Said to Alexandria are obliged to keep to the route laid down by the Egyptian Authorities. The coastline is rather featureless and a good operational radar is invaluable. Radar conspicuous objects were found to be – Ras el Barr Lighthouse and fort, forts numbers 2 & 4, the forts and lighthouses at Brulos and at Rosetta Mouth and also Nelson Island.

The anchorage can be identified from a considerable distance by the number of ships at anchor off the port – often more than fifty. The prohibited area marked on Chart No. 243 to the East of Great Pass is ignored and ships anchor as convenient but as near to the pilot ground as possible. Ras el Tin Lighthouse, Great Pass Beacon and the Minaret (248) were found to be good marks. There is a latticed beacon to the West of Great Pass Beacon which should not be confused with the latter. The new beacon is not marked on the chart and was stated by the Pilot to be for a new channel which is being constructed.

Arrival Procedure: It is important to register one's arrival with the Alexandria Port Control as soon as possible. This is done by means of VHF.

At 1100 hrs. (approx.) a traffic list is broadcast and ships mentioned should contact Port Control and obtain berthing instructions. They will probably be told to move in to the pilot boarding ground 2 miles N.W. of Great Pass Beacon. When there, they should anchor again and await either further instructions or the unannounced arrival of the Pilot.

Berthage is decided at a meeting held around Noon so there may be a supplementary traffic list around 1400 hrs. In any case, it is a good idea to call Port Control at least once a day to remind them that you are still awaiting a berth.

A Pilot will take the ship into the anchorage in the Outer Harbour where Health, Immigration etc. officials board and clearance given. The Agent may also board. The main radio transmitter is sealed at this time. The ship will then await allocation of a berth.

Anchorages: At the anchorage outside the port depths vary from 20 to 30 fathoms but the holding ground seems to be good. This ship lay comfortably with 7 shackles of cable out. Ships usually leave each other ample room in case of bad weather. There are good anchor bearings.

The anchorages inside the Outer and Inner Harbours are very congested and the holding ground (said to be sand) is not good. Time spent at anchor here can be a very anxious period.

The ship was anchored in the Inner Harbour just off the end of the Passenger Quay. When it was pointed out to the Pilot that, in the Master's opinion, she was too close to the 3 fathoms line at the old Aircraft Moorings, the Pilot stated that it would be all right because the ship wouldn't swing that way. If the vessel had swung the other way she would have gone aground.

At 0300 hrs. the following morning the ship began to swing onto the sand bank. Fortunately there was no wind and it was possible to turn her, weigh anchor and find another anchorage. A call to Port Control on VHF was made for a tug and Pilot but was not acknowledged.

Crude Oil Washing: COW is usually acceptable if the ship can maintain an average flow rate of no less than 7,400 tonnes/p.h. (100 p.s.i. at ship's rail throughout discharging). However, COW is subject to the terminal's approval depending on both operational circumstance and if this operation has been previously carried out by the vessel.

When vessel requests permission to perform COW the Master must respond in writing to the "Crude Oil Wash Checkoff List".

COW of slop tank is prohibited.

Crude Oil Wash (COW) – Checkoff List: Vessels requesting permission to perform crude oil wash while unloading at Ain Sukhna, are requested to respond to the following checkoff list:

Inert gas system is fully operational and tested.

Each tank will be positively pressurised and method of recording pressure will be available.

Each tank will be kept below 8% oxygen before and during operation.

Inert gas system flue gas oxygen content will be continuously monitored and maintained below 8% oxygen.

Oxygen alarm in cargo control room set to give visual indication when to abort crude washing.

Pressures in cargo tanks are available to vessel's control room personnel.

Washing systems have permanent steel pipework and will be pressure tested to 10 to 15 p.s.i. above expected working pressure but to minimum of 150 p.s.i. prior to use.

All tank openings are sealed and remote tank gauging system is operational.

All necessary throttling of discharge for crude spraying will be done on vessel's valves.

There is a responsible designate person in charge of operation. (Give name.)

Effective communication will be maintained between vessel and shore.

Water will not intrude into the crude wash cycle.

Washing to be commingled and discharged at the same time with the rest of the cargo.

Previous crude wash exprience of key personnel is (list).

Tanks crude washed last 2 voyages are (list).

Any additional vessel requirements or comments.

Emergency Communication: If ship-to-shore communication fails the ship's whistle shall be sounded continuously. Discharging shall be immediately stopped and will not be resumed until communications have been re-established.

Overside Lighting: During night discharging sufficient overside lighting must be provided to readily detect any oil spill so that immediate appropriate action may be taken.

International Code of Signals: During discharging operations the following signals shall be displayed:

By Day : The International Code flag "B".
By Night : A red light visible all round the horizon for distance of at least 2 miles.

Unloading Procedures: Upon being informed by the vessel's Master or responsible officer that the vessel is ready to start discharging, the Mooring Master will contact the Terminal Control Room to co-ordinate the commencement of unloading in accordance with the terminal's instructions.

The control room operator will normally give a "standby warning" by VHF approximately 10 minutes before the shore tanks are ready to receive cargo.

When the request to commence discharging is received the Mooring Master will ensure that discharging commences at slow speed. This starting procedure will always be adhered to.

Discharging will commence utilising 1 pump only with circulating system and when it has been confirmed that there is no significant rise in pressure on the discharging line which could indicate a blocked or closed valve on the shore or ship's discharging system, the crude oil will be discharged at the steady operating flow previously agreed upon.

Should there be any significant rise in pressure, discharging must be immediately stopped. The ship will be advised to check the on-board systems, take any necessary remedial steps and inform the terminal's control room.

At the same time the underwater and floating hoses should be checked to ensure that there are no obstructions.

Should the Master be requested to increase or decrease the cargo discharging rate this should be promptly implemented provided the vessel's pumps are capable of an increased rate.

SUMED may allow vessels to simultaneously ballast while unloading provided they are equipped to properly segregate the ballast and avoid any possible commingling with the cargo. Pumping ballast water into the sealine is strictly prohibited.

Any suspension and subsequent resumption of discharging of cargo must be logged both ashore and in the "Tanker Time Sheet".

All events regarding mooring, commencement, termination of unloading, stoppages, if any, and unmooring are both logged and recorded ashore at the terminal's control room as and when they are received from the Mooring Master.

These events shall jointly be logged in the Tanker Time Sheet by the vessel's Master and SUMED's Mooring Master.

Vacating Berth: Vessels shall vacate berth immediately after disconnection of hoses, allowing the least possible time to take ballast if essential for the safe manoeuvering of the vessel while vacating the berth.

Emergency Shut-Down: In case of emergency such as fire, sudden deterioration of sea and weather conditions, failure in ship to shore communications, etc, the discharging operations must be immediately suspended at the request of the Mooring Master. The ship's discharging pumps must be stopped immediately, the butterfly valves of the floating hoses and the manifold valves must be closed.

Depending upon the reasons causing the emergency, the ship's Master and Mooring Master will decide whether or not to disconnect the hoses and vacate the berth. In case of dispute the final decision will be taken by the Mooring Master.

Sampling: Representative samples of the cargo will be taken either from the vessel's cargo tanks or from the online automatic samplers.

The samples will be divided into 3 equal portions of about 1 gallon each, one portion will be handed to the quality control laboratory, the second to the ship's Master (sealed by SUMED) and the third retained by SUMED for 60 days (sealed by the Master).

The ship's Master will sign a receipt on receiving the ship's sealed and stamped container of the sample.

MEDICAL: Neither medical nor hospital facilities are provided by SUMED. In case urgent medical assistance is required the vessel should contact SUMED's Harbour Master by VHF radio. Private doctors and facilities are available at Suez.

REPAIRS: Masters of vessels discharging at Ain Sukhna Terminal are instructed that under no circumstances may engines be shutdown for repairs whilst their vessel is moored to the SBMs. There are no facilities at Ain Sukhna Terminal for repairs. Repair facilities are available at Suez.

It is emphasised that all vessels at the SBMs must be prepared to clear immediately on instructions from the Mooring Master.

CONSULS: Consular or diplomatic representatives for most maritime nations are in Cairo.

REPATRIATION: Crew changes are only permitted in cases of emergency.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at Terminal.

WEATHER:

Climate: The climate in the Ain Sukhna area is generally good. Summers are hot and dry and winters are relatively cool.

The visibility is usually excellent with few sand storms and infrequent fog. Sub-zero temperatures are unknown and there are very few rain squalls.

Summary of Weather Statistics (1884 – 1967):

Average rainfall year	0.8 in.
Mean maximum temperature	84°F (29°C)
Mean minimum temperature	62°F (16.7°C)
Extreme maximum temperature	111°F (44°C)
Extreme minimum temperature	35°F (1.7°C)
Average relative humidity	60%

Winds: The prevailing winds at Ain Sukhna are from the N.W. throughout the year.

Navigation: When entering, manoeuvering or leaving the Port Limits of Ain Sukhna, the Master has to conform with the conditions setforth in this Manual and has to adhere to the 1972 International Regulations for preventing Collisions at Sea which will be complied with at all times.

The Master guarantees that his vessel fulfils all navigational and worthiness conditions in particular those required for vessels carrying dangerous cargo, (crude oil) in accordance with the provisions setforth in the Appendix for vessels carrying Dangerous cargo annexed to Rules of Navigation of the Suez Canal Authority to the extent that such provisions are applicable.

Master should submit the respective certificate and declarations whenever required in this respect.

Helicopters (available in emergencies): Should the services of a helicopter be required by SUMED for any purposes whatsoever the vessel will be given a minimum of 30 minutes warning notice before the helicopter's approach in order that cargo operations can be stopped and all tanks and vents closed.

A responsible officer should be on deck to assist the helicopter in making the approach to the vessel. Although the safety of the helicopter remains at all times the responsibility of its pilot, helicopter services shall not be employed in any event without the express prior consent of Shipper and vessel's Master.

Supplies: Stores and supplies are available through an Agent and can be delivered from Suez to Ain Sukhna anchorage area after unloading but entirely at the vessel's own risk.

Government Officials: A.R.E. officials, such as Customs Director, Quarantine Officer and Immigration Officer are stationed at Ain Sukhna. Should Customs guards be stationed on board vessels whilst moored it is expected that vessels will extend all courtesies to them and or other officials while on board.

Ship's Readiness: This terminal is an open roadstead and therefore, during the time a ship is moored, the engines must be ready with full power for immediate use.

Vessels at berths must clear immediately upon advice of the Mooring Master or as directed by SUMED's terminal superintendent. Ship's personnel should be at their respective stations at all times during mooring, unmooring and cargo transfer operations.

Courtesy Flag: All vessels are required to fly A.R.E. Ensign on the foremast during daylight hours.

Quarantine Regulations: The rules governing quarantine regulations are the same as for Suez.

Unauthorised Craft: The presence of unauthorised craft alongside is extremely hazardous.

SUMED prohibits the boarding of individuals other than those authorised to do so in the bona fide conduct of the vessel's operation. No unauthorised person is allowed to board the vessel whether at anchorage or while moored.

Contraband: SUMED prohibits unauthorised craft from coming alongside vessels. To avoid the possibility of undesirable items getting aboard vessels, it is requested that Masters discourage craft coming alongside whilst the vessel is in the terminal.

AGENCY SERVICES: Not required under normal circumstances.

TIME: GMT plus 2 hours.

AUTHORITY: Arab Petroleum Pipeline Company (Sumed Un).

Headquarters: 9 Amin Yehia St., Zizinia, Alexandria. *Tel:* 61579, 64138, 64139. *Telex:* 54295, 54380 Sumed Un.

Central Operations: 16 Syria St., Roushdt, Alexandria. *Tel:* 42975, 43940, 44939. *Telex:* 54108, 54033 Sumed Un.

ALEXANDRIA (Including El Dekheila): 31.09 N. 29.53 E. (See Plan)

DOCUMENTS:

4 copies of Crew List.

Complete set of Manifests covering all cargo on board showing names of Shippers and Consignees.

4 copies List of Passengers in Transit.

Landing cards for passengers landing finally in A.R.E. and for those landing in A.R.E. in transit.

4 copies List of passengers finally landing in A.R.E. (if any) together with their addresses in A.R.E.

Deck log books showing date of last call at a A.R.E. port, completed up to the time of arrival.

For Quarantine: Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

For Immigration Officer:

Arrival Immigration Form, duly completed.

1 Passenger List.

List of Passengers Finally Landing, in duplicate.

Crew List.

Valid passport with entry visa is required for landing in A.R.E. for passengers landing. Emergency visa can be granted on arrival if so required.

For Customs Use:

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate.

PILOTAGE: Compulsory. Pilot boards off harbour entrance. International code signals used.

Vessels are not to proceed from the waiting area (Lat. 31° 12.6′ N., Long. 29° 44.5′ E. with radius of 1.5 miles) without a Pilot onboard.

RESTRICTIONS: Entrance channels 36 ft. depth, being dredged to 50 ft. Arriving vessels should keep 50 miles offshore between sunset and sunrise.

MAX. SIZE: Up to 32 ft. draft.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor. The Quarantine Doctor meets ships whilst entering the port and ships are boarded in turn.

In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at an A.R.E. port, the vessel is put under compulsory quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

(1) The vessel must be a regular liner known to the Quarantine Authorities and have a doctor on board.

(2) Details shown on the Quarantine Statement should be wirelessed to the Quarantine Authorities 24 hours prior to ship's arrival.

(3) Masters of vessels must declare before their arrival any accidents, which might have taken place on board prior to the arrival in port.

(4) The ship must not have called at any infected port.

RADIO: Alexandria Radio, call sign SUH, operating 24 hours daily on 444, 500 and 8578 kHz and between 0600 to 1800 GMT on 12,974 kHz. Also harbour VHF Channel 16.

TUGS: 5 tugs available up to 1,200 h.p.

BERTHING: Alongside quays in depths up to 34 ft.

Refrigerated cargoes should be direct delivery.

Ro/Ro facilities available.

Cement to silos and bagged in heavy cloth (no paper bags permitted).

Coal: Discharged at Berth Nos. 63 and 64. Max. draft 33 ft. 4×25 ton cranes. Rate 10,000 tonnes per day.

El Dekheila: Located 6 km. West of Alexandria and managed by Alexandria Port Authority.

Industrial Port: Access channel: Length 3.5 km. and depth 20.0 m. Turning circle: 750 m. diameter and 20.0 depth. Approach channel: Width 250 m., depth 20.0 m. One jetty (2 berths). Length 640 m. Depth alongside: Inner Berth 16.0 m. Outer Berth 20.0 m. Max. Size: 60,000 d.w.t. and 160,000 d.w.t. respectively. An additional berth to handle vessels up to 250,000 d.w.t. may be constructed later. 2×30 ton capacity grab cranes and 2 belt conveyors for handling iron ore pellet at 1,000 t.p.h. each (900 t.p.h. for coal). Port to be operational late 1986.

Commercial Port: Access channel 1.2 km. in length is a branch off the access channel to the industrial port. Depth of channel 14.0 m. Width 210 m. - 150 m. Commercial port will have over 1,500 m. of berthing space with 14.0 m. of water alongside. Port expected to be operational late 1987. Cargoes to be handled will include containers, general cargo, timber, chemicals and Ro/Ro vessels.

CONTAINER FACILITIES: Length 700 m., depth alongside 14.0 m. 2×32 tonne container gantry cranes, 2×32 tonne transtainers and 4×42 tonne forklifts.

TANKERS: Petroleum Basin: in West part of Outer Harbour, Berth Nos. 3 and 4, depth alongside 38 ft., max. length 700 ft., draft 34 ft. Berth Nos. 3 and 4: in East part of Outer Harbour. Stern to moorings.

It has been reported that tankers are required to take on ballast in excess of that deemed to be necessary by the Master, even in fine weather. One Master was ordered to bring his forward draft to 21 ft. Once the vessel was alongside a charge was made for deballasting the vessel.

FRESH WATER: Available by barge, and alongside most quays.

FUEL: Available by barge.

MEDICAL: All facilities available. International Vaccination Certificates required.

REPAIRS:

Alexandria Shipyard: Builds vessels up to 40,000 tons. One drydock capacity 85,000 d.w.t., cranes with up to 30 tons capacity. One drydock capacity 20,000 d.w.t., cranes with capacity up to 30 tons. Fully equipped engineering workshops capable of carrying out extensive repairs alongside quays length 1,200 m. Depth alongside 11 m.

Alexandria Ship Repair Co.: Ship repairs including engine repairs and boiler repair. Fully equipped workshops.

The Egyptian Shipbuilding and Repairs Co.: Floating dock for ships up to 12,000 d.w.t. 100 ton floating crane. All types of hull and machinery repairs possible.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Suez Canal".

DEVELOPMENTS: Grain elevator (Berth Nos. 81/82) to be constructed. Capacity 6,000 tonnes. Grain silo of 100,000 tonnes to be constructed. Completion mid-1985.

Control tower with radar and VHF being constructed.

Approach channel to be widened to 220 m. and deepened to 13 m.

Dekheila: See "Berthing".

SHIPMASTER'S REPORT: 1976

Approaches: Ships making the passage from Port Said to Alexandria are obliged to keep to the route laid down by the Egyptian Authorities. The coastline is rather featureless and a good operational radar is invaluable. Radar conspicuous objects were found to be – Ras el Barr Lighthouse and fort, forts numbers 2 & 4, the forts and lighthouses at Brulos and at Rosetta Mouth and also Nelson Island.

The anchorage can be identified from a considerable distance by the number of ships at anchor off the port – often more than fifty. The prohibited area marked on Chart No. 243 to the East of Great Pass is ignored and ships anchor as convenient but as near to the pilot ground as possible. Ras el Tin Lighthouse, Great Pass Beacon and the Minaret (248) were found to be good marks. There is a latticed beacon to the West of Great Pass Beacon which should not be confused with the latter. The new beacon is not marked on the chart and was stated by the Pilot to be for a new channel which is being constructed.

Arrival Procedure: It is important to register one's arrival with the Alexandria Port Control as soon as possible. This is done by means of VHF.

At 1100 hrs. (approx.) a traffic list is broadcast and ships mentioned should contact Port Control and obtain berthing instructions. They will probably be told to move in to the pilot boarding ground 2 miles N.W. of Great Pass Beacon. When there, they should anchor again and await either further instructions or the unannounced arrival of the Pilot.

Berthage is decided at a meeting held around Noon so there may be a supplementary traffic list around 1400 hrs. In any case, it is a good idea to call Port Control at least once a day to remind them that you are still awaiting a berth.

A Pilot will take the ship into the anchorage in the Outer Harbour where Health, Immigration etc. officials board and clearance given. The Agent may also board. The main radio transmitter is sealed at this time. The ship will then await allocation of a berth.

Anchorages: At the anchorage outside the port depths vary from 20 to 30 fathoms but the holding ground seems to be good. This ship lay comfortably with 7 shackles of cable out. Ships usually leave each other ample room in case of bad weather. There are good anchor bearings.

The anchorages inside the Outer and Inner Harbours are very congested and the holding ground (said to be sand) is not good. Time spent at anchor here can be a very anxious period.

The ship was anchored in the Inner Harbour just off the end of the Passenger Quay. When it was pointed out to the Pilot that, in the Master's opinion, she was too close to the 3 fathoms line at the old Aircraft Moorings, the Pilot stated that it would be all right because the ship wouldn't swing that way. If the vessel had swung the other way she would have gone aground.

At 0300 hrs. the following morning the ship began to swing onto the sand bank. Fortunately there was no wind and it was possible to turn her, weigh anchor and find another anchorage. A call to Port Control on VHF was made for a tug and Pilot but was not acknowledged.

Crude Oil Washing: COW is usually acceptable if the ship can maintain an average flow rate of no less than 7,400 tonnes/p.h. (100 p.s.i. at ship's rail throughout discharging). However, COW is subject to the terminal's approval depending on both operational circumstance and if this operation has been previously carried out by the vessel.

When vessel requests permission to perform COW the Master must respond in writing to the "Crude Oil Wash Checkoff List".

COW of slop tank is prohibited.

Crude Oil Wash (COW) – Checkoff List: Vessels requesting permission to perform crude oil wash while unloading at Ain Sukhna, are requested to respond to the following checkoff list:

Inert gas system is fully operational and tested.

Each tank will be positively pressurised and method of recording pressure will be available.

Each tank will be kept below 8% oxygen before and during operation.

Inert gas system flue gas oxygen content will be continuously monitored and maintained below 8% oxygen.

Oxygen alarm in cargo control room set to give visual indication when to abort crude washing.

Pressures in cargo tanks are available to vessel's control room personnel.

Washing systems have permanent steel pipework and will be pressure tested to 10 to 15 p.s.i. above expected working pressure but to minimum of 150 p.s.i. prior to use.

All tank openings are sealed and remote tank gauging system is operational.

All necessary throttling of discharge for crude spraying will be done on vessel's valves.

There is a responsible designate person in charge of operation. (Give name.)

Effective communication will be maintained between vessel and shore.

Water will not intrude into the crude wash cycle.

Washing to be commingled and discharged at the same time with the rest of the cargo.

Previous crude wash exprience of key personnel is (list).

Tanks crude washed last 2 voyages are (list).

Any additional vessel requirements or comments.

Emergency Communication: If ship-to-shore communication fails the ship's whistle shall be sounded continuously. Discharging shall be immediately stopped and will not be resumed until communications have been re-established.

Overside Lighting: During night discharging sufficient overside lighting must be provided to readily detect any oil spill so that immediate appropriate action may be taken.

International Code of Signals: During discharging operations the following signals shall be displayed:

By Day	: The International Code flag "B".
By Night	: A red light visible all round the horizon for distance of at least 2 miles.

Unloading Procedures: Upon being informed by the vessel's Master or responsible officer that the vessel is ready to start discharging, the Mooring Master will contact the Terminal Control Room to co-ordinate the commencement of unloading in accordance with the terminal's instructions.

The control room operator will normally give a "standby warning" by VHF approximately 10 minutes before the shore tanks are ready to receive cargo.

When the request to commence discharging is received the Mooring Master will ensure that discharging commences at slow speed. This starting procedure will always be adhered to.

Discharging will commence utilising 1 pump only with circulating system and when it has been confirmed that there is no significant rise in pressure on the discharging line which could indicate a blocked or closed valve on the shore or ship's discharging system, the crude oil will be discharged at the steady operating flow previously agreed upon.

Should there be any significant rise in pressure, discharging must be immediately stopped. The ship will be advised to check the on-board systems, take any necessary remedial steps and inform the terminal's control room.

At the same time the underwater and floating hoses should be checked to ensure that there are no obstructions.

Should the Master be requested to increase or decrease the cargo discharging rate this should be promptly implemented provided the vessel's pumps are capable of an increased rate.

SUMED may allow vessels to simultaneously ballast while unloading provided they are equipped to properly segregate the ballast and avoid any possible commingling with the cargo. Pumping ballast water into the sealine is strictly prohibited.

Any suspension and subsequent resumption of discharging of cargo must be logged both ashore and in the "Tanker Time Sheet".

All events regarding mooring, commencement, termination of unloading, stoppages, if any, and unmooring are both logged and recorded ashore at the terminal's control room as and when they are received from the Mooring Master.

These events shall jointly be logged in the Tanker Time Sheet by the vessel's Master and SUMED's Mooring Master.

Vacating Berth: Vessels shall vacate berth immediately after disconnection of hoses, allowing the least possible time to take ballast if essential for the safe manoeuvering of the vessel while vacating the berth.

Emergency Shut-Down: In case of emergency such as fire, sudden deterioration of sea and weather conditions, failure in ship to shore communications, etc, the discharging operations must be immediately suspended at the request of the Mooring Master. The ship's discharging pumps must be stopped immediately, the butterfly valves of the floating hoses and the manifold valves must be closed.

Depending upon the reasons causing the emergency, the ship's Master and Mooring Master will decide whether or not to disconnect the hoses and vacate the berth. In case of dispute the final decision will be taken by the Mooring Master.

Sampling: Representative samples of the cargo will be taken either from the vessel's cargo tanks or from the online automatic samplers.

The samples will be divided into 3 equal portions of about 1 gallon each, one portion will be handed to the quality control laboratory, the second to the ship's Master (sealed by SUMED) and the third retained by SUMED for 60 days (sealed by the Master).

The ship's Master will sign a receipt on receiving the ship's sealed and stamped container of the sample.

MEDICAL: Neither medical nor hospital facilities are provided by SUMED. In case urgent medical assistance is required the vessel should contact SUMED's Harbour Master by VHF radio. Private doctors and facilities are available at Suez.

REPAIRS: Masters of vessels discharging at Ain Sukhna Terminal are instructed that under no circumstances may engines be shutdown for repairs whilst their vessel is moored to the SBMs. There are no facilities at Ain Sukhna Terminal for repairs. Repair facilities are available at Suez.

It is emphasised that all vessels at the SBMs must be prepared to clear immediately on instructions from the Mooring Master.

CONSULS: Consular or diplomatic representatives for most maritime nations are in Cairo.

REPATRIATION: Crew changes are only permitted in cases of emergency.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at Terminal.

WEATHER:

Climate: The climate in the Ain Sukhna area is generally good. Summers are hot and dry and winters are relatively cool.

The visibility is usually excellent with few sand storms and infrequent fog. Sub-zero temperatures are unknown and there are very few rain squalls.

Summary of Weather Statistics (1884 – 1967):

Average rainfall year	0.8 in.
Mean maximum temperature	84°F (29°C)
Mean minimum temperature	62°F (16.7°C)
Extreme maximum temperature	111°F (44°C)
Extreme minimum temperature	35°F (1.7°C)
Average relative humidity	60%

Winds: The prevailing winds at Ain Sukhna are from the N.W. throughout the year.

Tides: The tidal range is up to a maximum of 7.4 ft.

Waves: The estimated characteristics of the 100 year extreme waves are:

Maximum height	12.0 ft. (3.7 m.)
Maximum crest elevation	11.0 ft. (3.3 m.)
Period	7.5 secs.
Length	280 ft. (85 m.)
Speed	22 knots (41 km./hr.)
Direction from	North

Tidal Streams: At Ain Sukhna the tidal streams set parallel to the coast line Northwards on the flood tide and parallel to the coast Southwards on the ebb tide. Maximum rate is 0.5 knots (0.9 km./hr.) at the surface.

Currents: There is no fixed current in this area and any flow is caused entirely by the prevailing tidal stream and winds.

Sea Salinity: The Red Sea and Gulf are extremely saline and salinity is around 40,000/50,000 parts per million.

Sea Temperature: The surface temperature of the sea ranges between 66°F (19°C) in February and 80°F (26.7°C) in August.

GENERAL:

Navigation: When entering, manoeuvering or leaving the Port Limits of Ain Sukhna, the Master has to conform with the conditions setforth in this Manual and has to adhere to the 1972 International Regulations for preventing Collisions at Sea which will be complied with at all times.

The Master guarantees that his vessel fulfils all navigational and worthiness conditions in particular those required for vessels carrying dangerous cargo, (crude oil) in accordance with the provisions setforth in the Appendix for vessels carrying Dangerous cargo annexed to Rules of Navigation of the Suez Canal Authority to the extent that such provisions are applicable.

Master should submit the respective certificate and declarations whenever required in this respect.

Helicopters (available in emergencies): Should the services of a helicopter be required by SUMED for any purposes whatsoever the vessel will be given a minimum of 30 minutes warning notice before the helicopter's approach in order that cargo operations can be stopped and all tanks and vents closed.

A responsible officer should be on deck to assist the helicopter in making the approach to the vessel. Although the safety of the helicopter remains at all times the responsibility of its pilot, helicopter services shall not be employed in any event without the express prior consent of Shipper and vessel's Master.

Supplies: Stores and supplies are available through an Agent and can be delivered from Suez to Ain Sukhna anchorage area after unloading but entirely at the vessel's own risk.

Government Officials: A.R.E. officials, such as Customs Director, Quarantine Officer and Immigration Officer are stationed at Ain Sukhna. Should Customs guards be stationed on board vessels whilst moored it is expected that vessels will extend all courtesies to them and or other officials while on board.

Ship's Readiness: This terminal is an open roadstead and therefore, during the time a ship is moored, the engines must be ready with full power for immediate use.

Vessels at berths must clear immediately upon advice of the Mooring Master or as directed by SUMED's terminal superintendent. Ship's personnel should be at their respective stations at all times during mooring, unmooring and cargo transfer operations.

Courtesy Flag: All vessels are required to fly A.R.E. Ensign on the foremast during daylight hours.

Quarantine Regulations: The rules governing quarantine regulations are the same as for Suez.

Unauthorised Craft: The presence of unauthorised craft alongside is extremely hazardous.

SUMED prohibits the boarding of individuals other than those authorised to do so in the bona fide conduct of the vessel's operation. No unauthorised person is allowed to board the vessel whether at anchorage or while moored.

Contraband: SUMED prohibits unauthorised craft from coming alongside vessels. To avoid the possibility of undesirable items getting aboard vessels, it is requested that Masters discourage craft coming alongside whilst the vessel is in the terminal.

AGENCY SERVICES: Not required under normal circumstances.

TIME: GMT plus 2 hours.

ALEXANDRIA (Including El Dekheila): 31.09 N. 29.53 E. (See Plan)

DOCUMENTS:

4 copies of Crew List.

Complete set of Manifests covering all cargo on board showing names of Shippers and Consignees.

4 copies List of Passengers in Transit.

Landing cards for passengers landing finally in A.R.E. and for those landing in A.R.E. in transit.

4 copies List of passengers finally landing in A.R.E. (if any) together with their addresses in A.R.E.

Deck log books showing date of last call at a A.R.E. port, completed up to the time of arrival.

For Quarantine: Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

For Immigration Officer:

Arrival Immigration Form, duly completed.

1 Passenger List.

List of Passengers Finally Landing, in duplicate.

Crew List.

Valid passport with entry visa is required for landing in A.R.E. for passengers landing. Emergency visa can be granted on arrival if so required.

For Customs Use:

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate.

PILOTAGE: Compulsory. Pilot boards off harbour entrance. International code signals used.

Vessels are not to proceed from the waiting area (Lat. 31° 12.6′ N., Long. 29° 44.5′ E. with radius of 1.5 miles) without a Pilot onboard.

RESTRICTIONS: Entrance channels 36 ft. depth, being dredged to 50 ft. Arriving vessels should keep 50 miles offshore between sunset and sunrise.

MAX. SIZE: Up to 32 ft. draft.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor. The Quarantine Doctor meets ships whilst entering the port and ships are boarded in turn.

In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at an A.R.E. port, the vessel is put under compulsory quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

(1) The vessel must be a regular liner known to the Quarantine Authorities and have a doctor on board.

(2) Details shown on the Quarantine Statement should be wirelessed to the Quarantine Authorities 24 hours prior to ship's arrival.

(3) Masters of vessels must declare before their arrival any accidents, which might have taken place on board prior to the arrival in port.

(4) The ship must not have called at any infected port.

RADIO: Alexandria Radio, call sign SUH, operating 24 hours daily on 444, 500 and 8578 kHz and between 0600 to 1800 GMT on 12,974 kHz. Also harbour VHF Channel 16.

TUGS: 5 tugs available up to 1,200 h.p.

BERTHING: Alongside quays in depths up to 34 ft.

Refrigerated cargoes should be direct delivery.

Ro/Ro facilities available.

Cement to silos and bagged in heavy cloth (no paper bags permitted).

Coal: Discharged at Berth Nos. 63 and 64. Max. draft 33 ft. 4×25 ton cranes. Rate 10,000 tonnes per day.

El Dekheila: Located 6 km. West of Alexandria and managed by Alexandria Port Authority.

Industrial Port: Access channel: Length 3.5 km. and depth 20.0 m. Turning circle: 750 m. diameter and 20.0 depth. Approach channel: Width 250 m., depth 20.0 m. One jetty (2 berths). Length 640 m. Depth alongside: Inner Berth 16.0 m. Outer Berth 20.0 m. Max. Size: 60,000 d.w.t. and 160,000 d.w.t. respectively. An additional berth to handle vessels up to 250,000 d.w.t. may be constructed later. 2×30 ton capacity grab cranes and 2 belt conveyors for handling iron ore pellet at 1,000 t.p.h. each (900 t.p.h. for coal). Port to be operational late 1986.

Commercial Port: Access channel 1.2 km. in length is a branch off the access channel to the industrial port. Depth of channel 14.0 m. Width 210 m. - 150 m. Commercial port will have over 1,500 m. of berthing space with 14.0 m. of water alongside. Port expected to be operational late 1987. Cargoes to be handled will include containers, general cargo, timber, chemicals and Ro/Ro vessels.

CONTAINER FACILITIES: Length 700 m., depth alongside 14.0 m. 2×32 tonne container gantry cranes, 2×32 tonne transtainers and 4×42 tonne forklifts.

TANKERS: Petroleum Basin: in West part of Outer Harbour, Berth Nos. 3 and 4, depth alongside 38 ft., max. length 700 ft., draft 34 ft. Berth Nos. 3 and 4: in East part of Outer Harbour. Stern to moorings.

It has been reported that tankers are required to take on ballast in excess of that deemed to be necessary by the Master, even in fine weather. One Master was ordered to bring his forward draft to 21 ft. Once the vessel was alongside a charge was made for deballasting the vessel.

FRESH WATER: Available by barge, and alongside most quays.

FUEL: Available by barge.

MEDICAL: All facilities available. International Vaccination Certificates required.

REPAIRS:

Alexandria Shipyard: Builds vessels up to 40,000 tons. One drydock capacity 85,000 d.w.t., cranes with up to 30 tons capacity. One drydock capacity 20,000 d.w.t., cranes with capacity up to 30 tons. Fully equipped engineering workshops capable of carrying out extensive repairs alongside quays length 1,200 m. Depth alongside 11 m.

Alexandria Ship Repair Co.: Ship repairs including engine repairs and boiler repair. Fully equipped workshops.

The Egyptian Shipbuilding and Repairs Co.: Floating dock for ships up to 12,000 d.w.t. 100 ton floating crane. All types of hull and machinery repairs possible.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Suez Canal".

DEVELOPMENTS: Grain elevator (Berth Nos. 81/82) to be constructed. Capacity 6,000 tonnes. Grain silo of 100,000 tonnes to be constructed. Completion mid-1985.

Control tower with radar and VHF being constructed.

Approach channel to be widened to 220 m. and deepened to 13 m.

Dekheila: See "Berthing".

SHIPMASTER'S REPORT: 1976

Approaches: Ships making the passage from Port Said to Alexandria are obliged to keep to the route laid down by the Egyptian Authorities. The coastline is rather featureless and a good operational radar is invaluable. Radar conspicuous objects were found to be – Ras el Barr Lighthouse and fort, forts numbers 2 & 4, the forts and lighthouses at Brulos and at Rosetta Mouth and also Nelson Island.

The anchorage can be identified from a considerable distance by the number of ships at anchor off the port – often more than fifty. The prohibited area marked on Chart No. 243 to the East of Great Pass is ignored and ships anchor as convenient but as near to the pilot ground as possible. Ras el Tin Lighthouse, Great Pass Beacon and the Minaret (248) were found to be good marks. There is a latticed beacon to the West of Great Pass Beacon which should not be confused with the latter. The new beacon is not marked on the chart and was stated by the Pilot to be for a new channel which is being constructed.

Arrival Procedure: It is important to register one's arrival with the Alexandria Port Control as soon as possible. This is done by means of VHF.

At 1100 hrs. (approx.) a traffic list is broadcast and ships mentioned should contact Port Control and obtain berthing instructions. They will probably be told to move in to the pilot boarding ground 2 miles N.W. of Great Pass Beacon. When there, they should anchor again and await either further instructions or the unannounced arrival of the Pilot.

Berthage is decided at a meeting held around Noon so there may be a supplementary traffic list around 1400 hrs. In any case, it is a good idea to call Port Control at least once a day to remind them that you are still awaiting a berth.

A Pilot will take the ship into the anchorage in the Outer Harbour where Health, Immigration etc. officials board and clearance given. The Agent may also board. The main radio transmitter is sealed at this time. The ship will then await allocation of a berth.

Anchorages: At the anchorage outside the port depths vary from 20 to 30 fathoms but the holding ground seems to be good. This ship lay comfortably with 7 shackles of cable out. Ships usually leave each other ample room in case of bad weather. There are good anchor bearings.

The anchorages inside the Outer and Inner Harbours are very congested and the holding ground (said to be sand) is not good. Time spent at anchor here can be a very anxious period.

The ship was anchored in the Inner Harbour just off the end of the Passenger Quay. When it was pointed out to the Pilot that, in the Master's opinion, she was too close to the 3 fathoms line at the old Aircraft Moorings, the Pilot stated that it would be all right because the ship wouldn't swing that way. If the vessel had swung the other way she would have gone aground.

At 0300 hrs. the following morning the ship began to swing onto the sand bank. Fortunately there was no wind and it was possible to turn her, weigh anchor and find another anchorage. A call to Port Control on VHF was made for a tug and Pilot but was not acknowledged.

Crude Oil Washing: COW is usually acceptable if the ship can maintain an average flow rate of no less than 7,400 tonnes/p.h. (100 p.s.i. at ship's rail throughout discharging). However, COW is subject to the terminal's approval depending on both operational circumstance and if this operation has been previously carried out by the vessel.

When vessel requests permission to perform COW the Master must respond in writing to the "Crude Oil Wash Checkoff List".

COW of slop tank is prohibited.

Crude Oil Wash (COW) – Checkoff List: Vessels requesting permission to perform crude oil wash while unloading at Ain Sukhna, are requested to respond to the following checkoff list:

Inert gas system is fully operational and tested.

Each tank will be positively pressurised and method of recording pressure will be available.

Each tank will be kept below 8% oxygen before and during operation.

Inert gas system flue gas oxygen content will be continuously monitored and maintained below 8% oxygen.

Oxygen alarm in cargo control room set to give visual indication when to abort crude washing.

Pressures in cargo tanks are available to vessel's control room personnel.

Washing systems have permanent steel pipework and will be pressure tested to 10 to 15 p.s.i. above expected working pressure but to minimum of 150 p.s.i. prior to use.

All tank openings are sealed and remote tank gauging system is operational.

All necessary throttling of discharge for crude spraying will be done on vessel's valves.

There is a responsible designate person in charge of operation. (Give name.)

Effective communication will be maintained between vessel and shore.

Water will not intrude into the crude wash cycle.

Washing to be commingled and discharged at the same time with the rest of the cargo.

Previous crude wash exprience of key personnel is (list).

Tanks crude washed last 2 voyages are (list).

Any additional vessel requirements or comments.

Emergency Communication: If ship-to-shore communication fails the ship's whistle shall be sounded continuously. Discharging shall be immediately stopped and will not be resumed until communications have been re-established.

Overside Lighting: During night discharging sufficient overside lighting must be provided to readily detect any oil spill so that immediate appropriate action may be taken.

International Code of Signals: During discharging operations the following signals shall be displayed:

By Day : The International Code flag "B".
By Night : A red light visible all round the horizon for distance of at least 2 miles.

Unloading Procedures: Upon being informed by the vessel's Master or responsible officer that the vessel is ready to start discharging, the Mooring Master will contact the Terminal Control Room to co-ordinate the commencement of unloading in accordance with the terminal's instructions.

The control room operator will normally give a "standby warning" by VHF approximately 10 minutes before the shore tanks are ready to receive cargo.

When the request to commence discharging is received the Mooring Master will ensure that discharging commences at slow speed. This starting procedure will always be adhered to.

Discharging will commence utilising 1 pump only with circulating system and when it has been confirmed that there is no significant rise in pressure on the discharging line which could indicate a blocked or closed valve on the shore or ship's discharging system, the crude oil will be discharged at the steady operating flow previously agreed upon.

Should there be any significant rise in pressure, discharging must be immediately stopped. The ship will be advised to check the on-board systems, take any necessary remedial steps and inform the terminal's control room.

At the same time the underwater and floating hoses should be checked to ensure that there are no obstructions.

Should the Master be requested to increase or decrease the cargo discharging rate this should be promptly implemented provided the vessel's pumps are capable of an increased rate.

SUMED may allow vessels to simultaneously ballast while unloading provided they are equipped to properly segregate the ballast and avoid any possible commingling with the cargo. Pumping ballast water into the sealine is strictly prohibited.

Any suspension and subsequent resumption of discharging of cargo must be logged both ashore and in the "Tanker Time Sheet".

All events regarding mooring, commencement, termination of unloading, stoppages, if any, and unmooring are both logged and recorded ashore at the terminal's control room as and when they are received from the Mooring Master.

These events shall jointly be logged in the Tanker Time Sheet by the vessel's Master and SUMED's Mooring Master.

Vacating Berth: Vessels shall vacate berth immediately after disconnection of hoses, allowing the least possible time to take ballast if essential for the safe manoeuvering of the vessel while vacating the berth.

Emergency Shut-Down: In case of emergency such as fire, sudden deterioration of sea and weather conditions, failure in ship to shore communications, etc, the discharging operations must be immediately suspended at the request of the Mooring Master. The ship's discharging pumps must be stopped immediately, the butterfly valves of the floating hoses and the manifold valves must be closed.

Depending upon the reasons causing the emergency, the ship's Master and Mooring Master will decide whether or not to disconnect the hoses and vacate the berth. In case of dispute the final decision will be taken by the Mooring Master.

Sampling: Representative samples of the cargo will be taken either from the vessel's cargo tanks or from the online automatic samplers.

The samples will be divided into 3 equal portions of about 1 gallon each, one portion will be handed to the quality control laboratory, the second to the ship's Master (sealed by SUMED) and the third retained by SUMED for 60 days (sealed by the Master).

The ship's Master will sign a receipt on receiving the ship's sealed and stamped container of the sample.

MEDICAL: Neither medical nor hospital facilities are provided by SUMED. In case urgent medical assistance is required the vessel should contact SUMED's Harbour Master by VHF radio. Private doctors and facilities are available at Suez.

REPAIRS: Masters of vessels discharging at Ain Sukhna Terminal are instructed that under no circumstances may engines be shutdown for repairs whilst their vessel is moored to the SBMs. There are no facilities at Ain Sukhna Terminal for repairs. Repair facilities are available at Suez.

It is emphasised that all vessels at the SBMs must be prepared to clear immediately on instructions from the Mooring Master.

CONSULS: Consular or diplomatic representatives for most maritime nations are in Cairo.

REPATRIATION: Crew changes are only permitted in cases of emergency.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at Terminal.

WEATHER:

Climate: The climate in the Ain Sukhna area is generally good. Summers are hot and dry and winters are relatively cool.

The visibility is usually excellent with few sand storms and infrequent fog. Sub-zero temperatures are unknown and there are very few rain squalls.

Summary of Weather Statistics (1884 – 1967):

Average rainfall year	0.8 in.
Mean maximum temperature	84°F (29°C)
Mean minimum temperature	62°F (16.7°C)
Extreme maximum temperature	111°F (44°C)
Extreme minimum temperature	35°F (1.7°C)
Average relative humidity	60%

Winds: The prevailing winds at Ain Sukhna are from the N.W. throughout the year.

Tides: The tidal range is up to a maximum of 7.4 ft.

Waves: The estimated characteristics of the 100 year extreme waves are:

Maximum height	12.0 ft. (3.7 m.)
Maximum crest elevation	11.0 ft. (3.3 m.)
Period	7.5 secs.
Length	280 ft. (85 m.)
Speed	22 knots (41 km./hr.)
Direction from	North

Tidal Streams: At Ain Sukhna the tidal streams set parallel to the coast line Northwards on the flood tide and parallel to the coast Southwards on the ebb tide. Maximum rate is 0.5 knots (0.9 km./hr.) at the surface.

Currents: There is no fixed current in this area and any flow is caused entirely by the prevailing tidal stream and winds.

Sea Salinity: The Red Sea and Gulf are extremely saline and salinity is around 40,000/50,000 parts per million.

Sea Temperature: The surface temperature of the sea ranges between 66°F (19°C) in February and 80°F (26.7°C) in August.

GENERAL:

Navigation: When entering, manoeuvering or leaving the Port Limits of Ain Sukhna, the Master has to conform with the conditions setforth in this Manual and has to adhere to the 1972 International Regulations for preventing Collisions at Sea which will be complied with at all times.

The Master guarantees that his vessel fulfils all navigational and worthiness conditions in particular those required for vessels carrying dangerous cargo, (crude oil) in accordance with the provisions setforth in the Appendix for vessels carrying Dangerous cargo annexed to Rules of Navigation of the Suez Canal Authority to the extent that such provisions are applicable.

Master should submit the respective certificate and declarations whenever required in this respect.

Helicopters (available in emergencies): Should the services of a helicopter be required by SUMED for any purposes whatsoever the vessel will be given a minimum of 30 minutes warning notice before the helicopter's approach in order that cargo operations can be stopped and all tanks and vents closed.

A responsible officer should be on deck to assist the helicopter in making the approach to the vessel. Although the safety of the helicopter remains at all times the responsibility of its pilot, helicopter services shall not be employed in any event without the express prior consent of Shipper and vessel's Master.

Supplies: Stores and supplies are available through an Agent and can be delivered from Suez to Ain Sukhna anchorage area after unloading but entirely at the vessel's own risk.

Government Officials: A.R.E. officials, such as Customs Director, Quarantine Officer and Immigration Officer are stationed at Ain Sukhna. Should Customs guards be stationed on board vessels whilst moored it is expected that vessels will extend all courtesies to them and or other officials while on board.

Ship's Readiness: This terminal is an open roadstead and therefore, during the time a ship is moored, the engines must be ready with full power for immediate use.

Vessels at berths must clear immediately upon advice of the Mooring Master or as directed by SUMED's terminal superintendent. Ship's personnel should be at their respective stations at all times during mooring, unmooring and cargo transfer operations.

Courtesy Flag: All vessels are required to fly A.R.E. Ensign on the foremast during daylight hours.

Quarantine Regulations: The rules governing quarantine regulations are the same as for Suez.

Unauthorised Craft: The presence of unauthorised craft alongside is extremely hazardous.

SUMED prohibits the boarding of individuals other than those authorised to do so in the bona fide conduct of the vessel's operation. No unauthorised person is allowed to board the vessel whether at anchorage or while moored.

Contraband: SUMED prohibits unauthorised craft from coming alongside vessels. To avoid the possibility of undesirable items getting aboard vessels, it is requested that Masters discourage craft coming alongside whilst the vessel is in the terminal.

AGENCY SERVICES: Not required under normal circumstances.

TIME: GMT plus 2 hours.

AUTHORITY: Arab Petroleum Pipeline Company (Sumed Un).

Headquarters: 9 Amin Yehia St., Zizinia, Alexandria. *Tel:* 61579, 64138, 64139. *Telex:* 54295, 54380 Sumed Un.

Central Operations: 16 Syria St., Roushdt, Alexandria. *Tel:* 42975, 43940, 44939. *Telex:* 54108, 54033 Sumed Un.

ALEXANDRIA (Including El Dekheila): 31.09 N. 29.53 E. (See Plan)

DOCUMENTS:

4 copies of Crew List.

Complete set of Manifests covering all cargo on board showing names of Shippers and Consignees.

4 copies List of Passengers in Transit.

Landing cards for passengers landing finally in A.R.E. and for those landing in A.R.E. in transit.

4 copies List of passengers finally landing in A.R.E. (if any) together with their addresses in A.R.E.

Deck log books showing date of last call at a A.R.E. port, completed up to the time of arrival.

For Quarantine: Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

For Immigration Officer:

Arrival Immigration Form, duly completed.

1 Passenger List.

List of Passengers Finally Landing, in duplicate.

Crew List.

Valid passport with entry visa is required for landing in A.R.E. for passengers landing. Emergency visa can be granted on arrival if so required.

For Customs Use:

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate.

PILOTAGE: Compulsory. Pilot boards off harbour entrance. International code signals used.

Vessels are not to proceed from the waiting area (Lat. 31° 12.6′ N., Long. 29° 44.5′ E. with radius of 1.5 miles) without a Pilot onboard.

RESTRICTIONS: Entrance channels 36 ft. depth, being dredged to 50 ft. Arriving vessels should keep 50 miles offshore between sunset and sunrise.

MAX. SIZE: Up to 32 ft. draft.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor. The Quarantine Doctor meets ships whilst entering the port and ships are boarded in turn.

In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at an A.R.E. port, the vessel is put under compulsory quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

(1) The vessel must be a regular liner known to the Quarantine Authorities and have a doctor on board.

(2) Details shown on the Quarantine Statement should be wirelessed to the Quarantine Authorities 24 hours prior to ship's arrival.

(3) Masters of vessels must declare before their arrival any accidents, which might have taken place on board prior to the arrival in port.

(4) The ship must not have called at any infected port.

RADIO: Alexandria Radio, call sign SUH, operating 24 hours daily on 444, 500 and 8578 kHz and between 0600 to 1800 GMT on 12,974 kHz. Also harbour VHF Channel 16.

TUGS: 5 tugs available up to 1,200 h.p.

BERTHING: Alongside quays in depths up to 34 ft.

Refrigerated cargoes should be direct delivery.

Ro/Ro facilities available.

Cement to silos and bagged in heavy cloth (no paper bags permitted).

Coal: Discharged at Berth Nos. 63 and 64. Max. draft 33 ft. 4×25 ton cranes. Rate 10,000 tonnes per day.

El Dekheila: Located 6 km. West of Alexandria and managed by Alexandria Port Authority.

Industrial Port: Access channel: Length 3.5 km. and depth 20.0 m. Turning circle: 750 m. diameter and 20.0 depth. Approach channel: Width 250 m., depth 20.0 m. One jetty (2 berths). Length 640 m. Depth alongside: Inner Berth 16.0 m. Outer Berth 20.0 m. Max. Size: 60,000 d.w.t. and 160,000 d.w.t. respectively. An additional berth to handle vessels up to 250,000 d.w.t. may be constructed later. 2×30 ton capacity grab cranes and 2 belt conveyors for handling iron ore pellet at 1,000 t.p.h. each (900 t.p.h. for coal). Port to be operational late 1986.

Commercial Port: Access channel 1.2 km. in length is a branch off the access channel to the industrial port. Depth of channel 14.0 m. Width 210 m. - 150 m. Commercial port will have over 1,500 m. of berthing space with 14.0 m. of water alongside. Port expected to be operational late 1987. Cargoes to be handled will include containers, general cargo, timber, chemicals and Ro/Ro vessels.

CONTAINER FACILITIES: Length 700 m., depth alongside 14.0 m. 2×32 tonne container gantry cranes, 2×32 tonne transtainers and 4×42 tonne forklifts.

TANKERS: Petroleum Basin: in West part of Outer Harbour, Berth Nos. 3 and 4, depth alongside 38 ft., max. length 700 ft., draft 34 ft. Berth Nos. 3 and 4: in East part of Outer Harbour. Stern to moorings.

It has been reported that tankers are required to take on ballast in excess of that deemed to be necessary by the Master, even in fine weather. One Master was ordered to bring his forward draft to 21 ft. Once the vessel was alongside a charge was made for deballasting the vessel.

FRESH WATER: Available by barge, and alongside most quays.

FUEL: Available by barge.

MEDICAL: All facilities available. International Vaccination Certificates required.

REPAIRS:

Alexandria Shipyard: Builds vessels up to 40,000 tons. One drydock capacity 85,000 d.w.t., cranes with up to 30 tons capacity. One drydock capacity 20,000 d.w.t., cranes with capacity up to 30 tons. Fully equipped engineering workshops capable of carrying out extensive repairs alongside quays length 1,200 m. Depth alongside 11 m.

Alexandria Ship Repair Co.: Ship repairs including engine repairs and boiler repair. Fully equipped workshops.

The Egyptian Shipbuilding and Repairs Co.: Floating dock for ships up to 12,000 d.w.t. 100 ton floating crane. All types of hull and machinery repairs possible.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Suez Canal".

DEVELOPMENTS: Grain elevator (Berth Nos. 81/82) to be constructed. Capacity 6,000 tonnes. Grain silo of 100,000 tonnes to be constructed. Completion mid-1985.

Control tower with radar and VHF being constructed.

Approach channel to be widened to 220 m. and deepened to 13 m.

Dekheila: See "Berthing".

SHIPMASTER'S REPORT: 1976

Approaches: Ships making the passage from Port Said to Alexandria are obliged to keep to the route laid down by the Egyptian Authorities. The coastline is rather featureless and a good operational radar is invaluable. Radar conspicuous objects were found to be – Ras el Barr Lighthouse and fort, forts numbers 2 & 4, the forts and lighthouses at Brulos and at Rosetta Mouth and also Nelson Island.

The anchorage can be identified from a considerable distance by the number of ships at anchor off the port – often more than fifty. The prohibited area marked on Chart No. 243 to the East of Great Pass is ignored and ships anchor as convenient but as near to the pilot ground as possible. Ras el Tin Lighthouse, Great Pass Beacon and the Minaret (248) were found to be good marks. There is a latticed beacon to the West of Great Pass Beacon which should not be confused with the latter. The new beacon is not marked on the chart and was stated by the Pilot to be for a new channel which is being constructed.

Arrival Procedure: It is important to register one's arrival with the Alexandria Port Control as soon as possible. This is done by means of VHF.

At 1100 hrs. (approx.) a traffic list is broadcast and ships mentioned should contact Port Control and obtain berthing instructions. They will probably be told to move in to the pilot boarding ground 2 miles N.W. of Great Pass Beacon. When there, they should anchor again and await either further instructions or the unannounced arrival of the Pilot.

Berthage is decided at a meeting held around Noon so there may be a supplementary traffic list around 1400 hrs. In any case, it is a good idea to call Port Control at least once a day to remind them that you are still awaiting a berth.

A Pilot will take the ship into the anchorage in the Outer Harbour where Health, Immigration etc. officials board and clearance given. The Agent may also board. The main radio transmitter is sealed at this time. The ship will then await allocation of a berth.

Anchorages: At the anchorage outside the port depths vary from 20 to 30 fathoms but the holding ground seems to be good. This ship lay comfortably with 7 shackles of cable out. Ships usually leave each other ample room in case of bad weather. There are good anchor bearings.

The anchorages inside the Outer and Inner Harbours are very congested and the holding ground (said to be sand) is not good. Time spent at anchor here can be a very anxious period.

The ship was anchored in the Inner Harbour just off the end of the Passenger Quay. When it was pointed out to the Pilot that, in the Master's opinion, she was too close to the 3 fathoms line at the old Aircraft Moorings, the Pilot stated that it would be all right because the ship wouldn't swing that way. If the vessel had swung the other way she would have gone aground.

At 0300 hrs. the following morning the ship began to swing onto the sand bank. Fortunately there was no wind and it was possible to turn her, weigh anchor and find another anchorage. A call to Port Control on VHF was made for a tug and Pilot but was not acknowledged.

The main engine should be kept at very short notice when at anchor inside the harbour.

The accommodation ladder should never be left down while at anchor but should be raised and lowered as required.

It is usually an easy matter to hail a passing boat and bargain for a trip either ashore or to another ship. However, all ship movements and boatwork are officially prohibited after dark.

Pilotage: The pilot launches are Fairmiles (ex H.D.M.L.s) painted light blue with white wheelhouses and the word 'Pilot' in black on the side of the bridge.

All the Pilots employed spoke good English and were competent. They board at any time during the day and often without the slightest warning. They order tugs as they think necessary.

The beacons and leading marks in the Great Pass were good but the Fairway Buoy at the outer end of the channel is no longer there. Most of the mooring buoys marked on Chart No. 3119 have either been removed or changed.

As a result of experience, the Pilots have considerable skill in handling ships in very congested situations and they are to be relied upon.

Arrival Formalities: These are carried out at the Outer Harbour Anchorage. A list of documents required follows.

Documents:

2 Health Declarations*
1 Crew Customs Manifest
1 Arrival Form†
1 Stores List
1 Bond Stores List
8 Crew Lists‡

* Supplied by Quarantine Officers
† Brought out by Agent.
‡ This is the minimum number required.

Notes: Customs Manifests, Stores Lists and Crew Lists should be typed out on plain paper – there does not appear to be any proper forms.

Immigration Officers wish to see all Dis 'A' Books and will then issue Shore Passes which will have to be filled in by the ship. On departure, the Officials ask for the passes but, if they have not been collected will only request that they be destroyed when the ship sails.

Berthage: Every foot of wharfage is used and space is at a premium. This ship lay at Berths 16 to 20 and in both cases had ships ahead and astern with very little room between.

Berth 16 has unequal but good fendering, Berth 20 has none at all. Both are concrete wharves. There are an adequate number of bollards.

Berths 16 and 20 are both at the Passenger Quay and the soundings obtained by hand lead are shown on the plan. In theory, telephones are available at both berths. Water is laid on but the pipe is of small bore and delivery is slow (about 8.5 t.p.h.). Arrangements should be made through the Agent.

Berthage is said to be under the sole control of the Harbour Master. Ships may be ordered to berth, shift or move out to anchor without any warning. It should be noted that the Pilots always insist that Agents are told of a move the day before. In no case did this ship receive official notice. It is wise to hand a written notice to the Agent informing him of the time required to prepare the main engine for a move. However, in our case, the Agent did not bother to forward the information to the Harbour Master.

Being at the Passenger Terminal means that a cargo vessel has to move out to anchor frequently to allow passenger ships to berth. Unfortunately there seems to be only one other berth with enough water alongside for a fully loaded ship such as our vessel.

Repairs: Repair firms are available. There is a shipbuilding yard and graving and floating docks. Radio and radar servicing as well as gyro are available. There is a Lloyd's Register surveyor.

There is an abundance of small firms offering to do scaling and painting quite cheaply.

Medical: The Agent will arrange for a doctor to visit the ship if required. Unless special equipment and/or facilities are necessary, this is the best arrangement.

Repatriation: Apparently available via Cairo Airport.

Stores: Only small quantities of fresh fruit and vegetables were bought and these were good and cheap but the Catering Officer should be prepared to bargain.

Bunkers: The barges arrived alongside without any warning. There were separate barges for D.O. and I.F.O. The pumping rate for D.O. was 75 t.p.h. and for I.F.O., 143 t.p.h. It is reported that it is advisable to check the viscosity of fuel.

Communications: While at anchor outside the port, the ship's radio station is available and is by far the best means of communication.

Port Control, Pilots and launches all use Channel 16 both for calling and working. Making contact with Port Control to report arrival or request information is a matter of perseverance.

Agents: Memphis Shipping Agencies.

There is a main office in the city (Sesostris St.) to which the Master must go to draw money. Two hours will be needed for this plus an hour for travelling. In addition there are two offices in the Main Hall of the Passenger Terminal between Berths 16 and 20.

The Agents will arrange for doctor, waterman and watchmen. They will advance cash to the Master.

Garbage: Subject to negotiations with a private company. An old lighter will be moored alongside while the ship is in port. All garbage should be thrown into it. It is completely uncovered and after a while, in Summer time, would probably become highly offensive.

Fresh Water: Although there was no reason to suspect the water supply, Stabochlor was added as a precaution. As the ship may be sent out to anchor without notice for an unspecified time, it is wise to keep the water tank topped up.

Watchmen: The civilian watchmen employed were obtained through the Agent.

Two uniformed guards are put aboard by one or other of the authorities. Both the official and civilian guards will stop and search stevedores and take from them the cargo they have taken.

Tugs: These are arranged by the Pilot. There are several ranging from old coal burners to fairly modern diesels and they are well handled and efficient.

Cargo Work: It is supposed to be against the law to work frozen cargo during daylight hours. Therefore work was mainly carried on between 1700 and 0500 hrs. with a break about 2300 hrs., the same labour working through.

A gang consists of a total of 20 men. There is a foreman, two winchmen and eight stevedores in the hatch. The rest work ashore and on the lorries. The men in the hatch 'spell' each other and this is a major cause of lost time.

The butter and cheese was loaded onto pallets which were landed on the lorries and the cargo transferred. There are three pallets per gang but shortages often occur and the gear is not very good, two of the pallets breaking under load.

Crane and Velle derrick drivers were generally competent.

Lloyds Agency was asked to appoint a surveyor to witness the opening of the hatches and later to conduct a continuous survey during discharge. The surveyor was particularly helpful at the commencement of discharge. His firm asked for and received an advance of one hundred Egyptian pounds in cash from the ship because payment through the Agent was said to be slow.

Miscellaneous: Photography is forbidden within the port area and a permit must be obtained to take a camera ashore.

It is important to fit rat guards. A fine of £20 may be imposed for each one not fitted.

There is at least one floating crane with a SWL of 150 tons.

The Port Surveyor will ask to see the Suez Canal Certificate. If this has been retained by the Canal Authorities, he will require a signed statement to that effect.

Departure: The Agent will inform the various authorities of the expected time of departure.

Immigration Officers will board to check any changes in the crew.

The Agent will put aboard the clearance and the sanitary clearance and the senior official guard will demand a written statement that all crew are aboard.

The Sea Pilot will board with the Harbour Pilot. The latter disembarks into a motor boat as soon as the ship is clear of the berth, the former when she is clear of the Great Pass. If the weather is rough, a pilot ladder will be required outside instead of the accommodation ladder.

SHIP'S OFFICER'S REPORT: September 1979.

Arrival: On arrival at waiting area (BA Chart 243), vessel is required to register with "Alexandria Port Control" on VHF Channel 16.

The following information is required:

Ship's name and country of registry.
Time (local) of anchoring in waiting area.
Length overall and max. draft.
Description and tonnage of cargo for discharge at port.
Bearing and distance from Ras el-Tin Lighthouse.
Last port of call.
Name of Agent in Alexandria.

It is also necessary to confirm arrival time by W/T, with the Harbour Master and ship's Agent via Alexandria Radio on 454 kHz or 8578 kHz.

Traffic Lists, giving the names of vessels programmed for port entry that day, are generally broadcast on VHF Channel 16 at 0600 hrs. and 1400 hrs. daily. However, times may be altered without prior warning or list may be omitted altogether.

Fresh Water: Fresh water is unavailable in August at anchorage. Within port, fresh water is available from barge said to contain 150 tons, at an approx. rate of 40 t.p.h. No information on water supply at berths.

Also see "General" below.

Services: Doctor and hospital facilities are available on order via Agents or chandler.

Chandlers will approach vessel at anchorage – complete proof of identity should be obtained before trading commences. Also see "General" below.

Local labour is available for tank cleaning.

General:

(1) All telegrams via Alexandria Radio to addresses in Alexandria should contain a request for confirmation of receipt from addressee.

(2) Within the first 24 hours of anchoring the vessel is besieged by numerous persons, claiming to be chandlers, Agent's runners, watermen, receivers of the cargo, etc. Their proof of identity should be most carefully checked.

(3) The fresh water situation during this vessel's anchorage was desperate. It appears that from late July to mid-September, no water is available for vessels outside the harbour. Rationing is required on board, even if a water barge is ordered for the next day. Several ships ran out of fresh water at the anchorage during our stay and had to lower their boats to obtain minimal supplies from nearby ships. A good supply can apparently be obtained at Cyprus. Stores will not be brought out to the anchorage and boats cannot be ordered through Alexandria Port Control for medical or personnel transport.

AUTHORITY: Alexandria Port Authority, 106 El Horreya Avenue, Alexandria, Egypt. *Tel:* 34321/5. *Telex:* 54310 APA UN. *Contact:* Commodore Ali Saleman, Harbour Master. Captain Ahmed Hossain, Deputy Harbour Master. Captain Maroni, Deputy Chairman. Admiral Anwar Hegazy, Chairman.

DAMIETTA: 31.29 N. 31.45 E.

LOCATION: The new port is 65 km. West of Port Said and 400 km. East of Alexandria in position: Lat. 31° 28.5′ N., Long. 31° 45.25′ E.

PILOTAGE: Pilotage is compulsory. Vessels proceeding to Damietta Port are to inform Damietta Port Authority by cable 7 days and 24 hours before their arrival. On arriving at the waiting area, the Master must call the pilot station by VHF Channel 16 and advise time of arrival, draft, length, cargo, etc. Vessels are advised to approach through the Northwestern side of the waiting area. Vessels are not allowed to approach the Access Channel without a Pilot on board.

ANCHORAGE: *Waiting Area:*

The Waiting Area has been marked with 5 buoys as follows:

1. North East Buoy (Approach Buoy)
(a) Position: Lat. 31° 36′ 30″ N., Long. 31° 46′ 12″ E.
(b) Description: Conical buoy painted in red and white strips.
(c) Top mark: Red ball.
(d) Character of Light: Occulting white (2+1 = 3).
(e) Range: 7 nautical miles.

2. North Buoy
(a) Position: Lat. 31° 36′ 43″ N., Long. 31° 44′ 58″ E.
(b) Description: Conical buoy painted in black.
(c) Top mark: Two black cones point up.
(d) Character of Light: V.Q. white (0.3+1.2 = 1.5).
(e) Range: 7 nautical miles.

3. West Buoy
(a) Position: Lat. 31° 35′ 41″ N., Long. 31° 44′ 33″ E.
(b) Description: Conical buoy painted yellow and black bands.
(c) Top mark: Two black cones point in.
(d) Character of Light: White, 9 flashes 9 (0.31, 0.31) + 4.37 = 10.
(e) Range: 7 nautical miles.

4. Middle Buoy
(a) Position: Lat. 31° 35′ 33″ N., Long. 31° 45′ 20″ E.
(b) Description: Conical buoy painted in yellow colour on black base.
(c) Top mark: Two black cones point down.
(d) Character of Light: White, 6+1 flashes 6 (0.31, 0.31) + 2 + 4.25 = 10.
(e) Range: 7 nautical miles.

5. East Buoy
(a) Position: Lat. 31° 35′ 25″ N., Long. 31° 46′ 06″ E.
(b) Description: Conical buoy painted in yellow colour.
(c) Top mark: St. Andrew's cross yellow in colour.
(d) Character of Light: White, group flash (1+1+1+7 = 10).
(e) Range: 7 nautical miles.

Depth in Waiting Area is 15.0 m.

APPROACHES:

Access Channel:

The port is limited from its North side by Access Channel of 11 km. length, 300 m. width, reduced to 250 m. width when approaching to the breakwaters. This channel has been marked with 18 buoys each of 2.91 m. diameter, 7.55 m. height and 2.318 m. draft. The odd numbers (Nos. 1 – 17) are defined the Western Buoys and the even numbers (Nos. 2 – 18) are defined the Eastern Buoys as follows:

Buoy No.	*Position of Platform*		*Shape*	*Character of Light*	*Range Nautical miles*
	Latitude	*Longitude*			
1	31° 34′ 48″ N.	31° 46′ 32″ E.	green cone	green flash (0.5+2=2.5)	6.3 – 8.3
2	31° 34′ 44″ N.	31° 46′ 51″ E.	red cone	red flash (0.5+2 = 2.5)	6.3 – 8.3
3	31° 34′ 04″ N.	31° 46′ 22″ E.	green cone	green flash (0.5+2 = 2.5)	6.3 – 8.3
4	31° 34′ 01″ N.	31° 46′ 41″ E.	red cone	red flash (0.5+2 = 2.5)	6.3 – 8.3
5	31° 33′ 21″ N.	31° 46′ 12″ E.	green cone	green flash (0.5+2 = 2.5)	6.3 – 8.3
6	31° 33′ 18″ N.	31° 46′ 31″ E.	red cone	red flash (0.5+2 = 2.5)	6.3 – 8.3
7	31° 32′ 40″ N.	31° 46′ 02″ E.	green cone	green flash (0.5+2 = 2.5)	6.3 – 8.3
8	31° 32′ 35″ N.	31° 46′ 20″ E.	red cone	red flash (0.5+2 = 2.5)	6.3 – 8.3
9	31° 31′ 55″ N.	31° 45′ 51″ E.	green cone	green flash (0.5+2 = 2.5)	6.3 – 8.3
10	31° 31′ 52″ N.	31° 46′ 10″ E.	red cone	red flash (0.5+2 = 2.5)	6.3 – 8.3
11	31° 31′ 12″ N.	31° 45′ 42″ E.	green cone	green flash (0.5+2 = 2.5)	6.3 – 8.3
12	31° 31′ 09″ N.	31° 46′ 00″ E.	red cone	red flash (0.5+2 = 2.5)	6.3 – 8.3
13	31° 30′ 29″ N.	31° 45′ 31″ E.	green cone	green flash (0.5+2 = 2.5)	6.3 – 8.3
14	31° 30′ 25″ N.	31° 45′ 50″ E.	red cone	red flash (0.5+2 = 2.5)	6.3 – 8.3
15	31° 29′ 46″ N.	31° 45′ 21″ E.	green cone	green flash (0.5+2 = 2.5)	6.3 – 8.3
16	31° 29′ 42″ N.	31° 43′ 40″ E.	red cone	red flash (0.5+2 = 2.5)	6.3 – 8.3
17	31° 29′ 33″ N.	31° 45′ 22″ E.	green cone	green flash (0.5+2 = 2.5)	6.3 – 8.3
18	31° 29′ 31″ N.	31° 45′ 33″ E.	red cone	red flash (0.5+2 = 2.5)	6.3 – 8.3

Breakwater:

1. West Breakwater Light:
Beacon No. 31:
(a) Position: Lat. 31° 29′ 33″ N., Long. 31° 45′ 15″ E.
(b) Description: Iron green tower of 10 mm. height.
(c) Character of Light: Green flash (1+4=5).
(d) Range: 6.3 – 8.3 nautical miles.
(e) Breakwater of 1,400 m. length.

2. East Breakwater Light:
(a) Position: Lat. 31° 20′ 21″ N., Long. 31° 45′ 37″ E.
(b) Description: Iron red tower of 10 m. height.
(c) Character of Light: Red flash (1+1+1+7=10).
(d) Range: 6.3 – 8.3 nautical miles.
(e) Breakwater of 560 m. length.

Inner Buoys: Transit from Access Channel to quays is marked by 7 buoys as follows:

Buoy No.	*Position*		*Shape*	*Character of Light*	*Range Nautical miles*
	Latitude	*Longitude*			
19	31° 28′ 42″ N.	31° 45′ 20″ E.	red cone	red flash (0.5+2=2.5)	6.3 – 8.3
20	31° 28′ 43″ N.	31° 45′ 20″ E.	red cone	red flash (0.5+2=2.5)	6.3 – 8.3
21	31° 27′ 51″ N.	31° 45′ 13″ E.	green cone	green flash (0.5+2=2.5)	6.3 – 8.3
22	31° 28′ 34″ N.	31° 45′ 18″ E.	red cone	red flash (0.5+2=2.5)	6.3 – 8.3
24	31° 28′ 14″ N.	31° 45′ 23″ E.	red cone	red flash (0.5+2=2.5)	6.3 – 8.3
26	31° 27′ 55″ N.	31° 45′ 56″ E.	red cone	red flash (0.5+2=2.5)	6.3 – 8.3
28	31° 27′ 36″ N.	31° 45′ 47″ E.	red cone	red flash (0.5+2=2.5)	6.3 – 8.3

Leading Light:

Beacon No. 30:
(a) Position: Lat. 31° 27′ 43″ N., Long. 31° 45′ 02″ E.
(b) Description: Metallic tower of 20 m. height.
(c) Character of Light: Fixed green – white – red lights.
(d) Range: 10.5 – 15.1 nautical miles.

Barrage Channel Lights: The Barrage Channel is marked with 4 buoys each of 3 m. height as follows:

Beacon No.	*Position*		*Shape*	*Character of Light*	*Range Nautical miles*
	Latitude	*Longitude*			
33	31° 28′ 37″ N.	31° 45′ 23″ E.	green tower	green flash (1+4=5)	6.3 – 8.3
34	31° 28′ 41″ N.	31° 45′ 24″ E.	red tower	red flash (1+1+1+7=10)	6.3 – 8.3
35	31° 27′ 36″ N.	31° 47′ 57″ E.	green tower	green flash (1+4=5)	6.3 – 8.3
36	31° 27′ 33″ N.	31° 47′ 54″ E.	red tower	red flash (1+1+1+7=10)	6.3 – 8.3

Quay Light:

Beacon No.	*Position of Platform*		*Shape*	*Character of Light*	*Range Nautical miles*
	Latitude	*Longitude*			
37	31° 28′ 08″ N.	31° 45′ 37″ E.	3 m. tower	blue flash (0.5+2=2.5)	7.2 – 9.6

Depths:
(a) Waiting Area – 15 m.
(b) Access Channel, Inner Channel, Turning Area: 15 m., the depths differ near the sides of Access Channel.

BERTHING:

Quay No.	*Length (m.)*	*Depth (m.)*	*Remarks*
1	250	14.5	Container, Ro-Ro
2	250	14.5	Container, Ro-Ro
3	250	14.5	Container, Ro-Ro
4	250	14.5	Container, Ro-Ro
5	200	12.0	General Cargo
6	200	12.0	General Cargo
7	200	12.0	General Cargo
8	200	12.0	General Cargo
9	200	12.0	General Cargo
10	200	12.0	General Cargo
11	200	12.0	General Cargo
12	200	12.0	General Cargo
13	300	14.5	Bulk Carriers
14	300	14.5	Bulk Carriers

The port will be in operation as from 1st August, 1986 and will be ready to receive Ro-Ro ships, container ships and bulk carriers up to 250 m. in length, 39.5 ft. – 42 ft. draft, and general cargo ships up to 11 m. draft.

The container berths are equipped with 4×45 ton container gantry cranes and 3 mobile cranes.

The grain terminal is equipped with 2×350 t.p.h. unloaders. Storage capacity 100,000 tons.

5 36

EAST ZEIT TERMINAL: 27.01 N. 33.04 E.

LOCATION: The C.A.L.M. is located in position Lat. 27° 00.9′ N., Long. 33° 03.9′ E. and is approximately 85 km. North of Hughada.

ANCHORAGE: Tanker should call East Zeit Terminal before approaching and enquire if necessary to drop anchor in the anchorage area.

Vessel is not permitted to anchor outside the anchorage area.

Waiting Area: South of C.A.L.M. The Southern half of a circle of 1 mile radius around position: Lat. 27° 48.5′ N., Long. 33° 37.0′ E. depth 20 m. – 44 m. with 39 m. at centre.

RESTRICTIONS: No night berthing. Unberthing at any time.

MAX. SIZE:
Max. 85,000 tons d.w.t. fully loaded.
Min. d.w.t. of tanker 35,000 tons
Max. length decided by d.w.t. but distance bow to manifold not greater than 450 ft.

BERTHING: *Terminal Facilities:*
C.A.L.M. (Catenary Anchor Leg Mooring).
Cargo hose 12 in. type, with camlocks.
Max. loading rate for crude oil 3,000 tonnes/p.h.
Loading from port side.

If cargo hose or connection is different, Master should contact "Esso Suez Terminal Office" 72 hours prior to his arrival at East Zeit stating the tanker hose and connection type.

Mooring facilities on tankers's bow should be ready prior arrival. Tanker must be trimmed about 4 ft. by the stern and have adequate ballast for manoeuvring.

RADIO/VHF: Tankers calling at East Zeit Bay must send ETA message 72, 24 and 12 hours before arrival at the terminal to "Esso Suez Inc.", office Telex No. 21148 Esosz Un, addressed to Exploresso for East Zeit Terminal attention Marine Supervisor, via any coastal radio station: Port Said (Suez and Kosseir).

ETA messages to Esso Suez Inc. should give the best estimates of ship's arrival time at the terminal. This ETA message should also include a definite statement of details of any equipment required from shore for connecting 12 in. floating hoses. Bearing in mind that such hose needs tanker to be equipped with crane classed/certified up to 10 tons capacity.

Master must call East Zeit Terminal 4 hours prior to arrival on VHF Channel 13 which is considered the calling (by the vessel's side only) and working channel.

BALLAST: *Deballasting Facilities:* Available at East Zeit Terminal. Shore facilities can accept up to 75,000 bbls. over 12 in. floating hose connected for this purpose. If Master will require deballasting of clean cargo tanks ballast while loading in operation, letter should be submitted to the terminal that all bulkheads are fully tight and no leakage to avoid any contamination. Master on behalf of Owners and/or Charterers will bear all costs and expenses for cleaning operations required to remove any pollution which might occur due to pumping ballast overboard as well as a fine of US$15,000.

OPERATOR: Esso Suez Inc.

HAMRAWEIN: 26.15 N. 34.12 E.

APPROACHES: *Daytime Leading Marks:*

Front mark: Lat. 26° 15′ 05.984″ N., Long. 34° 12′ 01.622″ E.

Rear mark: Lat. 26° 15′ 01.46″ N., Long. 34° 11′ 54.95″ E.

BERTHING: Length of quay 67 m. Max. draft 33 ft. Conveyor belt and mechanical apparatus available. Daily average loading rate 4,000 tons. In addition to mooring bollard on the quay there are 4 mooring buoys.

MARSA AL HAMRA (El Alamein): 30.59 N. 28.52 E.

WEPCO Terminal:

The Mono Mooring Buoy is in an open and unsheltered roadstead. The mooring buoy is located at Lat. 30° 58.7′ N., Long. 28° 52.2′ E. It is 53 miles on a bearing of 255° from Ras-el-Tin Lighthouse, Alexandria, and 3 miles offshore in approximately 66 ft. of water.

DOCUMENTS:

4 copies Crew List.

Deck log books showing date of last call at a A.R.E. port, completed up to the time of arrival.

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate.

PILOTAGE: The S.-S.W.-W. quandrant from the buoy is a Prohibited Anchorage Area. Gebisa Reef is at Lat. 30° 58′ 30″ N., Long. 28° 49′ 10″ E., at 2.7 miles on a bearing of 260° from the buoy.

The mooring buoy carries a light, flashing red 6 times per minute, and visible all round to a distance of 4.5 – 5 miles in clear tropical weather. It also has a fog horn, sounding "U" and a radar reflector.

Surface current sets East at 10 miles offshore at the rate of 1 knot. Maximum rise and fall of tide in the mooring area is 2 ft.

Vessel arriving should approach to within 2 miles North of the buoy, where they will be met by the Harbour Master or Pilot who will advise the ship's Master on approaches to the mooring buoy, mooring and unmooring.

RESTRICTIONS: Normally vessels are moored during daylight hours only, but permission can be obtained to sail at night.

HEALTH: Hoist International Code Quarantine Signals when entering. Any sickness must be reported to local authorities.

RADIO: The commercial radio station at Alexandria will handle WEPCO radio traffic. Alexandria Coast Radio Station (call sign SUH) operates 24 hours a day on 444, 500 and 8,578 kHz, and between 0600 hrs. and 1800 hrs. GMT on 12,974 kHz.

Ships nearing Al Hamra Terminal may contact the terminal by FM/VHF radio on 156.70 MHz or 2182 kHz.

While at the mooring, ship-to-shore communication is by portable VHF radio-telephone units, under the direct charge of the Mooring Master. The terminal uses Channel 10 VHF for all communications.

TUGS: Not available and not required.

BERTHING: 2 good lines must be ready on the forecastle to be sent to the buoy plus a further 2 lines for use as messengers. Ship's lifting gear must be ready near the port manifold for lifting and connecting 2×12 in. hoses, with proper reducers if the manifold does not fit 12 in. hose with 150 ASA standard flanges. The total weight per hose assembly is approximately 5 tons. Maximum loading rate is 3,700 t.p.h.

A pilot ladder must be safely rigged for immediate use and long enough to reach the Mooring Master's launch. At night adequate lighting must be rigged overside to enable the Mooring Master to approach and board the ship safely, and searchlights should be rigged on both sides of the bridge to assist in running lines to the buoy.

BALLAST: No dirty ballast may be pumped overboard, and it is the ship's Master's responsibility to ensure that no oil – whether crude, diesel, bunker or bilge – is pumped or spilled into the waters of and surrounding the Terminal. Ballast can be pumped ashore through one or both of the floating hoses direct to disposal facilities on shore.

CUSTOMS ALLOWANCES: Present regulations at El Alamein allow each seaman to retain in his possession a maximum of 50 cigarettes or 1 ounce of tobacco or 5 cigars. All other smoking items must be collected and listed before arrival. The list will be checked by Customs before sealing the locker, and any discrepancies will be subject to fines.

FRESH WATER: Not available.

FUEL: Not available.

MEDICAL: Nearest hospital facilities are at Alexandria, at least 90 minutes drive from the terminal.

First Aid could be provided and if necessary, transportation to hospital in Alexandria.

TIME: GMT plus 2 hours.

AUTHORITY: Western Desert Operating Petroleum Company – (WEPCO), Borg El Saghr Building, P.O.Box 412, Alexandria, Egypt. *Tel:* 28710/17/18/19. *Telex:* 54075 Un. *Cables:* Wepoil Alexandria.

8 DONE

RAS BUDRAN: 26.56 N. 33.08 E. (See Plan)

Ras Budran is an open area, unsheltered roadstead. There are presently 5 large storage tanks available, painted a pale yellow colour. To the North of the tank farm is the production area with ballast receiving and treatment facilities. There is a flare structure S.E. of the storage tanks and another small flare on the production platform in position: Lat. 28° 58.2′ N., Long. 33° 07.8′ E. located 2.3 miles North of SBM.

Vessel will moor to a single mooring buoy located 2.3 miles off Rad Budran Lighthouse on a bearing of 260°.

The yellow painted SBM is located in a water depth 34 m. in position: Lat. 28° 56′ 05″ N., Long. 33° 07′ 49″ E.

The SBM has an orange light, visible 5 miles.

Cargo vessels can be loaded and/or discharged alongside the jetty at Ras Budran. The length of the jetty is 120 m. and the depth of the water is 6 m.

PILOTAGE: SUCO (Suez Oil Company) Pilot/Mooring Master boards approximately 2 miles West of SBM with mooring gangs. Pilot will normally meet and embark incoming vessels at Lat. 28° 51′ N., Long. 33° 06′ E. Vessel provides leeside on a course away from the shore.

Pilot ladder and/or accommodation ladder should be kept in good order, cleaned and should be of adequate length and strength. Ladder should be provided with a safety line. A light shall be provided at night so that the pilot ladder is adquately lit.

When Mooring Master boards, he will advise the Ship's Master, on the approach to the SBM, arrangements for mooring and unmooring, connecting of the hoses and all other operations within the mooring area. The Mooring Master will submit and receive from the Master all forms, documents and papers required, to be filled in and signed or received by the Master.

ANCHORAGES: SUCO will make every effort to moor ships arriving according to the agreed schedules as promptly as operational circumstances permit.

If mooring is not possible, vessel will anchor in Anchorage Area in position: Lat. 28° 52.5′ N., Long. 33° 06.9′ E.,

Area within 1 mile radius of this area has been surveyed and is considered clear of any obstruction. Anchoring outside the area is strictly prohibited.

The ground at Anchorage Area is sandy mud.

RESTRICTIONS: Weather conditions may prevent berthing. This is the case when wind speed exceeds 25 knots. Vessel will then remain in the anchorage until weather improves. Daylight berthing only. Unberthing anytime.

MAX. SIZE: 250,000 d.w.t. and 27.4 m. draft.

HEALTH: Masters are to indicate in their ETA notification of any sickness on board. SUCO will arrange with Health Authorities if so required.

RADIO/VHF: SUCO installation is to be supplied with relevant information on lifting gear, connections, ballast/segregated/dirty and quantity.

On the berth (SBM) communications by VHF Channels 12 (24 hours listening) and 74 (Marine Office, 0700 – 1800 hrs.). SSB 2638 kHz to be used during office hours.

TUGS: 2×1,000 h.p. mooring boats available to assist with mooring and hose connection. The boats are equipped for anti-pollution operations.

1 fire fighting tug is available on a standby basis whilst loading operations are in progress.

BERTHING: All mooring equipment is available and will be placed onboard the vessel when Mooring Master boards.

A vessel can make the final approach and moor to buoy from any direction bearing in mind prevailing weather and tidal conditions. The approach shall be made from the direction which is consistent with a safe approach and speed shall be subject to the prevailing forces (i.e. wind, current and tidal stream) at the location at the time of berthing with the assistance from mooring boats stationed at the buoy.

Once mooring the vessel is free to turn through 360° under the influence of the prevailing forces.

HOSE CONNECTION: 16 in. standard 150 ASA flange connection for crude oil and ballast hoses. Port derrick with minimum 10 tons SWL rigged for max. height and load lifting.

Ship's crew shall be responsible for connecting and disconnecting hoses, with assistance of shore crew.

A quick release coupling (camlock) is connected to each hose end and is to be used as follows:

1. In case of emergency the butterfly valve shall be immediately closed and quick release coupling immediately disconnected.
2. Do not hammer but try to use the camlock wrench supplied or use copper hammer only.
3. Tanker should be ready with reducer if it's manifold is not 16 in. size.
4. Bags of sand to be available.
5. Weight of the hose is approximately 6 tons.

LOADING: Upon being informed by the vessel's responsible officer that vessel is ready to start loading, Mooring Master will normally advise the Control Room and ensure that the loading commences at a low rate (by gravity).

When it has been confirmed that there is no significant rise in pressure on the loading line, the crude oil will be loaded, pumping with a maximum rate of 6,000 tonnes/p.h.

Crude oil is delivered through the submarine pipe-line to the buoy and thence via a floating hose to the vessel's port side midship manifold. Hose diameter is generally 24 in., changing at the ship's end to 16 in.

It is forbidden to close any valve onboard the tanker against the flow of the crude oil until the butterfly valve of the loading hose has been closed.

If ship-to-shore communications fail during loading operations the emergency whistle signal is a continuous blast on the tanker's whistle.

Loading shall immediately be stopped and will not be resumed until communications have been re-established.

Before loading, cargo tanks are dipped by an independent Inspector and a Terminal Inspector. If dirty ballast is retained on board until the next discharge port then amount of water and oil on top will be checked.

Density of Ras Budran Crude is approximately 0.900/15°C. Temperature when received on board approximately 31°C.

Immobilisation of engines at SBM not permitted.

BALLAST/POLLUTION: *Deballasting System:* It is preferable that vessels load crude oil while discharging ballast, but Master or officer-in-charge must be sure that no contamination or pollution takes place.

If the vessel is not equipped with 2 lines in order to load and deballast at the same time, a quantity of crude should be loaded prior to deballasting to ensure proper segregation.

Dirty ballast must not be in the emulsion form and is not to contain chemicals or detergents.

Deballasting will be effected by ship's pumps delivering the ballast water to the dedicated submarine ballast line.

The floating hose is normally 20 in. diameter, and the ship's end connection is 16 in. diameter.

It is strictly forbidden to discharge dirty ballast overboard.

Pollution: The Master has to comply with all regulations and instructions prohibiting pollution under ARE laws and under any pertinent instructions issued by SUCO when conveyed to Master.

Also the provisions for international convention for prevention of pollution from vessels 1973 and the protocol of 1978 relating to this connection will be applied to the extent that such convention and protocol are in force in ARE. Owner/operator shall be liable for any damage resulting from the pollution caused by the vessel and shall pay for all the expenses incurred for its removal and elimination.

Oil Spill: In the event of a spill or its detection, SUCO Mooring Master must be notified instantly for the necessary action to be taken.

MEDICAL: In case urgent medical assistance is required the vessel should contact SUCO Marine Manager by VHF radio. A doctor and facilities are available but no hospital is in the area.

DENSITY: 1030.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not available.

REPATRIATION: Possible in an emergency only.

TIME: GMT plus 2 hours.

HOLIDAYS: Ras Budran Terminal will never be closed due to religious holidays.

SHORE LEAVE: There is no shore leave for personnel of vessels whilst at the terminal.

HELICOPTER: Should the services of a helicopter be required in emergency or for any purpose whatsoever, the vessel will be given a minimum of 30 minutes notice.

WEATHER: Gales can be expected from a North-Westerly direction from October through May.

Maximum weather condition for keeping the vessel on SBM is 40 knots.

The above conditions are only for guidance and are not relevant to the safety of the vessel but the safety of the buoy.

The Mooring Master shall have the authority to decide whether the ship should remain or vacate the buoy.

Climate: The climate in the Gulf of Suez is generally good. The visibility is usually excellent with few dust storms and infrequent fog. There are a few rain squalls.

Winds: The general flow of the wind over this part of the Gulf of Suez is predominatly from the N.N.W. Winds are steadier in the Summer months (May-October) and almost nil from June to September. Gales can mainly be expected from a North-Westerly direction from October through May.

The maximum velocity is approximately 45 knots, whilst the mean wind speed is approximately 20 knots and is prevalent for some 98% of the year. There are occasional light Southerly winds.

Tides: The tidal range is between 3 ft and 4 ft.

Sea Condition: The surface temperature of the sea ranges from 18°C to 27°C depending on the season.

Seas and swells are usually from the N.N.W. and wave height can reach 18 ft. but average is about 6 ft. During the Summer months (May/August) there are many day's of 12 ft. – 15 ft. seas.

Currents are generally located in mid-channel and set North when the tide is rising in Suez and South when the tide is falling. The rate is about 1.5 knots at Springs and 0.5 knots at Neaps.

AUTHORITY: Suez Oil Company (SUCO), 21 Ahmad Orabi Street, El Mohandessin, P.O.Box 2622, Cairo, Arab Republic of Egypt. *Tel:* 650723, 650544, 807922, 813554, 807854. *Telex:* 93455 Suco Un, 92300 Suco Un. *Cables:* Dexgulf. *Contact:* S. Tadros, Chairman and Managing Director.

RAS GHARIB: 28.21 N. 33.06 E.

A natural port at the Western side of Suez Gulf sheltered by the Cape and a chain of reefs.

DOCUMENTS:

4 copies Crew List.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate.

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

PILOTAGE: Compulsory. International Pilot flag must be hoisted and Pilot will board vessel on arrival. Vessels should approach the anchorage from South-eastward and wait Southward of the Prohibited Anchorage until boarded by the Harbour Master who will pilot them either to moorings or to an anchorage clear of the prohibited area of the pipe-lines.

2 pairs of leading beacons stand about 4 and 5.5 cables, beside 3 others that stand about 12 cables Southward of Ras Gharib light-structure. About 2 cables further Southward are 2 leading beacons. All the above beacons are difficult to identify until close inshore.

ANCHORAGES: Ras Gharib Anchorage, South-westward of the Cape, affords some shelter, but a moderate swell round the Cape is experienced on most days. Vessels can obtain anchorage in depths of about 5 fathoms.

During most of the year there are Northerly winds, force 3 – 5, but in December and January there are occasionally calms. On very rare occasions, there are Southerly gales of short duration which make the anchorage untenable.

The Northerly wind causes some swell in the anchorage, but it is not normally severe enough to interfere with the working of lighters or boats of moderate size. It is, however, unpleasant for small boats, except alongside the piers, which are well protected.

Except in the vicinity of the piers, there is usually some swell on the beaches. There is practically no rainfall and sand storms occur only very occasionally and they do not interfere with work in the anchorage.

Anchorage is prohibited, owing to the existence of pipe-lines, within an area indicated by pecked lines on the chart.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor, specially when it is presumed that the sick will be hospitalised.

The vessel's personnel should carry international vaccination and/or inoculation certificates.

TUGS: 2 tugs, 400 h.p. and 80 h.p. available.

BERTHING: There is an ore pier where vessels may berth with max. draft of 11 ft. without any restrictions in length. Vessels with deeper draft may discharge whilst at anchorage on to supply boats.

Two cranes are available with capacities of 30 and 35 tons. Towage is also available.

TANKERS:

	Northern Pier No. 1	*Southern Pier No. 2*	*New Pier No. 3*
Depth at the pier	27 ft.	36 ft.	78 ft.
Max. permissible draft	24 ft.	32 ft.	55 ft.
Max. length for tanker	450 ft.	600 ft.	980 ft.
Min. length for tanker	350 ft.	500 ft.	600 ft.
Diameter of crude hose	18 in.	18 in.	30 in.
Diameter of water hose	10 in.	12 in.	18 in.
Min. capacity of tanker's derrick	5 tons	5 tons	5 tons
Loading capacity (t.p.h.)	650	1,200	2,000
Max. permissible load (tons)	8,000	30,000	100,000

Cargo: Ras Gharib Blend. API 24.1. Loading temperature 92°F/33°C.

SUPPLIES: Transit and fresh provisions as well as deck and engine stores provided by the United Arab Contracting and Marine Supply Company.

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain in his possession a max. of 50 cigarettes or 1 ounce of tobacco or 5 cigars. All other smoking items must be collected and listed before arrival. The list will be checked by Customs before sealing the locker, and any discrepancies will be subject to fines.

TIME: GMT plus 2 hours. GMT plus 3 hours (1st May – 30th September).

AGENCY: See "Suez Canal".

RAS SHUKHEIR: 28.08 N. 33.17 E. (See Plan)

Also see "General" before first Port.

ADVICE OF ARRIVAL: It is important that ships establish radio contact with "GUPCO" (Gulf of Suez Petroleum Co.) when 3 days distant from Terminal and maintain this contact until just previous to arrival at the Terminal. All ships should send a 72 hour ETA message to "Panintoil Cairo" giving the best estimate of ship's arrival time at the Terminal. This ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to "Panintoil Cairo" when the vessel is 24 hours and 12 hours distant from Ras Shukheir and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding ship's readiness to load on arrival and the number of hours that will be required to discharge ballast after ship is berthed in mooring.

6 hours before arrival, tankers should call Ras Shukheir on VHF Channel 16 to be advised if berthing is available or not, also to be advised of the approximate time for berthing.

DOCUMENTS:

4 copies Crew List.

Deck log books showing date of last call at an A.R.E. port, completed up to the time of arrival.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

Bonded Store List, in duplicate.

Crew List and Passengers' List in duplicate.

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

PILOTAGE: Compulsory. International Pilot Flag must be hoisted and Pilot will board vessel on arrival. Ras Shukheir Lighthouse is located in Lat. 28° 08′ 15″ N., Long. 33° 16′ 20″ E. It is a white flashing light, flashing every 3 seconds and visible for 10 miles.

Gebal Gharib, situated about 18 miles South-westward, 5,742 ft. high. It makes a nearly perfect equilateral triangle with Ras Shukheir and Ras Gharib Lighthouse. Ras Gharib Lighthouse is an excellent landmark whether by day or night for vessels approaching from North, but caution should be exercised since this Light is obscured from 308° to the Westward. The sea-berth buoys are unlit.

The company's Mooring Master will meet all incoming tankers about 2 miles from Ras Shukheir Terminal on a bearing of 290/300° from Ras Shukheir Lighthouse and will advise ship's personnel in mooring and unmooring, raising and lowering of hoses.

Vessels are requested to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Mooring Master's launch. If at night, adequate lighting must be rigged overside for the Mooring Master to approach the side and climb the ladder safely.

ANCHORAGES: There are a number of oil well installations, structures and submarine pipelines located in the Gulf of Suez opposite Ras Shukheir Terminal and approaching vessels are warned of these obstacles in manoeuvring and anchoring. Vessels should approach from the Eastward and if necessary anchor S.E. of the sea berth.

Never anchor North of the sea berth.

Tankers should only anchor in Ras Shukheir Anchorage Area which is located as follows:

Lat. 28° 04′ 30″ N.
Long. 33° 22′ 30″ E. (with radius of 0.5 miles.)

RESTRICTIONS: The Ras Shukheir Terminal operates 24 hours per day, 7 days a week. Ships are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, however, an exception may be made at the discretion of the Terminal.

HEALTH: The vessel's personnel should carry international vaccination and/or inoculation certificates.

BERTHING: One pier where vessels with max. length of 76 m. are alllowed to berth alongside with a max. draft of 15 ft. Vessels may discharge whilst at anchorage and propeller type lighters are available for such cargo operations.

Four cranes with capacities of 15, 30, 40 and 50 tons respectively are available together with floating crane with capacity up to 200 tons. Towage is also available.

TANKERS:

	Seaberth No. 1	*Seaberth No. 2*	*Seaberth No. 3*
Depth	75 ft.	95 ft.	90 ft.
Max. permissible draft	55 ft.	55 ft.	50 ft.
Max. length for Tankers	1,200 ft.	1,200 ft.	800 ft.
Min. length for Tankers	750 ft.	750 ft.	600 ft.
Numbers of Crude hoses	3	3	2
Diameter of Crude hoses	12″	12″	12″
Diameter of Ballast hose	12″	12″	12″
Min. capacity of Tanker's derrick	5 tons	5 tons	5 tons
Loading capacity (t.p.h.)	6,000	4,000	3,000
Max. permissible load (tons)	175,000	175,000	70,000

RADIO: The Alexandria or Port Said coast radio stations will handle GUPCO radio traffic. Ships may contact GUPCO through their cable address "Gupcoil Cairo". The message will be received on their Cairo Radio Telegraph Office local teleprinter circuit, tape perforated and relayed to the Ras Shukheir Terminal.

Cables from Ras Shukheir Terminal to the ships would be handled in the same manner. The Alexandria or Port Said coast radio stations transmit traffic lists at regular intervals listing the call signs of all ships for which they have traffic on hand. Thus any ship hearing its call sign in the traffic list of the coast station would call the coast station immediately after the traffic list.

VHF: When ships are near Ras Shukheir Terminal, they may use their FM/VHF radios to contact the Terminal using 160.70 MHz or 160.80 MHz (Channels 2 and 4).

SUPPLIES: Transit and fresh provisions as well as deck and engine stores provided by United Arab Contracting and Marine Supply Co.

SUBMARINE HOSE LOADING BERTH: Tanker is loaded by means of submarine pipe-lines to which are attached 2 or 3 hoses for loading and 1 hose for discharging ballast. A 36 in. pipe-line transports the oil and a 24 in. line in No. 1 Seaberth, or 16 in. lines in Nos. 2 and 3 Seaberths transports the dirty ballast to a ballast pit ashore. The loading berths are located approximately 3,580 ft. offshore in a water depth of approximately 80 ft. The loading and ballast lines are laid in the same trench and run in a direction 055°. The mooring buoys are numbered 1, 2, 3, 4, 5 and 6, starting No. 1 North of the mooring and running consecutively in a clockwise direction.

LOADING READINESS AND ARRIVAL TIME: The company will make every effort to load vessels upon arrival or as promptly as berth is available, weather permitting. Notice of Readiness will not be accepted as at time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered as the time the Mooring Master boards the vessel or the time that vessel anchors, whichever occurs first.

FRESH WATER: Not available.

FUEL: Not available.

REPATRIATION: Not recommended.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain in his possession a max. of 50 cigarettes or 1 ounce of tobacco or 5 cigars. All other smoking items must be collected and listed before arrival. The list will be checked by Customs before sealing the locker, and any discrepancies will be subject to fines.

TIME: GMT plus 2 hours.

AGENCY: See "Suez Canal".

SAFAGA: 26.46 N. 34.00 E.

DOCUMENTS: The following documents are required on arrival:

Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.

1 Crew List and 1 Passenger List.

Derat Certificate should be handy for inspection.

Clearance from Last Port.

Complete set of Manifests covering all cargo on board showing names of shippers and consignees.

4 copies List of Passengers in Transit.

4 copies Crew List.

Deck log books showing date of last call at an A.R.E. port, completed up to the time of arrival at Port Said or Suez.

PILOTAGE: Compulsory. International pilot flag must be hoisted and Pilot will board vessel on arrival. Masters should endeavour to arrive at the N. end of the island by sunrise, at Safaga Port by early morning; the light behind them will show up the reefs clearly. Wind, light in the morning, gains strength during the day, making tying up more difficult. A beacon (Morewood Beacon), visible a mile off, is erected on the Southern spit of the island. After rounding the spit, Masters keep 5 cables clear of visible reefs and enter the harbour keeping the 2 large beacons to the North of the pier in line. Anchorage is then indicated by a small red or white flag. The Manager, or his representative, of the Safaga Phosphate Company will meet ships in launch with instructions on berthing.

MAX. SIZE: Safe draft in the fairway, over reefs and alongside pier: 27 ft. 6 in.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor especially when it is presumed that the sick will be hospitalised.

The vessel's personnel should carry international vaccination and/or inoculation certificates.

BERTHING: There are 2 mooring buoys marked B and C and 2 mooring posts marked A and D.

(1) The anchor position is marked by a small red or white flag. When mooring, manila ropes only should be used, as wire ropes can be run out afterwards when ship is alongside.

(2) Due to rocky nature of sea bottom, it is very desirable that ship in coming into berth, does not override her anchor, as, if this happens, chain is apt to foul coral bottom and cause trouble later on.

(3) Endeavour to have all way off ship when anchor position is reached. Drop anchor as close to flag as convenient and go astern. If necessary check cable when 2 shackles have been paid out.

(4) Run rope to Buoy C, run rope to Buoy B, run rope to Post D, then run rope to Post A. Run Spring to S1, S2, S3, and pull alongside. Company's launches will run all ropes.

(5) If wind is blowing strongly off shore, a Spring may be run to S3, immediately a good rope to Buoy B is made fast.

(6) The best way to reach the anchor position is to steer straight for same, keeping Buoy C on port side. This will keep vessel clear of Buoy C and when anchor is dropped, the stern should swing clear of this Buoy. If it does not, a rope can be run to S3 and the stern pulled in before falling back on pier.

(7) With anchor dropped as shown, 6 shackles should see No. 1 hatch at the pier, but if chain is slackened carelessly, it may foul bottom and be insufficient to reach pier.

If visibility is very good, a course can be made between the Hyndman and Cannon Reefs, and altered to bring the beacons referred to into line.

Rock phosphate and ground phosphate are loaded at this port for shipment all over the world. The mines are situated some 30 km. away and are connected by company's own railway. Rock phosphate loaded (1,000 metric tons per day) from elevator and phosphate in bags by ship's gear.

Cargo vessels can berth alongside a new quay of 600 m. with a draft of 27 ft. Quay used for loading and discharging general cargo. It can accommodate 2 medium size vessels and one large vessel. Part of the quay is used by vessels discharging aluminium.

STEVEDORES: Canal Stevedoring Co.

SERVICES: Water, deck and engine stores and provisions provided by Egyptian Contracting and Marine Supply Co.

TIME: GMT plus 2 hours.

HOLIDAYS: See "Suez Canal".

DEVELOPMENTS: Grain berth to be extended to accommodate vessels up to 900 ft., 42 ft. draft and 75,000 d.w.t. Travelling gantry will have a discharge rate of 600 t.p.h.

SHIPMASTER'S REPORT: January 1981.

Pilotage: Vessels enter the inner anchorage without Pilot, and are allocated an anchor position by the Harbour Master. Pilotage for berthing is compulsory, and the Harbour Master acts as Pilot.

Entry or departure at night is forbidden, without special permission from the Naval Authorities.

Anchorages: Vessels are allocated an anchor berth in the inner harbour by the Harbour Master. Vessel anchored in the Northern part of the anchorage, with Morewood Beacon bearing 135.5° × 2.8 miles, in 30 m. of water, with 6 shackles of cable out, and no difficulties were experienced, despite a period when wind from the North of force 5, gusting 6, occurred when the ship had a 3,000 tonne coaster alongside.

Approaches: Vessel arrived off Safaga Island at approximately 2130 hrs. and no difficulty was experienced in anchoring with Morewood Beacon bearing 334° × 11 cables. The N.E. point of Safaga Island, and the headland near Bir Safaga showed up well on radar, as did Morewood Beacon, once identified.

Upon entering harbour the next morning at first light, a little difficulty was experienced in locating the leading beacons. From outside the harbour, the most prominent object visible is the alumina silo and elevator, and this uncharted feature being mistaken initially for the charted phosphate transporter, we were looking in the wrong place. Once sighted, however, the beacons were found to show up well in the early morning light. (These leading beacons are fitted with Fixed Red lights, but these are only turned on when Naval Vessels are entering or leaving port by night). A can shaped mooring buoy situated in the middle of the inner anchorage just North of the leading line is of assistance, but the buoys marking the dredged channel are non-existent. This mooring buoy is a handy turning point for ships proceeding to the Northern part of the anchorage.

A partly ruined beacon is visible on the sand spit at the Southern end of Safaga Island approximately 3 cables from Morewood Beacon.

Of the two stranded wrecks charted on the S.W. shore of the inner anchorage, the Northern one (marked PA) has been salvaged. The Southern one is conspicuous, and afloat at high water. It is reported that this one may well be salvaged soon.

There appeared to be little or no tidal stream or current to speak of in the inner anchorage, vessel lying to the wind most of the time.

Max. Size: The largest size of ship handled is about 50,000 tonnes d.w.t., with a max. draft of about 11 m.

Radio: There is no radio station at Safaga, and telephone/telex links are minimal. Harbour authorities wishing to communicate with ships entering use VHF sets of ships alongside. We maintained a normal sea watch (1 Radio Officer) both at anchor and alongside, and good communications were obtained with Portishead Radio.

Tugs: There are no tugs available.

Berthing:

Commercial Wharf: Approximately 500 m. in length.

This has 3 berths at present. No. 1 Berth is the one at the N.E. end, No. 2 Berth in the middle, and the alumina berth at the S.W. end.

Nos. 1 and 2 Berths are kept exclusively for the discharge of wheat; cement ships use the alumina berth by private arrangement. Depth alongside No. 2 Berth is officially 9.1 m., but reported deeper. (We berthed drawing 9.6 m.) and at No. 1 Berth the depth is stated to be 9.7 m. alongside, but 11.0 m. if barges are placed between the ship and the quay. Works are in progress to extend the commercial wharf Northeastwards from No. 1 Berth almost up to the Naval Wharf, which extends as marked on the chart.

The Oil Jetty charted to the South of the town is reported to be part of the Naval Base.

Cargo Handling: Bulk wheat is discharged by portable pneumatic conveyors (vac-u-vators) into hoppers on the quay, where it is bagged and taken away by lorry. (Discharge rate for this vessel approximately 1,900 tonnes/day).

Alumina is discharged direct to the silo by fixed elevator.

Cranes: There are no cranes on the wharves. It was reported that there is a mobile floating crane, of 15 tonnes SWL at 35 m. radius, although this was not seen by us. A small floating crane is in use for the extension works.

Medical: A doctor is available, and will visit ships at the inner anchorage. Cholera Vaccination Certificates are required, and the doctor will do vaccinations.

Density: 1030.

Fresh Water: There is a limited supply of fresh water, the quota being 500 tonnes a month for all ships, but this is expensive. A price of $12.00 per tonne was quoted.

Fuel: No fuel oil of any kind available.

Consuls: None locally.

Repairs: The nearest repair facilities are at Suez.

Gangway/Deck Watchmen: Employment by the ship of shore watchmen is compulsory, and they have to be accommodated on board both alongside and at the inner anchorage. Whilst shore labour is onboard, a policeman is placed on board to guard the ship's accommodation.

Shore Leave: Permitted, passes being issued when ships are alongside, although apart from one hotel there is very little to do in Safaga. Agents can arrange trips to the River Nile, Valley of the Kings, etc., but special passes are required.

General: Provisions: Fresh provisions are available in season, and a chandler will visit ships without prior appointment.

Cargo Handled:

The principal activities of the port are:

(i) Import of wheat: approximately 100,000 tonnes/month.
(ii) Import of alumina: 60 – 75,000 tonnes/month. (3 – 4 ships).
(iii) Import of cement: 13 – 15,000 tonnes/month. (1 – 2 ships).
(iv) Export of phosphates: approximately 20,000 tonnes/month. (1 – 2 ships).

(i), (ii) and (iv) are all under the control of the Egyptian Government, (iii) is carried out privately.

SHIPMASTER'S REPORT: September 1982

1. Pilot does not board on arrival. Ships have to enter port without Pilot, even with no port chart, as I just found out, when a ship came in without a chart. Pilot only gave advice by VHF.

There are very good visible leading markers (red and white), also 5 buoys have been laid out marking the dredged canal. They are ordinary unlit mooring buoys. Pass between these buoys with the leading beacons 310° True and vessel is clear of dangers. On the 5th buoy, which is (single) on vessel's starboard side vessel can turn out of the channel and proceed to any place outside the 310° lead.

2. Discharging grain, draft limit 36 ft. 6 in., berthing against 2 lighters to keep vessel in deep water. After discharging to 31 ft. lighters are taken away and vessel goes alongside. With 30 ft. vessel shifts to Berth No. 2 to finish. Daily rate of discharge is about 3,600 tonnes.

3. The price of fresh water is US$15 per tonne. Water comes by pipeline from Nile River not by barge from Suez.

4. Berthing: Use starboard anchor. A motorboat takes first 2 headropes then 2 stern ropes ashore and then heave the ship alongside. Pilots are careful.

Mooring: Have 3 headropes, 2 breastlines and 1 spring ready (same aft).

When shifting from Berth No. 1 to No. 2 ship does not shift along the berth but makes a new berthing due to anchor.

SHIPMASTER'S REPORT: January 1983.

Pilotage: The Harbour Master has ceased allocating anchorage and ships now anchor wherever they like inside bay. Our vessel is 610 ft. long and drawing 36 ft. 6 in. and like your earlier report arrived and anchored half a mile South of Morewood Beacon at 2140 hrs. and moved up to anchor four cables from grain berth in the morning. Passage over reef crossing bay (apart from clearly shown leads) is now marked by four mooring buoys and channel is 13 m. depth.

Berthing: There is now a 900 h.p. tug to assist. The new berth towards the Naval Wharf is nearing completion. We berthed at No. 1 drawing 11.13 m. with barges between ship and quay.

Fresh Water: Now costs U.S.$19.75 per tonne. Service is prompt when needed.

ADD SMR

AUTHORITY: Ports and Lights Administration.

AGENCY: See "Suez Canal".

SIDI KERIR: 31.06 N. 29.37 E. (See Plan)

DOCUMENTS: Free zone area, no entry documents to the offshore terminal are required.

PILOTAGE: SUMED's Mooring Master and his assistant board the tanker 2 miles North of Buoy A1.

Notifications: ETA messages should be sent by cable via Alexandria/Port Said Radio on leaving previous port. Cables should be prefixed "For urgent delivery send via Telex 54108 or 54033 SUMED UN" and be confirmed 72, 48 and 24 hours prior to arrival. (Day and night berthing and operation). Arrival draft should be indicated. Vessels should arrive with a trim of 8 ft. by the stern and appropriate ballast to ensure that propeller is completely submerged.

LOCATION OF BUOYFIELD: (SBMs)

A1: Lat. 31° 06′ 26″ N., Long. 29° 36′ 46″ E.
A2: Lat. 31° 05′ 32″ N., Long. 29° 35′ 38″ E.
A3: Lat. 31° 04′ 24″ N., Long. 29° 35′ 37″ E.
A4: Lat. 31° 04′ 54″ N., Long. 29° 37′ 39″ E.
A5: Lat. 31° 05′ 40″ N., Long. 29° 38′ 24″ E.

ANCHORAGES: Tankers can anchor to the North and N.W. of the buoyfield.

MAX. SIZE: The five berths are spaced one from the other so that each has:

Mooring Area Radius: 410 m. for A1 and A2 (accommodate vessels up to 285,000 d.w.t.); 320 m. for A3, A4 and A5 (accommodate vessels up to 130,000 d.w.t.); Manoeuvring Area Radius: For A1 and A2, 1220 m.; For A3, A4 and A5, 915 m.

Water Depth and Draft Limitations:

For A1 and A2: 85 ft. minimum water depth
75 ft. maximum draft
For A3, A4 and A5: 60 ft. minimum water depth
52 ft. maximum draft

RADIO: All messages to be sent via Alexandria/Port Said Radio. Sidi Kerir has a HF long range radio working on 2182 kHz and 4142.5 kHz.
VHF: Channels 16, 78 and 79.
TUGS: Tug "Kerir" 3100 h.p. with fire fighting and anti-pollution equipment is available as required.
Mooring Launches: 500 h.p. mooring launches assist in mooring and hose operations.
BERTHING: *Ship's Derrick:* The ship's derrick should be capable of lifting 10 tons and rigged on the port side ready on arrival to take the gear on board for berthing the ship and connecting the hoses.
Hoses: Each berth has two cargo hoses with a 16 in. connection (ASA 150). There is a ballast unloading facility with 16 in. connection. Connection of hoses to be performed by the vessel under the supervision of SUMED's Mooring Master.
Loading/Deballasting Rates:

Buoys A1 & A2	Loading	Max. 12,000 tonnes per hour
	Deballasting	5,000 tonnes per hour
Buoys A3, A4 & A5	Loading	Max. 10,000 tonnes per hour
	Deballasting	3,000 tonnes per hour

Shipmaster's report: January 1986.
Dirty ballast reception: 1×16 in. floating hose. Hose to be connected by ship's crew together with cargo hoses. Max. discharge pressure 100 p.s.i. according to loading master there is no limit on quantity.
SUPPLIES: No bunkers or supplies are available or permitted.
MEDICAL: Private doctors and hospitals are available in Alexandria.
SHORE LEAVE: There is no shore leave for personnel of vessels loading at Sidi Kerir Terminal (disembarkment from vessels is strictly forbidden except in emergencies).
AGENCY SERVICES: Not required under normal circumstances.
TIME: GMT plus 2 hours.

SHIPMASTER'S REPORT: *General:* Sidi Kerir is the Northern end of the pipe-line from Ain Sukhna in the Gulf of Suez. The pipe-line is owned by the Arab Petroleum Pipeline Co. and operated by SUMED Co. (Suez – Mediterranean).

The Sidi Kerir Terminal (Tankfarm) position is at Lat. 31° 03′ N., Long. 29° 40′ E. There are at the moment 5 SBMs for loading vessels, more are planned for the future. The buoy field is marked by the following points: "A" Lat. 31° 08′ N., Long. 29° 37′ E., "B" Lat. 31° 04′ N., Long. 29° 31′ E., "C" Lat. 31° 01′ N., Long. 29° 35′ E., "D" Lat. 31° 05′ N., Long. 29° 41′ E.

The area within ABCD is a prohibited anchorage area and may not be entered without a Pilot.

The position of the 5 SBMs is within the area:
1. Lat. 31° 06.7′ N., Long. 29° 35.7′ E. For loading Arabian Light & Kirkuk Crude.
2. Lat. 31° 05.9′ N., Long. 29° 36.9′ E. For loading Arabian Light & Kirkuk Crude.
3. Lat. 31° 04.6′ N., Long. 29° 36.9′ E. For loading Arabian Light & Kirkuk Crude.
4. Lat. 31° 05.0′ N., Long. 29° 37.9′ E. For loading Arabian Light & Kirkuk Crude.
5. Lat. 31° 05.1′ N., Long. 29° 38.6′ E. For loading Basrah Crude.

(a) The current sets usually from N.W. at about 0.5 knots but may increase during Summer to 1 knot; there is no considerable tide.
(b) References: BA Chart 3356; BA Pilot Book 49, 6th edition 1976.
Documents: One crew list, one ship's stores list and clearance from last port.
Pilotage: Pilot also acts as Loading Master and boards vessel at the anchorage. A pilot ladder/accommodation ladder combination is to be rigged on the starboard side. Vessels must give a lee for the pilot launch. Pilots work preferably during daylight hours.
Anchorage: The anchorage is one to two miles North of the buoyfield in 20 to 40 fathoms of water. There is good holding ground on sandy bottom; no shelter during Northerly winds or swell. The port closes during strong winds and swell. An open sea approach; no dangers on the way to the anchorage. The coastline is low desert and gives a poor echo, the best radar echo during the approach was the tankfarm and the pipe-line.
Max. Size: Max. draft 70 ft. No limit on size of vessel.
Radio: ETA information to be given preferably via Alexandria Radio to telex number 54108 attention "SUMED operations – Alexandria" at 72, 48, 24 hours prior to arrival. Initial message should give call sign; Summer deadweight; Summer draft; cargo requirements with name of crude and approximate quantity required in cubic metres and long tons, also maximum loading rate required in cubic metres; last port; whether vessel carries 2 × 16 in. reducers.
Health: Free Pratique is given by the Pilot/Loading Master.
Tugs: One tugboat, 5,000 h.p., is on standby at the buoyfield and will assist on request.
Berthing: The vessel moors to a SBM. The mooring equipment, 2 wire slings, 2 shackles and a toolbox, are taken from the launch.
SBM Loading Berth: The hoses are connected by the ship's crew under the supervision of the Loading Master. The (2×16 in.) hoses are of a floatable type with a Camlock connection.

The maximum loading rate is given as 15,000 cu.m./h. or as requested by vessel. Before completion of cargo the pumps are stopped and the balance loaded by gravity. At the present time the dirty ballast facilities are under construction.
Repairs/Drydocks: At Alexandria about 12 miles to the East. No facilities at Sidi Kerir.
Time: GMT plus 2 hours.
Density: 1026.
Supplies/Services: None.
Authority: The Pilot/Mooring Master acts as Government Representative.

AUTHORITY: Arab Petroleum Pipeline Co. – (SUMED), 9 Amin Yehia Street, P.O.Box 2056, Zizinia, Alexandria, Egypt. *Tel:* 64138, 64139. *Telex:* 54108 Sumed. *Cables:* Sumed Alexandria.

SUEZ CANAL (including Port Said and Suez): (See Plan)

Also see "Rules of Navigation".

FLAG:
1. Change the hawk with Golden Eagle on the Egyptian flag.
2. The size of the flag to be not less than 135 cm.×90 cm.
3. Colour same – no change.

DOCUMENTS:
The following documents are required on arrival:
The last Classification Certificate issued.
Information concerning a vessel transiting the canal.
4 copies Crew List.
*Ship's Register and Suez Canal Special Tonnage Certificate.
General arrangement and capacity plans of the vessel, if transiting the Suez Canal for the first time, or, undergone any alterations.
Suez Canal Authority's double bottom tanks capacity form.
Navigability form.
Complete set of Manifests covering all cargo on board showing names of shippers and consignees.
4 copies List of Passengers in Transit.
Landing cards for passengers landing finally in the A.R.E. and for those landing in the A.R.E. in transit.
4 copies List of Passengers finally landing in the A.R.E. (if any) together with their addresses in the A.R.E.
Deck Log Books showing date of last call at an A.R.E. port, completed up to the time of arrival at Port Said or Suez.
Mail Waybills for ports beyond Suez Canal ports and alternatively, a document from the Master is required (cargo and passenger ships only).
Quantity of bunkers, water and cargo on board.
Free Pratique Certificates issued by the local Quarantine Doctor.

In case of a Northbound vessel loading or discharging alongside quay staying more than 24 hours in Suez, the following documents should also be presented.
(1) Load Line Certificate.
(2) Safety Equipment Certificate.
(3) Radio Safety Certificate.
(4) Documents covering names and ratings of ship's officers and their certificates.

* It is essential, to have amongst ship's documents, on board the vessel valid National Ship's Registry Certificate showing latest ship's name and her present Owners.

The above procedure is requested by the Suez Canal Authority, Traffic Control, to avoid delay for ships in joining the first convoy, or being liable to be stopped in the Canal in case of direct transit from Roads.

Advance notice to both Suez Canal Authority's Traffic Control and Measurage, with minimum period of 48 hours prior arrival.
For Pilot's Use:
(1) Arrival form of the Suez Canal Authority.
(2) Declaration "E" form for dangerous cargo on board in transit.
(3) Any other documents relating to shipments of dangerous cargo, radio-active or fissile.

N.B. Plain Suez Canal Forms are normally handed to Master by Pilots or ship's Agents, to be filled on arrival and also for use on consequent voyages.
Quarantine Authorities:
Quarantine Questionnaire in duplicate (Form No. 15 Q.A.) showing all ports of call, as well as dates of sailings for the last 30 days, nature of cargo on board, destination, as well as sickness among crew or passengers, if any, specially when it is presumed that the sick will be hospitalised. These forms can be filled on arrival if not available on board before arrival.
1 Crew List and 1 Passenger List.
Derat Certificate should be handy for inspection.
Clearance from last port.
Passports:
For Immigration Officer the following documents are required on arrival:
Arrival Immigration form, duly completed.
1 Passenger List.
List of Passengers finally landing, in duplicate.
Crew List.
Valid passport with entry visa is required for landing in A.R.E. for passengers landing. Emergency visa can be granted on arrival if so required.
For Customs Use:
(1) Bonded Store List, in duplicate.
(2) Crew List and Passengers' list in duplicate, showing rate of consumption of each.

Shipmaster's Report: January 1984.
Crew Personal Effects Declaration – Not required.
Bonded Stores Declaration – Not required.
Stores List – Not required.
The Bonded Store is not sealed.

The ship's Log books are not taken ashore but the Certificate of Registry is taken in Port Said and returned at Suez.

Circulars: Issued by Canal Shipping Agencies Company, Port Said:

Circular No. 42/81: To all Shipowners and Masters.
We append hereunder free translation of Circular No. 2004/T81 received from the Deputy Manager, Transit Section, Suez Canal Authority, Port Said:

"It has been noticed that the necessary notification which should be given before the ship's entry in harbour in case of carrying dangerous cargo on board is neglected by Masters who also fail to fulfil the relative declarations, as stipulated in the Suez Canal Authority's Rules of Navigation Appendix for Vessels Carrying Dangerous Cargo (Edition 1977), which may expose both the vessel and the port to risks arising from the goods in question.

Kindly, therefore, draw the attention of Owners and Masters to the necessity of adhering to the said rules, noting that the Master will be entirely responsible navigably and criminally for any occurrence which may arise from failure to give the required notification, inaccuracy of details or omitting to take the necessary precautions on board".

Circular No. 23/82: To all Shipowners and Masters.

We once again should like to draw your kind attention to the fact that some Owners abroad do not provide the Protection Centre, Nuclear Researches Centre of the Atomic Energy Establishment, Cairo with sufficient information in respect of such shipment on board their vessels.

In this connection, we would refer to our Circular No. 3/79 dated 6th January, 1979, text of which is quoted hereunder for your easy reference.

"According to Circular No. 4/3BA-406012, dated 1st September, 1964 and the amending Circulars issued by the Transit Section of the Suez Canal Authority and also the Suez Canal Authority's Rules of Navigation Appendix for Vessels Carrying Dangerous Cargo, the transport of radioactive substances carried by vessels transiting the canal are subject to protective conditions concerning transportation and transit, as specified therein, with the object of ensuring the safety of the said water channel and its environment.

However, it has lately been noticed that due attention is not given by Shipowners and Shippers abroad to forwarding the relative complete data which must reach the Atomic Energy Establishment before each shipment with regard to substances of Group 1 or on shipment with regard to substances of Group 2, this being in accordance with Item 3 of the aforesaid circulars and also Chapter 3 of the Appendix in question.

Kindly, therefore, advise Shipowners and Shippers that all the said conditions should be fulfilled, especially regarding the complete information relating to radioactive substances which should be sent immediately upon its receipt to: Head of the Protection Section, Nuclear Researches Centre, Atomic Energy Establishment, Atomic Energy Post Office, Cairo.

This will enable us to take the necessary action to safeguard public interest.

We add that it is of vital importance that you also supply your Agents with all the required relative information and documents sufficiently in advance, to enable them to take the necessary action with both the Suez Canal Authority and the Atomic Energy Establishment in Cairo.

MAX. SIZE: *Directorate of Transit, Suez Canal Authority Circular No. 432832 (7.3.85):*

Quote

Recently several shipowners contacted the S.C.A. requesting the possibility of transiting their vessels at a draft over 42 ft. Southbound.

To help canal users, specially nowadays, with the present world situation in shipping, the S.C.A. undertook some studies and decided to allow such vessels to transit the Canal, on the following conditions:

1. Any tanker or vessel may transit the Canal Southbound at a draft over 42 ft. and subject to our Circular No. 432144 dated 24.10.83, regarding beam and speed of 13 km./hr. (Also see "Rules of Navigation").
2. The Suez Canal Authority is to be informed at least one week before loading.
3. Owing to special traffic arrangement and precaution taken by the S.C.A., additional charges will be levied for each case separately.
4. As each case is studied, the following information is required:
   (a) Port of loading and discharging.
   (b) T.P.I.
   (c) Beam, d.w.t., S.C.N.T.
   (d) Last transit and maximum draft.
   (e) Transit draft for particular transit Southbound.
5. If vessel is up to 150,000 d.w.t., one tug escort.
   If vessel is over 150,000 d.w.t., two tug escorts.
   A rate of 5,000 S.D.R. will be charged for each tug escort.

HEALTH: On entering, vessels must hoist the International Quarantine Signal for compulsory quarantine. Any sickness must be reported to the doctor specially when it is presumed that the sick will be hospitalised. The Quarantine doctor meets the ships whilst entering the port and the ships are boarded in turn. To get a quick clearance and not to be left for later attendance, Masters are requested to receive the doctors as soon as they board and to have the following documents ready:

Quarantine Forms in Duplicate: When inserting the ship's register net tonnage special care should be taken in indicating same on the 2 quarantine forms (Form No. 15 Q.A.) as the dues are calculated on that tonnage, as incorrect information may cause complications.

Derat Certificate should be handy for inspection.

Clearance from Last Port should also be handy.

All ports at which the vessel has called as well as dates of sailings for the last 30 days should be inserted in the form.

Quarantine Signals:

By day: "Q" flag (signifying vessel healthy). *"Q" Over first substitute (QQ).* (Vessels have cases of infectious diseases more than 5 days ago, and there have been unusual mortality among the ratings or crew on board.) *"Q" over L flag (QL)* signifying (vessel is infected and has cases of infectious diseases less than 5 days ago.)

By night: red light over white: The flags and lights must remain hoisted until free pratique is granted. Ships in transit under Quarantine through the Suez Canal will use the same signals until they clear the other end of the Canal.

Important: In the event of a vessel arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of the ship's arrival at an A.R.E. port the vessel is put under compulsory Quarantine, moored at an isolated berth and no shore contact is allowed. Nevertheless, the ship can still carry out her normal operations on condition that all shore personnel are holding valid vaccination and/or inoculation certificates issued by the Quarantine Administration. The ship's personnel should also carry International Vaccination and/or Inoculation Certificates. Final landing passengers, not carrying such certificates, will be landed under Quarantine supervision and will be kept isolated at the lazarette until incubation period is over.

Pratique Granted by Radio: Pratique may be granted prior to ship's arrival provided the following conditions are adhered to:

(1) The vessel must be a regular liner known to the Quarantine Authorities and has a doctor on board.
(2) Details shown on the Quarantine Statement should be radioed to the Quarantine Authorities 24 hours prior to ship's arrival.
(3) Masters of vessels must declare before their arrival any accidents which might have taken place on board prior to the arrival in port.
(4) The ship must not have called at any infected port.

RADIO: *Authorised Personnel Checks:* Masters of vessels are requested to contact the Suez Canal Authority via its wireless station "SUQ" (watch frequencies 425 kHz, 454 kHz and 468 kHz) whenever they want to make sure of the identity of any Suez Canal personnel embarking their vessels, either in the approaches or in the harbours or in the Canal waters. Also in case of any urgent complaints which may need quick investigation.

TUGS: Highly qualified crew are available on board several tugs owned by the Suez Canal Authority in Port Said, Suez and in all Suez Canal stations. These tugs assist vessels to berth in Port Said harbour as well as in Canal if a case arises. It is left solely to the Canal Authority to decide whether more than 1 tug is needed (free of charge) to assist any ship to moor in the Port Said harbour, but if a Master of a vessel finds it necessary to employ an extra tug for berthing or if he needs a tug for any other reason, such an operation will then be charged against the vessel.

Salvage Tug Boats:

(1) 3,200 h.p. *Mounir, Moawen 1, Moawen 2.*
(2) From 3,500 to 5,000 h.p. *Antar, Bassel, Barei, Fahd.*
(3) 6,400 h.p. *Mared, Shahm.*

Harbour Tug Boats:

1,600 h.p. *Bori, Wakar, Chadid, Hout, Kirsh, Morgan, Shabar.*

**Note:* In good weather the length on buoys may be increased from 3 m. to 9 m. according to the length of the berth and height of the vessel.

Quays at Port Said: The Suez Canal Authority has quays to enable vessels to berth alongside at Cheriff and Abbas Basins. Length about 1300 m. Height about 2 m. from sea level. Also 14 cranes of 3 tons lifting capacity each, running on rails have been installed. Maximum draft allowed is 27 ft. The best part of these quays is ready and vessels with full cargo for discharge are now berthing alongside. Vessels drawing more than 27 ft. have to lighten their cargo into lighters to that draft before berthing.

The distance between Bollards 23 and 24 South of deep Abbas Quay (30 m.) has been reserved for the berthing of one Ro/Ro vessel by the stern, within the present allowed draft (27 ft.).

Height of quay from sea level: 2 m.
Average tide all year: from 40 to 50 cm.
Thickness of fender: about 50 cm.
Breadth of quay edge: from 50 to 60 cm.

Developments: Container quay length 350 m. under construction. Depth 45 ft. 2 cranes will be installed.

An additional 250 m. quay is planned and will serve as a multi-purpose quay and be equipped with a gantry crane.

Grain vessels of 45,000 d.w.t. can berth alongside a 100 m. length hulk with 2 barges as spacers. Rate of discharge 400 t.p.h. Storage capacity: 10×400 ton silos and 1×20,000 silo.

Suez:

Port Ibrahim: Port Ibrahim is the port of Suez. It consists of North and South basins.

North Quay: The North basin has, on the North side, a quay length of 2,415 ft. a total breadth of 975 ft. and depth of 26 ft. at high tide. Quay can accommodate 4 large ships.

Berths 4 and 5, where stores are available, are suitable for general cargo.

Khedivial Quay: Berths Nos. 9, 10 and 11, length 119 ft., depth 24 ft. at high tide.

Mobile cranes available; 5 tons, 15 tons and 30 tons capacity.

Pilgrim's Quay: (Pontoon Berth) No. 6, 1 berth, length 1,000 ft., draft 26 ft.

Adabiya Quay: This quay is situated on the Western shore of the Suez Bay, and is under the control of the Naval Authorities. The max. draft is 26 ft. 06 in. and can accommodate 4 large vessels. Max. length of vessel allowed to berth alongside quay 500 ft. Mainly bulk wheat discharge and direct delivery of general cargo.

Marakib Quay: Situated at the entrance of the Canal depth 28 ft.; can accommodate passenger and cargo vessels.

Storage Capacity at Suez:

North Quay	40,150 sq.ft.
Pilgrims Quay	20,952 sq.ft.
Khedivial Quay	8,448 sq.ft.
	69,550 sq. ft.

While stacking spaces on the quays are: 332,050 sq.ft.

STEVEDORES: As stated in the ETA messages, Masters are advised to include in their messages details of cargo to be discharged in either Port Said or Suez, hatch by hatch and gangways required, if possible. All loading and discharging operations in Port Said harbour and Suez Roads are effected by lighters. There are steel lighters, and self-propelled barges available for this purpose that will allow rapid work to be carried out. At Port Said several reefer ships are provided with flat floating pontoons to facilitate discharge of cargo. At Port Said the draft of water does not allow ships to be berthed alongside quays to carry out cargo operations except in Cherif and Abbas Quays which accommodate vessels up to 27 ft. and consequently same are carried out also from and into lighters which are brought alongside the vessels whilst at anchor.

MEDICAL: It is very essential for Agent to receive advance notice of required medical attendance at least 24 hours prior to ship's arrival. All ordinary medical supplies are available and prescriptions are executed at any time at moderate prices and delivered during ship's stay in port. Medical assistance at Port Said and Suez is available. Consultations on board could be arranged through ship's Agent at any time by day or night. Reliable dentists are available at Port Said and could be consulted on board, if necessary, and during the following period at their clinics: From 0900 to 1300 hrs. and from 1600 to 1900 hrs.

Oculists are available for consultations at town clinics in Port Said during usual working hours. Opticians are also available at Port Said. The following hospitals are available with ample first, second and third class accommodation, accepting patients irrespective of nationality at reasonable charges:

At Port Said	*At Suez*
Al Mabarra Hospital	Al Mabarra Hospital
Notre Dame de la Deliverande Hospital	Abou El-Azayem Hospital
Two General Government Hospitals	General Government Hospital
T.B. Hospital	Isolation Hospital
Isolation Hospital	Ophthalmic Hospital
Ophthalmic Hospital	

Ship's personnel should carry international vaccination and/or inoculation certificates if a vessel is arriving from a port that has been internationally declared infectious and the incubation period has not yet expired at the time of arrival.

TANKERS: There is a bunkering station at Port Said harbour which can accommodate 4 tankers with not more than 38 ft. draft for the purpose of discharging their cargo of fuel or diesel oil to the different oil bunkering companies.

Tankers in Suez discharging bunkers and changing crew do so in the New Suez Terminal or the Suez Petroleum Basin. Tankers in Port Said discharge bunkers only.

Oil Storage: There is ample tank storage for bulk petroleum products.

New Suez Terminal: The terminal is situated in Suez Roads.

(1) Presently one berth has been reconstructed and is used by tankers chartered by EGPC.
(2) Minimum depth of water at LWOST in the approach Channel is 38 ft.
(3) Minimum depth of water at LWOST alongside each berth is 38 ft.
(4) Maximum safe length of tanker applicable 750 ft.
(5) Six pipe lines each berth:–
    4 lines × 20 in.
    2 lines × 16 in.
    1 line × 4 in. (fresh water)
(6) All types of oil products can be handled at this berth.
(7) No facilities are available at present for reception of ballast.

Suez Petroleum Basin:

Jetty No. 4 can take tanker length 500 ft. with 26 ft.draft.
Jetty No. 5 Max. length 530 ft. Max. draft 26 ft.
Jetty No. 7 Max. length 570 ft. Max. draft 26 ft.

There are sufficient pipes for discharge.

FRESH WATER: Available for supply ex self-propelled barges to any quantities required at all times with minimum supply of 50 tonnes for vessels exceeding 500 tonnes gross provided vessels inside the harbours, vessels at anchorage areas minimum supply quantity is 200 tonnes.

Canal Shipping Agencies Company – Circular No. 123/84:

Fresh water supply for Southbound vessels in Bitter Lakes and Ballah West Branch:

Owners and Masters are hereby notified that Southbound vessels entering the Canal direct from sea, will be able to have their fresh water supply while at anchor in the Bitter Lakes or in Ballah berths as from 20th November, 1984.

The Suez Canal Authority has its lightening vessel "Nagda I" stationed at Ismailia and ready for this purpose.

The vessel "Nagda I" is 3,200 d.w.t., 85 m. long, 15 m. breadth and her fresh water tanks capacity is 1,200 tons.

Demands for fresh water should be made through the Agent representing the vessel, 24 hours pre-arrival, to Port Said harbour, price per ton of fresh water is the same as in Port Said harbour against receipts signed by Masters for the quantities received (minimum quantity is 200 tons).

FUEL: Different grades of fuel oil are available from different firms. It is customary that the Master should advise in his ETA message of the vessel's requirements, fuel or diesel oil, at least 24 hours prior to ship's arrival into port. Bunkering is by contract between the Owners and the different bunkering firms, and nominations should be arranged for each vessel separately between the Owners and Head Office of the bunkering firm abroad, and for which payment is also effected abroad. Only the Compagnie Orientale des Petroles accepts payment in cash out of Shipping Account No. 2 for supplies effected by them and in which case a nomination is not required. Vessels can be berthed in the oil installation and thus can effect their bunkering requirements through pipe-lines. Tankers which are not gas-free, cargo vessels carrying dangerous materials and passenger vessels, which are moored opposite the town, can be supplied with requirements of fuel and diesel oil ex self-propelled barges with max. capacity of 700 tons.

Port Said: Vessels can also be supplied at the anchorage areas and in Port Berths by means of supply tankers and self-propelled barges respectively.

Suez: Bunkering always done ex-barges.

FIRE PRECAUTIONS: In accordance with the Suez Canal Authority's regulations, tankers and vessels carrying dangerous materials must comply with their requirements, concerning fire regulations.

GANGWAY/DECK WATCHMEN: In both basins Cherif and Abbas at Port Said, where cargo vessels are normally berthed, ships' gangways can be used for disembarkation and embarkation. Passenger vessels are moored in special berths, i.e. Red Buoys, opposite the town, and can be supplied with 1 or 2 floating bridges (snake pontoon) which can connect the ship with the shore to enable the transit passengers and members of crew to proceed ashore. Cargo ships and other vessels mooring at the different buoys must lower their gangway to facilitate disembarkation and embarkation of ship's personnel as well as different officials. As far as Suez is concerned, all vessels must lower their gangway for the same purpose stated above. A deck watchman is recommended.

Also see "Police/Ambulance/Fire".

Circular No. 74/84:

1. Each vessel tanker and/or floating unit of any type which berths in Port Said and/or Suez either to transit the Suez Canal and/or to carry out operations has to engage watchmen in the following procedure:

Gross Tonnage of Floating Unit	*Minimum No. of Watchmen to be engaged Per Unit*
(a) Up to 999 tons	1 watchman
(b) From 1,000 tons to 2,999 tons	2 watchmen
(c) From 3,000 tons and over	3 watchmen
(d) Passenger ships	According to Master's requirements with a minimum of 3 watchmen.
(e) Large cargo ships	

2. Each Contactor has to submit to the Master a list showing names of watchmen engaged and their serial numbers.

3. The vessel has to ascertain that each watchman is in possession of an identity card and/or badge bearing a serial number, photo and name of the marine contractor through whom he has been engaged.

4. Masters are kindly requested not to sign blank receipts as it is recommended to keep a copy of same onboard for perusal in case of need.

5. Any incident concerning watchman's attitude on board has to be reported immediately to the Agents so that necessary steps can be accomplished on the spot for the safeguard of ship's interests.

Circular No. 86/84:

On the occasion of the current security precaution measures adopted at present, kindly advise Owners and Masters to the following steps:

1. Upon ship's arrival in Canal waters, security personnel may board vessels with at least two persons with certified identity cards issued by the Suez Canal Security Directorate. The above procedure is a part of security plan to safeguard ships' transit in the Canal due to the prevailing circumstances.
2. Utmost care and accuracy to be taken in relaying information about ship's tonnage and all particulars concerning cargoes onboard, thus complying with manifests, avoiding ship's delay or checking.
3. Special attention to be given on passing information for expected vessels either from the North or the South, and immediate notice for any alteration to be relayed to concerned parties with a minimum period of 6 hours before arrival at Anchorage Area to avoid being delayed.

OPENING/CLOSING HATCHES: In accordance with Charter Parties, the opening and closing of hatches are dealt with as instructed in this Agreement; but for vessels carrying out minor cargo operations, it is customary that stevedores open and close ships' hatches against ships' account. To expedite vessel's transit, it is always recommended that ship's crew, during vessel's entering into the harbour should open the hatches and rig ship's derricks in order that they may be ready for cargo operations immediately upon ship's arrival at either Port Said or Suez.

CUSTOMS ALLOWANCES: Every member of crew is entitled to have 1 carton of cigarettes, 8 ounces of tobacco, and 1 bottle of spirits for his own consumption during ship's stay in Port Said, Suez Canal transit, until vessel exits the Canal or vice-versa. Same applies to passengers, and a limited quantity of bonded stores can be permitted in public rooms and bars on passenger ships. Crew and passenger list, in duplicate, showing the amount in possession of each must be ready on vessel's arrival for submission to the Customs Representatives who normally proceed on board on arrival to seal up the Bonded Stores.

CARGO GEAR: These are normally supplied by the stevedores to comply with the nature of cargo discharged or loaded from cargo ships. Rope lengths and other cargo gear may be additionally required to expedite ship's discharge.

IDENTIFICATION CARDS: Every member of crew must have a seaman's book deposited with the Officer in charge for inspection, if so required by the Immigration Authorities. If a vessel is stopping in Port Said or Suez for a lengthy time, these seamen's books are normally taken off the ship by the said Authorities and kept in their departing office pending ship's sailing day when they are placed on board by the proper officer on a previous advice. Identity cards are also needed if a crew member wishes to proceed ashore for a short visit to the town or for proceeding to any excursion inland.

CONSULS: The following countries have Consulates or Consular Agencies in Port Said:

Denmark
Finland
France
Germany F.R.
Greece
India
Italy
Netherlands
Norway
Panama
Republic of China
Spain
Sweden
U.K.
U.S.A.
U.S.S.R.

The following countries have Consular Agencies in Suez:

Denmark
Finland
Norway
Sweden

REPAIRS: Most types of repairs whether temporary or permanent can be carried out here by the Suez Canal Authority's shipyard or its subsidiary companies, under the supervision of the appropriate surveyors, if necessary. Suez workshops are well equipped for undertaking all kinds of marine repairs to hull, main and auxiliary engines, boilers, navigation aids, radar and cooling, and installations.

Vessels carrying explosives are not allowed to carry out repairs. Tankers loaded or in ballast but not gas free are not allowed to carry out repairs, except in cases of force majeure of which the Canal Authority is sole judge. Gas-free tankers must present Gas-free Certificate before they are allowed to carry out any repairs. If unavailable, a chemist approved by the Suez Canal Authority can be appointed for testing the tanks and issuing the Gas-free Certificate. The aforementioned restrictions are applicable at Port Said only and not at Suez where vessels anchor at roads and are of no danger.

Other Repair Facilities: Exist at Port Said for air conditioning, wireless telegraphy, radar, course and rudder recorder, refrigerators, and refrigerating units.

All kinds of repairs to echo sounding devices are carried out at Port Said and Suez by experienced specialists at reasonable charge. In Port Said different types are dealt with by the Port Said Engineering Works with the exception of Raytheon radar, B.T.H. radar and Cossor radar which are represented by the Eastern Electronics. The electrical repair workshop in Suez is operated by Suez Electronics.

DRY DOCKS: A floating dock of 25,000 tons, capable of docking vessels up to 50,000 d.w.t., is available at Port Said as well as a dry dock at Suez. Sufficient notice is required to book the date for either the floating or the dry dock.

Repair facilities are available at Suez, where a dry dock is suitable to accommodate vessels up to 8,000 d.w.t.

Dimensions:

Extreme length to inner sill	464 ft.
Breadth at entrance	73 ft.
Height of water over keel blocks:	
at Spring tide	22 ft. fore, 26 ft. 3 in. aft
at Neap tide	19 ft. fore, 23 ft. 3 in. aft

The max. draft at which a vessel can use the dry dock is 17 ft. fore and 20 ft. aft. Deeper drafts may be arranged with the management.

The Suez Canal Authority's Floating Dock and Shipyard is situated at the Northern entrance of the Suez Canal, opposite to Port Said lighthouse.

Ships up to 50,000 d.w.t. may undergo all kind of repairs in the shortest possible time. Tankers, by gas-freeing during their voyage from their home harbour to Port Said, will save at least 4 days if they carry out their repairs in our dock.

CREW CHANGES:

By law, only the official State Agents are permitted to handle reception or repatriation of crew in Egypt.

Crew members arriving at Cairo Airport to join a vessel must have a letter of introduction addressed to the Manager of Cairo Shipping Agency, 7 Abdel Khalek Tharwat Street, P.O.Box 468, Cairo, telephone number 745755 or 745863. This introductory letter is to be produced immediately upon arrival to the representative attending at the airport.

Note: A representative is usually in attendance when the crew member steps off the bus and passes through the doors at the entrance hall. Distance from the bus about 20 m. – 25 m. – just in front of the banks.

Visas can be obtained at the airport.

The Suez Canal Authorities have also stipulated the following requirements for arriving crew members:

(a) Be of same nationality as the vessel's flag.
(b) Be in possession of a contract signed and stamped by the shipowners.
(c) Be holding a valid Seaman's Book.

Note: Crew members joining vessels at Suez Canal are not permitted to bring with them spare parts, equipment, electrical apparatus, etc., for vessels unless the goods in question are accompanied by an air waybill which must indicate the words "in transit", together with an invoice from the suppliers stating description and value of the goods.

Principals are requested to telex their Agent giving full details of crew changes including names, flight numbers, dates and times of arrival.

Agent's Notice: This is to bring to your kind attention due to the fact that Owners are sending the return tickets for repatriation of crew members by PTA which procedure entails delay in reserving a place on board the aircraft in addition to the delay that results in tracing the whereabouts of the PTA. This in turn causes extra hotel expenses and we are therefore requesting that Owners leave the ticketing to us in order to cut hotel expenses. Please note the usual crew discount is obtained.

AIRFREIGHT: The Official State Agents are the only Agents legally entitled to handle airfreighted consignments such as parcels, spares, etc., and the following procedure should always be followed:

All parcels should indicate:

(a) Name of vessel to which consignment is intended and port of delivery.
(b) Name of Official State Agent.
(c) The wording . . . . "delivery at Cairo Airport to Cairo Shipping Agency only, on behalf of (insert name of Official State Agent)".
(d) All parcels to be encircled with a wide self-adhesive tape, coloured red. In addition a self-adhesive label to be affixed bearing the name of Cairo Shipping Agency and also the name of the Official State Agent in large capital letters.
(e) The parcel and air waybill must indicate the words "In Transit for M/V......".
(f) Suppliers of the spare parts must always be instructed to enclose with the parcel, copy of their invoice stating description of the contents and value and to ensure that the commodity of the cargo can be indicated precisely on the relative Bill of Lading.

Note: Crew members joining vessels at Suez Canal are not permitted to bring with them spare parts, equipment, electrical apparatus, etc., for vessels unless they are accompanied by an air waybill and an invoice duly completed as instructed above. Please note that any goods for vessels arriving with embarking crew members must also follow precisely points (e) and (f) as indicated above otherwise the Customs Authorities will refuse to release such goods "In Transit".

In order to enable check upon airfreighted consignments, Principals are requested to telex advise their Agent giving full details of flight number, date, air waybill number, etc.

Circular No. 19/83: Dated 8th February, 1983.

Parcels of spare parts, equipment and electrical apparatus arriving care of crew members without transit shipping documents.

Reference is made to our previous circulars, dealing with the above subject, ending with No. 101/82, dated 31st October, 1982, requesting you to kindly ascertain that the air waybill covering a parcel of spare parts must show that same is "In Transit for M/V......".

The object of the present circular is to bring to your kind attention that, considering that, according to Regulations, a crew member is allowed to be accompanied only by his personal effects, the Customs Authorities refuse to release "In Transit" other goods, such as spare parts, various equipment, electric apparatus of high value (T.V., video etc.) arriving care of crew members. As already explained, the goods in question should be accompanied by an air waybill and an invoice duly completed as described previously.

Kindly, therefore, arrange for parcels of spare parts, equipment, apparatus etc. not to be forwarded care of crew members unless they are accompanied with complete shipping documents, otherwise it will not be possible to have them released "In Transit".

Circular No. 114/1983:

We would refer to our various Circulars ending with No. 19/1983 (see above), dated 8.2.1983, dealing with the necessity of instructing Suppliers of spare parts to ensure that:

(a) the parcels be accompanied by copies of invoices showing description of their contents and its value.
(b) that the relative Bills of Lading should point out the commodity of the cargo precisely.

Moreover, you are also kindly requested to make certain that the respective Air Waybill should clearly show that the parcel is "In Transit for M/V......", indicating the vessel's name to enable the Customs to avoid dealing with the parcels as "Import Cargo", which irregularity causes much complication and delay.

In this respect, it is also recommended that parcels be airfreighted to Cairo four days before ship's arrival, taking into consideration the weekends and official holidays.

Circular No. 121/84: Arrival of ship's stores consignments by airfreight to Cairo Airport: Notice is hereby drawn to the urgency of notifying all concerned as regards the arrival of airfreighted ship's stores consignments in ample time before reaching Cairo Airport, prior ship's arrival at one of the Suez Canal ports, with a minimum period of four days before ship's arrival. This will enable our Cairo branch to complete the necessary Customs formalities, and ensuring delivery to respective vessels.

Kindly be guided accordingly.

AIRPORT: The distance between the international airport at Cairo and Port Said or Suez is normally 2.5 hours. International airlines serve this airport. Cairo Shipping Agency is on constant contact with Agent for the necessary instructions.

In the interest of all and in order not to lose any time and to avoid any restrictions when sending crew members by plane to join their respective vessels, it is essential that the Agent concerned should notify by cable in good time the flight number as well as the time and date of the arrival in Cairo, thus enabling the Agent to notify Cairo Shipping Agency for the necessary clearance and as to whether they should be sent to join their vessels.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: *General Holidays.*

February 22nd	Unity Day
May 1st	Labour Day
May 9th	Sham El Nessim (Spring Holiday)
June 18th	Evacuation Day
July 10th – 13th	Ramadan Bairam (End Of Ramadan)*
July 23rd	Revolution Day (National Day)
September 16th – 20th	Courban Bairam (Pilgrimage Feast)**
October 6th	Armed Forces Day
October 7th	Islamic New Year***
October 24th	Suez Day
December 16th	Mouled El Nabi (Birth of the Prophet)

*Possibly observed July 11th – 14th

**Possibly observed September 17th – 21st

***Possibly observed following day.

The Dates of the Islamic holidays are stated approximately. Working hours: 0600–1800 hrs. Overtime: 1800–0600 hrs. Friday is the weekly day of rest but it does not affect labour.

If a holiday falls on a Friday it is possible that the following working day will be decreed a holiday also.

Ramadan: Thirty days' fast and how it affects labour; Cargo operations can be carried out at night and on Fridays and General Holidays against payment of overtime rates. Arrangements should be made on the previous working day to enable Customs to delegate the necessary personnel in time.

Local Holiday

Port Said:

December 23rd — Port Said Day

POLICE/AMBULANCE/FIRE: Vessels which are moored in the harbour either in Port Said or Suez requiring assistance from the Port Police, should hoist the International Code Signal (YM). There is always a police guard appointed by these Authorities on each ship in either Port Said or Suez harbour. First-aid assistance can provide ambulances at a request through the Agent. In case of fire on board when in port, the Master must inform the Port Authorities (the Suez Canal Authority) imediately and at the same time give a general warning by means of a long blast of whistle or siren and be prepared to move his ship to another berth if so required. The Suez Canal Authority own 7 tugs and other craft distributed in various points of the Canal with individual output from 10 to 950 t.p.h. well equipped with fire-fighting appliances, ready for use at any moment.

Police guards are placed onboard vessels in Suez Roads for vessels' protection.

TELEPHONES: There are no telephone facilities available in Port Said except at Berth No. 4 Red where passenger ships are normally berthed, and this can be connected when snake pontoon is fixed with ship's gangway.

SHORE LEAVE: Crew members are allowed ashore provided that they obtain a shore leave pass issued by the Immigration Authorities through the local Agent. They can proceed ashore by means of motor launches or rowing boats at their own expense. For vessels mooring opposite the town and connected with the shore by snake pontoon, crew, together with passengers, can proceed ashore free of charge.

SERVICES: Port Said and Suez being situated at a middle point between the East and the West, have become an ideal centre for replenishing stores and provisions which can be obtained in bond or from town.

Delivery of provisions and stores is effected 24 hours a day at Port Said and Suez.

It is recommended that Masters should order their requirements prior to their arrival with a view to avoiding any delay specially for ships joining the 0700 hrs. convoy Southbound.

Deck and engine stores are ample and are also available and sold at (in bond) prices.

Paints: All kinds (bottom, boot-top, topside, enamel, engine ready mixed, heat resisting, varnishes) are also available at "in bond" prices. Painting of ships or undertaking any maintenance work on board is permitted while ship is in port waiting to join the North or the Southbound convoys as well as while transiting the Suez Canal.

The following companies are represented here:

International Marine Paint	Sole agent in Egypt: International Shipping Enterprise.
Hemples Marine Paint Camrex Marine Paint	Represented by The Egyptian Marine Supply and Contracting Co. (cable address: "Consup")

Chemicals: The following chemical firms are represented in Port Said and Suez:

Gamlen & Co.	Represented by The Egyptian Marine Supply and Contracting Co. (cable address: "Consup")
Bird Archer/Norus (Tommons & Chartes) Chemicals. Drew Chemicals Cameroid Products. Paroline Chemicals Cameroid Products. Walker Bow.	Represented by The International Marine Services Co. (cable address: "Marinco")
Houseman Marine Chemicals	International Shipping Enterprise

Grease and lubrication oils. Available from:

Esso Petroleum Co.
Misr Petroleum Co. (ex Shell)
Mobil Oil Co.
Caltex Oil Co.
Ocean Oil Co.
Wisure Oil Co.
Fina Oil Co.
Gulf Oil Co.
Castrol Burma Oil.

An advance notice of 48 hours is necessary to arrange for lubricating oils and/or bunkers required.

Charts: Admiralty Charts are available at Port Said from the Egyptian Marine Supply and Contracting Co. If any order has to be supplied at Suez, arrangements can be made for the required charts to be sent there.

Defense Mapping Agency, Washington and British Admiralty Charts available from International Shipping Enterprise, who also act as distributor for Pains-Wessex Marine distress signals and line-throwing equipment.

Cigarettes: American and British cigarettes are available "in bond".

Technical Gases: Technical gases are also available at Port Said and Suez, and empty containers can be exchanged.

Fish: Bream, prawns, crab, rock fish available throughout the year; Mullet available June/February; Slip soles available November/March.

Vegetables: Beans, beetroots, cauliflower, cabbages, carrots, eggplant, endive, garlic, herbs, lettuce, marrows, parsley, radishes, spinach, tomatoes, turnips, escarole, onions, potatoes: *available throughout the year.*

Green peas, celery, pumpkins: *available January/March.*
Artichokes: *available October/April.*
Parsnips, spring onions: *available November/May.*
Green pepper, mint, lady's finger: *available June/September.*
Capsicum: *available May/December.*
Cucumber: *available February/December.*
Lemons, limes: *available throughout the year.*
Fresh figs, fresh dates: *available August/October.*
Bananas: *available October/June.*
Grapefruits, oranges, tangerines, *available October/May.* (When out of season import citrus are available).
Apricots: available May/June.
Water melons, sweet melons: *available May/October.*
Grapes: *available June/October.*
Plums, peaches: *available June/October.*
Mangoes: *available August/September.*
Pears: *available August/October.*
Apples: *available November/February* (also imported the whole year).

Eggs: Eggs are available throughout the year.

Meat: Fresh meat is only supplied to vessels having a Mohammedan Crew after permission is obtained from the Customs. Other vessels are supplied with "frozen" in bond.

Laundry: Well equipped, reliable and fast services are available at Port Said, through the ship's contractor. Ship's laundry is usually delivered within 24 hours. For vessels remaining a few hours in Port Said and transiting the Canal, their laundry could be collected, washed and ironed and then transported to Suez by special car or lorry for delivery to them there.

Garbage: No refuse or ashes are allowed to be thrown whilst ships are moored in Port Said, transiting the Canal or in Suez Roads. Small barges are available in Port Said and Suez for disposal of garbage or ashes, which craft can be obtained at a reasonable hire.

Motor Launches and Tugs Hire: Motor launches and tugs required for extra service are charged for as under:

At Port Said:

Motor launches per hour at day time, pt. 60 each; night-time, pt. 75 each; motor launches per day, pt. 300 each; night, pt. 450 each.

At Suez:

Motor launches per hour, pt. 1,250 each; tugs per hour, pt. 5,000 each.

Divers: Suez Canal Authority's Divers as well as other Contractors' experienced divers are available, capable of carrying out any kind of underwater repairs including welding and fees are subject to the kind of job to be performed. Anchors and other articles left behind by any ship in Canal waters are retrieved on no cure no pay basis.

DEVELOPMENTS: There is a modernisation plan underway at Suez.

When the modernisation is complete, cargo handling will be largely mechanised, resulting in a great increase in the port's capacity. The first stage of the expansion will provide 3 multi-purpose berths, shoreside installation, container-handling facilities, and grain storage facilities. An offshore grain pier connected to onshore storage silos is expected to be built during the next phase.

Navigational aids (visual) project will be completed by late 1986. Consisting of updating the old lighthouse (6), erecting 7 new lighthouses, 17 lightfloats and 12 beacons.

Also see "Berthing - Port Said".

SHIPMASTER'S REPORT No. 1: *Suez Canal Transit (South/North) (1976)* - updated 1986.

C. Guardafui light was clearly seen and identified at a range of 39 miles.

There was an oil rig operating Southwards of the Cape in approximate position Lat. 11° 44′ N., Long. 51° 21′ E.

The Straits of Bab El Mandeb were congested but the traffic separation scheme seems to be satisfactory. The passage of the Red Sea does not seem to be any different from the past.

When passing Aden, a preliminary message was sent to the Suez Agent. This was of doubtful value but it is advisable to send a message addressed to 'Port Authorities Suez', via station "SUK", giving the following information:–

Ship's name and flag.
Whether transit of canal is desired.
Destination.
Where from.
Cargo aboard.
Whether any dangerous cargo carried.
Draft.
ETA at – 23° North, Straits of Gubal, Suez.

All radio messages through the Egyptian radio stations must have a signature, i.e. 'Master'.

The ETAs can be updated as necessary. The message to the Port Authorities is mandatory.

Approaches: The Gulf of Suez is congested by oil rigs – particularly in the vicinity of Ras Shukheir and the Ramadan and July oil fields where there are many rigs and flares and supply vessels crossing the Gulf. One oil rig was working in the middle of the fairway East of Ras Dib. With poor visibility, if a Southbound convoy were to be met in this region, it might be wise to proceed at manoeuvring speed.

A pilot cutter operates just South of the waiting area but an approaching ship will be called by signal lamp from ashore, asking for the ship's name and making "VHF". Contact is then established on Channel 16, changing to 6 when the ship will be told whether to anchor in the waiting area or remain underway until the Pilot boards.

Pilotage: The Pilot boards from a launch by means of the accommodation ladder (which should be lowered to within 3 ft. of the water) and takes the ship to her designated anchorage in Suez Bay.

Arrival Formalities: Quarantine and Customs authorities (about 8 people) board the ship at the anchorage together with the Agent. The accommodation ladder is used for all boarding and disembarkation within the canal. It should be raised when not actually in use otherwise the ship will be boarded by numerous "Businessmen".

A list of forms required is listed below but there are others which the various authorities bring with them and some are presented for filling in more than once and by different officials. This ship's transit was delayed because the Agents had not received funds from London. Deck log books for the past six months have to be landed.

The Suez Canal Cargo Declaration Form (in duplicate) is handed to the Pilot who disembarks at Ismailia.

At Anchor: With 3 shackles out, this ship lay comfortably at A8 berth. Some difficulty, however, was found in reconciling the various anchor bearings with the chart.

A bumboatman will seek permission to set up shop aboard. Care should be taken to agree methods of payment beforehand.

A listening watch should be kept for Suez Control on Channel 6. Water can be ordered through the Control and will be delivered in a large water boat carrying about 300–400 tonnes. Rate of delivery is about 50 t.p.h.

Convoy lists are made out at about 0300 hrs. and ships can call Suez Control soon after that to learn their convoy number and time of Pilot boarding. Convoys can start as early as 0500 hrs. This vessel was number 10 and hove up at 0830 hrs. Our searchlight was brought out at 1700 hrs. and the boats at 0500 hrs. We were asked to carry 4 extra boats but Pilots advise against this as the time taken to unload 6 boats can cause delay at the other end of the canal.

Transit: The Pilots change at Ismailia. The convoys cross in the Great Bitter Lake, anchoring as necessary. There is now one convoy from each end every day.

A Harbour Pilot takes over on reaching Port Said and, as soon as the searchlight and boats have been off-loaded and the ship has entered the approach channel, he disembarks.

The Agent will board at Port Said with yet another form to be filled in and he will return the log books.

Documentation:

2 Health Forms (Egyptian)
1 Passport Form (Egyptian)
1 D.B. Tank Statement (Egyptian)
1 Radio Frequencies Form
2 Cargo Declarations
*4 Cargo Manifests
8 Crew Lists

Plus several others which will be produced by the various officials.

*It was explained that our company's vessels do not carry cargo manifests but the Agent said that a typed statement of the amount of cargo aboard, destination and where loaded would suffice.

SHIPMASTER'S REPORT No. 2:

Suez Canal Transit (South/North) – (1976) - updated 1986.

After clearing Aden a radio message was sent to the Port Authorities Suez via Port Said Radio advising them of the following:

Ship's name and flag.
Whether desire transit.
Destination and last port.
Cargo aboard total tonnage and type of cargo.
Whether dangerous or explosive cargo carried.
Draft.
British tonnages gross and nett.
Date Suez Canal Certificate issued.
Tonnages gross and nett from Suez Canal Certificate.
Advice as to whether searchlight required.
ETAs 23° North, Straits of Gubal, Suez.

During the passage in the Red Sea both Port Authorities and Agents received up-dated ETA messages. When using SUK radio to give up-dated ETA this station advised that a cable was necessary to be sent to Port Authorities Port Safaga via SUK giving ETA Strait of Gubal.

Navigation in the Red Sea does not seem to be any different from the past. The Traffic separation scheme in the Straits of Bab El Mandeb seems satisfactory.

Straits of Gubal and passage in the Gulf of Suez was in daylight. Especially in the Straits of Gubal very few seem to adhere to any form of traffic separation scheme. There is no doubt that if it were night time or poor visibility then it would be advisable to be on 'Stand-by'. There is now an oil rig Lat. 27° 57′ N., Long. 38° 41.2′ E., or 349°, 5.7 miles from Ashrafi Lt. Ho.

The Ramadan and July Oil Field area has many oil supply ships, most of the Southbound traffic was met in the Straits of Gubal thus further North it was very quiet.

The ship was anchored in the waiting area South of Newport Rock but alas this area shown as being to the East of the 2 green flash buoys is *now wrong!* The waiting area is to the S.E. of the most Southern Green flash buoy. About 1 mile South of the previous position. Evidently there is shoaling in the old area and ships have grounded.

On arrival at the waiting area the ship had to anchor as the Southbound convoy was clearing. A tug with Pilot Signal closed the ship to ask for information with regard to tonnages, cargo etc. After first vocal contact Channel 6 VHF was used. The ship was not called up by lamp nor did the Port Control answer any VHF requests etc. It would seem that if the Tug is on station advice is received from there. They did not, however, attempt to advise the ship that the waiting area had been altered.

As the ship anchored a boat came alongside with two watchmen but as I had not requested these and the visitors had not boarded they were sent ashore.

Later a Pilot boarded via the accommodation ladder to shift the ship from the waiting area to a designated anchorage, in our case '1B'. Ship was anchored in '1B' by 0030 hrs. on 12th, having arrived at the waiting area at 1947 hrs. on the 11th.

As the ship had some essential repairs to the main engine which would only take a short time, engines were immobilised. Pilot had advised that 0800 hrs. would be earliest time for transit. During the middle watch the area was hit by a fierce short lived blow from a Southerly direction. Although the vessel did not drag, ships close by did. It was necessary to pay out more cable to ensure a bulk carrier cleared us comfortably. During this time a ship called Port Control to say they had dragged some 3 to 5 cables.

As the weather for some 3 hours was considered bad for small boats the first of the visitors did not board until 0515 hrs.

The Canal Surveyor, who was the first to board was quite helpful and pleasant. He took the Suez Canal Tonnage Certificate for verification as the ship was making a first transit. This I have been informed will be returned to the Company in about 2 months.

Later other officials boarded about 0700 hrs. The Agent also came off with the mail. The 2 electricians for the searchlight insisted on being given a cabin or they would not remain on board. As there was no spare cabin, except one in the crew accommodation, I endeavoured to explain that a reasonable shelter had been built on the after end of No. 2 hatch. It transpired that in the end I moved a patient who had tonsilitis out of the hospital. Later the Canal Pilot informed me that the electricians cannot be so demanding provided a reasonable shelter is provided.

Documentation was found to be as advised in the report above. One small difference is that the Cargo Declaration form is only required as 1 copy and is now in English with one form for South to North ship's and another for North to South ships.

At the moment there is only the 1 convoy each way per day. Hours of commencing transit seem a little doubtful. I gather that first Southbound ship leaves Port Said at 0100 hrs. while the first Northbound ship now leaves Suez at 0600 hrs.

Searchlight and 2 boats were brought alongside and loaded in ample time prior to the Canal Pilot boarding at 0909 hrs. I gather that because of the 'bad' weather for those few hours the delivery of searchlights and boats was delayed. Also no advice was obtainable on the VHF after 0300 hrs. with regard to convoy number or time of proceeding. About 20 minutes' notice was given over the VHF.

The Transit was quite straight forward. Ship was anchored in the North Anchorage, Bitter Lakes for 3.5 hours, the Southbound convoy passing. Transit was commenced at 0947 hrs. At Ismailia the Pilot changed. He took the Cargo Declaration with him.

Port Said was reached at 0033 hrs. on the 13th. The Sea Pilot boarded here as did the Agents who returned the Ship's Register and Log Books which had been landed at Suez. The ship had to keep moving while the boats and searchlight and personnel were either off-loaded or disembarked. At night this is not easy and the whole crew are required to ensure a safe and quick operation. Once these matters were completed the Sea Pilot left well within the breakwater. Accommodation ladder was used at all times for Pilots, Officials and Agents boarding and disembarking. Fairway Buoy was abeam at 0148 hrs. on the 13th.

SHIPMASTER'S REPORT: September 1979.

The Pilot advises that vessels anchoring further South than the 0.5 mile limit South of No. 1 Buoy at Suez may not receive Pilot.

SHIPMASTER'S REPORT: June 1982 - updated 1986.

Suez Canal – Northbound.

Vessel was 8th in convoy and joined convoy at about 0600 hrs. On arrival Suez contact Suez Agent on VHF Channel 6 or 13. When Northbound and messages are sent to Agents at Port Said we found it was necessary to repeat the messages to Agents at Suez otherwise you do not receive any advance information. The Port Said Agents pass the messages to Suez Agents but Suez Agents do not repeat to the ship.

We transited with experimental loaded draft of 46 ft., plus one tug escort. The tug changes twice during transit so have altogether 3 tugs during transit. If the Pilot gives a bad report about the vessel then SCA will assign 2 tugs, one ahead and one astern.

According to the Pilots, maximum permissible draft is 53 ft.

We were clear of Canal about 1730 hrs. and full away 1 hour later.

In the Gulf of Suez there are now drilling rigs in the traffic lanes but they give out good and regular navigational warnings.

SHIPMASTER'S REPORT: October 1983.

Anchorages: Northbound:

Anchorage area for Northbound VLCCs, 3rd generation container ships and vessels over 38 ft. draft is rarely used as Agents are understandably reluctant to board vessel there.

To ensure prompt transit vessel should anchor in the Northern waiting area. However, it would be prudent for deep draft ships arriving after midnight to anchor in the deep draft area and move to the Northern anchorage around 0800 hrs.

SHIPMASTER'S REPORT: July 1984.

ETAs and information on ship's data were sent after departure Jeddah as per Shipmaster's Reports No. 1 and 2 to both Agents "Assiuship Suez" and Port Authorities Suez and updated at entering Gubal Straits. First VHF contact was made by Chabana Shipchandlers who called us and relayed our message in Arabic to the Port Authorities. Pilot station called vessel only after having anchored at the outer waiting anchorage to tell us that we were anchored in a wrong position while at least 12 other ships were anchored in the prohibited anchorage area. However, the pilot station did not come back so the vessel stayed anchored where she was. When vessel approached the waiting area several heavily manned and well equipped business motorboats approached and besieged the ship and could only be stopped from entering the ship by placing seamen along the ship's rail. I knew these businessmen from years ago but they seemed to have become more aggressive by trying to enter the ships and they even followed the ship to the inner anchorage which they had never done before. The Pilot boarded the ship at very short notice and brought her inside. Clearing by Agent and Immigration was as usual, the only difference I noted was that the logbook did not have to be handed to be checked ashore. The next morning (Friday!) vessels were not called as usual to receive their number and Pilot boarding time. The Pilot suddenly came on board without any notice and therefore it is wise to have the engine standing by all the time while expecting to join the convoy. Suez Canal passage was as usual and vessel left the Canal through the new channel.

SHIPMASTER'S REPORT: August 1984 – updated 1986.

Vessel transited Canal Northbound. At the time of the Pilot boarding at Suez the Canal boat had not yet arrived although the boatmen were on board. The Pilot on being informed, contacted the Port Control and then asked if vessel would agree to using a lifeboat if the need arose. This was agreed and vessel transited Canal.

SHIPMASTER'S REPORT: February 1986.

If vessel has engine trouble and is unable to join convoy as designated it is necessary to have a classification surveyor issue certificate stating repairs have been carried out satisfactorily. After repairs completed a Pilot will board for engine trials.

If vessel has only one crane amidships and carries 2 Canal boats then one boat must be carried over the side during transit.

Port Said offices to be contacted via Alexandria or Port Said Radio around the clock.

Suez offices to be contacted via Alexandria or Port Said Radio around the clock.

TRANSIT SERVICE: Gulf Agency Company operate a Suez Canal Transit Service the purpose of which is to assist Owners and Shipmasters with the numerous formalities applicable to transit of the Canal including supervising the pre-payment of Canal Dues and ensuring no delay in entering or clearing the Canal. Full details of the service are obtainable from Gulf Agency Co. Ltd., P.O.B. 17071, Kolonaki, 10024 Athens, Greece. Telex: 216344, 218687, 214548. Tel: 7211713, 7248587/8. FAX: 7236921. Cables: "Gulf Agency" Athens.

SUEZ CANAL – RULES OF NAVIGATION*

JANUARY 1986

Part I Navigation
Part II Canal and Lakes (Characteristics)
Part III Communications – Signals

*Not all the Rules of Navigation are printed herein. Part IV is concerned with tonnage and dues and the Appendix with carriage of dangerous goods.

GENERAL

Article 1: Transit Through the Suez Canal

(a) Transit through the Suez Canal is open to vessels of all nations, subject to their complying with the conditions stated in the present Rules of Navigation and all the references and circulars which shall be issued by the Suez Canal Authority. They will constitute an integral part of these rules, and the provisions of the International Regulation for Safety Of Life At Sea, and its amendments, as well as the provisions of the International Regulations for Preventing Collision at Sea, and all laws, orders and regulations issued by the A.R.E. Government.

However, the Suez Canal Authority reserves the right to refuse access to the Canal Waters, or order the towage or convoying of vessels considered dangerous or troublesome to navigation in the Canal. Non or erroneous declaration of dangerous cargo (see "Article 47 Bis").

(b) By the sole fact of using the Canal Waters, Masters and Owners of vessels bind themselves to accept all the conditions of the present Rules of Navigation, with which they acknowledge being well acquainted, to conform with these conditions in every respect, to comply with any requisition made with a view to their being duly carried out, and to adhere to the Canal Authority's private Code of Signals as shown in Part III of these Rules.

Article 2: Agents

Every vessel other than warships intending to transit the Suez Canal or staying at Port Said or Port of Suez, or in the Suez Canal Basins or docks must have a recognised Shipping Agent.

The Egyptian Authorities are to be notified of intended transit of warships in the Suez Canal : *Viz* : Ministry of Foreign Affairs, Ministry of Defence as well as Ports and Lights Administration.

Article 3: Canal Waters (Definition)

Canal Waters mean the Canal proper, and the access channels thereto,(1) the waters within the Canal Authority's Concession adjacent to the Canal proper and Port Said Harbour and Port of Suez.

The Canal proper, as to its length, is reckoned to run from Km. 3.710 West Branch for vessels entering from Port Said Harbour and from Km. 1.333 East Branch for vessels entering through the East Approach Channel, to Hm. 3 at Suez, including the 2 channels of the Great Bitter Lake and all Canal by-passes.

As to its width the Canal is bounded by the banks when they are above water; when the banks are submerged, the width of the Canal is limited to the perpendiculars at the point of intersection of the submarine bank with the horizontal plane corresponding to the max. draft authorised including squat.

---

(1) Port Said Eastern and Western Entrance channels, Suez Entrance channel which includes the Port of Suez Eastern channel leading to the Canal entrance.

Article 4: Responsibilities

When in Canal Waters, the Owners and/or Operators of any vessel or floating structure of any description are responsible for any damage and consequential loss it may cause either directly or indirectly to the Canal Authority properties or personnel without option for the Owners and/or Operators to release themselves from responsibility by purely and simply abandoning the vessel, floating structure or wreck.

The words "Owners and/or Operators" for the purpose of the present article, shall be construed to mean person, persons or corporate body responsible for the vessel at the time of the navigational accident or incident.

Moreover, the vessel guarantees to indemnify the Canal Authority in respect of any claim against the latter by reason of any damage whatsoever she may cause either directly or indirectly to third parties.

The vessel waives the right to claim against the Suez Canal Authority for any damages caused by third parties that she may sustain while in Canal Waters.

Vessels carrying petroleum or dangerous cargo must comply with these regulations and also with the Appendix to the Rules of Navigation for vessels carrying dangerous cargo.

Article 5: Temporary Delaying of Vessels

The Canal Authority may delay a vessel for the purpose of investigating any claim or dispute that may arise, or any formal or informal complaint, or allegation of violation of the laws of the Canal.

A vessel may be delayed until in the opinion of the Canal Authority, its tenderness, trim, list, cargo, hull, machinery have been put into such condition as will make the vessel reasonably safe for her passage through the Canal.

No claim for damages is accepted or considered because of any such temporary delaying of vessels.

Article 6: Pilotage

Pilotage is compulsory for all vessels whatever their tonnage,(2) when entering, leaving, moving, changing berth or shifting in Canal Waters or Port Said and Port of Suez harbours.

Any exemption must be explicitly authorised by the Suez Canal Authority (See Art. 11(e)).

Article 7: Changing Berth in Road Anchorages

Vessels in Port Said Anchorages Area (Northern and Southern Anchorages), Suez VLCCs and 3rd generation container ships Anchorage, Suez Roads, the Bitter Lakes or Timsah Lake are not authorised to change berth or anchorage without explicit authorisation from the Suez Canal Authority.

PART I – NAVIGATION

CHAPTER I: SUEZ CANAL FEATURES

SECTION I: Approaches

Article 8: Port Said (See "Plan")

Ten miles before arrival to Approach Buoy,(3)(4) all vessels arriving from seaward should contact the Suez Canal Harbour Office by VHF (Channel 16). If not able to, by R/T (2182 kHz) or by W/T via S.U.Q. for instructions (see Part III Articles 87 and 88).

Approach Buoy: Position: Lat. 31° 25′ 30″ N., Long. 32° 22′ 00″ E. Height 10 m., black and yellow horizontal bands.

Daymark: 2 black cones points in.

At Night: Group flashing white light (9) every 13 seconds.

Fitted with a Racon and fog horn.(5)

(A) ANCHORAGE AREAS(6): The incoming vessels have two anchorages.

(1) The Northern Area

(i) For VLCCs, 3rd generation containerships and vessels over 38 ft. draft.

(ii) The area is limited as follows:

North Limit Latitude	31° 25′ 00″ North
South Limit Latitude	31° 23′ 12″ North
East Limit Longitude	32° 20′ 30″ East
West Limit Longitude	32° 16′ 00″ East

(iii) V Berths: Centre of Circle (radius 750 m.)

Berth	*Latitude*	*Longitude*
V1	31° 23′ 42″ North	32° 19′ 30″ East
V2	31° 24′ 30″ North	32° 19′ 30″ East
V3	31° 23′ 42″ North	32° 18′ 30″ East
V4	31° 24′ 30″ North	32° 18′ 30″ East
V5	31° 23′ 42″ North	32° 17′ 30″ East
V6	31° 24′ 30″ North	32° 17′ 30″ East
V7	31° 23′ 42″ North	32° 16′ 30″ East
V8	31° 24′ 30″ North	32° 16′ 30″ East

(iv) Vessels at anchor in this area when entering the Canal (East Channel) will proceed between the East and West Buoys at Hm. 135.(7)

At. Hm. 150 (East) a buoy is fixed to be used as a lead when approaching the 2 Entrance Buoys of Hm. 135 (course 194°).

Hm. 150 Buoy: Red Buoy. Red St. Andrew's Cross. At Night: Occulting red (1) every 4 seconds.

Hm. 135 Buoys: West: Black Buoy. At Night: Quick flashing green light. East: Red Buoy. At Night: Quick flashing red light.

(2) The Southern Area

(i) For all other vessels.

(ii) The area is limited as follows:

North Limit Latitude	31° 23′ 03″ North
South Limit Latitude	31° 21′ 15″ North
East Limit Longitude	32° 20′ 30″ East
West Limit Longitude	32° 16′ 42″ East

(iii) C Berths: Centre of Circle (radius 500 m.)

Berth	*Latitude*	*Longitude*
C1	31° 21′ 30″ North	32° 20′ 06″ East
C2	31° 22′ 06″ North	32° 20′ 06″ East
C3	31° 22′ 42″ North	32° 20′ 06″ East
C4	31° 21′ 30″ North	32° 19′ 24″ East
C5	31° 22′ 06″ North	32° 19′ 24″ East
C6	31° 22′ 42″ North	32° 19′ 24″ East
C7	31° 21′ 30″ North	32° 18′ 42″ East
C8	31° 22′ 06″ North	32° 18′ 42″ East
C9	31° 22′ 42″ North	32° 18′ 42″ East
C10	31° 21′ 30″ North	32° 18′ 00″ East
C11	31° 22′ 06″ North	32° 18′ 00″ East
C12	31° 22′ 42″ North	32° 18′ 00″ East
C13	31° 21′ 30″ North	32° 17′ 18″ East
C14	31° 22′ 06″ North	32° 17′ 18″ East
C15	31° 22′ 42″ North	32° 17′ 18″ East

(iv) Vessels at anchor in this area will enter the port of Port Said through the West Approach Channel as follows:

(a) Take on their starboard: Fairway, No. 8, No. 7 and No. 6 Buoys.

(b) On the port are 3 yellow buoys showing yellow lights.

(c) On reaching No. 5 pair of buoys at Hm. 80 showing occ. green and red, one every 4 seconds, they will proceed through the Old Channel to port (course 217.5°).

(3) Prohibited Area for Anchorage

The area between the East limit of the 2 anchorage areas and the approach channels is prohibited for anchorage to all vessels and floating units.

(B) DANGEROUS AREAS

(1) Wreck. A wreck buoy is situated on the Western side of a sunken ship at Hm. 195 West of the approach channel:

Lat. 31° 25′ 19″ North Long. 32° 23′ 00″ East.

Height 5 m., painted black and red horizontal bands, with day mark 2 black balls. Showing group flashing white (2) every 10 seconds. (See "Plan").

(2) Dumping Areas. The hopper dredgers, dredge underway for several months every year in the entrance channels and dump in the following areas.

3,140 m. East of the axis of the East channel at Hm. 140.

Lat. 31° 20′ 48″ North Long. 32° 25′ 48″ East.

4,000 m. East of the axis of the East channel at Hm. 80 approximately.

Lat. 31° 18′ 42″ North Long. 32° 24′ 42″ East.

(C) PORT SAID APPROACH CHANNELS

(1) Buoyage (See "Plan" – "Suez Canal North Entrance").

The Port Said West approach channel extends from the port of Port Said till Hm. 80 where it joins the East approach channel.

The Port Said East approach channel extends from the land boundary, East of Port Said, till Hm. 195.

The 2 channels are marked, on each side, by light buoys of 5 m. height. The light is red on the Eastern side and green on the Western.

(a) East Approach Channel (See "Plan").

The buoys of the East Approach Channel are black with day mark cone point up in the West and red with day mark can in the East, showing by night flashing lights, except: the 2 buoys indicating the Northern end of the channel, at Hm. 195, are Isophase (2 secs. on, 2 secs. off). The distance between them is 745 m.

(b) Junction of East and West Approach Channels

Three yellow buoys mark the junction of the East and West approach channels. They are placed at Hm. 83, Hm. 95 and Hm. 105.

Buoy at Hm. 83: Yellow in colour, is fitted with a yellow St. Andrew's cross day mark and shows by night group flashing yellow (5) every 20 seconds.

Buoy at Hm. 95: Yellow in colour, shows a fixed yellow light.

Buoy at Hm. 105: Yellow in colour, is fitted with a yellow St. Andrew's cross day mark and shows by night group flashing yellow (4) every 15 seconds.

(c) West Approach Channel

The buoyage of the West approach channel of Port Said harbour, is as follows:

(i) Port Said Fairway Buoy (See "Plan").

Off Port Said, a fairway light buoy, height 10 m., painted black with yellow vertical stripes, surmounted by a day mark 2 cones point out, and showing group flashing white light (3) every 10 seconds.

Lat. 31° 21′ 18″ North Long. 32° 20′ 42″ East.

(ii) The buoys of the West approach channel are black with day mark cone point up in the West and red with day mark can in the East and show fixed lights, except the Northern buoy on the West side of the channel which shows occ. green (1) every 4 seconds (Buoy No. 5 of Hm. 80) and is fitted with day mark cone.

(2) Navigation

(a) Northbound Vessels: (i) All Northbound vessels use the East Approach Channel. The end of the navigable channel is the pair of buoys at Hm. 195. (course 014°). From Hm. 195, vessels are to steer North (000°) for 5 miles before altering course.

(ii) Vessels leaving Port Said harbour to sea, use the West Approach Channel (course 037.5°) till Hm. 80 where it joins the East Approach Channel (course 014°) till Hm. 195. From Hm. 195, vessels are to steer North (000°) for 5 miles before altering course.

(iii) Vessels of the Northbound convoys wishing to enter Port Said Harbour shall proceed through the East Approach Channel till Hm. 195, then steer North (000^0) for 5 miles and then steer for the anchorage berth allocated by the Harbour Office(8).

---

(2) Except Egyptian vessels under 300 Tons Suez Canal Gross Tons authorised to work in Canal Port and Accesses and Egyptian fishing vessels under 300 tons S.C.G.T. This does not apply for the Canal proper.

(3) See "Plan".

(4) All buoys in the Canal and access channels may be replaced temporarily by others of smaller size.

(5) Not fitted at time of printing.

(6) All vessels arriving from sea have to anchor in the berth allocated to them by the Suez Canal Port Authority.

(7) All the buoys in the Suez Canal and its approaches are fitted with Radar Reflectors.

(8) This is to avoid crossing incoming vessels to the Northern Anchorage Area.

(b) Southbound Vessels: The maximum draft authorised for Southbound vessels is limited to 42 ft.[9] in accordance with the tables giving the maximum draft according to the vessel's breadth.

[9] Maximum draft will be increased to 42 ft. on further notice.

(i) VLCCs, in ballast or partially loaded, 3rd generation container ships and vessels having a draft of more than 38 ft. and up to 42 ft.[10] maximum, have to use the East Approach Channel (course 194°).

The said vessels enter the channel between flashing green buoys of Hm. 165 and Hm. 135.

[10] Maximum draft will be increased to 42 ft. on further notice.

(ii) All other vessels, either transiting the Canal or berthing at Port Said, have to enter through the West Approach Channel (course 180°) from the entrance, passing between the West green buoys and the East yellow buoys till Hm. 80, then *alter course* to 217.5° passing between green and red buoys, till Port Said Harbour.

(D) BREAKWATERS:

(1) The breakwater protecting the West Approach Channel is situated to the West of the channel and extends from land boundary till Hm. 73 with a submerged part from Hm. 50. This part is marked by cigar shaped unlit buoys.

(2) Two breakwaters protect the East Approach Channel. The Eastern extends 2 km. from the land boundary; the Western, 0.5 km.

Each breakwater has a small fixed white light on its end.

Article 9: Suez (See "Plan")

Five miles before arrival at the First Separation Zone Buoy, all vessels coming from sea should contact the Suez Canal Harbour Office by VHF Channel 16. If not able to, contact by R/T (2,182 kHz) or by W/T via S.U.Q. for instructions. (See Part III, Articles 87 and 88).

(A) Separation Zone

A Separation Zone has been established. Extending 0.3 miles on each side of the line connecting the two Separation Buoys mentioned hereafter. All vessels arriving or leaving have to pass the Separation Zone Buoys[11] on their Port side.

[11] See "Plan".

Separation Zone Buoy No. 1 (Southern Buoy-Lightfloat):

Lat. 29° 39′ 33″ North Long. 32° 32′ 00″ East

Height 5 m., yellow in colour with a yellow St. Andrew's Cross daymark and a fog horn. Showing flashing yellow light (1) every 2 seconds.

Separation Zone Buoy No. 2 (Northern Buoy-Lightfloat):

Lat. 29° 48′ 36″ North Long. 32° 32′ 00″ East

Height 5 m., yellow in colour with a yellow St. Andrew's Cross daymark. Showing group flashing yellow light (4) every 15 seconds.

(B) Anchorage Area for Northbound VLCCs, 3rd Generation Container Ships, and Vessels Over 38 ft. Draft

This Anchorage Area is indicated by the following buoys:

(1) South Shoal Buoy:

Lat. 29° 38′ 48″ North Long. 32° 35′ 54″ East

Black, cone shaped, showing a green isophase light, (2 seconds ON – 2 seconds OFF); fitted with a 12 mile Racon. (Not fitted at time of printing).

(2) Buoy "K":

Lat. 29° 41′ 12″ North Long. 32° 38′ 42″ East

Black, cone shaped, showing a fixed green light.

(3) Buoy "L":

Lat. 29° 45′ 00″ North Long. 32° 38′ 42″ East

Height 5 m., black, cone shaped and showing a flashing green light.

(4) Conry Rock Buoy:

Lat. 29° 48′ 18″ North Long. 32° 34′ 09″ East

Height 5 m., black, cone shaped, and showing group flashing green light (2) every 7 seconds; fitted with a 5 mile Racon. (Not fitted at time of printing).

(i) V Berths: Centre of Circle (radius 833 m.)

Berth	*Latitude*	*Longitude*
V1	29° 46′ 30″ North	32° 35′ 00″ East
V2	29° 45′ 30″ North	32° 35′ 00″ East
V3	29° 45′ 30″ North	32° 36′ 00″ East
V4	29° 45′ 00″ North	32° 37′ 00″ East
V5	29° 44′ 30″ North	32° 36′ 00″ East
V6	29° 44′ 30″ North	32° 35′ 00″ East
V7	29° 44′ 00″ North	32° 37′ 00″ East
V8	29° 43′ 30″ North	32° 36′ 00″ East
V9	29° 43′ 30″ North	32° 35′ 00″ East

(C) Waiting Area for other Northbound Vessels

The area bounded by:

Conry Rock Buoy	Lat. 29° 48′ 18″ North	Long. 32° 34′ 09.0″ East
Buoy (M)	Lat. 29° 50′ 00″ North	Long. 32° 35′ 18.0″ East
Buoy (N)	Lat. 29° 50′ 39″ North	Long. 32° 35′ 18.0″ East
Spherical Buoy (D)	Lat. 29° 51′ 20″ North	Long. 32° 35′ 18.0″ East
Spherical Buoy (C)	Lat. 29° 52′ 00″ North	Long. 32° 35′ 18.0″ East
Spherical Buoy (B)	Lat. 29° 52′ 08″ North	Long. 32° 34′ 34.0″ East
Spherical Buoy (A)	Lat. 29° 52′ 15″ North	Long. 32° 33′ 51.0″ East
Buoy Hm. 60.00 E	Lat. 29° 52′ 22″ North	Long. 32° 33′ 07.5″ East
Buoy Hm. 70.50 E	Lat. 29° 51′ 48″ North	Long. 32° 33′ 13.0″ East
Buoy Hm. 80.50 E	Lat. 29° 51′ 16″ North	Long. 32° 33′ 17.0″ East
Position (R)	Lat. 29° 48′ 36″ North	Long. 32° 33′ 12.0″ East

(D) – Arrival to Suez of Northbound Vessels

Vessels coming from sea have to pass East of the separation zone.

VLCC's 3rd generation Containerships and vessels over 38 ft. draft have to anchor in the anchorage area specified for these vessels (V Berths) in the berth allocated to each vessel by the Suez Canal Authority. Other vessels have to pass East of the separation zone and anchor in the Waiting Area as previously indicated.

(E) – Prohibited Area for Anchorage. The area bounded by:

	Latitude	Longitude
Western Buoy	29° 51′ 16″ North	32° 33′ 17″ East
Eastern Buoy	29° 51′ 15″ North	32° 33′ 06″ East
Position (P)	29° 48′ 36″ North	32° 30′ 54″ East
Position (R)	29° 48′ 36″ North	32° 33′ 12″ East

is strictly prohibited for anchorage for all ships.

(F) – Suez Entrance Channel

(Including the Eastern Channel leading to the Canal Entrance).

This channel is used for vessels entering or leaving Suez Canal and also by those entering Port of Suez and using its anchorages [12].

[12] The max. draft authorised for vessels using Ibrahim Basin, the Petroleum Basin or El Adabya must not exceed 26 ft. at HW.

Buoyage of Suez Entrance Channel.

This channel is buoyed as follows:

(1) A pair of light buoys at Hm. 80.5 (entrance buoys):

(i) The Eastern Buoy, height 5 m., black, cone shaped and showing a green occulting light (1) every 4 seconds.

(ii) The Western Buoy, height 5 m., red, can shaped and showing an occulting red light (1) every 4 seconds.

The distance between the Eastern and Western Buoys is 340 m.

(2) Proceeding Northward, the channel is marked on both sides by light buoys, height 5 m.

(i) On the Eastern side of the channel, the buoys are black, cone shaped and show a flashing green light.

They are placed as follows:

Hm. 70.50
Hm. 60.00
Hm. 44.40
Hm. 24.00
Hm. 7.00
Km. 162.150 (Occ. green light)

(ii) On the Western side, the buoys are red, can shaped and show a flashing red light.

They are placed as follows:

Hm. 70.50
Hm. 60.00
Hm. 44.40
Hm. 21.00
Hm. 17.20
Hm. 1.00 (Occ. red)

Course: From the entrance buoys (Hm. 80.50) (New Port Rock Channel) to the green light buoy of Hm. 24.00.

Northbound: 352.5°
Southbound: 172.5°

(G) – Canal South Entrance

The Canal South entrance is marked by 2 light buoys, height 7 m.

(1) The Eastern at Km. 162.150 is black, cone shaped and showing occulting green light (1) every 4 seconds.

(2) The Western at Hm. 1.00 is red, can shaped and showing occulting red light (1) every 4 seconds.

(H) Port of Suez: Port of Suez is delimited by the imaginary line which extends from Ras Misalla to Mersa Sadat and comprises the coastal zone North of this line, up to Suez Canal entrance.

(1) Navigation

(a) General Rules:

(i) All vessels shall conform to the International Regulations for Preventing Collision at Sea.

(ii) Navigation in the port is limited to approved channels only.

(iii) Crossing or overtaking in the channels is strictly forbidden.

(iv) Vessels must proceed in the port with caution and at reduced speed.

(v) Vessels must not let go their anchors except in the anchorage.

(b) Traffic Regulation:

(i) Vessels entering the port from sea and vessels leaving the port for sea.

These movements shall be effected through the Western channel, except for vessels to which the following anchorages have been allocated: 1C – 2C – 3C – 4C – 5C. They should use the Eastern channel.

(ii) Vessels entering the Canal from the Port, the Zone N.W. of Green Island, anchorages 8C to 16C and anchorage groups A and B shall pass through the Western channel, then South of Green Island to join the Eastern channel and then proceed to the entrance of the Canal.

Vessels entering the Canal from the Zone N.E. of Green Island and Anchorages 1C to 7C shall proceed directly from their anchorages to the entrance of the Canal.

If the number of vessels exceeds the number of anchorages, vessels in excess shall anchor South of the Western channel, parallel to anchorages 2A, 4A, 6A, 4B and 7B, making sure to leave the Western channel clear for navigation at all times.

Vessels entering the Canal from the Zone South of Green Island and anchorages 1D to 6D shall proceed directly from their anchorages to the entrance of the Canal; or if leaving for sea, shall use the Eastern Channel.

(iii) Vessels coming from the Canal shall proceed to sea through the Eastern Channel. If anchoring in the Zone N.W. of Green Island or anchorages 8C to 16C and anchorage groups A and B, shall proceed through the Eastern Channel, then the Western Channel, until reaching the designated anchorage. If anchoring in the Zone N.E. of Green Island or anchorages 1C to 7C, they shall proceed directly from the Canal to the designated anchorage.

(c) Priority of Movement in the port:

Priority of movement in the port shall be as follows:

(i) Vessels coming out of the Canal.

(ii) Vessels proceeding to the Canal.

(iii) Vessels coming from sea must wait outside the port until the Eastern channel is clear.

(iv) Vessels leaving the anchorages of the Port of Suez.

(v) Vessels coming out of the Basins (Ibrahim Basin – Adabeya – Petroleum Basin).

(vi) Vessels using the New Petroleum Jetty.

(d) Priority of Passage in the Eastern Channel:

Vessels leaving:

(i) The Canal.

(ii) Anchorages of Port of Suez, and proceeding Southward to sea, have to pass through the Eastern channel.

Ships approaching Port of Suez from seaward should wait outside until the channel is clear.

Buoys:

Buoy 2A	281.5° – 20.9 cables from Newport Rock Light
Buoy 3A	278.5° – 26.9 cables from Newport Rock Light

These buoys show flashing red light (1) every 5 seconds.

(2) Buoyage of Port of Suez:

Position of Green Island Light: Lat. 29° 54′ 39″ North, Long. 32° 31′ 48″ East.

(a) Eastern Channel (East of Green Island) is limited by the following buoys:

(i) In the East:

Buoy	*From Green Island Light*	*Distance (m.)*
Hm. 7.00 East	062°	2440
Hm. 14.00 East	080°	1820
Hm. 24.00 East	111°	1720
Hm. 44.40 East	144°	3300
Hm. 60.00 East	153°	4720
Hm. 70.50 East	166°	5720
Hm. 80.50 East	159°	6680

(ii) In the West:

Buoy	*From Green Island Light*	*Distance (m.)*
Hm. 1.00 West	050°	2600
Hm. 17.20 West	082°	1390
Hm. 21.00 West	108°	1260
Hm. 44.40 West	150°	3110
Hm. 60.00 West	157°	4640
Hm. 70.50 West	160°	5630
Hm. 80.50 West	162°	6630

(b) Shallow water in the Green Island Zone is limited as follows:

North Buoy bearing 000° at a distance of 1,490 m. from Green Island Light, showing flashing green light (1) every 2 seconds.

Red Buoy of Hm. 17.20.

Red Buoy of Hm. 21.00.

South-West Buoy bearing 239.5° at a distance of 780 m. from Green Island Light, showing group flashing green (3) every 7 seconds.

West Buoy bearing 308° at a distance of 820 m. from Green Island Light, showing group flashing green (2) every 5 seconds.

Oil Jetty quick flashing white light.

(3) Anchorages of Port of Suez:

Anchorage	*Bearing of Green Island Light*	*Distance from Green Island Light* (cables)
(a) Group "A":		
1A	308.0°	6.1
2A	333.0°	7.2
3A	334.5°	4.2
4A	358.0°	6.4
5A	018.0°	3.9
6A	023.0°	7.1
7A	048.0°	5.8
8A	041.5°	8.9
9A	061.5°	8.2
10A	083.0°	7.2
(b) Group "B":		
1B	101.5°	14.4
2B	092.5°	12.1
3B	078.0°	12.4
4B	064.0°	13.9
5B	090.0°	15.2
6B	098.0°	17.25
7B	071.5°	17.2
8B	095.0°	20.2
9B	086.0°	20.3
10B	079.5°	15.1
11B	089.5°	17.9
12B	090.5°	22.2
13B	078.0°	19.3
(c) Group "C":		
1C	220.0°	11.8
2C	208.5°	11.5
3C	187.5°	11.2
4C	235.0°	8.5
5C	214.5°	8.1
6C	170.5°	9.4
7C	161.0°	10.6
8C	158.0°	8.55
9C	142.0°	9.3
10C	143.0°	12.3
11C	133.5°	12.0
12C	144.0°	6.58
13C	121.5°	6.5
14C	104.0°	6.7
15C	097.0°	4.7
16C	073.5°	4.8
(d) Group "D":		
1D	346.0°	12.9
2D	004.0°	12.6
3D	021.0°	13.4
4D	035.0°	14.5
5D	041.0°	16.7
6D	047.0°	18.4
(e) Group "H":		
1H	298.0°	12.0
2H	308.0°	14.3
(f) Adabeya Anchorage:		
1	059.0°	28.3
2	054.0°	28.8

(4) In Bad Weather When Harbour is Closed:

(a) Vessels coming from sea:

It is recommended not to enter the Port of Suez when it is closed by foul weather which prevents the Pilots from boarding the vessels.

However, any vessel who would like to enter on her own responsibility will have to contact the Suez Canal Authority wireless station (SUQ) and ask permission for doing so, giving her draft and length in feet, by the following cable:

"I wish to enter Suez Anchorage on my own responsibility.
Length ....ft. Draft....................................ft.

If permission is granted, the Master will receive the following cable:

"Port is closed. Entering on your own responsibility.
Available Anchorage ...."

(b) Vessels coming out from the Suez Canal:

In case when the embarkation of the Road Pilot is not possible the following cable will be sent to the ship:

"Owing to bad weather Road Pilot will not board your ship".

The following will be added in case the vessel would ask for an anchorage:

"Available Anchorage ...."

(c) Vessels anchored in the Port of Suez leaving for sea:

Vessels who would like to sail on their own responsibility, will have to hoist the signal for Pilot, send the following cable to SUQ and wait for orders:

"I wish to go to sea on my own responsibility. Please confirm".

They may proceed if they receive the cable:

"You may proceed to sea on your own responsibility".

Article 10: Roads and Harbour Pilot Signals:

Vessels requiring a Pilot for:

(a) Entering from sea
(b) Sailing out to sea
(c) Changing berth
(d) Entering the Canal

should hoist a black ball over G by day and 3 white lights by night in a vertical line. These signals are to be hoisted where can best be seen.

SECTION II

Article 11: Pilotage:

(A) Pilotage is compulsory in Canal waters.

All vessels [13] entering or leaving Canal waters, must take a Pilot.

However, the Suez Canal Authority reserves the right to put on board vessels under 1,500 tons gross a tug Master and under 800 tons gross a patron conducteur, instead of a Pilot.

Men of war and any vessel carrying dangerous cargo must have a Pilot regardless of their tonnage.

Roads Pilots, on boarding vessels arriving from sea, hand over to the Master the present Rules, the Declaration of State of Navigability and the Pilotage Form.

[13] See footnote as attached to Article 6.

(B) Port Said:

VLCCs, 3rd generation containers, and vessels over 38 ft. draft are piloted from Northern anchorage area for Canal transit through the East Approach channel. Other vessels, either for local trade or intending to transit the Canal, are piloted from Fairway Buoy to berths in the harbour through the West channel. Vessels are piloted between Port Said harbour and Port of Suez by Canal Pilots who are relieved at Ismailia. Northbound vessels either through East or West Branches are piloted till Hm. 80.00.

(C) Port of Suez:

VLCCs, large bulk carriers, 3rd generation containers, and vessels over 38 ft. draft are piloted from anchorage area South of Conry Rock for Canal transit. Other vessels are piloted from waiting area to anchorage area in the Port of Suez. These vessels are also piloted from Port of Suez by Canal Pilots who are relieved at Ismailia. Southbound convoy and vessels in Port of Suez Anchorages sailing South are piloted to Hm. 80.50. Pending Master's request, piloting may end at Hm. 44.40 (Newport Rock).

Vessels have to maintain course through the channel till the last pair of buoys keeping the separation zone on the port side.

(D) Master and Pilot:

(1) Master:

When a vessel is transiting the Canal, the Master or his qualified representative should be present at all times on the bridge; he has to keep the Pilot informed concerning any individual peculiarities in the handling of the vessel so that the Pilot might be in a position to give better advice to control the navigation and movement of the vessel.

(2) Pilot:

The duties of Pilots commence and cease at the entrance buoys of Port Said and Port of Suez. He only gives advice on manoeuvring the vessel, courses to steer, etc. He puts at the disposal of the Master his experience and practical knowledge of the Canal, but as he cannot know the defects or difficulties of manoeuvring every vessel, the responsibility falls completely upon the Master. The Pilot has to ensure the execution by the vessel of:

(a) The Articles of Rules of Navigation.
(b) The orders of transit given by Movement Control.

The manoeuvre and orders are carried out under the direction of the Master who is solely responsible.

It is therefore for the Master, taking into account the indications given by the Pilot, to give the necessary orders to the helm, to the engines, and tugs. If, in the interest of quick manoeuvres the Master thinks it preferable to allow the Pilot to give orders direct, manoeuvres carried out in these circumstances shall be considered as having been carried out on the order of the Master and on his sole responsibility.

Masters are held solely responsible for all damage or accidents of whatever kind resulting from the navigating or handling of their vessels directly or indirectly by day or night.

(3) The Pilot must inform the Movement Control Office or the Port officials immediately by WT and/or VHF or UHF if their advice and/or their orders, regarding the safety of navigation are not accepted or respected by the vessel.

The vessel in this case if underway is considered navigating without Pilot and an additional due of 15,000 Egyptian Pounds is charged.

(E) Moving in Suez Canal Waters without Pilot's assistance:

(1) Unless explicitly authorised by the Suez Canal Authority:–

(a) Whenever a vessel moves in Canal Waters or Port Said Harbour without having a Pilot on board she shall be charged an additional due of 15,000 Egyptian Pounds(14)

(b) An additional due of 2,237.5 Egyptian Pounds shall be charged to vessels moving in Port of Suez Anchorages, or entering or leaving Basins at Port of Suez without having a Pilot on board(15).

These dispositions do not apply in the event of the Pilot being suddenly unable to carry on with his duties owing to sickness or death, in this case the Master must:

Warn the vessels astern of his intended manoeuvre by means of the visual and sound signals as well as VHF and W/T.

Reduce speed and make fast if in the Canal, or the entrance channels; or anchor if in the Lakes.

The Movement Office at Ismailia is to be informed at all times by UHF and confirmed by W/T.

(2) Exceptions:

In case of bad weather to the extent of not allowing pilotage in Canal Approach channels, Masters will be authorised by notice from the Suez Canal Port Offices, to sail with their vessels on their own responsibility at the following positions:

(a) For Southbound convoy, from Km. 162 to sea.

(b) For Northbound convoy, from Hm. 30 in East Port Said channel Northward.

(c) For vessels leaving Port Said Harbour through West Approach channel, from Hm. 30 Northward.

(d) For vessels anchoring in Port of Suez anchorages wishing to head to sea, also for vessels in Waiting Area wishing to enter Port of Suez anchorage area.

(e) For vessels entering Port Said Harbour either for transiting Canal or for trade, through West Approach channel till Hm. 50 approximately where Roads Pilot will board vessels.

(f) For vessels entering Port Said East Approach channel, between Hm. 165 and Hm. 135 from VLCCs anchorage area to join Southbound convoy, Canal Pilot will board vessels at Km. 0 of East Port Said channel.

(g) For VLCCs and other large vessels joining Northbound convoy from new anchorage area South of Conry Rock, Canal Pilots will board vessels at Km. 161 approximately.

(h) For other vessels joining Northbound convoy from Port of Suez anchorages, Canal Pilots will board vessels at Km. 161 approx.

N.B.: (1) For items c, d, e, f, g and h, the time of proceeding will be fixed by Suez Canal Port Authority.

(2) In all cases advice will be given if necessary by shore radars to vessels(16).

(F) Calling Pilots unnecessarily:

When a vessel signals for Pilot, and it is found when boarding that she is not ready to get underway in the limited time, the vessel is liable to be delayed and Pilot disembarked. The vessel will pay extra pilotage dues for the new Pilot as mentioned before.

(G) Extra Pilots:

(1) Additional Pilots shall be assigned in the following cases:

(a) Vessels over 80,000 SCGT.

(b) Vessels having cargoes or installations impeding visibility from inside the wheelhouse (obstructions to all-round view).

(c) If a Pilot is disembarked and relieved by another Pilot, in case of slow speed vessels, vessels having troubles which prevent continuation of transit with same convoy, or vessels that have to transit by day only.

(d) If vessel has no accommodation for the Pilot to rest while anchored in Bitter Lakes or making fast in mooring places for a long period.

(e) An extra Pilot for assisting the Pilot in charge, may be assigned on Master's request or by the Canal Authority if deemed necessary.

(2) A due of L.E. 200 (200 Egyptian Pounds) for every additional Canal Pilot and L.E. 100 (100 Egyptian Pounds) for every additional Roads Pilot is charged.

CHAPTER II: ARRIVAL AND PREPARATION FOR TRANSIT

SECTION I: Pre-Arrival of Vessels

Article 12: Booking for transit

Vessels may book for transiting the Canal. The booking notice shall reach the Suez Canal Authority Offices not later than four days prior to the transit date. It must contain the name, nationality of the vessel, her type (container, Ro-Ro, etc. . . .) her draft, Suez Canal Gross Tonnage and deadweight tonnage.

Vessels booking for fixed date will have priority to catch the convoy on that date, if they arrive within the time limit defined by the present Rules.

Booking can be cancelled or altered by notice to the Suez Canal Authority offices at least 24 hours before the date booked, otherwise the vessel shall be charged 100 (one hundred) Egyptian Pounds.

In case of VLCCs and similar vessels, this charge will be 1,000 (one thousand) Egyptian Pounds on account of the special arrangements made by S.C.A.

Vessels arriving without previous booking will catch the convoy if capacity of movement in the Canal permits, otherwise they may catch the following convoy.

Article 13: Notice of Arrival

Masters of vessels fitted with wireless apparatus are requested to transmit the following information to their Agents, 48 hours prior to the vessel's arrival.

The name and nationality of the vessel, her ex-name if any.

Suez Canal gross tonnage and deadweight tonnage.

Whether they intend transiting or merely stopping in the harbours and, in this case, mention the duration of stay required.

The ETA.

Whether they carry dangerous cargo, stating quantity and class according to IMO's regulations.

Number of crew on board plus number of passengers on board and their nationalities.

Furthermore, upon arrival anchorage areas vessels have to contact the Harbour Office by VHF (Port Said on Channel 9 – Port of Suez on Channel 15) giving full details either for transit or stoppage in harbour.

Vessel carrying dangerous cargo: Advance notice of arrival must reach the Canal Authority Offices at least 48 hours before the vessel's arrival to the Canal entrances. Masters of vessels carrying dangerous cargo, are required to furnish the Canal Authority with the detailed list of the dangerous goods they have on board, stating quantity and their IMO Classification. Moreover, the Master must inform the S.C.A.office by wireless telegraphy (SUQ) – NOT V.H.F.– of the above mentioned information as soon as possible. (Non or erroneous declaration of dangerous cargo – see "Article 47 Bis").

The above mentioned list, sent directly or through the shipping agency, must reach the Suez Canal Authority offices at least 48 hours before the vessel's arrival; failing which the vessel may be subject to delay before being authorised to enter the Canal Waters.

Article 14: Contacting Port Offices on Arrival

(a) Vessels have to contact the harbour office by VHF(17).

(1) Ten miles before arrival at Approach Buoy off Port Said.

(2) Five miles before arrival at separation Zone Buoy No. 1 off Port Suez.

(b) When in touch, give the following information:

(1) Latitude and longitude.
(2) Vessel's name.
(3) Vessel's call sign.
(4) Suez Canal official number, if any.
(5) Suez Canal gross tonnage and deadweight tonnage.
(6) Draft.
(7) Loaded or not.
(8) Kind of cargo.
(9) If transiting the Canal for the first time she has to send(18):
  (i) Date of building.
    Having Suez Canal Tonnage Certificate or not.
    Date of issue if any.
    Call sign or official number.
  (ii) Length overall.
  (iii) Beam.
  (iv) Type of engines.

This information will assist the Harbour Master to identify the vessel through his radar, acquire and assign her identification "ID" tag which will follow her path until the other end.

(c) If failing to contact by the assigned Channels, Masters may use, with the consent of the Harbour Master through the International R/T (2182 kHz) or SUQ (W/T), any of the following frequencies:

(1) 156.650 (Channel 13) Port Said.
(2) 156.600 (Channel 12) Port Said.
(3) 156.550 (Channel 11) Port of Suez.
(4) 156.700 (Channel 14) Port of Suez.

(d) Any vessel who does not contact the Port offices during her approach is subject to delays in catching the convoys.

(e) When berthing, changing berth or sailing, the Master must handle the mooring ropes by means of ship's boats or mooring boats of a firm approved by the Suez Canal Authority.

Article 15: Documents to be produced

(a) Suez Canal Special Tonnage Certificate.
(b) Certificate of Registry.
(c) Statistical Declaration.
(d) Extract from the vessel's official documents and information concerning the vessel's type and her cargo (containers, barges, etc.).
(e) Declaration concerning the use of double bottom tanks and the lower parts of the high tanks.
(f) Declaration concerning vessels in ballast.
(g) Declaration of State of Navigability (see Art.79).
(h) The last Classification Certificate issued.
(i) Any other information necessary for transiting the Canal.

The Master of a vessel wishing to transit the Canal must register at the Canal Authority offices and pay the various dues.

He must furnish the Canal Authority's officials with all the particulars requested.

The vessel must in addition comply with the requirements of the A.R.E. Government Authorities.

---

(14) Vessels under 300 tons SCGT are subject to Rules of Navigation for small craft.

(15) Vessels under 300 tons SCNT are exempt.

(16) Vessels in Port Said Anchorage Area (Northern and Southern Anchorages), the Bitter Lakes or Lake Timsah, if changing berth or mooring without explicit authorisation from the Suez Canal Authority, shall be charged an additional due of 3,600 Egyptian Pounds and 2,237.5 Egyptian Pounds in Suez VLCC anchorage and waiting areas.

(17) Port Said on Channel 16 – Port of Suez on Channel 16.

(18) In all cases the Master must inform whether aiming to transit the Canal or just stay in the harbour.

In case the Authority deems it necessary to be supplied with a new Seaworthiness Certificate, the following Classification Societies are recognised to deliver same:

(1) Lloyd's Register of Shipping.
(2) Bureau Veritas Francais.
(3) American Bureau of Shipping.
(4) Registro Navale Italiano.
(5) Germanischer Lloyd.
(6) Norske Veritas.
(7) U.S.S.R. Register.
(8) Nippon Kaiji Kyokai.

Seaworthiness Certificates are accepted by the Suez Canal Authority in Arabic or English. If written in any other language, it is to be translated in one of these two above mentioned languages and duly certified by the Embassy or Consulate of the Arab Republic of Egypt.

In case of impossibility of obtaining said translation, it may be translated by the Embassy or Consulate to which the vessel belongs, in Egypt.

Failing to do same, a Seaworthiness Certificate is to be obtained locally from one of the recognised Classification Societies in the Canal Zone.

(A) Warships:

Warships transiting the Suez Canal Waters must be provided with a Suez Canal Special Tonnage Certificate showing the Suez Canal Gross and Net Tonnages.

If such document is not onboard, the Commanding Officer has to give, in writing, the following information:

(1) Name of Ship.
(2) Name of Commanding Officer.
(3) Call sign of the ship (Radio Call).
(4) LOA, beam overall and depth of the ship.

As long as the ship is not provided with the Suez Canal Special Tonnage Certificate, transit dues will be levied on the temporary Gross Tonnage product of the empirical formula without any allowance till the presentation of the documents required.

(B) Erroneous Declarations:

If the Canal Authority Officials discover false information concerning the cargo carried[19] or the ship's situation ballast or loaded, resulting from the shipping clerk's or the Master's negligence, in statistical declarations held, the tolls difference will be doubled.

The tolls difference means the difference between the correct and the wrong amount of transit dues.

Article 16: Stay in the Harbour

(a) The Master is responsible for the mooring of his vessel in Port Said harbour and Port of Suez.

(b) He must pay special attention to the instructions in the following paragraphs.

(c) When the vessel is moored to the buoys, the mooring ropes must be watched to ensure safe mooring. If two vessels are moored to the same buoy, when one leaves, the other must adjust her moorings.

(d) Masters must comply with the Harbour Master's advice regarding mooring ropes during the stay of their vessel in port; especially when, in case of expected bad weather, it is necessary to increase the moorings if required.

(e) When a vessel is moored with her stern to the bank, the Master must keep himself continuously informed of the depth of water aft, to avoid grounding on the submerged slope either as a result of the settling of the vessel as she loads, or her proximity to the bank.

(f) At night, the vessel, whether moored or manoeuvring, must show the lights prescribed by the International Regulations for Preventing Collisions at sea, in addition to the Suez Canal Light Signals.

(g) Unless authorised, barges alongside a vessel must not be more than two abreast.

(h) It is forbidden to try projectors, or to turn the propellers during the process of warming-up, in the absence of the Pilot, or without informing him when onboard.

(i) Vessels must not put their engines out of working order for any reason whatsoever without permission from the Canal Authority.

(j) The Master must always keep onboard sufficient crew to ensure efficient handling of the moorings, fire fighting and damage control.

(k) The Harbour Master or his delegate should have free access onboard to ensure the carrying out of the Regulations, to verify the vessel's seaworthiness, and to ascertain that dangerous cargo onboard complies with the Suez Canal Regulations.

Article 17: Change of Berth

(a) If the Master wishes to change the berth of his vessel, he should notify the Harbour Office stating the desired time when the shift should take place. A tug or more will be imposed to assist in the manoeuvres.

The change of berth will take place at the time fixed by the Harbour Office. A Pilot will be sent to the vessel in due time.

(b) Shifting at the Master's request and the tugs used are charged for as per rates set down by the Suez Canal Authority.

(c) Charges for shifting due to erroneous or incomplete declarations by the Master must also be paid by the vessel.

(d) When necessary, the Harbour Master may order a vessel to shift; when so ordered, it should be made as quickly as possible. In such a case it is free of charge.

SECTION II: Preparations for Transiting the Canal

Article 18: Measures taken before entering the Canal

All vessels ready to enter the Canal must have their ladders and jib-booms run in, their boats swung in and any derricks or cranes obstructing the view forward, lowered.

Article 19: Mooring Ropes

At least 6 flexible floating mooring ropes of appropriate size for the vessel, in good condition, fitted with spliced eyes, must be in readiness for any emergency, at suitable points on deck. All arrangements must be made for their quick handling. For vessels equipped with tension mooring wires the number of floating ropes may be reduced to 4. It is to be noted, however, that any mooring lines, likely to produce sparks by their manipulation are absolutely forbidden on board petroleum tankers, LPG or LNG or any vessel carrying flammable substances.

It is recommended that:

(a) One of the ropes which is selected as "first line ashore" must be of floating material to ensure quick securing to the shore.

(b) Wires should not exceed 5.5 in. circumference to facilitate handling.

(c) All vessels should have:

Two fire ropes (wire) made fast, one forward and one aft, and hung over the vessel's side ready for use in case of emergency.

Article 20: Mooring Boats

(a) Vessels transiting the Canal must have mooring boats as mentioned hereafter hired from a mooring company approved by the Suez Canal Authority. In case no mooring boats from the said company are available, ship's boats if suitable for mooring in the Canal can be used and must be manned by shore crew, hired from the same mooring company. Each boat is to be manned by three men.

These vessels are required to have their lifeboats in constant readiness for mooring and unmooring operations.

(b) One mooring boat or one motor boat for vessels under 2,500 tons gross, SCGT (SCGT = Suez Canal Gross Tonnage).

(c) One mooring boat and one motor boat or two mooring boats for ships from 2,500 to 30,000 tons SCGT.

(d) Two motor boats for vessels over 30,000 tons SCGT.

(e) Ships may ask for additional motor boats or mooring boats according to Master's request. These mooring boats must be in constant readiness for lowering to run the ropes to the mooring posts without any delay during the transit of the vessel. (Vessels contravening (b), (c) and (d) above will not be permitted to transit).

(f) Ships must be fitted with lifting appliances capable of lifting mooring boats of 4 tons weight.

(g) Ships may carry extra mooring boats for safety of navigation. However, LPG, LNG and Loaded Tankers are not allowed to carry any extra boats.

(h) The handling of mooring boats must be carried out well clear from the ship's propellers.

(i) If the vessel has no means for lifting mooring boats and ship's boats are not suitable for mooring in the Canal, the vessel shall not be allowed to transit the Canal.

Article 21: Spreaders (Slings)

Container ships are advised to have their own spreaders (slings) to assist unloading and reloading containers in case of necessity. Those carrying different sizes of containers must have their own spreaders.

Article 22: Indicators

There must be a rudder angle indicator and an engine RPM indicator in the wheelhouse so located and illuminated as to be easily visible by the Pilot.

Article 23: Bow Anchors

The bow anchors must be ready to let go. (If only one anchor, see Article 57, paragraph f).

Article 24: Accommodation and Pilot Ladders

(a) Pilot Ladder: In anchorage areas, outside the Canal, North or South, pilot ladders can be used to embark and disembark Pilots.

The ladder shall be secured in such position that each step rests firmly against the vessel's side and so that the Pilot can have safe access to the vessel. Whenever the distance from sea level to the point of access to the vessel is more than 12 ft. (or 3.65 m.), access from the pilot ladder to the vessel shall be by means of an accommodation ladder or other equally safe and convenient means.

The treads of the pilot ladder shall not be less than 19 in. long, 4.5 in. wide and 1 in. in thickness. Steps shall be joined in such a manner as will provide a ladder of adequate strength with treads maintained in a horizontal position and not less than 12 in. or more than 15 in. apart.

A man-rope properly secured, and a safety line shall be available and ready for use if required. Handholds are to be provided to assist the Pilot to pass safely and conveniently from the head of the ladder into the vessel or on to the vessel's deck and vice versa.

If necessary, spreaders shall be provided at such distance as will prevent the ladder from twisting.

Arrangements shall be such as:

(1) The rigging of the ladder, the embarkation and disembarkation of the Pilot is supervised by a responsible officer of the vessel.

(2) A self igniting life buoy is to be available at hand.

(b) Accommodation Ladders: Accommodation ladders are to be used in the Canal, harbours and lakes to embark and disembark Pilots.

In case no accommodation ladder is available, or difficult to rig, the vessel has to inform S.C.A. before entering harbour or Canal. The change of Pilot which is originally carried out at Ismailia, will take place in the Bitter Lakes after anchoring. In such case, the vessel will be charged an extra 200 L.E. (Egyptian Pounds) as pilotage dues for each relieving Pilot.[20]

Article 25: Efficiency of Vessel's Equipment

Before entering the Canal it must be ascertained that main engines, steering gear, engine room, telegraph, rudder angle and r.p.m. indicators, W/T, VHF and radar are in good working order.

Every vessel navigating in the Suez Canal Waters under the advice of the Suez Canal Pilot, should maintain bridge and engine bell books.

In the bridge bell book, each engine movement and the time of its transmission from the bridge to the engine room is to be recorded as well as in the engine room bell book.

No vessel is required to maintain any bell books if equipped with an automatic device which produces a permanent legible record of every engine movement.

---

[19] e.g. The carriage of sweet water as cargo and declared as ship's water ballast; the omission of declaring the presence or quantity of containers on the weather deck or any cargo onboard, passengers, etc. . . .

[20] Ships with freeboard of less than 10 ft. may use pilot ladder.

The bell books and the automatic records referred to, must be handed, upon request, to the Suez Canal Officials for the purpose of investigation if necessary.

Note: Gyro Pilot should not be utilised on board during the transit of the Suez Canal, the ordinary steering Telemotor apparatus is to be utilised, making sure of the steersman's ability, with a view to realising the safety of navigation and avoiding any risk of error involving grounding or any other accident.

Article 26: Deck Cargo

Deck cargo is to be stowed in a way so as to provide a clear view from the navigating bridge while transiting the Canal, as well as not to affect the vessel's stability.

The deck cargo should not protrude more than half the vessel's breadth on any side with a maximum of 15 m. if breadth exceeds 30 m.[21]

Note: Vessels having a deck cargo protruding in excess of the fixed limit, may be exceptionally granted authorisation to transit on the following conditions:

Each case is to be studied separately. If authorisation is granted, an additional due of 2 per cent of the transit dues is levied on each foot or fraction of foot in excess.

Article 27: Water Ballast

Vessels in ballast must fill spaces intended to be used for carrying water ballast in such proportion as the Officials of the Suez Canal Authority may direct.

Article 28: Searchlight

(A) Before transiting the Canal, the vessel should be provided with a searchlight (projector) placed on the Bow in the axis of the vessel which shows the Canal clearly. It must have the following characteristics:

1. Minimum range of radiation of single beam 1,800 m. ahead (brightness of 1 Lux approximately at the atmospheric transmission factor = 0.85).
2. The power of the lamp must give a luminous intensity of single light beam not less than 3×10^6 (3 million) candela, which is equivalent to high efficiency incandescent lamp of:
   2,000 Watts for vessels up to 30,000 S.C. tons gross.
   3,000 Watts for vessels over 30,000 S.C. tons gross.
3. The drum and stand should be of high corrosion resisting material and can be operated both horizontally and vertically.
4. The front glass must be of hardened type and can stand rapid cooling.
5. The reflector must be in two halves of precise ground glass mirror of highest quality or of polished aluminium having at least 95% the reflective capacity of the glass mirror.
6. The two halves of the reflector can be brought together (zero position) to make a single reflector light beam and can be parted to give two separate light beams each of 5° at least, on the horizontal level with adjustable dark sector from 0 to 10°.
7. The searchlight drum must be watertight (presssure test 0.25 kg./sq.cm.) and gastight (according to the classification rules for the vessel's electric appliances within dangerous areas) and provided with a vent-out to which a flexible hose can be fitted on the drum to dissipate the heated air out of the searchlight in addition to a safety vent.
8. The searchlight must be equipped with 2 lamps carrier that can be turned into position to let the lamp exactly in the focus of the reflector, and the current must be switched on automatically.
9. The electric system (switches, plug, socket and cables) must be of first class marine type. The degree of protection IP 55 or similar standards.
10. The searchlights must have a certificate for the "type test" issued by one of the Classification Societies (Lloyd's Register, etc.). The original to be submitted to Suez Canal officials and thereby after test by S.C.A. inspection the searchlight can be accepted.

(B) For vessels carrying petroleum products, LPG, LNG, or flammable substances, or vessels Not Gas Free, the searchlight must be gastight and all electrical connections leading to it should be insulated. If a device for expelling the hot air from the interior of the searchlight exists, exit of the air must be effected in a place devoid of flammable gas. For safety reasons it has been decided that on all vessels of whatever type, electric cable installations for searchlight and all electrical connections leading to it must be permanently fixed, insulated and gastight.

At the end of the cables a fixed and gastight socket should be installed close to the searchlight.

(C)The searchlight, to be approved, must have a Certificate for the 'Type test' issued by one of the recognised Classification Societies, which will be submitted to the Suez Canal Authority Inspector, and be tested in the Canal and proved to be in good working order. On board vessels electrically propelled or having electrically driven gear (steering, winches, etc. . . .) the number of generators and their individual power output must be sufficient to ensure uninterrupted functioning of the searchlight in the event of stoppage of one of the generators.

No exception to this rule will be allowed except when there is an independent generator and circuit on board specifically set apart for the searchlight.

(D) This projector can be hired locally from the Canal Mooring and Light Company and weighs 1.5 tons.

(E) For vessels fitted with their own projector, 2 shore electricians should operate it during the transit.

(F) Vessels with bulbous bow, may be provided with searchlight on condition that top of bulbous bow be lower than sea level by not less than 10 ft.

However, LPG and LNG vessels, without any exception, must be provided with their own searchlight.

Vessels entering the Canal, direct from sea must also be provided with their own searchlight.

(G) If electrical connections and/or searchlight do not conform, the vessel is liable to transit only in daylight and therefore is subject to delay.

An additional due of 3,000 Egyptian Pounds will be imposed when the searchlight and/or electrical connections do not conform for the 3rd and each following transit.

Article 29: Overhead Lights (Deck Lights)

Overhead lights visible all round the horizon with a minimum range of 200 m. (roughly 650 ft.).

Article 30: Bridge Wing Projectors

Bridge wing projectors on either side of the bridge must be fitted to show the Canal banks clearly during the transit and mooring operations.

Characteristics: Power about 4 LUX at an atmospheric transmission factor (T = 0.74) and minimum range 200 m.

Article 31: Funnels

Funnels must be lit to facilitate the identification of the vessel by night.

Article 32: Bridge and Engine Room Communication

Communication system between engine room and bridge must be in good working condition.

Article 33: Pumping Draining Arrangements

The pumps and pumping arrangements including valves, pipes and strainers from holds as well as from the engine and boiler spaces must be in good working condition.

Article 34: Watertight Bulkheads and Doors

All watertight bulkheads and doors are required to be in good efficient condition.

Article 35: Draft Marks

All vessels shall have the draft plainly marked and painted upon the stem, amidships (including Plimsoll Mark and Deck Line) and stern post or rudder post.

Article 36: Whistles and/or Sirens Must Always be Ready for Use

As prescribed in Part III, Article 93.

Article 37: Fire Fighting Equipment on Vessels

As prescribed in Article 61.

Article 38: Side Doors

When side doors are used for boarding, and the minimum vertical distance between the waterline and the bottom of the side door is less than six feet, they should be closed immediately after embarking and disembarking of Pilot and during transit through the Canal.

Article 39: Manning Vessels

The crew of vessels intending to transit the Canal should have efficient and good knowledge of their vessel and be sufficient in number to permit safe handling of the vessel during transit.

Article 40: Deck Watch & Engine Room

When underway in Canal Waters the vessels shall keep a full watch on the bridge and in the engine room, as well as anchor watch.

Article 41: Special Arrangements for VLCCs

(See Article 58).

Article 42: Accommodation

A SUITABLE (OFFICER CLASS) ACCOMMODATION IS TO BE PUT AT THE PILOT'S DISPOSAL WHILE AT ANCHOR IN THE BITTER LAKES OR MADE FAST IN MOORING PLACES ALONGSIDE THE CANAL. IN CASE OF NO SUITABLE ACCOMMODATION AVAILABLE, THE VESSEL WILL PAY EXTRA DUES OF LE200 (TWO HUNDRED EGYPTIAN POUNDS) FOR EACH RELIEVING PILOT. SHE MAY BE DELAYED IF NO RELIEVING PILOT IS AVAILABLE.

A sheltered place is to be provided for the mooring boatmen (6 to 9 men according to the size of the vessel) and 2 shore electricians for the projector, during transit.

Article 43: Vessels Carrying Timber

The timber deck cargo shall be compactly stowed, lashed and secured in a way that it shall not hinder navigation and allow safe access on deck. The loading must not exceed the Tropical Timber Load Line (LT). The height of the deck cargo above the weather deck shall not exceed one third of the extreme breadth of the vessel.

Article 44: Life Saving Appliances

Life saving appliances for vessels navigating in the Canal Waters should meet with the requirements of the International Convention for the Safety Of Life At Sea.

Article 45: Anchor Watch

An anchor watch has to be added during bad weather or poor visibility and when advised by the Pilot.

Article 46: Stoppage in Canal

When anchored in the Bitter Lakes, Lake Timsah or stopped in the Canal, the engines should always be ready for use.

If failing to comply with any of the previous requirements, a vessel may be delayed from joining the convoy and/or may be subject to special arrangements for her transit. This includes imposing convoying tug boats. Access to the Canal may also be refused.

SECTION III: Interdiction to Enter Canal

Article 47: A vessel will not be allowed to transit the Canal in any of the following cases:

(a) Any vessel considered by the Suez Canal Officials, dangerous for navigation.

(b) If carrying dangerous cargo and not conforming to the Appendix of Rules of Navigation for vessels carrying dangerous cargo.

(c) If having a list more than 3 degrees.

(d) If trimmed in a way causing bad manoeuvrability.

(e) If having deck loads protruding from vessel's sides in a manner endangering the safety of transit (see Article 26).

(f) If the vessel is tender or loaded in a manner that dangerously affects her stability.

(g) If her draft is in excess of the maximum permitted according to these Rules.

(h) For VLCCs and ULCCs if there is strong wind.

(i) The Suez Canal Authority may consider delaying the entry to the Canal in cases of bad weather.

(j) Any vessel whose Tropical Load Line is submerged, or Plimsol Marks not plainly visible.

---

[21] Containers on containerships are not considered as deck cargo. Specially built vessels and barges carrying drillers or bulky deck cargo to be studied separately.

Article 47 Bis:

(a) The Suez Canal Authority reserves the right to refuse access to Canal Waters to any vessel in case of non or erroneous declaration of the presence of dangerous cargo on board such as ammunition, explosives, radioactive substances, etc.

(b) If the dangerous cargo mentioned in para (a) is discovered during the transit, the Suez Canal Authority reserves the right to refuse access to Canal Waters to this vessel for a period not exceeding two years. An additional due of 30,000 L.E. (thirty thousand Egyptian Pounds) will be imposed for this violation.

SECTION IV: Proceeding to the Canal

Article 48: General

Masters shall ask for Pilots by clearly displaying "G" flag by day and 3 white lights at night, at least two hours before the time they expect their vessel to be ready to get underway. *Singling Up* should not be before the Pilot is on board. When several vessels are ready to get underway at the same time, the order of their sailing will be fixed by the Canal Authority.

All vessels must stop whenever the passage ahead is not clear. They must slow down passing collapsed or under repair banks, as well as when passing all vessels in sidings, hoppers, dredgers and other floating plants made fast.

As soon as a vessel is made fast, she must hoist the signals pendant No. 2 by day and red light aft at night. The vessel must be ready to slack down ropes or cut them if need be. Engines must always be ready for manoeuvring.

CHAPTER III: CONVOY SYSTEM – Maximum Dimensions, Towage and Escorting

SECTION I: Convoy System

Article 49: Formation of Convoys

A 3 convoy system is applied in the Suez Canal.

(A) *Northbound Convoy*

Starts about 0615 hrs. at Km. 160 and consists of 2 groups of vessels.

(1) *Group A*

(a) Third generation container ships, LPG and LNG, speed of transit 14 km./hr.(22)

(b) Loaded VLCCs, conventional loaded tankers and heavy bulk carriers,(23) speed of transit 13 km./hr.(22)

(22) Without current and in good weather conditions.

(23) Draft over 38 ft. or length over 950 ft. B.P.

(2) *Group B*

Cargo and other vessels anchored in Suez Anchorages.

The speed of transit of this group is 14 km./hr.(22) The Northbound convoy has a free run from Port of Suez till Port Said. It passes through the East Kabrit Channel, the Eastern Dredged Channel in the Bitter Lakes, the Deversoir East Channel, the East Channel of Lake Timsah, the East Channel of Ballah By-pass and the East Channel from Km. 17 Northward.

In case the Northbound convoy has to stop in the Bitter Lakes due to traffic situation of Southbound convoy or any emergency:

(a) Container vessel heading in convoy will drop anchor in the suitable East Anchorage Areas of the Bitter Lakes.

(b) VLCCs will anchor in the suitable East Anchorage according to their draft.

(c) All other vessels will anchor in the East Areas corresponding to their draft.

(d) 3 berths are available in Kabrit East Branch, in case of emergency.

Note: LPG, LNG in ballast or loaded, and loaded chemicals in bulk are included in the Tankers Group for safety.

(B) *Southbound Convoy (N1)*

Starts from 0100 hrs. to 0500 hrs. and consists of 2 groups of vessels.

(1) *Group A,* consists of vessels who are made fast in Canal West Branch from Km. 15 to Km. 4 and Port Said Harbour.

(2) *Group B,* consists of vessels anchored in the new anchorage areas to the N.W. of Port Said, third generation container ships, VLCCs in ballast and vessels of over 38 ft. draft. This group will be headed by the container ships and the first vessel will enter through the Port Said East Approach Channel as soon as the last vessel Northbound clears Hm. 150. The speed of transit is 14 km./hr.(22)

The Southbound convoy has a free run to the Bitter Lakes. It passes through the East branch of Ballah By-pass, the East Channel of Timsah Lake, the Deversoir West Channel and anchors in the Western anchorages in the Bitter Lakes.

The sequence of vessels when route continues from Bitter Lakes will be the third generation container ships, followed by VLCCs in ballast and then other vessels. The first ship of the Southbound convoy will regulate speed to cross the last Northbound vessel abeam of Kabrit station.

(22)Without current and in good weather conditions.

(C) *Third Convoy (N2)*

A third convoy, Southbound, according to intensity of traffic from North or South. Max. draft 35 ft., max. beam 115 ft.

In case of forming a second Southbound convoy the starting time from Port Said will be at 0700 hrs. and up to 0900 hrs. Vessels will make fast in Ballah West Branch and continue route after last Northbound vessel clears Km. 60.

Vessels not authorised to join this convoy are the following:
Loaded tankers carrying Petroleum Grades and similar substances.
LPG and LNG.
Vessels carrying chemicals in bulk.
Vessels carrying radioactive substances.

NOTICES: Issued by Canal Shipping Agencies Company, Port Said:

Circular No. 80/83:

We have been advised by Suez Canal Authority that as a trial from 23.7.83 convoy timing will be as follows:

First Convoy from Port Said:

From 0100 hrs. until 0500 hrs.
Followed by small vessels up to 5,000 tons until 0600 hrs.
(Limit time arrival waiting area 1800 hrs.).
(Latest time for hoisting the signal asking for Pilot 2030 hrs.).

Second Convoy from Port Said:

From 0700 hrs. until 0900 hrs.
(Limit time arrival waiting area 0200 hrs., instead of 2400 hrs.).
(Latest time for hoisting the signal asking for Pilot 0300 hrs.).

Following vessels are not permitted to join second convoy:
A – Tankers loaded petroleum flash point −23°C.
B – LPG.
C – LNG.
D – Tankers carrying chemicals in bulk.
E – Vessels carrying radioactive materials.

Convoy from Suez:

A – Containers and Ro-Ro vessels from 0600 hrs.
B – Tankers from 0700 hrs. followed by ordinary vessels until 1130 hrs.

Masters have to send by radio to the Agents the following information at least 48 hours before vessel's arrival.

Gross and net tonnage indicated by the Suez Canal Special Tonnage Certificate and date of latest certificate.

Gross and net tonnage indicated by Registry Certificate and date of latest certificate.

Vessel's nationality.

Owner's name.

Type of vessel (cargo – container ship – LASH vessel – Ro/Ro, etc.).

If vessel has previously transited canal under her present or former name. Affirmatively mention date of last transit.

If any alteration has been made in the vessel's particulars. In case no alterations made, they have to send "Particulars No Change".

Circular No. 90/83: **Second Convoy from North (Convoy N2)**

We would like to inform you that it has been decided as from the 23rd July, 1983, to authorise the following categories of vessels to join the second convoy from North (Convoy N2) and, therefore, to moor at Ballah Loop:

Loaded tankers carrying Petroleum Grades B – C and similar substances (Flash Point +23°C).
Tankers in ballast NGF.
Vessels carrying Group 1 dangerous cargo (Explosives).

Consequently, vessels NOT ALLOWED to join the Convoy N2 that has to moor at Ballah Loop, are:

1. Loaded tankers carrying Petroleum Grade A and similar substances (Flash Point −23°C).
2. LPG and LNG vessels.
3. Vessels carrying chemicals in bulk.
4. Vessels carrying radioactive substances.

Circular No. 20/84:

As from 1.2.84 vessels with beam and draft as indicated in table below are authorised to use the Ballah West Branch:

Beam		*Draft*		*Beam*		*Draft*	
ft.	m.	ft.	in.	ft.	m.	ft.	in.
141	42.98	38	00	151	46.02	35	1.5
142	43.28	37	11	152	46.33	34	10
143	43.59	37	7.5	153	46.63	34	6
144	43.89	37	4	154	46.94	34	2
145	44.20	37	00	155	47.24	33	10.5
146	44.50	36	8	156	47.55	33	7
147	44.80	36	4	157	47.85	33	3
148	45.11	36	00	158	48.16	32	11
149	45.41	35	8.5	159	48.46	32	7.5
150	45.72	35	5	160	48.77	32	4

Circular No. 25/84: **Ballah West, Beam/Draft**

Further to our Circular No. 20/84 concerning vessels authorised to use Ballah West Branch, please note that for vessels of the Second Southbound convoy (N2), making fast at Ballah West Branch, the beam must not exceed 141 ft. and draft 38 ft.

Circular No. 54/85: **Transit of VLCC's:**

We append hereunder text of Circular letter No. 432939, dated 28.5.1985, received from the Director of Transit, Suez Canal Authority, Ismailia, in connection with the transit of VLCC vessels in the Suez Canal, contents of which are self-explanatory:-

Quote:

Owing to the request of several shipowners for the transit of vessels with beam over 218 ft. and up to 230 ft., the Suez Canal Authority taking into consideration the present shipping situation, undertook careful studies to comply with the said request.

The S.C.A. has the pleasure to inform you that the above mentioned vessels may transit the Canal under the following conditions.

1. A pre-approval to be obtained in good time prior to transit.
2. Transit to be effected in good weather (wind not exceeding 10 knots).
3. 10% of the transit dues for precautionary measures and special arrangements.
4. 2 tug escort against 5,000 SDR per tug.

Unquote.

Circular No. 23/86: **LNG/LPG:**

We append hereunder, for your information text of Circular No. 433224, dated 2.3.86, received from the Director of Transit, Suez Canal Authority, Ismailia, the contents of which are self-explanatory:

Owing to the great danger involved in the transit of LPG and LNG through the Suez Canal, the following is to be applied:

I *From date of issue*

1. *From North*

(a) LPG and LNG whatever the tonnage are not allowed to make fast in Port Said Harbour.

(b) Anchor in the Northern Waiting Area.

(c) Join the first Southbound convoy direct from sea through the Eastern Branch.

(d) The turn to be rearranged at the Great Bitter Lake to take the lead of the convoy.

2. *From South*

(a) LPG and LNG whatever the tonnage are not allowed to anchor in the Inner Bay at Suez.

(b) Anchor in the Waiting Area South of Conry Rock.

(c) Join the Northbound convoy direct to the Canal following the 3rd generation containership, Ro/Ro and similar and ahead of the loaded tankers and bulk carriers.

II *As from 1.4.1986*

1. LPG and LNG up to 80,000 tons S.C.G.T. will be escorted by 1 S.C.A. tug against 5,500 s.d.r.

2. LPG and LNG over 80,000 tons S.C.G.T. will be imposed 1 S.C.A. tug as per Rules of Navigation Art. 57.

Circular No. 27/86: **Two engines and one propeller:**

We append hereunder, for your information, text of Circular No. 433250, dated 31.3.86, received from the Directorate of Transit, Suez Canal Authority, Ismailia, the contents of which are self-explanatory:

A vessel with 2 engines, on 1 propeller, requesting to transit the Canal with 1 engine, as the other is under repair or dismantled, the following to be applied:

1. Undergo sea trails.

2. Valid Seaworthiness Certificate from a recognised Classification Society, mentioned in Suez Canal Rules of Navigation Art. 15, stating that vessel is with 1 engine able to maintain Canal speeds.

3. If sea trials are satisfactory, vessel may transit Canal without imposed tug.

Circular No. 433381: dated 24/7/1986

Possibility of Increase Loading of Partial Loaded Tankers - Northbound at 13 km./hr.

Authorising vessels and loaded tankers to transit the Suez Canal from South (13 km./hr.) with draft exceeding the current permissible one stated in Rules of Navigation, edition January 1986 (Table "C-1") (column No. 1, and not to exceed draft mentioned in column No. 2 attached table overleaf).

1. On completion of the first stage of Suez Canal development project in December 1980, and after widening and deeping the Canal, loaded vessels from South (speed 13 km./hr.), of beam not exceeding 140 ft. were authorised to transit with draft 53 ft.; the more beam is, the less draft will be.

Table of draft in relation to beam over 140 ft. in column No. 1 extracted from Rules of Navigation, edition January 1986, Art. 54, pages 76-80 is attached.

2. As the Authority has recently widened the Northern section of the Canal by 50 m. average width. In this connection, various studies and laboratory experiments have been successfully conducted.

Accordingly the Authority decided to increase the current permissible draft stated in the Rules of Navigation, edition 1986 for loaded vessels from South (speed 13 km./hr.).

3. Column No. 2 of attached table clarifies maximum authorised draft increase.

4. An additional due of 0.6% (six per thousand) will be levied for every inch or fraction of an inch which surpasses the current permissible draft stated in the Rules of Navigation, January 1986 edition.

5. This Circular comes into force as from 26/7/1986.

The Director of Transit

Explanatory Example

	Permissible Draft			
Beam	*Before Development* Column (1)	*After Development* Column (2)	*Draft Increase*	*Dues Increase*
(ft. in.)	(ft. in.)	(ft. in.)		
143 09	52 00	53 00	2 ft. (12 in.)	7.2%
176 06	41 04	43 04	2 ft. (24 in.)	14.4%

NORTHBOUND LOADED VESSELS TRANSITING AT 13 km./hr.

Article 50: Limit Time of Arrival to Join Convoys

Also see Article 49 – "Notices".

(A) ***Southbound Convoy***

(1) 3rd generation container ships, VLCCs in ballast and loaded vessels over 38 ft. draft who will anchor in the new anchorage area (V berths) N.W. of Port Said and declared by Agents ready for transit, have to reach the anchorage area before 1800 hrs.

(2) Other ships entering from Port Said harbour have to reach the anchorage area before 1800 hrs.

(3) Ships arriving after 1800 hrs. and not later than 0200 hrs. will join the second convoy either from Port or direct from sea and be declared by Agents ready for transit, providing the capacity of the Canal permits.

(B) ***Northbound Convoy***

(1) Ships anchoring South of Conry Rock: 3rd generation container ships, VLCCs, super tankers, heavy bulk carriers and vessels over 38 ft. draft, have to reach the anchorage area (V berths) and be declared by Agents ready for transit before 2400 hrs.

(2) Other vessels who will anchor in the anchorages of the Port of Suez, have to reach the waiting area and be declared by Agents ready for transit before 0200 hrs.

(C) In all cases the documents required should be produced before the passage of the vessel to the Canal office at Port Said or Port Tewfik.

Article 51: Courses to Keep on Leaving for Sea

(A) ***At Port Said***

Vessels of Northbound convoy have to maintain course through the East approach channel till Hm. 195 then alter course North 000° for five miles before altering to destination.

(B) ***At Port of Suez***

Vessels proceeding to sea have to maintain course through the channel till the last pair of buoys, then keep the separation zone on the port side till the separation zone Buoy No. 1.

SECTION II: Maximum Dimensions (Vessel's Sizes and Drafts)

Article 52: Dimensions of Vessels Authorised to Transit (To be amended in near future)

These dimensions are given hereunder:

(a) *Max. length:* No restrictions.

(b) *Max. beam:* 210 ft.

(c) *Max. draft:* The tables A, B and C give the maximum draft authorised in relation to the beam of vessel according to the following:

(i) *Table "A":* For vessels in ballast transiting in either direction.

(ii) *Table "B":* For loaded vessels transiting Southbound. The speed of transit being 14 km./hr.

(iii) *Table "C":* for loaded vessels transiting Northward and includes two tables C-1 and C-2.

(a) Table C-1 gives the draft for vessels transiting at speed of 13 km/hr.

(b) Table C-2 gives the draft for vessels transiting at speed of 14 km./hr. (including LPG, LNG vessels and vessels carrying chemicals in bulk).

In these Tables the beams are given in metres and feet and the drafts in feet only.

Article 53: Conditions of Transit

(A) For loaded vessels the max. draft for each vessel according to tables B and C or her tropical loadline whichever is less.

Notes:

1. (a) Vessels allowed to transit at a draft of over 50 ft. up to maximum 53 ft. must prior to those drafts effectuate an experimental satisfactory transit at a draft of 50 ft. max. and not less than 49 ft. 9 in.

(b) Sisterships are not to get benefit of authorisation granted to a particular ship of the group.

2. Vessels with beam over 200 ft. and up to 210 ft. are allowed to transit only in calm weather, i.e. beam wind not exceeding 10 knots.

3. Northbound LPG, LNG vessels and vessels carrrying chemicals in bulk, are subject to the Tables of Beam and Draft for vessels proceeding at 14 km./hr. speed.

For safety measures they are included in the "tankers" group.

(a) Chemicals in bulk vessels are included in the "tankers" group **only** when they are **loaded.**

(b) LPG and LNG vessels are included in the "tankers" group either loaded or in ballast and they are put ahead of the loaded tankers.

4. Vessels with Load Line Certificate not mentioning the amount of Freeboard of their Tropical Load Line and consequently do not have the Tropical Load Line marked on their sides, will be authorised to transit Suez Canal with a maximum draft up to the SUMMER Load Line only, or the maximum allowed draft Tables A, B, C-1 and C-2, whichever be the less.

Table "A" Vessels in Ballast.

Max. draft for different beams for vessel from North or South.

Beam	*Up to* 160 ft. (48.77 m.)	*Over* 160 ft. *Up to* 190 ft. (48.77 m. *up to* 57.91 m.)	*Over* 190 ft. *Up to* 210 ft. (57.91 m. *up to* 64.00 m.)
Draft in feet	*Recommended*		*Maximum*
	Fore 25 *Aft* 29	*Fore* 28 *Aft* 32	*Fore* 29 *Aft* 33

Note: Vessels with beam up to 190 ft. or 57.91 m. are not authorised to transit at a draft over 33 ft.

Table "B" – Loaded Vessels.

Note: For technical considerations LPG and LNG vessels *in ballast* are admitted to transit the Canal at draft of 33 ft.

In case of use of fresh water for ballast, vessel loses the privilege of being in ballast, and therefore, dues will be levied on the basis of laden vessel.

1. *Maximum draft for different beams for loaded vessels transiting Southbound*

Speed 14 km./h.

Article 54: Speed

The speed of convoys is the following:

(a) Southbound: 14 km./hr.

(b) Northbound:

(1) 13 km./hr. for loaded tankers and bulk carriers group.

(2) 14 km./hr. for ordinary group.

SECTION III: Towage and Escorting

Article 55: Canal Authority Tugs

(A) At Port Said Harbour, tugs may be placed at the disposal of Masters if the Canal Authority deems it necessary. No charge is made for the assistance given by these tugs to transiting vessels for mooring and getting underway. In all other cases, a charge is levied by the Suez Canal Authority. Vessels manoeuvring in the harbour are required to provide their own ropes. Wire tow-ropes are not allowed.(24)

(B) In other cases, tugs can be hired for mooring, towing or getting a vessel afloat. Charges paid by the vessel will be according to rates set by Suez Canal Authority.

(C) In accordance with the terms of Article 57 of the present Chapter, the Officials of the Canal Authority may impose on certain defective vessels, or vessels carrying dangerous cargo, a tug or more for towing or escorting during transit of the Canal.

In such cases, charges are paid according to rates set by Suez Canal Authority.

(D) The Master of a vessel using a tug placed at his disposal has the exclusive direction and control of the manoeuvres of both the vessel and the tug.

(E) Whatever may be the conditions or circumstances under which the Canal Authority tugs are made use of by a vessel, the Master of the vessel is responsible for any damage or accidents whatsoever resulting directly or indirectly from the use of the said tugs, including damage which may occur to the tugs themselves, and to equipment.

Article 56: Use of Private Tugs

Shipowners are authorised to have their vessel towed or conveyed by their own tugs under their entire responsibility. Such tugs must be approved by the Suez Canal Authority. Apart from the special towage dues, tugs belonging to private owners are subject to the strict observance of all the parts of the rules relative to vessels manoeuvring, in transit or berthing.

Towing arrangement must be supervised and approved by the Suez Canal Authority personnel.

Article 57: Cases of Imposed Tugs

Chargeable tugs shall be imposed during Canal transit, at the tariff hire rate, in the following cases:

(a) The Canal Authority may require any vessel to take a tug or tugs through the Canal, when in its judgement such action is necessary to ensure safety to the vessel or to the Canal.

(b) LPG and LNG of over 80,000 tons (SCGT). It is also requested that a steering light, to be lit at night, be fitted on the extremity of the tanker's bows.

(c) Any vessel without mechanical power, or the machinery of which is (or becomes) disabled, or steers badly, or which is liable to become unmanageable for any reason, shall be towed through the Canal.

(d) Bad view vessels owing to deck cargo, containers, cranes or constructions impeding the view from the wheelhouse and wings.

(e) Vessels with defective indicators, or vessels without indicators, on their second trip through the Canal.

(f) Vessels unable to use one of her two anchors.

(g) Drilling vessels.

Article 58: Escorting

The escort of VLCCs, ULCCs, large bulk carriers and other vessels will be as follows:

(a) Loaded vessels under 110,000 d.w.t. will be escorted by 1 tug if for technical reasons the Suez Canal Authority finds it necessary, or when the vessel's draft exceeds 45 ft.

(b) Loaded vessels from 110,000 d.w.t. to 150,000 d.w.t. will be escorted by 1 tug.

(c) Loaded vessels over 150,000 d.w.t. will be escorted by 2 tugs.

(d) Vessels in ballast over 200,000 d.w.t. will be escorted by one tug.

Above mentioned vessels have to prepare 2 polypropylene ropes 16 in. circumference(25) to join the stern to the tug during stopping operations. The ropes should be eye spliced to fit in the quick release hook on the tug and with adequate length to give distance between fore of the tug and stern of vessel at about 50 m. On the vessel these ropes will be made fast on stern bitts port and starboard. The eyes will be hanging over the stern about 2 m. above water and lashed with rope stoppers to break loose when necessary.

Transit of drilling rigs and towed units:

1. (a) Drilling vessels.
   (b) Drilling rigs loaded on special vessels are to be escorted by a Suez Canal tug.
2. (a) Drilling rigs with self steering power.
   (b) Drilling rigs without self steering power.
   (c) Drilling rigs with legs which can be lifted so that nothing extends under the rig's bottom.

The above are to be assisted by a Suez Canal tug aft and another Suez Canal tug as escort, in addition to a powerful tug forward to make speed in the Canal not less than 12 km. per hour over the ground. They must also be in good state of stability.

3. Drilling rigs with legs that cannot be lifted and a part remains under the rig's bottom: Each case has to be studied separately to decide whether the unit is allowed to pass the Canal or not.

4. Other towed units are not allowed to transit Suez Canal, unless they are towed by a tug suitable to the size of the unit and powerful enough to maintain a speed in the Canal not less than 12 km. per hour over the ground, in addition to the assisting Suez Canal tugs, whenever found necessary by Suez Canal officials.

General:

(a) All enquiries concerning the possibility and/or approval of transit of towed units, drilling rigs, dredgers, etc., are to be submitted by the Owners of the units or Local Official Agency, accompanied by a General Arrangement plan and all particulars of the unit: name, LOA, beam, draft, height, self steering, etc.

The application must reach the Suez Canal Authority (Directorate of Transit, Ismaila, Egypt) not less than two weeks before sailing of the unit from its base.

(b) Any towed unit must be supplied with floating mooring ropes in good condition and suitable in number (more than six) and size according to the dimensions of the unit.

(c) A responsible person and a crew of at least 10 persons must be on board the unit during the transit.

(d) A valid Seaworthiness Certificate for the towage through Suez Canal must be available.

(e) The unit must comply with the Suez Canal Regulations.

(f) If the transit is authorised a survey of the unit shall be made on the arrival, in order to take the definite steps and make the final arrangements for the transit, if it complies to Suez Canal Rules.

(g) The transit is subject to the circumstances of the Navigation in the Canal, and the weather conditions.

CHAPTER IV: ACCIDENTS – LEAKS – PRECAUTIONS AGAINST FIRE AND POLLUTION

Article 59: Accidents

(A) Whenever a vessel underway is accidently stopped, she must, if other vessels are following, attract their attention by giving five or six short blasts on the whistle or siren. This signal is to be repeated at short intervals. It means "I am reducing speed and may have to stop and make fast". Vessels stopped accidentally at night, must in addition, immediately replace their white light astern with a red light.

---

(24) Wire tow-ropes should not be confused with the fire-wire ropes made fast onboard and fitted with an eye splice or connecting shackle hanging over the side as required. See Article 61 (C).

(25) For vessels under 100,000 d.w.t., if their draft is over 45 ft.

In case of grounding, the Master must immediately hoist the following:

	By Day	By Night
Passage clear for tugs	Black Ball Pendant No. 2	Red Light
Passage not clear for tugs	Black Ball; Pendant No. 2; International Code Flag "N".	2 Red Lights.

Send also a radio message stating whether a tug is required or not, whether or not passage is clear for the tug and whether lightening is necessary, etc.

(B) When a vessel runs aground, the Canal Authority Officials are alone empowered to order and direct all operations required to get the vessel afloat and if necessary, have her unloaded and towed. Nevertheless, Masters remain responsible for all damages or accidents of any kind which may be the direct or indirect consequence of the grounding.

All attempts on the part of other vessels to refloat a vessel aground are strictly prohibited.

(C) When a vessel grounds or stops in the Canal itself in consequence of an accident other than a collision, the Canal Authority, in order to clear the way with all possible speed, and to get her underway, will assist with the necessary tugs to refloat her, free of charge. If, once afloat, and the Canal Officials find it necessary to tow or escort the vessel by one tug or more, she must from that moment, pay towage charges as set down by Suez Canal Authority, moreover, it is understood that the vessel bears all expenses necessary for repairs of any damage or breakdown which might interfere with her getting underway regardless of the time when such damage or breakdown takes place.

(D) When a vessel grounds or stops outside the Canal itself or if the grounding or stoppage is due to a collision, all charges for getting the vessel afloat, towing, unloading, reloading, etc., are payable by the vessel and must be settled as per statement drawn up by the Canal Authority before the vessel leaves Port Said or Port of Suez.

(E) Whenever a collision appears probable, vessels must not hesitate to run aground should this be necessary to avoid it.

(F) When a vessel or floating structure of any description runs aground or strands or sinks or is left abandoned, either in the Canal itself or in one of its ports, Waiting or Anchorage Areas, and the Canal Authority deems it an obstruction or a menace to navigation in Canal Waters, the Authority has the right to take of its own accord such action as may be necessary for the purpose of removing or destroying the vessel or floating structure by whatever means the Canal Authority may select and at the risk and expense of the Owner of, or the person responsible for the vessel or the floating structure. The Suez Canal Authority has – in this case – the right to sell the vessel or the floating structure or the wreck salvaged or all of them together in public auctions with a view to covering all kinds of expenses.

Article 60: Leaks

In the case of leaks, when in harbour the Master must inform the Harbour Office at once. When in Canal or anchored in lakes, he must inform immediately the Movement Office. He must at the same time make the appropriate International Signal and call attention by sounding a prolonged blast on the whistle or siren; and take all necessary measures to stop the leakage and ensure the safety of the vessel.

The Suez Canal Authority Officials whose decision shall be final may order any action deemed necessary in the best interest of all concerned: change of berth or mooring, beaching, taking the vessel out to sea. The Master is nevertheless responsible for all damage or accidents arising directly or indirectly from the salvage operations.

Article 61: Fire Fighting

(A) Vessels transiting the Canal should be equipped with the fire fighting equipment in accordance with the requirements of the International Convention for the Safety of Life at Sea. All equipment should be in a good and efficient condition.

(B) Fire hoses with suitable nozzles attached shall be connected to the outlets of fire lines at all times while in Canal Waters. Sufficient hoses shall be connected to reach all parts of the vessel.

(C) Approaching Canal Waters, as precautionary measures, all vessels must have a fire wire hanging over the side ready for use fore and aft, before entering Canal Waters.

Article 62: Fire Onboard

(A) In case of fire onboard, when in harbour the Master must inform the Harbour Office at once. When underway or in the Canal or anchored in Lakes or made fast in Canal, he must inform the Movement Office.

He must at the same time make the appropriate International Signal and call attention by sounding a prolonged blast on the whistle or siren. He must make ready to get underway if required to do so.

(B) Neighbouring vessels must in such cases also be ready to change berth.

(C) Masters are responsible for the use onboard their vessels of fire fighting appliances and installations and for the stability and safety of their vessel.

(D) *The Suez Canal Officials will co-operate with the Master for the purpose of directing the fire fighting operations.*

The vessel's crew shall co-operate with the Suez Canal Authority personnel.

(E) If in the opinion of the Canal Authority Officials, whose decision shall be final – there is a risk of fire spreading, they may order any action deemed necessary in the best interest of all concerned (change of mooring, beaching, taking vessel out to sea); it is understood that Masters are nevertheless responsible for all damages or accidents arising directly or indirectly from outbreaks of fire or salvage operations.

Article 63: Fuelling

A vessel at fuel berth or while being supplied by fuel in Waiting Areas shall at all times be ready for immediate fire fighting. She shall keep up steam and be ready to move on short notice.

Article 64: Pollution

Before arrival from sea at either of the Terminal Ports, vessels should comply with the requirement of appropriate Convention currently in force.

(A) Discharge of Substances Polluting Water

Vessels must not discharge or throw into the Canal Waters any polluted water ballast, heavy slops, engine or fire room polluted bilge water, oil or any other substances that will cause pollution.

In case of violation, the vessel shall be charged an additional due of 10,000 L.E. (Ten Thousand Egyptian Pounds), shall be liable for any damage resulting from the pollution and shall pay all expenses incurred for its removal. Moreover, she may be prevented from transiting the Canal.

In case of leakage of any polluting material from a vessel, due to any reason, the Master, the Owners and/or operators of the vessel shall be liable for any damage resulting from the pollution and shall pay all expenses incurred for its removal.

(B) Dumping Garbage

Dumping Garbage is Strictly Forbidden

In case of violation, the vessel will be charged an additional due of 1,000 L.E. (One Thousand Egyptian Pounds).

If a vessel is anchored in Canal Waters for a considerable length of time, she may get rid of garbage by requesting garbage lighter alongside.

(C) Whenever a vessel observes *oil spill* in Canal Waters, she must at once inform the Suez Canal Authority with the following information if possible.

(i) The place and area covered by spill.
(ii) The direction of motion of the spill.
(iii) If known, the name of vessel causing the spill.

CHAPTER V: Prohibitions and Charges

General

When a vessel is in Canal Waters, either in anchorage areas or ports or during transit, the following is prohibited:

Article 65: Use of Anchors and Thrusters

Masters must avoid anchoring and using the thrusters in the Canal, except in case of absolute necessity.

Article 66: Misuse of Whistle or Siren

The sounding of a whistle or siren is prohibited except for giving any authorised or required signal, as mentioned in Part III, Article 93.

Article 67: Firing Shots

(A) Firing shots is not allowed.

(B) An additional due of 200 L.E. (two hundred Egyptian pounds) will be imposed for violation of this rule.

Article 68: Picking up Object from Water

(A) Whenever any object or merchandise whatsoever falls overboard, it must be immediately reported to the Canal Authority. If it is considered that the picking up cannot be effected by the vessel without impeding transit, the Canal Authority will proceed to carry it out, at the expense of the vessel.

(B) An additional due of 200 L.E. (two hundred Egyptian pounds) will be imposed for violation of this rule.

Article 69: Riveting, Welding etc.

(A) Riveting, welding, burning, metal cutting or similar operations requiring the use of heat, are not allowed unless authorised by the Suez Canal Authority.

(B) An additional due of 500 L.E. (five hundred Egyptian pounds) will be imposed for violation of this rule.

Article 70: Pollution

(A) See Article 64 and following.

(B) An additional due of 10,000 L.E. (ten thousand Egyptian pounds) will be imposed for discharge of substances polluting water. Besides, the vessel may be prevented from transiting the Canal any more.

(C) An additional due of 1,000 L.E. (one thousand Egyptian pounds) will be imposed for throwing waste.

Article 71: Direct Lights

Under no circumstances shall the rays of any blinding lights be directed to the bridge or any other direction which would interfere with the safe navigation of other vessels.

Article 72: Embarking and Disembarking of Persons

(A) Unless authorised by the Canal Authority or Port Officials, no person shall embark or disembark from a vessel while passing through the Canal or in Ballah, Timsah Lake or the Bitter Lake.

(B) An additional due of 200 L.E. (two hundred Egyptian pounds) will be imposed for violation of this rule.

Article 73: Boats, other than the Canal Authority's own are not allowed to come alongside vessels underway or manoeuvring except the following at their own risk.

(A) Quarantine and police boats.
(B) Mooring boats.
(C) The ship's Agent's boats.

Article 74: Vessel Overtaking Another

(A) Vessels proceeding in the same direction are not allowed to overtake one another while underway in the Canal Waters and ports unless authorised by the Suez Canal Control Office.

(B) An additional due of 500 L.E. (five hundred Egyptian pounds) will be imposed for violation of this rule.

Article 75: Boat Drills

(A) No rowing or sailing boat drills are allowed except after authorisation.

(B) An additional due of 200 L.E. (two hundred Egyptian pounds) will be imposed for violation of this rule.

Article 76: Venting

(Tank openings to be closed through the whole transit).

(A) Venting of gas for the purpose of tank cleaning is prohibited in Canal Waters.

(B) An additional due of 10,000 L.E. (ten thousand Egyptian pounds) will be imposed for violation of this rule.

Article 77: Long Stay

(A) Unless due to conditions of traffic or incidents in the Canal, transiting vessels should not remain more than 24 hours in Port Said berths, anchorages in Port Said and Port of Suez roads, Timsah Lake or Bitter Lakes.

(B) An additional due of 2 P.T. (two Egyptian piastres) per Suez Canal net ton/day will be imposed.

Article 78: Vessels Having Damaged Container With Dangerous Cargo

If upon arrival of a vessel in waiting areas or port or while transiting the Canal, it is found that a container of dangerous cargo has been damaged or is leaking, the Master of the vessel has to notify the Suez Canal Port Authority at once. In cases of dangerous situations the vessel may be ordered to leave the port or waiting area for sea.

Article 79: Declaration of State of Navigability

I, the undersigned, Master of the..

(a) Certify that my ship satisfies the conditions laid down in Part I, Articles 22 and 25 of the Navigation Regulations and that, in particular, the engines and the steering gear are in good working order(*).

(b) Declare that my ship has, at the present time, the following defects in engines or steering gear(*).

(c) I declare, also, that the wireless installations of my ship permit to transmit on the frequencies hereafter, in kHz: Telegraphy..............kHz. Telephony..............kHz.

(d) I state also that my ship is/is not (*) fitted with a rudder angle indicator and engine r.p.m. indicator on the bridge in such a position that the Pilot may read both without having to move away from his station and that the rudder angle indicator/engine r.p.m. indicator(*) is/are in good working condition.

I undertake to bring to the notice of the Suez Canal Authority, before my ship enters the Canal, any defects, not specified above, which may appear.

Made at Port.................., the......................

Signature..............................

(*)Delete where inapplicable.

PART II – CANAL AND LAKES

CHAPTER VI: CANAL AND LAKES

Article 80: Canal and Approaches

(A) Length of the Navigable Channel

(1) East Approach Channel (Port Said).

(a) Distance from outer pair of buoys at Hm. 195 to Hm. 94.90 where it joins the West Approach Channel is 10.010 km.

(b) Distance from Hm. 94.90 to the pair of revolving lights at Km. 3.000^E is 12.490 km.

(2) West Approach Channel (Port Said).

(a) Distance from Fairway Buoy to Port Said Lighthouse is 11.040 km.

(b) Distance from Port Said Lighthouse (Km. 0.000) or (Km. 3 East Branch) to Ismailia is 78.5 km.

(c) Distance from Ismailia to Port Tewfik (Km. 162.250) is 83.750 km.

(d) Distance from Port Tewfik (Km. 162.250) to the outer pair of buoys Hm. 80.50 is 8.500 km.

(e) Total length of the navigable channel is 193.250 km.

(B) Characteristics of the Navigable Channel (Canal and Approaches).

(1) North Approaches

(a) East Port Said Approach Channel from Hm. 195 to Km. 1.333 East.

(i) Depth of water 20.00 m.

(ii) Channel width measured at 20 m. depth – Hm. 195.00, 745 m.; Hm. 80.00 East, 400 m.; Km. 1.333 East, 120 m.

(iii) Side Slopes

Natural land side slopes, ranging from 5/1 near shore to about 20/1 in the off-shore part.

(b) West Port Said Approach Channel from Hm. 95.00 to Port Said

(i) Depth of water 14.00 m.

(ii) Channel width measured at 12.50 m. depth – Hm. 95.00, 1400 m.; Hm. 25.00, 350 m.

(2) Canal Cross Sections (See Plan)

(a) The Canal cross sections are trapezoidal in shape, having side slopes of 4/1 in the Northern part up to Km. 61.00 and of 3/1 in the Southern part. Toussoum Zone is the only place where the Western slopes are 2.5/1.

(b) Tables of main dimensions of cross sections all through the Canal (See below).

(c) Both sides of the Canal are provided with mooring bollards.

(3) South Approach from Hm. 0.00 (Km. 162.250) to Hm. 80.50

(a) Depth of water 23.50 m.

(b) Channel width measured at 18 m. depth Hm. 0.000 to Hm. 80.50, 298.00 m.

(c) Side slopes 3/1

(D) Bends in the Canal

(1) The bends in the navigable channel have the following characteristics:

(a) Radius of navigation line = 5,000 m.

(b) Width of channel at −11.00 m., depth = 190 m.

(c) Width of channel at −18.00 m., depth North of Km. 61.000 (side slopes 4/1) = 134 m.

(d) Width of channel at −18.00 m., depth South of Km. 61.000 (side slopes 3/1) = 148 m.

(e) At the ends of two bends, there is usually a funnel made to allow increasing the width of the channel gradually from 160 m. to 190 m. (at −11.00 m. depth).

(f) Locations of beginning and end of each bend are included in the following table:

Canal Bends	*Kilometric indication of beginning point*	*Kilometric indication of end point*
Km. 53	Km. 52.050	Km. 53.520 West
Km. 57	Km. 56.870	Km. 58.800 West
S. "Curves"	Km. 71.960	Km. 75.300
Timsah Curve	Km. 76.520	Km. 81.700 East
Km. 85	Km. 85.030	Km. 87.400
Km. 103	Km. 102.600	Km. 105.030 West
Km. 130	Km. 129.500	Km. 131.980
Km. 146	Km. 145.500	Km. 146.330
Km. 154	Km. 154.700	Km. 155.720
Km. 157	Km. 156.280	Km. 160.000

(2) At the approaches of the by-passes, bends are made with radius more than 5,000 m. Location of these bends are included in the table hereafter.

Approaches	*Kilometric indication of beginning point*	*Kilometric indication of end point*
Km. 51	Km. 49.510	Km. 51.480 West Km. 51.790 East
Km. 61	Km. 60.310 West Km. 59.940 East	Km. 63.300
Km. 122	Km. 121.940 East Km. 122.500 West	Km. 125.510

(E) By-Passes and Loops

(1) Port Said By-Pass (see "Plan").

A new by-pass is dredged East of Port Fouad starting at Km. 17.000 and extending straight to join the existing Port Said Roadstead at Hm. 94.90 and continuing until Hm. 195. This channel (By-Pass) will be used for the exit of Northbound ships, the entry of VLCCs in ballast and vessels with draft over 38 ft. coming from North.

Characteristics and dimensions: The kilometric marks are followed by letter "E" to distinguish them from those of the West branch. The inland part (from Km. 1.500 E. to Km. 15.465 E.) width (at 18 m. depth) is 114 m. with side slopes 4/1 and depth 19.5 m., fitted with bollards on the Western side, spaced every 100 m.

The seaward part (from Km. 1.500 E. to Hm. 94.90 E.) with width (at −20 m. depth) ranging from 120 m. at Km. 1.333 E. to 400 m. at Hm. 80.00 E. with natural side slopes (average 5/1 – 10/1).

Two revolving lights, one on each bank to indicate the entrance of Canal from East Approach channel at Km. 3.000 E.

(2) Ballah Loop (see "Plan").

Between Km. 51 and 61 the Canal is doubled in the East, by a branch. The zone comprising the 2 branches of the Canal limited by the North and South ends where the 2 branches meet, is called "Ballah Loop".

In the East Branch the kilometric marks are followed by letter "E". The length of the East Branch is 8.490 km.

	West Branch	*East Branch*
Kilometric marking of North end	51.477	51.449 E.
Kilometric marking of South end	60.333	59.943 E.

Slope of bank 4/1. In the West branch 15 mooring posts are situated on the Eastern bank and numbered South to North.

(3) Timsah By-Pass (see "Plan").

Between Km. 76.580 and Km. 81.700 E.

Characteristics and dimensions

The kilometric marks are followed by letter "E". Length: 5.110 km. counted at right angle from Km. 76.578 to Km. 81.700. Width: 148 m. at a depth of 18 m. Slope: The side slope is 3/1. The radius of its axis is 4905 m. The by-pass will be used by North and Southbound vessels.

(4) Deversoir By-Pass (see "Plan").

A new branch is dredged East of the existing channel at Deversoir zone. This branch begins at Km. 95.000 and joins the main East channel in the Great Bitter Lake at Km. 104.160. The branch will be used by Northbound vessels.

Dimensions

Width: 148 m. at 18 m. depth. Depths: 19.500 m. from Km. 95.000 to Km. 100.670; 19.900 m. from Km. 100.670 to Km. 102.600; 18.500 m. from Km. 102.600 to Km. 104.160. Side slope: 3/1.

(5) Kabrit By-Pass (see "Plan").

The By-Pass is situated to the East of the main Canal. It begins at Km. 114.960 and ends at Km. 122.100. It is 250 – 118 m. wide at a depth of 18 m., the bank slope is 3/1. The By-Pass is separated from the main Canal by a submerged island at a depth between 2 and 6 m. The width of the island varies between 200 m. in the North and 66 m. in the South. Some mooring bollards have been installed on the submerged island to be used in case of emergency. The two extremities of the submerged island are marked at Km. 115.025 and 122.150 by a light buoy painted horizontally white and red and showing a flashing white light. The by-pass (East channel) is to be used by Northbound vessels. Southbound vessels use the West channel.

Article 81: Lakes

(A) Lake Timsah (see "Plan").

Lake Timsah extends from Km. 76.500 to Km. 80.520. In the presence of the new Timsah By-Pass, Lake Timsah will be used mainly as an anchorage area.

(B) Great Bitter Lake (see "Plan").

There are 2 dredged channels in the Great Bitter Lake. The East is the main channel about 364 m. wide at 18.00 m. depth and dredged to 18.50 m. for Northbound vessels. The West channel 250 m. wide at 14.00 m. and dredged to 14.50 m. depth for Southbound vessels.

These channels divide the Great Bitter Lake into two anchorage areas, one to the East and the other to the West.

Article 82: Floating Bridges

The fixed parts of floating bridges are outside the line of navigational buoys. The bridges may be rigged day or night.

CHAPTER VII: BUOYAGE SYSTEM IN THE CANAL

Article 83: Buoyage

The navigable channel is marked by pairs of light buoys. On the East side Black buoys showing Green lights. On the West side Red buoys showing Red lights.

In the straight parts, the distance between each pair is 1.5 km. in the North Section, and 1.0 km. in the South Section. In the curves the distances will be less than 1.0 km. All buoys in the Canal and its approaches are fitted with radar reflector.

Article 84: Location of Buoys in the Suez Canal. See "Plan".

CHAPTER VIII: TIDES AND CURRENTS IN SUEZ CANAL

Article 85

The Suez Canal is divided in three main sectors according to the nature of tide in each.

The characteristics of each can be summarised as follows:

(A) The Northern Sector

This part is located between Port Said and the Great Bitter Lake.

1. The height of tide at Port Said co-oscillates with the tides of the Mediterranean sea with 0.50 m. extreme tidal range (difference between highest and lowest levels) at Spring tides. This tidal range decreases gradually going South, to be about 0.20 m. at the entrance of Lake Timsah.

2. In this sector, the peak tidal current may reach 1.0 knot (in case of no wind).

3. Currents can be doubled by strong prevailing winds.

4. Peak currents occur about 50 minutes after predicted HW and LW at Port Said.

5. The duration and velocity of currents in this sector are greatly affected by the relative mean sea levels between the Mediterranean sea, the Bitter Lakes and the Red Sea as follows:

(a) *In Summer:* Between July and October, the mean sea level at Port Said is slightly higher than that of the Bitter Lakes. This difference (which reaches its maximum about 0.20 m. in September), due to the great evaporation at the Bitter Lakes, causes the *predominance of the Southward* current in duration and velocity.

(b) *In Winter:* Between December and May, the mean sea level at the Bitter Lakes is slightly higher than that of Port Said. This difference which reaches its maximum of about 0.30 m. in January, causes the *predominance of the Northward* current in duration and velocity.

(B) The Lakes (Timsah and Bitter Lakes)

1. The Lakes along the Canal have an important role in dampening the effects of sudden meteorological changes.

2. The Bitter Lakes with a surface of about 250 sq.km. reduce the vertical movement of the tide to a minimum between Km. 100 and Km. 130.

3. The high Spring tidal range (MHWS) in the Great Bitter Lake may reach 0.25 m.

4. The phase of the vertical tide in the Great Bitter Lake is about 3 hours later than that of Port Tewfik.

5. The vertical tide in Lake Timsah is almost in phase with the tide in the Great Bitter Lake.

(C) The Southern Region

This part is located between Port of Suez and the Bitter Lakes.

1. The height of tide at Suez co-oscillates with the tides of the Red Sea with extreme tidal range of about 1.90 m. at Spring tides. This range decreases gradually going North till the Bitter Lakes entrance where it is 0.15 m. at Genefa.

2. The tidal volume of the Bitter Lakes is very large compared to the tidal volume of the Southern section. Consequently the currents are relatively strong and almost uniform between Port Tewfik and Genefa.

3. In this region the Northward current is called *Flood* and the Southward current is called *Ebb*.

4. Peak currents about 50 minutes after predicted HW and LW at Port Tewfik.

5. At the entrance of the Canal, Km. 159, the *Flood* tide starts at an average of 3 hours after the LW at Suez. The *Ebb* tide 3 hours after HW in Suez.

6. Generally in Summer, the duration of the *Ebb* exceeds the average of 6 hours. In Winter, the *Flood* is the predominant. The *Ebb* is prolonged by "Strong Northerly Winds". The *Flood* is prolonged by "Strong Southerly Winds".

7. In this region the average peak current is about 1.5 knots. In Spring tides, current may reach 2.5 knots.

8. The change of current occurs 5 to 10 minutes later in the bottom of the Canal, than on its surface.

Article 86: Weather Forecast

Six meteorological stations are installed on the Canal area. Information about local weather will be passed to vessels through Pilots.

PART III – COMMUNICATIONS – SIGNALS.

CHAPTER IX: RADIOCOMMUNICATIONS

Article 87: Wireless and Radio Telephony

Masters of vessels are requested to contact the Suez Canal Authority via its wireless station "SUQ" (watch frequencies 425 kHz, 454 kHz and 468 kHz) whenever they want to make sure of the identity of any Suez Canal personnel embarking their vessels, either in the approaches or in the harbours or in the Canal waters. Also in case of any urgent complaints which may need quick investigation.

(A) Vessels must have their W/T and/or Radio Telephony apparatus in good working order before entering the Canal.

They must also be fitted with a VHF set easily operated from the bridge. It will have the frequency range of 156 to 174 MHz (Channels 9, 11, 12, 13, 14, 15 and 16). If not, they will rent one from the Suez Canal Authority for the transit. Channel 9 may be used as a stand-by channel at Port Said and Port of Suez.

(B) "SUQ" transmits on a frequency of 421 kHz.

Vessels communicating with SUQ must transmit on a frequency of 425 kHz, 454 kHz or 468 kHz.

(C) Master shall place their wireless apparatus at the disposal of Pilots during transit through the Canal.

(D) In addition, vessels arriving at Port Said or Port of Suez from sea can call by Radiotelephony.

Article 88: Radiotelephony (VHF)

(A) Radiotelephony for vessels from sea

(1) *At Port Said*

(a) Harbour Office: Call Sign: "Port Said 16". (HP-1) 156.800 MHz. Working Channel 13 (Inner Harbour), Channel 12 (Outer Harbour).

(b) Pilot Vessel and Radar Guidance:

(i) Outside the Harbour: Call Sign: "Port Said 12" (HP-2) 156.600 MHz.

(ii) Inside the Harbour: Call Sign: "Port Said 13" (HP-3) 156.650 MHz.

(iii) East Branch: Call Sign: "Port Said 8".

(c) Measurement Office: Call Sign: "Port Said 73" (M) 156.675 MHz.

(2) *At Port of Suez*

(a) Harbour Office: Call Sign: "Suez 16" (HP-1) 156.800 MHz.

(b) Pilot Vessel and Radar Guidance:

(i) Outside the Harbour: Call Sign: "Suez 11" (HP-2) 156.550 MHz.

(ii) Inside the Harbour: Call Sign: "Suez 14" (HP-3) 156.700 MHz.

(c) Measurement Office: Call Sign: "Suez 74" (M) 156.725 MHz.

(B) Radiotelephony in the Canal (UHF)

Channel No.	*Transmission Frequency MHz*	*Reception Frequency MHz*	*Function*
1	415.350	412.850	V/Ls from North (SB)
2	415.600	413.100	V/Ls from South (NB)
3	415.850	413.350	Emergency (EM)
4	416.600	414.100	In Port of Suez Harbour HP (T)
5	416.350	413.850	In Port Said Harbour HP (S)
6	416.125	413.600	Emergency Critical (EMC) (V/Ls out of convoy)

Escorting Tugs – Towing Tugs

Channel 1 – 414.750 MHz
Channel 2 – 414.775 MHz } another set
Channel 3 – 414.800 MHz

Note: Channel 9 (156.450 MHz) may be used as stand-by Channel at Port Said or Port of Suez.

CHAPTER X: THE SUEZ CANAL VESSEL TRAFFIC MANAGEMENT SYSTEM (SCVTMS)

Article 89: Overview

The SCVTMS is a new integral system for traffic management in the Suez Canal. The system offers the following services:

(a) Continuous monitoring of vessel's position, speed, off-track and gap by means of highly accurate computerised tracking radars (at Port Said, Port Tewfik and Great Bitter Lake), also a dedicated Loran-C position fixing chain (covering the Canal and its approaches).

(b) A dedicated voice communication network that enables direct and uninterrupted communication between Pilots and Movement Centres.

(c) A computerised data base containing vessel's information and transit requirements (e.g. early booking) files.

This system greatly enhances safety of transit in the Suez Canal.

Article 90: Sequence of Events for Vessels Transiting The Canal.

(a) At each Port, a radar covers approximately 35 km. offshore. A vessel approaching the Canal at either end(26) is requested to call the Port Office on one of the frequencies listed in Chapter IX of the present Part. The Harbour Pilot boarding the vessel will have his own portable transceiver. The vessel is requested to declare her position when anchored in the anchorage area (if instructed to do so).

(26)Ten miles before arrival to Approach Buoy at Port Said. On Passing Separation Zone Buoy No. 1 at Port of Suez.

(b) When calling the Port Office for the first time, the vessel is requested to give her international call sign and her Suez Canal file number (if any). This file number will be registered on a special card by the Suez Canal Authority and given to any vessel transiting after June 30th, 1981. If the vessel does not carry a file number, she should so advise the Port Office. This file number is used by the computerised data base system in retrieving data pertaining to the vessel.

(c) Approaching the roads, the vessel is requested to call the Port Office declaring her international call sign. This is essential to start radar tracking of the vessel's speed, position, off-track and separation distances. Before entering the road, the Port Office monitors the vessel by radar.

(d) The Port Office follows the vessel as long as the Harbour Pilot is on board. On entering the Canal, the Canal Pilot will board. On boarding, the Canal Pilot will have a special set (Carry On Receiver Transmitter, called CORT) receiving Loran-C signals from SCVTMS dedicated chain continuously. The time difference calculated by the CORT is not displayed at the CORT. Instead, this information is continuously sent by the CORT to Ismailia centre where it is used to calculate vessel's speed, position, off-track and separation distances.

Circular No. 73/84:

Masters of vessels transiting the Suez Canal are hereby kindly requested to render all facilities and necessary assistance to the Canal Technician boarding their vessels for the purpose of supervising the Electronic CORT during Canal passage.

Article 91: Some Considerations to be Taken into Account

(a) The CORT should be mounted on the West wing of the vessel. The area around should be clear of any obstruction within 10 ft. radius. A trained technician will mount the CORT in place and operate it before disembarking. The CORT power is self-sufficient and does not need any attendance while in operation. At the other end of the Canal it is dismounted by a SCA technician.

(b) After mounting and operating the CORT, the Pilot is requested to report same to Ismailia Movement Office through VHF or UHF (Canal Pilots are equipped with portable UHF sets linked to Ismailia Movement Office). The Pilot is also requested to declare his approximate position, the vessel's "SCA" file number and "Call sign". This is essential to start the Loran-C tracking of the vessel.

(c) Vessels will be tracked simultaneously by radar and Loran-C at the Great Bitter Lake area.

(d) When approaching either end of the Canal (Km. 3 East Port Said Branch or Km. 162.000), the respective Port Office will be handed the responsibility of following up the vessel to sea.

(e) On passing either end, the Canal Pilot will declare his position together with the vessel's call sign and file number.

(f) The Harbour Pilot will then board the vessel while the CORT will be dismounted by a SCA technician.

(g) Any changes in the vessel's characteristics should be reported to Canal Officials to be filed in SCA vessel's file.

CHAPTER XI: SIGNALS

Article 92: Generalities

All signals used in Canal Waters are shown hereafter.

All flags and pendants to be hoisted by vessels, as shown hereafter, should be those in the International Code of Signals.

Night signals shall be hoisted where best seen by other vessels.

Article 93: Sound Signals

(A) Normal Manoeuvre

(1) The International Regulation for Preventing Collision at Sea Signals.

"One short blast": I am altering my course to starboard.
"Two short blasts": I am altering my course to port.
"Three short blasts": I am operating astern propulsion.

(2) The signal 5 or 6 short blasts repeated several times at short intervals to say: "I am reducing speed and may have to stop or make fast".

At night besides the blasts, four to five long flashes with the Aldis lamp or signal mast lamp.

(3) The signal one prolonged blast to attract attention. The expression "short blast" means a blast of about 1 second duration.

The expression "prolonged blast" means a blast of 4 to 6 seconds duration.

(B) Obstruction in Channel in all Circumstances

A vessel which under any circumstances causes or finds obstruction in the channel must immediately warn the vessels in the vicinity.

That warning is given by whistle or siren:

4 long blasts meaning: "The channel is not free".

That warning must be repeated every 3 minutes until vessels concerned have answered in the same manner. As soon as they hear the signal mentioned above, the vessels take steps to stop and instruct a Radio Watch, to receive full details of the alert given by the vessel that sent the said signal. The vessel should maintain Radio Watch until otherwise advised.

(C) Engine or Steering Failure Approaching Dredger

In case of engine or steering failure making the vessel not under command, while approaching a dredger, the vessel has to give the signal one long blast followed by two short blasts (– · ·).

(D) Vessel Mooring Voluntarily for Fog or Sand

During the mooring manoeuvre, the vessel sounds every 2 minutes a series of 6 short blasts.

Once made fast (Signal Garage Volontaire hoisted), the vessel must rapidly ring the bell for 5 seconds at intervals not exceeding one minute. For vessels over 350 ft. (106.75 m.) they will have to ring the bell forward and in addition a gong aft, at intervals not exceeding one minute, (a gong or any other instrument which tone and sound will be different to that of the bell forward).

These signals are stopped when the vessel is told that all vessels concerned have been notified of her mooring.

(E) Vessel Aground or Across Canal

See Article 93 (B) Obstruction in Channel.

(F) Between Vessels and Tugs

(1) Vessel Aground in Canal

Signals between a vessel aground in the Canal and a tug.

These signals are for manoeuvre of refloating, as long as the vessel has one of the grounding signals.

Pull slowly	(– ·)
Increase	(– · ·)
Stop	(– –)
Slack the line	(– – ·)
I am to let go	(– – · ·)

These signals are to be repeated by the tug.

(2) Vessel Towed in the Canal

Signals between a vessel towed in the Canal and a tug.

Radiotelephony is used as communication between ship and tug, besides the following signals.

By Day (Flag)		*At Night (Sound)*
Slow speed	: "A" hoisted above bridge	(– ·)
Half speed	: "A" hoisted half way	(– · ·)
Normal Tow	: "A" hoisted right up	(– · · ·)
Steady	: "A" lowered	(– –)

(Or sound signals if considered surer).

The sound signals are to be repeated by the tug. The flag signal remains flying as long as the tug is to give the signalled speed. By day, every change of flag signals is followed by a long blast.

(G) Signals Between VLCCs and Escort Tugs

(1) Attention to Start Manoeuvre

Prolonged blasts given by the ship.

(2) Stern Tug

Bring my stern to starboard	(·)
Bring my stern to port	(· ·)
Keep my stern in the axis	(· · ·)
Pull my stern aft slowly	(· · · ·)
Increase pulling my stern up to half speed astern	(· · · · ·)
Increase pulling my stern up to full speed astern	(· · · · · ·)
Stop pulling (very long blast)	(——)

(3) Forward Tug

Give me a push on starboard bow	(–)
Give me a push on port bow	(– –)
Stop pushing	(– – –)

Article 94: See "Plan".

WADI FIRAN: 28.44 N. 33.13 E.

An open anchorage on Sinai coast in the Gulf of Suez about 85 nautical miles South of Suez.

There are 6 large and conspicuous storage tanks in 2 parallel rows of 3 tanks each lined on shore near the pumping station and painted with aluminium.

DOCUMENTS:

4 Crew Lists.
2 Stores Lists.
2 Vaccination Lists.

PILOTAGE: Pilot boards each tanker at anchorage.

ANCHORAGE: About 0.75 miles W. to S.W. of No. 1 Berth.

RESTRICTIONS: Mooring and unmooring during daylight only.

MAX. SIZE: 80,000 d.w.t. Max. draft 65 ft. at Berth No. 3.

RADIO: It is essential that vessels bound for Wadi Firan give 72 hours and 24 hours notice to both "Petmisr Cairo 2049 UN" and "Cop UN 2449", to be accepted on the berth without delay. Contact Abu Rudeis on VHF Channel 16 and/or Channel 6 when in range. There is no radio station at Abu Rudeis. Pilots working on Channels 6 and 8.

VHF: VHF radio is used for communication between tanker and pumping station. Also see "Radio".

TUGS: One tug of 2,000 h.p. available for mooring and unmooring.

BERTHING: Tankers must approach berth from West, never from North, and must follow same track on their departure to be entirely clear of shallow water. Tankers at berth will be connected to shore pumping station by submarine hoses for pumping crude oil.

One mooring launch available. Both ship's anchors are used, the port anchor first. Normally 4 or 5 × 5.5 in. circumference stern wires from buoy are taken on board. Special care should be taken when mooring in Southerly winds. If blowing strong, berthing may be delayed.

	Berth 1	*Berth 2*	*Berth 3*
LOA (ft.)	1,200	1,000	1,200
Max. Draft (ft.)	75	58	65
Max. d.w.t.	75,000	50,000	80,000
Under water crude line (in.)	24	16	24
Hose connection	Amidships 12 in.	Astern 12 in.	Amidships 8 in.

Reception facilities for 5,000 cu.m. of dirty ballast.

Two tankers can moor simultaneously but only one may load.

At No. 3 Berth max. loading rate 2,000 t.p.h. Ballast line not available.

DENSITY: 1032.

FRESH WATER: No. 3 Berth has 1×10 in. sealine and 1×8 in. hose for fresh water discharge. But not available to vessels.

FUEL: Not available.

AUTHORITY: Belayim Petroleum Co., 155, Sharia Mohamed Farid, Cairo, Egypt. *Tel:* 913233 (5 lines). *Telex:* 92449, 92373. "Petbl Un". *Cables:* "Petrobel". *Contact:* Captain Wassim Rady, Manager – Marine Division.

ZEIT BAY: 27.50 N. 33.36 E.

LOCATION: Zeit Bay Terminal is approximately 60 km. North of Hurgada.

ANCHORAGES: Waiting area centred on Lat. 27° 48.5′ N., Long. 33° 37.0′ E. Radius 1 mile. Depth ranges from 22 m. to 38 m., with 31 m. at centre.

Tanker should call "Marine Control" before approaching if necessary to drop anchor in the anchorage area.

Vessel is not permitted to anchor outside the anchorage area.

RESTRICTIONS: No night berthing; berthing should be completed before 1600 hrs.

MAX. SIZE: Max. 240,000 d.w.t. with 160,000 tons cargo. Minimum length of tanker approximately 550 ft. Maximum length decided by tonnage, but distance bow to manifold not longer than 650 ft.

RADIO: Tankers calling at Zeit Bay must send ETA message 72, 24, and 12 hours distant from the terminal to SUCO Head Office, telex 93455 or 92300 or 20477 Suco Un via any coastal radio station: Alexandria, Port Said, Suez and Kosseir.

ETA messages to SUCO should give the best estimates of ship's arrival time at the terminal. This ETA message should also include a definite statement of details of any equipment required from shore for connecting 16 in. floating hose, bearing in mind that such hose needs tanker to be equipped with crane, classed and certified to at least 10 tons capacity.

VHF: Master must call "Zeit Bay" 4 hours prior arrival on VHF Channel 16. If it is out of order, use Channel 12. Station is standing-by 24 hours/day.

BERTHING: SBM (Single buoy mooring) in position: Lat. 27° 50′ N., Long. 33° 36.2′ E. Cargo hose 16 in., ANSI type, with camlocks. Loading rate max. 6,000 tonnes/hr. Connection port side.

If cargo hose or connection is different, Master should contact SUCO Head Office 72 hours prior to his arrival at Zeit Bay stating the tanker hose and connection type.

Mooring facilities on tanker's bow should be ready prior to arrival.

Tanker must be on even keel and/or trimmed slightly by the stern, and have on board adequate ballast for manoeuvring.

BALLAST: Tankers calling at Zeit Bay should have permanent and/or clean ballast on board. Pumping ballast water overboard is completely prohibited by Governmental Authorities. If Master will require to deballast clean ballast during loading operations, letter should be submitted to the terminal that all bulkheads are fully tight and no leakages, to avoid any contamination. Master on behalf of Owners and/or Charterers will bear all costs and expenses for cleaning operations required to remove any pollution which might occur due to pumping ballast overboard, as well as a fine of US$15,000.

AUTHORITY: *Operator:* Suez Oil Company, 21 Orabi Street, Dokki, Cairo. Telex: 93455, 92300, 20477 Suco Un.

NOTES

Please also advise Shipping Guides Ltd.

El Salvador

ACAJUTLA: 13.35 N. 89.50 W. (See Plan)

PORT LIMITS: Not determined.

DOCUMENTS:

Consular Documents:

Only the requirement for visa of shipments of firearms and narcotics, which must be carried out at the port of embarkation, remains in force.

Prior to Arrival:

Arrival Notice:

24 hours before the vessel's arrival, notification is submitted in writing to the Autonomous Port Executive Committee (CEPA) on the time of arrival and the number of stevedores that will be needed. The CEPA serves as a kind of single shipping agency. In that capacity, it arranges for entrance and clearance of vessels, payment to other Official Agencies and draws up the port account for the ship's Agent.

Information on Cargo for the Port:

Prior to the vessel's arrival, the following documents are to be submitted to CEPA:

16 copies of the Cargo Manifest.
1 set of the Shipper's Manifest.
1 Mail Guide.
4 copies of the cargo distribution for each hold.
1 Stowage Plan.
1 List of Container Contents.
14 to 16 Cargo Tally Books, depending on the number of stevedores.

If this information is not available before the vessel's arrival, it may be submitted at the time of the reception visit (boarding party).

On Arrival:

Type of Documents	*Number and Distribution of Documents*				
Basic Forms	*Captain of Port*	*Customs*	*Plant Health*	*CEPA*	*Total*
General Declaration	1	1	1	1	4
Cargo Manifest	1	2	1	16	20
Crew List	2	1	1	1	5
Passenger List	2	1	1	1	5
Ship's Stores List	1	1	1	1	4
Crew's Effects Declaration	–	–	–	–	–
Maritime Health Declaration	1	–	–	–	1
Mail List	–	–	–	1	1
Additional Documents:					
Clearance from Last Port	1	–	–	–	1
Consular Manifest	–	1	–	–	1
Set of Bills of Lading	–	–	–	1	1
Cargo Distribution	–	–	–	4	4
Contents of Containers	–	–	–	1	1
Stowage Plan	–	–	–	1	1
Cargo Tally Books	–	–	–	14/16	14/16

Prior to Departure: The CEPA draws up the clearance permit and has it signed by Customs before submitting it to the Captain of the Port. When loading and unloading is completed, a representative of the Captain of the Port delivers the clearance permit on board.

PILOTAGE: Compulsory. *(a)* Vessels should apply for Pilots calling VHF radio station through Channel 27 which operates on 157.36 MHz to receive and 161.95 MHz to transmit. Channel 16 operates on 156.8 MHz ships calling and safety.

Notice of ETA must be made to Port Manager not less than 48 hours before arrival at the port limits. Confirmation of ETA is required 10 hours before arrival. VHF radio station is on service 24 hours a day, so vessels may call at any time. *(b)* Pilot boards vessel between one or two km. before arrival at the port limit; where vessels should stay with engine running, Pilot ladder ready. Gangways should be raised and folded. Derricks and cranes inboard and anchors ready for berthing. Pilot is equipped with walkie talkie for communicating with tugs. *(c)* Inform radio station if cargo manifests are carried on board or if they were air mailed to vessel's Agent.

ANCHORAGE: There is no specific anchorage area. Water depth is over 15 m. Bottom nature: Sand laying over volcanic tuff.

RESTRICTIONS: Vessels can berth any time day or night. Main engines should always be on short notice, due to swell as mooring lines often break. Vessels are advised to make use of extra shore mooring lines which may be provided if Agent makes request. The least depth in the berths is 30 ft.

MAX. SIZE: "C" Pier (breakwater berth) has 12 m. of water alongside and can berth vessels of up to 40,000 d.w.t. It is well fendered. Containerised, general and bulk cargoes can be handled at this pier.

Also see "Tankers".

HEALTH: On arrival, vessel should always fly a yellow flag. If there is any suspicion of illness aboard, Master has to inform by radio 24 hours in advance, indicating nature of disease and all details.

Free Pratique will not be granted to vessels at anchor. It will be granted to tankers discharging at buoys and in emergency cases.

RADIO: Advise ETA to Agents at San Salvador 96, 48, 24 and 12 hours before arrival. Telex available at Port Facilities. Area Code 301. Telex No. 27000.

VHF: There is no special time for calling. VHF service is open 24 hours a day. Contact through Channels 16 and 27.

Business operations: Channel 27 receives on 157.36 MHz and transmits at 161.95 MHz.

Channel 16 for ship calling and safety.

RADAR: There is no port radar service.

TUGS: Tug lines are not used. If required, the tug's line will be used and the charge is included in the docking and undocking services. There are four tugs available with the following capacities: 800, 1,200, 1,400 and 1,800 h.p. Tugs meet vessels off the docks at all times.

SPECIALISED CARGO HANDLING FACILITIES: Pier "A" with liquid cargo facilities for vegetable, animal and mineral oil, as well as chemical liquids.

BERTHING: Vessels can berth in safety at any time during day or night.

In the case of cargo vessels it should be stressed that the swell experienced alongside is sometimes a serious problem and Masters would be well advised to make use of the shore lines offered on hire to save undue wear and tear on their moorings.

Berth	*Max. Draft* (m.)	*Depth at MLW* (m.)	*Vessel Length* (m.)
A–1	9	10	140
A–2	10	12	160
B–3	9	10	140
B–4	10	12	195
B–5	9	10	180
B–6	10	10	180
C–7	12	13.7	128
C–8	12	13.7	128

There are three piers. The first one "A" consists of a breakwater mole 760 m. long. The access mole in its first section from land side to pier "B" has a width of 10.50 m. and is 260 m. long. The second section from Pier "B" to Pier "A" has a width of 7 m. and is 180 m. long. The overall length of access is 450 m.

Pier "A" is 37 m. width and 310 m. long, it consists of a mooring dock with two berths called "A–1" and "A–2", for general bulk and liquid cargoes and has a transit shed of 4,500 sq.m. At the end of Pier "A" is constructed another breakwater section in a N.W. direction, in line with the existing Pier "A", connecting this pier with the Pier "C" with a length of 35 m. Then direction of Pier "C" is changed to the North, with an angle of 30° and extended over 270 m. with a width of 18 m. This breakwater offers two berths, "C–7" and "C–8", capable of handling containerised, general and bulk cargoes.

The third pier called "B", with four berths is 348 m. long and has a free width of 28 m. This pier handles containerised (max. gross weight 20 tonnes), general and bulk cargoes.

CRANES: Two semi-portic cranes of 3 tonnes capacity are available at Pier "A". At Pier "B" there is a 25 tonnes crane for general bulk and containerised cargoes. Pier "B", berths "B–5" and "B–6" as well as Pier "C", berths "C–7" and "C–8", have no cranes available and vessels are required to use their own cranes or derricks.

BULK CARGO FACILITIES: For berthing length of quays and max. permissible draft in salt water at MLW see "Berthing".

Cargoes handled: Importation: Grains, fertiliser, soda ash, phosphoric rock sulphur, soya flour, etc.

Exportation: Raw sugar cane, cotton seed meal and flour, grains, etc.

Berth Equipment: 25 tonne cranes which operates for imports at Berth "B–3" and "B–4" and unloads vessels with clamshells of different capacities ranging from 5 cu.m. to 9 cu.m., and feeds the conveyor systems through a hopper of 85 tonnes. Maximum height of discharging gear above MWL: 19 m.

Conveyor System: Two belt conveyor systems exist for importation and exportation. Both systems interconnected with port warehouses as well as private silos and warehouse facilities. Loading/discharge rates: 500 tonnes/p.h.

BRIDGES: None.

STEVEDORES: ETA advice required to arrange gangs, should be made 12 hours before vessel's arrival. A line handling gang is always standing by and also attends gangways without charge. Stevedores are available for nightwork.

Average load and discharge rates:

General cargo	35 tonnes/p.h.
Bulk cargo	190 tonnes/p.h.
Liquid cargo	110 tonnes/p.h.

MEDICAL: There are doctors in the port who attend normal cases and specialists and hospitals in Sonsonate City (20 km. by road) and at San Salvador, capital of the Republic, 85 km. from the port.

TANKERS: Mooring at RASA (Refineria de Acajutla Sociedad Anonima). This refinery is the property of Esso Standard Oil and Shell Petroleum Co.

Buoy berth: Depth of water is about 15 m. Diameter of buoy hoses: 2×25 cm. for clean products and one of 75 cm. for crude and fuel oil. There are no facilities for residue discharge.

DENSITY: 1027.

FRESH WATER: Delivered by hoses. Rate approximately 40 t.p.h., cost US$1.60 per metric ton.

FUEL: Possible to supply diesel (Grade "2") and Bunker "C" only in limited quantities, delivered by tank truck. Viscosities: Bunker "C" 175 sec. Saybolt furol. Diesel 40 sec. Saybolt universal.

FIRE PRECAUTIONS: Inspection of hoses; no smoking; not allowed to weld or light any kind of fire; isolation of the place of loading and discharging operations; fire equipment to be ready to use at all times.

CONSULS: There is a Consular representative of The Republic of Guatemala at this port and most countries have Consular representatives in San Salvador City, Capital City, at 85 km. from the port.

REPAIRS: Possible to make minor engine and deck repairs. Other repairs can be carried out at Capital City, San Salvador. Any repairs that will delay sailing of vessel cannot be made without previous and specific authorisation of the Port Manager.

DRY DOCKS: None.

SURVEYORS: At the port there is P & I representative and surveyor and independent marine surveyors. G.L. Surveyor at San Salvador City.

GANGWAY/DECK WATCHMEN: Gangway is watched by Customs Police and marine members without charge. Deck watchmen available on request.

HATCHES: The opening and closing of hatches is carried out by stevedore gangs, and its costs are included in the loading or discharging tariff rate. Whenever vessel's Master decides to carry out these operations with his crew, a stand-by charge will be debited.

CUSTOMS ALLOWANCES: Customs only allow tobacco for personal use to be taken out of the vessel. Not allowed to take any wine or spirits out of the vessel.

CARGO GEAR: Ship's gear has to be used on request. Semi-portic cranes for general cargo may be used at Berths "A–1" and "A–2". Heavy lift crane at Berths "B–3" and "B–4". This crane is also used to unload bulk cargoes to a conveyor belt system.
REPATRIATION: There are facilities for repatriation, it is also possible to effect crew changes.
AIRPORT: The "El Salvador International Airport" is 134 km. from the port (by road), which is served by regular airlines.
TIME: No alterations in time during the year; local time is GMT minus 6 hours.
HOLIDAYS: The port has the following official holidays:

(*)1st January; 2nd February; (b) Thursday, Friday and Saturday of Easter Week; (*)1st May; (c) 10th May; 3rd and 6th August; 15th September; 15th October; (*)2nd November; (a) 24th; (*)25th and (a) 31st December.

(*) No work.
(a) Port operations cease at 0700 hrs.
(b) Port operations cease at 1700 hrs. on Thursday until 2300 hrs. on Saturday (Easter Week).
(c) 10th of May port operates only from 0700 hrs. until 1500 hrs.

POLICE/AMBULANCE/FIRE: National Police (Sonsonate) Tel: 51-0838; Ambulance (Sonsonate) Tel: 51-0374 – 51-0200; Fire Department (CEPA, Acajutla) Tel: 52-3200.
TELEPHONES: No possibilities of installing telephones aboard.
SERVICES: No facilities to discharge tank-washings. No equipment for tank cleaning or facilities to adjust compasses. Minor electronic repairs at Agent's request.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Valid passport must be shown to Authorities on request.
REGULATIONS: None.
DELAYS: Normally there are no delays to be expected during berthing, loading, discharging or bunkering. Bunkering operates at a slower rate than normal loading and discharging.
GENERAL: Quarantine Authorities pay strict attention to garbage and any residue must be kept aboard properly covered. It is forbidden to drop garbage or any residue in the sea whilst vessel is in the port area.

In the case of swell, special hawsers and wires can be requested on hire at US$ 1.50 on every 1,000 g.r.t. per day or part of a day.

DEVELOPMENTS: ~~CEPA intends to provide specialised facilities for handling containers by means of a 300 m. pier with a depth of 12.5 m. MLLW. It will have an electric crane of 40 tonnes capacity and a ramp for Ro-Ro vessels.~~

?

SHIPMASTER'S REPORT: 1979.
Port Limits: No port limits stated.
Documents:

Clearance from last port.
5 Crew Lists.
4 Voyage Memorandums.
4 Store Lists.
4 Passenger Lists, (negative required).
1 Ship's Health Declaration.

Manifests prepared by the Agent:

2 Copies for the Customs.
1 Copy for the Port Captain.
1 Copy for Quarantine Inspector.
16 Copies for the Stevedores.

Customs seal the spirits and tobacco, but not the beer. No private declarations required.

Boarding party of about 8 persons board the vessel with the Agent who will attend to documents and other needs of Officials.
Pilotage: Pilotage is compulsory, Pilot boards vessel up to 3 miles from "A" Pier.
Restrictions: Vessels can berth any time day or night, main engines should always be on short notice, due to swell at berths, as moorings often part. Vessels are advised to make use of extra shore moorings provided, these can be requested via the Agent.

The least depth at the berths is 30 ft.
Max. Size: "C" Pier (outer berth) has 46 ft. of water alongside and can take vessels of up to 40,000 d.w.t., it is well fendered. General cargo and liquid cargo can be handled at this berth.
Health: Standard Health message to be sent to Agents who will make the necessary arrangements, every vessel coming in should fly the "Q" flag, this is to avoid fines.
Radio: Advise ETA to Agents at San Salvador 96, 48, 24 and 12 hours before arrival. For Telex messages use "WLO" Mobile. For W/T messages use "KSF" San Francisco.

For Port Control use VHF Channels 16 and 27. (Range 40 miles). Hours of operation 24 hours. Call sign: "Acajutla Tower" also R/T on 2182, 2163 and 2169 kHz. Tugs work on 2182, 2163, 2196, 2638 and 2738 kHz.
Radar: There is no Port Radar service.
Tugs: There are three tugs available with the following power: 800 h.p., 1,200 h.p. and 1,800 h.p. Tug's lines are used at no extra charge.
Berthing:

Pier	*Berth No.*	*Depth* (m.)	*Remarks*
"A"	1	9.0	General cargo, 2×3 ton cranes. Liquid cargo (Berth No. 1)
	2	10.0	
"B"	3	9.1	General cargo, bulk cargo. 25 ton crane on Pier "B".
	4	10.0	
	5	9.1	
	6	10.0	
"C"	7	14.0	General cargo, liquid cargo No cranes available.
	8	14.0	

Stevedores: Arranged by the Agents, and based on information passed in ETA advise, vessels arriving from New Zealand may well be at the port before the cargo plans arrive. Stevedores work round the clock.
Medical: Doctor available but nearest hospital 13 miles away, Doctor will board the vessel, advise the Agents before arrival.
Density: Observed density 1025.
Fresh Water: Available at about 20 t.p.h.
Fuel: Only available in emergency.
Provisions: Limited quantity available, 24 hours notice required.
Fire Precautions: Tugs have fire fighting equipment on board. As no phones on board, contact can be made on VHF with "Acajutla Tower".
Consuls: British Vice-Consul at Sansonate 14 miles away from the port.
Repairs: Minor repairs only possible.
Dry Dock: No dry dock available.
Surveyors: Arie Van-Helden (Lloyd's Agents only), San Miguel, Cutuco, La Union.
Gangway/Deck Watchmen: Shore gangway available and recommended due to swell at the port, full deck patrol necessary during night time.
Hatches: For safety it is better to open and close the hatches with the ship's crew, which is allowed at this port.
Cargo Gear: Ship's gear and shore cranes used depending on which berth the vessel at.

There are no Reefer points ashore. There are no Tower Units ashore. Containers can be landed on Flats. Fork Lift trucks are well maintained.
Repatriation: Not advisable from this port.
Airport: Ilopango Airport is 8 miles from San Salvador, flights from this airport connect with international flights at Mexico City.

There are three flights a week from Mexico City to London.
Holidays: December 25th, January 1st, also Special Holiday for this region being August 5th and 6th. (From 1500 hrs. 5th to 1900 hrs. on the 6th).
Police/Ambulance/Fire: This is covered by the Agent who remains on board all the time the vessel is in port, the Agent will require a room to live in whilst he remains on board.
Services: No special services available.
Shore Leave: Permitted.
Identification Cards: Not required, but Crew Members are advised to carry some means of identification.
Regulations: No unusual regulations.
Delays: Vessels have to leave the berth due to swell, this decision is left to the Master of the ship.
General: Vessels alongside the berth, move quite a lot, but the shore fenders are well maintained. Stevedores will unpack containers on board the vessel.

AUTHORITY: Comision Ejecutiva Portuaria Autonoma (CEPA), Boulevard de Los Heroes, Torre Roble, Apartado Postal 2667, San Salvador, El Salvador, Central America. *Tel:* San Salvador (Area Code 503) 24-1133; Acajutla 52-3200. *Telex:* (Area Code 301) 20194. *Cables:* CEPA.
Contact: Pedro L. Mena A., Port Manager, Acajutla.

LA LIBERTAD: 13.29 N. 89.19 W.

CLOSED TO CARGO VESSELS SINCE MAY 1976

AUTHORITY: Comision Ejecutiva Portuaria Autonoma (CEPA), Torre Roble, Boulevard De Los Heroes, San Salvador, El Salvador. *Tel:* 24-1133. *Telex:* (301) 20-194. *Cables:* CEPA. *Contact:* Ing. Julio O. Gavarrete L., Port Division Manager.

LA UNION (Cutuco): 13.20 N. 87.50 W. (See Plan)

DOCUMENTS: *Consular Documents:*

Only the requirement for visa of shipments of firearms and narcotics, which must be carried out at the port of embarkation, remains in force.
Prior to Arrival:

Arrival Notice:

24 hours before the vessel's arrival, notification is submitted in writing to the Autonomous Port Executive Committee (CEPA) on the time of arrival and the number of stevedores that will be needed. The CEPA serves as a kind of single shipping agency. In that capacity, it arranges for entrance and clearance of vessels, payment to other Official Agencies and draws up the port account for the ship's Agent.

Information on Cargo for the Port:

Prior to the vessel's arrival, the following documents are to be submitted to CEPA:

16 copies of the Cargo Manifest.
1 set of the Shipper's Manifest.
1 Mail Guide.
4 copies of the cargo distribution for each hold.
1 Stowage Plan.
1 List of Container Contents.
14 to 16 Cargo Tally Books, depending on the number of stevedores.

If this information is not available before the vessel's arrival, it may be submitted at the time of the reception visit (boarding party).

On Arrival:

Type of Documents	*Captain of Port*	*Customs*	*Plant Health*	*CEPA*	*Total*
Basic Forms					
General Declaration	1	1	1	1	4

Consular Manifest	–	1	–	–	1
Set of Bills of Lading	–	–	–	1	1
Cargo Distribution	–	–	–	4	4
Contents of Containers	–	–	–	1	1
Stowage Plan	–	–	–	1	1
Cargo Tally Books	–	–	–	14/16	14/16

Number and Distribution of Documents

Prior to Departure: The CEPA draws up the clearance permit and has it signed by Customs before submitting it to the Captain of the Port. When loading and unloading is completed, a representative of the Captain of the Port delivers the clearance permit on board.

PILOTAGE: Obtained usually through Agent, can be cable-requested to Port Captain-La Union. Fenadesal has availability to dock and undock vessels any time required.

ANCHORAGE: La Union Bay – up to 34 ft. Approximately 14 Class II and a large number of Class III anchorage berths are available in the harbour. 5 Class II berths are in the vicinity of the pier in depths of 33 ft. to 30 ft., and approximately 9 more, in depths of 70 ft. to 30 ft., are just Westward of Isla Zacatillo. The first area has a mud bottom; the second is sandy and rocky. The large number of Class III berths are in an area Northward of the pier and in the area between the 2 anchorages providing Class II berths. The least depth in each of the areas is 25 ft. A large number of relatively unsheltered anchorage berths of all classes are available outside the harbour in the Gulf of Fonseca.

RESTRICTIONS: Enter any time – preferable on flood tide with draft over 24 ft.

MAX. SIZE: Largest vessel that can be accommodated in harbour would occupy an anchorage berth with a min. depth of 43 ft. and a diameter of 3,300 ft. Largest vessel that can be accommodated alongside wharf would occupy a berth with least depth of 25 ft.; length is not a limiting factor, although a max. 550 ft. is recommended due to strong currents, 3 – 4 knots, and pressure on part of any vessel extending for any greater distance beyond length of wharf.

HEALTH: Disease should be reported. Pratique necessary on each occasion.

RADIO: Direct to Agents or Fenadesal, Telex: 20-194, Area 301, San Salvador.

TUGS: No tugs required.

BERTHING: Berthing usually carried out on slack tides due to cross currents, up to 3 – 4 knots. The estimated military port capacity is 1,800 tons of general cargo per day. Port can accommodate 2 standard-type ocean-going cargo vessels, and possibly one alternative class T/C (small ocean-type tanker under favourable conditions) alongside berths, and approximately 14 ocean-type cargo vessels, and a large number of Class III (coaster-type cargo vessels) at anchorage berths. Ro/Ro pier, depth alongside 16 ft. LW.

STEVEDORES: Prior advice preferable. Stevedore force consists of 9 gangs of up to 16 men per gang for on-board work. Similar gangs are available on pier, and up to 300 labourers, crane and fork-lift operators comprise shore gangs.

MEDICAL: Services available – no special restrictions.

TANKERS: Drafts 25/34 ft. fore and aft. Tankers of up to 550 ft. in length can be accommodated at either side of pier, where adequate connections of 6 in. – 8 in. and 10 in. pipe-lines are located. Largest vessel that can be accommodated alongside would occupy a berth with a least depth of 25 ft.; length is not a limiting factor, except as noted previously.

FRESH WATER: Four 2 in. connections on each side; volume estimated at 10 t.p.h.

FUEL: Bunkers and diesel – can be delivered when berthed.

GANGWAY/DECK WATCHMEN: Not required – National Marines on guard.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: Not controlled, but restricted ashore.

IDENTIFICATION CARDS: Passes for leaving ship to have Master's signature.

CONSULS: Only Honduras is represented.

REPAIRS: No facilities.

REPATRIATION: Can be arranged.

AIRPORT: "El Salvador", 102 miles away in the "Comalapa's Valley".

TIME: GMT minus 6 hours. No alterations.

HOLIDAYS: Easter Thursday, Good Friday. Port not worked only on those dates.

POLICE/AMBULANCE/FIRE: In La Union – Close to the Port.

TELEPHONES: Available.

SHORE LEAVE: Allowed.

AUTHORITY: Ferrocarriles Nacionales de El Salvador (Fenadesal), Cutuco-La Union, El Salvador. *Contact:* Fernando Rodriguez Yudice, Port Manager.

Ferrocarriles Nacionales de El Salvador, Apartado Postal 2292, San Salvador, El Salvador C.A. *Tel:* 21-8940, 22-9000. *Telex:* (301) 20-194. *Cables:* Fenadesal.

NOTES

Please also advise Shipping Guides Ltd.

Equatorial Guinea

GENERAL

PIRACY/TERRITORIAL WATERS: *Shipmaster's Report:* Whilst steaming from Lagos towards Douala (passing North of the island Fernando Poo which is considered the normal route) the vessel was hailed at 0640 GMT by Equatorial Guinean Patrol Boat "LP 009" with two 20 mm. double automatic guns pointed at vessel. The vessel's position was Lat. 03° 48.4′ N., Long. 09° 03.0′ E. (about 10 nautical miles from the island).

An Officer with the rank of Lieutenant and 2 men boarded the vessel. They claimed that the vessel had violated Equatorial Guinean territorial waters having passed inside the 12 nautical mile limit. The Officer wished to take a crew member ashore to prove that the vessel had been boarded, but when the vessel's Master protested, the Officer claimed cases of whisky as proof. Having no alternative, the vessel's Master was forced to accept and the patrol boat departed 0745 GMT.

BATA: 01.52 N. 09.46 E. (See Plan)

SHIPMASTER'S REPORT

Roadstead with single point mooring buoy connected to the shore with 6 in. pipe-line, 6 in. hose: (everything in a deplorable state). No tugs or Pilots available. Master should have local knowledge when approaching berth in hours of darkness. Vessels are moored with 2 anchors forward and 2 ship's lines (plus two 8 in. shore lines) to the single point mooring buoy. 5 lengths of 15 m. hose available. Preferable stern discharge connection to be used. Max. pressure: 4 kg./sq.cm. All grades through this line. Linewash of water in between the different grades. There is rubber ball for cargo separation.

ADVICE: 1. In view of the deplorable state of buoy, lines and hose, Master should be very careful in mooring his vessel – which has to be done by himself – in order not to damage same.

2. Master should have ship's motorboat ready to run ship's lines to the buoy because motor launch, which is supposed to do this is very old and liable to breakdown at a crucial moment.

3. Anchors should be dropped in a position S.W. of the buoy in order to stay well clear of the unmarked wrecks, in good holding ground with 4 to 5 lengths of chain.

4. Tidal currents move the ship relative to the mooring buoy – so it is necessary to heave anchors tight – bearing in mind that the construction, etc. of the buoy is very weak.

5. The buoy carries a light but the light does not work. Anyway mooring after dark is not advisable.

DOCUMENTS: Only a small Customs Post available here:

1 Cargo Manifest.
1 Store Manifest.
1 Crew List.

CUSTOMS ALLOWANCES: No restrictions – no sealing of bonded stores.

SHORE LEAVE: Allowed by ship's boat.

RADIO COMMUNICATION: None. Though there are officially coast radio stations in this country, they do not operate on schedule. Telegrams should be sent via coastal radio stations of other countries. No VHF.

Also see "Purser's Report", Rey Malabo.

PUERTO MACIAS (Puerto Nuevo): 01.49 N. 09.44 E.

Situated about 1 mile South of the mouth of the Rio Ekuku. This is quite a new jetty – developed in 1973 – shaped like the letter "L", where the long leg of this "L" is connected to the shore and 4 dry cargo vessels can moor alongside the short leg in about 14 m. of water. Every vessel has on her off-shore side 2 mooring buoys to assist in mooring and unmooring. No tugs available. Though it is stated that a Pilot is available, this information should be treated as unreliable. The pier is used for the discharge of general cargo and the loading of logs and sawn wood. According to information received this jetty will be made available to tankers for discharge of oil products.

DOCUMENTS: See "Bata". This new jetty falls under the jurisdiction of Bata Authorities.

RADIO COMMUNICATION: See "Bata".

SHIPMASTER'S REPORT: October 1979.

Documents:

Crew List	6 copies	(vessel's care)
Passenger List	6 copies	(vessel's care)
List of Ports of Call	6 copies	(vessel's care)
Crew Declaration	6 copies	(vessel's care)
Store List	6 copies	(vessel's care)
Cargo Declaration	2 copies	(vessel's care)
Arms & Ammunition	2 copies	(vessel's care)
List of Narcotics	2 copies	(vessel's care)
List of Animals on Board	2 copies	(vessel's care)
Vaccination List	2 copies	(vessel's care)
Cargo Manifest for discharge cargo	6 copies	(vessel's and loading port Agent's care)

Authorities boarded the ship on the Roads.

Pilotage: Pilot is available, native, has knowledge of local currents and winds, otherwise is not skilled. Speaks only Spanish.

Anchorage: Half a mile West of the breakwater or further in depths from 12 to 25 m., sand, the holding ground is good but swell can be heavy.

Restrictions: Berthing possible only during daylight.

Berthing: The jetty can accommodate four ships, two on each side but at present all mooring buoys are removed, except Buoy No. 8. For this reason only ships equipped with stern anchor could be moored outside, to keep herself (with anchor) clear from the breakwater owing to swell, current and wind from S.W. Also the inner berth is not protected against the swell, because the breakwater was constructed of concrete piles. According to information the mooring buoys will be replaced in near future.

Loading/discharging with ship's gear, no shore cranes available. Oil products can be discharged by pipe-line connected with shore storage tanks.

Stevedores: Available, arranged through Agent of shippers/receivers.

Medical: Hospital facilities available, but there is total shortage of drugs.

Fresh Water: Available from quay.

Opening/Closing Hatches: Normally done by crew.

Customs Allowance: No limit. No sealing of bonded stores.

Shore Leave: No restrictions. Identification cards not needed.

Airport: There is an airport close to Bata with flights to the capital (Malabo) and Douala.

Time: GMT plus 1 hour.

Currency: Ekuela.

Stores: Not available.

REY MALABO, (formerly Santa Isabel): 03.46 N. 08.48 E.

Situated on the Island of Macias Nguema Biyogo (formerly Fernando Poo) Capital of the Republic of Equatorial Guinea.

DOCUMENTS:

9 Crew Lists.
3 Stores Manifests.
3 Crew Declarations.
2 Lists of Arms and Ammunition.
4 Lists of Ports of Call.
2 Passenger Lists or negative.

GENERAL: No tugs.

PILOTS: Effectively none. Only a locally informed inhabitant of this port comes on board to inform the Master, he is equipped with a large scale Spanish chart of this bay, but he has no nautical knowledge and he does not know how to handle a ship.

Note: 1. Masters should bear in mind that they have to manoeuvre and moor the vessel themselves.

2. In view of the continuous breakdowns (and insufficient power) of the mooring-launch it is absolutely necessary to have the ship's motor boat at stand by to run the ship's mooring-lines ashore.

MOORING PROCEDURE: Tanker berth: old jetty (Muelle Viejo). The ship should be moored stern-to to this jetty. On entering the port with the lights in line starboard anchor is dropped in the middle of the bay and the ship has then to manoeuvre around with her own engines, until in line with the berth.

N.B. Because there is very seldom anybody present at the jetty to accept the mooring lines (on arrival as well as on departure) the vessel's crew should be kept on stand by to do this job.

ARRIVAL/DEPARTURE: Between 0600 and 1800 hrs.

TANKERS: Preferably stern discharge into a 6 in. line with 6 in. hose. All grades through one line – Linewash with water in between – pressure 4 kg./sq.cm. max.

DRY CARGO VESSELS: Berth at a new jetty on the West side of the bay. No cranes available.

ADVICE: 1. Masters should be very careful when dropping their anchors as some vessels (Men of war) moor with their sterns to the dry cargo jetty and have their anchors in the middle of the bay. These anchors are very easily fouled by incoming vessel's anchors. A useful suggestion might be to put anchor buoys on the anchors in order to show another incoming ship their position.

2. Because it is quite difficult to manoeuvre a tanker around in this bay without any tug assistance, it should be borne in mind that when the wind is over Force 2 manoeuvring with a sizeable vessel is apt to falter, and no assistance can be expected from any quarter.

DEPARTURE: Vessels are free to leave within mentioned hours without Pilot.

RADIO COMMUNICATION: See "Bata".

CUSTOMS ALLOWANCE: No limit – no sealing of bonded stores.

SHORE LEAVE: No restrictions, but with own motor boat.

Currency: Eq. Guinea Peseta = Spanish Peseta.

PURSER'S REPORT:

Documents:

9 Crew Lists.
9 Passenger Lists (Marked "none" if no passengers on board).
3 Customs Declarations.
3 Stores and Provisions.
4 Arms and Ammunition.
1 Vaccination List (Cholera and Yellow Fever).
9 Cargo Manifests.

Stores: No stores were purchased at this port, advise top up prior to calling at this port.

Mail: Advisable to send to next big port.

Bata: Same papers as above. No officials come out to the ship at this port, however, papers should be kept ready. Vessels moor to a buoy for discharge.

SHIPMASTER'S REPORT: May 1984.

Pilotage: There are no Pilots at Malabo. Masters are expected to berth the vessel themselves on receiving instructions from Agents via VHF to proceed to the berth. If requested an Agents' representative may board the vessel but they are not persons with nautical knowledge and can be helpful only in communicating with the mooring boat.

Berth: The general cargo berth on the S.E. side of the bay is 200 m. long and fitted with good fenders. Depths alongside vary from 6.0 m. at the extreme S.E. end to about 7.0 m. one third of the length from the end and nearly 9.0 m. at the N.W. end of the pier.

There is no definite draft restriction but a vessel with a maximum after draft of 24 ft. can safely berth alongside. Off the pier the water is deep with depths of 14 m. to 17 m.

Berthing Procedure: Vessels berth starboard to without using anchor. After passing the red buoy about 20 m. off to port swing to starboard to bring vessel as close to and as parallel to the pier as possible. Mooring boat takes the ship's lines ashore.

Unberthing Procedure: Using headline and forward springs swing vessel off pier sufficiently to drop astern to the centre of the bay. Then swing using engines to proceed out. (Note: It is advisable not to attempt berthing or unberthing if the wind is unfavourable, particularly with large vessels. There are no other craft in the port other than two mooring boats).

Cargo Handling: Vessels discharge cargo using their own gear. There is one small wooden barge fitted with outboard motor for handling small consignments. There are no lighters or towing boats or tugs in Malabo.

Radio Communications: All the radio stations in Equatorial Guinea are unreliable and mostly not operating. Messages should be sent via Douala or some other major coastal station.

Lights: None of the lights shown on the chart were functioning. At night only vessels with radar should approach close. There has been a complete breakdown of the power supply to the town of Malabo for 8 weeks. It is uncertain when the power supply will resume.

Consulates: Spanish, Belgian, French, American, U.S.S.R. and Cameroon.

Fresh Water: Available, laid on to the pier, good pressure.

NOTES

Ethiopia

ASSAB: 13.01 N. 42.44 E. (See Plan)

PORT LIMITS: A line drawn from Ras Gombo to the Northern point of Umm al Baher (Islands) to Southern point of Umm al Baher, then to Ras Marcanah.

DOCUMENTS:

5 Manifests for Transit Passengers and passports.
5 Manifests for Landing Passengers and passports.
5 Crew Lists.
1 Complete Crew Provisions List.
1 Crew Personal Effects List.
1 Store List.
6 Cargo Manifests.

PILOTAGE: Compulsory Pilots take tankers in and out of oil harbour only during daytime. Pilots embark about 1 mile N.N.E. from Northern extremity of breakwater. Commercial harbour gives 24 hour service. Vessels calling Assab must advise Agent through Assab Coastal Radio Station by call sign ETC. Assab Radio Signal Station is available.

ANCHORAGES: Assab Bay provides good anchorage in 42 ft. to 48 ft. of sand and coral bottom, good holding ground. Generally weather in Assab can be divided into two: Summer time and Winter time weather, during Summer (May–September) Northerly wind blows with a maximum force of 3/4 BS. During Winter time (October-April) South-easterly local monsoon winds blow usually 5/6 BS but reaching force 7/8 BS during daytime and generally drop at night. This 7/8 BS force is mainly experienced about December to February.

RESTRICTIONS: There are 2 entrances, the North and the South entrance, the depth at the entrances is 38 ft. Least width 1,300 ft.

Vessels of any size enter or leave port during hours of darkness except tankers, and vessels carrying dangerous cargo. In these cases, where vessels are carrying explosives or other dangerous cargoes, Agents of calling vessels must notify the Port Office in advance of discharging and/or loading of explosives. Inflammable and other highly dangerous cargoes in commercial harbour are permitted from 0600 to 1800 hrs. local time.

MAX. SIZE: Largest vessels which can enter commercial harbour 180 m. LOA, 80 ft. beam, 33 ft. draft.

HEALTH: Quarantine and sanitation services available. Quarantine officer boards arriving vessels and necessary medical clearance given.

RADIO: Coastal radio station available *(a)* Position Lat. 13° 01′ 24″ N., Long. 42° 44′ 38″ E.

(b) Coastal radio station in service for 13 hours per day 0700 hrs. to 2200 hrs. Call sign ETC. Transmits traffic lists on 489 kHz after a preliminary announcement on 500 kHz, 30 minutes past each odd hour starting at 0500 and ending 1700 hrs. (0530, 0730, 0930, hrs. etc.).

(c) Transmit traffic lists on 6509 at 0500, 0900 and 1300 hrs. and searches 6265.5 – 6280.5 between 0515 – 0600, 0915 – 1000, and 1315 – 1400 hrs.

(d) Transmit traffic lists on 8618 at 0700, 1100 and 1500 hrs. and searches 8354 – 8374 between 0715 – 0800, 1115 – 1200 and 1515 – 1600 hrs.

(e) Rates shall include station charges and charge of transmission over telecommunication network within Ethiopia.

(f) Accepts ship letter telegrams (SLT) from ships for delivery in Assab.

(g) For radio telephone service. Station keeps watch and replaces on 2182 for radio telephone service at 0615 – 0700, 0815 – 0900, 1015 – 1100, 1215 – 1300, 1415 – 1500, 1615 – 1700 hrs. and transmits traffic same hours on 4379.3. Service hours will be extended to 24 hours.

VHF: VHF system is in operation in the port area.

TUGS: Tug service compulsory for ships over 300 n.r.t. 3 tugs of 600, 1,200 and 1,400 h.p. attend ships during arrival and departure.

BERTHING:

(a) North Half Jetty 1,620 ft. length, 36 ft. depth.
(b) South Half Jetty.
  (i) 1115 ft. length and 33.8 ft. depth.
  (ii) 459 ft. length and 29.5 ft. depth.
  (iii) 164 ft. length and 19 ft. depth

Fenders are good and protect ships from impact; harbour is modern and has modern breakwater 711 m. length. 7 large vessels can be accommodated at a time. In addition stern ramp ro/ro vessels are accommodated at the ends of the North and South Jetties.

Salt Loading Terminal: Located 1.7 miles from the Commercial Harbour, salt loading ships drawing up to 33 ft. are berthed at this terminal using 2 anchors and mooring to buoys and dolphins. Not in use at present time.

STEVEDORES: 14 stevedoring agencies, any kind of cargo can be discharged and loaded. Skilled labourers and loading/discharging capacity are respectively 30-15 t.p.h. Crane lift capacity 50 tons.

Normal working hours: 0700 to 0600 hrs. (23 hours a day).

MEDICAL: 1 hospital in town and clinic in port. When sick person on board, hoist (by day) International code flag "W", (by night) 3 lights in vertical line upper one red, and middle and lower, white lights. Doctor may be called on board at any time to attend sick crew or passengers by arrangement with Agents.

TANKERS: Oil harbour about 1.5 miles S.E. of commercial harbour with draft 33 ft. Crude oil discharging terminal 500 m. from Southern end of breakwater open sea buoy berth – tankers of 800 ft. length, and 36 ft. draft can be accommodated. Diameter of pipe-line for loading and discharging black products – 16 in., white products 10 in.

Tankers at the Shell Berth are moored by dropping 2 anchors and tying up 2 ropes from each quarter to the buoys, and 1 rope from each quarter to the dolphins. All grades of oil in bulk discharged into shore storage tanks from this harbour, and fuel oil is discharged from the Commercial Harbour.

In Assab, the petroleum installations are of Shell Red Sea Co., Mobil Oil East Africa Co. and Ethiopian Petroleum Corporation

DENSITY: At berths is 1030 while the tides are negligible for all seasons; max. 1 ft.

FRESH WATER: Available. Supplied upon request by Agent and can be delivered at 60 t.p.h.

FUEL: All grades available, at commercial harbour. Advance notice necessary. Rate of 300 t.p.h.

FIRE PRECAUTIONS: Modern fire brigade.

GANGWAY/DECK WATCHMEN: Watchmen on deck necessary, and rate arranged as per agreement of employer and employee.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: All ship's International Certificates should be on board.

CUSTOMS ALLOWANCES: Tobacco, 400 cigarettes. Wine and/or spirits: 1 litre or bottle of spirit.

CARGO GEAR: Different types of certified cargo handling equipment available.

IDENTIFICATION CARDS: Needed.

CONSULS: Only Italian Consulate in Assab, others in Addis Ababa.

REPAIRS: Minor repairs can be carried out at Port Office workshop.

REPATRIATION: Possible.

AIRPORT: 15 km. from Assab.

TIME: GMT plus 3 hours.

HOLIDAYS: See "Massawa".

POLICE/AMBULANCE/FIRE: Port Police Tel: 60049; Hospital Tel: 60119; Port Office Fire Brigade Tel: 60102.

GENERAL: 1 modern hotel and 1 motel available in town.

SHORE LEAVE: Crew allowed ashore, with boarding passes.

DEVELOPMENTS: Ro/Ro berth and tug berth to be constructed. Work commenced 1985. Berth Nos. 13 and 15 to be refurbished. Container quay to be built.

SHIPMASTER'S REPORT: January 1983.

VHF: VHF system is installed. Call sign "Assab Signal Station". Working Channel 12.

Medical: No dentist available in city.

Fresh Water: Available in emergencies only, Port Authority advises that all vessels should take sufficient water at previous port.

Our vessel was supplied with 20 tons of water every other day, which was arranged by cargo receiver's Representative.

We advise that water should be purified before drinking.

Repairs: Not possible. No oxygen or acetylene available.

General: No spares of any description available. Provisions can be supplied in small quantities.

SHIPMASTER'S REPORT: February 1985.

Documents: No cargo documents whatsoever were received by Agent prior to ship's arrival. The day after arrival at the roads, the Agent came on board to collect a full set of cargo documents. This procedure seemed to be a fairly normal practice on ships other than regular liner ships and tankers arriving at Assab.

After having berthed, Authorities came on board to collect 5 Crew Lists, 3 Stores' Declarations and 3 Crew's Effect Declarations. Ship's Certificates were not examined. Ship's lockers with tobacco and spirits were sealed by Customs. Beer-store not sealed. No search of crew cabins.

Pilotage: Signal station working VHF Channels 16 and 14, giving berthing instructions and other information. Also signal station is most willing to pass any messages to Agents, etc.

Pilot boards ships on the roads approx. 0.5 miles off the breakwater. 2 Pilots are serving the port. This ship was handled by the Chief Pilot, who is very skilled in handling ships, making effective use of wind when berthing/unberthing/shifting ships in port.

Anchorages: Ship arrived on the roads 14th January, 1985 and was at anchor for 18 days. In that period the wind blew during the night with Force 4/5 from S.E., shifting E.S.E. Force 6/7 during daytime – often reaching Force 8. Holding ground good.

Restrictions: Draft restriction 33 ft., but Pilot advised me that 34 ft. has been handled. The problem is not the depth alongside the pier but a small patch of sand close to the breakwater, with a minimum depth over it of 35 ft. Ships with the deepest draft are berthed at Pier No.1 (The outer end of the Northern Pier).

Health: After arrival in roads, ships are called by a Quarantine Officer on VHF Channels 16/14, who asks relevant questions such as last port, crew members on board, if any sickness, gross/net tonnage. If satisfied with answers ship is granted Free Pratique.

Radio: Assab Radio (ETC) was impossible to use during voyage to Assab, and all messages were passed via Aden Radio (7OA). After having anchored at Assab Roads, Assab Radio did answer and arrival message and Notice of Readiness were sent via ETC.

Tugs: Tugs meet ships inside the breakwater. 1 tug built 1979 and 1 built 1981, respectively 1,200 and 1,400 h.p. Both of them are working very effectively. Large ships are normally berthed at Pier 1 or 2 – the outer ends of piers – bow heading out. An anchor is used to hold the ship's bow while tugs are pushing the ship into position. 1 larger tug and 1 smaller tug were seen in the port, but they were not in use during our visit.

Cranes: On the Northern pier there are 9 cranes, and on the Southern pier 7 cranes. All were electric cranes working well and well maintained. 2 of the cranes on each pier are 20 ton capacity and the others 6 ton. At least 3 mobile cranes were seen, one with capacity up to 60 tons.

Bulk Cargo Facilities: Bulk grain is discharged by grab to portable bag filling equipment on the pier. Capacity unknown. Simultaneously, dump trucks are used to carry bulk grain from ship to warehouse. 2 cranes are normally used and an outturn of 2,500 tons is said to obtainable.

Stevedores: Agents arrange gangs. Shifts worked: 0600 hrs. – 1400 hrs., 1400 hrs. – 2200 hrs., 2200 hrs. – 0600 hrs. It seems normal practice that all ships work around the clock with maximum possible gangs.

Density: 1023.5.

Fresh Water: Available but in very limited quantities, 10 to 30 tons per ship only. Quality said to be poor.

Watchmen: Gangway watchman compulsory. 1 watchman works from 0600 hrs. to 1800 hrs. The other from 1800 hrs. to 0600 hrs. Meals are to be supplied by ship.

Customs Allowances: Each crew member had 200 cigarettes and some had a bottle of spirits on arrival. No comments were made to this quantity.

Repatriation: Said to be possible. Local plane to Addis Ababa and from there international flight connections.

Shore Leave: Immigration Department issue a special shore pass, which is shown when passing the gate to and from the port.

Supplies: Ships should not rely on any supplies. At a local market, some supplies of fresh vegetables can be obtained, but most are of poor quality.

Delays: Depending on type of cargo. Army material seems to have priority over other cargo. Berth Nos. 1 and 2 are said to have been promised to ships with food aid.

Notice:
TO:
THE MASTER
M/V "..............................."
ASSAB

Assab Port Authorities: General Instructions to be followed:

1. The hours between 2400 and 0600 are curfew hours.
2. Any crew member going ashore should hold his passport or seaman's book together with a shore pass given by the Immigration Officer. Misuse or loss of a shore pass card will not only lead to payment of Birr 10.00 (Ten) per card but also strong measures will be taken upon the individual crew member who involves himself in such misuses.
3. Attempts to exchange foreign currency on black market leads to serious prosecution. Official bank exchanges are authorised. (Rate of exchange 1 US$=2.05 Birr.)
4. Ship's crew are not permitted beyond the following limits:
   (A) The hospital to North East
   (B) Starlite Hotel to the West, and
   (C) The Agip Motel to the South West.
5. All crew's personal belongings should be shown in Crew Declaration. The Customs Authorities will inspect all individual cabins upon arrival and departure.
6. Rat guards should be fitted to all mooring ropes immediately after berthing. Contravention of this will incur a fine Birr 300.
7. Anchoring in Ethiopian Territorial Waters and generally from "T10" to "Ras Damera" is strictly prohibited. When entering territorial waters you must open your VHF Channel 16 and inform Naval Base of your identity.
8. Two hours before departure, "G" flag should be hoisted by day and vertical "Red White Red" should be lit by night, for Pilot.
9. Before sailing from our port you must institute a thorough search of your vessel to ensure that no unauthorised persons or stowaways are on board at the time of departure.
10. Any crew member found in illegal possession of harmful and toxic drugs or found circulating same directly or indirectly shall be seriously dealt with according to the penal code.
11. Diving, swimming and fishing within and or near by the premises of the harbour is strictly prohibited.
12. Photography within the port or around the town is strictly prohibited.
13. Smoking inside port area is strictly prohibited.

SIGNED:..............................
MASTER

AUTHORITY: Ministry of Communication, Department of Marine.

ADD SOTR.

MASSAWA: 15.37 N. 39.28 E.

PORT LIMITS: The coastline of Gurgussum Peninsula, at Lat. 15° 39′ N. to a point Lat. 15° 39′ N., Long. 39° 30′ E. to Lat. 15° 35′ N., Long. 39° 30′ E. to the coastline at Lat. 15° 35′ N., Long. 39° 26′ 50″ E.

DOCUMENTS:
2 sets Manifests.
2 sets Bills of Lading.
5 Crew Lists.
5 Passenger Lists.
2 Stores Lists.

APPROACHES: Through North Channel and South Channel. In channel, in direction of leading lights 243°, max. depth 31 ft. (but alongside 30 ft.) Marker buoy showing a wreck in position approximately 200 m. S.E. of North Breakwater.

PILOTAGE: Pilotage is compulsory for all vessels over 100 n.r.t. Pilot section headed by a Chief Pilot and 2 other Pilots.

There is 1 pilot boat. ETA should be given to Agent who will inform Pilot 72 hours prior to arrival. Signal tower located in port area contacts vessel on arrival informing Agent and Pilot, and receiving or transmitting by Morse lamp messages to and from vessel.

ANCHORAGES: 8 cables East of main lighthouse. Anchorage North of leading light not recommended.

Tides: Normally the range of tide varies between 1.5 and 2.0 m., but during spring tide season the range varies up to 3 m.

MAX. SIZE: Length 520 ft., draft 29 ft.

HEALTH: Doctor normally boards with Pilot, but can be asked to board together with Customs and Immigration while vessel on roads. All crew members must be vaccinated against yellow fever, and possess necessary certificates. Derat and other health certificates required. Derat cannot be effected at Massawa, but exemption certificate can be obtained.

RADIO: Assab Radio, call sign ETC, Djibouti Radio, or Aden Radio may be used. Asmara Radio, call sign ETC 2, working hours 0500 to 1700 GMT. Radio-telegraphy and radio-telephone services.

TUGS: Compulsory. Join vessel in port.

3 tugboats are available, two of 350 h.p. and the third 1,000 h.p. The smaller motor tugboats used for assistance mainly within the port limits, and the deep-sea salvage motor tugboat, for salvage operations, but whenever conditions demand, is also employed for assistance within the port.

BERTHING: Vessels normally drop anchor before berthing.

Commercial Harbour: 6 berths, namely 1 to 6, and the overall distance from Berth No. 1 to Berth No. 6 is 907 m. These berths normally used by vessels handling general cargo, bagged cargo and livestocks. Depth of water at mean low water springs (MLWS) is shown below:

Berth No. 1 – 16 ft. 6 in.
Berth No. 2 – 24 ft. 6 in.
Berth No. 3 – 28 ft. 6 in.
Berth No. 4 – 28 ft. 0 in.
Berth No. 5 – 27 ft. 0 in.
Berth No. 6 – 30 ft. 0 in.

Salt Berth: This is a single berth where vessels load salt in bulk. The depth at the berth is 32 ft. Max. draft 29 ft. Loading with the help of conveyor belt at the rate of about 300 t.p.h.

Cement Berth: Depth 18 ft.

American Jetty: Depth 18 ft.

However, dredging will be carried out to accommodate vessels of a greater draft in the future.

STEVEDORES: Radio 24 hours' notice of ETA stating number of gangs required. Loading discharging rates 5 t.p.h. on general, 10 – 15 t.p.h. on bagged cargo.

DENSITY: 1025.

MEDICAL: Notice should be given to Agent only when specialist needed. Hospital treatment available. Dental facilities available at Asmara, 110 km. away.

TANKERS: AGIP, Arkiko Oil Station Terminal: Max. draft for entering channel 29 ft.

Total Pier, depth alongside 36 ft., max. draft 30 ft.

FRESH WATER: Supplied alongside, Max. rate 600 tons per day or by barge of 50 tons on roads. Barge can be loaded/discharged in 8 hours.

FUEL: Can be obtained alongside oil terminals and at Berth Nos. 5 and 6 for heavy fuel only. Diesel can be supplied by lorries alongside. No bunker barge available.

GANGWAY/DECK WATCHMEN: Compulsory when alongside.

OPENING/CLOSING HATCHES: Normally by labourers, but can be done by crew.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man. New allowance can be delivered after 1 week. Wine/Spirits: 1 bottle of wine/spirits (opened). Wine and beer quantity necessary for the stay in port allowed upon reasonable request on arrival.

IDENTIFICATION CARDS: Not needed. Immigration gives port entry card (without crew member's name) which must be given back prior to departure. In case of loss a fine is likely.

CONSULS: Italian Vice-consulate, Box 62. Tel: 52214. Other consulates at Addis Ababa for Belgium, France, Gt. Britain, Italy, Sudan, U.S.A. and others.

REPAIRS: Good workshops for minor engine repairs. Slipway for vessel up to 600 g.r.t.

REPATRIATION: Via Asmara by chartered air-taxi, then by international flights. Or Massawa-Asmara by road, 110 km., asphalt road (daily convoy).

TIME: GMT plus 3 hours.

HOLIDAYS: January 7th (Christmas Day – Coptic); January 19th (Epiphany); March 2nd (Victory of the Battle of Adowa); March 13th (Prophet's Birthday); April 6th (Victory Day); April 23rd (Good Friday – Coptic); April 25th (Easter Sunday – Coptic); May 1st (Labour Day); September 11th (New Year's Day); September 12th (Abolition of Feudalism); September 27th (Finding of the True Cross); October 6–8th Id-al-Fatir; December 18th Id-al-Kebir and Sundays.

POLICE/AMBULANCE/FIRE: Police, Tel: 52425; Ambulance, Tel: 52234-5-6; Fire Brigade, Tel: 52220.

TELEPHONES: Possible to place telephones on board. Arranged by Agent.

SERVICES: Radar and gyro compass technician available, but special spare parts not available.

SHORE LEAVE: Crew cannot leave vicinity of Massawa without special immigration permit.

AUTHORITY: Department of Marine.

Tanker Check List

(For oil, gas and chemical tankers of 1,600 g.r.t. and over – whether fully or partly laden – including those empty but not yet degassed or purged of hazardous residues entering European Economic Community ports).

Falkland Islands

PORT STANLEY: 51.42 S. 57.51 W. (See Plan)

PORT LIMITS: West of the line joining Mengeary Point and Cape Pembroke.

DOCUMENTS:
2 Copies Crew Lists.
2 Copies Passenger Lists.
2 Copies Customs Documents.
Health Document.
Manifest and Bills of Lading.
Ship's Papers.
Ship's Certificates.

PILOTAGE: Pilotage should be requested via Cable & Wireless Radio Station. 24 hours notice of arrival required. Frequency 2182 kHz.

ANCHORAGES: For large vessels, the anchorage is somewhat confined; except S. of Navy Point, where there is good swinging room in depths of from 8.2 m. to 10.4 m. (27 ft. to 34 ft.). There is good anchorage N.N.E. of the cathedral, but, owing to the prevailing strong W. winds, a vessel may have some difficulty in turning, when leaving this position. The best time to leave is after 1800 hrs. or before 0800 hrs. as, unless there is a widespread area of bad weather over the islands, the wind, which is local, is seldom strong between these hours. The holding ground is good, and vessels have not dragged during winds of up to force 8, though a second anchor is often necessary.

The bottom of the harbour is stiff mud, which is very noisome and sticky; it is necessary to allow plenty of time for cable washing when weighing.

Several small boats, none of which exhibit a riding light at night are moored at the South side of the harbour.

RESTRICTIONS: No restrictions on entry.

RADIO: Cable & Wireless Ltd.

VHF: Port Radio, call sign "Port Control", listening on Channels 16 and 9 from 0800 – 1200 hrs. and 1315 – 1630 hrs.

RADAR: No port radar service.

TUGS: No harbour tugs.

BERTHING: Falkland Islands Company jetty with a depth of 1.5 m. at its head. T shaped Head.

Flexiport floating berth in operation.

CRANES: 1×5 ton crane.

BULK CARGO FACILITIES: None. Drummed cargoes only are handled.

STEVEDORES: 1 week's notice required. If Falkland Islands Company charter vessel (4 voyages a year) is being worked then stevedores will not be available until work on the charter vessel has been completed.

MEDICAL: Advance notice required.

TANKERS: Advance information should be sought.
Mare Harbour: Tanker mooring buoy and pipe-line in position: Lat. 51° 54.11′ S., Long. 58° 29.87′ W.

DENSITY: Full salt water.

FRESH WATER: Available at night. Delivery by direct hose. Cost £3.75 per ton +33% of the cost of the labour involved.

FUEL: Fuel is available only by special arrangement with the Ministry of Defence. Grade 47 Cetane (viscosity cSt 100° F – 1.8; s.g. at 15° C – 0.840). Delivery by lighter and pump.

FIRE PRECAUTIONS: Normal safety requirements.

CONSULS: Norwegian.

REPAIRS: Minor repairs to machinery.

DRY DOCKS: None.

SURVEYORS: Not available.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: By ship's crew.

CUSTOMS ALLOWANCES: Quantity permitted by crew is one bottle of spirits, 200 cigarettes or 1 lb. of tobacco, 6 bottles of wine, 1 case (24 cans) beer.

CARGO GEAR: There is 1×5 ton crane. Ship's gear may be used.

AIRPORT: 32 miles from Port.

TIME: GMT minus 4 hours. Summer time from October to end of March.

HOLIDAYS: Cargo can be handled on the 10 public holidays.

POLICE/AMBULANCE/FIRE: Police – 95; Fire – Exchange; Ambulance – 54.

TELEPHONES: Connection possible at rate of £30 a year.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Seaman's Book sufficient.

REGULATIONS: No particular or unusual regulations.

DELAYS: Delays may be experienced if berthing alongside only commercial jetty if firms charter vessel is being handled. Four voyages a year: – turn around 1 week.

DEVELOPMENTS: No port developments under way.

AUTHORITY: Harbour Master, Customs and Harbour Dept., Port Stanley, Falkland Is. *Tel:* 22. *Contact:* L. J. Halliday, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Faroe Islands

KLAKKSVIK: 62.14 N. 06.35. W. (See Plan)

DOCUMENTS:
One of Each:
Crew List.
Passenger List.
Custom Documents (one list crew's quantity of tobacco and spirits).
Health Document.
Manifest.
Bill of lading.

PILOTAGE: Not compulsory but available. Give ETA via Torshavn Radio, OXJ, 1 or 2 hours before arrival, and Pilot will meet vessel in Roads. International signals can always be used. VHF Channels 16, 12, and 6 in use.

ANCHORAGE: In Roads in 12 to 20 fathoms; good anchorage.

RESTRICTIONS: No restrictions upon entry.

MAX. SIZE: Up to 450 ft. length, but draft must not exceed 20 ft.

HEALTH: Pratique usually automatic.

RADIO: Torshavn Radio, OXJ, is only coast station in Faroe Isles.

TUGS: No tugs available.

BERTHING: Ships will be berthed on arrival, if ETA announced 12 hours before arrival.

New quay with depth 7.0 m. available.

STEVEDORES: Ship's Agent will arrange stevedores.

MEDICAL: Inform doctors before arrival. Hospital facilities available.

TANKERS: Only small tankers, up to 2,000 – 3,000 tons can be handled.

FRESH WATER: Available from quay. 30 t.p.h.

FUEL: Diesel oil available, usually without notice (or short notice).

GANGWAY/DECK WATCHMEN: Watchmen usually unnecessary, but available if desired.

OPENING/CLOSING HATCHES: Normally done by crew.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes. Wine and/or Spirits, 1 bottle of wine and 1 of spirits.

IDENTIFICATION CARDS: Not needed.

CONSULS: British, Tel: 5109 and 5489; Norwegian, Tel: 55018 and 55353.

REPAIRS: All types of deck and engine repairs possible. Slipways for ships up to 200 ft. length.

REPATRIATION: Small changes in crew can usually be arranged and, for example, sick seamen/fishermen are often sent home, when recovered.

AIRPORT: Nearest airport on Vagoy, about 6 hours travelling. Regular flights, 6 a week.

TIME: GMT. Permanent.

HOLIDAYS: Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police 5348; Ambulance 5464; Fire 04.

TELEPHONES: Can be arranged on board at one berthing place, at about 50.00 kr plus dues for conversations.

SERVICES: Compass adjusting, day and night.

SHORE LEAVE: Crew members allowed ashore.

DELAYS: Normally there are none.

AUTHORITY: Klakksvikar Havn, P.O.Box 26, 3870 Klakksvik.

AGENT: Christen Joensen Stengavegur, P.O.Box 179, 3870 Klaksvik, Faroe Islands. Cables Christen Joensen. Tel: Klaksvik 55922.

SOERVAAG: 62.04 N. 07.18 W.

DOCUMENTS:
Bill of Lading.
Customs Documents (including Crew List).
Ship's Certificate (stating size of ship).

PILOTAGE: Ships can call Pilot via Torshavn Radio. Pilot has good knowledge of local conditions.

ANCHORAGES: Danish Chart No. 82 (B.A. Chart No. 85) – on Soervaag Fjord – can be recommended as good. Bottom gravel.

RESTRICTIONS: Difference between high and low water up to 2 m. on Spring tide and up to 1 m. on Neap tide.

MAX. SIZE: Largest vessel reported in Soervaag was 12,000 d.w.t. tanker. Harbour about 150 m. long and formed with one long pier and another one stretching from it. Depth at pier 8 m. Pier runs N.E./S.W. Max. draft permissible 26 ft.

HEALTH: Ships coming from countries having epidemic-disease have to fly the flag "Q". No persons allowed connection with shore, before official doctor given Free Pratique. Doctor comes from Midvaag or Wesmannahavn and can be at Soervaag in half hour.

RADIO: Only civilian radio on Faroe Islands is Torshavn-Radio (Int. call sig.: OXJ) via this radio ships can call for medical assistance and weather forecast. These 2 services are free. All traffic to Faroe Islands via Torshavn-Radio.

TUGS: No actual tugs can be obtained, but many small vessels which can be used as tugs.

BERTHING: Captains should take care when berthing not to come on to East side of pier – owing to very low water.

STEVEDORES: Arranged through Agent.

MEDICAL: Hospital in Torshavn with all facilities.

TANKERS: Ordinary pier also used by tankers, size of load/discharge-lines: 3 in. and 6 in.

FRESH WATER: Ships can obtain fresh water direct from pier.

FUEL: Marine diesel fuel; turbo-jet A1–100; gasoline-petroleum.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: Tobacco, each crew member is allowed to have 200 cigarettes or 250 gm. of tobacco. Wine and/or Spirit, 1 litre spirits and 1 litre wine.

IDENTIFICATION CARDS: Not required.

CONSULS: Belgium, Finland, Greece, Iceland, Norway, Spain, U.K., Germany F.R., Brazil, France, Netherlands, Italy, Portugal, Sweden.

REPAIRS: Small deck and engine repairs carried out.

DRY DOCKS: On Skaalefiord, dry dock up to 1,500 d.w.t.

REPATRIATION: Can be arranged.

AIRPORT: Faroe Island has 1 airport – only 3 km. from Soervaag. Flights 6 times a week to Copenhagen, and weekly services to Glasgow.

TIME: GMT. Summertime from last Sunday in March to last Sunday in September.

HOLIDAYS: Same as Denmark. Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police Tel: 33448; Ambulance Tel: 326011. Fire Tel: 000.

TELEPHONE: Telephones can be placed on board.

SHORE LEAVE: Crew members are allowed ashore.

SERVICES: Compass adjusting only.

REGULATIONS: Per ordinary regulations in Danish Ports. Harbour dues to be paid before ship's departure.

DELAYS: Usually none.

AUTHORITY: Harbour Master, Soervaag 3867, Faroe Islands. *Tel:* Office 32046. Residence 32283.

TORSHAVN: 62.00 N. 06.45 W.

DOCUMENTS: See "Klakksvik".

PILOTAGE: Not compulsory. Can be obtained through Torshavn Radio 2182 kHz or Channel 16 VHF (Harbour Office).

ANCHORAGES: Due South of breakwater in depths about 30 fathoms.

MAX. SIZE: Max. draft 25 ft. This is only restriction.

HEALTH: Pratique usually automatic.

RADIO: Torshavn Radio, OXJ.

TUGS: No tugs available.

STEVEDORES: Must be arranged with the Agent.

FRESH WATER: 100 t.p.h., by pipe-line.

FUEL: All kinds of fuel at 100 t.p.h.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: Tobacco (1 carton); 1 litre of spirits or 2 litres of wine.

IDENTIFICATION CARDS: Not required.

REPAIRS: All kinds are possible.

DRY DOCKS: Slipway for vessels up to 1,000 tons.

REPATRIATION: Can be arranged.

AIRPORT: Regular airlines, 2 hours by car from Airport.

TIME: GMT. Summertime GMT plus 1 hour (late March – late September).

HOLIDAYS: Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Police, 11448; Ambulance, 13540; Fire, 000.

TELEPHONES: No facilities.

SERVICES: Compass adjusting only.

SHORE LEAVE: Allowed.

AUTHORITY: Torshavnar Havn, Torshavn, Faroe Islands. *Tel:* 1-1762. *Contact:* Hogni Mohr.

TRANGISVAAG: 61.33 N. 06.50 W.

DOCUMENTS:
1 Crew List.
1 Passenger List.
1 Bill of Lading.
1 Bonded Store List.

PILOTAGE: When Pilot required pre-arrange with Agent by telegram or telephone, 2 hours notice ETA wanted. Pilot boat is local fishing-boat, usually boarding vessel at harbour entrance.

ANCHORAGES: Safe sheltered harbour up to 30 fathoms deep along the entrance transit bearing. Vessels anchor 1 cable offshore in 8 fathoms, clay bottom.

RESTRICTIONS: Vessels may enter harbour day and night.

MAX. SIZE: Vessels may berth with draft up to 7 m.

HEALTH: Pratique granted if no contagious illnesses aboard and all arrival formalities accomplished by the boarding officials.

RADIO: Torshavn Radio, call signal OXJ, 24 hours service, listens 2482 kHz, replies and transmits traffic on 1778 kHz, traffic lists on 1778 kHz 35 minutes past each even hour. VHF service: Channel 16 (156.80 MHz) Channel 26 (161.90 MHz). All ETA messages, etc. must be routed through Torshavn Radio.

TUGS: None; if required local fishing-boats are capable to act as tugs.

BERTHING: Tveraa at Northern side of fjord. Outer side of quay 280 m. length and 20/21 ft. alongside. Inner side length 170 m. and 15 ft. alongside. Quay is for general cargo, fish and salt.

Harbour basin length 58 m., depths 7 ft. to 18 ft. alongside.

Drelnes on South side of fjord. Quay length 89 m. Depth alongside outer side 23 ft.; inner side length 43 m. depth 22 ft.

STEVEDORES: In order to enable Agent to arrange gang important obtain in good time accurate ETA from vessel. Work normally not carried out on Sundays.
MEDICAL: Advance notice to Agent preferable, good hospital facilities for both surgery and medicine.
DENSITY: 1024.
FRESH WATER: Water available at main quay, rate 50 t.p.h.
FUEL: Diesel gas oil available, 50 t.p.h., no advance notice required.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close hatches.
CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarettes or 200 grams tobacco out of Bond. Limited quantity wine and spirits.
IDENTIFICATION CARDS: Not needed.
CONSUL: Spanish Vice-Consul.
REPAIRS: Local marine repair companies can undertake all repairs of general nature to deck, engines, hull, electric and radio equipment, etc. Slipway available for small vessels.
REPATRIATION: May be arranged by sea or air.
AIRPORT: (Vagar) Served by regular airlines, located 50 miles from Trangisvaag.
TIME: GMT, no alterations during the year.
HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Christmas Day; Second Christmas Day; work not carried out these days.
POLICE/AMBULANCE/FIRE: Police Tel: 10 and 53; Ambulance 134; Fire 159.
TELEPHONES: Usually not placed aboard, but can be arranged.
SHORE LEAVE: Allowed.
SHIP SUPPLY SERVICE: Contact Vaktar-OE Bjargin-Gartenastan, Torshavn, Faroe Islands.
DEVELOPMENTS: New quay under construction as extension of existing quay.
AUTHORITY: Tvoroyrar Havn, 3880 Tvoroyri, Faroe Islands. *Tel:* 71055. *Contact:* Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Fiji Islands

LABASA: 16.26 S. 179.22 E.

SHIPMASTER'S REPORT: January 1983.

PORT LIMITS: Port limit is up to the entrance of Mali Passage.

DOCUMENTS:

1 Crew Personal Property Declaration.
8 Crew Lists.
5 Passenger Lists.
4 Stores Lists.
3 Parcels Lists.
4 Maritime Declarations.
3 Form 'D' Regulation 46.
Maritime Declaration of Health.
1 Vaccination List.
1 Copy Fiji Quarantine Ordinance cap–92.

PILOTAGE: Compulsory. Agent arranges booking for Pilot. Pilot boards at entrance to Mali Passage from 30 ft. long, white hulled boat (no flag). Docking/undocking carried out during daylight hours only. Pilotage is also available for inshore passages to Suva, Lautoka, etc. Reef navigation is carried out by Pilots during daylight hours only.

ANCHORAGES: Safe anchorage is available only after passing Mali Passage; about 6 miles to the S.E.

If vessel arrives early, she can drift safely about 20 miles N.N.W. of Mali Passage.

RESTRICTIONS: Docking/undocking only during daylight hours. Max. draft 10.5 m.

MAX. SIZE: LOA 174 m., draft 10.5 m. Max. shipment available 27,000 tonnes as this is the max. storage capacity at Labasa.

HEALTH: Anti-malarial squad boards vessel with Pilot. They inspect and spray the vessel; only then is Pratique granted.

If vessel is coming from a "Malaria Infested" region, spraying is done twice daily during the vessel's stay in port.

TUGS: None available. 2 mooring boats are used for taking lines ashore.

BERTHING: *Malau Wharf:* Length 150 m., depth alongside 11 m. Vessel berthed starboard side to, using 1 head/sternline, 2 breastlines and 1 spring at each end.

As the sugar loader is fixed, this mooring system enabled vessel to shift fairly easily when loading in different hatches.

Caution must be exercised while docking, undocking and shifting to avoid contacting the middle piled dolphins of the wharf, as they are unfendered and non-loadbearing.

No tidal restrictions for wharf or port.

BULK HANDLING FACILITIES: Raw bulk sugar: 400 t.p.h./24 hours a day.

MEDICAL: Facilities available in local hospital and from private practitioners.

DENSITY: 1024.5.

FRESH WATER: Not available.

FUEL: Available at Suva only. Very expensive.

SURVEYORS: Pilot carries out hatch inspection prior to loading.

GANGWAY/DECK WATCHMEN: None.

HATCHES: Attended to by crew.

AIRPORT: Local airport with connections to Suva and Lautoka.

HOLIDAYS: Most of the population is of Indian descent, hence some Indian holidays observed.

TELEPHONES: No telephone provided for berth.

DELAYS: Normally 12 hours documentation time (non-laytime) after completion is provided for in the Charter Party; which may not be necessary.

GENERAL: *Exchange Rate:* 1 Fiji $ = US$ 0.95, can be changed at bank only.

Communications: Well connected via Suva. Telexes can be sent via Suva or Lautoka, by telephoning Agent's office there.

Formalities, Clearance, etc: Labasa is not a 'Port of Entry' (about 2 vessels per month call here). Pilot, Agent, Surveyor, Customs, Immigration, Agricultural Inspector, Malaria Prevention Squad, etc., all have to come from Suva or Lautoka. Customs Officer *only* stays on board the vessel until departure.

Pilferage: None reported.

Bonded Stores: Not available.

Provisions: No shipchandler. Fresh fruit, vegetables, etc., are available at reasonable prices from the local market, about 8 miles from the wharf.

AUTHORITY: See "Suva".

LAUTOKA, (Vuda Point): 17.36 S. 177.26 E. (See Plan)

DOCUMENTS/HEALTH: Refer to "Suva".

PILOTAGE: Not compulsory at present. However, most vessels avail themselves of a Pilot, who boards at Navula Passage, 20 miles South of Lautoka. Masters should telegraph to their Agents ship's ETA at Navula and indicate whether they require a Pilot or not at least 24 hours in advance.

Note: Radio communications with Fiji can be difficult and Masters are advised that telephone or telex messages worked via New Zealand or Australia direct to their Agents are far more reliable.

The Pilot normally boards from a 26 ft. wooden launch, blue hull with white superstructure, buff cabin top with orange liferaft on forward cabin. The pilot vessel can be contacted on VHF 16/6. Listening watch only when vessels are expected. Pilot normally boards 1 mile seaward of the passage on the leads. In heavy weather it may be necessary for a vessel to enter the passage to embark the Pilot. There is no anchorage outside the passage.

Vessels requiring Pratique should anchor approximately 1 mile to the Westward of Vio Island in Lautoka Harbour. If prior arrangements have been made through Agent, Health Officers may board inside Navula (The Health Officers inspect vessels only from 1 hour after sunrise to 1 hour prior to sunset). The Pilot for those vessels not employing one from Navula but requiring a Pilot for berthing will board at the Quarantine Anchorage off Vio Island.

ANCHORAGES: The whole of the area enclosed by a circle of diameter approximately 1 mile between Vio Island and Pinder Reefs is an acceptable anchorage with depths ranging from 9 to 13 fathoms.

MAX. SIZE: Minimum depth in approaches to wharf 32 ft., depth alongside 36 ft. Generally speaking, any vessel not exceeding 32 ft. draft can be accommodated. Main wharf is only 457 ft. long but overhangs are allowable, ("Oriana" LOA 804 ft., berths at Main Wharf), dolphins for mooring lines being situated off each end of the wharf. Range of tide approximately 5.5 ft. at Springs and 3 ft. at Neaps, but state of tide does not affect the foregoing.

At Vuda Point, the tanker berth of Lautoka, tankers in the 18,000 to 24,000 d.w.t. class can be handled. This is a submarine pipe-line installation, the ship mooring to 4 buoys, available depth being about 36 ft.

VHF: Port Control on Channels 12 and 16 during normal office hours.

TUGS: No tugs available. Can be obtained from Suva if reasonable notice is given.

BERTHING: Berthing and unberthing at Vuda Point only in daylight. Berthing at Lautoka is at discretion of Harbour Master or Pilot, but in normal conditions is effected at any hour of day or night.

Berthing in Lautoka is generally effected port side to.

Wharf	*Length*	*Depth*
Queens West	457 ft.	36 ft.
Queens North	257 ft.	24 ft.
Queens East	423 ft.	12 ft.
*F.S.C.	577 ft.	32 ft.

*Bulk sugar loading installation for Fiji Sugar Corporation Ltd.

FUEL: Diesel fuel is available at the North and East berths on Queens Wharf.

FRESH WATER: Fresh water is available at all berths, there may be some restrictions in the dry season.

TANKERS: See "Max. Size". No slop discharge facilities. Discharge line 8 in. diameter.

DENSITY: 1025.

CONSULS: None.

REPAIRS: Only comparatively minor repairs can be effected such as welding jobs and repairs to pumps and other auxiliaries.

SURVEYORS: Not available.

REPATRIATION: Repatriation can be effected through vessel's Agents.

AIRPORT: Nandi International Airport is 16 miles from Lautoka. Frequent flights to all parts of the world by several major airlines operating through Nandi.

TIME: GMT plus 12 hours. No alterations to clocks.

HOLIDAYS: *Public holidays:* New Year's Day, Good Friday, Easter Saturday, Easter Monday, Queen's Birthday, Bank Holiday, Fiji Day, Deepwali, Prince Charles' Birthday, Prophet Mohammed's Birthday, Christmas Day, Boxing Day.

POLICE/AMBULANCE/FIRE: Dial 000 in emergency. Police, 60222; Ambulance, 60399; Fire, 60211.

SERVICES: Tank-cleaning labour and labour for painting, chipping, etc. can be provided, but no equipment. No facilities for discharge of slop tanks etc. Compass adjustments can be arranged.

Telephone connection on wharf (3 lines). Police post on wharf.

AUTHORITY: Ports Authority of Fiji, G.P.O. Box 780, Suva, Fiji. *Tel:* 62160. *Telex:* FJ 2203. *Cables:* Pafiji Suva. *Contact:* Isimeli Bose, Director General.

LEVUKA: 17.41 S. 178.51 E. (See Plan)

DOCUMENTS:

Goods carried in unregistered space (C.E. 148) (1 only).
List of articles in possession of Crew, Officers and Master (1 only).
Crew List (8 only).
Passenger List (8 only).
Parcel List (2 only).
Primary Health Report (1 only).
Special Malaria Forms (1 only).
Vaccination Certificates (1 for each person).
Derat Certificates (1 only).

PILOTAGE: Pilots are arranged through Agents.

MAX. SIZE: Length 560 ft. Max. draft 25 ft.

HEALTH: Radio Pratique may be granted when any vessel has not visited any malarious port and Master declares that crew and passengers are healthy and vessel has not come from any area where internationally quarantinable diseases are endemic or in epidemic. Vessel may then enter port by day or night. On berthing, Master must immediately deliver to Quarantine Officer fully completed Primary Health Report and Derat or Derat Exemption Certificate. If there is any suspected case of disease or fever on board, vessel must be anchored at Quarantine Anchorage until cleared by Port Medical Authority. Pratique is automatic if a vessel has been granted Pratique at another port in Fiji.

TUGS: No tug service available.

BERTHING: Only 1 vessel berthing at a time.

Berthing in Levuka is generally effected starboard side to, outside Queens Wharf. Both dry cargo vessels and tankers use the one berth available for overseas shipping at Levuka.

Wharf	*Length*	*Depth Alongside*
Outer Face	255 m. (837 ft.)	7.9 m. (26 ft.)
Inner Face	208 m. (683 ft.)	6.7 m. (22 ft.)

STEVEDORES: Estimated time of arrival of any vessel and tonnage of cargo to be discharged should be received at least 24 hours from time of arrival.

MEDICAL: Normal hospital facilities are available. Specialist services not available but can be arranged for within 24 hours. Cholera and yellow fever valid Vaccination Certificates are required to be held by ship's crew and passengers, except those coming from New Zealand, Australia, Kiribati, Tuvalu, Tonga or Samoa.

TANKERS: Load and discharge lines 8 in. steel pipe. 1 berth only.

DENSITY: 1025.

FRESH WATER: Available only during normal working hours, which is from 0600 to 1600 from Monday to Thursday, and Friday up to 1500. Rate of delivery of water is about 15 t.p.h.

FUEL: Light marine diesel only – viscosity kin. at 100°F. = 3.4.

FIRE PRECAUTIONS: Bunkering only permitted during period between sunrise and sunset.

GANGWAY/DECK WATCHMEN: Services of watchman highly recommended to stop unauthorised persons from going on board.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CUSTOMS ALLOWANCES: All crew and Officers will be issued with 25 cigarettes per day. A maximum of 4 days' allowance may be given at any one time. Cigars or tobacco may be taken in lieu of cigarettes. Masters and other Officers may be allowed to keep in their possession small quantities of liquor.

Daily allowances: Spirits, 1 reputed quart to Master; 0.25 reputed quart to other Officers; Beer, 2 reputed quarts to Master; 2 reputed quarts to other Officers.

IDENTIFICATION CARDS: Not compulsory.

CONSULS: None.

REPAIRS: Minor engine repairs are possible, but deck and major engine repairs could be carried out at Port of Suva, which is about 57 miles away.

REPATRIATION: Facilities exist for repatriation.

AIRPORT: Is situated on island of Viti Levu and the distance is about 200 miles. It is served by regular airlines (international). Connections twice daily from local airport, 12 miles from port.

TIME: GMT plus 12 hours.

HOLIDAYS: Working of cargo is not permitted on Sundays, Good Friday and Christmas Day. Application to work on Sundays to be made to the Ports Authority of Fiji at Levuka.

Public Holidays: See "Lautoka".

POLICE/AMBULANCE/FIRE: Police, 44222; Ambulance, 44015; Fire, 44014.

TELEPHONES: Arrangements may be made with Postmaster for installing telephone on board.

GENERAL: Rat guards must be affixed to all shore moorings or cables greased when alongside to prevent the advent of rats.

SHORE LEAVE: All crew members are allowed shore leave unless there is a special restriction from any Government authorities.

DELAYS: No berthing at night (lines cleared by Quarantine Authorities). Bunkering from sunrise to sunset. No loading or discharge during rain.

AUTHORITY: Port Authority of Fiji, G.P.O.Box 780, Suva, Fiji. *Tel:* 44189. *Telex:* FJ 2203. *Cables:* Pafiji Suva. *Contact:* Isimeli Bose, Director General.

SUVA: 18.08 S. 178.26 E. (See Plan)

PORT LIMITS: A vessel is considered to be an "arrived vessel" having passed the West Reef Beacon at the entrance to Suva Harbour.

DOCUMENTS:

1 Last Port of Clearance Certificate.
2 Declaration of Nett and Unregistered Tonnage form.
8 Passenger Lists.
8 Crew Lists.
6 Stores Lists (for high duty goods).
Passenger liners are required to submit Transit Passenger Lists and also a letter of Guarantee from Master.
Vaccination Certificates for Passengers and Crew.
Derat Certificates.

PILOTAGE: Arranged through vessel's Agents. 24 hours notice of ETA with confirmation 12 hours before arrival. Suva Harbour Control should be contacted on VHF Channels 16 and 20 when within range. Pilot vessel is a white clipper bow launch with word "Pilot" in black on each side and will leave wharf 30 minutes before signalled ETA of vessel. Pilots board on leads 5 miles from front lead. Vessels may stand in on leads to meet pilot vessel. Vessels are advised to provide 2 manropes for pilot ladder which will usually be required on the port side. No anchorage for vessels awaiting a Pilot.

ANCHORAGES: Safe anchorage may be found in depths of 10 to 20 fathoms within the harbour. Holding is good, mud bottom.

RESTRICTIONS: Vessels may enter at any time of day or night.

MAX. SIZE: No length or draft limitation for conventional vessels entering port. Largest vessel regularly entering is 42,000 tons.

HEALTH: Health authorities require that vessels cable details of ports visited within 50 days of ETA. Radio Pratique will be granted to vessels which are healthy and have not visited a port in a malarial area within 50 days. Health authorities board and inspect any vessel which has visited a malarial port within 50 days and will spray any vessel which has visited a malarial port. Vessels arriving from malarial areas are not permitted to berth during hours of darkness. Authorities board from a launch as vessel enters harbour. Quarantine Officer will sight Maritime Declaration of Health and Derat Certificate on boarding. No further Pratique formalities are required in Fiji ports other than first port of entry.

RADIO: Suva Radio, call sign 3 DP. 500 kHz., 24 hours listening watch.

VHF: Port Control maintains a 24-hour port radio control watch at Suva on VHF Channels 16 and 20. The call sign is "Suva Harbour Control".

TUGS: One tug available – 1,125 h.p. Compulsory for vessels of 3,000 g.r.t. and upwards.

BERTHING: Vessels berth port or starboard side to King's Wharf or port or starboard side to Walu Bay Wharf as may be necessary. King's Wharf is 495.0 m. in length, having a least depth alongside of 11.6 m. at MLWS at the North end and 10.6 m. at the South end, whilst Walu Bay Wharf is 183.0 m. in length, having a least depth alongside of 9.0 m. MLWS. Ro/Ro cargoes handled.

Vegetable Oil: Vessels loading vegetable oils berth at Walu Bay or North King's Wharf.

LPG Carriers: Berth North King's Wharf or Walu Bay.

Equipment: 1 × 10 ton crane. Fork lift trucks 2.5 tonnes – 25 tonnes capacity.

STEVEDORES: Arranged by ship's Agents.

Working Hours:

Day Shift:	0800 – 1300 hrs.	: 5 hours
	1300 – 1400 hrs.	: unpaid meal break
	1400 – 1600 hrs.	: 2 hours
		7 hours
Afternoon Shift:	1600 – 2100 hrs.	: 5 hours
	2100 – 2200 hrs.	: unpaid meal break
	2200 – 2400 hrs.	: 2 hours
		7 hours
Night shift:	2400 – 0500 hrs.	: 5 hours
	0500 – 0600 hrs.	: unpaid meal break
	0600 – 0800 hrs.	: 2 hours
		7 hours

MEDICAL: Advance notice of medical assistance is desirable. Hospital facilities available. Current international vaccination certificates required.

TANKERS: Discharge lines 8 in. diameter. Tankers discharge at King's Wharf, North and South Berths. Depths alongside 42 ft. No residue discharge facilities.

DENSITY: Salt water, density 1025 approx. No tide effect on density.

FRESH WATER: Available at all berths. Delivery rate 30 t.p.h. per hose. Hose diameter 75 mm.

FUEL: Furnace fuel oil, diesel fuel oil, gas oil available by prior arrangement through oil company.

GANGWAY/DECK WATCHMEN: Employment of deck/gangway watchmen is recommended and normally provided by ship's Agents.

OPENING/CLOSING HATCHES: Normally opened and closed by stevedore labour but crew may be employed at Master's discretion.

CERTIFICATES:

Load Line.
Certificate of Registry.
Safety Equipment Certificate.
Radio Certificate.
Derat Certificate.
Maritime Declaration of Health.

CUSTOMS ALLOWANCES: 1 oz. tobacco per man per day. No alcohol.

IDENTIFICATION CARDS: Not compulsory.

CONSULS: *Diplomatic Heads of Missions Resident in Fiji:*

Australian High Commissioner	H.E. Mr. J. Herder
British High Commissioner	H.E. Mr. Roger A. R. Barltrop
French Ambassador	H.E. Mr. D. Dupont
Indian High Commissioner	H.E. Mr. C. P. Ravindranathan
Japanese Ambassador	H.E. Mr. K. Yoshida
New Zealand High Commissioner	H.E. R. Gates
Papua New Guinea High Commissioner	H.E. Mr. E. Lalatute
Ambassador for the People's Republic of China	H.E. Mr. J. Chaozho
Tuvalu High Commissioner	H.E. Mr. F. Tipu
United States Ambassador	H.E. Mr. C. E. Dillery
Malaysian Ambassador	H.E. Mr. Abdul Karim Bin Marzuki
South Korean Ambassador	H.E. Mr. Sung Kwoo Kim

Consular Representatives in Fiji:

Denmark	Mr. A. Dickson
Finland	Mr. S. L. Christian
Italy	Mr. R. M. Warner
Nauru	Mr. D. Gataraoa
Netherlands	Mr. R. J. Woodman
Norway	Hon. Senator Sir Robert L. Munro
Pakistan	Mr. Rahim Zullah
Philippines	Mr. Abdul Lateef
Sweden	Mr. Aminiasi Katonivualiku

REPAIRS: Engine and deck repairs may be carried out at local machine shops. 3 slipways for vessels up to 1,000 tonnes.

REPATRIATION: Facilities exist for crew changes and repatriation.

AIRPORT: 15 miles to Nausori (Suva) Airport, serving Pacific Islands on weekly basis. Numerous daily flights to Nandi International Airport.

TIME: Local time is 12 hours ahead of GMT.

HOLIDAYS: See "Lautoka".

Cargo is not worked on Public Holidays.

POLICE/AMBULANCE/FIRE: Police, 311222; Hospital, 313444; Ambulance, 312439; Fire, 22688; Emergency, 000 for any of the above services.

TELEPHONES: Telephone connections to ships are provided.

SERVICES: Compass adjusting may be carried out.

SHORE LEAVE: Allowed.

DELAYS: Delays are not usual except for rain during hurricane season from November to April.

AUTHORITY: Ports Authority of Fiji. G.P.O.Box 780, Suva, Fiji. *Tel:* 312700. *Telex:* FJ 2203. *Cables:* Pafiji Suva. *Contact:* Isimeli Bose, Director General.

OUT PORTS OF SUVA: Customs and Pilot are embarked at Suva or Lautoka.

Ellington: Lat. 17.20° S., Long. 178.14° E. Private wharf for loading sugar and molasses from Raki Raki Mill.

Naikorokoro: North Coast of Kandavu. Anchorage for loading sawn timber.

Savu Savu: Lat. 16.47° S., Long. 179.21° E. Government wharf for local coast trade and anchorage for cruise vessels.

Vatia Point: Lat. 17.25° S., Long. 177.46° E. Private wharf for discharging explosives and fuel to gold mines.

NOTES

Finland

EKENAS/TAMMISAARI (Including Skogby): 59.58 N. 23.26 E.

DOCUMENTS:
International or Finnish Measurements Certificate.
1 Personal Effects List.
1 Ship's Provisions List.
2 Crew Lists (passengers to be included).
1 Customs Declaration (official forms supplied by the Customs Authorities).
4 Manifests.
2 Bills of Lading.

PILOTAGE: Pilots for Ekenas/Tammisaari applied for at Hango Pilot Station by approaching pilot station outside Hango/Hanko, where pilot boat will meet vessel right outside pilot station.

Telegram address: Hango Pilot.

MAX. SIZE: Max. draft 15.1 ft. (4.6 m.). No other restrictions. At Skogby, draft up to 24 ft. – No tide.

RADIO: Hanko Radio, Call sign OFI.

TUGS: Normally no tugs stationed at Ekenas but can be arranged from Koverhar or Hanko (12 nautical miles and 20 nautical miles from Ekenas respectively).

BERTHING: Two quays at Ekenas: "Trakajen", length about 160 ft.; "Stenkajen", length about 500 ft.

3 mobile cranes, capacities 27, 36 and 56 tons are available. Two of the mobile cranes are equipped with grabs suitable for discharging of bulk cargoes such as coal, coke, china clay, ball clay, salt and grain.

Situated about 6 nautical miles from Ekenas is Skogby Sawmill Quay. Depth alongside and in channel 24 ft. Skogby Sawmill exports packed sawn goods and chipboard, mainly to U.K. Mobile cranes available. Largest vessel 17,900 d.w.t., LOA 165 m. Fresh water available. Working hours 0700 – 1600.

STEVEDORES: ETA to be given to Agent 1400 hrs. Finnish time on the day before arrival in order to prepare loading/discharging (Stevedore: J. A. Westerlund).

Working Hours: Normal working hours are Monday to Friday 0700 – 1600. Daily overtime can normally be arranged for up to 4 hours (1600 – 2000). All overtime is, however, voluntary.

MEDICAL: Hospital treatment can be arranged when needed.

DENSITY: 1001.

FRESH WATER: Fresh water is delivered to the ship's side by means of hose in summertime. Also at Skogby.

FUEL: Bunkering available at Ekenas by means of tank trucks.

CUSTOMS ALLOWANCES: 200 cigarettes permitted for each crew member. 1 open bottle of 1 litre wine or spirit is allowed for each crew member over 18 years of age.

REPAIRS: Minor electrical and deck repairs may be carried out.

AIRPORT: Nearest airport is Helsinki Airport, situated about 100 km. from Ekenas.

HOLIDAYS: On Saturdays and days preceding Church holidays, the eve of Independence Day, the day preceding May Day, on Whitsun Eve and on New Year's Eve the working day consists of four working hours, starting from 0700 hrs. or 0800 hrs. and lasting to 1100 hrs., or 1200 hrs. respectively without break for meals. May Day, Independence Day, (6th December), Easter Saturday, Midsummer Eve and Christmas Eve are considered as labour free days.

POLICE/AMBULANCE/FIRE: Police, Tel: 000; Ambulance, Tel: 000 or 14100; Fire, Tel: 000.

TELEPHONES: There are no arrangements for placing telephones on board the vessel but telephone calls can be made from the Harbour Constable's Office.

SUPPLIES: Ship stores and provisions can be ordered from Hango through Agent.

SHORE LEAVE: Shore leave allowed for crew members.

IDENTIFICATION CARDS: Not needed.

OPENING/CLOSING HATCHES: Normally carried out by crew.

AUTHORITY: Hamnkontoret i Ekenas, Postbox 52, SF-10601 Ekenas. *Tel:* 911 – 12364. *Telex:* 13 – 121 Sbrok Sf. *Contact:* Rolf Artzen, Harbour Master.

HAMINA: 60.34 N. 27.11 E. (See Plan)

PORT LIMITS: A vessel is considered to be an "arrived vessel" subject to Charter Party Terms, when arrived at roads.

DOCUMENTS: Normally required:
1 Crew List.
1 Passenger List.
3 Manifests.
1 Bill of Lading of each consignment.

Customs Documents:
1 Special List (personal effects).
1 Provision List (Ship's Articles).

Ship's Papers Required:
Safety Equipment Certificate.
Radio Safety Certificate.
Construction Certificate.
International Tonnage Certificate.
International Load Line Certificate.
Certificate of Registry.
Tonnage Dues and Ice Dues Certificates if vessel called previously.

PILOTAGE: Sea Pilot boards at Orrengrund. Fairway 33 miles from Orrengrund to Hamina, depth 9.0 m. New Fairway 38 miles long, depth 10.0 m. VHF radio telephone Channel 16; pilot boat: hull red, superstructure yellow. Vessels coming from Eastward can take Pilot at Haapasaari (Aspo), but must order Pilot by radio via Coast Radio Station at least 6 hours before ETA Haapasaari.

Harbour Pilotage: Harbour Pilot takes over at Roads. Harbour pilot boat: hull black, superstructure yellow, word "Pilot" painted with black letters. Harbour pilotage optional.

ANCHORAGES: 2 anchorages with good holding grounds at Roads.

RESTRICTIONS: Usually no restrictions. Max. draft 10.0 m. Port open throughout year.

MAX. SIZE: Draft is governing factor. No tide but prolonged Easterly winds can cause lower water level, which must be checked before entering berths.

HEALTH: Bill of Health not required. In case suspected disease or fever on board, doctor to be contacted, preferably via Agent, by radio before arrival.

RADIO: Vessels in Baltic Sea usually contact Helsinki Radio/OHC, A1 and OHG, A3. VHF Channels 16 and 26. Vessels in Eastern part of Gulf of Finland contact Kotka Radio/OHF, A1 and OFU, A3. VHF Channels 16, 25 and 27.

RADAR/VHF: There is no land radar service. Harbour is equipped with VHF radio telephone, Channels 16 and 12. Also see "Radio".

TUGS: Join vessels at Roads. Ship's lines usually used.

BERTHING:

Quay	*No.*	*Draft* (m.)	*Length* (m.)
Coal Quay		6.9	345
Lakulahti (L)	L1 – 2	8.6	216
	L3 – 8	7.9	591

Coal Quay	3	5	
	2	6.5	
	7	5 – 36	mobile
Hiirenkari Quay	1	33	container

STEVEDORES: ETA is expected in good time before arrival.

MEDICAL: Advance notice helpful but not compulsory. Hospital facilities available at town.

TANKERS: Possibility to discharge oily water ballast.
Also see "Berthing".

DENSITY: 1003.

FRESH WATER: Available at majority of quays; elsewhere supplied by boat.

FUEL: Fuel and diesel oils available at short notice. Delivery by tank truck.

GANGWAY/DECK WATCHMEN: Shore watchmen available, Sundays and holidays 100% extra.

OPENING/CLOSING HATCHES: Crew close automatic hatch covers. Hatches to be covered manually are usually covered by stevedores.

CUSTOMS ALLOWANCES: Tobacco: Master 200 cigarettes or 200 grams tobacco. Others, 100 cigarettes or 100 grams tobacco. Wine and/or Spirit: Master, 3 bottles wine or spirits. Others, 1 bottle.

CONSULS: Denmark, Netherlands, Norway, Sweden, United Kingdom.

REPAIRS: Minor repairs effected.

REPATRIATION: There are facilities for repatriation.

AIRPORT: Helsinki Airport, distance 145 km. Regular flights.

TIME: Local time is GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: New Year's Day (Jan. 1); Epiphany (Jan. 6); Good Friday; Easter Monday; Labour Day (May 1); Ascension Day; Whit Monday; Midsummer Day; All Saints' Day; Independence Day (Dec. 6); Christmas (Dec. 25 and 26); Midsummer's Eve.

POLICE/AMBULANCE/FIRE: Police 1; Ambulance 1; Fire 000.

TELEPHONES: None available for placing on board.

REGULATIONS: Regular terminal vessels have preference at certain berths.

AUTHORITY: Port of Hamina Authority, PL 14, SF-49401 Hamina. *Tel:* 952-54940. *Contact:* Tapio Mansikka, Harbour Master. S. Vaulo, Port Director.

HANKO: 59.49 N. 22.58 E.

DOCUMENTS:

Ship's Register.	Bills of Lading.
Crew List.	Provisions List.
Manifests.	Health Certificate.

PILOTAGE: Compulsory, distance from sea to port is 6 miles. Pilot boat painted red, arriving outside Russaro called by radio via Hanko Radio or by flag, sound or Morse: "G".

ANCHORAGES: Inside Gustavsvarn.
RESTRICTIONS: Draft 26.5 ft., length/breadth no restriction; no tide.
RADIO: Cable Agents giving ETA via Hanko or Helsinki Radio.
RADAR: At pilot station; service for ships entering port, contact by ship's radio.
TUGS: In Winter harbour tug assists ships to and from the quay.
BERTHING: Quay height about 6 ft. above sea level. Shore fenders keep vessel about 2 ft. off quay. Special quays for Ro/Ro traffic.

Quay	*Permitted draft in feet*	*Length of quays metres*

Free Harbour: One mobile crane, lifting capacity 40 tons. 21 fork lift trucks available.
STEVEDORES: Ordered by Agents.
FRESH WATER: Delivered from shore installations during daytime. Rate of delivery about 20 t.p.h.
FUEL: Delivered by rail cars only.
DENSITY: 1005.
WATCHMEN: Available but not compulsory.
HATCHES: Crew allowed to open and close hatches.
CUSTOMS ALLOWANCES: No restrictions in the Free Port, outside about 200 cigarettes and limited amount spirits per man.
IDENTIFICATION CARDS: Not required.
CONSULS: Denmark, Iceland, Netherlands, Norway, Spain, Sweden.
REPAIRS: Small repairs possible.
SURVEYORS: Surveyors and cargo inspectors available.
TIME: Local time GMT plus 2 hours. GMT plus 3 hours in Summer.
POLICE/AMBULANCE/FIRE: Police 003; Fire 005; Ambulance 82228.
STORING: Storing possible by barge or truck. Fork lift trucks and riggers available.
AUTHORITY: Port of Hanko, Bulevardi 15, 10900 Hanko. *Tel:* (911) 83131. *Contact:* Tom Luoma, Port Director, *Tel:* (911) 81217.
Harbour Master, *Tel:* (911) 81201.

HELSINKI: 60.10 N. 24.57 E. (See Plan)

DOCUMENTS: See "Oulu".
PILOTAGE: Compulsory. ETA required 24 hours prior arrival. At present there are 5 different channels available for vessels approaching Helsinki.

1. *Helsinki Lighthouse-Harmaja-Helsinki:*

The main approach to Helsinki, this channel starts from East of the Helsinki Lighthouse, a caisson beacon on the shoals South of Helsinki, at a distance of around 22 km. from the port. It proceeds via the Harmaja pilot station and the Kustaanmiekka Strait between the islands of Suomenlinna and Vallisaari, to the open area of water beyond, known as Kruunuvuorenselka. To this point the channel is navigable by vessels drawing up to 9.6 m. The fairway branching off North of the Harmaja pilot station and leading to the West Harbour has a depth of 8.9 m. Pilots are taken on board from the station at Harmaja.

2. *Helsinki Lighthouse-Melkki-Helsinki:*

This 11 m. channel leads from the Helsinki Lighthouse to the West of the Graskarsbadan light and then between the islands of Pihlajasaari and Melkki to the West Harbour. Pilots are taken on board from the Harmaja pilot station.

3. *Porkkala-Helsinki:* (Southern Finland Winter Fairway).

The Winter fairway into Helsinki begins from roughly 8 km. West of the Porkkala Lighthouse. The channel is 10 m. deep from Sommaro, decreasing to 9 m. from Ronngrund. The fairway joins the 11 m. channel (see above) leading to the West Harbour S.W. of Katajaluoto, and joins the 9.6 m. lead to Helsinki North of Harmaja.

During the Winter season, when the passage from the Helsinki Lighthouse to Harmaja is closed owing to ice conditions, all vessel traffic into Helsinki is directed via the routes above. Pilots are taken onboard from the Porkkala pilot station.

4. *Porkkala-Helsinki:*

In addition to the above channel, there is a 7.9 m. fairway leading from Porkkala to Helsinki, which begins from roughly 1 km. West of the Porkkala Lighthouse and joins S.E. of Pihlajasaari with the 8.9 m. channel leading to the West Harbour. Pilots are taken onboard from the Porkkala pilot station.

5. *Emasalo-Helsinki:*

From the East there is a 9 m. channel leading to Helsinki through the outer islands, which joins with the main approaches to Helsinki North of Harmaja. Pilots are taken onboard from the Emasalo pilot station.

Harmaja Sea-Pilot Station: Tel. 668 122. Harbour Pilots at Harbour Office: Tel. 169-3777.
ANCHORAGES: Good anchorage available outside harbour, depth 26 ft. – 32 ft. clay bottom.
MAX. SIZE: Draft 31 ft., length no limit.
HEALTH: See "Oulu".
DIRECTION FINDING: Harmaja Radio Beacon (frequency 298.8 kHz. Signal "HA") transmits:

Non-directional radio signals, with a modulation frequency of 395 kHz. By listening to these signals with a direction finding receiver, equipped with frame aerial, a ship can determine her bearing to the beacon.

Harmaja lighthouse and Helsinki lighthouse fitted with "Racon" for 3 cm. radar (X-area).
DEPTH OF CHANNELS:
From Helsinki to East 9 m.
From Helsinki Lighthouse to Helsinki 9.6 m. and 11.0 m.
From sea South via Porkkala 9.0 m.
VHF: Harmaja Pilots, Porkkala Pilots and Port Authority call VHF Channel 16 or 13.
TUGS: Several available: charges based upon time when tug leaves station berth until moment of return to same station.
BERTHING: Port and equipment owned by Municipality of Helsinki. 5 principal parts of port are South Harbour and West Harbour, Sornainen Harbour, and Herttoniemi and Laajasalo Oil Harbours.

Foreign passenger traffic is concentrated on the South Harbour.

West Harbour handles main part of transoceanic traffic; heavy goods and container terminal in West Harbour fitted with 2 container cranes and 1 multi-purpose crane (lifting capacity of each 40 tons), also silos of 2 flour-milling plants (Vaasanmylly Oy and State Granary), into which grain discharged by suction. On silo quay pneumatic grain unloader owned by State Granary travels along 71 m. long bridge alongside ship to be unloaded. Equipment is 30 m. above quay level and range of suction pipe 11 m. from edge of quay. Unloading equipment can handle 100 t.p.h. Mass export articles such as cellulose, paper and wood goods, loaded chiefly in this harbour. In West Harbour is free-zone warehouse, which offers same privileges as free port.

The Sornainen Harbour operates mainly as a North Sea general cargo harbour. The area contains a coal harbour.

Herttoniemi and Laajasalo form the oil harbour, where the leading oil companies have oil storage tanks and their own piers.

See Table on pages 497 and 498.

BULK HANDLING FACILITIES: Specially equipped berths for handling bulk cargoes in Sornainen Harbour. Berths equipped for containers or roll-on/roll-off traffic in West Harbour (40-ton container cranes and multi-purpose crane) and Sornainen Harbour (40 ton universal crane).
STEVEDORES: 24 hours ETA required. Companies available of which 2 specialise in discharging timber and coal.

Working hours: Weekdays, 0700 – 1600 hrs. and 1600 – 2230 hrs. Saturdays, 0700 – 1500 hrs. Lunch break weekdays and Saturdays 1100 – 1130 hrs.
MEDICAL: Agents to be informed by radio if fever suspected.
TANKERS: Max. draft 9.6 m.

Herttoniemi and Laajasalo form together the oil harbour of Helsinki, where the leading oil companies have oil tanks and their own piers.

Harbour	*Quay length (m.)*	*Depth alongside (m.)*	*Depth of channel (m.)*
Herttoniemi Oil Harbour:			8.0
Oil pier	2×96	8.25	
Oljynpuristamo Co's pier	100		
Elo Co's pier	24		
Laajasalo Oil Harbour:			9.6
Shell Co's pier	32	10.0	
Esso Co's pier	30	10.6	
Neste Co's pier	58	10.2	

DENSITY: Fresh water.
FRESH WATER: Unlimited amount available by hoses from hydrants at quays.
FUEL: All grades available; any amount at short notice.
GANGWAY/DECK WATCHMEN: Recommended but not necessary.
OPENING/CLOSING HATCHES: Crew/Stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle wine or spirits each man.
IDENTIFICATION CARDS: Required.
CONSULS: All maritime countries are represented in Helsinki.
REPAIRS: All types available.

[1] Minimum depth from mean water mark to bottom.

[2] Belonging to the Helsinki Energy Board.

POLICE/AMBULANCE/FIRE: Police 002; Ambulance 006; Fire 005. General alarm 000.

TELEPHONES: Available.

SERVICES: Compasses are adjusted by competent adjusters approved by the Board of Navigation. For compass adjustment the port has constructed piles or buoys with direction markings. These appliances can be used also for radio direction-finders.

Vessels using the compass-adjustment facilities must have on board a Harbour Pilot, who is entitled to the same compensation as for harbour pilotage.

CLASSIFICATION SURVEYORS: Lloyd's Register of Shipping, Bureau Veritas, American Bureau of Shipping, Germanischer Lloyd, Det Norske Veritas.

ICEBREAKERS: During ice seasons one of the following Government icebreakers assigned to assist ships from open water to harbour area and vice versa:

	Length (m.)	*Breadth (m.)*
Varma	86.5	21.2
Apu	86.5	21.2
Tarmo	84.0	21.1
Voima	83.5	19.4
Sampo	74.6	17.4
Otso	99.0	27.2
Karhu	74.1	17.4
Hanse	74.6	17.4
Sisu	104.7	23.8
Urho	104.7	23.8

Masters should communicate with icebreakers between January and March.

AUTHORITY: Port of Helsinki Authority, Etelaranta 10, P.O.Box 26, 00131 Helsinki 13, Finland. *Tel:* 358-0-1691. *Telex:* 124913. *FAX:* 358-0-169-3773. *Contact:* Mr. Eljas Muurinen, Managing Director (*Tel:* 169 3801.) Mr. Juha Lainio, Harbour Master (*Tel:* 169 3775).

INKOO: 60.01 N. 23.55 E.

PILOTAGE: Pilot station is Porkkala pilot station. Pilotage service 24 hours a day, VHF watch on Channels 16 and 13, 24 hours a day. Notice must be given 2 hours before arrival at boarding place (Lat. 59° 54′ N., Long. 24° 12′ E.). Distance from boarding place to harbour area about 14 miles. Pilot may also be ordered by telephoning Helsinki 2984112.

APPROACHES: Max. draft 13 m., turning place for large vessels (over 200 m. LOA) is 1 mile East of harbour area.

MAX. SIZE: See "Berthing".

ANCHORAGES: 2-4 miles S.W. of Sommaro Island.

VHF: Call sign "Inkoo Harbour", watch maintained 16 hours a day on Channel 16.

TUGS: Tugs are available at any time, notice required is same as Pilot. If the vessel is over 200 m. LOA tug joins at Fagero Island about 5 miles before harbour area, otherwise tugs join at the turning place 1 mile before harbour area. Tugs use ship's lines.

BERTHING:
Oy Lohja Harbour: Max. draft 7.8 m.

Coal Quay: Length 175 m., 2 cranes, 10 tons and 6 tons by hook and half the capacity by grab.

Paper Quay: Length 140 m., mobile cranes available.

Imatran Voima Oy Inkoo Power Plant: Max. draft 13 m. and 10 m.

Total length of quay 455 m., max. draft 13 m. at the East part of the quay (240 m.), and the West part, max. draft 10 m. (length 215 m.). 3 cranes, 10 tons each by hook and half the capacity by grab, working area 410 m.

Inga Hamn – Inkoon Satama Oy: Same as the East part of Inkoo Power Plant.

FRESH WATER: Available.

DENSITY: 1004.

DEVELOPMENTS: Dredging underway.

AUTHORITY: *Oy Lohja Harbour:* Oy LK-Shipping AB, 10210 Inkoo, Finland. *Tel:* (International) 3580218121. *Telex:* 1418 Lkin Sf. *Cables:* Elcoy. *Contact:* Rolf Danielsson.

JAKOBSTAD (Alholmen): 63.42 N. 22.42 E. (See Plan)

DOCUMENTS:
International Measurement Certificate.
3 Manifests.
2 Bills of Lading of each consignment.
Customs Documents:
1 Crew List.
1 Special List (personal effects).
1 Provision List (ship's articles).

Important: If the vessel is calling at two or more Finnish ports, 2 of each of these lists are to be produced at the first port of call.

PILOTAGE: VHF Channel 16, MF 2182 kHz. Anchorage for vessel awaiting a Pilot: outside the lighthouse "Kallan". Pilot boat equipped with radar.

ANCHORAGES: On inner roads called "Ado Roads", depth 8 m.

MAX. SIZE: Max. draft in the inner harbour 9.0 m. No tide.

HEALTH: See "Oulu".

RADIO: Vasa Radio Station. Gamlakarleby/Kokkola VHF Channel 28.

TUGS: Tugs (1,300 h.p.) are normally stationed in the harbour. Ship's lines to be used.

BERTHING: Southern Quay: Length 200 m., depth 7.4 m.
Old Quay: Length 180 m., depth 4.9 m. (inside), 6.0 m. (outside).
Busko Quay (Ro/Ro Berth): Length 160 m., depth 7.4 m.
Laucko Quay: Length 150 m., depth 9 m.
Elevator Quay: Depth 6 m.

CRANES: 6 mobile cranes available.

STEVEDORES: 1st shift Monday to Saturday 0700 – 1600 hrs. (meal hours 1100 – 1200 hrs.); 2nd shift Monday to Friday 1600 – 2400 hrs. To commence loading at 0700 hrs. notice must be given latest at 1600 hrs. the day before, or before 1200 hrs. if commencing at 1600 hrs.
MEDICAL: Advance notice not required. All facilities available.
TANKERS: Vessel's draft must not exceed 9.0 m.
DENSITY: Fresh water.
FRESH WATER: From pipe-line alongside quay.
FUEL: Light Fuel Oil and Heavy Fuel Oil available.
GANGWAY/DECK WATCHMEN: Watchmen recommended.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Derat Certificate to be kept on board.
CUSTOMS ALLOWANCES: Tobacco: 100 cigarettes per 3 days for each crew member. Wine and/or Spirits: 1 bottle per 6 days for each man over 20 years of age.
IDENTIFICATION CARDS: Not needed.

REPAIRS: All types of repairs possible.
REPATRIATION: Crew changes can be effected.
AIRPORT: Kronoby Airport about 30 km. from Jakobstad. 4 flights daily.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: 1st and 6th January; Good Friday; Easter Eve; Easter Monday; Labour Day (1st May); Ascension Day; Midsummer Eve; Whit Monday; 6th December (Independence Day); 25/26th December; All Saints' Day.
POLICE/AMBULANCE/FIRE: Police 002; Ambulance and Fire 000.
TELEPHONES: Connection for telephone on board available.
AUTHORITY: Jakobstad Port Authority, Hamnkontoret, 68600 Jakobstad, Finland. *Tel:* 967-30034. *Contact:* Ingmar Fagerudd, Harbour Master.

KASKO (KASKINEN): 62.23 N. 21.13 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Customs Lists.
2 Passenger Lists.
Manifest, Bill of Lading, etc.

Between 1st December – 30th April (Winter) ice breaker available. The Finnish Ice Class Certificate, (required since 1984) can be obtained in Kaskinen.
PILOTAGE: Pilot boards 4 miles outside pilot station. Pilot boat or station can be called by radio telephone 2182 or VHF Channel 16. Notice is not required. Pilot can be called, daytime flag "G" or "PT", night-time by Morse "PT".
ANCHORAGES: Safe areas of anchorages, 3 miles W.S.W. of pilot station Salgrund, depths 10 m. – 20 m.
MAX. SIZE: Max. draft 8 m.
HEALTH: Pratique automatic. In case of sickness onboard, contact the Agent.
RADIO: Vasa Radio.
VHF: VHF Channel 16 (Salgrund Pilot).
TUGS: None.
BERTHING:
Pier 248 m. length, 8.5 m. depth
Pier 35 m. length, 7.0 m. depth
Pier 130 m. length, 6.0 m. depth
DENSITY: 1004.
STEVEDORES: Available; rates about 250 – 300 tons pulp per work gang.
MEDICAL: Hospital available.
FRESH WATER: By pipe-line.
FUEL: Available by tank truck.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes. Wine/Spirit: 1 bottle spirit.
CONSULS: None.
REPAIRS: Only small repairs.
AIRPORT: Distance to Vasa Airport 100 km. Served by regular airlines.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: See "Oulu".
POLICE/AMBULANCE/FIRE: Police 002; Ambulance 006; Fire 005.
TELEPHONE: Can be connected. No cost for connection.
SHORE LEAVE: Allowed.
GENERAL: Port is the most Northern in Finland which under reasonable conditions can be kept open throughout Winter.
AUTHORITY: Kasko Hamnkontor (Harbour Office), 64260 Kaskinen, Finland. *Tel:* 962 – 27201. *Contact:* Matti Vihanto, Harbour Master.

KEMI (Ajos): 65.40 N. 24.31 E. (See Plan)

LOCATION: Ajos harbour is a municipal port owned and managed by the city of Kemi. It is located at Ajos, about 10 km. (6 nautical miles) South of Kemi, Lat. 65° 40′ N., Long. 24° 31′ E. The area is shown on Finnish Charts Number 275 and Number 59.
APPROACHES: The distance from Kemi lighthouse to the harbour is about 21 nautical miles (39 km.). The minimum width of the channel is 100 m. (328 ft.), and approved depth up to the oil harbour is 10 m. (32.8 ft.).

The water level varies between +1.5 m. and −0.75 m. (+5 ft. and −2.5 ft.) depending on winds (water level rises during Southerly and falls rapidly during Northerly winds). There are no tides in the area.

During normal winters the harbour is frozen from the beginning of December to the end of May. Over this period the channel from the open sea to the harbour area is kept navigable by state-owned ice-breakers. The Finnish Board of Navigation determines the restrictions and requirements for vessels allowed to enter the harbour during this period. The port has been kept open throughout the year since 1971.
DOCUMENTS: Documents to be handed over after berthing:
2 Crew Lists.
1 Provision List.
1 Special List (Customs).
Tonnage Certificate.
The usual Cargo Documents.
PILOTAGE: Pilot boards from "Kemi I" Lighthouse or Nukkujanmatala Lighthouse. VHF and radio telephone watch maintained.
RESTRICTIONS: Ships can enter and leave Ajos harbour 24 hours a day.
MAX. SIZE: Sea to Fairway at Ajos. Max. draft 10 m. Sea to Fairway at Veitsiluoto. Max. draft 7.1 m. Also see "Berthing".
RADIO: *Entering the Harbour:* Time passing Kiel/Holtenau/Copenhagen is to be given via Harnosand Radio, Mariehamn Radio or Stockholm Radio.

ETA to be given 12 hours before the calculated time of arrival.

Notice is to be given to the pilot station, which is situated at the S.W.-end of Ajos Island via VHF Channels 16/13 two hours before ETA at the pilot embarking point, which is between Kemi lighthouse and lighthouse Nukkujanmatala depending on the weather.

The notice is to include the name, call sign and the nationality of the vessel, n.r.t., the draft and length of the vessel, time of arrival (at the Pilot's boarding site) and tugs needed for berthing.
TUGS: Icebreaker tugs of 3,500 h.p., 1,300 h.p. and 600 h.p. Ship's lines used.
BERTHING:

Quays:	*Length* (m.)	*Depth* (m.)	*Permitted draft* (m.)

GENERAL: It is prohibited to let or throw any substance or refuse causing pollution or shoaling in the harbour area.
SERVICES: Compass adjusting service available.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
NOTICE: Port Authority Notice to Masters.
Instructions Concerning Waste Disposal:

The Port Authority of Kotka informs you hereby that in the Port of Kotka the rules and regulations concerning the protection of the marine environment of the Baltic Sea Area as stated in the Helsinki Convention have to be followed by all ships.

On the strength of this convention no wastes shall be discharged into the water while the ship is in the port area. Breaking of these rules cannot be accepted. The Port Authority will check that the instructions are observed without exception.

While your ship is in the port a necessary amount of sacks for waste disposal will be delivered to the ship. The waste emanating from your ship shall be put into these sacks and before the departure of your ship the sacks shall be delivered *by your crew* to the waste container in the vicinity of the berth of your ship.

In case you want to get rid of oily residues please inform the Harbour Master either through your Agent or directly. For the reception of these wastes the Port Authority does not charge you separately as the cost of this service is included in the general waste disposal fee.

In case your ship is a tanker loading oil products and you wish to dispose of oily water such as tank washing water or ballast water it has to be agreed separately with the Port Authority.

All questions in connection with the waste disposal service will be answered by the Harbour Master (Tel: 11672).

Signed: Port Director.

DEVELOPMENTS: A new harbour with depth of 15.3 m. is planned.
AUTHORITY: Port Authority of Kotka, Laivurinkatu 7, SF-48100 Kotka 10. *Tel:* 358-52-181200. *Telex:* 53144 Portk Sf. *Cables:* Port Authority of Kotka. *Contact:* Ilmari Elo, Port Director.

KRISTINESTAD: 62.16 N. 21.23 E.

DOCUMENTS:
Ship's Measurement Certificate.
2 Crew Lists.
Cargo Manifest.
Copy Bill of Lading.
2 Provision Lists and Tobacco Lists for Customs.
Ice Certificate 1.12–3.4.

PILOTAGE: Pilot boards at Hojerstein Light Buoy. At least 2 hours ETA required. Pilot boat has red painted hull, white marking "L" on bow, and deck house yellow. Pilot station situated on Hoggklubb Island South of Kristinestad, International pilot call signals to be used, also radio telephone 2182 and VHF Channel 16.

ANCHORAGES: Good safe holding ground off Adgrund. Depth 10 m.

MAX. SIZE: For general cargo and timber, 20 ft. draft in old port. For tankers, 33 ft. in the oil port. Depth at new coal harbour 33 ft.
See also "Tankers".

RADIO: Messages through coastal stations. Also Kristinestad VHF Channel 24. Also see "Pilotage".

TUGS: 1 tug available 240 h.p. Additional powerful tugs available with sufficient notice.

BERTHING: No special requirements. Pilot gives orders for berthing.
Inner Wooden Quay. Length 75 m., depth alongside 15 ft.
Outer Stone Quay. Length 250 m., depth alongside 20 ft.
There are 3 mobile cranes of 10 tons capacity.

SPECIALISED CARGO HANDLING FACILITIES: Bulk cargoes can be discharged at quay, 4 portable cranes available. There is 1 ramp for Ro/Ro ships in oil harbour at Bjorno.

New coal harbour at Bjorno Power Station, depth alongside 10 m. Berth is equipped with 1 conveyor for handling self-discharging vessels.

STEVEDORES: Advise ETA and gangs required as stipulated in charter-party. Also when laytime will commence to count. Only timber cargoes loaded.

Normal working hours 0700 – 1600 hrs. all weekdays.

DENSITY: 1004.

MEDICAL: Hospital facilities available.

TANKERS: Oil harbour at Pohjolan Voima Oy, power station at Bjorno. Depth 33 ft. (10 m.) alongside the oil pier. One berth for tankers. Discharge capacity with two 10 in. pipe-lines 2,500 t.p.h. Fresh water supply to tankers available from shore installation rate 30 t.p.h.

FRESH WATER: Fresh water supply by shore installation. Any amount available.

FUEL: Fuel available by tank cars of about 20 tons capacity at short notice.

GANGWAY/DECK WATCHMEN: Not compulsory at Timber Pier. Compulsory in oil harbour, according to rules of Board of Navigation.

OPENING/CLOSING HATCHES: Normally carried out by crew, but on request may be handled by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes per 6 days, per man. Wine/Spirit allowance: 1 bottle per man.

CARGO GEAR: BOT Certificates. No additional requirements.

CONSULS: Danish, Tel: 962-12350.

REPAIRS: No shipyards, but welding pipe-line electric repairs possible.

SURVEYORS: Surveyors and Cargo Inspectors available.

AIRPORT: Nearest airports in Vaasa and Pori within 100 km., several flights per day.

TIME: Local time GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: See "Oulu".

POLICE/AMBULANCE/FIRE: Police Station of Kristinestad 12055 or 002; Ambulance 11626; Fire Brigade 005.

TELEPHONE: Public telephones on the pier.

GENERAL: Timber pier in Port of Kristinestad closed from the end of December to the middle of April owing to ice. Oil port will be kept open according to the general ice situation of Gulf of Bothnia.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

EMERGENCY CO-ORDINATION CENTRE: Kummalgrund Coast Guard Station: Tel: 962-29142 (Kristinestad) or VHF Channel 16.

STORING: Vessels may be stored by truck which may proceed alongside. No special Customs regulations in force. Riggers and fork lift trucks available.

AUTHORITY: Kristinestad Harbour Office, 64100 Kristinestad, Finland. *Tel:* 962-11051. *Contact:* Sakari Laipio, Harbour Master.

LOVISA (Valkom): 60.25 N. 26.16 E. (See Plan)

PILOTAGE: Pilot arrives from pilot station at Orrengrund (Tel. 915-565334, radio telephone). Station equipped with radar. Distance to port 12 miles.

APPROACHES: Depth in fairway (Orrengrund – Valko) – 8.5 m.

TUGS: 1 tug available, 1,250 h.p., between December and April.

BERTHING:
Coal Quay: Length 141 m., depth 8.5 m.
Middle Quay: Length 280 m., depth 7.30 m.
Connection Quay: Length 115 m., depth 7.30 m.
Roll-on/Roll-off Berth: Length 20 m., depth 7.30 m.
South Pier (East Side): Length 130 m., depth 8.50 m.
Inner Harbour: Length 80 m., depth 4.20 m.

CRANES: 6 mobile cranes, lifting capacity 6 – 36 tons. 2 shore cranes, lifting capacity 6 tons. 1 shore crane lifting capacity 6 – 28.5 tons.

DENSITY: 1003.

DEVELOPMENTS: Land area from 23 ha. to 76 ha. (1983-90). Loading depth to 8.50 m. (1985).

AUTHORITY: Lovisa Port, 07910 Valkom, Finland. *Tel:* Port Director: 915-565514. Harbour Master: 915-565163. *Contact:* Pekka Pajunen, Port Director. Bengt Sandvik, Harbour Master.

MARIEHAMN: 60.06 N. 19.56 E. (See Plan)

PORT LIMITS: The Southern boundary of the port is on a line between Lat. 60° 03.5′ N., Long. 19° 56.1′ E. and Lat. 60° 04.2′ N., Long. 19° 55′ E.

DOCUMENTS:
1 Crew List.
1 Passenger List.
3 Provision Lists.
2 Special Lists (in possession each crew member – cigarettes, tobacco, spirit, radios, etc.).
2 Bills of Lading.
Registered Tonnage Certificate.

PILOTAGE: Pilot arrives from station at Hamngatan 4, in Westerhamn harbour, and meets entering vessels about 2 nautical miles S.W. of Marhallan lighthouse. 3 hours' notice of ETA is required. Pilot station and cutter are fitted with VHF radio and keep watch on Channel 16, 24 hours a day. Working Channel is 13. Pilot can also be ordered by cable via Mariehamn Radio.

Pilot can also be taken from Nyhamn pilot station 12 miles from the port. Nyhamn has VHF, Radio 2182 kHz and Radar.

At Nyhamn, Sea Pilot may be obtained for the Baltic Sea, Bay of Bothnia and Bay of Finland.

ANCHORAGES: Good anchorages North of Grano Island in 10 m. to 20 m. water.

MAX. SIZE: Ships of 160 m. length and 7 m. draft can enter the port, but require twin screw and bow thruster for safe manoeuvring.

RADIO: Mariehamn Radio, call sign OHM on telegraphy and OFH for telephony. Connected to the public telegraph and telephone service.

VHF: Following stations keep watch on VHF Channel 16: Mariehamn Radio, Mariehamns Pilot, Mariehamns Hamn (Harbour Office), Sjobevakningen Mariehamn. (The Coast Guard at Mariehamn.)

TUGS: 1 tug of 320 h.p. available. The m/s *Gustaf Erikson* belongs to the Alands Lifeboat Society. Usually ships' lines are used.

BERTHING: *Quays for Passenger Vessels:*

Berth No.	*Length* (m.)	*Depth* (m.)	*Remarks*
1	100	5.0	
2	150	6.0	
3	190	7.3	Ro/Ro
4	120	6.5	Ro/Ro
5	140	7.3	Ro/Ro

Power Station Pier: Depth 5.0 m.

CRANES: 7 mobile cranes can be rented. Maximum lift, 2 cranes of 25 tons and 5 of 16 tons on the shortest radius.

SPECIALISED CARGO-HANDLING FACILITIES: 3 berths for Roll-on/Roll-off traffic, used by car ferries.

STEVEDORES: Ordered by Agents. ETA in good time to obtain gangs.

DENSITY: 1005.

TANKERS: Max. LOA 100 m. Depth alongside 5.5 m.

MEDICAL: All services available.

FRESH WATER: Most berths supplied by shore installations about 15 t.p.h., otherwise by truck.

FUEL: Only diesel oil, no heavy products.

GANGWAY/DECK WATCHMEN: Available but not necessary.

OPENING/CLOSING HATCHES: Normally done by crew.

CERTIFICATES: International Tonnage Certificate or National Tonnage Certificate.

CUSTOMS ALLOWANCES: 200 cigarettes and limited amount spirits for each crew member.

CONSULS: Denmark 11 454, Netherlands 12 070, Iceland 21 849, Norway 12 050, Sweden 11 624, U.S.S.R. 11 524, Germany F.R. 16 270. France 13 931

REPAIRS: Most repairs possible.

DRY DOCKS: Slipway for small vessels, max. about 3-400 d.w.t.

SURVEYORS: No permanent surveyors at Mariehamn.

REPATRIATION: Mariehamn is a good place for repatriation, with many connections to Sweden and to the Finnish mainland every day, with car-ferries and aeroplanes. About 1 million tourists visit Aland Island every year.

AIRPORT: About 5 km. from town, daily traffic to Stockholm and Abo/Turku.

TIME: GMT plus 2 hours. Summertime GMT plus 3 hrs.

HOLIDAYS: See "Oulu".

POLICE/AMBULANCE/FIRE: Police 002 or 15 444; Ambulance 000, Fire 000 or 11 000.

TELEPHONES: Available at berths for passenger ships.

IDENTIFICATION CARDS: Not needed for Scandinavian citizens. Passports for all others.

AUTHORITY: Port of Mariehamn, Harbour Office, Box 5, SF-22101 Mariehamn, Finland. *Tel:* 928-13962. *Contact:* Captain Uno J. Gottberg, Harbour Master.

NAANTALI: 60.28 N. 22.01 E. (See Plan)

DOCUMENTS:
Health Certificate.
Crew List.
Passenger List.
Dangerous Cargo List.
Ship's Register.

PILOTAGE: Pilot compulsory at Uto Pilot Station. When approaching Uto communicate via VHF Channel 16 – ETA, name of vessel, destination, draft. Change of Pilot takes place in Lohm. Harbour Pilots available at the port. Distance Uto-Lohm, 25 miles. Lohm-Naantali, 28 miles.

ANCHORAGES: Good safe anchorage in harbour area. Max. draft for vessels 10 m.

MAX. SIZE: Maximum permissible length for tankers 210 m., main quay – maximum length for any vessel 250 m.
HEALTH: International Quarantine flag required in case of suspected disease or fever including preliminary report by VHF, otherwise ask Agent.
RADIO: Hanko Radio; Mariehamn Radio; VHF Turku 26; VHF Mariehamn 27; VHF Korpo 23.
VHF: Communication on Channel 16, own working Channel 11.
RADAR: When Radar Service needed, contact Agent.
TUGS: Harbour icebreaker tug *Naantali* 1,200 h.p., equipped with bow steering propeller. Use ship's lines. Additional tugs on application from Turku.
BERTHING: No special requirements. Harbour/Drafts: No tide. Main quay, length 370 m., draft 13 m. Timber quay, length 110 m., draft 8.0 m. 3 car-ferry piers, length 80 m./125 m./95 m., drafts 9 m./6.4 m./6.0 m. Lubricating Oil pier/Car Ferry pier, length 95 m., draft 6.0 m. Sugar quay, length 32 m., draft 4.5 m.
CRANES: 2 cranes owned by electric powerplant of 6 tons each.
BULK CARGO FACILITIES: Grain handled by two pneumatic elevators and belt conveyor, Loading/Discharging 200 t.p.h., maximum reach for outlet/inlet 15 m. and 18.7 m., maximum height above quay level 9.0 m. and 16.0 m. when loading, discharging limits are 11.6 m. and 18.6 m., 200 m. of main quay intended to be for handling of grain, 170 m. for coal, which is handled by 2 cranes of 6 tons each and belt conveyor, discharging rate about 2,000 t.p.h.
SPECIALISED CARGO-HANDLING FACILITIES: Ro/Ro traffic possibility.
STEVEDORES: Available, ordered by Agent.
MEDICAL: Advise by radio prior arrival if medical attendance required aboard.
TANKERS: Oil Harbour, Neste Oy. Discharge lines ashore 10 in., 12 in., 18 in., Diameter of cargo hoses and respective draft of tanker berths:
Berth No. 1, 6 in., 5.7 m.
Berth No. 2, 10 in., 10.0 m.
Berth No. 3, 8 in., 10 in., 12 in., 13.0 m.
DENSITY: 1007.
FRESH WATER: Supplied by shore installations at most berths.
FUEL: All grades available.
FIRE PRECAUTIONS: Usual precautions.
GANGWAY/DECK WATCHMEN: Available. Tankers compulsory.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: 200 cigarettes/200 gm. tobacco and 1 bottle spirits/wine.
CONSULS: In Turku 17 km. away.

Austria	Tel: 342230	Iceland	Tel: 652211
Belgium	Tel: 393666	Italy	Tel: 20510
France	Tel: 382111	Norway	Tel: 27922
Germany F.R.	Tel: 334800	Sweden	Tel: 331310

Honduras	Tel: 395495	U.K.	Tel: 382322

REPAIRS: Small repairs can be carried out, ask Agent.
DRY DOCKS: None, see Turku. Naantali shipyard owned by Wartsila Oy, Rauma-Repola Oy and Valmet Oy, new buildings, main dimension of building dock 220 m. × 70 m., outfitting dock 180 m. × 125 m., sill depth 8.2 m.
SURVEYORS: Contact Agent.
REPATRIATION: Good connections.
AIRPORT: 20 km. distant. Regular service.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: New Year's Day, Epiphany, Good Friday, Easter Monday, Labour Day, Whit Monday, Midsummer, All Saints' Day, Independence Day, (6th December), Christmas.
TELEPHONES: A telephone connection available at Main Quay and Quay No. 22.
SERVICES: Facilities for discharge of tank-washings, 10,000 cu. m. (Oil Harbour). Compass adjusting, ask Agent.
SHORE LEAVE: No restrictions for crew members.
IDENTIFICATION CARDS: Not required.
REGULATIONS: Oil pollution strictly prohibited. Dumping of waste, refuse, etc., also prohibited.
DELAYS: Usually no delays.
POLICE/AMBULANCE/FIRE: Police 751 133; Ambulance 751 123, Fire Brigade 005.
AUTHORITY: Naantalin Satamalaitos, Satamatie 21, 21100 Naantali, Finland. *Tel:* 921-755378. *Contact:* Harbour Manager or Hannu Haatainen, Assistant Harbour Master.

OULU: 65.00 N. 25.25 E. (See Plan)

PORT LIMITS: The seaward boundary of the port is drawn West of Oulu Roads. The arriving vessel passing the line Hermanni Island – Kyrokari Ice Buoy is inside the boundaries and if necessary to anchor on the roads, is considered to be an "arrived vessel".

Port consists of four separate parts: Toppila, Nuottasaari, Oritkari and Vihreasaari harbours.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Customs Documents.
2 Crew Bond Declarations.
2 Ship's Bond-store Lists.
Derat Certificate.
4 Manifests.
2 Bills of Lading.
Ship's Register, Certificate of tonnage.

PILOTAGE: Vessel requiring Pilot applies from Marjaniemi. Pilot station, Lat. 65° 02′ 4″ N., Long. 24° 34′ E., near West point of Hailuoto Island. Pilots require 12 hours' notice of ETA to Peltinmatala lightbuoy (Pilots) or to alternative position 3 miles North of Kelmi lightbuoy. Pilot boat red coloured displaying usual international pilot signs. Pilot station equipped with MF (2182) and VHF, listening on Channels 16 and 13, radar and RC. Morse signalling by light. No specific requirements on part of Pilots boarding, only safe pilot ladder according to rules. Anchorage near lightbuoy Peltinmatala, when awaiting for Pilot in fine weather; in bad weather advisable to ride against weather and wind. Pilot for Oulu can also be obtained near the "Kemi 1" light-tower. Vessels with a draft more than 8.0 m. must use this fairway and apply for Pilot either from Marjaniemi or "Kemi 1" pilot station, wireless 2182 or VHF Channels 16 and 13.
ANCHORAGES: Safe anchorage on Oulu roads. There are no safe anchorages West of Hailuoto Island.
RESTRICTIONS: Day and night service, no tides. Winter season, contact ice-breaker 24 hours in advance on MF (2182), or VHF Channel 16.
MAX. SIZE: *Marjaniemi Fairway:* 8.0 m. *Kemi Fairway:* 10.0 m.
Toppila Harbour: Toppila Quay depth 6.1 m., Hietasaari Quay, depth 6.1 m.
Oritkari Harbour: Main Quay, depth 9.0 m. Stern Door Quay, depth 7.0 m. North Quay, depth 10.0 m.
Nuottasaari Harbour: Main and Chemical Quay, depth 6.4 m.
Vihreasaari Harbour: Oil Quay, length 72 m., depth 10.0 m. Bulk Quay, length 150 m., depth 10.0 m.
Also see "Berthing".
HEALTH: No special rules existing in obtaining pratique. If disease or fever is suspected on board report to ship's Agent; will contact the Health Authority for necessary arrangements.
RADIO: Vaasa Radio (North Quarken). Close to Hailuoto Island call "Oulu Radio" VHF Channel 27 or Channel 24.
RADAR/VHF: At Marjaniemi Pilot station, radar range 30 miles. Contact with MF (2182) or VHF (Channel 16). All ice-breakers keep watch on frequency 2182 and VHF (Channel 16).
TUGS: Tug optional, but for vessels over 140 m. long use is advisable. Tug ("Tuura", 3,600 h.p.) will meet on Oulu Roads according to agreement; customary to use ship's lines in open water and lines from tug during ice operations.
BERTHING: *Toppila Harbour:* Depth 5.0 – 6.1 m. Toppila Quay length 992 m. Hietasaari Quay length 600 m.
Nuottasaari Harbour: Main Quay, length 320 m. Chemical Quay, length 125 m.
Oritkari Harbour: Main Quay, length 270 m. Stern Door Quay, length 85 m. North Quay, length 170 m. Facility for Ro/Ro service.
Vihreasaari Harbour: Oil Quay, length 72 m. Bulk Quay, length 150 m.
CRANES:

	No.	*Capacity (tons)*	*Reach of arm (m.)*	*Type*
Nuottasaari Harbour	1	5	12	Movable
Toppila	1	5	12	"
Toppila	1	3	12	"
Vihreasaari	1	6	22	"
Vihreasaari	1	8	26	"

CARGO HANDLING FACILITIES: Toppila Harbour is equipped with 2 cranes, Vihreasaari Harbour with 2 cranes and Nuottasaari Harbour with 1 crane to load and discharge bulk cargoes and general cargoes with hook. 10 mobile cranes available from stevedores in all ports.

Ro/Ro berth is adjacent to the Oritkari Harbour.

Oritkari Harbour is built to mechanically handle paper cargoes.

Free zone warehouse in Toppila (700 sq.m.) and free zone area in Oritkari (18,000 sq.m.). Warehouses in Toppila and Oritkari of 31,500 sq.m. There is a large amount of open storage in all harbours.
BRIDGES: No bridges. Electric cable across Toppila fairway, 50 m. above water.
STEVEDORES: 24 hours' notice of ETA to be given to Agent who arranges necessary gangs.
MEDICAL: Medical attention arranged through Agent, 2 – 4 hours' notice required. Good hospital facilities available.
TANKERS: One principal tanker berth in Vihreasaari Oil Harbour, depth 10.0 m. Discharge lines of 12, 14 and 18 in. Pressure 10 kg./sq.cm.
DENSITY: Fresh water.
FRESH WATER: Available at main berths and Oil Harbour from pipe-line, cost about 9.00 mk/ton. Elsewhere water is delivered by boat, cost about 10.00 mk/ton.
FUEL: Small quantities of all grades available, delivered by lorries.
GANGWAY/DECK WATCHMEN: Watchmen recommended.
OPENING/CLOSING HATCHES: Normally carried out by crew. Stevedores will do it by order of Master and will charge as shipwork.
CERTIFICATES:
Nationality Certificate.
Measuring Certificate.
Load-line Certificate.
Classification Certificate.
Safety Equipment Certificate.
Radio Safety Certificate.
Derat Certificate.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 200 gm. pipe tobacco or equal amount of cigars allowed to each member of crew. Wine and/or Spirit: One bottle wine or spirit allowed for each member of the crew.
CARGO GEAR: Tested cargo gear to international safety regulations. Test certificates to be on board vessel.
IDENTIFICATION CARDS: Not needed.
CONSULS: Sweden, Norway, Denmark, Netherlands and United Kingdom.
REPAIRS: Minor deck and engine repairs carried out. Docking only for small tug boats.
SERVICES: Compass adjusters and ship's cleaning.

DRY DOCKS: One small slipway. Max. vessels of 25 m. length and 8 ft. draft.
REPATRIATION: Good facilities for effecting crew changes and to arrange necessary repatriation.
AIRPORT: Oulu Airport 15 km. from harbour served by regular airlines. Six daily flights to Helsinki (worldwide connections) and six flights from Helsinki to Oulu with continuous connection to Kemi and Rovaniemi.
TIME: Local time GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: General holidays in Finland: New Year's Day (January 1st); Good Friday; Easter Monday; Labour Day (May 1st); Independence Day (December 6th); Christmas Day (December 25th); Boxing Day (December 26th).
POLICE/AMBULANCE/FIRE: Fire 005, Reserve 006; Ambulance 006, Reserve 005; Police 002, Reserve 003.
TELEPHONES: A telephone connection available in all harbours.
SHIP SUPPLY SERVICE: English speaking Pilots keep watch round the clock at Oulu pilot station on VHF Channels 13 and 16. The have pilot boats for ship-to-shore transport in emergency cases. In other cases Oulu Harbour Radio keeps English speaking watch in office hours VHF Channels 13 and 16. At other times the Pilots help to translate messages to tugowners. Oulu Harbour and a few private Owners have tugboats for service around the clock. Vaasa Coastal Radio has watch around the clock on Channels 16 and 27. They can arrange a helicopter in emergency cases for service in whole Bay of Bothnia area.
DEVELOPMENTS: Railway and storehouse at Oritkari North Quay will be completed 1987-88.
AUTHORITY: Port of Oulu Authority, Harbour Office of Oulu, P.O.Box 48, SF-90520 Oulu, Finland. *Tel:* 981-344266. *Cables:* Satama. *Contact:* Veikko Lauriala, Port Captain. Tel: 358-81-344266.

PARGAS: 60.18 N. 22.18 E. (See Plan)

DOCUMENTS:
- 3 Crew Lists.
- 1-2 Custom Provision Lists.
- 1-2 Custom Special Lists.
- 2 Passenger Lists.
- 2 Copies each Bill of Lading.

Tonnage Certificate and in special instances other regular documents.
PILOTAGE: On arrival at Pargas, from Gulf of Finland, from Baltic via Uto, from Gulf of Bothnia via Enskar, information of ETA to be given in good time to respective pilot stations. VHF Channel 16 for calling, 13 for further communication. Charge for pilotage in accordance with official Finnish tariff. Harbour Pilot available, but not compulsory, and can be ordered through Sea Pilot.
ANCHORAGES: Well sheltered and safe anchorage, immediately outside harbour area.
MAX. SIZE: Maximum depth both in channel and along quay 6.70 m. As regards length of quay and possibilities for a quick dispatch, it is desirable (though not an absolute stipulation) that discharging vessel be a bulk carrier with the engines aft.
HEALTH: Free Pratique automatic for all vessels, but temporary exceptions in and according to regulations issued by WHO and Authorities may occur.
RADIO: Radio-telephone contact with Agent and consignee/shipper is obtained via Mariehamn, radio-call 2196 kHz, reply 1852 OHF; or via Hango, radio-call 1967 kHz, reply 2649 OFO. Contact with VHF is made via Abo, Channel 26.
TUGS: A small motor tug of 200 h.p. available.
BERTHING: Directions to berth via nearest pilot station, Pargasport. Quay level above water 1 – 2 m., dependent on berth.

Length of quays, 800 m. 2 electric coal-discharging bucket cranes and one electric conveyor belt.
STEVEDORES: Arrangements will be made by Agent, who must be advised of ETA previous day to enable arrange men, trucks, etc.
MEDICAL: Medical Officer available locally. Necessary examination and taking of tests usually done in Abo. Regular appointment with local physician can be arranged by telephone with Agent or doctor.
DENSITY: Brackish water 1002.
FRESH WATER: Delivery from installation on quay.
FUEL: No local supply. In case of need delivery by truck from Abo.
GANGWAY/DECK WATCHMEN: Available but not necessary.
OPENING/CLOSING HATCHES: Must always be performed by crew.
CERTIFICATES: Normally tonnage certificate only but in special instances other regular ship's documents may also be needed.
CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits. In accordance with the decision of Customs Authorities.
CONSULS: See "Turku".
REPAIRS: Facilities for arranging small repairs on deck and engine in Pargas, but usually carried out by reliable companies in Abo.
DRY DOCKS: No local docking facilities. See "Turku".
AIRPORT: Nearest airport in Abo. Distance about 25 km.
HOLIDAYS: Whit Monday, Midsummer (2 days), All Saints' Day, Independence Day (6th December), Christmas (25th December). Work in harbour carried out during these days only under very pressing circumstances.
POLICE/AMBULANCE/FIRE: Police 744048; Ambulance 744064; Fire 005; Life-saving Corps 356595.
TELEPHONE: No facilities for placing telephone on board. Telephone available on quayside.
SHORE LEAVE: No restrictions for crew members.
IDENTIFICATION CARDS: Not required.
DELAYS: Vessels dispatched in order of arrival. Usually no delays occur as work has generally been carried out within the time limit stipulated in C/P. Port activity aimed at good dispatch of vessels, and consequently work in 2 shifts has been arranged.
AUTHORITY: Oy Partek Ab., 21600 Pargas, Finland. *Tel:* 921-742111. *Telex:* 62220. *Cables:* Pkpar Finland. *Contact:* Karl-Erk Lindholm, Manager of Shipping Department.

PATENIEMI: 65.06 N. 25.23 E. (See Plan)

OPERATORS: Oulu Oy Sawmill. Port used for export of timber only, about 120,000 cu.m. per year. 12 km. North of Oulu.
DOCUMENTS:
- 2 Crew Lists.
- 2 Passenger Lists.
- Customs Documents.
- 2 Crew Bond Declarations.
- 2 Ship's Bond Store Lists.
- Derat Certificate.
- 4 Manifests.
- 2 Bills of Lading.
- Ship's Register, Certificate of Tonnage.

PILOTAGE: Pilot station at Marjaniemi. Marjaniemi – Oulu Roads 40 nautical miles, 7.0 m. depth. Oulu Roads – Pateniemi 6.0 m. depth.
ANCHORAGES: Safe anchorage on Oulu roads. There are no safe anchorages West of the Hailuoto Island.
RESTRICTIONS: Day and night service, no tides. Winter season, contact ice-breaker 24 hours in advance on HF (2182), or VHF Channel 16.
MAX. SIZE: Only dry cargo vessels use this terminal. Max. draft 6.0 m. Length 100 m. (approx.).
HEALTH: No special rules existing in obtaining pratique. If fever or disease suspected on board to be reported to ship's Agent, he will contact Health Authority for necessary arrangements.
RADIO: "Vaasa Radio" (North Quarken). Approaching Oulu contact Agent through "Vaasa Radio". Close to Hailuoto Island call "Oulu Radio" VHF Station, Channel 27.
RADAR/VHF: At Marjaniemi Pilot station, radar range 30 miles. Contact with HF (2182) or VHF (Channel 16). All ice-breakers keep watch on frequency 2182 and VHF (16).
TUGS: Tug optional. Tug will meet on Oulu Roads, according to agreement. Customary to use ship's ropes.
BERTHING: One berth of 85 m. enabling one vessel of medium size to load at quay. Depth at quay is 6.61 m.
STEVEDORES: 24 hours' notice of ETA to be given to Agent, who arranges necessary gangs.
MEDICAL: Medical attention arranged through Agent. 2–4 hours' notice required. Good hospital facilities available.
DENSITY: Fresh water.
FRESH WATER: Available and delivered by boat and from pipe-line.
FUEL: Small quantities of all grades available, delivered by lorries.
FIRE PRECAUTIONS: Smoking prohibited in timber yards.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Normally carried out by crew. Stevedores will do it by order of Master and will charge as ship work.
CERTIFICATES:
- Nationality Certificate.
- Measuring Certificate.
- Load Line Certificate.
- Classification Certificate.
- Safety Equipment Certificate.
- Radio Safety Equipment.
- Derat Certificate.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 200 gm. pipe tobacco or equal amount of cigars allowed to each member of crew. Wine and/or Spirit: 1 bottle wine or spirits is allowed for each member of the crew.
CARGO GEAR: Tested cargo gear to international safety regulations. Test certificates to be on board.
CONSULS: British (Consul), Danish, French, Dutch, Italian, Norwegian and Swedish Vice-Consuls at Oulu.
SERVICES: Compass adjusters and ship's cleaning (no tank-washing).
REPATRIATION: Good facilities for effecting crew changes and to arrange necessary repatriations.
AIRPORT: Oulu Airport about 25 km. from harbour served by regular airlines. 7 daily flights to Helsinki and 6 flights from Helsinki to Oulu with continuous connection to Kemi and Rovaniemi.
TIME: Local time GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: General Holidays in Finland: New Year's Day (January 1st); Epiphany; Good Friday; Easter Monday; Labour Day (May 1st); Ascension Day; Whit Monday; Midsummer Day; All Saints' Day; Independence Day (December 6th); Christmas Day (December 25th); Boxing Day (December 26th).
POLICE/AMBULANCE/FIRE: Fire Tel: 005, Reserve Tel: 006; Ambulance Tel: 006, Reserve Tel: 005; Police Tel: 002.
REGULATIONS: Oil pollution strictly prohibited. Considerable number of logs lying in water and damages are ship's responsibility.
SHORE LEAVE: Crew members allowed ashore without restrictions.
IDENTIFICATION CARDS: Not needed.
AUTHORITY: Oulu Oy, Head Office, P.O.Box 196, SF-90101 Oulu 10, Finland. *Tel:* Int +35881 221411. *Telex:* 32138.

Sawmill Industry at Pateniemi: *Tel:* Int +35881 510555. *Telex:* 32274. *FAX:* 221 411/547. *Contact:* Shipping Department.

PORI, (including Mantyluoto, Reposaari and Tahkoluoto): 61.36 N. 21.29 E. (See Plan)

PORT LIMITS: The line between the lighthouses on Mantyluoto and Reposaari.

DOCUMENTS:
Ship's Register.
Crew List.
Passenger List.
Customs Documents.
Manifests.
Bills of Lading.

PILOTAGE: Pilot compulsory. Cable address: Luotsiasema, Mantyluoto (pilot station Mantyluoto), VHF Channel 16 or frequency 2182. 24 hour service by pilot boats from Mantyluoto pilot station, boats red-painted, international light or sound signals. Pilot to be taken 4 miles off Mantyluoto. In heavy fog, if required, pilot station able to navigate vessels into harbour by radar, provided vessel has corresponding equipment.

ANCHORAGES: Reposaari Roads and outside the breakwater.

RESTRICTIONS: Depth in the channel 8.6 m.

MAX. SIZE: *Tahkoluoto Oil Harbour:* Max. draft: 10.0 m.

Tahkoluoto Bulk Harbour: Max. draft: 10.0 m. Length of the quay 145 m.

In August 1986 the Deep Water Harbour (Berth Nos. 23-24) will be available. Length of quay 450 m. max. draft 15.3 m.

Reposaari: Max. draft: 3.9 m.

RADIO: Inform Agents giving ETA via Helsinki Radio, Hanko Radio, or Mariehamn Radio, or VHF Channel 26, Pori.

TUGS: 5 tugs available from 200 h.p. up to 3,520 h.p. Tugs normally join the vessel near the quays. Tugs use ship's lines.

BERTHING:

Quay	*Quay Section*	*Depth of water (at normal water) (m.)*	*(ft.)*

Reposaaren laituri	20	—	—
Tahkoluodon laituri	21	2	6 tons

CARGO HANDLING FACILITIES: Three Ro/Ro berths (Berths No. 2, 18 and 19)., 30-ton and 40-ton cranes able to handle containers.

Tahkoluoto Bulk Harbour: Transhipment berth (Berth No. 21) equipped with conveyor, rate 1,200 t.p.h. Unloading capacity at new Deep Water Harbour is 1,000-1,400 t.p.h. by Siwertell travelling ship unloader.

STEVEDORES: The vessels receive workers in the order in which they enter the harbour. ETA advices appreciated in order to facilitate arranging gangs.

MEDICAL: No advance notice for medical attention required. Hospital facilities available.

TANKERS: Berth No. 22. Depth 11.5 m. Max. draft 10.0 m.

DENSITY: 1004.5.

FRESH WATER: Supply by shore installation.

FUEL: All grades available.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: This work normally carried out by crew.

CERTIFICATES: Load Line Certificate; and during Winter season Ice Dues Certificate which issued by authorities for each season.

CONSULS: Vice-Consuls: Britain, Tel: 939/443122; Denmark, Tel: 939/443122; Netherlands, Tel: 939/443222; Norway, Tel: 939/443222; Sweden, Tel: 939/11141.

REPAIRS: Most repairs possible.

AIRPORT: Distance from airport 22 km. Served regularly by Finnair.

TIME: Local time 2 hours ahead of GMT. 3 hours ahead in Summer. (end March – end September.)

GENERAL: Harbour icebreaker "Porin Karhu", 3,500 h.p. available.

AUTHORITY: Port of Pori Authority, 28880 Pori 28, Finland. *Tel:* 39-443700. *Telex:* 66170. *Contact:* Hannu Sjoros, Harbour Master. Simo Hermonen, Port Manager.

PORKKALA (Kantvik): 60.05 N. 24.23 E. (See Plan)

Documents and all general information, refer to "Helsinki".

PILOTAGE: A Pilot can be obtained from the Pilot Station of Porkkala, Tel. 90–2984 112 or VHF Channels 13 and 16. Distance to port about 14 miles. Pilotage in the harbour area may be carried out only by State-appointed Pilots. Pilotage in the harbour is not obligatory.

MAX. SIZE: Maximum draft 30 ft. 2 in. (9.2 m.).

APPROACHES: There are four official ship routes leading to the port of Porkkala (Kantvik) of Suomen Sokeri Osakeyhtio. The deepest one is 9.2 m. (30 ft.) and the shallowest one is 5.5 m. (18 ft.). The port does not have an ice-breaker of its own and the fairway is kept open by means of the State's ice-breakers.

CLEARANCE: The Customs formalities of the port are attended to by the Custom House of Helsinki.

TUGS: A small motor tug of 200 h.p. available. Bigger tug, if needed can be ordered from Helsinki or from Inkoo.

BERTHING: The port of Porkkala (Kantvik) is owned by Suomen Sokeri and it is located at Kantvik. Directly in the vicinity of the port there is the factory of Suomen Sokeri Osakeyhtio (sugar mill). The port basin has 3 quays:

The outer quay is 110 m. long, draft 9.2 m. (30 ft. 2 in.).

The inner quay is 50 m. long, draft 5.3 m. (17 ft. 4 in.).

The fairway of the port basin is 120 m. wide, narrowing up at its end to 76.5 m. South quay (at the South bank of Kantvik Bay) is 60 m. long, draft 9.2 m. (30 ft. 2 in.).

DENSITY: 1004.

CRANES: Two cranes, capacity 8 tons. One crane is on the outer quay and one on the South quay. Also one 3-ton mobile crane.

FRESH WATER: Available at quays.

CONSULS: Nearest in Helsinki.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally by the crew.

AIRPORT: Nearest Helsinki, distance 45 km.

TIME: Local time is GMT plus 2 hrs. GMT plus 3 hours in Summer.

HOLIDAYS: On Saturdays, Sundays and General Holidays in Finland no cargo work is done.

POLICE/AMBULANCE/FIRE: Contact the Gatehouse of Factory.

TELEPHONES: Can be arranged on board. Telephone calls can be made from the Harbour Office during day-time.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not needed.

SHIPMASTER'S REPORT: The sugar discharging berth for Porkkala is at Kantvik, situated in Lat. 60° 05′ N., Long. 24° 23.25′ E., about 21 miles West of Helsinki.

The Pilot for the port is embarked at the position indicated on British Admiralty Chart No. 2331, 115° 3.5 miles from Porkkala lighthouse. From there to the berth is 12 miles and the passage presents no difficulties. It is well lit, and there is ample water. The least depth recorded was 31 ft. and that was alongside the berth. There is a powerful tug for assisting in berthing and unberthing.

The discharging berth, alongside which vessels lie port side to, is modern and well fendered. It is sheltered from most directions. Unfortunately, the berth is short for a 500 ft. vessel, and additional moorings have to be placed from amidships.

There is only 1 crane on the berth and to work either of the end hatches a shift would be necessary. Work was continuous while the vessel discharged her part cargo at Kantvik, and an out-turn rate of 100 t.p.h. was achieved.

Fresh water is readily available from the Jetty, and presumably, fuel could be obtained by lighter from Helsinki. Telephones in the dock offices are available for official use.

There is a bus service to and from Helsinki, the journey taking about 40 minutes.

AUTHORITY: Suomen Sokeri Oy, Harbour Master.

PORVOO (Skoldvik): 60.18 N. 25.33 E. (See Plan)

The harbour is a private oil harbour owned and managed by Neste Oy.

The harbour is located at Skoldvik in the municipal area of Porvoo about 45 km. (28 miles) East of Helsinki, Lat. 60° 18′ N., Long. 25° 33′ E. The area is shown on Finnish Marine Chart Nos. 17 and 902.

The distance from the Kallbadagrund Lighthouse to the harbour is 20.5 nautical miles (38 km.). The minimum width of the harbour channel is 270 m. (885 ft.) and the approved depth is 15.3 m. (50 ft.).

The water level varies between +1.5 m. and −0.75 m. (+5 ft. and −2.5 ft.) depending on the wind. There are no tides in the area.

The Winter period is from January to the end of April. During this time the channel from the open sea to the harbour is kept open by icebreakers owned by the State. The Finnish Board of Navigation determines the requirements for vessels allowed to enter various ports during this period.

Officially, the extra charges for the Winter period are collected from 1st December to 30th April.

DOCUMENTS: The following documents shall be handed over after berthing:
4 Crew Lists.
2 Lists of Visitors.
3 Passenger Lists.
1 Provision List.
1 Special List (Customs).
Ship's Register, Certificate of Tonnage.
The usual Cargo Documents.

PILOTAGE: Pilotage is compulsory. The Pilots are Sea Pilots employed by the State. They also perform the pilotage inside the port area.

The pilot station is at the outer end of Emsalo Island. Vessels entering from the sea are boarded by the Pilot at Kallbadagrund, Lat. 59° 59.1′ N., Long. 25° 36.1′ E.

The Pilot shall be called by using the international code, VHF Channels are 13 and 16.

The Sea Pilots serve as Docking Masters berthing the vessel with the help of 2 tugs when the vessel is over 15,000 tons.

RESTRICTIONS: Vessels can enter and leave the harbour 24 hours a day. However, vessels whose keel clearance is minimal are not allowed to berth in darkness or under unfavourable wind conditions.

In Winter, port kept open by ice-breakers.

MAX. SIZE: Up to about 260,000 d.w.t. Max. draft 15.3 m.

HEALTH: Bill of Health not required. In case suspected disease or fever on board, radio Agent full details before arrival to advise Port Health Officer in advance.

RADIO: Notice of arrival shall be given 12 hours before the calculated time of arrival by the ship's Agent (Helsinki Radio). Two hours before arrival at the boarding site for the Pilot, the same notice shall be sent, including

1) The name and the nationality of the vessel
2) Net registered tonnage
3) The time and date of the notice
4) The draft of the vessel
5) Time of arrival at the boarding site for the Pilot.

VHF: The harbour office is open 24 hours a day. It is provided with the VHF station "Neste". The following Channels are available: 6, 9, 13, 15, 16, 17 and 21. Telex connection is 17-46 Neste Sf.

TUGS: The harbour tugs "Esta" and "Esko" owned by Neste are available to handle vessels. Respective capacities are:

"Esta"	1,000 kW	(1,330 h.p.)
"Esko"	2,352 kW	(3,200 h.p.)

Vessels over 80,000 d.w.t. need additional tugs, which the ship's Agent shall order from Helsinki.

The ship's own lines shall be used for towing.

Tug to stand-by whilst vessel discharging if vessel over 130,000 d.w.t.

BERTHING: There are 5 berths available for discharging crude oil and loading of oil products. 2 additional berths are available for handling of petrochemical products.

Loading and discharging is possible around the clock. During the icefree period all berths are surrounded by oil booms.

Berth 1:	Face direction 023° 42′ Water depth 12.6 m. (41 ft.) Maximum vessel size about 50,000 d.w.t.
Berth 2:	Face direction 128° 42′ Water depth 17.6 m. (57 ft.) Maximum vessel length 330 m. (1,082 ft.) without special permission N.B. Vessel to be moored starboard side alongside Shore gangway Maximum reach of loading arms +21.5 m. (+70 ft.) from sea level
Berth 3:	Face direction 128° 42′ Water depth 17.6 m. (57 ft.) Maximum vessel length 280 m. (918 ft.) N.B. Vessel to be moored starboard side alongside Shore gangway Maximum reach of loading arms +19.5 m. (+64 ft.) from sea level
Berth 4:	Face direction 017° 56′ Water depth 15.3 m. (50 ft.) Maximum vessel size about 150,000 d.w.t.
Berth 5:	Face direction 002° 58′ Water depth 8 m. (26 ft.) Maximum vessel size about 8,000 d.w.t.
Berth 8:	Face direction 004° 42′ Water depth 13.5 m. (44 ft.) Maximum vessel size about 40,000 d.w.t.
Berth 9:	(Formerly Kymi Kymmene Oy, Svartback Harbour). Face direction 333° 18′ Water depth 7.3 m. Maximum vessel size about 7,000 d.w.t.

The water depths correspond to the normal water level.

All loading arm flanges are ANSI 150 lb. RF. For tugs and cargo vessels there are separate berths in the harbour.

DISCHARGING/LOADING: The usual methods are applied in discharging and loading. While discharging and loading the safety rules for Neste tank vessels and oil harbours shall be followed.

Crude oil can be discharged simultaneously at a maximum of three berths. However, at Berths 2 and 3 only one ship at a time can be discharged because of a common pipe-line.

LPG is butane or propane. As there is one common pipe-line for LPG loading, only one ship at a time can be loaded.

Berth 8 is used for benzene loading, capacity 500 cu.m./h. and propylene loading, capacity 400 cu.m./h.

During cargo handling adequate crew shall be on board. A gangway watchman is not required.

Loading and Discharging Facilities:

Berth 1: Discharging rate 4,000 cu.m./h., shore line 24 in. diameter, arms No. 12 and No. 13, 2×12 in. diameter.

Loading rate for heavy fuel oil 3,500 cu.m./h., shore line 20 in. diameter, arms No. 12 and No. 13, 2×12 in. diameter.

Loading rate for diesel oil 2,000 cu.m./h., shore line 14 in. diameter, arm No. 14, 1×12 in. diameter.

Loading rate for gasoline 2,000 cu.m./h., arm No. 15, 1×12 in. diameter.

Loading rate for jet fuel 500 cu.m./h., arm No. 16, 1×8 in. diameter.
Deballasting 1,000 cu.m./h., arm No. 12, 1×12 in. diameter.
Bunkering rate 600 cu.m./h., arm No. 11, 1×8 in. diameter.
All flanges ANSI 150 lb., RF.

LPG loading rate 80 cu.m./h., hose 1×4 in. diameter, flanges ANSI 300 lb., RF.

Berth 2: Discharging rate 11,000 cu.m./h., main shore line 40 in. diameter, arms No. 22, No. 23 and No. 24, 3×16 in. diameter.

Loading rate for heavy fuel oil 5,000 cu.m./h., arm No. 22, 1×16 in. diameter.

Deballasting 1,000 cu.m./h., arm No. 22, 1×16 in. diameter.
Bunkering rate 600 cu.m./h., arm No. 21, 1×10 in. diameter.
All flanges ANSI 150 lb., RF.

Berth 3: Discharging rate 6,000 cu.m./h., main shore line 40 in. diameter, arms No. 34 and No. 35, 2×12 in. diameter.

Loading rate for heavy fuel oil 5,000 cu.m./h., arms No. 34 and No. 35, 2×12 in. diameter.

Loading rate for diesel oil 2,500 cu.m./h., arm No. 33, 1×12 in. diameter.

Deballasting 1,000 cu.m./h., arm No. 35, 1×12 in. diameter.
Bunkering rate 600 cu.m./h., arm No. 37, 1×8 in. diameter.
All flanges ANSI 150 lb., RF.

Berth 4: Discharging rate 6,000 cu.m./h., shore line 24 in. diameter, arms No. 42 and No. 43, 2×12 in. diameter.

Loading rate for heavy fuel oil 4,000 cu.m./h., shore line 20 in. or 24 in. diameter, arms No. 42 and No. 43 or No. 43 and No. 44, 2×12 in. diameter.

Loading rate for diesel oil, cat cracked spirit and unleaded gasoline 2,000 cu.m./h., arm No. 44, 1×12 in. diameter.

Loading rate for gasoline 2,000 cu.m./h., arm No. 45, 1×12 in. diameter.

Loading rate for straight-run naphtha 1,500 cu.m./h., arm No. 44, 1×12 in. diameter.

Loading rate for bitumen 1,000 cu.m./h., arm No. 40 1×8 in. diameter.

Deballasting 1,000 cu.m./h., arm No. 42 and No. 44, 2×12 in. diameter.

Bunkering rate 600 cu.m./h., arm No. 41, 1×8 in. diameter.
All flanges ANSI 150 lb., RF.
Discharge rate for coal: 11,000 tons per 24 hours.

Berth 5: Discharging rate 1,000 cu.m./h., arm No. 51, 1×8 in. diameter.

Loading rate for heavy fuel oil 1,000 cu.m./h., arm No. 51, 1×8 in. diameter.

Loading rate for diesel oil 1,000 cu.m./h., arm No. 52, 1×8 in. diameter.

Loading rate for gasoline 1,000 cu.m./h., arm No. 53, 1×8 in. diameter.

Deballasting 1,000 cu.m./h., arm No. 51, 1×8 in. diameter.

Bunkering rate for heavy fuel oil 600 cu.m./h., arm No. 51, 1×8 in. diameter.

Bunkering rate for diesel oil 40 to 1,000 cu.m./h., arm No. 52, 1×8 in. diameter and hose 1×2 in. diameter.

All flanges ANSI 150 lb., RF.

LPG loading rate 80 cu.m./h., hose 1×4 in. diameter, flanges ANSI 300 lb., RF.

Berth 8: Loading rate for benzene 500 cu.m./h., arm No. 81, 1×8 in. diameter.

Loading rate for phenol 100 cu.m./h., hose 1×6 in. diameter.
Loading rate for propylene 400 cu.m./h., hose 1×8 in. diameter.
Loading rate for oily water 100 cu.m./h., hose 1×4 in. diameter
Loading rate for acetone 300 cu.m./h., arm 1×8 in.
Flanges for propylene loading ANSI 300 lb., RF.
All other flanges ANSI 150 lb., RF.

Berth 9: (Formerly Kymi Kymmene Oy, Svartback Harbour).
Discharging rates for:

Styrenemonomer	500 cu.m./h.
Ortoksylene	500 cu.m./h.
Hexanol	500 cu.m./h.
Glykol	60 cu.m./h.
Oktanol	500 cu.m./h.
VCM	45-200 cu.m./h.
Isobutene	270 cu.m./h.
Ethylene (loading)	270 cu.m./h.
Vinylasetate	200 cu.m./h.
Alfol-610	500 cu.m./h.
Butadiene (loading)	270 cu.m./h.

BALLAST: There are facilities for discharging ballast at oil berths. However, discharging can be effected simultaneously only from 2 berths.

The capacity of the ballast handling system of the refinery is 30,000 cu.m. and the maximum discharging rate at each berth is 1,000 cu.m./h. Ballast over 5,000 cu.m. must be reported 48 hours prior to arrival.

The harbour office collects a charge to cover treatment costs for receiving ballast.

Berth No. 8: Flushing water for the tanks can be discharged provided that the pollutants can be handled in the Neste waste water treatment system. In that case the capacity is 100 cu.m./h.

MEDICAL: In emergency a doctor can be called on board. To call ambulance, dial 69-2222. The nearest hospitals are in Porvoo and in Helsinki. Ship's Agent helps in other medical problems, such as providing medicines.

DENSITY: 1006.

FRESH WATER: Drinking water can be supplied from:

Berths 1, 4 and 5	25 cu.m./h.
Berths 2 and 3	50 cu.m./h.(2 connections)
Berths 8 and 9	20 cu.m./h.

FUEL: Bunkering facilities are installed at oil berths. Two grades are available, marine fuel oil and marine diesel oil.

The bunkering capacities:

Marine fuel oil	600 cu.m./h.
Marine diesel oil	up to 1,000 cu.m./h.

The diesel oil can be delivered through product lines. Bunkers must be ordered with 72 hours' notice addressed to Neste Marine Product Sales, Telex: Hki 12-4641.

Bunkering at Berths No. 8 and 9 is by truck only.

GANGWAY/DECK WATCHMAN: Not required.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine or spirits for each man.

REPAIRS: Only minor repairs can be effected following the safety rules and with the permission of the harbour office.

REPATRIATION: Disembarking is possible. A foreigner needs a passport. Distance to Porvoo is 20 km. (12.5 miles) and to Helsinki 45 km. (28 miles).

AIRPORT: There are daily flights from Helsinki – Vantaa Airport with good connections all over the world. Distance to the airport is about 50 km. (30 miles).

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

TELEPHONE NUMBERS: After berthing a telephone connected to the local automatic exchange will be placed on board all vessels, the respective dial numbers being:

Berth 1	23333
Berth 2	23334
Berth 3	23335
Berth 4	23336
Berth 5	23337
Berth 8	23341

Important Numbers:

Harbour Office	23339 693115 and 693117
Customs	23293
"Esta"	23423 or 693134
"Esko"	23423 or 693134
Fire Alarm/ Ambulance	69-2222

Bus Connections, Taxi:

Bus connection daily to Porvoo from 0700 to 2300 hrs.

Taxi 24 hours

	Tel.
Neste Oy Taxi Station	23245
Pekema Oy Taxi Station	23390
K-O Johansson	22252

GENERAL: *Inspections:*

To avoid oil accidents, an inspection based on the checking list is carried out before loading/discharging to find out the preparedness of the vessel to act in an emergency.

Vessels loading/discharging oil products are surrounded by oil booms.

Inspections are carried out and loading/discharging is supervised by the Loading Master, whose instructions must be followed. If he is not on board, he can be contacted by telephone, No. 23339 or 693115 or 693117.

REGULATIONS: In addition to the existing Finnish laws, statutes and other regulations the Port Regulations of Neste Oil Harbours must be followed.

Some excerpts:

Entering the Harbour: Vessels carrying explosives or flammable liquids or gases shall observe what has been separately laid down concerning such cargo. The vessel shall show the prescribed caution sign in the harbour area.

Traffic in the Port Area: In the port area the speed of the vessel shall be according to the circumstances, so that no harm or danger shall be caused to anyone. Oil booms, underwater jobsites etc. shall be passed with special care. The maximum speed allowed in the port area is 6 (six) knots, unless otherwise stated by the Harbour Office.

Berthing of the Vessel: Without urgent need, anchorage is prohibited in the marked fairway, in the vicinity of the submarine pipe-lines or cables or in any place where the vessel may disturb the traffic.

The vessel shall be moored alongside the berth appointed by the Harbour Authorities and it shall not be removed without permission.

While berthing or unberthing or whilst moored at the berths the relevant safety precautions shall be taken to avoid any damage to the berths.

All ships' scuppers must be plugged or closed by mechanical means so that no water, steam or dirt comes into contact with the berth or its immediate vicinity.

A sufficient crew shall be maintained on board to ensure that the ship can be removed, if necessary.

Prevention of Shallowing and Contamination of the Harbour: In the port area it is prohibited to discharge oil or oil-emulsified water. In the Baltic Sea the existing restrictions must be observed.

The jettisoning of garbage and refuse is prohibited in the port area. The blowing of tubes and boilers of the ship while at the berth is prohibited.

AUTHORITY: Neste Oy, Porvoo Works, Harbour Office, 06850 Kulloo, Finland. *Tel:* 693106. *Telex:* 1746. *Contact:* Harbour Master.

RAAHE (Lapaluoto): 64.41 N. 24.29 E. (See Plan)

PORT LIMITS: Vessel is considered to be an "arrived vessel" subject to Charter Party Terms, when passing breakwaters if not ordered to anchor near Raahe Lighthouse by Port Authority.

DOCUMENTS:

Crew Lists.
Passenger List.
Ship's Register.
Custom List.
Provisions List.

PILOTAGE: Compulsory. To avoid delay in obtaining a Pilot the Owners, Master or Agent of the ship bound for Raahe must report vessel's ETA 6 hours in advance of ETA. ETAs must be confirmed or corrected not less than 2 hours prior to ETA by VHF contact with pilot station on Channel 16.

Pilots board and disembark by pilot cutter (red) near Raahe Lighthouse (Lat. 64° 39′ N., Long. 24° 13′ 5″ E.). Day and night service.

ANCHORAGES: Vessels can anchor outside Raahe Lighthouse, depth 15 m. – 20 m. No anchorages inside breakwaters.

RESTRICTIONS: No restrictions night entry.

MAX. SIZE: Lapaluoto Pier, depth inside 5.4 m., outside 6.7 m. Length 140 m.

Rautaruukki Oy Harbour; depth 7.8 m., length 200 m. (approx.).
Ore Pier, depth 6.7 m.

RADIO: Helsinki Radio, 2182 kHz, call sign OHG, Mariehamn Radio, 2182 kHz, call sign OFH; Vaasa Radio 2182 kHz and VHF Channels 16, 24 and 27, call sign OFW.

RADAR/VHF: No port radar services. Pilot station. Radio, 2182 kHz, VHF Channel 16. Rautaruukki Oy Harbour Office, VHF Channel 16 and tugboat "Rautaluoto" VHF Channel 16.

TUGS: Tug *Rautaluoto* 600 h.p.

STEVEDORES: Rautaruukki Oy, in Steelworks Harbour; Lapaluoto private firms.

SPECIALISED CARGO – HANDLING FACILITIES: Lapaluoto Harbour, no shore cranes, Ore Harbour (Helmi), only conveyor. Rautaruukki Oy Harbour, import quay equipped with three 12.5-ton shore cranes and conveyor; export quay equipped with one 12.5-ton and one 40 ton shore crane, straddle carriers and equipment for handling steel and general goods.

LIFEBOAT STATION: Lifeboat cutter "Niilo Saarinen", 360 h.p., 10 knots. Radio 2182 kHz, VHF Channel 16, Radar, fire and suction pump 4,000 litres/minute. Alarm through National Lifeboat Service, Pilot or Police Stations.

DENSITY: Average density 1002.

FRESH WATER: Available at all berths in Rautaruukki's harbour.

FUEL: Small quantities available, one day's notice required.

FIRE PRECAUTIONS: No special precautions in Lapaluoto Harbour.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally by the crew.

CUSTOMS ALLOWANCES: About 200 cigarettes and limited amount spirits per man.

CONSULS:

Denmark	31146 – 37269
Norway	31146 – 37269
Sweden	37300 – 37007

REPAIRS: Kone Oy, Mechanical Workshop. Slip for small ships.

DRY DOCKS: None.

AIRPORT: Oulunsalo Airport, about 60 km. from Raahe.

REPATRIATION: Crew changes and repatriation can be carried out without difficulties.

TIME: Local time is GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: New Year's Day; Twelfth Night; Good Friday; Easter Monday; Labour Day (1st May) holiday when no work takes place; Ascension Day; Whitsun Monday; Midsummer Day; All Saints' Day; Independence Day (6th December); Christmas Day and Boxing Day.

POLICE/AMBULANCE/FIRE: Police 37911; Ambulance; Fire and First Aid 005.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

GENERAL: Government ice-breaker assistance available when needed.

AUTHORITY: Rautaruukki Oy, Raahe Steel Works, Harbour Office, 92170 Raahensalo, Finland. *Tel:* 358-82-302304. *Telex:* 32132 Steel SF. *Cables:* Rautaruukki, Raahe. *Contact:* Captain R. Rahja, Harbour Master. Tel: 982-302304.

RAUMA: 61.08 N. 21.30 E. (See Plan)

PORT LIMITS: Southern entrance port limit when passing Tankkarit, northern entrance port limit when passing Riskonpoella.

DOCUMENTS: 2 Crew Lists and 1 Passenger List. Ship's Register, Customs Documents, Ship's Papers, etc. (Ship's Agent will give the necessary advice).

PILOTAGE: Pilot station at Kylmapihlaja-island, Lat. 61° 08′ 7″ N., Long. 21° 18′ 4″ E. International Pilot signals, VHF Channels 16 and 13. Fairways: Valkeakari 6.5 m.; deep passage 9.0 m.

ANCHORAGES: Ample area for anchorage in Archipelago.

RESTRICTIONS: Entrance: North Channel 6.5 m., South Channel 9.0 m., max. draft 9.0 m. Harbour open all year round.

MAX. SIZE: Draft limit only.

HEALTH: In the event of any suspect contagious disease ask for orders by wireless. Port Regulations do not allow such a ship to come alongside or closer than 350 yards. Pilot must not leave ship before allowed by the Doctor. Pilot does not board an infected ship but ship piloted to safe anchorage by pilot boat.

RADIO: Helsinki Radio, Hanko Radio, Mariehamn Radio and nearest station Vaasa Radio.
VHF: Vaasa VHF, intermittent watch on Channels 16, 26 and 28. Channel 16 used for calling Pilot, tug etc. Channels 13 and 12 for further operations.
RADAR: When required pilot station radar used for advising Pilot onboard.
TUGS: 3 ice-breaker tugs available (up to 3,500 bhp) 24 hours per day. 2 hours' notice recommended.
BERTHING:

Quay	*Length (m.)*	*Depth Alongside (m.)*	*Remarks*
Petajas	154	10.9 – 11.1	Bulk Cargo
Hakuni	250	6.7 – 7.3	General Cargo
Central	410	6.6 – 7.3	General Cargo
Laitsaari	280	9.15	General Cargo
Suoja	110	5.7	General Cargo
Chemical I	100	5.5	Liquid Cargo
Chemical II	110	7.25	Liquid Cargo
Oil	125	9.15	Oil Carriers
Ro-Ro No.1	—	6.6 – 6.8	—
No.2	250	6.7 – 7.3	—
No.3	120	8.6	—
No.4	110	8.5	—
No.5	—	5.0 – 7.3	Under construction

CRANES: 2×6 tons; 1×5 tons; 2×3 tons. 15 mobile cranes 5 – 42 tons available.
STEVEDORES: 24 hours' notice to Agent recommended.
BULK CARGO FACILITIES: Part of Central Quay for bulk carriers, shore cranes, max. draft 7.0 m.

Petajas Quay for bulk carriers, max. draft 9.0 m. (depth alongside 10.9 – 11.1 m.).

Facilities for grain cargo.

SPECIALISED CARGO – HANDLING FACILITIES: No special equipment for containers, but containers can be handled by harbour cranes and mobile cranes.

Good berths for Roll-on/Roll-off traffic.

Oil slop discharge to tanks available.

Different kinds of liquid chemicals can be handled in special berths.

MEDICAL: Advance notice recommended if possible. Hospital available (231 beds).
TANKERS: See "Berthing".
DENSITY: 1004 – 1003.
FRESH WATER: Fresh water available on quay. Charges depending on amount taken. An extra fee is charged if tug is used.
FUEL: Fuel brought by tank-trucks.
GANGWAY/DECK WATCHMEN: Available if wanted. Watchmen supplied by private company.
OPENING/CLOSING HATCHES: Performed by ship's crew or by Stevedores at request of ship.
CUSTOMS ALLOWANCES: Tobacco: 6 day's ration (about 200 cigarettes or 200 gm. tobacco). Wine and/or Spirits: 1 opened bottle of wine or liquor, subject to Customs Regulations.
CARGO GEAR: At Central Quay and Petajas Quay shore gear available. Other quays mobile gear or ship's gear.
CONSULS: Denmark, Norway and Sweden.
REPAIRS: All types available.
DRY DOCKS: Rauma-Repola Oy: Dry dock 159 m.×21.7 m.×7.3 m. All sorts of repairs. Hollming Oy: Slipway for ships up to 600 d.w.t. *Cranes:* Movable electric crane up to 80 tons.
SURVEYORS: Oy Saletra Ltd. *Tel:* 358-38-221440. *Telex:* 65184 SLTRA SF.
REPATRIATION: Repatriation and signing on or off.
AIRPORT: Pori – airport 50 km. away. Regular connections.
TIME: Local time is 2 hours ahead of Greenwich (Long. 30° E.). GMT plus 3 hours in Summer.
HOLIDAYS: See "Turku".
POLICE/AMBULANCE/FIRE: Police, 002 and 003; Ambulance, 006; Fire alarm, 005.
TELEPHONES: Oil quay, Laitsaari Quay and Iso-Hakuni Quay.
SERVICES: Compass adjusting facilities and compass adjusters.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Normally no identification card needed but passport or seaman's book preferable.
DELAYS: No delays in berthing, loading and discharging weather permitting.
DEVELOPMENTS: New warehouses and storage fields under construction.

Bulk berth to be completed December 1987.

AUTHORITY: Port of Rauma Authority, 26100 Rauma, Finland. *Tel:* 358 38 3411. *Telex:* 65182 Raupo Sf. *Cables:* Rauma Habour Master. *Contact:* General Manager or Harbour Master.

SAIMAA CANAL AND PORTS IN LAKE AREA OF SAIMAA (See Plan)

APPROACH CHANNELS: The canal can be reached from the international waters of the Gulf of Finland through an approach channel South of Someri. The channel passes the Island of Vihrevoi and continues, at the Island of Malyj Vysotski, as the Vysotski-Viipuri Channel, from which the approach channel departs at a distance of 10 km. from Malyj Vysotski. The length of the approach channel from the point of departure to the Brusnitchnoe Lock is 14 km. The distance from the international water area to the Island of Vihrevoi is 94.5 km. and the length of the section Vihrevoi-Malyj Vysotski 12 km. The total length of the channel from the territorial waters of the Soviet Union to the Brusnitchnoe Lock is thus 131 km.

From the territorial waters of Finland the canal may be reached through the so-called coastal channel starting from the Finnish border at the island of Santio and joining the above sea channel at the Island of Vihrevoi. The length of the channel from the border to Vihrevoi is 49 km. and the overall length to the Brusnitchnoe Lock is 85.5 km. The channel and its refuge harbours have been marked on the Soviet sea charts Nos. 1131 and 1132 and on Finnish charts Nos. 11 and 12. The coastal channel may only be used by Finnish vessels while vessels of other nationalities must use the sea channel, except for foreign tugs.

Canal: The length of the canal on the Finnish side of the border is 23.3 km. and that of the part on the Soviet side 19.6 km. The overall length of the Saimaa Canal is thus 42.9 km. The average difference in the height between Lake Saimaa and the Gulf of Finland is 75.6 m. The canal has 8 locks, the heights of fall of which range between 5.54 m. and 12.69 m. Earth transports will use the 7 moving bascule bridges and the 6 stationary bridges across the canal.

NAVIGATION SEASON: The natural open water season of the Saimaa Canal lasts on average 211 days. Since most vessels navigating in the Canal have been strengthened and inspected for navigation in ice, a season of navigation of nine months has lately been reached, the season beginning in early April and ending in January. The goal is to prolong little by little the season to ten months long.

The opening and closing of the season of navigation on the Canal is decided each year by the Finnish and Soviet Saimaa Canal Delegates. The opening will be announced not later than 1 day before the opening day and the closing not later than 7 days before the closing day.

During the season of navigation the Saimaa Canal and the other deep channels are kept open 24 hours a day.

PILOTAGE: *Use of Pilot is compulsory in the Soviet territory:* Pilotage in the Soviet water area is carried out by the Soviet Pilot Service. Pilotage is needed when using the outer channel between Vihrevoi – Brusnitchnoe and when using the coastal channel between the border – Brusnitchnoe. All vessels must use Pilot on these channel sections.

Pilotage on the Saimaa Canal: Pilotage on the section Brusnitchnoe – the lock of Malkia is carried out by canal pilots subordinated to the Saimaa Canal Office. All vessels, excluding small Finnish vessels less than 25 m. in length, shall use a Pilot when proceeding through the Canal. The Canal Office may grant upon application to a Master of a vessel the right to navigate a certain vessel on the Canal without a Pilot provided that the Master of the vessel has passed an examination required for the purpose.

Pilot must be ordered 12 hours in advance of point of receipt of Pilot: In navigation from the Gulf of Finland the Pilot must be ordered from the Viipuri Section of Inflot 12 hours before the arrival at the point where the Pilot is taken on board. The order must be checked 4 hours before the start of the pilotage. When using the coastal channel it is recommended, however, that the checking is done 6 hours before the start of the pilotage. To avoid excessive work by the Pilot Service and to eliminate delays special attention is to be paid to the accuracy of the time the pilotage is to be started, particularly in the last notifications.

In navigation from the Lake Saimaa the Pilot must be ordered from the Canal Office 12 hours before entrance into the Canal. The order must be checked two hours before the pilotage is to be started.

In navigation from the Gulf of Finland a Canal Pilot need not be ordered separately. Similarly, a Soviet Pilot for the approach channel need not be ordered separately when the vessel proceeds from Lake Saimaa.

Pilotage in the water system of Saimaa: Pilotage in the water system of Saimaa is carried out by Pilots of the National Board of Navigation in Finland. The order for Pilots shall be made 6 hours before the start of the pilotage to the pilot stations of Saimaa of the National Board of Navigation in Finland.

MAX. SIZE: The canal can be used by vessels with dimensions not exceeding the following:

Length	82.0 m.
beam	11.8 m.
draft	4.35 m.
height of mast	24.5 m.

The draft of a vessel in tow, however, shall not exceed 4.5 m. For vessels larger than those mentioned above, a permit for navigation on the canal may be granted upon application to the Canal Office of the Saimaa Canal.

The permit may contain regulations concerning the structure or equipment of the vessel or special provisions pertaining to navigation of the vessel on the canal such as good manoeuvrability, liability to wait or speed restrictions.

The Canal Office of the Saimaa Canal may also grant a vessel or equipment with slightly larger dimensions, carrying exceptional cargo, a Trip Let Pass for one passage through the canal.

The Rules and Regulations for Traffic on the Saimaa Canal also contain more detailed directions – among others on the permissible dimensions of vessels in tow and timber rafts using the open canal sections.

NEW VESSELS: When designing new vessels, to be used also in traffic through the Saimaa Canal, the designers are advised to consult the main dimensions and the structure of the vessels with the canal authorities. The conditions of navigation in the canal depend, first of all, on manoeuvrability, though certain other factors are also important.

MAXIMUM PERMISSIBLE SPEED AND TIME OF PASSAGE: The highest permissible speed on the actual channel of the Saimaa Canal is 9 km./hr. for vessels with a draft greater than 3.9 m. For vessels navigating on lesser drafts the speed is graduated within the limits of 9–15 km./hr. depending on the draft. In the lake parts of the Canal the highest permissible speed varies between 15–18 km./hr. depending on the size of the vessel. Detailed regulations available from the Canal Office. The time of passage through the part of the Canal provided with locks (mouth of the Canal on Lake Saimaa–Lock of Brusnitchnoe) is 5–8 hours depending on waiting time at locks caused by heavy traffic volumes, and on size of vessels.

SIGNS AND SIGNAL LIGHTS: The sign system of the approach channel of the Saimaa Canal, the canal and the channels on Lake Saimaa is adequate to ensure safe navigation throughout the day, also at night and in poor visibility.

The approach channel is provided with beacons, light buoys and signs in accordance with the lateral system. The signs have been erected by Soviet authorities. The illumination and the signalisation systems of the Saimaa Canal are based on the same principles with beacons and signs, but in the signal system of the canal, sign lanterns, signboards, line markers, water traffic signs and radar reflectors have been used. The colour of sign lanterns is orange on the West bank and green on the East bank of the canal. In marking of the lake channels of Saimaa according to the cardinal and lateral system, leading and warning lights, light buoys, range beacons, landmarks and signs have been used. Information of the marking of the water system of Saimaa has been issued as a booklet by the National Board of Navigation in Finland: “Sisavesistojen loistot I 1983” – “Beacons of Inland Water Areas I 1983”.

RADIO: There are two radiotelephone networks for marine use in the sphere of influence of the Saimaa Canal. On the frequency of 160 MHz reserved for actual marine radio communications there are also the Pilot radiotelephone and the public radiotelephone networks.

The Pilot radiotelephone network covers all stationary radiotelephone equipment at all locks, on the Kansola Bascule Bridge, at pilot stations and in the traffic office in the administrative building at Mustola as well as portable radiotelephone apparatus used by canal Pilots. The radiotelephone equipment of the canal Pilots operate on Channel 11 of the international marine radio. The telephone of the Brusnitchnoe Lock and the Lock of Malkia and the radio telephone in the Administrative Centre of the canal are also provided with a general calling and safety Channel 16.

When approaching from the sea the vessel makes a radio contact with the Brusnitchnoe Lock by using Channel 11. After this all radio communications required by navigation on the canal also use Channel 11. On Lake Saimaa, radio communications move over to Channel 13 on which the traffic office of the Saimaa Canal and the pilot station of Lauritsala are also able to operate.

The general radiotelephone network on Lake Saimaa (the so-called Saimaa Radio) uses Channels 23–28 of the international marine radio. The network covers the entire region of the water system of Saimaa extending from Lappeenranta to Iisalmi and Lake Pielinen. Channel 24 is the calling channel of the Saimaa Radio.

Two marine radio stations for general traffic have been built at Nuijamaa and Virolahti especially for navigation on the Saimaa Canal. Both radio stations are on duty and they are remote-controlled from the Coast Station of Kotka. The stations have the calling and safety Channel 16 and a calling Channel 24 for public traffic. The Nuijamaa Station operates on Channel 28 and the Virolahti Station on Channel 23. The range of the Nuijamaa Station extends from South of Viipuri to Southern Saimaa and the range of the Virolahti Station covers the entire Bay of Viipuri. The stations can be called either on Channel 16 or on the operating Channel. The Kotka Radio calls vessels either on Channel 16 or 24.

The principal purpose of both the Saimaa and the Kotka Radios is to ensure the communications of the safety service of navigation. These stations may also be used to transmit calls to the public telephone network – also to foreign countries – or vice versa, to receive calls from the public telephone network.

THE HARBOURS OF LAKE SAIMAA:

Mustola Harbour:
Situated in the Saimaa Canal.
Authority: The City of Lappeenranta, Harbour Office,
Address: Kipparinkatu 7, 53100 Lappeenranta, Finland.
Tel: Nat. (953) 518841, Int. + 358 53 518841.
Room for four ships, draft 4.35 m.
Terminal store of 3,200 sq.m., first class storage yard of 10,000 sq.m., second class storage yard of 30,000 sq.m.
Electricity, water, telephone, etc., services available.
Harbour Master, Tel: 518841.

Kaukas Quay:
Owner: Oy Kaukas Ab.
Address: 53200 Lappeenranta, Finland.
Tel: Nat. (953) 5141, Int + 358 53 5141.
Telex: 58211.
Room for two ships, draft 4.35 m.
Pilotage distance from the canal entrance 1.5 nautical miles.

Rapasaari Quay:
Authority: The City of Lappeenranta, Harbour Office.
Address: Kipparinkatu 7, 53100 Lappeenranta, Finland.
Tel: Nat. (953) + 518841, Int. + 358 53 518841.
Room for one ship, draft 4.35 m.
First class storage yard of 3,000 sq.m., second class storage yard of 3,000 sq.m. Railway connection.
Pilotage distance from the canal entrance 6 nautical miles.
Harbour Master, Tel: 518841.

Harbour of Joutseno:
Owner: Honkalahden Teollisuuslaituri Oy.
Address: 54100 Joutseno, Finland.
Tel: Nat. (953) 50560, Int. + 358 53 50560.
Room for one ship, draft 4.35 m.
First class storage area 3,000 sq.m.
Pilotage distance from the canal entrance 13 nautical miles.

Vuoksi and Kaukopaa Quays:
Situated in the City of Imatra.
Owner: Enso-Gutzeit Oy.
Address: 55800 Imatra, Finland.
Tel: Nat. (954) 31866, Int. + 358 54 31866.
Telex: 5710.
Room in both quays for one ship, draft 4.35 m.
Pilotage distance from the canal entrance 25 nautical miles.

Harbour of Ristiina:
Authority: The Community of Ristiina.
Address: 55800 Ristiina, Finland.
Tel: Nat. (955) 41310, Int. + 358 55 41310.
Room for one ship, draft 4.35 m.
First class storage yard of 5,000 sq.m.
Pilotage distance from the canal entrance 49 nautical miles.

Harbour of Savonlinna:
Authority: The City of Savonlinna, Technical Office.
Address: Olavinkatu 40, 57130 Savonlinna, Finland.
Tel: Nat. (957) 12771, Int. + 358 57 12771.
First class storage yard of 6,000 sq.m., second class storage yard of 5,000 sq.m. Railway connection.
Electricity, water, telephone, etc., services available.
Pilotage distance from the canal entrance 84 nautical miles.
Harbour Master, Tel: 12771.

Harbour of Joensuu:
Authority: The City of Joensuu, Harbour Office.
Address: Ukonniemi, 80220 Joensuu, Finland.
Tel: Nat. (973) 201335, Int. + 358 73 201335.
Room for three ships, draft 4.35 m.
Sawn goods shed of 1,200 sq.m., first class storage yard of 6,000 sq.m., second class storage yard of 60,000 sq.m. Railway connection.
Electricity, water, telephone, etc., services available.
Pilotage distance from the canal entrance 188 nautical miles.
Harbour Master, Tel: 201335.

Harbour of Puhos:
Situated in the Community of Kitee.
Owner: Puhoksen Satama Oy.
Address: 82430 Puhos, Finland.
Tel: Nat. (973) 421151, Int. + 358 73 421151.
Telex: 46160.
Room for one ship, draft 4.35 m.
First class storage yard of 5,000 sq.m.
Pilotage distance from the canal entrance 169 nautical miles.

Oil Harbour of Varkaus (Akonniemi):
Owner: Vapo Oy.
Address: Akonniemi, 78710 Varkaus, Finland.
Tel: Nat. (972) 13672, Int. + 358 72 13672.
Room for one tanker, draft 4.35 m.
Pilotage distance from the canal entrance 123 nautical miles.

Taipale Quay, Varkaus:
Authority: The City of Varkaus, Technical Office.
Address: Ahlstrominkatu 6, 78100 Varkaus, Finland.
Tel: Nat. (972) 292508, Int. + 358 72 292508.
Room for two ships, draft 4.35 m.
Quays are located in the Lock of Taipale, waiting berths for ships passing the Lock of Taipale.
First class storage yard of 6,000 sq.m.
Pilotage distance from the canal entrance 125 nautical miles.
Harbour Master, Tel: 292508.

Kosulanniemi Quay:
Owner: A. Ahlstrom Oy.
Address: P.O. Box 14, 78101 Varkaus, Finland.
Tel: Nat. (972) 251, Int. + 358 72 251.
Telex: 4315.
Room for two ships, draft 4.35 m.
Water, etc., services available.
Pilotage distance from the canal entrance 126 nautical miles.

Harbour of Kumpusaari:
Authority: The City of Kuopio, Harbour Office.
Address: Vuorikatu 27, 70100 Kuopio, Finland.
Tel: Nat. (971) 185191, Int. + 358 71 185191.

Room for two dry cargo ships and for one tanker, draft 4.20 m. Terminal store of 2,500 sq.m., sawn goods shed of 2,000 sq.m., first class storage yard of 25,000 sq.m., second class storage yard of 28,000 sq.m. Railway connection.

Electricity, water, telephone, etc., services available.

Harbour Master, Tel: 185191.

Oil Harbour of Kelloniemi:
Situated in the City of Kuopio.
Owner: Oy Esso Ab.
Address: Kelloniemi, 70460 Kuopio, Finland.
Tel: Nat. (971) 343333, Int. + 358 71 343333.
Room for one tanker, draft 4.20 m.
Pilotage distance from the canal entrance 169 nautical miles.

Siilinjarvi:
There are two quays, each with berthing for one vessel, in the Community of Siilinjarvi, draft 4.20 m.
Owner: Kemira Oy.
Address: 71800 Siilinjarvi, Finland.
Tel: Nat. (971) 421144, Int. + 358 71 421144.

Owner: Lohja Oy.
Address: 71800 Siilinjarvi, Finland.
Tel: Nat. (971) 431300, Int. + 358 71 431300.

TOLKKINEN (Tolkis): 60.20 N. 25.35 E.

PILOTAGE: Pilot arrives from port station at Emsalo (tel. 915 – 27710). Station equipped with VHF, radiotelephone and radar. Pilot boards between Kalbadagrund and Porvoo Lighthouse. Pilotage distance to port 22 miles.
APPROACHES: Max. draft of fairway from sea to roads 15.0 m., and from Roads to quay 7.0 m.
TUGS: Several tugs available from oil harbour.
BERTHING: Tolkis North Quay, depth 7.0 m. Tolkis South Quay, depth 5.2 m. Oil Harbour (see "Porvoo").
CRANES: Tolkis South Quay equipped with 1 movable crane. Lifting capacity 2.5 tons with grab and 5 tons with hook. Several mobile cranes up to 70 tons available for hire.
STEVEDORES: Working hours from 0700 – 1600 hrs. 4 – 5 gangs available Monday to Friday. On Saturday only 1 gang.
FUEL: Small quantity available by tank-car.
FRESH WATER: Fresh water available. Rate 8 t.p.h.
DENSITY: 1004.

AGENT: Oy Borga Stuveri Ab., 06750 Tolkis, Finland. Tel: 915 – 24530. After office hours: Tel: 915 – 143952. Telex: 1758 clear sf. Cables: Stevedore. Contact: Captain Christer Lindstrom. (Car Telephone No. 949-203952).

TORNIO: 65.51 N. 24.09 E. (See Plan)

The outer harbour of Tornio is Roytta situated about 6 miles S.W. of Tornio.
DOCUMENTS:
2 Crew Lists.
2 Provisions Lists.
Passenger List.
One set of Bills of Lading, Ship's Papers, Health Documents.
PILOTAGE: Ajos pilot station VHF Channel 16. Pilot to be taken on board by lighthouse "Kemi 2" in position 65° 30.3′ N., 24° 22.5′ E., 10 miles from Ajos.
ANCHORAGES: In Roads, depth is 24 ft.
MAX. SIZE: At same time there can be 2 vessels of 100 m. – 120 m. length, draft 21 ft. 06 in.; 2 vessels of 50 m. – 60 m. length alongside Main Quay; and 2 vessels of 50 m. – 60 m. length, draft 14 ft. at Old Quay.
RADIO: Vaasa Radio/OHX or Harnosand Radio, Sweden/SAH.
TUGS: No tugs available at Tornio. To be ordered from Kemi 12 hours before arrival.
CRANES: Three 20 ton mobile cranes for general cargo and several cranes for discharging bulk cargo.
STEVEDORES: Ordered by Agent (Telex 35 – 12). Agent must be given 24 hours ETA. Normal working time 0700 – 1100 hrs., 1200 – 1600 hrs. and 1600 – 2400 hrs. (Two shifts).
DENSITY: Fresh water.
FRESH WATER: Fresh water can be delivered by tank lorry (8 tons).
FUEL: Ordinary fuel by lorries from Kemi.
OPENING/CLOSING HATCHES: By the ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes or 200 grams tobacco and 1 bottle spirits.
CONSULS: France tel. 40473; Sweden tel. 23651; Norway tel. 14411.
REPAIRS: No docks but accommodation for small repairs.
AIRPORT: At Kemi, 20 km. from Tornio; served by Finnair.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
POLICE/AMBULANCE/FIRE: Police 003; Fire 005; Ambulance 006; Salvage 47472.
AUTHORITY: Tornion Satamakonttori, PL60, SF-95400 Tornio, Finland. *Tel:* 980 – 40416. *Contact:* J. Arvola, Harbour Master.

TURKU (Abo): 60.27 N. 22.15 E.

DOCUMENTS: See "Oulu".
PILOTAGE: Telegram to Agent with 24 hours ETA to sea pilot station.
There are 4 entrances:
Uto: Fairway 10 m., Radio Beacon, VHF, coastal radar, telephone via Hanko or Mariehamn Radio.
Nyhamn: 8.2 m. on Rodhamn, radio beacon.
Isokari-Enskar: 7.1 m., radio beacon, VHF radio.
Hanko: 7.3 m., radio beacon, telephone via Hanko Radio.
Lighthouse and Pilot at each.
All fairways sheltered. No tide. Channel to main harbour 10 m.
When approaching port ETA by VHF to Port Information Centre, international VHF Channel 12 for Harbour Pilot. Cutter whilst in action, same Channel, but takes orders from Information Centre only. Pilot cutters painted red with white circular field marked "L" on the bows. Flying flag in daylight, showing red and white lights vertically at night. Coming out when required to pilot station 0.75 miles from Main Harbour.
All ships arriving from sea will get necessary information from Sea Pilot, whose service is compulsory. Harbour Pilot not compulsory.
ANCHORAGES: Outer anchorage at Bay of Airisto, 2 miles from Port, 15 – 18 m.
MAX. SIZE: Maximum draft in Commercial Harbour 30 ft. fresh water. In Oil Harbour 28 ft. in fresh water. Max. length 230 m. and breadth of minor importance. No tides.
HEALTH: International Quarantine flag required in case of suspected disease or fever including preliminary report by VHF, otherwise, ask Agent.
RADIO: Hanko Radio and Mariehamn Radio. In addition these have telephone and VHF service. Local telephone network on VHF, Mariehamn on Channels 26 or 23 and Hanko on Channel 2.
TUGS: Advisable apply for tugs in advance. 6 tugs available.
BERTHING: Priority given to arriving and departing passenger ships on regular lines. 4 hydraulic stern loading Roll-on/Roll-off berths and 4 without hydraulics.
Total length of quays 4,896 m.

Canal Bank quay	Depth 27 ft.
West quay	Depth 27 ft. – 30 ft.
Coal quay	Depth 17 ft.
Oy Wartsila A/B	Depth 18 ft. – 26 ft.
Oy Wartsila A/B Perno	Depth 23 ft.
Linnanaukko quay	Depth 25 ft. – 27 ft.

Container facilities available.
Also see "Developments".
CRANES:

Quay	*No.*	*Capacity (tons)*	*Reach of arm (m.)*	*Type*
Canal Bank Quay	3	5	16	Movable
Linnanaukko Quay	7	5	24	Movable
	5	6	20	Movable
West Quay	1	60	20	Movable
	1	40	24	Multipurpose, movable
	4	6	24	Movable
Coal Quay	3	5	15	Movable
Oy Wartsila A/B				
Turku Shipyard	—	100-40-10	17.5	Movable
(only for dock work)		600		Movable
Valmetin Laivateollisuus Oy				Floating for dock work only
Pansion Telakka	1	30-6	19-39	

DENSITY: 1004.
STEVEDORES: Agent should be well informed about ETA and Master's Requirements. Normal working hours: 0630 – 1030, 1100 – 1500, 1500 – 2300. Saturdays and days preceding public holidays 0700 – 1530 hrs. The Port Office: 0900–1700 hrs. Saturdays and days preceding public holidays closed.
MEDICAL: All medical and hospital facilities available. No special requirements regarding inoculations, etc.
TANKERS: No special requirements. Small slop discharge facilities. 1 berth, depth 28 ft. for larger ships.
FRESH WATER: From pipe-lines along berths. Approx. 10.50 fmk. per ton.
FUEL: Most grades available. No advance notice necessary if from motor vehicles. In case of greater quantities, from Oil Harbour only. This requires advance notice to Agent.
GANGWAY/DECK WATCHMEN: Gangways to be rigged out so that they do not obstruct quay crane movements. Watchmen customary, but not necessarily hired.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CONSULS: The following countries are represented by Consuls or vice-consuls in Turku: Austria, Belgium, Denmark, France, Germany (F.R.), Great Britain, Greece, Honduras, Iceland, Italy, Norway, Portugal, Spain, Sweden and U.S.S.R.
REPAIRS: All types of repairs possible.
DRY DOCKS: Graving dock: length 183 m.×25.6 m.×8.3 m.
Floating dock: 155 m.×23.5 m.×7.0 m. with lifting capacity of 8,500 tons. Owner: Oy Wartsila A/B. Tel: 359500. Telegrams: "Wartsila". Telex: 62 228.
Floating dock: 155.0 m.×23.4 m.×7.0 m. with lifting capacity of 8,500 tons. Owner: Valmet Shipbuilding Group.
REPATRIATION: Good connections everywhere.
AIRPORT: 4 miles from port, regular lines.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: New Year's Day (January 1st); Twelfth Night (January 6th); Good Friday; Easter Bank Holiday; May 1st; Midsummer Day; All Saints' Day; Independence Day (December 6th); Christmas Day; (December 25th); Boxing Day (December 26th).
POLICE/AMBULANCE/FIRE: Dial 000.
GENERAL: Ice-breakers maintain Winter traffic.

TELEPHONES: Ships' telephones available.
IDENTIFICATION CARDS: Not needed.
DEVELOPMENTS: New warehouse for Ro-Ro traffic to be built at the West Quay.

Reclamation to take place in the port area.

Warehouse No. 28 has been pulled down. Re-construction to commence mid-1986.

AUTHORITY: Port of Turku Authority, Linnankatu 80, SF-20100 Turku, Finland. *Tel:* 21–674 111. *Telex:* 62190 Port Sf. *Contact:* Captain Kari Koski, Harbour Master. Henrik Pettersson, Port Director.

UUSIKAUPUNKI: 60.48 N. 21.24 E.

APPROACHES: 3 fairways lead to harbour through sheltering archipelago; Uto-Uusikaupunki, 78 miles; Isokari-Uusikaupunki, 13 miles; Kylmapihlaja-Uusikaupunki, 24 miles.

Good sheltered anchorage in the roads. Depth of fairways 10.0 m.

DOCUMENTS:
Agent will prepare during clearance:
2 Ship's Report.
1 Declaration List, Arrival (Board of Navigation).
1 Declaration List, Departure (Board of Navigation).
To be prepared before Arrival:
2 Provision Lists (own provision of the ship).
2 Special Lists (must be signed by each member of the crew).
2 Crew Lists.
Bill of Admeasurement.
Certificate of Registry.
Ice-class Certificate (during Winter months, 1st December-30th April, issued by hull surveyor).
Bill of Lights (issued by Customs).

PILOTAGE: Embark Pilot at Isokari or Uto Pilot Stations. Distance through archipelago Isokari-Uusikaupunki 13 miles, Uto-Uusikaupunki 78 miles. Under normal circumstances first fairway recommended. During Winter months, if ice-situation difficult in Gulf of Bothnia, traffic goes via Uto.

Both pilot stations equipped with radio 2182 kHz, Channels 16 and 24, VHF duplex-Channels 18, 20 or 22 and radar. Pilot-boat red, with letter "L" and fitted with VHF Channels 13 and 16. Pilot boards usually between Sandback-Isokari, to where "Hauteri" light leads in line 134.5° – 314.5° (T). Notice of ETA at least 4 hours prior reaching station.

ANCHORAGES: Many areas of safe anchorages in Archipelago. Pilot advises.

RESTRICTIONS: No entry restrictions. No tide. During North and East winds sea-level can fall about 40 cm. below normal, which may sometimes delay deep loaded vessels reaching port.

HEALTH: Pratique not necessary. In the event of any disease/fever on board or in last port of departure, vessel has to inform before arrival, hoist quarantine-flags, or in darkness 2 lights, red light above white, showing all round horizon.

RADIO: Mariehamn Radio OFH; Helsinki Radio OHG.

TUGS: 2 available; normally tugs join vessel at port, ship's lines used.

BERTHING: *Kemira Quay:* 340 m. long, owned by fertiliser factory Kemira Oy, has depth 10 m. alongside, two 8 ton cranes, two discharging pipes, one for discharging ammonia at minus 32° C and one for sulphur acid. Discharging capacity depending material 140-170 tons/hour/crane and loading/discharging bags 45-50 tons/hour/crane.

Esso Quay: 40 m. long, owned by Oy Esso AB, depth in channel and alongside 5 m. Terminal is used for discharging LP gas.

Telakka Quay: 140 m. long, owned by Uudenkaupungin Telakka Oy, has depth alongside 5 m. Quay is only used for ship repairs, and fitting works for new buildings. There is also a floating dock with 5,000 ton capacity.

Hepokari Pier: 90 m. long and 18 m. breadth, owned by town. Channel and alongside depth 7 m. There is terminal on South side for Ro-Ro traffic.

Saunasilta Quay: 60 m. long and depth 3.5 m., owned by town. Used only by small coasters.

STEVEDORES: Available. Contact Agent.

MEDICAL: Hospital facilities, vaccination, certificates, etc., available. Contact Agent.

TANKERS: For discharging and loading liquid ammonia – Marine Loading arm "Luceat/Chiksan, Type RCMA" 8 in., ASA 300.

DENSITY: No tide, density 1004.

FRESH WATER: Water-hoses, about 20 t.p.h.

FUEL: Fuel available, contact Agent.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: All certificates according to International Convention for the Safety of Life at Sea, Class Certificate, etc.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per each member of the crew. Wine and/or Spirit: 1 bottle wine or spirit per each member of the crew.

CARGO GEAR: No additional requirements.

CONSULS: None.

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: Uudenkaupungin Telakka Oy has a floating dock, lifting power 5,000 tons, draft 6.1 m., breadth 19.6 m., and length 130 m.

REPATRIATION: Facilities exist for effecting crew changes and arranging any necessary repatriations.

AIRPORT: Distance to Turku Airport about 90 km. Airport is served by regular Airlines.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: Official Holidays are: New Year's Day (January 1st); May 1st; Midsummer Day (Saturday between June 20th and June 26th); Independence Day (December 6th). Usually no work on those days.

POLICE/AMBULANCE/FIRE: Police 002 or 3002; Ambulance 3005; Fire 005 or 3005.

TELEPHONES: Available.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Not needed.

AUTHORITY: Uusikaupunki Harbour Office, Satamantie 9, 23500 Uusikaupunki. *Tel:* 922 – 22963/21511. *Cables:* Satamatoimisto. *Contact:* Harbour Master.

VAASA: 63.06 N. 21.36 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
2 Customs Documents.
2 Health Documents.
5 Manifests.
5 Bills of Lading.

PILOTAGE: Pilot vessel not cruising in open sea. Meets ship 2 miles N.W. of Vaasa Lighthouse (Lat. 63° 14.36′ N., 20° 55.75′ E.).

Pilot signals: Letter "G" as flag, light or sound. Radio telephone call: Pilots watching 24 hours on 2182 kHz, also VHF.

Pilot vessel: 30 ft. motor yacht with wheelhouse and radar. Hull red all over with letter "L" painted on bow.

Harbour Pilot available from Vaasa Pilot Station Tel. 527725.

ANCHORAGES: To Pilot's advice.

RESTRICTIONS: No locks. Fairway lit all the way. Depth of Channel 9.0 m.

No tide, but water level may be reduced by up to 20 in. in Spring and early Summer, or increased by 10 in. to 25 in. in Autumn.

MAX. SIZE: Depth alongside piers up to 29 ft. 4 in. At the Oil Harbour, max. recommended LOA is 610 ft., depth 26 ft. 3 in.

HEALTH: See "Documents" – no restrictions. Hospital and Doctor for any purpose available.

RADIO: Vaasa Radio – OFW 2803 kHz.

RADAR/VHF: No radar service in port area. Pilot vessels at sea pilot stations equipped with radar. VHF radios on pilot stations, harbour tug-boat and Harbour Office. Channels 16, 13 and 12.

TUGS: Harbour tug-boat and ice-breaker 1,200 h.p., 727 kW. available 24 hours. Radio telephone/VHF – call sign OIQE. Charge according to size.

BERTHING: 2 piers of 180 m. length and the Reins Quay of 240 m. length. Depth 23 ft. 0 in. to 29 ft. 4 in. New Coal Quay length 145.9 m., depth 29 ft. 4 in. There are 3×5 ton cranes on the South Pier.

The Ferry Pier, 106 m. and 118 m. length, depth alongside 5.0 m. with berths for Ro/Ro traffic (4 Ro/Ro ramps).

CRANES: 3×5 tons and mobile cranes up to 100 tons.

STEVEDORES: ETA as usual according to C/P to Agent, etc.

MEDICAL: If serious illness advance notice to Agent necessary.

TANKERS: The Oil Harbour is at Vasklot. Depth alongside 26 ft. 3 in. Tankers discharge through three arms of 500 mm. and 400 mm. diameter. Storage capacity 500,000 cu.m.

DENSITY: 1004-1006. No tide.

FRESH WATER: Available, no limit. Direct from quay-side, through pipes, rate about 25 t.p.h.

FUEL: All grades of bunker fuel available – direct from oil jetty or by lorries to berth.

FIRE PRECAUTIONS: Dry cargo ships; no smoking in holds. Tankers: usual restrictions. Tankers with petrol cargo not allowed to berth at dry cargo piers.

GANGWAY/DECK WATCHMEN: Not compulsory, ship's own crew can be used.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES:
Safety Equipment Certificate.
Stability Certificate.
Load Line Certificate.
Derrick and Hoisting Gear Test Certificate.
Derat Certificate.
Nationality Certificate.
Measurement Certificate.
Ice-class Bill.

CUSTOMS ALLOWANCES: Tobacco: Max. 200 cigarettes per man or 50 gm. of tobacco. Wine/Spirit: Maximum 1 bottle of each per man to be opened and used on board only.

CARGO GEAR: Cargo gear test book to be in order – all gear to be tested within a year otherwise risks for breaks in discharging/loading.

IDENTIFICATION CARDS: Not needed.

CONSULS:
Belgium
Denmark
France
Netherlands
Norway
Sweden
United Kingdom

REPAIRS: Nearest dry dock at Rauma.

REPATRIATION: Can be carried out easily.

AIRPORT: Vaasa Airport (about 8 miles from town) served by regular airlines, domestic and abroad, Stockholm, U.K., Continent, etc.

TIME: Local time GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: Working hours in port: 0700 – 1100 hrs., 1300 – 1600 hrs. Monday to Friday, Saturday: 0700 – 1100 hrs. Sunday free. Working days in port: Monday to Saturday. Working days ashore: Usually Monday to Friday. All banks closed on Saturday. Shops open all weekdays. Other holidays: 6th December – Independence Day – Christmas, etc., as usual.
TELEPHONES: Can be arranged on board.
POLICE/AMBULANCE/FIRE: Police 002; General Emergency No. 000.
GENERAL: Ships approaching port of Vaasa in Winter time (January-May) when sea area icebound, have to call any of Government ice-breakers operating in area or to inform Harbour Authorities of exact ETA – engine power, size and nationality, and whether strengthened for ice or not. Call signs, etc., for Government ice-breaker can be obtained from nearest coast radio station.
SERVICES: Compass adjusting available.
DELAYS: Only Winter time when Government ice-breaker is arranging, waiting or assisting in outbound convoys of ships.
AUTHORITY: Vaasa Harbour Office, SF-65170 Vaasa 17, Finland. *Tel:* 358-61-112162. *Contact:* Lars Holmqvist, Harbour Master.

VEITSILUOTO: 65.42 N. 24.37 E. (See Plan)

DOCUMENTS: Usual documents for Finnish ports. In addition the Harbour Master requires a copy of the Crew List.
PILOTAGE: Inwards compulsory for vessel in foreign trade. Boarding about 8 miles before Ajos. Ajos Pilot Station may be contacted on VHF Channel 16/13.
ANCHORAGES: Good holding ground about 1 mile from Rautakallio and by Koivuhauta 2 miles from harbour entrance.
RESTRICTIONS: No tide. Entry by day or night. Approach Channel, depth 7.1 m. It is recommended that vessels longer than 150 m. and with a minimal keel clearance avoid berthing under unfavourable weather conditions.
MAX. SIZE: See "Berthing".
VHF: Make initial contact on Channel 16/13.
HEALTH: See "Oulu".
TUGS: Available when required, charges according to net tonnage. Use ship's lines.
BERTHING: Total length of Quays 574.5 m.
Berth No. 1: Length 135.5 m. Depth 7.1 m.
Berth Nos. 2 and 3: Total length 209 m. Depth 7.1 m.
Berth Nos. 4 and 5: Total length 230 m. Depth 7.1 m.
Max. draft at all berths 7.1 m.
CRANES: Load/discharge by ship's gear or mobile cranes.
SPECIALISED CARGO HANDLING FACILITIES: 2 Ro/Ro berths, no special equipment.
STEVEDORES: Ordered by Agent.
MEDICAL: Hospital at Kemi. Masters to advise if medical attendance required aboard.
FRESH WATER: Available at short notice.
FUEL: Ordinary fuel, diesel and gas oil. Deliveries by lorries only.
FIRE PRECAUTIONS: No special precautions. Company's fire-fighting corps.
GANGWAY/DECK WATCHMEN: Available, ordered by Agent.
OPENING/CLOSING HATCHES: By crew.
IDENTIFICATION CARDS: Not required.
CONSULS: Norway, others at Kemi.
REPAIRS: Available at Kemi.
SERVICES: Radar repairs possible in Kemi.
AIRPORT: At Kemi, approx. 15 km. from port.
POLICE/AMBULANCE/FIRE: The nearest emergency services are available through the Alarm Centre of the Veitsiluoto Company, telephone number 22. If you phone outside the Company, call first 8141 (the number of the Company), and then ask for number 22.
SHORE LEAVE: Crew members allowed ashore.
DELAYS: Not normally expected.
REGULATIONS: Port regulations delivered to ship on arrival on request.
AUTHORITY: Veitsiluoto Oy, SF-94830 Kemi, Finland. *Tel:* (980) 814452. *Telex:* 3614 Vto Sf. *Contact:* Harbour Master, Tel: (980) 82017.

NOTES

France

GENERAL

NOTICE TO MARINERS: No. 2005/81

Regulations concerning vessels laden with hydrocarbons (including oil) or other dangerous cargoes approaching French ports.

Regulations have been promulgated by the French Authorities concerning vessels laden with hydrocarbons (including oil) or other dangerous cargoes in the approaches to French Mediterranean ports and the ports in Corse.

Any such vessel intending to enter French territorial waters (including Corse) from seaward, or to sail from a French port or anchorage, is required to signal certain details to the Prefet Maritime of the Third Region at Toulon 6 hours beforehand. Should there be any subsequent change in the vessel's intended movements, or in her material state, a further signal should be made. All such vessels are required, throughout their stay in French territorial waters, except when lying alongside in port, to maintain radio watch on Channel 16 or the local frequency, if applicable.

Any such vessel which suffers significant damage at sea, or the threat of damage, from whatever cause, while within 50 miles of the French coasts, is required to signal certain details to the Prefet Maritime at Toulon. Subsequent developments must be reported, including the time of requesting assistance, the expected time of its arrival and the actual time of arrival. Any ship joining the damaged vessel to render assistance is required to signal details to the Prefet Maritime, and to render reports on the casualty on arrival. These signals are informative and do not constitute a request for rescue or assistance.

For details of all signals required above see *Admiralty List of Radio Signals, Vol. 6.*

Vessels exceeding 1,600 gross tons laden with hydrocarbons (including oil) or other dangerous cargoes must not approach the French coasts within 7 miles, unless instructed to do so by the French authorities or within the port approach channels listed below. Exceptions to this rule are made in the channel between Corse and Capraia, where the minimum distance is reduced to 5 miles, and in the Bonifacio Strait.

Such vessels approaching, or departing from, the ports of Port-la-Nouvelle, Sete, l'Espiguette, Golfe de Fos, Marseille, Toulon, Antibes, Ajaccio, Porto Vecchio, Solenzara, Lucciana and Bastia are required to use the charted port approach channels. When in these channels such vessels are priority vessels and must display Flag "B" of the International Code by day, and exhibit one red light, visible all round, at night. The provisions of Rule 9 of the *International Regulations for Preventing Collisions at Sea (1972)* explicitly apply.

NOTICE TO MARINERS: No. 2379/81.

Regulations concerning tankers laden with hydrocarbons and vessels carrying dangerous cargoes navigating in the approaches to the N. and W. coasts of France.

The French authorities have issued the following regulations concerning the above mentioned vessels.

(a) **Laden vessels exceeding 1,600 tons gross** must keep at least 7 nautical miles from the French coast, unless otherwise instructed by a Prefet Maritime, except within:–

The N.E.-bound lane of the Dover Strait traffic separation scheme.

Race of Alderney.

The access channels to the following ports:

Dunkerque, Calais, Boulogne, Dieppe, Fecamp, Le Havre-Antifer, Rouen, and the ports of the lower Seine, Caen/Ouistreham, Cherbourg, Granville, Val de Saire transhipment area, Saint-Malo, Saint-Brieuc, Roscoff, Brest, Douarnenez, Concarneau, Lorient, ports of the Loire, Les Sables-d'Olonne, La Rochelle/La Pallice, Ports of the Gironde, Bayonne.

(b) **Vessels intending to enter French territorial waters (12 miles) or to sail from a French port or anchorage,** are required to inform Marine Brest and Marine Cherbourg 6 hours beforehand, either by radio or through the port authority, giving the following details:–

Prefix	SURNAV FRANCE
A	Name, nationality and call sign.
B	Date and time (GMT) suffixed "Z".
C	Position.
E	Course.
F	Speed.
I	Destination.
J	Date, time (GMT) and position of entering French territorial waters or of getting underway.
K	Date, time (GMT) and position of leaving French territorial waters, or of arriving at destination in French waters.
N	RT watch being maintained.
P	Draft.
Q	Cargo: type (as defined in MARPOL 73) and quantity.
R	Whether manoeuvring ability is normal or impaired by defects in propulsion, steering or anchoring equipment.
S	Whether operational fitness is normal or impaired by defects in radar, radio, safety or ballasting equipment.

Any subsequent changes should be reported immediately.

Constant listening watch must be maintained on Channel 16, or a frequency specified for this purpose by a local authority throughout the period the vessel is in French territorial waters, except when lying alongside in a port.

(c) **Vessels within French territorial waters suffering from an impairment of normal navigational or manoeuvring capability,** are required to take such an action as the Prefet Maritime may require to ensure, the safety of navigation and to avoid the threat of pollution.

(d) **Vessels within 50 nautical miles of the French coast suffering damage or having defects,** are required to report to Marine Brest and Marine Cherbourg any occurrence (collision, stranding, incident on board or external) which could result in damage to the vessel or cargo.

Any vessel going to the assistance of the damaged vessel is also required to make a report.

These reports are informative and do not constitute a request for rescue or assistance.

Requests for assistance, if required, should be made in accordance with international regulations, keeping Marine Brest and Marine Cherbourg informed.

The damaged and the assisting vessel are required to take such action as the Prefet Maritime may direct with a view to avoiding danger to navigation and threat of pollution, whether they are in French territorial waters or international waters.

Form of signalled report to be made by the damaged vessel:–

Prefix	SURNAV AVARIES
A	Name, nationality and call sign.
B	Date and time (GMT) suffixed "Z".
C	Position.
E	Course.
F	Speed.
I	Destination.
J	Time (GMT) and nature of a call for assistance or towage.
K	Name of assisting vessel, if present, or ETA (GMT).
M	Name and telegraphic address of Owner, Charterer and any French consignee.
N	Radio watch being maintained.
P	Draft.
Q	Cargo: type (as defined in MARPOL 73) and quantity.
R	Nature of damage or development of the situation.
T	Any other information.

Subsequent developments are also to be reported.

Form of signalled report to be made by the assisting vessel:– Prefix and A to I as above, but details applicable to the assisting vessel.

J	Date, time (GMT) and position of casualty.
K	Name, nationality and call sign of casualty.
L	Course of casualty, or destination, if known.
M	Speed of casualty, if known.
N	Radio watch being maintained.
Q	Cargo of casualty if known.
R	Damage of casualty.
T	Any other information.

Further reports on the casualty are required after arrival.

(e) **Laden vessels exceeding 1,600 tons approaching or departing from the following French ports:–** Saint-Malo, Saint-Brieuc, Roscoff, Brest, Douarnenez, Concarneau, Lorient, ports of the Loire, Les Sables-d'Olonne, La Rochelle/La Pallice, ports of the Gironde, Bayonne are required to comply with the following regulations:–

To use the authorised approach and entry channels and waiting areas.

Inform the Port Authority on entering the approach channel.

When in these channels and waiting areas, display Flag B of the International Code of Signals by day and exhibit one red light at night, clearly visible all round.

Anchoring or waiting in the approach and entry channels is not permitted except in emergency, in which event the Port Authority must be informed as soon as possible.

Vessels crossing approach or entry channels should do so as nearly as possible at right angles to the channel and well clear of vessels in the channel.

These regulations do not in any way absolve Masters and Pilots from the requirement to comply with the International Regulations for Preventing Collisions at Sea (1972).

For further details of signals required by the above regulations see *Admiralty List of Radio Signals Vol. 6.*

Similar messages must be sent to Marine Toulon by vessels in the Mediterranean.

Navigation in the French Territorial Waters:

Any ship as specified above must keep permanently 7 nautical miles off the French Coast, except:

1. When entering a French harbour, in the specified channel leading to this harbour;
2. In the N.E. lane of the Dover Straits Separation Scheme;
3. In the Channel of Corsica between the Italian island of Capraia and the Corsican shore, where the limit is reduced to 5 nautical miles.

DISTRESS, SEARCH AND RESCUE:

Search and Rescue operations are controlled by the following organisations:

1. Centre Regional Operational de Surveillance et de Sauvetage pour la Manche-Mer du Nord (CROSSMA) covers the North coast of France from the Belgian border to Mont St. Michel (48° 38′ N., 1° 31′ W.). Stations at Cap Gris Nez (50° 52′ N., 1° 35′ E.). and Jobourg (49° 41′ N., 1° 54.5′ W.) maintain a continuous watch on 2182 kHz and VHF Channels 16 and 11.

2. Centre Regional Operational de Surveillance et de Sauvetage Corsen-Ouessant (CROSSCO) covers the N.W. coast of France from Mont St. Michel to the latitude of Pointe du Raz (48° 02′ N.). A station at Corsen (48° 25′ N., 4° 48′ W.) maintains a continuous watch on 2182 kHz and VHF Channels 16 and 11.
3. Centre Regional Operational de Surveillance et de Sauvetage pour L'Atlantique (CROSSA) covers the Atlantic coast of France from the latitude of Pointe du Raz (48° 02′ N.) to the Spanish border. Stations at Etel (47° 39′ N., 3° 12′ W.) and Soulac (45° 31′ N., 1° 07′ W.) maintain a continuous watch on 2182 kHz and VHF Channel 16.
4. Centre Regional Operational de Surveillance et de Sauvetage Mediterranee (CROSSMED) covers the Mediterranean coast of France. A station at Toulon (43° 06′ N., 6° 00′ E.) maintains a continuous watch on 2182 kHz, 2677 kHz and VHF Channel 16. A station at Agde (43° 18′ N., 3° 30′ E.) maintains 0500–2100 watch from 15th June to 15th September on 2182 kHz, 2677 kHz and VHF Channel 16.

AJACCIO, Corsica: 41.55 N. 08.44 E. (See Plan)

DOCUMENTS:

Cargo Vessels:
1 Stores List.
1 Personal Effects List.
1 Crew List.
1 Passenger List.
2 Manifests.
Ship's Register.

Passenger Vessels:
1 Stores List.
1 Personal Effects List.
3 Crew Lists.
3 Passenger Lists.
Ship's Register.
2 Manifests.

PILOTAGE: No advance notice required for regular ships. Vessels call Pilot with 3 blasts on ship's siren. Pilot boat flies usual Pilot flag. Pilot joins approaching vessel at a line Isolella/Chapelle des Grecs. Available 24 hours a day. Pilot boat has VHF Channel 6.

ANCHORAGES: Several safe anchorages in harbour which can be indicated by Pilot.

MAX. SIZE: Length 200 m., draft 7 m. At anchor, no limit.

HEALTH: Health Officer boards on arrival. Pratique automatic unless suspected contagious disease on board, when it is necessary to notify Agent or Health authorities in advance by cable.

RADIO: ETA cables, etc., via Grasse Radio, Marseilles Radio or Ajaccio Radio. VHF Channel 24. Captain of the Port. Tel: (95) 21.68.34.

TUGS: None available.

BERTHING: Regular vessels have priority at all berths.

CRANES: Up to 20 tons.

STEVEDORES: Advice should be sent 24 hours prior to arrival. French vessels have priority of labour.

MEDICAL: Advance notice required Tel: 21.52.08. All hospital facilities available. Except in the case of an epidemic in any country from which the vessel has sailed, no inoculations or vaccinations are necessary.

TANKERS: Max. draft 6 m., length 110 m. Preferably with bow thrust unit. Gas tankers also preferable with bow thrust unit.

FRESH WATER: Available at all berths, except Gas Berth.

FUEL: All grades available, 48 hours notice required.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Ship's Register.

CUSTOMS ALLOWANCES: Tobacco, 2 oz. or 200 cigarettes per member of crew. Wine, no restrictions. Spirits 1×20 oz. bottle.

IDENTIFICATION CARDS: Required.

CONSULS: Greek, Dutch, Monaco, Danish, Swedish, Finnish.

REPAIRS: Minor repairs can be carried out.

SURVEYORS: None.

DRY DOCKS: None.

REPATRIATION: Can be arranged by Ship's Agents.

AIRPORT: 8 km. from port. Served daily by Air France regular lines.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; Easter Monday; Whit Monday; 1st May; 14th July; 15th August; 1st November; 11th November; 25th December. Cargo work can be arranged on all dates except 1st November.

POLICE/AMBULANCE/FIRE: Police 0.17; Ambulance 21.50.50 (SAMU); Fire 0.18.

TELEPHONES: Can be placed on board warships only.

BANKS: Banque de France, Tel: (95) 21.00.05. Telex: Banfra Ajacc 460083; Banque Internationale pour l'Afrique Occidentale, Tel: (95) 21.34.75. Telex: Bancafr 460291; Banque Worms, Tel: (95) 21.00.13. ANTIBES: 43.35 N. 07.08 E. (See Plan)

DOCUMENTS:

(a) For Harbour Master:
Ships Papers.
Declaration of Exit and Entry.
Crew List.
Passenger List.

(b) For Customs:
Health Declaration.
Provision List.

PILOTAGE: Not obligatory for yachts. Port cannot receive pleasure boats longer than 40 m. Ensure pilotage authorities advised of ETA. VHF Channel 9 day and night.

ANCHORAGE: In winds of N.E. to S.E. anchorage in front of Antibes not advised. Recommended anchor in Bay de Golfe-Juan, in shelter of Cap d'Antibes, in direction of Juan-les-Pins. In winds from N.W. to S.W., good anchorages on East face of Cap d'Antibes, Bay of Garoupe, Bay of La Salis, Bay of Ilette.

RESTRICTIONS: Night entry not advised.

MAX. SIZE: For yachts length 50 m., width 6 m., draft 3.5 m.

VHF: Port Captain on VHF Channel 9 throughout 24 hours.

TUGS: None.

FUEL: For pleasure boats only.

CONSULS: None.

REPAIRS: For pleasure boats only. 2 travelifts for boats of max. weight 45 tonnes and 120 tonnes.

REPATRIATION: Must be arranged through Consulates at Nice.

AIRPORT: Nice, Cote d'Azur. 15 km.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Tel. Police 93.33.58.58 and 17; Ambulance 18; Fire 18 and 93.33.65.00.

SERVICES: Water and electricity on each pier.

AUTHORITY: Capitainerie du Port d'Antibes, Port Vauban, S.A.E.M. de Gestion, Port Vauban, 06600 Antibes. *Tel:* (93) 34.74.00. *Telex:* 970480 F. *Contact:* J. Pluym, Le Commandant du Port.

BASTIA, Corsica: 42.41 N. 09.27 E.

DOCUMENTS: See "Ajaccio".

PILOTAGE: Address, Vieux Port 20, Bastia. Tel: 315095. VHF Channel 16. Pilot boats, 12 m. long, black and white with navigation and pilotage lights. Previous advice to Pilots necessary before arrival. Pilot boards in bay of Porto Vecchio, North of the citadel.

ANCHORAGE: Anchoring not recommended in Easterly winds. Depth 15 m. to 30 m. in Porto Vecchio Bay. Bastia harbour: up to 4.50 m. deep.

RESTRICTIONS: Ships may enter harbour any time.

MAX. SIZE: Max. length: 160 m.; draft 7 m.

TUGS: None available.

BERTHING: Ships berth in order of arrival. Accommodation for about 10 ships. General Cargo.

Mooring carried out by watermen. Same address as Pilots.

MEDICAL: Medical controls made by Customs officer. Doctor available.

FRESH WATER: Supplied ashore.

FUEL: Available in small amounts.

FIRE PRECAUTIONS: General rules. One wharf reserved for tankers.

GANGWAY/DECK WATCHMEN: Night watchman supplied by Agent.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: None on entry, 10 packets cigarettes when leaving. Wine/spirits unlimited when leaving.

IDENTIFICATION CARDS: Required.

CONSULS: Nearest at Ajaccio.

REPATRIATION: No facilities exist.

AIRPORT: Bastia 20 km. from ports. Departures every day to continent.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Police, 1881; Ambulance, 2281 733–2686; Firemen, 018-088.

TELEPHONES: As a rule telephone is put only on naval ships.

SHORE LEAVE: Crew may go ashore.

AUTHORITY: Bureau du Port, Quai de la Sante, Bastia. *Tel:* 31-31-12. *Contact:* J. Fusella, Port Captain.

BAYONNE: 43.30 N. 01.28 W. **(See Plan)**

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
3 Lists of Provisions on Board.
3 Individual Lists of Tobacco and Spirits.
3 Manifests of Cargo.
1 Set Bills of Lading.

PILOTAGE: Station extends 3 miles between the parallel of Ondres to the North and the limit of French territorial waters to the South. When weather permits, the pilot boat comes out of l'Adour and comes alongside ships near the light buoy situated W.N.W. of the port entrance. Contact Pilot at least 12 hours before arrival relaying through Bordeaux Arcachon Radio and stay on radio watch in the pilot zone. VHF Channel 12.

ANCHORAGE: Ships must not anchor in the river.

RESTRICTIONS: In bad weather ships are led to take the Pilot at the pilot boat which is based on St. Jean-de-Luz and are led either towards l'Adour or to the anchorage of St. Jean-de-Luz.

When alongside, even in fine weather, a swell may be experienced causing lines to part.

MAX. SIZE: The Adour is accessible to ships of 160 m. length (15,000 – 20,000 tonnes). Depth at the mouth varies with the seasons and are maintained by dredging. They are never less than 7 m. during Summer but during Winter can be reduced following Westerly storms. The height of the tide has to be added to these depths but the draft can never exceed 8.0 m.

HEALTH: A Declaration of Health Form is lodged by the Customs Service on arrival; it must be completed by the Master. In case of a suspect illness, advise Agent 24 hours in advance.

RADIO: Bordeaux – Arcachon Radio. The signal tower on the South side of the mouth, and the Harbour Master's Office, in the tower, has a VHF radio station, Channel 12.

TUGS: 1 tug available, 1,250 h.p., 10 tons bollard pull. Request for tug through the Agent. Tug waits at the entrance to the Adour.

BERTHING: When working berth is occupied, vessel is directed to a waiting berth. Large ships or those carrying dangerous cargo can be requested to wait outside the entrance.

Berth	Max. Length Vessel	Recommended Draft
Socadour	150 m.	29.5 ft.
Cement Wharf	160 m.	24 ft.
Satec Wharf	160 m.	24 ft.
Grain Silo	130 m.	23 ft.
SNPA Sulphur Quay	150 m.	25 ft.
Other berths	120 m.	22 ft.

BULK HANDLING FACILITIES: Silos with capacity 60,000 tonnes (maize). Rate 450 t.p.h.

3 silos, total capacity 10,000 tonnes at Armand Gommes Quay.

Phosphate handled at Boucau Quay with 3 cranes of 10 tonnes capacity, feeding conveyor belts with capacity 350 t.p.h. – 400 t.p.h.

CRANES: Edmond Foy Quay: 3×3 ton and 2×6 ton cranes.
Pierre Le Roy Quay: 4×3 – 4 tonne cranes.
Boucau Quay (Socadour): 2×10 tonne cranes.
Marcel Forgues Quay: 1×10 tonne and 1×8 tonne crane.
Jean Letellier Quay (private): 1×10 tonne crane.
Armand Gommes Quay: 2×3 – 4 tonne cranes.

STEVEDORES: Arrival must be notified to Agent 24 hours in advance.

MEDICAL: Medical attendance can be organised by the Agent without advance notice, Hospital and private clinic available. However, if medical attendance required as soon as the ship arrives, particularly at night, it is advisable to send a radio message 12–15 hours before the arrival of the ship.

TANKERS: No installation to receive residues. Two berths for unloading of refined products. Refinery de Midi: max. length 120 m., max. draft 6 m. Saint Gobain, length 150 m. max. draft. 24 ft.

FRESH WATER: Available at each berth, minimum supply 3 cu.m.

FUEL: Available by arrangements in advance through Agent or suppliers.

GANGWAY/DECK WATCHMEN: Not obligatory except for ships with dangerous merchandise on board.

OPENING/CLOSING HATCHES: Generally carried out by the crew.

CUSTOMS ALLOWANCES: 200 grammes or 250 grammes of tobacco for each crew member and for 8 days (must without fail be declared in the individual list of provisions). 1 bottle of wine or spirits (must without fail be declared in the individual list of provisions).

IDENTIFICATION CARDS: Not necessary – seaman's identity card sufficient.

CONSULS:

Belgium
Brazil
Chile
Spain
Finland
Norway
Peru
Portugal
Sweden
United Kingdom
Uruguay

REPAIRS: Running repairs to hull, machinery, radio and radar can be effected.

SURVEYORS: Bureau Veritas. Tel: 25.20.44.

DRY DOCK: Usable length 98 m. Length on stocks 94.1 m. Width of entry 15 m. Depth above sill, neap tides 4.5 m., spring tides 6 m.

REPATRIATION: Possible for all countries as well as crew changes.

AIRPORT: At Biarritz: 7 km. away. Regular service with Paris. Two services per week to and from London.

TIME: European Standard Time: GMT plus 1 hour and GMT plus 2 hours from 2nd April to 1st October.

HOLIDAYS: 1st January; Easter Sunday/Monday; 1st May; Ascension Day; Whit Sunday/Monday; 14th July; 15th August; 1st November; 25th December.

POLICE/AMBULANCE/FIRE: Police, telephone 17 or 55.84.09. Anglet: 17 or 03.76.10 Boucau: 17 or 55.29.53. St. Leon Hospital: 63.50.50. Fire Station: 18 or 59.21.84.

TELEPHONES: Telephones on board not possible.

SHORE LEAVE: Crew are authorised to go ashore.

AUTHORITY: Direction Departementale de L'Equipement Alles Maritimes, 64109 Bayonne. *Tel:* (59) 25.43.60 *Contact:* Ch. Lesbordes, L'Ingenieur Des T.P.E.

Capitainerie du Port, 128 Av. de L'Adour, Anglet. *Tel:* 63.11.57. *Telex:* Porbayo 55 04 57.

BORDEAUX (inc. Verdon, Bassens, Ambes, Pauillac, Blaye): 44.50 N. 00.34 W. **(See Plan)**

DOCUMENTS:

Tonnage Certificate.
2 copies Provisions List.
2 copies Personal Effects List.
2 copies Crew List.
Customs Clearance.
Crew Manifests.
Check List.

PILOTAGE: To embark and disembark at sea from ships entering or leaving the Gironde Estuary, Pilots use either a 17 m. fast launch or a twin-turbine helicopter Ecureuil AS355F1.

With the helicopter, winching is the normal procedure to transfer Pilots.

The service at sea extends from 1 hour before to 5 hours after Cordouan LW.

For container ships, special arrangements can be made through the Agent.

When weather conditions do not permit service to ships at sea, the Pilot boards as soon as possible, after the ship has crossed the bar. In that case and after Master's agreement, a Pilot gives navigation assistance from Verdon shore-based radar station, until Pilot's boarding point or for outward ships, from Pilot's disembarking point to sea.

Vessels should announce their arrival at 'BXA' Fairway Buoy at least 24 hours in advance to the Commandant du Port de Bordeaux through Coast Station "Bordeaux-Arcachon Radio". Masters must confirm to the pilot station at least 12 hours before arrival their ETA, ship's draft and speed, and give their agreement for an eventual helicopter operation. *Three hours before arrival at 'BXA'*, Masters must contact Gironde Pilot Station on Channel 16 or 6 and communicate on Channel 6 or 12. Ships can also call Verdon Pilot Station by Telephone No. 56.09.63.85 or by Telex PILVDON550167F.

Ships leaving ports located between Santander and Lorient, must send the above mentioned message on departure. In case of any change of more than 3 hours of the initial ETA, Masters must send a correcting message.

Helicopter Service: The helicopter is red and white, and "PILOTE BX" is painted in black. The VHF call sign is "PAPA GOLF" or "Gironde Pilot Helicopter". During the flight, VHF contact between the ship and helicopter must be maintained on Channels 6 or 12.

The Pilot is boarding in the vicinity of 'BXA' Fairway Buoy and winching is the normal procedure. Depending on weather conditions, the Master may be requested to alter the course or speed of the ship for safe boarding of the Pilot.

The helicopter is working in accordance with International regulations and particularly with the rules of the International Chamber of Shipping.

Masters are asked to watch very carefully the following points:

– check that there are no horizontal aerials or wires above the helicopter's manoeuvring zone

– check that no loose object, in the proximity of the manoeuvring zone, could be swept up by the effects of the wind created by the rotor blades

– at night, the manoeuvring zone must be well illuminated but in such a way that the helicopter Pilot is not dazzled

– if necessary, provide for washing the area to avoid dust being blown around by the effects of the rotor.

No extra charge for the Pilot boarding by helicopter.

Pilot Launch Service: When operating with a fast launch, the Pilot boards between 'BXA' Fairway Buoy and the entrance to Grande Passe de l'Ouest. Masters are requested to maintain a speed of about 5 knots. The pilot ladder should be rigged well amidships and the bottom of the ladder should be 1.50 m. above the water level. No line or rope shall be attached to the bottom of the pilot ladder.

The pilot launch keeps watch on VHF Channels 16 and 6.

Vessels less than 70. m. long, for which pilotage from the sea to Verdon is not compulsory, may embark River Pilot at Le Verdon providing Masters have advised the pilot station accordingly.

ANCHORAGE: The normal waiting anchorage area is the Roadstead of Le Verdon, depth 10 m. to 12 m. and sand silt bottom. The big tankers with more than 10 m. draft find a good anchoring area in the Saintonge Roadstead with a depth of 15 m. to 20 m. (sand silt bottom).

APPROACHES:

Report: 1986

Of primary concern in approaching or leaving the berths is the difficulty of the channel between Le Verdon and Ambes, especially for inbound/outbound tankers at the maximum draft.

When loading full cargo at Bordeaux/Ambes, Masters have to pay careful attention to the maximum permissible draft alongside at LW and to the maximum draft (fresh water) allowed for transitting channel outbound, owing to the many shelves especially around the Buoys 20 and 28.

Port Approaches: There is no special navigation difficulty for approaching 'BXA' Light buoy, though there is no noticeable landmark by daytime, but the 'BXA' Racon is efficient and the buoys of the entrance channel Passe de l'Ouest are detected early on the radar. The soundings may also give useful information.

Anchoring outside is *not* recommended during bad weather owing to the heavy swell. Ships have to use the tide to transit the River Channel which takes about 4 hours. They need about 2 hours for taking the Pilot and proceed to the Le Verdon Roads where they enter the river.

Best arrival time at 'BXA' Light buoy is between 4 to 6 hours before the HW of Pointe de Grave; this will avoid anchoring, leaving sufficient time for Master/Pilot exchange on the soundings in the channels which are the major problem during the transit for deep drafted tankers, especially in the river. Movements are carried out on a round the clock basis.

Heights of water are given on VHF Channel 11, every 5 minutes, for many places in the river corresponding to the main shoal areas (given in metres in the French language).

A monthly recommended maximum draft for vessels proceeding to and sailing from Ambes A.P. and E.D.F. is issued and always calculated based on fresh water. This sheet is given to the Agent and may be given to the Master when the Pilot boards.

The Under Keel Clearance considered in this draft calculation is mainly subject to local atmospheric and hydrological conditions but never less than 0.50 m. for the river transit. Meanwhile, in the River Channel, siltation and moving soft mud patches may reduce the deep draft passage width between the buoys. The Pilot must know these latest limitations as the Port Authority cannot give a complete safe sounding statement to Masters.

RESTRICTIONS: The great entrance to the Gironde estuary (Western entrance) is dredged to a depth of 13.50 m. under the zero of French sea charts. It permits the sailing in of ships with a draft of 15 m. (49 ft.) at practically all tides.

MAX. SIZE: Verdon Petroleum Harbour. Tankers up to 350 m. length or approximately 230,000 d.w.t. can be accepted, with 50% load.

Bec d'Ambes: Tankers up to 32 ft. 6 in. draft, 210 m. length.

Pauillac: Tankers up to 32 ft. draft, 240 m. length.

Bassens: Vessels up to 34 ft. draft.

Blaye: Vessels up to 25 ft. draft.

HEALTH: Vessel should ask for Free Pratique by radio at least 12 hours before arriving at port. Message should be addressed to Sanipor – Bordeaux routed via Bordeaux/Arcachon Radio. Otherwise, Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique, Master should radio Agent before arrival, advising full details.

Health Control: Vaccination Centre, 110 bis, quai des Chartrons (Shed 14). Tel: 56.50.64.52 or 56.90.91.21 ext. 397.

RADAR/VHF: Port radar is in operation in the Gironde estuary and approaches. Vessels may contact this station for navigation information by calling Verdon Port Radio on VHF Channel 14.

RADIO: Arcachon Bordeaux Port Radio: Radiotelephony 1,862 kHz. Radiotelegraphy 421 kHz.

Port Authority by VHF: Calling band 156.8 MHz Channel 16. Traffic band 156.6 MHz Channel 12 (port). Traffic and 156.7 MHz Channel 14 (radar).

Pilots: Telegraphy: watch on 500 kHz at the prescribed hours. Telephony: continuous watch on 2,182 kHz. VHF: continuous watch on Channel 6.

Every vessel fitted with HF radio equipment shall keep a constant watch and be in contact with "Arcachon-Bordeaux-Port-Radio" Station when navigating in the area between the landing buoy and her berth, or at least watch at the sending times of this station, when moored and awaiting orders.

Every vessel fitted with VHF radio equipment, shall also keep permanent watch and maintain contact with the Port Operations Station on 156.6 MHz (Channel 12) when navigating in the zones indicated below, or when moored and awaiting orders.

Le Verdon zone: call "Radar-Verdon".

Bordeaux zone: call "Port-Bordeaux".

TUGS: Tug assistance is available as ordered by the Pilot. Tugs will join vessels at the following places: In Verdon Roads for vessels mooring at Verdon. In Pauillac Roads for vessels mooring at Pauillac. At Buoy BA1 for vessels mooring at Ambes. Off the Harbour Basins for vessels mooring at Bordeaux Docks.

As a rule ship's tow-lines are used; when a tug line is required there will be an additional charge.

BERTHING: *Le Verdon Deep Water Terminal:* 2 containership berths, length 600 m., depth alongside 13 m. at LW; slip for quarter ramp Ro/Ro handling. Operations carried out 24 hours a day 7 days a week. 100 power points for reefer containers. 3 container gantry cranes (1×32 ton and 2×40 tons capacity below spreader). One is multi-purpose and can work with a 30 ton grab for bulk unloading.

Riverside Quays: 18 berths, depth alongside 7.5 m. – 9 m. at LW. Electric cranes available. 6 berths are now reserved as waiting berths.

Enclosed Docks: 2 basins joined by a lock 25 m. wide. Entrance effected by two locks of the following dimensions: Large lock 146 m. long 22 m. wide. Small lock 100 m. long 14 m. wide. Depth of water in the basins is maintained at 6.50 m. These are now used only for repairs and yachting.

Queyries: 493 m. long, depths offered are 7 m. alongside. 4×6 ton cranes.

Bassens-Amont: 1,225 m. long, depth alongside at LW up to 9.5 m. (7 berths). The quay caters for general trade. Equipped with 9 cranes of 4/6 tons, 2 of 12/15 tons, 2 Caillard cranes 15/24 tons, the upper sector has been developed as a heavy bulk berth able to accommodate ore carriers of 40,000 d.w.t. ladened with 30,000 tons of cargo. Ships can be unloaded at a rate of 10,000 tons per day. This upper sector is available for phosphate cargoes.

The heavy bulk storage zone has a capacity of 128,000 cu.m. It is served by two railway sidings with road/rail weighbridges for re-dispatch.

One of the berth at Bassens-Amont is equipped to cater for molasses which can be stored in 3 reservoirs.

Bassens-Amont is also the centre of the ports phosphate traffic, bound for neighbouring industries and stocked in a silo depot, which is linked to the quay by a conveyor belt network.

During the last quarter of 1982, the bulk trades received at Bassens-Amont ceded their place to general cargo. In the context of this redevelopment, which enables better throughput rates and more flexibility, a 6,000 sq.m. shed has been built. Containers are already provided with a storage yard of 12,000 sq.m. in the first sector and will have on completion, 20,000 sq.m. in the second sector; they are handled by 2 Caillard cranes of 15/24 tons.

Bassens-Aval: 11 berths, total length 1,474 m. Depth alongside 9.50 m. – 11.0 m. at LW. 15×4 ton cranes, 2×2.5 – 6 ton cranes, 2×15 ton – 24 ton Caillard cranes and 5×15 ton – 25 ton Ceretti cranes.

A Bulk terminal is available with discharge capacity 2,000 t.p.h. Max. size 120,000 d.w.t.

In addition there are facilities for heavy bulk goods, coal; forest products terminal; grain conveyors of 150 t.p.h., 400 t.p.h., 600 t.p.h. and 900 t.p.h.

Blaye: Public berth 8.0 m. draft, 170 m. long.

Pauillac: Public berth for vessels drawing up to 10 m. Total quay length 290 m.

Also see "General".

TANKERS: *Verdon Terminal:* Main berth. The ship is berthed on elastic dolphins (steel pipes) with an available depth of 17 m. Ship makes fast with own hawsers on four mooring dolphins, two up and two down on the wharf and set back about 35 m. from the face. This mooring is strengthened by very flexible steel warp hawsers of 55 and 60 mm. diameter. Five hawsers of this type may be placed at each end of vessel according to needs and weather conditions. Ships must have strong chain or claw-stoppers for turning on bitts.

For crude oil, the berths have following equipment: 1×30 in. line connecting the main berth to storage; 1×16 in. line connecting the coaster berth to the foresaid lines; 2 lines for bunkering. Discharge rate, 10,000 t.p.h.

Arms for connecting pipe-lines to ship. Connecting of the crude oil pipe-lines is made by ASA type, 16 in. Mannesmann arms (4 at main berth – 1 at the coaster berth). The Port Authority has a number of connecting collars in various dimensions and types. Ships are requested to inform before arrival on the type and data of their own collars. Connecting to the bunkering line is made by flexible hoses (ships must use their own handling gear).

Fire wire must be rigged on forecastle and poop, the eye 1 m. (3 ft.) above the water (all the time) when ship is light. Each fire wire must have a 10 m. (30 ft.) coil laying between bitts and fair lead.

If no other request, the ship is assisted by 2 tugs (with Kort nozzle 23 ton thrust) one of which stays at disposal during the call.

Secondary berth. This berth is for the use of shuttle-service ships, lighters and coasters, depth of 7.0 m. alongside.

Fire-fighting line. A 12 in. line supplies the wharf and the 2 berths with sea water under pressure. At each berth there are fire-fighting hydrants. The first help material for fire-fighting is ready to use at each call. It includes spray nozzles, water and foam hoses, emulsion liquid containers, powder extinguisher systems (movable and portable).

Bunkering. Supply is made by lighters mooring at the coaster berth. Securing of lighters alongside tankers is forbidden, except with special permission of the Port Authority.

Telephone. Telephone is connected to every ship on arrival. In that way the ship is regularly connected to the French telephone network (Tel. No. 56.09.63.92 – Le Verdon).

Pauillac: Oil installation operated by Shell, 33 ft. alongside.

Ambes: Terminal for tankers up to 210 m. length, 32 ft. 6 in. draft. Operated by Societe Elf and Esso. Also see "Shipmaster's Report" – dated June 1981.

There is a new private wharf at Ambes, catering for liquified gas tankers. Length, 125 m. Maximum ship's length 145 m. Max. draft 7.70 m.

Unloading by articulated arm which connects to ship's manifold. This manifold should be as close to the central perpendicular as possible.

Standard security measures for handling propane and butane. This berth belongs to Cobogal and has been allotted Berth No. 515.

Bassens: See "Report" dated March 1981.

DENSITY: Verdon 1023 to 1015. Pauillac 1026 to 1000. Ambes approximately 1000. Bordeaux approximately 1000.

FUEL: Vessels wishing to bunker during their call at Bordeaux-Le Verdon, shall make known their needs of quantity and quality to their Agents or consignees before arrival in port. Requests must be forwarded, 48 hours in advance (at least), to one of the bunkering Agents of the following companies:

Shell – Bassens. Tel: 56.81.21.55.
Esso – Worms. Tel: 56.90.93.80.
ELF/SIMA. Tel: 56.50.56.70.
B.P. Floirac. Tel: 56.86.53.25.
Total C.F.R. Tel: 56.85.00.33.

A very large proportion of the bunkering fuels comes from the Shell refinery at Pauillac. These fuel-oils are mainly intermediate oils made by viscosity mixing between 80 and 460 centistocks (at 50°). Orders must therefore be for a quantity of at least 400 tons.

The quality control of mixtures is carried out by the Shell refinery laboratory, whose opening hours are: Monday: from 0400 to 1630 hrs. Tuesday, Wednesday, Thursday, Friday & Saturday: from 0400 to 2000 hrs.

MEDICAL: All facilities available. Malaria and cholera vaccinations can be performed at the Military Hospital or at the Port Vaccination Centre (Shed 14).

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of alcohol per man.

IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.

TELEPHONES: Can be connected on board vessels moored at quays in Bordeaux, Bassens, Ambes, Pauillac, and Verdon.

GENERAL:

Mooring Regulations: Vessels fitted with radio equipment, which, for any accidental cause, (engine damage, fog, etc.) are obliged to moor or ground at any point in the area between the landing buoy "BXA" and the "Ponts de Pierre" (Stone Bridges) at Bordeaux and Libourne, must immediately indicate their mooring or grounding position, by cable to the Harbour Master, Bordeaux. In all cases, the text of the message must specify whether the moored or grounded vessels interferes or not with shipping.

Berthing: Berthing is carried out on the advice of the Pilot, following instructions from the Harbour Officers.

Special precautions are recommended during Spring Tide periods to ensure that vessels in the river are held fast to the quay.

The following instructions apply:

Special Instructions for Securing Vessels at the Quay During Spring Tide Periods (K › 90).

Given the disturbances caused by the strong currents of tides with a K of over 90, the securing of vessels on the quay must receive unremitting attention.

Pilots shall pay close attention to the mooring lines, for which the Master remains constantly responsible.

Masters shall follow Pilot's instructions and provide all means asked for in terms of both manpower and equipment.

A strict surveillance is necessary to ensure that lines remain correctly secured by adjusting them according to the height of the tides.

A sufficient number of crew shall be kept on board, to carry out any handling which might eventually be ordered by the Harbour Officers.

Fire Fighting: 1. All vessels berthed in the Port of Bordeaux, be they loading, discharging, or under repair, must have permanently on board a sufficient watch to keep effective surveillance, to take all preventive measures and to fight any fire on board.

2. It falls to the Master or the watch, and this under their sole responsibility, to use the signalling equipment at their disposal.

3. Communication and signalling equipment. Telephones and fire hydrants available on all quays.

4. Fire fighting is carried out under the direction of the Master, but gangs intervening, especially the fire brigade, remain under the command of their respective officers.

The ship's crew must be able to guide the rescue teams. A plan of the ship and her loading plans, in particular those showing the location of dangerous goods on board, shall be put at their disposal on arrival. Where there is a risk of the fire spreading, for which the Harbour Master is the sole judge, he shall lead operations and order all necessary steps to be taken to safeguard public interests.

REPORT: The following report was received from a Ship Operator in March 1981.

Michelins Reception Facilities at Bassens:

1. The equipment consists of 2 pipes: One 10 in. diameter with a normal capacity of 500 cu.m./h.and the other 6 in. diameter. These capacity limits result from the meter which is fitted. Either pipe can be used independently according to conditions and features of the ship's pumps and equipment. The absolute maximum pressure allowed in whole system is 10 bars.

Length of pipes:

2,315 m. for 10 in. pipe.

2,274 m. for the 6 in. pipe.

The equipment incorporates a meter post consisting of a Smith LB 250 volumeter normal temperature – 3 degrees normal pressure, 8 bars accuracy, 0.2 outputs of between 110 and 570 cu.m./.h. The equipment does not include a vapour return line.

2. Deliveries must be made by tanker vessels specifically designed and fully equipped for carriage and refrigerated liquid gases. The liquid must be delivered at a temperature of between −2° and −5° Celcius when measured at the ship's discharge connection.

The ship must be fitted with suitable pumping equipment, in full working order and of a capacity sufficient to maintain throughout the whole unloading operation and under the condition of temperature and pressure already specified, an hourly delivery rate at least equal 1/16th the total shipment and in any case not less than 100 cu.m./h. As indicating the pumps must be specifically designed for the movement of butadiene in the order that any premature failure, or suction of gas, be avoided. A further reason for the pumps and compressors being in perfect condition is that the quay is public and any delay prejudicial to the movement of vessels requiring to use it. The ship's discharge equipment must include a security device capable ensuring at all times, both under normal conditions and in the event of accidental or unforeseen mishandling that the delivery pressure at the connection point for the hose never exceeds 10 bars.

The ship must have lifting gear (derrick, hoist, etc.) with a minimum 2 tons capacity and sufficient reach to maintain the flexible hose at right height, even at low tide. The ship must be capable of completely emptying each tank and the systematic use of nitrogen must be avoided, as it is detrimental to the manufacturing process.

To enable receivers to prepare for cargo, following information required at least one week prior arrival of vessel.

1. The position of discharge outlets in relation to central axis of vessel and to the level of the deck.

2. Type and diameter and thread dimensions of the sampling connection.

3. Diameter and details of the ship's outlet union.

4. The details of the discharging equipment for each pump or compressor.

5. The normal and maximum rates of discharge and pressure of delivery should be given.

The vessel is equipped with 2 sampling positions in the middle and lower positions of each tank.

Notice of Arrival: Either the seller or the carrier must give to the Bordeaux Authorities (Port Autonome de Bordeaux) notice of the estimated arrival of the vessel at Bassens either 7 days advance of the tanker getting under way at the previous port of call should this be less than 7 days before arrival. Confirmation of the arrival of the vessel off the Gironde Fairway/Buoy (BXA) must be given to the Bordeaux Port Authorities by cable, telex or other means at least 24 hours in advance.

If the vessel is likely to arrive during a weekend, Michelin Bassens must be informed by Friday mid-day at the latest, otherwise operations will not be able to commence before 0800 hrs. on Monday.

Discharge: The ship's crew must scrupulously observe all general security regulations, together with any particular ones laid down by the officials appointed by the Bordeaux Port Authority to supervise the safety of discharging operations.

Receivers cannot be held responsible for any mishandling, excessive pressure or untimely purging that may occur during the discharge operation due to the vessel, or for the consequences of any failure to observe the security regulations by any person not employed by Michelin.

On arrival of the ship, Michelin, assisted by the crew, will connect up the shore line to the ship's outlets union by means of flexible hose. The ship's crew will be responsible for the use of their own lifting equipment (crane and derricks) for the raising of the flexible pipe to a sufficient level above the quay so as to take into account the tide. Jointly with representatives of the ship and the sellers, Michelin will proceed with, the drawing of samples from each tank (for quality control).

The Liaison of Discharging Procedures: Michelin's representatives are to be introduced to the crew members appointed to the discharging operation.

Throughout the duration of the discharging operations the rate and pressure of the output must remain constant and within the agreed limits in order that the metering equipment shall function correctly. On having completed discharge of the liquid from the last tank, the ship must cease pumping to permit:

The meter post personnel to by-pass the meters.

Michelin in conjunction with the representatives of the seller and the ship, to check the remaining cargo (the weight of liquid butadiene discharged thus being determined).

The gas can then be pumped out – the quantity being determined by measuring the difference in pressure and temperature of the ship's tanks, on the assumption that it contains only gas both before and after pumping out.

Unloading Completion: On the representatives of the sellers and the ship agreeing that the discharge of the butadiene has been satisfactorily completed, the receiver's personnel and the ship's crew will uncouple the flexible hose.

In the event that after complete discharge of all liquid, it is agreed between the ship and the seller to pump out the gas, the quantity involved will be calculated by measuring the difference in pressure and temperature of the ship's tanks, on the assumption that they held only gas both before and after pumping.

DEVELOPMENTS: Dredging underway in the Bassens area in order to accommodate vessels up to 11 m. draft by 1988.

SHIPMASTER'S REPORT: June 1981.

Bordeaux – Bec d'Ambes: If proceeding further up river then Sea Pilot leaves at Le Verdon and River Pilot boards. Pilot gives an Inwards Declaration which (different from EEC check list) is to be completed and handed to Port Officer after boarding.

Reference Admiralty List of Radio Signals, Volume 6, 1980, Part 1, Page 205, paragraph (2), vessels wishing to enter La Gironde should address the 24 hour message to "Capiport Bordeaux" and 3 hours before entering French Territorial Waters should request, via 'Capiport' permission to enter La Gironde. These messages are free of charge.

Port regulations require the berthing (River Pilot) Pilot to stand-by, together with 1 tug, until a loaded vessel has lightened to 28 ft. fresh water maximum draft.

When berthing starboard side to then one tug on port bow and second tug just for pushing.

Usually, first ropes on board are one shore head wire and one shore head breast. Final moorings usually 2 shore heads, 2 shore breast, (fore and aft) and 2 shore stern lines, and 2 springs each end from ship.

The shore moorings consist of a chain cable connected to the shore, this is connected to a 57 mm. wire which is made fast on board. The wires are hove on board by means of a messenger (ship) which is attached to a small size, long length pennant attached to the 57 mm. wire. The shore end of the 57 mm. wire is attached to a chain cable thus creating a 'catenary effect' which proves very good in keeping the vessel alongside. For berthing there is one shore rigger each end to advise and assist.

For unberthing one rigger boards to assist in singling up to 1 shore wire and one back spring each end. He then goes ashore by pilot ladder. Vessels berth day and night depending on tide.

Agent requires in advance the distances from bow and stern to centre of manifold.

AUTHORITY: Port Autonome de Bordeaux, Palais de la Bourse, 2 Place Gabriel, 33075 Bordeaux-Cedex. *Tel:* 56.90.91.21. *Telex:* 570617 Pablv. *Cables:* Poronom – Bordeaux. *Contact:* P. Valls, Director General. Commandant Bozec, Harbour Master – Ext. 183, 184, 185, 186, 187.

AGENT: See "Paris".

BOULOGNE SUR MER: 50.43 N. 01.35 E. (See Plan)

DOCUMENTS: As for "Calais".

PILOTAGE: Compulsory for vessels over 60 m. length. Vessels can communicate with pilot station, tel. 21.31.36.08, through Boulogne Radio. When pilot launch is at sea, contact by VHF Channel 12.

The most favourable boarding point is between the sea buoy and the wreck buoy situated 1.5 miles to the South, or slightly nearer the land if there are strong Westerly winds. In any event, the surf created by the Carnot breakwater must be avoided by keeping at least 1 mile off shore. If Pilot is not immediately available, vessel must wait in Outer Roads, if necessary at anchor, until further instructions received. On no account should vessel attempt to enter Carnot Roads without Pilot.

ANCHORAGE: The outer anchorage for large vessels is midway between Bassure de Baas and the Carnot Breakwater. Anchorage prohibited in the main approach channel.

RESTRICTIONS: Entrance depends on tidal conditions. For larger vessels best to enter the breakwaters at slack water which occurs 2 hours before time of high tide. Arriving vessels are obliged to contact Harbour Master's Office immediately by radio, or VHF Channel 12.

MAX. SIZE: For outer harbour: length, 230 m.; draft, 10.67 m. springs, 11.00 m. neaps. Max. d.w.t., 35,000 (approx.). Bassin Loubet: length, 130 m.; draft, 7.5 m. springs, 7.75 m. neaps.

RADIO: Boulogne Radio, call sign FFB, also on VHF Channel 25.

HEALTH: Pratique given by Customs Officers who board on arrival. In case of suspected disease on board, Master should radio Agents prior arrival advising details.

TUGS: Tugs meet vessel as requested by Master on Pilot's advice.

BERTHING:

Sarraz-Bournet Dock: Europe Quay, 775 m., depth 11 m.; Ore Quay, 240 m., depth 11 m. max. rate 12,000 tonnes per day.

Carnot Basin: Mooring on dolphins for Ro-Ro vessels up to 146 m. long, beam 14 m. – 32 m., depth 9 m., max. draft 8.5 m. Connection to the open area by ramp capable of taking up to 175 tons.

Loubet Basin: (Closed by a lock, depth 5.50 m.) Huguet Quay, 240 m. for Ro-Ro/Lo-Lo vessels up to 132 m. LOA; Voisin Quay, 700 m. (for refrigerated vessels up to 135 m. LOA).

Fore-Port and Tidal Port: Cross-channel terminal with 3 ramps (one of which is dual level/double lane for new generation car ferries), capacity 40/175/144-228 tons. Can accept car ferries up to a length of 145 m. and a draft of 4.50 m.

Hoverport: Can receive 3 hovercraft at same time.

The station can accommodate the transit of 10,000 passengers a day. Direct connection by railway with Paris.

The port offers 70,000 sq.m. of warehouses and 150,000 sq.m of open storage area. 250,100 sq.m. of cold storage space.

A silo enables 42,500 tons of clinker to be stored for loading directly on to vessels at a rate of 1,200 t.p.h.

CRANES: 2×12.5-20 tons jib cranes for ore and 1 gantry for clinker (rate 1,200 t.p.h.). 24×0.6 tons, 6×3 tons, 1×5 tons, 11×6 tons cranes.

1 heavy lift pontoon, lifting capacity 130 tons.

FRESH WATER: Supplied by pipe-line to all berths.

FUEL: SMCL quay can supply marine fuel. Quay is limited to vessels less than 100 m. length and 5 m. draft, otherwise fuel obtainable by tanker lorry from Dunkirk.

OPENING/CLOSING HATCHES: Performed by crew.

CONSULS: Great Britain, Tel: 21. 30-25-11.
Finland, Tel: 21. 30-44-55.
Ireland, Tel: 21. 30-54-04.
Sweden, Tel: 21. 30-31-11.

REPAIRS: Only quick repairs may be effected because of congestion at the quays. Slipway for vessels up to 2,500 tons.

SURVEYORS: Soemari, 52 Rue Blanzy – Pourre, 62200, Boulogne-sur-Mer. Tel: 21922200. Telex: 110013.

Bureau Veritas, Building A, Boulevard Gambetta, 62200 Boulogne-sur-Mer. Tel: 21315240.

TIME: GMT plus 1 or 2 hours according to the time of the year.

HOLIDAYS: No work Sundays and legal holidays in the afternoon.

POLICE/AMBULANCE/FIRE: Police, Tel: 21.30.12.34; Ambulance/Fire, Tel: 18.

EMERGENCY CO-ORDINATION CENTRE: At Sea: Crossma, Gris Nez. Tel: 21928666. Telex: 130680. In Port: Port Directorate and Port Captaincy.

TELEPHONES: Can be connected on board vessels at Quay de L'Europe.

BANKS: Banque de France, 1 place d'Angleterre. Telex: 110902.
Banque de la Henin, 80 Grande Rue.

Union Francaise de Banques (U.F.B.), 99 Grande Rue. Telex: 110999.

STORING: See "Prelims".

1. Storing by lorries.
3. Lorries can proceed alongside at berth.
4. Ship's stores can be loaded by any means.
5. Fuel is free of taxes, the same applies to provisions (within proportions estimated by Customs with relation to the number of crew members).

SHORE LEAVE: Permitted, no restrictions.

DEVELOPMENTS: To the West of the mole of the Sarraz-Bournet Dock, it is envisaged that a 400 m. quay for commercial traffic will be provided.

AUTHORITY: Service Maritime des Ports de Boulogne-sur-Mer, et de Calais 96 Boulevard Gambetta, 62321 Boulogne-sur-Mer-Cedex. Postal address: B.P. 689, 62321 Boulogne Sur Mer Cedex. *Tel:* 21301000. *Telex:* 110968 Sermar F. *Contact:* Directeur de l'Exploitation du Port.

AGENT: See "Paris".

BREST: 48.24 N. 04.30 W. (See Plan)

DOCUMENTS: See "Dunkirk".

PILOTAGE: Pilots do not stay out at sea, but only go to meet ship at estimated time of arrival as sent by ship. Normally pilot boat positioned on the line Toulinguet lighthouse and Beuzec (or Charles Martel) buoy, about 2.5 miles N.W. Toulinguet lighthouse. If strong S.W. wind, pilot boat waits for ship at entrance of Camaret Bay, about 1.5 miles N.E. Toulinguet lighthouse. If sea too rough to allow pilot boat to sail out, boat waits for ship at entrance of Brest Roads, near Portzic lighthouse.

Ships proceeding Brest must send last message giving ETA Pilot station (stating if *local time or GMT*), about 5 hours before arrival. Message to be addressed *"Brest Pilot Office"* through Brest Le Conquet radio station (call sign FFU). Day and night watch at pilot office. Radio station phones message direct as soon as received. Any alteration in ETA should be passed pilot office immediately.

Pilot boat sails from Brest harbour about 1.5 hours before ship's ETA, and 0.5 hour later pilot boat takes radiotelephony watch on 2182 kHz, calling ship from time to time on same frequency. Ships fitted with radiotelephony should listen and call on 2182 kHz. Pilot boat also equipped VHF Channels 16, 9, 6, 12 and Pilot office Channel 9.

ANCHORAGE: At Pilot's discretion. Anchoring in main approaches restricted as indicated on charts.

RESTRICTIONS: Entry subject draft and height of tide on day in question. Two entrances to port, one dredged to 6 m. below zero of charts and the other 5.8 m. below zero. Depth at quays varies according berth from 6 m. to 11 m. below zero.

MAX. SIZE: Inside harbour, max. length 320 m. Draft up to 35 ft. subject to tide.

HEALTH: If from foreign port, cable Maritime Health Service 48 or 24 hours prior arrival requesting free pratique. If risk of contagious disease exists, vessel will be held in roads until cleared. If from another French port, free pratique automatic.

RADIO: Brest Le Conquet – FFU.

VHF: VTS in operation.

Also see "Pilotage".

TUGS: Two port tugs of 1,900 h.p. Tugs join vessel at main entrance to port. Marine National places tugs at ship's disposal for all port movements. Generally, tow rope supplied by tug at additional charge.

One French salvage tug belonging to the Abeille Company is stationed at the port, but only gives assistance for vessels requiring aid outside the port area.

BERTHING: According to draft, ships may have to wait in roads before berthing, depending on height of tide in fairways. Also see "Restrictions".

Commercial Harbour Facilities:

Deck	*Quay*	*Utilisation*	*Length (m.)*	*Depth (m.)*	*Equipment*	*Storage*	
						Covered	*Open air*
1	West	Wine, Other goods Railways	200	–6	Mobile cranes 4 ton at 22 m.	55,000 HL 3,500 sq.m.	5,000 sq.m.

6	South	Containers, Cereals, Wood, Other goods, Railways	230	–12	1 crane 30 ton at 33 m. (40 ton at 24 m.) 2 cranes 8 tons at 30 m. Conveyor belts (1,000 t.p.h.)	Silos 32,000 tons	35,000 sq.m.

BULK HANDLING FACILITIES: *Agro-foodstuffs Bulk Terminal:* 3 Piers: 6th South: 230 m. in length, 12 m. in depth (lowest tide).

6th East: 175 m. in length, 10 m. in depth (lowest tide) equipped with conveyor belts having a capacity of 1,000 t.p.h. and 550 t.p.h. respectively, connected to both.

Soya France silos (beans for flour making) capacity: 32,000 tons.

Public silos capacity: 32,000 tons.

Mixed loading capacity for road and rail transport of 800 tons per day.

5th East: 300 m. in length, 10 m. in depth (lowest tide) equipped with a conveyor belt of a capacity of 500 t.p.h., connected to a silo of a storage capacity of 20,000 tons.

The terminal allows bulk carriers of 80,000 d.w.t. to 100,000 d.w.t. rapid unloading at the rate of 15,000 tons per day of cargo such as: soya (bean of meal), manioc, grain cereals, as well as the possibility of rapid reloading of barges.

Also see "Berthing".

STEVEDORES: Agent has responsibility of making all arrangements for unloading, and is in touch with stevedores who arrange necessary gangs.

MEDICAL: Hospitals and clinics available. In the case of ship needing medical assistance, request should be addressed to Maritime Health Service through Conquet Radio Station, advising ETA, where vessel coming from and state of patient.

TANKERS: One berth for receipt of refined products destined for local storage tanks. Berth length 142 m., dredged alongside to a depth of 10 m. below zero of charts over an area 250 m. long and 30 m. wide.

FRESH WATER: All berths have fresh water supply. Apply to Chamber of Commerce who make necessary arrangements. Loading rate 13-15 t.p.h.

FUEL: Delivered by Societe de Depot des Petroles Cotiers and by Societe Maritime des Petroles.

TANK CLEANING: Station situated at the Southern extremity of the East Mole. Can operate 4 Victor Pyrate machines simultaneously. Equipped with 3 boilers to supply steam, 3 pumps, oily water separator and an extractor for solid residues.

The tank-cleaning station is connected by pipe-line to Repair Quays No. 1, 2 and 3 where tankers of 550,000 d.w.t. may be accommodated.

The new tank-cleaning and bunkering station, situated behind the dry-docks No. 2 and 3 is operational.

This station is connected by pipe-lines to dry docks No. 2 and 3, all repair quays and so to the 6 South for bunkering facilities.

It includes four sections:

- A tanker cleaning section with oil-water separator (2,000 cu.m.p.h.);
- An oil-treatment section to transform the recovered oil into commercial products;
- A bunkering section with tanks of 35,000 cu.m.;
- A section that is able to separate the solid residues of tankers.

WATCHMEN: Compulsory for ships carrying dangerous materials, non gas-free tankers, vessels with chemical products, munitions, etc.

CERTIFICATES:

Nationality.	
Gross Tonnage.	Derat.
Classification.	Vaccination.

REPAIRS: Repair Quay No. 1 at the South of the dry dock No. 2. Length: 320 m.; Depth: 9 m. to 9.50 m.

Repair Quays Nos. 2 and 3. Length: 608 m.; Depth: 8.30 m. to 10.70 m. Can accommodate vessels up to 550,000 d.w.t. (Pierre Guillaumat, Bellamya, Batilus, Prairial).

Repair Quay No. 4. Length: 400 m.; Depth 11 m.

Repair Quay No. 5. Length: 400 m.; Depth: 12.5 m.

These two quays are situated to the North and to the South of the dry dock No. 3.

The 5 floating repair piers totalling 1,700 m. in length in water at a depth varying between 9 m. to 12.5 m. at the lowest tide, and connected to a tanker cleaning and bunkering station specially equipped to handle slop and residue from ship tanks.

Several modern lifting machines, among which:

1 crane of a capacity of 80 tons at 25 m.

1 crane of a capacity of 150 tons at 38 m.

Piers and dry docks equipped with electricity, steam, compressed air, oxygen, acetylene, telephone, potable water and fire fighting equipment.

CUSTOMS ALLOWANCES: Tobacco, Wine/Spirit. Ship's provisions must be under seal.

CONSULS: The following countries are represented by Consuls at Brest:

Belgium
Chile
Denmark
Finland
German F.R.
Netherlands
Norway
Portugal
Spain
Sweden

DRY DOCKS: *No. 1:* Dimensions 225 m. by 26.77 m., entrance sill 4 m. below datum, situated at the Northeast angle of Basin No. 5. The entrance lock can receive 2 vessels simultaneously, 1 of 75 m. length and the other of 150 m. length, with some adjustments.

Max. draft, at Spring tides: 11.50 m.; at neap tides: 10 m.

No. 2: Dimensions 338 m. by 55 m. Can accept tankers of up to 280,000 d.w.t. Entrance sill 7.25 m. below datum. Dock situated in the Southeast of the Industrial Port Zone. Can accept vessels of the following dimensions.

At mean Spring tides: length 335 m.; beam 50 m.; draft 12.50 m.

At neap tides: length 335 m.; beam 50 m.; draft 10 m.

No. 3: Dimensions 420 m. by 80 m. Can accept vessels of 550,000 d.w.t. Entrance sill: 9 m.

AIRPORT: At Guipavas, 7 km. from Brest – 3 daily services to Paris.

TIME: Local time GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Police 98444850 and 98445861; Police Secours 17; Ambulance and Fire Brigade 18 or 98442766.

TELEPHONES: Can be placed aboard at certain berths.

SERVICES: Degassing station, tank-cleaning and slop discharge, adjustment of chronometers, chart and document department, weather forecasting, permanent daytime service for signing on crew, barometer adjustment. Also Compass and D/F adjusting.

Port Weather Service: Port Office, 30 Bis, Quai Commandant Malbert. Health Service: Quai Commandant Malbert.

DEVELOPMENTS: A new port industrial zone with an area of 100 hectares, and frontage of approx. 1,800 m. which will enable the construction of quays with depths of 10 m. – 12 m.

Furthermore, the Port is studying a vast plan to develop the commercial port, so that the latter may adapt itself to the requirements of modern maritime transport (1985-90).

AUTHORITY: Port de Brest, Direction Departementale de l'Equipement, Arrondissement de Brest, 2 rue Alderic-Le Comte, 29200 Brest-Cedex, France. *Tel:* 98.80.13.44 (12 lines). *Telex:* 940586. *Contact:* M. Turpin, Ingenieur des Ponts et Chaussees.

AGENT: See "Paris".

CAEN: 49.13 N. 00.21 W. (See Plan)

DOCUMENTS:

3 copies Crew List.
3 copies Provisions List.
3 copies Crew Personal Effects List.
Derat Certificate or Exemption.

PILOTAGE: Pilot boat is on station from 2.5 hours before HW until 3 hours after HW. Vessels can contact the Pilot on VHF Channels 12 and 16. The pilot boat is stationed in the outer port of Ouistreham and goes out to the roads on vessels approach. International code flag signals are used to call Pilot.

Caen Pilot boat has a black hull with white stripe. The words "Pilote Caen" are written in white letters on the hull. During the Summer months the pilot boat is replaced by a launch bearing the same markings. As soon as the Pilot boards he will hand the Master an Entry Declaration to be completed.

ANCHORAGE: While waiting for the tide vessels may anchor in the vicinity of the light-buoy in Ouistreham Roads. The position of this buoy is Lat. 49° 19′ 50″ N., Long. 00° 14′ 18″ W. The buoy is positioned in depth of 10 m. Anchorage is open to winds from West through North to East; good holding ground. Currents do not exceed 2 knots at spring tides.

RESTRICTIONS: Dimensions of locks – East Lock length 181 m., width 18 m. West Lock length 225 m., width 28.45 m.

The locks are open to navigation from 2 hours before HW to 3 hours after HW. The locks can be used up to a maximum of 1 hour before/after these times by special permission of the Harbour Master and payment of additional dues.

Maritime Canal, length 14 km. The canal is dredged to 9.89 m. depth up to Herouville Dock. Vessels proceeding to the docks at Herouville and Calix must pass 2 bridges: Herouville 30 m. wide and Colombelles 30 m. wide.

Vessels proceeding to new dock must also pass the bridge at Calix, 21.76 m. wide. Maximum speed authorised in the Maritime Canal is 7 knots.

Maximum air draft for New Dock and St. Pierre Dock, 33 m.

MAX. SIZE: *Daytime:* Length 205 m., beam 23.5 m., draft 28.8 ft. sea water.

Night-time:

Blainville/Herouville	Length 160 m.	Beam 20 m.	Draft 25.9 ft. SW.
Calix	Length 150 m.	Beam 20 m.	Draft 25.9 ft. SW.
New Dock	Length 135 m.	Beam 16 m.	Draft 21.4 ft. SW.

HEALTH: Free pratique is automatic for all ships. Health control is carried out by Customs Officers under the direction of the Havre Port Health Office. For ships coming from ports in Africa, Asia, or Pacific Islands a Maritime Declaration of Health is required.

In case of suspected epidemic or fever on board Master must advise the port authorities who will instruct him to proceed to an appropriate anchorage to be boarded by the Port Health Doctor.

RADIO: Nearest radio station Boulogne Radio, call sign FFB.

VHF: Vessels may communicate with the Harbour Master's Office by VHF Channels 12 and 68. This service only operates during the hours when the locks are operating.

TUGS: The use of 1 or 2 tugs is recommended for vessels over 16.50 m. beam.

BERTHING:

Dock	*Quay*	*Facilities*	*Length* (m.)	*Draft* (F.W.)
Saint Pierre	Vendeuvre	Reserved for pleasure boats	280	4.0
	Cafarelli		150	4.0

Ouistreham	Fore Port	Car ferry berth	140	5.0 (SW) at LW

STEVEDORES: Arranged by Agent on basis of ETA provided by vessel before arrival.

MEDICAL: Doctors and hospital facilities available.

TANKERS: There is a tanker berth (D.P.C.) in Calix Dock, max. draft 8.60 m. Gas-freeing is prohibited.

FRESH WATER: Available at all berths, rate about 5 – 10 t.p.h.

FUEL: Can only be supplied by tanker lorries.

WATCHMEN: Not compulsory during daylight hours from 0600 hrs. to 1800 hrs.

OPENING/CLOSING HATCHES: This work is normally carried out by the crew.

CUSTOMS ALLOWANCES: Amount of tobacco and alcohol for crew consumption must be declared on the stores list. Quantities held out of bond are at Customs discretion.

IDENTIFICATION CARDS: Not required.

CONSULS: The following countries are represented locally:

Denmark Tel: 31.72.35.30	Norway Tel: 31.52.04.74
Finland Tel: 31.97.33.27	Sweden Tel: 31.82.21.76

REPAIRS: Deck and machinery repairs can be carried out by local workshops. Nearest dry docks at Le Havre or Cherbourg.

REPATRIATION: Can be arranged.

AIRPORT: Situated 12 km. from the port. There are no regular services, but an air taxi with 5 seats can arrange connections to international airports.

TIME: GMT plus 1 hour or GMT plus 2 hours in Summertime.

HOLIDAYS: Work is carried out on legal holidays. No work on "Jours de Fetes" and Sundays.

POLICE/FIRE/AMBULANCE: Police Tel: 17; Fire Tel: 18; Ambulance Tel: 18.

TELEPHONES: Can be connected on board ships. Quayside telephone situated in Blainville Dock.

SHORE LEAVE: Allowed.

AUTHORITY: Ingenieur des Ponts et Chaussees, Chef de l'Exploitation, Direction Departmentale de l'Equipment, B.P. No. 37, 14035 Caen Cedex. *Telex:* 170213 FT.

Commandant du Port, Pont de la Fonderie, B.P. 37, 14035 Caen Cedex. *Tel:* 31.52.12.88 and 31.82.36.36. *Contact:* Harbour Master.

AGENT: See "Paris".

CALAIS: 50.58 N. 01.50 E. (See Plan)

DOCUMENTS:

Ship Register.
Manifest of Cargo.
Bill of Lading
3 Lists of Provisions on board.
4 Lists of Articles held by Crew.
3 Lists of Crew.
List of open spaces.
Health Certificate, endorsed by Master on arrival.
Derat or Exemption.
For tankers, Certificate of Cargo Specification and Certificate of vessel's suitability to transport inflammable liquids in bulk.

PILOTAGE: Compulsory when entering or leaving harbour, except for ships less than 50 m. length. Pilotage area: 3 miles from piers. Ships required to give notice of their arrival 18 hours before, through Boulogne Radio. Pilot waits between buoys CA4 and CA6. Pilot boat: Black, white side stripe, bearing the inscription "Pilote Calais". She is equipped with VHF, Channel 6 and Channel 16.

ANCHORAGES: Between CA6 and CA8, 15 m. to 17 m. deep, sand and gravel. Good anchorage. When bad weather from North, ships are advised to stand out to sea or anchor in the roads of Les Dunes. Ship will receive instructions from Pilots or Harbour Captain's office when to enter roads of Calais.

RESTRICTIONS: Harbour channel 130 m. wide. In channel and outer harbour, depths are maintained at 8.40 m. MWL. Vessels should enter harbour preferably about 2.5 hours before high tide or half an hour after high tide. Because of the shape of sluice at the entrance larger vessels cannot have direct access to the Bassin Carnot at certain tides. These vessels may lighten in outer port, at "Quai Paul Devot", where depth is 9 m. LWOST.

MAX. SIZE: "Bassin Carnot", 150 m. max. length; "Bassin Ouest", (West Dock) 110 m. max. length; "Quai P. Devot", 190 m. max. length; "Bassin Carnot", 19 m. max. beam; "Bassin Ouest", 16 m. max. beam. Max. draft: 9.00 m. (29 ft. 6 in.). Port accessible to vessels of 20,000 d.w.t.

HEALTH: Sanitation controls can arrange derat and exemptions. International Vaccination Certificates required for ships coming from an epidemic zone.

RADIO: Messages through Boulogne Radio. ETA must reach pilotage station or Harbour Master's offices 18 hours before arrival. Near Calais, ships equipped with VHF can call Harbour Master on Channel 12 or pilotage station on Channel 16.

TUGS: Generally join ships at end of the piers. Towing ropes are generally ships own but can be supplied by tug.

BERTHING: Max. height of tide 7.30 m. Depth on dock sills 2 m. LWOST.

At West dock, entrance between 1.5 hours before and half an hour after high tide. In Bassin Carnot, entrance between 3 hours before and 1 hour after high tide.

There are 2 berths equipped for handling Roll-on/Roll-off traffic, situated in Bassin Carnot.

CRANES:

Maritime Station Quay	Electric cranes – 6 tons	3
Paul Devot Quay	Electric crane – 6 tons with automatic scoop	1
	Electric crane – 12 tons with automatic scoop	1
	Electric cranes – 15 tons with automatic scoop	2
Transit Station	A block of 2 gantries able to handle a load of 40 tons (containers)	
West Basin		
South Quay of the West Basin	Electric crane – 3 tons	2
	Electric cranes – 6 tons	2
	Electric cranes 6 tons with automatic scoops	2
Carnot Basin		
Vistule Quay	Electric cranes – 6 tons	2
Loire Quay	Electric cranes – 6 tons	3
	Electric cranes – 6 tons with automatic scoops	6
	Electric cranes – 12 tons with automatic scoop	2
	Electric gantries – 6 tons with raisable forepeak and equipped with weights and automatic scoops	2
Crespin Quay	Electric cranes – 6 tons with automatic scoops	3
Fournier Quay	Electric cranes – 6 tons	5
	Electric crane – 12 tons with automatic scoop	2
Volga Quay	Electric cranes – 6 tons	2
	Electric cranes – 6 tons with automatic scoops	2

Dry Dock: One electric crane – 15 tons. 2 mobile cranes of 1/9 tons complete the lifting machinery of the Public Equipment of the Port.

BRIDGES: Swing bridges (West Dock) and draw bridges (Bassin Carnot) are situated on sluices.

STEVEDORES: Informed by Agent of tonnage, nature and condition of cargo.

MEDICAL: All facilities available.

TANKERS: Two posts provided for tankers: "Quai Paul Devot" for medium-sized tankers. "Bassin Ouest" (West Dock) for small tankers. "White and black" products can be accepted at "Bassin Ouest". Only "black" products admitted at "Quai P. Devot". Tankers are allowed to enter harbour only by daytime. They must leave as soon as operations are finished. Hoses 10 in. and 12 in. in diameter. Barges discharged with a 10 in. hose.

DENSITY: Salt.

FRESH WATER: Supplied from hydrants on wharves.

FUEL: Any fuel can be supplied by tank lorry of large capacity.

GANGWAY/DECK WATCHMEN: Ships must be guarded.

OPENING/CLOSING HATCHES: As a rule hatches are opened/closed by crew.

CUSTOMS ALLOWANCES: Tobacco: No limit for foreign ships, but the quantity must be declared on the lists of articles held by crew.

IDENTIFICATION CARDS: Identification cards and seamen's books are required.

CONSULS: *Vice-Consuls:*

Netherlands, M. G. Dumont, 12 Bd. des Allies.
Denmark, M. J. Mulard Jr., Place de Suede.
Finland, M. H. Ravisse, 12 Bd. des Allies.
Greece; M. P. Foissey, 12 Bd. des Allies.
Norway, M. Y. Lefebvre, 12 Bd. des Allies.
Sweden, M. T. Pagniez, 198 Rue des Quatre Coins.
United Kingdom, M. Russel, 331 Avenue de Saint-Exupery.

REPAIRS: Deck and engine repairs possible.

DRY DOCKS: One, 153 m. long, 21 m. wide. Depth at sill, 7.45 m.

REPATRIATION: Pilot boats and tugs may trans-ship equipment or hands in outer roads.

AIRPORT: Calais, Dunkirk (International), 7 km. away.

TIME: GMT plus 1 hour. Spring and Summer GMT plus 2 hours.

HOLIDAYS: 1st January; Easter Monday; 1st May; Ascension Day; Whit Monday; Tuesday afternoon following 1st Sunday of July (local feast); 14th July; 15th August; 1st November; 11th November; afternoon of 24th December; 25th December; Sundays.

POLICE/AMBULANCE/FIRE: Police 17; Ambulance 34.39.24; Fire 18.

SHORE LEAVE: Crew are allowed ashore.

DEVELOPMENTS: Ro/Ro ramp No. 6 to be available December 1986.

AUTHORITY: Directeur de L'Exploitation du Port de Calais, Place de L'Europe, 62225 Calais, Cedex. *Tel:* 21-96-63-00. *Telex:* Sermar 160758 F. *Contact:* M. Neven, Port Director. Ph. Carpentier.

AGENT: See "Paris".

CALVI, Corsica: 42.34 N. 08.46 E. (See Plan)

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Provisions List
1 Cargo List.
1 List of Articles (new and Customs-barred) in possession each crew member – cameras, binoculars, radios, cigarettes, spirits, etc.
1 Health Declaration.

PILOTAGE: Not compulsory. If required, telephone pilot station at Bastia, Tel: (95) 315095.

ANCHORAGE: Outside port for cruise vessels.

MAX. SIZE: Draft 6.5 m.; length 140 m.

RADIO: Within 50 miles call Ajaccio Radio VHF Channel 16. Then connected over Channel 23 to telephone network.

TUGS: None available.

STEVEDORES: 24 hours accurate ETA necessary for ordering gangs. No work on Sundays and official holidays.

CARGO GEAR: Only a few nets and slings available; all other gear must be supplied by ship. Ship's derricks used.

FRESH WATER: Available at very slow pumping rate.

FUEL: Not available.

REPAIRS/CONSULS: None.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

AUTHORITY: Capitainerie du Port, Quai Landry, 20260 Calvi, Corsica. *Tel:* (95) 650521.

Affaires Maritimes, Quai Landry, 20260 Calvi, Corsica. *Tel:* (95) 650171.

CANCALE: 48.40 N. 01.51 W.

Used by fishing and pleasure vessels only.

PILOTAGE: Pilot available from St. Malo. Tel: 91-81-61-66.

BERTHING: 2 public wharves, depths from 0.5 m. to 13 m. at spring tides.

CRANES: One 3 ton crane available.

MEDICAL: Hospital facilities available at St. Malo, 15 km. distant.

FRESH WATER: Available in small quantities.

FUEL: Diesel oil available by truck.

AIRPORT: Nearest at Dinard, 30 km. away.

AUTHORITY: Subdivision Maritime de L'Equipement, Quai du Pourquoi Pas., 35402 Saint Malo, France. *Tel:* 99-56-07-24. *Contact:* M. Nevo, Engineer.

CANNES: 43.33 N. 07.01 E.

DOCUMENTS:

To be sent on departure from previous port.
3 copies of Passenger List.
1 copy of Crew List.
Required on arrival:
4 copies of List of Passengers, showing Christian name, surname, age, date and place of birth, nationality.
2 Crew Lists.
5 copies of a Special Arrival form (supplied on arrival).

PILOTAGE: No Pilot station at Cannes. A tender with Company's flag on top of its mast will meet the vessel: *(a)* If ship is proceeding to anchorage No. 1, in Golfe de la Napoule, about half a mile South of the lighthouse at end of Cannes port Pier (Quai Lauboeuf); *(b)* If ship is proceeding to either anchorage No. 2 or 3, in Golfe-Juan, half a mile North of Ile Ste Marguerite.

The tender will lead to anchorage and will give 1 blast of the siren when correct position has been reached. At night, tender has a fixed white light at top of its mast, which replaces the flag. Should it not be possible to advise by wireless before arrival at anchorage and weather conditions making it necessary for ship to anchor at either position No. 2 or 3, boat will meet ship in Golfe de la Napoule, 2 miles South of Cannes port lighthouse. In this event, ship must proceed to anchorage No. 2 or 3 as appropriate, steaming to South of Ile St. Honorat, whilst tender will proceed by channel between Ile Ste Marguerite and the mainland.

ANCHORAGE: Advice of anchorage is passed to Master via Grasse Radio or Monaco Radio, VHF Channel 16 usually about 1 hour before arrival. There are 3 anchorages, any of which may be used according to the weather:

No. 1 off the port of Cannes, approximately half a mile South of end of breakwater, used by calm sea or by East or N.E. winds.

No. 2 is situated to North of Ile Ste Marguerite, used by S.E. or S.W. or South winds.

No. 3 to the East of Cap de la Croisette, used by West or N.W. winds.

It could happen during the call, winds may change direction and movement from anchorage No. 1 to No. 2 or No. 3 become necessary. Shift takes about 1 hour.

HEALTH: Port officials will embark immediately the ship anchors. Free pratique may be granted by wireless telephone 1 hour before arrival at ship's surgeon request stating: "no illness on board".

FRESH WATER: One water barge (capacity 65 tons) and 2 water barges (capacity 20 tons) available.

12 hours notice required for orders up to and including 100 tons. 24 hours notice required for amounts in excess of 100 tons. Pumping rate 30–40 cu.m./hr. with one or two boats.

GANGWAY/DECK WATCHMEN: Watchmen for gangways should be provided by ship and passengers are requested to present their landing cards every time they use the gangways.

AUTHORITY: Capitainerie du Port.

CHERBOURG: 49.38 N. 01.38 W. (See Plan)

DOCUMENTS:

Declaration of Health.
Manifest of Provisions on Board.
Manifest of Crew's Possessions.
Manifest of Cargo – in certain cases.
Manifest of Equipment.

DEEP SEA PILOTAGE: Pilots board off "CH1" Buoy. Radio ETA to "Hutchinson Gravesend" Telex 965225 or "Cherbourg Pilots" Telex 170952. (48 and 6 hours notice.) On approaching Cherbourg contact Cherbourg Signal Station on VHF Channel 16 confirming ETA.

PILOTAGE: Requests for pilotage must indicate arrival time at the buoy CH1. They may be addressed to Agent or direct to pilot station, telegraphic address "Pilotage Cherbourg" Telex: 170952, or through the Homet look-out station by means of the usual signals. To avoid delay it is well to warn the pilot station 4 hours in advance of arrival. As a general rule, the pilot boat always comes out, whatever the weather. In bad weather, the vessel follows the pilot boat and Pilot boards as soon as shelter permits.

ANCHORAGES: Anchoring must be made strictly according to the instructions of the Pilot so as not to get in the way of movements and anchorage of steamers. Depths vary from 6 m. to 12 m. in safe anchorages.

RESTRICTIONS: In the wet dock, the bridge is opened 1 hour before until 1 hour after high water.

MAX. SIZE:

	Length (m.)	Breadth (m.)	Depth Average Tide Spring (m.)	Neap (m.)
In the Roads	No Limit	No Limit	11	12.50
Trans-Atlantic Dock	No Limit	No Limit	7.0–12.5	8.5–14.0
Mielles Dock	150		5.00	6.50
Oil berth at Querqueville	200	31	9.0	10.50
Berth Amiot	100	3.0		4.50
Ro/Ro No. 1	130	20	7.0	8.50
Ro/Ro No. 2	200	30	8.0	9.50

Ro/Ro No. 3: (Quai de France – South). Length: No limit. Width: 44 m. Depth: 12 m.

HEALTH: From French port to French port, no formalities. From foreign port to French port, request for free pratique (yellow flag). In case of sickness on board, warn the Agent in advance. No crew member may leave ship before consultation and agreement of Port Doctor.

RADIO: The stations which offer the best facilities are Boulogne Radio, Brest le Conquet Radio, and St. Lys for ships which are a long way off.

TUGS: Tugs generally join vessel in the main approaches. With regard to the tow rope, a charge is made.

HELICOPTER SERVICE:

Air Affaires – Heli-Services, Aerodrome de Cherbourg – Maupertus, B.P.1 – Gonneville, 50840 Fermanville. Tel: (33) 44.56.96. Telex: 171348 Helip.

Description of Services: A 24 hours – 7 days per week service, within a radius of 150 nautical miles of Cherbourg, to and from ships without the necessity of reducing speed or changing course, in any sea conditions.

The positioning and pick-up of persons are accomplished either by landing or by winching on all types of vessels, serving even small coasters and fishing boats.

Doctor and stretchers for injured personnel available within minutes of your call.

Note the possibility to put technicians and specialists on board for up to 12 hours work while underway and take them ashore again.

Recommended Procedure:

(A)	48 hours before	Please cable through Saint Lys Radio (FFL) or any radio station to Heli-Services Cherbourg Telex 171348 HELIP the following information: (a) ship's name (b) state you require Helicopter and reason for request (c) ETA rendezvous point requested (d) VHF in good order or not (e) Confirm full landing, restricted or winching area available.
(B)	24 hours before	With the same radio procedure confirm your ETA.

continued overleaf

BERTHING:

Name of Dock	*Name of Quay*	*Use*	*Number/type of lifting equipment (H.d. = Heavy duty)*	*Length of quays (m.)*	*Open storage area*	*Depth (m.)*	*Lock Nos.*

(C) 4 hours before — Call "Jobourg Traffic" (French Marine Traffic Centre) on VHF 16/11 to confirm your ETA. Heli-Services office is directly connected with Jobourg Traffic and transmit information concerning rendezvous point and helicopter operation.

(D) When helicopter is flying, its pilot contacts you on VHF. Give information about relative wind and start locked key homing signal on 410 kHz.

Services are assured 24 hours per day with 2 hours' notice, or immediately in case of emergency.

Rendezvous Points:

Standard Points

For normal operations, 4 rendezvous points are recommended.

Point A: 13 nautical miles North of Cap de la Hague.

Point B: 10 nautical miles North of Cap Levi.

Point C: 5 nautical miles North of Cap Levi (prohibited area for tankers).

Point D: 27 nautical miles North of Cap Levi (ships West bound)

However, if desired by the Master, the helicopter can meet the vessel at any point.

BRIDGES: Only the swing bridge at the entrance to the wet dock, which is opened on request from 1 hour before until 1 hour after high tide for the entry and exit of ships.

STEVEDORES: Agent needs ETA, to arrange personnel and equipment to be used for handling cargo.

CRANES: 35 ton capacity gantry for road/rail container and kangaroo operations. 40 ton capacity mobile crane for container and kangaroo operations. 30 to 90 ton floating cranes. Various mobile cranes for light and heavy lifts. Fleet of tugmasters and fork-lift trucks.

Also see "Berthing".

MEDICAL: Advise Agent of any requirements at the same time as ETA. There are 2 hospitals, civil and military, both very well equipped.

TANKERS: There is a discharge berth at Querqueville Jetty. Length of berth 200 m., max. draft 9 m.

FRESH WATER: Water points on all quays.

FUEL: Available from local suppliers – Esso, Shell, etc.

WATCHMEN: Every ship in port must have a watchman, usually a crew member.

OPENING/CLOSING HATCHES: At the discretion of Master, crew may perform this.

CUSTOMS ALLOWANCES: Free allowance for each crew member – 200 cigarettes or 50 cigars, and 1 litre of alcohol. Common Market Countries – Crew: 300 cigarettes, 75 cigars and 1.5 litres of alcohol.

IDENTIFICATION CARDS: Each crew member must carry his seaman's card.

CONSULS:

Belgium
Portugal
Denmark
Finland and Norway
Haiti
Venezuela
Greece
Sweden
United Kingdom

REPAIRS: All types of hull and engine repairs are possible.

DRY DOCK: Commercial Port's dock: length 75 m., width 14 m.

Dry Dock Nos.	*Sill Length* (m.)	*Max. dim. of vessel able to enter* *Length* (m.)	*Breadth* (m.)
N. Dry docks

REPATRIATION: Can be arranged.

AIRPORT: At Moupertuis, 12 km. from Cherbourg. There are no regular services in the immediate vicinity.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: January 1st; Easter Sunday/Monday; May 1st; Ascension; Whitsun Sunday/Monday; July 14th; Assumption; 15th August; November 1st; Victory Day, November 11th; Christmas Day, December 25th.

POLICE/AMBULANCE/FIRE: Police: 44.20.22. Ambulance: 53.13.29. Fire: 53.01.23.

TELEPHONE: Generally, ships do not request the installation of a telephone line, unless for a prolonged stay.

DEVELOPMENTS: Deep draft berths (13.0 m. depth), length 300 m. to be built.

AUTHORITY: Capitainerie du Port, Pont Tournant, 50.100 Cherbourg, France. *Tel:* 33 20 41 25. *Telex:* 170849 (Port Director).

Direction Departementale de L'Equipement, Allee Du President Leon Menut, 50100 Cherbourg. *Tel:* (33) 430133. *Telex:* 170011 Didello (Saint Lo).

AGENT: See "Paris".

CONCARNEAU: 47.52 N. 03.55 W. (See Plan)

DOCUMENTS:

Ship's Registration Certificate.
Cargo Manifest.
Stores List.
Crew Personal Effects List.
List of Crew and Passengers with dates of Vaccinations.

PILOTAGE: The pilotage area is limited to the East by alignment of the sea marks of Point of Raguenes (Lat. 47° 47′ N., Long. 03° 48′ W.) and the Ile Verte (Lat. 47° 46′ 40″ N., Long. 03° 48′ W.), to the South by the Parallel of the "La Jument Buoy" (Lat. 47° 39′ N., Long. 04° 01′ 20″ W., to the South of the Glenan Islands), to the West by the meridian of the "Basse Rouge" Buoy.

Pilotage is not required for vessels with an overall length of less than 40 m., except for tankers carrying oil products or gas.

It is recommended to warn the Pilot 24 hours in advance, indicating the most accurate ETA (Tel: 98.97.15.47).

The pilot craft is not stationed at sea. The Pilot generally boards to the South of the Cochon Tower or, on request, between Cochon Tower and the Ile aux Moutons; the craft carries the "H" flag by day and white flashing lights at night.

If the state of the sea does not permit the Pilot to board, the pilot craft makes the signal "T" (by flag or morse code) signifying: "follow-me, the Pilot will board in the shelter of the Peneroff Breakwater". If the state of the sea does not allow the pilot craft to come out, it stations itself in the shelter of the Peneroff Breakwater and makes the signal "BT".

Access: It is not advisable for vessels of a certain size whose Masters do not know the channel well to proceed without a Pilot, at LW in particular, to the North of the line Beg-Meil – Trevignon Point.

ANCHORAGE: *Main Roads:* Vessels anchor in the bay, on request, on a muddy bottom, on the alignment at 028.5° from the Beuzec church tower through the la Croix lighthouse.

Small Roads: Vessels anchor in the small roads sheltered from the North to Southeast by East, in 8 m. of water and a bottom of sand and mud, on the access alignment or to the West of this alignment.

At night, when on the access alignment, as soon as the Lanriec Light appears, the alignment is opened so as to see the Beuzec Light to the left of the La Croix Light, and when the Lanriec Light disappears, the vessel anchors in 8 m. of water.

The recommended landing stage is on the La Croix Breakwater.

Kersos Cove (Lat. 47° 52′ N., Long. 03° 55′ W.): It is possible to anchor here sheltered from winds from North to South by East, but with a reduced turning area. Vessels anchor half way between the Kersos Tower and the coast to the N.E. in 3 m. – 5 m. water with a good holding ground of sand and mud.

MAX. SIZE: *Tankers:* By day: 91 m. overall; by night: 81 m. overall. *Other vessels:* By day: 101 m. overall; by night: 91 m. overall.

RADIO: Contact Conquet Radio.

VHF: Tugs on Channel 6 on weekdays during working hours from 0800 – 1200 hrs. and 1400 – 1800 hrs.

TUGS: 2 tugs available on demand, meet vessels near Cochon Light, large vessels use a tug for berthing.

BERTHING: As Concarneau is essentially a fishing port, a commercial vessel of a certain size cannot enter without the authorisation of the port services, who must prepare a quay berth for her in advance.

The port of Concarneau includes the port of La Croix located to the West of the La Croix Lighthouse, a fore-port and a rear-port separated by the peninsula on which is Ville-Close. The Lanriec Passage connecting these two port areas is cleared at 3 m. depth and marked by 5 light towers.

Fore Port: In the middle of the fore port are 540 m. of pontoons enabling 265 pleasure craft with a draft of 2.5 m. approx. and length of 10 m. to berth.

Along the Peneroff Quay, deposits formed by a hard bottom covered by a thin layer of muddy water from 1 m. to 2 m. Along Ville-Close, the bottom dries from 2 m. to 5 m. Along the North face of the South Breakwater, a slipway permits careening of craft.

Rear Port: The Rear Port is comprised of 1,537 m. of mooring quay.

Aiguillon Quay: Depth 1 m., length 110 m.
Carnot Quay: Depth 2.50 m., length 250 m.
Lin Quay: Depth 2.50 m., length 250 m.
East Quay: Depth from 2.50 m. to 5 m., length 140 m.
Petrol Tanker Quay: Depth 5 m., length 95 m.
Sand Quay: Depth 5 m., length 25 m.
Right Bank Moros Quay: Depth 5 m., length 257 m.
Left Bank Moros Quay: Depth 5 m., length 220 m.
A Ship's Lift Pier: Depth 5 m., length 90 m.

These quays receive fishing and commercial vessels and vessels under repair. The vessels are positioned according to their characteristics and the nature of the goods to be unloaded or taken on board.

CRANES: 1 × 17.5 tonne (East Quay), 4 × 2.0/13.0 tonnes (mobile).

MEDICAL: Municipal Hospital at Porzou. Tel: (16-98) 97.10.60.

CUSTOMS ALLOWANCES: *Tobacco:* Fixed at 30 grams per day, at sea, per person.

Alcohol: The equivalent of 5 centilitres of rum at 42° per day, at sea, per person.

These allowances are free of tax for use on board, but may not be landed.

IDENTIFICATION CARDS: Any National Identity Documentation will suffice.

POLICE/AMBULANCE/FIRE: Police Tel: 98.97.17.17; Ambulance and Fire Brigade Tel: 18.

FRESH WATER: Available.

FUEL: Available.

DRY DOCKS: Synchrolift available. Max. capacity 2,000 tons; max. LOA 95 m.; max. keel length 76 m.; max. beam 14 m.; max. draft 5.50 m. Fresh water, electricity, compressed air and cranes available.

There is a slipway which can accommodate vessels of 350 tonnes.

AIRPORT: At Quimper – Pluguffan 30 km. from the town. Twice daily flights to Paris and flights to London during the Summer months.

AUTHORITY: Monsieur le Directeur, Direction Departementale de l'Equipement, Cite Administrative de Kerfeunteun, B.P.506, 29325 Quimper Cedex. *Tel:* 98.95.70.32. *Telex:* 940.424.

Capitanerie du Port, Quai Est, B.P. 231, 29182 Concarneau. *Tel:* 98.97.33.80. *Contact:* L. Tanguy, le Commandant de Port.

DIEPPE: 49.55 N. 01.04 E. (See Plan)

DOCUMENTS:

4 Crew Lists.
2 Lists of Stores.
1 Loading Manifest.
1 Passenger List.
1 Declaration (furnished by Agent) stating that ship possesses up-to-date Safety Certificates.
1 Health Declaration.

PILOTAGE: Pilot boards 4 miles from breakwaters. Pilotage is compulsory in this area except for vessels less than 50 m. long equipped with VHF (Channel 12). Pilot boat is ready to put to sea from 2.5 hours before to 1 hour after high tide when a vessel is expected. During this period maintains radio telephone watch. VHF Channel 12.

All vessels must send ETA to the pilotage authority of the Seine/Rouen/Dieppe at least 5 hours prior to arrival in the Dieppe Roads, any delay greater than 2 hours or where a tide is missed must be signalled at least 3 hours before the initially ETA. Vessels not obliged to take on a Pilot must indicate in their ETA whether or not a Pilot is needed.

Address: PILSEINE – 21 rue du Mont Diboudet – Rouen, Telephone (35) 71 68 50; Telex 770575.

APPROACHES: Coming from the West, immediate landfall is Cap d'Ailly which is passed at 3 miles distance and then vessels proceed to the landfall buoy of Dieppe marked D.1. (East Cardinal, black yellow black, very quick flashing light, 3 flash every 5 seconds and a bell).

Location: Lat. 49° 57′ 15″ N., Long. 1° 01′ 20″ E., or 2.5 miles to the N.W. of the port entrance.

The cliffs which surround Dieppe give very good radar echoes.

ANCHORAGE: It is recommended to anchor in zone bounded by following points: *(a)* Lat. 49° 56′ 55″ N., Long. 01° 04′ E.; *(b)* Lat. 49° 58′ 40″ N., Long. 01° 02′ 45″ E.; *(c)* Lat. 49° 57′ 42″ N., Long. 00° 59′ 20″ E.; *(d)* Lat. 49° 55′ 50″ N., Long. 01° 00′ 30″ E.

This anchorage area includes buoy D.I and depths are from 6 m. to 12 m. with sand and broken shell bottom. Larger vessels anchor approximately 0.5 miles to North of Buoy D.I in depths of 10 m. to 12 m.

Forbidden Anchorage: It is forbidden to anchor in the area defined by the following points: Lat. 49° 56′ 55″ N., Long. 01° 05′ 29″ E. – Lat. 49° 56′ 25″ N., Long. 01° 03′ 03″ E. – Lat. 49° 56′ 05″ N., Long. 01° 04′ 50″ E.

RESTRICTIONS: The lock gates of the commercial basins are only open from 2 hours before to 1 hour after high tide. Vessels remain at anchorage in the roads until the gates are opened. Large vessels enter preferably at the time of high tide to benefit to the maximum from the level of water under the keel and the best conditions of navigation.

Entry and Leaving: Vessels entering must arrive in the roads at the latest 25 minutes after high tide, except for large vessels which must be in the roads at the latest at high tide. Vessels leaving must be ready at the latest 30 minutes after high tide.

Entry and Leaving Signals: Entry and leaving signals are exhibited on the signal post on the West jetty and on the repeater post of the fore port (signals in accordance with the Lisbon Convention of 23rd October, 1930.) At the Colbert Sluice and at the various locks the signals are simplified.

MAX. SIZE: Vessels LOA 155 m. and beam 21.5 m. can enter. In certain cases vessels of LOA 165 m. may be permitted to enter.

Colbert Lock (Dimensions of Lock): 230 m. length, 37 m. width, controls entrance to Inner harbour, where depth maintained about 7.50 m.

Canada Docks: length 154 m.; width, 21 m.; draft 8 m.

Paris Dock: length 154 m.; width 21 m.; draft 7 m.

Opening of Canada and Paris basins: 2 hours before to 1 hour after full tide, night or day. The port is accessible to vessels up to 10,000–12,000 d.w.t.

HEALTH: Pratique given by Customs Officers who board on arrival. In case of suspected disease, Master required to radio details to Agent in advance.

TUGS: 3 tugs available (1,400 h.p., 750 h.p., 600 h.p.). Requests for use must be made to the Port Captaincy. Two tugs in service at all times.

BERTHING:

Dock	*Quay*	*Facilities*	*Length (m.)*	*Sea level chart*
Paris	Norvege	1 Roll-on/Roll-off ramp (80 t.)	715	7.5/9
	Maroc	6 noria conveyors for banana handling	600	7.5/9
Canada	Indes	1 grain bagging funnel	150	7.5/9
	Quebec	grain silo (cap. 12,000 tons). Capacity 500 t.p.h.	160	7.5/9
Avant-Port	Henri IV	1 Roll-on/Roll-off ramp (40 t.)	380	4.5/5 minimum
Arriere-Port	Quai Guynemer	1 Roll-on/Roll-off ramp (120 t.)		

Handling Capacities:

	Loading:
Colza oil	200 t.p.h. (from the quay)
Colza grains	60 tons/man hour
Grain and wheat	500 t.p.h. (silo)
Rough timber	23 to 28 cu.m./man hour
	Unloading:
Colza oil	(taken from quay)
Colza grains	50 tons/man hour
Sand and gravel	100 to 150 tons/man hour
Bananas	about 3,000 cartons/man hour
Citrus fruit on pallets	55 to 65 pallets/man hour
Citrus fruits not palletised (cases, cartons, crates)	16 to 21 tons/man hour
Pre-slung timber	about 80 cu.m./man hour
Bulk timber	about 25 cu.m./man hour
Iron and steel	50 to 60 tons/man hour

CRANES: One 30 ton crane at Quay de Tonkin. One mobile crane, 40 ton and jib 40 m.

Quay Cranes: 6×3 ton, 2×3-6 ton, 2×6-12 tons and 6×2 ton gantry cranes.

BRIDGES: There are 3 bridges without vertical obstacles, and to request opening of the Colbert Bridge give 3 long blasts on the ship's whistle, to call for the opening of the Admiral Rolland Bridge give 3 long blasts on the whistle, and for the opening of the Jehan Ango Bridge give 2 long blasts on the whistle.

STEVEDORES: Normal hours are 0800–1200 and 1400–1800. Possible to work from 1800–2200 to complete operations. No work on Sundays or holidays.

RADIO: Boulogne Radio (FFB). *Arrival Advice.* Masters of vessels must send to the Port Authority, 24 hours in advance, or at the latest when leaving the previous port where this is located less than 24 hours away, the expected time of arrival in the roads, indicating the name of the vessel, tonnage, length, beam, the date and time of arrival, maximum draft of the vessel on arrival, the nature and tonnage of various items of its cargo and hazardous cargo (in transit or to be landed), possible damage to the ship, its equipment or to the cargo. A rectifying message must be sent in the event of a change. Address: Port Captaincy: 1 Quai de la Cale, Dieppe. Tel: (35) 84 10 55. Telex: Mardiep 180414F.

VHF: Dieppe Radio maintains continuous watch on Channels 2 and 24 and calls vessels on Channel 16. The Port Authority (Call sign "Dieppe Port") maintains watch on Channel 12.

MEDICAL: All medical facilities available.

FRESH WATER: Supplied by pipe-line. There are a great number of outlets on the quay.

FUEL: Available in small quantities; delivered by tanker lorry.

GANGWAY/DECK WATCHMEN: Available if required.

IDENTIFICATION CARDS: Embarkation card or passport is sufficient.

CONSULS:

Norway
Sweden
Denmark
Netherlands

REPAIRS: Good facilities exist, all types carried out.

DRY DOCKS: Dry dock in the inner harbour, dimensions 130 m.×18 m. It can receive ships 129×17 m. One lift of 300 tons and 7 repair sites.

SURVEYORS: Bureau Veritas at Dieppe; Lloyd's at Le Havre and Rouen; American Bureau of Shipping at Le Havre; Det Norske Veritas at Le Havre.

OPENING/CLOSING HATCHES: According to agreement, either by crew or stevedores.

CUSTOMS ALLOWANCES: EEC countries – 300 cigarettes 1.5 litres of spirits and an exemption of 600 francs. Antilles: 400 cigarettes, 1 litre of spirits of more than 22°; Africa: 400 cigarettes and 1 litre of spirits of more than 22° and an exemption of 140 francs per passenger.

REPATRIATION: Good facilities.

AIRPORT: Dieppe Saint Aubin (3 kms.) has two daily connections with Shoreham, England. The nearest main airport is Paris.

TIME: GMT plus 1 hour, but during the period from beginning April to end September (six months) the legal time is advanced by 1 hour (GMT +2).

HOLIDAYS: 1st January; Good Friday; Easter Monday; Ascension Day; Whit Monday; 1st May; 14th July; 15th August; 1st November; 11th November; 25th December.

POLICE/AMBULANCE/FIRE: Police (Duquesne Quay) 84-87-32 or 17. Fire and Ambulance 18 or 84-33-00.

TELEPHONES: No connections on the quays.

SERVICES: Compass adjusting, etc. available.

SHORE LEAVE: Allowed.

AUTHORITY: Port de Dieppe, Quai de la Cale, 76208 Dieppe. *Tel:* (35) 84.10.55. *Telex:* Mardiep 180414 F. *Contact:* P. Leminicier, Commandant du Port.

AGENT: See "Paris".

DONGES: Refer to Nantes.

DUNKIRK: 51.03 N. 02.24 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port within which a vessel is considered to be an "arrived ship" is the Dyck Lightship or the Roads if the ship comes from the East.

DOCUMENTS:

Entry Bill (all information about ship), given by Pilot to Master, who fills it in and gives it to Harbour Officer.

To be given to Customs:

3 Crew Lists.
3 Passenger Lists.
3 Copies Stores/Bonded Stores List.
Manifest or copy.
Form for increase of tonnage.
Declaration of open spaces.
3 Lists of objects held by crew.

ANCHORAGES: Large vessels waiting for entrance must anchor in the area West of Dyck Light Vessel. In bad weather, ships may anchor off English coast, in the roads of Les Dunes, with good mooring ground of sand and mud 20 m. deep. On the Roads of Dunkirk, ships must anchor East of buoy E.1 so as not to disturb the entrance of ships.

PILOTAGE: Pilotage station limits – there are 2 pilotage zones.

1. The Outer Zone which is limited:
   To the West by the meridian of Calais Lighthouse (Long. 01° 51′ E.);
   To the East, by the meridian of Long. 2° 27′ E.;
   To the North, by the line situated 3 miles seawards of the LW mark;
   To the South, by the Calais Pilotage Zone, the coast and the Inner Zone defined below.
2. The Inner Zone limited:
   To the West by meridian Long. 02° 08′ E.;
   To the North, by a continuous broken line constituted by the parallel Lat. 51° 03′ N., the line of the coast, the meridian Long. 02° 20′ E., the parallel Lat. 51° 04′ 30″ N.;
   To the East by the meridian of Dunkirk Lighthouse (02° 22′ E.);
   To the South by the end of the water levels of the autonomous port of Dunkirk.

Pilotage is compulsory in Inner Zone for ships over 150 n.r.t. or ships of max. length 50 m., or with dangerous cargo.

Pilotage compulsory in Outer Zone for ships not fitted with VHF, or over 1,000 nett tons or max. length 100 m. or with dangerous cargo.

Vessels coming from the West should call Pilots 12 hours before arrival or when leaving the former harbour. Vessels coming from the East should call Pilots 2 hours before arrival. ETA based on time of arrival at Dyck Lightship, should be given through Boulogne Radio (telegraphy) or by radiophone (2182 kHz). ETA to state: ETA (at pilot station). Length of the ship. Draft. Place where the Pilot is requested: Dyck/Dunkirk Light Vessel; Dunkirk Roads; Zuydcoote Pass.

ETA will be considered null and void if vessel does not arrive within 2 hours of stated ETA.

In vicinity of pilot boat, vessels may communicate with Pilots by VHF Channel 16, or R/T 2182 kHz or by Aldis lamp or flag signals when pilot boat is in sight. Telegraphic address of Pilot: Piloduk. Telex: 820902.

Pilot boat is about 50 m. long, black hull with white horizontal stripe, "Pilot Dunkerque" written on hull. Black funnel with white anchors insignia.

Pilot boat is positioned between Dyck Lightship and Buoy CA.2. In bad weather, pilot boat stays on radio watch but may leave for a more sheltered place, or put into port.

Ship's Departure: Sailings must be ordered at the Harbour Office, pilot station, towage office and linemen's office.

Pilots: For a sailing between 0800 and 2000 hrs. 1.5 hours' notice is necessary to Pilot for the ships moored in Dunkirk-East (Mardyck Bassin excepted) a 2 hours' notice for ships moored in Mardyck Bassin and Dunkirk-West.

For a sailing between 2000 hrs. and 0800 hrs. vessels are required to give notice to the pilot office before 1600 hrs. and to order the Pilot before 1800 hrs.

RESTRICTIONS/MAX. SIZE: Movement of vessels: Normal operating conditions. Exceptionally, dispensations may be given by port services after study of specific cases.

Eastern Port

VIA CHARLES DE GAULLE LOCK:

ENTRY: By day: Passage to breakwaters from sunrise to sunset.

Before high tide (HW −3 hours). Length 250 m. or under – max. draft 12 m.

After high tide (HW +2 hours). Length 280 m. or under if vessel is engine-driven and length 265 m. or under if vessel is turbine-driven – max. draft 14.20 m. Beam 44 m. or under (reduced to 42 m. if lock defences are not in good condition).

After agreement of Captaincy/Pilotage/Tugs is obtained, a second vessel can be taken at the entrance, up to 2 hours after high tide, providing its draft is 12.80 m. or under and beam 39 m. or under.

If tugs have to be changed during the entry manoeuvres of 2 large vessels, the Master of the vessel using the tugs must be warned in advance by a message from the Captaincy.

At Night:

Before high tide (HW −3 hours). Length 250 m. or under – max. draft 12 m. Beam 39 m. or under.

After high tide (HW +2 hours). Length 250 m. or under – max. draft 12.50 m. Beam 39. m. or under.

SAILING:

If length 251 m. or over and beam 39 m. or over, register for sailing between 1 hour before sunrise and 1 hour before sunset, except for Berth AP 1, vessel with bow facing West, where the limit is 2 hours before sunset.

From tide-coefficient 95 onwards (h=5.85 m.) no registration required between HW – 3.5 hours and HW – 0.5 hours.

If the length is between 250 m. – 251 m. and beam is under 39 m. sailing registration possible from 0500 to 2200 hrs. (Summer and Winter) except for tankers, where length is still limited to 250 m. and beam under 39 m.

If length is under 250 m. and beam is under 39 m. sailing registration day and night without restriction.

VIA WATIER LOCK:

Passage prior to high tide: Max. draft 11.50 m. – beam 32 m. or under.
Passage after high tide: Max. draft 11 m. – beam 32 m. or under.
Max. length (before or after HW).

By Day: Length 230 m. or under with no vessel at Mole V. Length 220 m. or under with vessel at Mole V.

By Night: Length 220 m. or under with no vessel at Mole V. Length 210 m. or under with vessel at Mole V.

VIA TRYSTRAM LOCK:

Max. draft 8 m. – beam 22 m. Length 150 m. or under on leaving port, Tixier Lock pumps stopped on Pilot's request. Length 140 m. or under on entering port, Tixier Lock pumps stopped on Pilot's request.

BP BERTHS:

By day and by night, on direct entry or with tow relinquished: Length 250 m. or under. Draft 12.50 m. or under (this can be extended to 12.80 m. max. dependent on water level in basins).

DRY DOCK 6 – DOVER – PANAMA QUAYS:

Large vessels may manoeuvre in good visibility and wind less than Force 5 Beaufort.

Max. dimensions of vessels admitted to dry dock 6:

Length 280 m.×beam 44 m.×draft 6.50 m. Bow/8.5 m. Stern. (After improvement of access defences in Dock 6 – 290 m. × 44 m. will be possible).

On Relinquishing Tow: Entry and sailing registration on Dock 6:

By day, registration from sunrise less 1 hour to sunset less 2 hours for vessels length 251 m. or over and beam 39 m. or over.

Registration from 0500 hrs. to 2200 hrs. if length between 250 m. and 251 m. and beam under 39 m. No limit on registration time if length is 250 m. or under and beam is under 39 m.

Entry Direct of vessels length over 250 m. and/or beam over 39 m.: passage to jetties when daylight 2 hours after HW – latest time 2 hours before sunset.

Direct Sailing to Sea from Dock 6 of vessels length over 250 m. and/or beam over 39 m.: Registration 3 hours before sunset.

Note: Mole V, Eastern section, must be clear for vessels of length over 250 m. swinging in front of Dry Dock 6, Dover and Panama Quays, and Watier Amont Quay free for passage of vessels of length over 250 m. via Brocquaire Channel.

RECOMMENDED DRAFTS FOR SAILING OR
TOW RELINQUISHING MOVEMENTS

Length	150 m.-180 m.	180 m -205 m.	205 m.-230 m.	230 m.-280 m.
Draft	B 5 m.-S 6 m.	B 6 m.-S 7 m.	B 7 m.-S 8 m.	B 9 m.-S 10 m.

B=Bow, S=Stern. (except for repairs)

Western Port:

FLANDERS TANKER BERTH:

In Normal conditions of Dredging – Entry: Passage to jetties from sunrise to 1 hour before sunset if length over 280 m.; Passage to Jetties from 0400 hrs. to 2100 hrs. (or sunset) if less than 280 m. length.

Before high tide (3 hours before HW at Dunkirk East). Coefficient under 80 draft 19.50 m. Coefficient over 80 draft 20 m.

After high tide (HW at Dunkirk East plus 2.5 hours). All coefficients draft 20.50 m.

Tugs must be present at "DW 13/DW 14" 45 minutes before theoretical time of passage to berths of the tanker they are serving.

Theoretical Number of Tugs:

D.w.t.	D.w.t.	No. of tugs	
under	125,000	3	According to Pilot's request
125,000 –	175,000	4	According to Pilot's request
175,000 –	250,000	5	According to Pilot's request
250,000	and over	5 or 6	According to Pilot's request

Sailing: Sailing registration from 1 hour before sunrise to 1 hour before sunset if length over 280 m.; Sailing registration from 0500 hrs. to 2200 hrs. is less than 280 m. length.

With coefficient over 95, no sailing registration from HW – 3 hours to time of HW. The interval between registration time for sailing of a tanker from the Flanders Tanker Berth at the time of passage to the jetties of an incoming tanker must not be less than 4 hours.

Recommended draft on sailing:

Length 280 m. or under	Length over 280 m.
8 m. bow/9 m. stern	9 m. bow/10 m. stern

No. of tugs to be used:

D.w.t. under 150,000 tons – 3 according to Pilot's request.
D.w.t. over 150,000 tons – 4 according to Pilot's request.

Note: Wherever possible, between buoys DW 14 and DW 16, large vessels leaving Dunkirk East should not cross tankers entering Dunkirk West.

OPERATION OF S.F. BP OIL BASIN BERTHS:

North BP Berth:

Max. draft 12.5 m. Length 250 m.

Middle BP Berth:

Max. draft 12.5 m. Length 245 m.
Max. distance stern/connection 122.5 m.

South BP Berth:

Max. draft 10.5 m. Length 230 m.
Max. distance stern/connection 120 m.

Coaster Berth – North Face:

(a) West Part, from Bollard 2.5 to Bollard 7 (quay length 80 m.) – Max. draft 6.5 m.

(b) East Part, to the East of Bollard 7 (length of quay 90 m.) – Max. draft 7.5 m.

Max. length of vessels admitted to coaster berth is 120 m. with a draft of 6.5 m.

Coaster Berth – South Face: Solely reserved for river traffic.

Bunker Berths: Reserved for bunkering craft.

Note: The drafts shown correspond to a minimum water depth in the basins of 5.3 m.

At all BP berths, vessels are positioned bow facing West.

Simultaneous usage of BP North and Middle Berths is only possible, under normal conditions, if the total beam of the 2 vessels in question is less than 70 m., otherwise the manoeuvring of these vessels, both on entry and sailing, can only be envisaged by day and in fine weather.

Vessels of larger dimensions than those covered by this note can be admitted to the following berths only after prior study and subject to special conditions of draft, berthing and securing cables, etc.

Overflow rafts: See Article 412 of Permanent Instruction No. 57.

Max. length of vessels, with draft of 12.5 m. transiting Brocquaire Channel is fixed at 250 m.

HEALTH: For ships coming from *(a) All European Countries:* Declaration of Health is not obligatory but general International Certificates are controlled. *(b) Other Harbours:* Admission subject to Declaration of Health and usual controls of certificates. Admissions in Free Pratique only in daytime except special cases (intervention of a physician). Request for Free Pratique may be made to Sani-Port, Dunkirk, through Boulogne Radio. In case of necessity, health service can – on request – intervene at night.

RADIO: Dunkirk Harbour Station (FFF), VHF call sign "Dunkerque Port", for messages about port service through VHF Channels 73 and 16. Communications other than in VHF made through Boulogne Radio (FFB).

VHF: Dunkirk Port Station maintains continuous watch on VHF, Channels 73 and 16.

RADAR: There is radar at the control tower of harbour. It is not a guiding radar.

TUGS: Tugs normally join vessel between buoys DW.28 to DW.30 and DW.16. Smaller vessels are joined by tugs in the outer port.

On departure tugs must be ordered with a 2 hour notice for Dunkirk-East and a 4 hour notice for Dunkirk-West. Moreover, for manoeuvring between 1900 hrs. and 0700 hrs. tugs must be reserved before 1600 hrs. and ordered before 1800 hrs.

It is possible to cancel or delay any order for tugs, without indemnity, provided this request is done with a 1 hour (daytime) and 2 hours' (night-time) notice for Dunkirk-East, with a 2 hours' (daytime) and 4 hours' (night-time) notice for Dunkirk-West.

Also see "Restrictions".

BERTHING: Berthing priority is decided by Port Captain's office. Vessel is informed by radio of the location and priority given to her.

Dock	Quay	Length	Min. Depth of water
1	Freycinet I	495.7 m.	6.90 m.
1	Freycinet II	251.5 m.	7.30 m.
1	Freycinet III	496.7 m.	7.80 m.
	Front du mole 1	187.3 m.	7.20 m.
2	Freycinet IV	430.6 m.	7.60 m.
2	Freycinet V	630.0 m.	7.40 m.
	Front du mole 2	146.0 m.	7.70 m.
3	Freycinet VI	528.4 m.	9.10 m.
3	Freycinet VII	516.8 m.	9.40 m.

280	16.00	17.25
310	15.30	17.25

BRIDGES: Bridges of locks and wet docks are closed to navigation for short periods to allow trains or work hands to go. The maritime traffic is practically never disturbed.

BULK HANDLING FACILITIES: Bulk Quay No. 1, formerly known as the ore quay. Equipped with 2 gantry cranes. Principally used for iron ore destined for Usinor Dunkirk and Usinor Valenciennes. There is a loader for clinker at the Western part of the Quay.

Bulk Quay No. 2, a common quay with 2 berths belonging to the Dunkirk Port Authorities. Equipped with 2 polyvalent iron ore/coal gantry cranes. This quay is accessible for largest ships able to enter the port. Used to discharge coal destined for the Usinor coke mill, also receives coal for other operators, manganese ore and all iron ores for receivers other than Usinor.

Bulk Quay No. 3, an extension of the Usinor Quay for iron ore cargo. Equipped with 3 gantries of 50 tons capacity. Permissible draft 14.20 m.

Phosphate Quay, situated West of Bulk Quay No. 2. Berth is 600 m. long with a min. depth alongside of 14.8 m. Bulk carriers of 80,000 d.w.t. with a draft up to 14.2 m. can be accommodated.

Unloading equipment consists of 3 cranes with grabs, each with a max. discharge capacity of 565 t.p.h.

A new silo is situated at Quai de Grande Synthe. Capacity 70,000 tons. Permissible draft 13.5 m. 1×1,000 t.p.h. shiploader.

The second new silo, (Silonor), will have horizontal handling and storage under a shed of 100,000 tonnes. Half of the capacity is due to come on stream in 1986 with final completion scheduled for Spring 1987.

Sugar is handled at Freycinet No. 9 silo capacity 83,000 tonnes.

Dunkirk-West: The Western Bulk Terminal (Q.P.O.): For lage bulk carriers (iron ore and coal) with 1 berth for vessels up to 220,000 d.w.t. (according to dredging conditions). Equipped with 2×50 ton grab gantry cranes linked to storage yard with a 600,000 cu.m. capacity.

CONTAINER FACILITIES: *Dunkirk-West:* Quai de Lorraine and Quai de Flandre. Total length 1,200 m. equipped with 4 container gantry cranes capable of lifting 45 tons on spreaders for 20 ft.–40 ft. units.

ROLL-ON/ROLL-OFF FACILITIES: *Dunkirk-West:* Quai d'Alsace is equipped for direct transhipment of vehicles, trailers and wagons. Quai de Lorraine and Quai de Flandre are provided with movable steel ramps for direct transhipment of vehicles and trailers. A fixed quarter ramp has been installed at the West end of Quai de Lorraine.

Dunkirk-East: Quay Freycinet VII, the berth South of Freycinet VI, has been provided with a fixed ramp for roll-on/roll-off for ships up to 8 m. draft and 22 m. beam, and Quay Freycinet XIII, South part, is fitted with a fixed ramp for ships up to 12.50 m. draft.

Mobile Cranes (Port Services): 1 at 6/10 tons and 2 at 17/36 tons. Possibility of mobile cranes from other yards.

OIL TANKERS: The following tanker berths are available:

West Port: Flanders Oil Berth: max. draft 20.50 m. Discharge lines to Total Refinery, and to the B.P. Refinery. The access channel has been dredged to a depth of 22 m. at L.W. The turning circle at the entrance to the Outer Port West has a diameter of 1,400 m. Max. discharge rate 20,000 cu.m./hr.

East Port: S.F.B.P. Oil Dock: North wharf, max. draft 12.50 m. Loading/discharging pipes 26 in. diameter, bunker line 10 in. diameter.

Middle wharf North, max. draft 12.50 m. Loading/discharging lines 2 of 22 in. and 3 of 16 in. lines, bunker line 16 in. diameter.

Middle wharf South, max. draft 12 m. Dimensions of lines as for Middle wharf North.

Coasters Wharf, max. draft 7.50 m. Diameter of loading/discharge lines 6 in.

Bassin de Mardyck Oil Port: Appt C.F.R. – Poste Est. Max draft 11.70 m., Poste Ouest draft 14.20 m.

Facilities for discharge of dirty ballast are available at all main tanker berths.

Stocknord Pier: Pier of length 440 m. with 4 platforms.
P.1 – For barges only.
P.2 – For barges and coasters up to 100 m. length and 8.50 m. draft.
P.3 – Oil and Gas. For vessels up to 100,000 d.w.t., 280 m. length and 14.20 m. draft.
P.4 – Gas only. Max. length 160 m. and draft 10.3 m.

C.P.A. Quay: Berth at Mole V. Mainly for Fuel and Vegetable Oil. For vessels up to 250 m. length and max. draft 9.60 m.

GAS TANKERS:

Appt. C.F.R.: Bassin de Mardyck: berth for butane and propane. East side of pier for vessels up to 11.60 m. draft.

Stocknord: Bassin de Mardyck. The total length of the quay is 440 m. with a width of 30 m.

Alongside this quay, are berths or platforms P1, P2, P3 and P4.

P1: Oil only.
P2: Oil only.
P3: Coasters of 90 m. LOA and tankers of 280 m. LOA, d.w.t. 100,000 tonnes on East side of pier.
P4: Coasters LOA minimum 60 m. and gas-carriers of LOA max. 160 m., max. d.w.t. 10,000 tonnes on West side of pier.

Products: LPG, ethylene, FR and PP.

P3 can take LPG products and chemical products: vessels up to 280 m. length.

Distance from P3 to storage areas: approx. 800 m. with a 10 in. line.

Nitrogen in gas-form available on site (2 in. and 3 in.).

P4 is for vessels of LOA 160 m. max. with a d.w.t. of 10,000 tonnes, and a max. draft of 10.3 m. Beam – no limits.

Products: LPG, derivates, propylene, ethylene, butadine. 10 in. lines and arm flanges of 8 in. ASA 300. Products can be refrigerated or at ambient temperature.

Connection with P3 and with the storage areas.

Nitrogen in gas-form on the quay (2 in. and 3 in.).

Length of platform: 25 m. Width of platform: 12 m. Height above water line: 5 m.

Loading and discharge by 8 in. Luceat arms.

Tidal movement at the quay is minimal: approx. 1.0 m. min./max. Predominant winds from the West.

Transhipment from vessel to vessel can take place at berths P3 and P4 by connection line between the two berths.

The possibility of transhipment with a first vessel berthed and a second connected to it is accepted. For this to happen:

1. Advise the authorities minimum of 24 hours before the operation.
2. A technician must be on hand.
3. The owner must supply hoses and defences.
4. Port rights and occupation of the quay is to be discussed with the owner.
5. A tug must be available for both vessels.
6. If the wind is blowing above force 5, the operation must be stopped and the connected vessel must go out to the roads with Pilot and tug, if the quay which can accept the type of vessel is not free.
7. Transhipment from vessel to vessel via connection lines from berth P4 and berth P3. If during this operation a priority vessel must at all costs berth, the operation of transhipment must be stopped and one of the vessels must connect up to continue the operation or go out into the roads (Pilot and tug necessary).

Port Entry: It must be emphasised that the depth of water at the port entrance towards the Mardyck basin at Charles de Gaulle lock, foreport East is 14.20 m. max. with a beam of 44 m.

Storage facilities: At approx. 800 m. from the Stocknord quay. 2 LPG – Propylene storage points of around 3,500 cu.m. each take propane for the account of the company CDF Chimie. They have a service pressure of 15 kg/sq.cm. and a temperature of −10°C.

From these 2 facilities, it is possible to load/discharge to and from lorries (18 tonnes) or trucks (45 tonnes).

Consumption of vapocracker (set for between 300 tonnes and 500 tonnes per day) is with the use of propane and naphtha.

List of storage points at Stocknord:

2×3,500 cu.m.	Propane–butane–Btd–propylene operating pressure 15 kg/sq.cm. Minimum temperature −10°C.
1×17,000 cu.m.	C2
1×17,000 cu.m.	C3
1×9,000 cu.m.	C4
8×6,000 cu.m.	Essences
9×6,000 cu.m.	Pyrolised essences
6×20,000 cu.m.	Naphtha, gasoil, diesel and fuel oil
2×2,000 cu.m.	(drums) chemical products
1×1,000 cu.m.	(drums) chemical products

Trains–trucks: Stocknord can hire, load, discharge trucks or lorries.

By truck: convoys of 1,000 tonnes of all products and throughout France.

By lorry: 15–20 tonnes LPG–ethylene, etc.

By truck: 45–50 tonnes each, filling in groups of 6; for each group of trucks filling takes approx. 20 minutes for all liquid products.

Nitrogen: Possibility of degassing at berths P3 and P4 (from 800 to 1,000 cu.m. per hour of nitrogen in gas-form).

Heater: Currently, there is a propylene land-based heater (350 cu.m./hour) of the steam type working from −47°C to +5°C.

This heater can be connected to the lines of the new propane storage facilities: time involved, approximately 1 month.

STEVEDORES: Each Master will contact his consignee.
MEDICAL: Hospitals and all medical facilities.
DENSITY: Salt.
FRESH WATER: Available in unlimited quantities. Numerous hydrants on all wharves.
FUEL: Supplied by barges or tank lorries if no connection at wharf. Fuel, diesel and gas oil available. Requests for bunkers must be made 48 hours in advance to Agents.
FIRE PRECAUTIONS: The preventive measures are taken for tankers are those of the I.M.O. recommendations. Rounds of the port officers. Ship's Master is given instructions of the harbour concerning tankers if necessary when filling the I.M.O Checklist. In case of storm, the Harbour Officer can stop loading or discharging.
GANGWAY/DECK WATCHMEN: Guarding is strongly advised.
OPENING/CLOSING HATCHES: Carried out by crew.

CERTIFICATES:

Certificate of Nationality.
International Certificate of Tonnage.
Certificates from the Classification Office where ship is registered, especially:
Certificate of Freeboard.
Classification Certificate, engine and boiler.
Classification Certificate, hull.
Classification Certificate, electric equipment for tankers.
List of Hoisting Apparatus.
Derat Certificate.
TOVALOP Certificate or similar for tankers.

CUSTOMS ALLOWANCES: Tobacco: Amount allowed for each member of crew: 200 cigarettes or 200 gramme tobacco. Wine and/or Spirits: 1 bottle.
IDENTIFICATION CARDS: An official identity certificate is compulsory ashore (passport, identification card, seaman's book, etc.).

GRANVILLE: 48.50 N. 01.37 W. (See Plan)

DOCUMENTS: See "Calais".
PILOTAGE: Pilotage not compulsory for ships of less than 45 m. length, except for those carrying dangerous cargo. Pilots board from fishing boats carrying regulation marks of a pilot boat, and maintain position at Videcoq buoy when a vessel is expected.

Limits of Granville pilotage are: 1. On entering, towards the West, the line joining "la Pierre d'Herpin", and Chausey lighthouse. To the North, alignment of Chausey lighthouse and "le Pignon". 2. On leaving, alignment of Mont. St. Michel through Champeaux Point. Ships bound Granville required notify ETA 18 hours in advance.

Telegraphic address: Telex 170002 SCAC Granville – Ship's Agency – Handling. Telex 170777 Monsieur LeFranc, Marine Broker.

1.5 hours before to 1.5 hours after high tide contact with Port Officer (Tel: 33.50.12.45 and 33.50.17.75 Granville) can be established by relay through "Coastal" Stations. During same hours contact can be made with pilot boat and with Port Office by VHF Channel 12 (port wave band 156.6).
ANCHORAGE: At landfall buoy of Le Videcoq.
RESTRICTIONS: Draft restrictions apply at neap tides. Width of Lock – 20 m. Length – 40 m.
MAX. SIZE: Vessels 115 m. long, 18 m. wide and with a max. draft of 7.50 m. may enter the tidal basin during 6 days, twice a month with effect from a tidal coefficient of about 80.

For a vessel of this size, it is recommended to give advance notice of arrival as far ahead as possible at the commencement of tides with a coefficient of 80.

Entry of a deep draft vessel may make it necessary to close the tidal basin more quickly after high tide.

Speed in the channel, the fore port and the tidal basin is limited to 5 knots.
HEALTH: Pratique arranged by Customs.
RADIO: Boulogne Radio for ships coming from the North. Brest-Le Conquet Radio for ships coming from the South.
TUGS: Port not equipped with tugs. Pilot boats used as "pushers" for port manoeuvres, or for carrying hawsers to tying-up points.
VHF: Port Authority on Channels 16 and 12 during working hours.
BERTHING: Determined according to nature of cargo.
Tidal Basin: 3 electric cranes (2×7 tons and 1×6 tons) serve the South quay, and 1×10 tons serves the North and East quays.

Open areas, warehouses and storage silo capable of receiving all goods in bulk, bags or packages.

Internal transport: rail and road.
Fore Port: Open area and mobile cradle capable of hauling up vessels up to 100 tons. 1×5 ton crane on cradle. Repair yards.
West Quay: Between tidal basin and fore-port – solely for fish discharge and auction. Quay to be lengthened by 110 m. and widened by 14 m.
STEVEDORES: Work hours 0800/1200, 1400/1800. Overtime possible.
HOLIDAYS: See "Calais". Local holiday, Mardi Gras afternoon.
MEDICAL: Hospital available. Tel: 33.50.11.37. Also Medical Centre.
TANKERS: 2 berths for unloading domestic fuels through 8 in. pipes.
DENSITY: 1025.
FRESH WATER: Available at all quays, international connections.
FUEL: Available from tanker lorry to commercial vessels at 48 hours notice.
OPENING/CLOSING HATCHES: Carried out by crew.
GANGWAY/DECK WATCHMEN: Available on request.
CUSTOMS ALLOWANCES: Tobacco. 200 cigarettes. Wines and spirits. 1 bottle spirits.
CONSULS: None.
REPAIRS: Possible. Also radio repairs.
REPATRIATION: Paris, 3.5 hours by train.
AIRPORT: 10 km. from the port at Breville. Air-taxi and commercial flights.
TIME: Local Time GMT plus 1 hour in Winter and GMT plus 2 hours in Summer (1st April – 1st October).
POLICE/AMBULANCE/FIRE: Police Tel: 33.50.11.16; Fire Service 18; Ambulance 33.50.11.37.
GENERAL: Marina with 1,050 berths at Herel. Max. length 15 m. Max. depth available 2.75 m.
AUTHORITY: Le Commandant de Port, Port de Granville, Terre-Plein de L'Ecluse, 50400 Granville, France. *Tel:* 33.50.17.75 or 33.50.12.45. *Contact:* R. Ragel, Port Officer.

HONFLEUR: 49.25 N. 00.14 E. (See Plan)

DOCUMENTS: See "Rouen".
PILOTAGE: Served by "Pilotage de la Seine" (address: 9 Chaussee Kennedy, 76 le Havre). Ships bound for Honfleur are received on the Carosse Roads (Rade de la Carosse) where the following signals should be made for summoning a Pilot. By day – flag "G" of the international code of signals. By night – in Morse by signalling lamp.

Complementary signals which can be used on arriving on the roads. By day – globe or ship's national flag hoisted at masthead. By night – red light at main masthead. At all times, sound signal of 5 long blasts.

Advice of ETA and draft in salt water is to be given to Rouen Port at least 5 hours prior arrival roads, as well as to Agent.

Similarly, vessels anticipating a delay of more than 2 hours after their reported ETA should notify Rouen Port or the pilot boat of this at least 3 hours before the time originally reported.

Before arriving on the roads, ships should call pilot station "Rouen-Pilot" which keeps a permanent VHF watch on Channels 16 and 11.

A Pilot is obligatory for every ship of more than 55 m. length.
RESTRICTIONS: Access to port made through channel 100 m. wide, protected by 2 dykes about 500 m. long, which leads to outer harbour. A tidal port, Honfleur possesses 3 basins:

Dock	*Length*	*Width*	*Sluice width*
West Dock	128 m.	77 m.	10.50 m.
East Dock	295 m.	71 m.	16.50 m.
Carnot Dock	788 m.	108 m.	13.00 m.

East Dock joins outer harbour: ships of more than 70 m. long must anchor in Carnot Dock which spans from East.
MAX. SIZE: Port can receive ships 100 m. long and 15.50 m. wide berthing in East Dock; but with Carnot Dock, only ships less than 12.50 m. wide can enter. Drafts vary according to tides: 6.00 m. with average spring tide, 4.70 m. in average slack water, and subject to variations because of silting up of harbour which necessitates frequent dredging.
HEALTH: Bill of Health is under the jurisdiction of Customs office of Honfleur. Hospital nearby.
RADIO: Boulogne Radio, Brest Radio or St. Lys Radio. A permanent watch is maintained by Rouen Port on Channels 16 and 11. Disengagement frequency after call on Channel 16 is Channel 71.
TUGS: If necessary are provided by "La Societe des Abeilles" of Le Havre.

BERTHING:

Name	No. of Berths	Depth (m.) Neaps	Depth (m.) Springs	Equipment	Remarks
Bassin Republique Quai Nord	3	5.10	6.27	Rail track 1×6 ton crane on rails	2 Berths equipped with pipe-line

Avant Port	1	5.10	6.27	2×15 ton cranes	
Quai en Seine	1				

1 "Richier" crane on tyred wheels available for use in the Port. Capacity: 30 tons at 3.50 m., 3.5 tons at 15 m.

TANKERS: Berth "Miroline" on dolphins in River Seine for tanker of 35,000 tons after lightening according to the depth conditions.

FRESH WATER: Available. Supplies arranged through Agent.

FUEL: Supplies arranged through Agent.

AIRPORT: 12 km. from Port.

AUTHORITY: M. Poucelle, Ingenieur des T.P.E., La Lieutenance, BP 45, 14603 Honfleur Cedex. *Tel:* (31) 89.20.02. *Telex:* 170196. *Contact:* J. Tocqueville, Harbour Master.

ILE ROUSSE: Corsica: 42.39 N. 08.56 E.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Provisions List.
1 Cargo List.
1 List of Articles (new and Customs-barred) in possession each crew member – cameras, binoculars, radios, cigarettes, spirits, etc.
1 Health Declaration.

PILOTAGE: Not compulsory.

ANCHORAGES: Outside port for cruise vessels.

RESTRICTIONS: None.

MAX. SIZE: Draft 5 m; length 160 m.

RADIO: Within 50 miles call Ajaccio Radio VHF Channel 16. Then connected over Channel 23 to telephone network.

TUGS: None available.

BERTHING: Depths alongside 2.0 m. – 6.0 m.

STEVEDORES: 24 hours accurate ETA necessary for ordering gangs. No work on Sundays and official holidays.

CARGO GEAR: Only a few nets and slings available; all other gear must be supplied by ship. Ship's derricks used.

FRESH WATER: Available at very slow pumping rate.

FUEL: Not available.

REPAIRS/CONSULS: None.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

AUTHORITY: Bureau du Port de Commerce, Ile Rousse, Corsica. *Tel:* (95) 60-00-68.

LA CIOTAT: 43.10 N. 05.36 E. (See Plan)

PILOTAGE: Chantiers Navals de La Ciotat (C.N.C.). have 2 Pilots.

ANCHORAGES: Good anchorages available in La Ciotat Bay. Anchoring in the harbour is forbidden.

APPROACHES: La Ciotat Bay is situated between Toulon and Marseilles. The bay is sheltered from North and N.W.'ly winds. The "Bec de L'Aigle", height 155 m., makes an easily recognisable landmark for the approach to the harbour.

The entrance channel to the harbour has a depth of 7 m.

MAX. SIZE: Largest vessel 380 m. long, 60 m. beam and 7.5 m. draft.

VHF: Signal station keeps watch on Channel 16 from 0630 – 2100 hrs.

TUGS: 2 tugs of 180 h.p. and 200 h.p.; tugs also available from Marseilles.

BERTHING: Harbour is formed by 6 moles. Depth in harbour varies from 1.32 m. to 7.62 m., vessels drawing up to 7.31 m. can enter. Total quayage 1,610 m. There are two basins near the main harbour specially equipped for pleasure craft.

CRANES: Electric cranes: 1×250 tonnes, 1×120 tonnes, 1×50 tonnes, 2×40 tonnes, 1×20 tonnes, 3×6 tonnes and 1×5 tonnes. One floating crane of 80 tonnes. All cranes belong to C.N.C.

MEDICAL: Private clinics and local hospital available.

FRESH WATER: Available from C.N.C.

FUEL: Available.

DRY DOCKS: Building Dry Dock: 360 m. × 60 m. × 9 m.

No. 1 Slipway: 228 m. × 39.30 m. with lifting apparatus for 7 – 150 tonnes.

No. 2 Slipway: 172 m. × 31 m. with lifting apparatus for 5 – 150 tonnes, one 660 tonne gantry crane and one 500 tonne gantry crane.

AIRPORT: Marseilles (Marignane) 55 km. away.

POLICE/AMBULANCE/FIRE: Police – Tel: (42) 839000. Fire – Tel: 18.

AUTHORITY: Capitainerie du Port de la Ciotat, Mole Berouard, 13600 La Ciotat. *Tel:* (42) 084384. *Contact:* H. Carcassonne, Harbour Master.

LA NOUVELLE: 43.01 N. 03.04 E. (See Plan)

DOCUMENTS:

1 Passenger List.
4 Crew Lists.
2 Stores Lists.
1 Cargo Manifest.
Bill of Health.
Safety Certificates.

PILOTAGE: Vessels call Pilot on VHF Channels 15 and 16. 3 pilot boats available. International Code pilot signals used.

MAX. SIZE: For port entry: Length 140 m., beam 20 m., draft 6.50 m. Tanker sea line: Max. draft 18m.

HEALTH: Pratique is given by Customs Officers who board vessel on arrival. In case of suspected disease on board, Master should radio Agents advising details before arrival.

TUGS: Not available. There are several launches to assist in mooring.

BERTHING: Effected in the order in which vessels arrive. Specialised berth for Roll-on/Roll-off available.

STEVEDORES: Arranged by consignees.

MEDICAL: Doctors available at La Nouvelle. Nearest hospital is at Narbonne, 27 km. away.

TANKERS: 1 sea line berth at buoys in depth of water greater than 18 m. 4 dolphin berths in the oil dock, max. draft 7.00 m. One of these berths is used for LPG cargoes. No slop disposal facilities.

DENSITY: 1025.

FRESH WATER: Supplied at all town berths.

FUEL: Available from several suppliers.

FIRE PRECAUTIONS: Usual safety regulations strictly applied. A barrage can be positioned across the channel to contain burning oil.

OPENING/CLOSING HATCHES: Optional, performed by stevedores or crew.

CUSTOMS ALLOWANCES: Each crewman allowed to retain only sufficient for his own consumption while in port. It is forbidden to take alcohol ashore.

IDENTIFICATION CARDS: Any person going ashore should carry a passport or identity card.

CONSULS: No local representation.

REPAIRS: Not possible ashore, except very minor ones.

REPATRIATION: No difficulties.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: In principal, no work done on legal holidays.

POLICE/FIRE/AMBULANCE: Police, tel. 480011; Fire, 480017; Ambulance, 480011.

TELEPHONES: No connections can be made on board.

SHORE LEAVE: No restrictions.

AUTHORITY: Ponts et Chaussees, Service Maritime et de Navigation du Languedoc-Roussillon, 34 Avenue de la Mer, 11210 Port La Nouvelle. *Tel:* (68) 48.00.37.

AGENT: See "Marseilles".

LA ROCHELLE/LA PALLICE: 46.10 N. 01.14 W. (See Plan)

DOCUMENTS:

3 Cargo Manifests, or Manifest of Ballast.
Certificate of Cargo Space.
2 Bills of Lading.
2 Stores Lists.
2 Personal Effects Lists.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.

PILOTAGE: Access from sea is through Pertuis d'Antioche, the strait between Isle of Re and Isle of Oleron. Pilotage compulsory for all vessels over 55 m. length. Pilot launch named *Armeria,* meets vessels at Chauveau Buoy in position Lat. 46° 06′ 05″ N., Long. 01° 16′ W. Contact Pilot via VHF Channel 16, 2 hours before arrival. ETA must be given to Capiport (Telex: 791780) 12 hours before arrival. In same message, Master must also advise if engine, rudder, winches, windlass, cargo pumps, radar, VHF and radio are in good working order. Master must also give the expiration date of the Oil Pollution Liability Certificate and state insurers name.

Vessels which do not receive berthing instructions on arrival should wait in the vicinity and South of Chauveau Buoy, keeping watch on VHF Channel 16.

ANCHORAGES: Vessels which do not receive berthing instructions on arrival should wait at anchor in the vicinity and 0.5–1.0 miles South of Chauveau Buoy. Keeping watch on VHF Channel 16.

Tanker Anchorage: Lat. 46° 05′ N., Long. 01° 15′ W.

MAX. SIZE:

West Berth (AP WE)	280	14.5 – 16.0	100,000
East Berth (AP SE)	175	11.0 – 12.5	25,000

RESTRICTIONS: Tankers usually berth at HW on the East side and either at HW or LW on the West side, providing their draft allows it.

Sailing possible at any time.

Vessels in excess of 460 ft. length can enter Inner Basin only from 2 hours before to 1 hour after HW.

Lock: 165 m.×21.3 m.×4.0 m. (sill).

HEALTH: Pratique given by Customs Officers who board on arrival. In case suspected disease on board, radio Agent in advance advising details.

RADIO: Bordeaux-Arcachon Radio. Also see "Pilotage".

VHF: La Pallice Port on Channels 16 or 12. Bordeaux-Arcachon Radio on Channels 21 and 26.

TUGS: Join vessels either in outer roads or inner roads of La Pallice. Normally tugs' lines are used.

3 tugs are permanently based at La Pallice, 2×1,250 h.p. (11 tons) and 1×1,500 h.p. (22 tons).

Port regulations prescribe the number of tugs to be used depending on tanker's deadweight:

Inwards: 4,000 d.w.t. – 11,000 d.w.t.: 2 tugs (1 if vessel has a bow-thruster.)
11,000 – 35,000 d.w.t.: 3 tugs (2 if vessel has a bow-thruster).
over 35,000 d.w.t.: 4 tugs
Outwards: 8,000 d.w.t. – 35,000 d.w.t.: 2 tugs (1 if vessel has a bow-thruster)
over 35,000 d.w.t.: 3 tugs

When necessary, a 4th tug comes from Bordeaux

BERTHING:

CRANES: *Basin:* North Quay: 2×5 tons at 18 m., 1×3 tons at 18 m., 3×10 tons at 15.5 m., 1 × 12 tons at 16.5 m.

South Quay: 6×6 tons at 18 m., 1×3 tons at 18 m.

Dry Dock: 1 Titan crane×20 tons at 25 m.

Fore Port: Chef de Baie: 3×33.5 tons at 22 m.

Mole D'Escale: East Side: 5×12 tons at 16.5 m., 1×5 tons at 14.5 m.

West Side: 3×15 tons at 21 m., 2×33.5 tons at 20 m., 1×10 tons at 15 m.

STEVEDORES: Normal working hours for stevedoring are: 0800 – 1200 hrs. and 1400 – 1800 hrs. 2 hours overtime may be worked from 1800 – 2000 hrs. When a quick despatch must be given to a vessel, an 8-hour shift can be arranged, from 0500 – 1300 hrs. and 1400 – 2200 hrs. during the week, and 0500 – 1300 hrs. on Sundays and holidays.

MEDICAL: All facilities available. Advance notice should be given if assistance required on arrival.

TANKERS: Only refined products are discharged at La Pallice. Four installations can receive cargo at both berths (West or East). Petroles de l'Ouest, Total and Raffinerie du Midi use the same pipe-line of 16 in. with a metal arm of 10 in. on each side. The Picoty installation has its own pipe-line of 12 in. with a metal arm of 12 in. on West side and one of 10 in. on East side.

All shore tanks are 3 km. to 4 km. from oil jetty.

Also see "Berthing" and "Max. Size".

FRESH WATER: Available from all wharves. Loading rate 15 t.p.h. No barges available.

FUEL: Supplied by tank trucks only. Diesel oil available locally. Light fuel oils available with sufficient notice. Tankers must stop pumping during bunkering.

FIRE PRECAUTIONS: Smoking is prohibited on the oil jetty. Entrance to the oil jetty is controlled by watchmen.

OPENING/CLOSING HATCHES: Performed by ship's crew.

GANGWAY/DECK WATCHMEN: Available from shore if required. *Tankers:* An automatically–moving shore gangway is available providing that the ship's deck has a sufficient clear surface.

CUSTOMS ALLOWANCES: 200 cigarettes and bottle wine/spirits per man.

IDENTIFICATION CARDS: Crewmen going ashore should carry passports or identity cards.

CONSULS:

Denmark	Tel: 46.41.10.66	Norway	Tel: 46.42.60.37
Finland	Tel: 46.42.60.32	Panama	Tel: 46.42.13.44
Greece	Tel: 46.42.13.44	Peru	Tel: 46.42.13.44

Netherlands	Tel: 46.34.98.66	Sweden	Tel: 46.42.13.44

REPAIRS: All kinds of deck, hull and engine repairs can be carried out by Ateliers et Chantiers de La Rochelle-Pallice.

Vessels not exceeding 21 m. beam may be repaired in the inner basin. Larger vessels are repaired at berths outside the inner basin.

DRY DOCKS: 2 dry docks in Inner Basin: 176 m.×22 m. and 107 m.×14 m.

REPATRIATION: Can be arranged without difficulty.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer. (April–September).

HOLIDAYS: New Year (1st January), no labour available; Easter Sunday, possibility of labour with overtime; Easter Monday, no labour available; Labour Day (1st May), no labour available; Ascension Day, possibility of labour with overtime; Whit Sunday, possibility of labour with overtime; Whit Monday, no labour available; National Day (14th July), no labour available; Assumption Day (15th August), no labour available; All Saints' Day (1st November), no labour available; Armistice Day (11th November), possibility of labour with overtime; Christmas Day (25th December), no labour available.

N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100% extra.

POLICE/AMBULANCE/FIRE: Police Secours 17; Commisariat Central 46.41.22.44; Ambulance 18; Fire Service 18.

TELEPHONES: Telephones are available at all berths at the mole.

SHORE LEAVE: Allowed, no restrictions.

GENERAL: Old harbour at La Rochelle is used only by fishing vessels and pleasure craft.

DEVELOPMENTS: Cereals quay to be lengthened and facilities to be upgraded. Vessels up to 100,000 d.w.t. will be able to be accommodated by late 1987.

AUTHORITY: Capitainerie des Ports de La Rochelle, Terre-Plein de l'Ecluse, B.P. 2042, La Pallice, 17009 La Rochelle Cedex, France. *Tel:* 46.42.60.12. *Telex:* Capipor 791780 F. *Contact:* J. Le Quilliec, Commandant du Port.

AGENT: See "Paris".

LE CHATEAU d'OLERON: 45.53 N. 01.11 W.

Very small fishing port on Ile d'Oleron. Entrance to port is 9 m. wide.

BERTHING: Tidal harbour with 350 m. of quayage. Depths alongside from 4.9 m. HW to zero at LW.

CRANES: One 2.5 ton crane available.

REPAIRS: Minor repairs only.

AUTHORITY: Monsieur l'Ingenieur Des Ponts et Chaussees, 17000 Le Chateau d'Oleron. *Contact:* Mr. Brilman, Harbour Master.

AGENT: M. Le Boutillier, 106, Bd. Emile Delmas, P.O.Box 2038. 17009 La Rochelle Cedex. Tel: (46) 421344. Telex: 790742 ("Ships 790742 F"). Cables: "Daylight – La Rochelle".

LE HAVRE (Including Antifer): 49.30 N. 00.07 W.

(See Plan)

DOCUMENTS: At arrival in-bound bill tendered by Pilot to be filled up and signed by Master specifying ship's data and dangerous cargo on board. After berthing: The Master must also complete the inwards declaration as soon as the Pilot comes onboard. Any abnormality must be reported to the Harbour Master (VHF Channel 12).

For Customs Officers

1 Crew List.
1 Crew Declaration List (personal effects, camera, radio set, cigarettes, cigars, tobacco, etc.).
1 Ship's Store List.
1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).

For Health Officers

1 Crew List.
1 Health Declaration.
Derat Certificate.
1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).
Individual International Certificates of Vaccination.

For Customs Broker

1 Crew List.
1 Crew Declaration List (personal effects, camera, radio set, cigarettes, cigars, tobacco, etc.).
1 Ship's Store List.
1 Certificate of open space occupied by cargo.
1 Passengers' Manifest (disembarking).
1 Baggage Manifest (unaccompanied).
Tonnage Certificate.

For Agents

1 Crew List.
2 Passengers' Manifests (disembarking).
2 Passengers' Manifests (in transit).
2 Baggage Manifests (accompanied).
2 Baggage Manifests (unaccompanied).
2 Dangerous Cargo Manifests and usual cargo documents.

For Immigration Office

1 Crew List.
1 Passengers' Manifest (disembarking).
1 Passengers' Manifest (in transit).

PILOTAGE: ETA to be sent to Harbour Master (see "Radio"). Advisable then to confirm directly to "Havreport" between 24 and 12 hours before arrival (see "Radio"). Pilot boats have orange hull with "Pilote Havre" in black letters on both sides, green flag with white anchor on fore-mast. Located off Le Havre channel entrance East of the intermediate landfall buoy (LH). Pilot boat on continuous service, a helicopter is also available.

Vessels may anchor near lighthouse South of entry alignment in good weather and further off in bad weather.

Light or sound signal to be made by vessels requiring a Pilot, letter "G" in morse code.

Pilots also board by twin-screw helicopters. This method is most frequently used to bring the Pilot(s) to large tankers (only during the day), and Pilots are landed either by the craft landing on the deck or being winched down if the vessel has no landing area.

Pilots on VHF Channels 16, 12 and 20. Tel: 35.42.28.32.

ANCHORAGES: Anchoring forbidden in the channel between both parallels 100 m. South and North of channel and in a zone 1 nautical mile long and 500 m. wide in prolongation of channel.

RESTRICTIONS: Depth in main channel 15.5 m. LW. Depth in tidal basin 14.5 m. LW.

Main lock entrance to enclosed basins, length 400 m. width 67 m., depth 14.5 m.

Vessels berthing in tidal docks (Bassin Theophile Ducrocq) dependent on tide if draft in excess of 10 m.

Quinette de Rochemont Lock open from 2 hours 20 minutes before high tide until 40 minutes after. During this period vessels of max. length 210 m. and max. breadth 26 m. may pass through. Otherwise max. length authorised is reduced to 180 m. In some circumstances some locks are completely closed around low tide.

CIM Berth No. 10 may receive tankers up to 280,000 d.w.t. with draft varying between 19 m. and 20.7 m. depending upon tide. Such vessels enter only by daylight and must arrive at Le Havre Buoy at least 3 hours before HW.

MAX. SIZE: Tankers: length 392 m., draft (approx.) 20 m. subject tide.

Berths of Compagnie Industrielle Maritime (C.I.M.): Max. draft recorded 20.73 m. Another vessel with following dimensions has also berthed – length 391.83 m., beam 68.05 m., 423,699 d.w.t.

Antifer (East and West Berths): Max. dimensions recorded: Length 414 m., beam 79 m., 555,051 d.w.t., draft 28.85 m.

Bulk Carriers: 149,949 d.w.t. (coal). draft 17.16 m.

HEALTH: Free Pratique automatic for vessels coming direct from Continent or Italy and "Q" flag not to be flown. From other countries including Spain and Portugal usual applies. Free Pratique may be obtained by radio message to Sanipor Le Havre specifying name of vessel – where coming from – total number of Crew members, number of Crew members vaccinated (yellow fever, cholera).

Tankers: For tankers it is advisable to ask Free Pratique by radio in order start operation as soon as vessel berths.

TUGS: 12 tugs available, from 1,000 to 4,800 h.p. Normally join vessel inside the jetties in outer harbour. Ship's lines or tug's lines used at ship's option. Extra charge for use of tug's line. 2 tugs are equipped for fire fighting.

BERTHING: Agents generally inform Master by radio of berthing prospects, arrival time limits and any special requirements.

*Access Conditions:

Mean level 4.57 m.

Unit of Height 3.45 m.

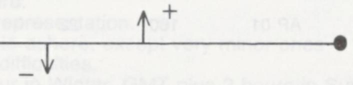
Width of the Outer Channel 300 m.

Depth of the Outer Channel under Chart Datum 15.5 m. on the shipping route.

Inner Channels and Swinging Areas, depths under Chart Datum 15 m.

Level Reading: The levels quoted represent those of the bottom or of a piece of work in comparison with the zero on marine charts.

The zero of the charts is the reference point defined by the level of the lowest possible sea.



Contrary to marine customs signs (+) correspond to a height above zero. Signs (−) correspond to a height below zero.

A quarterly timetable gives for each tide the maximum admissible draft for large ships calling at the port.

Calculation is Based on the Following Principle: The vessel must keep a keel clearance equal to 10% of the admissible draft.

As a guidance, in Spring Mean Tide:

Example:

Coefficient	95
High Water	7.7 m.
Depth of the Outer Channel under Chart Datum	15.5 m.
Depth of the Inner Channel under Chart Datum	15.0 m.
Water depth	22.7 m.
Maximum admitted draft	20.65 m.

RADIO: Masters of ships are requested to send to Le Havre Harbour Master their expected time of arrival at Le Havre Light Buoy and maximum draft.

The message will be sent through radio stations of: Boulogne-Radio/FFB (working frequencies 1771 kHz and 2747 kHz) or Brest le-Conquet Radio/FFU (1806/2726 kHz). 24 hours before arrival and confirmed 3 hours before arrival

It will give the date and time GMT of ETA, and the maximum draft. It will be sent about 12 hours before arrival and corrected by another message if necessary. This service is free. Same stations of Boulogne and Brest to be used to contact Agent and in addition Saint Lys/FFL. This ETA must be confirmed to Le Havre Port by VHF, 3 hours before arrival in the roads.

Port Operations Radio Service: The "Havreportradio" station keeps a permanent watch on the following frequencies: 156.6 MHz (Channel 12); 156.8 MHz (Channel 16); 157.0-161.6 MHz (Channel 20 duplex). This station sends and receives all messages for the port operations control.

Ships call "Havreportradio" directly on Channels 12 or 20. Ships arriving, leaving or moored on roads *must keep watch on Channel 16.*

Ships with Pilot on board must keep watch on Channels 12 or 20 from Pilot on board until arrival at berth, and from departure of berth until disembarking Pilot. Havreportradio/FFY keeps watch on 2182 kHz. This frequency will be used only in a radius of 22 miles from Havre Light Buoy and only when it is not possible to use VHF.

Public Correspondence Service: Ships fitted with VHF sets can obtain telephone calls through the Le Havre Radio Station.

Telephone calls are admitted with ships on berth.

Ships must call "Le Havre Radio" directly on Channels 23, 26, 28 and 82. "Le Havre Radio" calls ships on Channel 16.

RADAR/VHF: Radar assistance may be obtained by calling Le-Havre-Radar on Channel 16 (156.80 MHz). Then working frequencies are Channels 14 and 22. Radar coverage is from 20 km. to the West of the Light-Buoy and 40 km. to the West of Antifer.

Le Havre Port on Channels 16, 12 and 20. Antifer Port on Channels 16 and 22.

Also see "Radio".

CRANES: Also see "Berthing".

71 wharf cranes of 2.5 tons – 10 tons.

3 floating cranes 8, 90, 200 tons.

24 electric gantry cranes 6 tons – 40 tons.

1 land sheer legs 650 tons.

4 grain elevators 280 t.p.h. – 300 t.p.h.

2 gantry cranes for loading cereals in bags 150 t.p.h.

BULK HANDLING FACILITIES: *Minerals:* 9 berths with cranes, outreach 15 m. – 37 m. Able to accept vessels up to 300 m. LOA and 150,000 d.w.t. Depths up to 16.0 m. Discharge rates up to 2,400 t.p.h.
Grain: Quai Hermann du Pasquier for ships up to 28,000 d.w.t. Grains (theoretical output) 2 gantry cranes for loading cereals in bags 150 t.p.h., 3 gantry cranes import/export 280 t.p.h., 1 gantry crane import 300 t.p.h. Max. LOA 210 m., max. draft 8.83 m. – 10.65 m.

Quai Joannes-Couvert: For ships up to 60,000 d.w.t., 2 elevators (grains – export gantries) theoretical output 600 t.p.h. Max. draft 11.7 m. – 14.2 m.

Quai des Arachides: For ships up to 6,000 d.w.t. Max. LOA 130 m. Max. draft 7.3 m.
Fruit: 7 berths available (2 banana berths). Depths up to 6.30 m. Max. LOA 300 m.
Containers: Quai de l'Atlantique: Length 800 m., 3 berths for large vessels. Depth −12 m.

4 gantry cranes of 40 ton capacity with 35 m. extension, at quay's edge. 2 French Railway's gantries for handling on to wagons. 1×7,000 sq.m. shed under construction near to terminal for container groupage and breaking bulk. 16 hectares open air areas. Extensive parking facilities. LASH facilities also available.

Quai de l'Europe: Length 1,160 m. 4 berths for large vessels, 3 of which are equipped to handle roll-on/roll-off traffic.

5 gantry cranes of 40 tons with 40 m. extension, at quay's edge. 1 shed 10,108 sq. m., 1 shed of 7,023 sq. m., already used for groupage and break-bulk of containers and 1 shed of 10,000 sq.m. under construction.

2 S.N.C.F. gantry cranes for loading and unloading of wagons. 45 hectares of open air areas. Extensive parking facilities.

Quai de Bougainville: Actual length 1,625 m. Equipped with 5 gantries for containers of 40 tons and 5 cranes 6 – 10 tons.
Roll-on/Roll-off: Four berthing places in the tidal basin, five berths in the wet dock, eight berthing places in the non-tidal docks.
Liquid Chemicals: At the berths of "Societe Normandie de L'Azote", "Sogestrol", and "Petrochimie" along the "Ofrand – Canal du Havre". 7 berths available, depths 0.5 m. – 5.0 m. For vessels of 80 m. – 240 m. LOA and 7,000 – 45,000 d.w.t.
LPG: 4 berths available, depths up to 9.0 m. For vessels up to 75,000 cu.m. and LOA of 240 m.
LNG: 1 berth. Depth 10 m. for vessels 70,000 cu.m. and LOA of 240 m.

BRIDGES: No special restrictions. Opened upon request. Master will be informed as above in case any bridge stopped for repairs.

STEVEDORES: 2 Normal shifts (0700 – 1400 hrs. and 1500-2100 hrs., possibility of 2 hours overtime) every week-day including Saturday. Night shift on overtime 2100-0600 hrs. For fruits and reefer cargo and passenger ships possible working 2 hours overtime before morning shift to start at 0600 hrs. subject ordering gang the previous day at 0600 hrs., with 23 hours notice to stevedores. Night gang ordered the same day at 1400 hrs. with 9 hours notice to stevedores (same consequently involves 36 hours and 12 hours notice to Agents for morning and night overtime respectively).

Vessels completing loading/discharging may order 2 hours overtime from 1400 to 1600 hrs., after morning shift or only 1 hour overtime from 2300 to 2400 hrs., after afternoon shift. No possibility of dividing the shift of 8 hours. Consequently time lost between completion of work and end of shift is charged to the vessel at the cost of about Frs. 560.00 per hour (depending upon type of cargo).

No work possible on Sunday and legal holidays nor during night between Sunday or holiday and next working day. Necessary to give Agent soonest possible accurate ETA and hatch partition in order to enable his arranging work at the best, keeping in mind that shift cannot be split.

Work done with shore crane. Ship's derricks used only exceptionally. No hatch tents available from shore.

It is compulsory to put a net under the gangway before starting work, for lack of which stevedores refuse to go on board.

MEDICAL: It is not necessary for Agent to receive advance notice of required medical attention except when Master requests a doctor on board. The Master must after berthing inform Agent of number of patients and nature of disease, name of patient, rank, in order Agent may arrange corresponding appointment with doctors, dentists, specialists, etc. Hospital facilities available provided admission ordered by local doctor.

Inoculation. Yellow fever – effected only at the hospital once per week on Thursdays 1400 to 1500 hrs. Other inoculations may be effected by local doctors (with appointment).

TANKERS: Diameter of connections at different berths of C.I.M.: No. 3, 4 and 5, 10 in.; 6 and 7, 12 in.; 8 and 10, 16 in.

9 additional berths available for refined products. Max. LOA 270 m. (50,000 tons), depth 6.0 m.

Tankers calling first time at Le Havre recommended to inform Agents of position of manifold connection. Slop reception facilities available up to 1,000 t.p.h.

Jonction 3	270	−6.00	Accessible to 50,000 d.w.t. tankers

*Level: For explanation see "Berthing".

Report: *Port Approaches:* After having rounded the Barfleur Cape, at least 7 miles off the French coast for tankers carrying dangerous cargoes, vessels approaching Le Havre have to take care of the heavy traffic coming from this port or from the River Seine.
In Port: As the approach channel is tidal, attention must be paid to cross currents when transitting and especially outside the breakwater entrance (250 m. wide) where the setting effects can be very important. Drift allowance to counteract the current will vary from about 5° on Neap tides with no wind to 20° on Spring tides with strong cross winds. Inside the harbour there is practically no current from 2 hours before HW time up to 1 hour after. No vessel is permitted to anchor in any part of the port except in an emergency or for docking purposes.
Berthing: The Avant port is entered between two breakwaters about 860 ft. apart, and tankers bound for the CIM Berths proceed through a second set of breakwaters into the tidal basin Theophile Ducrocq, where those bound for CIM Berth Nos. 6, 7, 8 and for SHMPP Berth MCT 3 are swung, assisted by tugs, in the first turning basin, and those for CIM Berth 10 in second turning basin.

It is a difficult manoeuvre, particularly for VLCCs' to slow the vessel down and connect tugs within the time and space available from passing the breakwaters till the turning basin is reached. It is, therefore, important that engine response is prompt and that personnel and equipment are ready to connect up the tugs.
General: The CIM Berths are located on the South side of the tidal basin. Berth Nos. 1 to 7 are aligned at a 45° angle and the VLCC Berth Nos. 8 and 10 are parallel to the basin.

On the North side of the tidal basin, facing the CIM Berth No. 8, is the SHMPP Berth MCT 3, on the South side of the Mole Central. Two other SHMPP Berths, Junction 2 and 3 are located in the Constant Level Dock, facing the new Lock Francois Ier, which is at the Eastern extremity of the tidal basin.

Water density in the port averages 1024 – 1026.
Tugs:

Vessel (k.d.w.t.)	*Number usually used*				
	Up to 40	50/60	70/80	90/120	190/250
Berthing	2	3	3/4	4	6
Unberthing	2	2	2	3	3/4

6 tugs are recommended for mooring VLCCs. If possible, the 3 more powerful tugs available are used.

2 tugs are made fast on the hook forward and aft and 2 others are secured alongside. On ships bound for CIM Berth Nos. 6, 7, 8 and for SHMPP Berth MCT 3, which will swing in the first swinging area, it is very important to expedite the making fast of tugs, and only good heaving lines and messengers should be used.

Especially for VLCCs, it is recommended to use tug lines putting eye over bitt.
Berthing Procedure:

(a) CIM Berth Nos. 1, 2, 3, 4 and 5: Tankers bound for these berths are, after having made tugs fast, moved directly into berth, mooring head in. Starboard side alongside Berth Nos. 1, 3 and 5; and port side alongside Berth Nos. 2 and 4.

(b) CIM Berth Nos. 6, 7, 8 and SHMPP Berth MCT 3: Tankers bound for these berths are swung in the first turning basin and towed stern first into the berth mooring head out with starboard side alongside Berth No. 7 and SHMPP Berth MCT 3, and port side alongside Berth Nos. 6 and 8.

(c) CIM Berth No. 10: A tanker bound for this berth is, assisted by tugs, swung in the second turning basin just upstream of the berth, then moved into position parallel to the berth about 100 m. off and pushed alongside by the tugs, mooring with port side alongside.

Exceptionally, when 2 VLCC's have to be berthed during the same HW tide, they can be berthed at CIM No. 8 and 10 starboard side to, this saving 30 – 40 minutes corresponding to the swing.

(d) SHMPP Berths JON 2 and 3: Tugs (usually 1 forward and 1 aft) are made fast while vessels are proceeding through the tidal basins.

Locking time is about 45 minutes, port side or side under the wind alongside, with 1 head line and 1 spring line forward and aft. After leaving the lock, vessels are berthed port side alongside at Jonction 3 and starboard side alongside at Jonction 2.

Also see "Report" dated June 1982.

Antifer:

The Port of Le Havre – Antifer, attached to the port of Le Havre which covers it administratively, is a port on the coast located 4 km. South of Cape Antifer, at Saint-Jouin-Bruneval.

It is an oil terminal, designed to accommodate vessels of 550,000 d.w.t. and of 28.5 m. draft (Also see "Max. Size").

The port comprises: A breakwater 3,500 m. long protecting the port in its Northern area and starting at Groin Point, 3 km. South of Cape Antifer. A manoeuvring zone. A dry-land area of 35 hectares at the foot of the cliffs intended for hydrocarbon storage and for port operation installations. A 8 hectare service port. A mooring installation with 2 positions for tankers. The oil discharged into storage tanks is pumped away to installations in Le Havre port, by means of a pipe-line of 42 in. dia. and 25 km. long.

Tides and Currents: At Antifer, the influence of the Seine estuary is much less than at Le Havre. The tidal curve is of the sinusoid type, without, however, being perfectly symmetrical. Slack water only lasts a short while (about 20 minutes). With winds from the North to East, there is a drop of about 0.25 m. to 0.50 m. increasing with the amplitude of the swell.

With winds from the South to N.W., passing through a Westerly point, there is either a slight drop (0.15 m.) or a rise corresponding to the extent of swell and sometimes reaching 0.75 m.

Tidal currents are alternating in their direction and generally parallel to the coastline. With Spring tides they reach a speed of 3 knots.

The breakwater protects the port from the action of ebb currents.

A Waiting Area which has the approach route on its Southern edge. It has the form of a trapezium 2 miles in length. The Western commencement of the large base of this area is marked by buoy "A3". It incorporates 2 anchoring areas: the N.W. area for vessels of more than 25 m. draft, and the S.E. area for vessels of less than 25 m. draft. The 2 areas are separated by buoy "A5".

A Connecting Area trapezoidal in shape and 2.5 miles in length, connecting the approach route to the approach channel.

An Approach Channel 1,000 m. wide, marked on its Northern edge by buoys "A8", "A12", "A14", "A16", "A18", and on its Southern edge by buoys "A7", "A9", "A17". This channel is orientated in the same direction as the approach route on a bearing of 118.5°. Buoys "A7", "A8" and "A9" form at the entry of the channel a triangle easily identifiable by radar.

An Access Channel 3.5 miles long, 700 and then 550 m. wide and on a bearing of 127.5°. It is marked by 4 pairs of buoys: "A19/A20", "A21/A22", "A23/A24", "A25/A26". Its depth is 25 m.

A Separation Area adjacent to and to the South of the access channel, allowing vessels on entering to make a half-turn to come out of the channel and then come if necessary to the waiting area. The centre of this area is marked by buoy "DA".

A Swinging Area sheltered by the main breakwater, marked to the South by buoy "A27", and to the East by buoy "A29". This area is dredged to a depth of 24.70 m.

The conditions of current (direction and force) and the height of the tide determine, in terms of the drafts of vessels, the periods during which the port may be entered, and which are somewhere between full and low tides.

Vessels must, therefore, on leaving the separation area, follow entry instructions given to Masters by the Pilots, with the agreement of the Port Captaincy of Havre-Antifer.

Pilotage: The Pilot is taken onboard in the waiting area in the disengagement area by means of a pilot boat, a launch or the helicopter allocated to the Le Havre pilotage service.

Port: To the North of the swinging area, is the mooring area dredged to 26 m. allowing access to 2 alongside berths which have depths of water of 29.80 m.

The service port is reserved for the mooring of tugs, pilot boats, anti-pollution equipment (booms) and servicing equipment.

Arrival Advice: Masters of vessels destined for Antifer, as well as those whose vessels may enter either Le Havre or Antifer, must send to the Harbour Master of Le Havre a message stating the date and time GMT of their arrival at the Antifer landfall buoys or at the Le Havre lightship and stating the draft of their vessel.

This message must be sent via a coastal station at least 12 hours in advance and confirmed by a VHF message 3 hours prior to arrival at the landfall buoys of Antifer or at the lightship. In return, the vessel will receive from the Havre Port station all information and necessary instructions.

Radio: The Antifer Port Control (call sign Havre-Antifer) listens out permanently on the following frequencies:

156.8 MHz (Channel 16)
157.10 – 161.7 MHz (Channel 22) VHF

If Channel 22 is not available on board the vessel, Channel 14 (156.7 MHz) can be used after having first called up on Channel 16.

Radio communications are used for: Port operations (movements of vessels) and guiding vessels during times of fog.

Radar Assistance: During times of fog, radar assistance is supplied to vessels by the radar located on La Heve lighthouse (guidance provided by the Semaphore Lookout of Le Havre) as well as by the radar of the Oil Terminal (guiding provided by the Captaincy of Antifer from the Buoy "A–16"). Vessels requiring radar guidance must start by requesting it on the call-up frequency (Channel 16). Only after an affirmative reply can they switch in to the connections affected by radar, taking necessary precautions (listening out in advance) not to disturb a guiding process already taking place. Assistance is given in strict rotation of requests. Information is supplied free of charge in French and in no way renders the Port Authority responsible. Such information covers the following: route clear or not, vessels anchored or under way in the vicinity, successive positions in relation to the landfall buoys, possible position of the pilot vessel, then guidance in the channel as far as the swinging area and mooring area.

Syledis: A system of aid to navigation and to manoeuvring, covering the receipt on board the vessels of parameters covering in particular the position, the speed, is in the course of being tried out. It requires the Pilot bringing on board a small transmitter/receiver.

Aids to Manoeuvring: In order to facilitate swinging manoeuvres and mooring of large tankers, the port of Antifer has 3 lights of different colours, the positions and characteristics of which are as follows:

Access guiding light (on the open storage area at the foot of the cliffs) – light with red, white, green sectors, regularly flashing (4 secs.) the red sector to the North the green to the South.

Guiding lights for coming alongside (on the breakwater).

West light (position 3) – light of red, white, green sectors, regularly flashing (4 secs.) – Red sector to the East, green to the West.

East light (position 2), light of red, white, green sectors, flashing twice (6 secs.), red sector to the West, green to the East.

Each quay berth is equipped with aids for mooring comprising luminated panels showing the distance to the berthing point of the bow and the stern of the vessel; the speed (in cm./sec.) of approach or pulling away of the bow and stern of the vessel in relation to the berthing point.

Fresh Water/Fuel: Supplied by pipe-lines on the berth (S.H.M.PP. depot).

Cranes: 2 cranes of 2.5 tons capacity on the berth (1 per position). Berth for heavy items in the service port – handling by mobile crane.

Floating Equipment: Pontoon for transporting heavy items.

Tugs: Stationed in the service port are 1 or 2 tugs of 4,000 h.p. Other tugs required for manoeuvring come from Le Havre.

Pollution: Barrages laid on pontoons in the service port can be very quickly placed into service.

General Information:

The Port Captaincy is situated on the open land area of the Service Port.

Tel: 35.21.74.00 Extension (92) 403 or (92) 404.

Pilot's office: At Le Havre Pilot's Office.

Customs: In the C.I.M. operational building (1st floor).

Towing: The Les Abeilles Company on the pontoon in the service port.

Police: In the C.I.M. operational building (1st floor).

C.I.M. Depot: 35.26.51.05.

S.H.M.PP. Depot: 35.24.11.77.

Communications: By buses from Saint Jouin. The airport of Le Havre – Octeville is 16 km. to the South of Antifer.

Control tower: Tel: 35.46.38.02.

Operating: Tel: 35.46.09.81.

DENSITY: In outer port and tidal docks: salt water. In inside docks brackish. Density depending upon season and amount of fresh water brought in by river Seine and Canal de Tancarville.

FRESH WATER: Most berths supplied by shore hydrants. Otherwise by barge minimum quantity invoiced then being 50 cu.m. Overtime charged in addition. Late cancellation of barge invoiced.

FUEL: All grades available, viscosities from 200 sec. to 3000 sec. Redwood. Minimum 48 hours advance notice required to prepare barges.

FIRE PRECAUTIONS: Dangerous cargo must be declared on "Inbound Bill" and in order not to delay vessel's entry it is highly recommended to inform Agent of quantity and exact nature of dangerous cargo on board 48 hours prior to arrival, thus enabling Agent to get in touch with Harbour Master and take necessary steps which may go from a single smoking prohibition up to a fire-picket on the quay during all the call.

Tankers: A "Notice to Master's of ships loading/unloading hydrocarbons" is handed to Master upon arrival. This notice specifies *inter alia:* repairs, ventilation/cleaning of tanks, handling of goods subject to Harbour Master's authorisation. All naked lights and fires prohibited, boiler furnaces and galley ranges excepted, such exception cancellable on simple order of Harbour Master or Depot Manager.

GANGWAY/DECK WATCHMEN: Compulsory, by ship's crew. Sworn watchmen in uniform and equipped with a VHF set may be obtained from the Port Authority per hour for day and night, working days and holidays. Some other companies may also supply watchmen (not sworn) at lower prices.

OPENING/CLOSING HATCHES: May be done by stevedores at the same price as shifting of cargo depending upon the type of cargo and consequent number of men included in the gang.

It is highly recommended to carry out opening by the crew before beginning of shift to avoid both loss of time and expensive charges and also risk of accident to stevedores who are sometimes not well aware of vessel's closing system.

It is emphasised that for reefer cargo stevedores wait for cold exhaust half an hour after opening hatches before getting down in the holds. Consequently it is strongly advised to stop ventilation and start opening hatches with crew about 1 hour before beginning of shift keeping in mind that for reefer cargo, the morning shift may commence at 0500 hrs.

CERTIFICATES:

Tonnage Certificate.
Safety Construction Certificate.
Loadline Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derat Certificate.
Cargo Gear Register.

(Fresh water analysis certificate may also be requested.)

CUSTOMS ALLOWANCES: 200 cigarettes or 200 grammes tobacco plus 1 bottle spirit (must be mentioned on crew declaration list). Crew members may obtain extra allowance but only after 5–6 days' call.

CARGO GEAR: Cargo handling usually carried out by means of shore cranes. Hatch-tents to be supplied by vessel.

CREW IDENTIFICATION CARDS: Not required. Recommended to have passport or seaman book to go ashore.

CONSULS: The following countries have representatives at Le Havre:

Argentina
Belgium
Brazil
Chile
Colombia
Costa Rica
Denmark
Dominica
Ecuador
Finland
Germany F.R.
Greece
Guatemala
Haiti
Honduras
Italy
Ivory Coast
Japan
Liberia
Madagascar
Mexico
Netherlands
Norway
Panama
Peru
Portugal
Salvador
South Africa
Spain
Sweden
Switzerland
United Kingdom
Uruguay
Venezuela

REPAIRS: 11 berths for vessels up to 350 m. Depths up to 10.0 m. 2 berths can accept vessels up to 550 m. LOA.

Societe Nouvelle des Ateliers et Chantiers du Havre (SNACH), 30 rue Jean-Jacques Rousseau, 76090 Le Havre. Tel: 35.26.81.77. Telex: 190 322 F.

Specialises in: Ship repairs (boilers, engineering, fitting out, electricity); Alterations and conversion; Jumboisation.

Compagnie Generale de Reparation (COGER), Route du Mole Central, P.O.Box 1359, 76065 Le Havre Cedex. Tel: 35.25.35.43. Telex: 190 964 F COGER.

DRY DOCKS:

Graving docks	*Overall length* (m.)	*Inside length at block level* (m.)	*Entrance width at block level* (m.)	*Depth above blocks* (m.)
International Ship Repair Centre				
Floating Dock	310.00	290.00	53.00	(9.70*)
Dry Dock VII	319.00	313.00	38.00	(−7.75)
Eure Dry Docks				
Dock IV	184.10	181.46	28.12	(−0.45)
Dock V	168.75	163.70	19.05	(−0.85)
Dock VI	131.00	127.33	14.20	(−0.00)

High tides vary from (+5.80) to (+8.30). *Maximum draft.

New floating dock, capacity 220,000 tonnes. Lifting capacity 50,000 tons.

SURVEYORS:

Bureau Veritas, 71 bd. de Strasbourg, 76600 Le Havre. Tel: 35.22.69.23.

American Bureau of Shipping, 4 rue Andre Caplet, 76600 Le Havre. Tel: 35.42.39.83.

Det Norske Veritas, 19 quai George-V, 76600 Le Havre. Tel: 35.42.69.93 and 35.42.26.05.

Germanischer Lloyd, 20 rue Begouen, 76600 Le Havre. Tel: 35.46.50.71. 110 rue Gustave Flaubert, 76600 Le Havre. Tel: 35.43.75.18.

Lloyd's Register of Shipping, 7 rue Pierre Brossolette, 76600 Le Havre. Tel: 35.42.42.15.

REPATRIATION: Except if airplane chartered by Owners, all crew have to pass through Paris.

AIRPORT: Le Havre airport 7 km. from the centre of the town, with a runway of 1,800 m. × 40 m. may receive chartered planes up to 40 tons total weight (50 T. with special authorisation). Regular flights from and to Orly (Paris Airport) twice a day, holidays excepted.

TIME: GMT plus 1 hour from last Sunday in September to last Sunday in March and GMT plus 2 hours last Sunday in March to last Sunday in September.

HOLIDAYS: New Year's Day (January 1st); Easter Monday; Labour Day (May 1st); Ascension Day; Whit Monday; National Holiday (July 14th); Assumption B.V. Mary (August 15th); All Saint's Day (November 1st); Armistice Day (November 11th); Christmas Day (December 25th). No work possible except for passenger ships and tankers the latter being loaded/discharged round the clock every day.

POLICE/FIRE/AMBULANCE: Emergency (Fire and First Aid) 18; Police 17 or 35.25.22.55; Fire and Ambulance 35.42.53.65.

TELEPHONE: Possible at most berths. Apply to ship's Agent prior to arrival.

SHORE LEAVE: Authorised within port and town area. Foreign seamen wishing to go further and more especially to Paris must obtain police authorisation and consequent pass.

REGULATIONS: Vessels carrying dangerous cargo must when on roads or in the entrance channel, show the red flag by daylight or 1 red light by night-time. When leaving the port they must keep their Pilot up to the end of the channel.

Vessels arriving with hazardous cargoes must declare same to Port Control 48 hours prior to arrival.

General: When the Pilot comes on board, he hands to the Master a file containing:

A leaflet showing a map of the port, the position of the fire brigade points, call-up points in the event of fire, fire-fighting hydrants, a list of important telephone numbers, a list of VHF Channels monitored by the Captaincy.

One copy, with map, of the the Maritime Prefect's decrees covering the circulation of vessels in the roads and channel, and in particular oil tankers.

An entry declaration which the Master must complete and which enables a check to be made that the hazardous material transported has already been the subject of a prior declaration to the Captaincy.

On berthing, instructions are handed to vessels:

– either by the ship's Agent where conditioned goods are involved.

– or by the operator of the berth for bulk carriers (liquid or liquified hydrocarbons, chemical products).

Furthermore, for these vessels, a check-list in accordance with that recommended by the IMO must be completed and signed jointly by the vessel and the terminal, prior to commencement of commercial operations.

REPORT: June 1982.

Requirements When Vessels Call to Load/Discharge LPG at Norgal:

Further to difficulties encountered for some months now in receipt or despatch of vessels, we would like the associates of NORGAL (or their customers) to let us know by telex, as soon as possible and for each operation, information of a general, technical and administrative kind, *those sections which are an obligatory nature being preceded by the sign* (+).

1. *General Information:*

+ Name of vessel and its ETA (expected date of arrival in the roads).
+ Nature of the operation (import, export, transit under Customs control).
+ Approximate quantity in tonnes and product and possibly the breakdown of capacity confirmed by a telex from the interested associate.
  Name of consignee (if possible).

2. *Technical Information:*

+ Temperature of product.
  On board pressure.
  Hourly pumping capacity.
  Height of manifold in relation to water level.
  Dimension and series of manifold flanges.
  Laydays and possibly demurrage.

Receiving Possibilities at NORGAL

Propane:

a) If temperature = 42°C and max. pressure 30 mb. (with return of gas) : 1,000 tonnes per hour.

b) If temperature = −10°C and max. pressure 3 bars : 300 tonnes per hour.

c) If full pressure : 80 tonnes per hour.

Butane:

a) If temperature = 10°C and max. pressure 30 mb. (with return of gas) : 1,000 tonnes per hour.

b) If full pressure : 70 tonnes per hour.

Characteristics of vessels:

Maximum length : 250 m.
Total displacement : 67,000 tonnes.
Depth of water : 12.5 m (41 ft.).

Quality if Product Admissible:

French commercial standards, for butane, the temperature must not be less than −8°C for a tv of 0 bar (effective).

3. *Administrative information (for Customs).*

a) *Imports:*

+ Product origin.
+ Price per tonne and currency of invoicing.
+ Kind of contract (f.o.b., c. and f., c.i.f.). If contract is f.o.b. state the amount of freight and insurance per tonne. If contract c. and f. state amount of insurance.
+ Invoice weight (at level acceptable to Customs).
+ Bank domiciliation (name of bank, number of pay office, number of domiciliation file) or the bank domiciliation file.

Note: The invoice and possibly the original of the Certificate of Origin justifying exemption form Customs duty (T2L, Certificate type "A", Certificate EUR1) must be sent to us *as quickly as possible* to be attached to the Customs entry or to put right this entry as quickly as possible.

b) *Exports:*

+ Consignee of the invoice and final destination.
+ Price per tonne and currency of invoicing.
+ Kind of contract (f.o.b., c. and f., c.i.f.). If contract is c. and f. or c.i.f., state f.o.b. value.
+ Invoice weight (as recognised and acceptable to Customs).
+ Name of domiciling bank and number of pay-office.

Note: The export invoice must be sent to us urgently for settlement at the end of the month.

c) *Transit Under Customs Control:*

(i) *Receipt.*

+ Declaration of Transit A42, if it has not been able to be placed on board.
+ Amount of freight per tonne for payment of VAT, where a foreign vessel is involved.

(ii) *Despatch.*

+ Consignee and Customs Office of destination.
+ Number of derogation of flag monopoly if a foreign vessel is involved. This number is required by Customs before loading.

AUTHORITY: Port of Le Havre Authority, Terre-Plein de la Barre, B.P. 1413, 76067 Le Havre Cedex. *Tel:* 35.21.74.00 *Telex:* 190663 Port Havre.

Harbour Master's Office: Boulevard Kennedy, 76600 Le Havre. *Tel:* 35.21.74.37/35.21.74.38. *Telex:* 190663. *Cables:* Havreport.

AGENT: Jolasry (France), 35 Avenue Du 129°, P.O.Box 846, 76060 – Le Havre. Telegraphic address "Jolasry". Tel: 42.18.32 and 42.12.05. Telex: 190708.

LES SABLES D'OLONNE: 46.29 N. 01.47 W.

(See Plan)

PORT LIMITS: Entrance to wet dock constitutes port limits.

DOCUMENTS:

2 copies Crew and Passenger Lists.
2 copies Personal Effects Lists.
2 copies Stores Lists.
1 copy Cargo Manifest from ship's papers for Customs Authorities and all Bills of Lading, Ship's Papers, etc.

PILOTAGE: Pilotage is compulsory for all vessels equal to or exceeding 50 m. in length and for all oil and gas tankers.

The compulsory pilot boarding points are two straight lines from "La Petite Barge" Buoy (Lat. 46° 28.9′ N., Long. 01° 50.6′ W.), to "Le Phare des Barges", and to "La Peruse" rock.

Confirmation of ETA can be given to the Agent or Pilot. Tel: 51-32-60-97.

Channel 16 VHF is continuously watched as soon as Pilot is on board. Pilot boat is 9 m. long (black and white hull).

ANCHORAGES: Vessels awaiting Pilot may anchor in the waiting area with sand bottom. They can use pilot services in bad weather.

MAX. SIZE: Vessels up to 110 m. LOA and beam 16 m. Draft 4.8 m. to 6.2 m., dependent on tides.

HEALTH: Customs take action against suspected diseases or fever on board when vessel arrives.

RADIO: Saint Nazaire & Arachon Radio. All ETA and other messages should be in local time.

VHF: Harbour Authorities keep watch on Channel 16 during opening of lock gates. At neap tides, the watch is kept for 1 hour 30 minutes before and after HW.; at Spring tides for 2 hours before and after HW.

RADAR: There is no Port Control Radar.

TUGS: None, pilot boat assists.

BERTHING: Max. beam 16 m. to allow passage through lock gates. Max. LOA 100 m.

BRIDGES: None.

CRANES: Mobile cranes 15 tons – 30 tons.

STEVEDORES: Working hours from 0700 – 1200 hrs. and 1200 – 1900 hrs. No work on Saturdays.

MEDICAL: Full hospital facilities available.

FRESH WATER: Available in unlimited quantities, with 6 to 12 hours prior notice.

FUEL: By lorry from Nantes or La Pallice.

REPAIRS: Small repairs carried out if sufficient spares available.

SURVEYORS: None.

HATCHES: Opening/closing carried out by vessel's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 2 litres of spirits per person.

REPATRIATION: Possible.

AIRPORT: At Nantes, 87 km. distant. 6 – 7 flights daily.

TIME: GMT plus 1 hour. Summertime GMT plus 2 hours (March to September).

HOLIDAYS: Port is open all year round.

POLICE/AMBULANCE/FIRE: Police, Tel: 17; Ambulance, Tel: 951953; Fire, Tel: 18.

SHORE LEAVE: When Immigration and Customs requirements have been satisfied, there is no restriction on crew shore leave so long as they rejoin the vessel before departure.

SERVICES: Compass adjusting.

DEVELOPMENTS: None.

AUTHORITY: Mr. le Ingenieur des Ponts et Chaussees, Service Maritime. Quai Dingler, 85100 Les Sables d'Olonne. *Tel:* 51-32-62-61.
Mr. Keroulle, Harbour Master: *Tel:* 51-32-11-79.

AGENT: Yves Lambot, 10 Quai Emmanuel-Garnier, B.P.: 65, 85102 Les Sables d'Olonne, Cedex. Tel: 51-951010. Telex: 710634.

LIBOURNE: 44.55 N. 00.15 W.

APPROACHES: Channel Buoyed and dredged to 4.0 m. – 5 m. below LW.

RESTRICTIONS: Max. air draft 25.0 m.

BERTHING: One wharf managed by the Chamber of Commerce, length 65 m., depth 4.5 m. Berth can accommodate vessels up to 120 m. LOA.

CRANES: 2×15 ton, 1×20 ton, 2×30 ton and 1×45 ton.

AUTHORITY: Service Maritime de la Gironde.

Operator: Chambre de Commerce et d'Industrie de Libourne, 125 Avenue Georges Pompidou, B.P. 162, 33503 Libourne Cedex. *Tel:* (57) 51.71.11. *Telex:* 570598. *Contact:* Jean-Loup Metivet, Chief of Mission.

LORIENT: 47.45 N. 03.21 W.

(See Plan)

DOCUMENTS:

Cargo Manifest or Manifest of Ballast.
Certificate of Cargo Space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.

PILOTAGE: Compulsory for all vessels over 60 m. length. Vessels must contact pilot station advising ETA at least 6 hours before arrival by radio to the pilot station. On arrival at the Outer Roads or Groix vessels should call Pilot by VHF Channel 16. The pilot launch will be standing by from 1 hour before to 1 hour after the ETA previously advised by the ship. The pilot station is manned 24 hours per day. Pilot station telephone number 371480.

ANCHORAGES: The Outer Roads of the port are open to winds from the S.E. to S.W. Vessels waiting to enter the port may anchor in depths of 15 m. – 20 m., sand and shell bottom, good holding ground.

Mooring buoys are positioned off Port Tudy on the North coast of Ile de Groix. These buoys are reserved for the use of the French Navy. There are prohibited zones for anchoring due to presence of submarine cables, marked on chart.

RESTRICTIONS: There are 2 entry channels to the port. The South Channel, depth 3.6 m. is used exclusively by local fishing boats. The West Channel is marked by the alignment of Kerbel Light and Lohic Light. The depth in this channel is 7 m. Both channels are very well marked.

Traffic signals are hoisted at Port Louis Citadel as follows: Red flag or red light – entry prohibited. Green flag or green light – exit prohibited. Red over green flags or lights – port closed.

Tankers: Vessels carrying more than 500 cu.m. of hydrocarbons, or other dangerous cargoes in bulk, intending to navigate North of Les Trois Pierres Tr., should report 6 hours in advance to "Marine Lorient" and Port Captain giving details of cargo and of any defects which may affect manoeuvrability. Such vessels should establish contact with Vigie Port Louis giving ETA at Les Trois Pierres on arrival, or Kéroman Mole (Lat. 47° 43.7′ N., Long. 3° 21.9′ W.) on departure. Other vessels may obtain information about such movements on Channel 16.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessels should not receive free pratique, Master should radio Agent before arrival, advising full details.

RADIO: Use local station Radio Conquet or Radio Saint-Nazaire.

VHF: Port Captain on Channels 16 and 12.

TUGS: 1 tug of 1,000 h.p., 2 tugs of 700 h.p., 3 tugs of 250 h.p. belonging to the French Navy.

1 tug of 700 h.p. at the fishing port (Morbihan Chamber of Commerce & Industry) and 1 tug of 1,800 h.p.

1 tug of 1,500 h.p. to be purchased.

BERTHING: Kergroise Quays, 568 m. Max. length of vessels 250 m. Depth of water 10.5 m.

2 discharge gantries, 500 t.p.h. and 750 t.p.h., serving a silo and road/rail transit station.

8 cranes. 3×10 tons at 30 m. and 5×6 tons at 22 m.

TANKERS: The Oil Jetty is 112 m. long and can accommodate tankers up to 180 m. length, max. draft 10 m.

FRESH WATER: Can be supplied from the quays at Kergroise and at the Oil Jetty. Rate 10 t.p.h.

REPAIRS: Minor deck and engine repairs can be carried out. Slipways can accommodate 6 fishing boats at the same time. There are 3 dry docks the largest of which is 186.20 m. long×26.33 m. wide.

MEDICAL: All facilities available. Local maritime and civil hospitals.

IDENTIFICATION CARDS: Crewmen going ashore should carry passport or identity card.

CONSULS: Norway, Denmark, Netherlands and Sweden.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.

POLICE/FIRE/AMBULANCE: Police Tel: 21.19.16; First Aid Tel: 17; Ambulance Tel: (97) 65.33.44; Fire Tel: 18.

DEVELOPMENTS: One new berth, length 150 m. Depth of water 10 m. Will be ready early 1987.

AUTHORITY: D.D.E. Morbihan – Service Maritime et de Navigation, Boulevard Adolphe Pierre, 56321 Lorient. *Tel:* 97.64.11.36. *Telex:* Marilor 950 887 F. *Contact:* Port Director.

Capitainerie du Port, Il Bd. J. Cartier, 56110 Lorient, France. *Tel:* 97.37.11.86 and 97.37.12.71. *Telex:* Capilor 951 566 F. *Contact:* F. Morin, Port Commandant.

AGENT: See "Paris".

MARANS: 46.18 N. 01.00 W.

LOCATION: Marans is situated on the Sevre-Niortaise River.

PILOTAGE: Compulsory. Pilot boards at La Pallice.

RESTRICTIONS: Entry during daylight hours only.

MAX. SIZE: Length 60 m., beam 10 m., draft 3.2 m. (at Neaps), 4.0 m. (at Springs).

BERTHING: 3 berths available.

CRANES: One 3 ton electric crane.

REPAIRS: Minor repairs only.

AUTHORITY: Monsieur l'Ingenieur des Ponts et Chaussees, Le Port, 17230 Marans. *Tel:* (46) 01-10-35. *Contact:* Mr. P. Quenet, Harbour Master and Chief Engineer.

AGENT: M. Le Boutillier, 106 Bld. Emile Delmas, P.O.Box 2038, 17009 La Rochelle Cedex, Tel: (46) 42-13-44. Telex: 790742 (Ships). Cables: Daylight La Rochelle.

MARSEILLES: 43.18 N. 05.25 E. (See Plan)

(a) Old Port to Estaque *(b)* Port de Bouc/Lavera/Caronte/Etang-de-Berre/La Mede *(c)* Fos

(a) OLD PORT TO ESTAQUE

DOCUMENTS:
Inward Declaration (Printed Form presented by Pilot on boarding).
Ships Register.
Declaration of Health.
3 Crew Lists.
2 Provisions Lists.
2 Lists of Passengers in Transit.
2 Lists of Passengers disembarking.
1 List of Ports where cargo is loaded for Marseilles.
Cargo Manifests and Bills of Lading.
1 List of Crew Personal Effects.

PILOTAGE: *Arrival:* Contact port authority by VHF on Channel 16, changing to Channel 12. M.W. Station, call on 2049 kHz. Station on 1939 kHz. ("Marseille Port") Compulsory. 21 pilot launches, mostly painted black, wooden hulls with white anchor insignia on the bow.

Contact pilot station and pilot boats by VHF Channel 8.

Southern Entrance: Pilot boards between "Le Frioul" and "Chateau d'If" island. Max. recommended draft 28 ft. 06 in. in good weather.

Northern Entrance: Pilot boards at Estaque roads. In case of strong N.W. winds or for all deeper draft vessels the Northern entrance is preferred.

Vessels anchoring in roads without a Pilot will still incur full pilotage fee.

On departure, 15 to 30 minutes notice sufficient to order Pilot and tugs.

ANCHORAGES: Estaque Roads.

MAX. SIZE: Draft dependent on berth depth up to max. of 14.5 m.

HEALTH: Free Pratique automatic for vessels coming direct from continent or Italy and "Q" flag not to be flown. From other countries – including Spain and Portugal – usual procedure applies. Unless special arrangement for passenger liners Free Pratique not given by radio also practice issuing Health or Customs clearance on sailing now discontinued.

Free Pratique by Radio: Send cable to "Saniport Marseille" through Marseille Radio between 0700 hrs. and 1900 hrs., containing the following information:

Ship's Name, ETA Marseille, from (last 3 ports in reversed order) number of crew.

Then "ZT" (my Maritime Declaration of Health has negative answers concerning the 6 health questions).

Date of Derat (exemption) Certificate.

Then "ZS" (my ship is healthy and I ask for Free Pratique).

Example: Balder Antwerpen ETA 17/2300 Malaga, Hamburg, Bremen crew 25 stop ZT stop 06/07/81 stop ZS. Regards Master.

From 0700 hrs. to 1900 hrs., answer of Saniport will be: "ZY" (Free Pratique is granted).

If Free Pratique is requested and granted by radio, no sanitary officials will board the vessel, no declaration must be filled in, and crew members are granted shore leave without delay. Furthermore, the "Q" flag must not be flown on arrival.

The above information was supplied to a Ship's Master by the Port Health Officials.

RADIO: Within 150 miles Marseilles Radio/FFM – otherwise St. Lys/FFL.

VHF: Port Authority on Channels 16, 6, 12 and 30. Tugs on Channel 6.

RADAR: Port and approach radar station.

TUGS: About 10 tugs available, from 1,200 h.p. to over 3,000 h.p. Ship's lines normally used.

BERTHING: When specific side alongside berth required. Agents radio Master prior arrival also advise Pilot. Otherwise side alongside at discretion Master after conferring with Pilot.

CRANES:
Public Quay Cranes: 1×3 tonnes; 7×3 – 5 tonnes; 43×6 tonnes.
Public Mobile Cranes: 1×3–6 tonnes; 1×4 – 8 tonnes; 4×6 – 12 tonnes; 6×15 tonnes; 1×35 tonnes; 3×40 tonnes.

25 dry dock cranes, largest has a lifting capacity of 150 tonnes.

2 floating cranes for public use, owned by the Port Authority, capacities 90 tonnes and 150 tonnes and one floating derrick owned by the Port Authority, capacity 500/600 tonnes.

BULK HANDLING FACILITIES:
Cereals:
President Wilson Dock: Berth Nos. 24/25. Storage: The Madrague Silo, owned by the Societe Fonciere et Commerciale du Silo de la Madrague, has a capacity of 30,000 tonnes in 143 cells. The silo is connected to the berth by covered conveyors. The silo is outside the port area. 1 suction unit, rate 600 t.p.h.
Grande Joilette Dock: Used for storage only. The silo, owned by the Marseilles Port Authority, is within the port area and has a capacity of 22,000 tonnes in 99 cells.
Minerals in Bulk:
National Dock: Berth Nos. 47 and 48. Specifically for bulk traffic, handled by bucket-cranes. Storage: 4,000 sq.m. (43,040 sq.ft.) in the open, beside the East Quay. 3 cranes, rate 300 t.p.h. or 150 t.p.h. per crane.

3 berths on the Seaward Breakwater, Berth Nos. 109, 110 and 111. Theoretical length 151 m. each, max. draft 12 m. Storage capacity 50,000 tonnes.

These berths are equipped with 5 bucket cranes of 7 tonnes and facilities for storing clinker.
President Wilson Dock: Berth No. 14. Allocated specifically for alumina. Storage: 2 silos, with a total capacity of 11,000 tonnes, constructed by and belonging to Pechiney Cie. and Ugine Cie., to facilitate the import/export of dehydrated alumina in bulk.

There is an additional warehouse with 1,000 sq.m. on Mole "D" which is used for hydrated alumina. Vessels are handled via Berth No. 47 (National Basin). Storage capacity 3,000 tonnes.
Leon-Gourret Dock: Berth No. 8. Allocated specifically for bulk traffic that can be handled by grab-bucket. Storage: An open area of 4,000 sq.m. (43,040 sq. ft.) at the quayside; suitable for import/export.
Liquids in Bulk:
Mourepiane Dock: Berth Nos. 151 and 148. For vegetable oils and chemicals. Storage: The private company, Marseille Vrac, which operates this depot, has 32 vats of 125 to 1,640 cu.m. (4,412 to 57,892 cu.ft.), with a total capacity of 24,500 cu.m. (864,850 cu.ft.). There are pipelines to the quay for discharging tankers.

Import and Export: The major import is vegetable oil; export is chemical products in bulk.

Berth No. 143 for refined hydrocarbons.

Berth Nos. 104, 105 and 106 for wine in bulk.
Sugar:
President Wilson Dock: Berth Nos. 19 and 20. Storage: The silo, which has a capacity of 24,000 tonnes is within the port area and is owned by the Port of Marseilles Authority. Sugar is discharged by bucket-crane into hoppers which feed the conveyor belts to the silo. The total conveyor capacity is 250 tonnes per hour.

SPECIALISED CARGO HANDLING FACILITIES:
Heavy Load Berths:

In Mirabeau Basin there is a special berth (No. 161) designed to receive barges loading and unloading heavy loads. This berth is located between Berth No. 160 and the Leon Gourret Mole and consists of a quay 80 m. long into which has been built a barge basin 50 m. long by 20 m. wide with a depth of 2.5 m.

Apart from this special berth, there are 29 Ro/Ro berths in operation in the port of Marseilles which permit direct loading of heavy loads into Ro/Ro ships. There are also numerous conventional berths that can be used for vertical loading and unloading of heavy loads, with the assistance of the port's "Atlas" and "Goliath" floating cranes, which have a lifting capacity of 90 and 150 tonnes respectively and can be coupled to lift a maximum of 220 tonnes.

In addition to these floating cranes, the following floating equipment is also available:

The Port Authority's floating derrick, "Protis", which has a lifting capacity of 500 to 600 tonnes.

Various types of private floating equipment with capacities ranging from 40 to 60 tonnes.

Various public or private heavy load barges.

The Port Authority's submersible seagoing barge.

This barge is designed for transporting heavy loads, or for putting them into the water in the case of floating loads (within the limits of its deadweight capacity of 1,800 tonnes; the loading and unloading of heavy floating loads of 1,800 to 2,000 tonnes must be carried out in dry docks). The barge can be loaded vertically, horizontally (Ro/Ro), or by floating the load into the hold in the case of a floating load.

Also see "Berthing".

CONTAINER HANDLING FACILITIES: Various quays are devoted to container traffic: At the Leon Gourret mole (14.5 m. permitted draft, large open areas, railway tracks); at the Mourepiane quay, in the Mirabeau basin, where there is a new terminal:

3 public berths, Berth Nos. 155, 156 and 157, each of which has a theoretical length of 154 m. and a max. draft of 11.7 m.

Container handling equipment: 2×40 tonne Caillard gantry cranes. 4×30 tonne at 30 m. mobile cranes.

Railed tracks: 2 railway tracks alongside the quay; 1 railway track behind warehouse 20; 2 railway tracks at the Eastern limit of the dense storage area behind warehouse 20.

Area alongside the quay 35 m. wide comprising: A working area 15 m. wide equipped with 2 railway tracks and a trailer movement area; a storage area for short periods, 17 m. wide (under the rear jib of the gantries).

Storage areas covering a total of 90,000 sq.m.

BRIDGES: Turning bridge near Southern end of port – Pont d'Arenc – opens from 0545 hrs. – 2055 hrs. twice each hour between 5 minutes before the quarter of the hour and 5 minutes afterwards, and 5 minutes before the three quarter hour and 5 minutes afterwards. Closed from 2055 to 0545.

Bridge further North – Pont de la Pinede – opens 0600 – 2200 hrs. twice each hour between 5 minutes before the hour and 5 minutes afterwards, and between 5 minutes before half hour and 5 minutes afterwards. Open continuously 2200 – 0600 hrs.

STEVEDORES: Enable Agent order gangs important obtain in good time accurate ETA from vessels. Latest times to order gangs; normal and deferred shifts 0530 hrs. same morning – night shift 1600 hrs. same day – Saturday and Sunday, 1600 hrs. Friday. Failure to give precise ETA may result in ship losing 12/24 hours also cost gang waiting time includes waiting vessel's arrival – Free Pratique – opening/closing hatches – rain – shifting cargo or dunnage – crane or derrick breakdowns – time lost between finishing and end of shift. Work can be arranged on following official holidays – New Year's Day, Easter and Easter Monday, Whitsun, 14th July, 15th August, 1st November, Christmas Day, 1st May holiday when no work takes place, Stevedoring hours (normal shift) Monday to Saturday, 0630 – 1300 hrs. and 1330 – 2000 hrs. (Two shifts). Sunday, 0630 – 1300 hrs., if required – one shift 0800 – 1115 hrs. and 1300 – 1615 hrs. Night work if required or short night work 2015 – 2330 hrs. No work allowed Sunday night. All necessary gear supplied by stevedores except rain tents which vessel must supply.

MEDICAL: Yellow fever inoculations only in hospital (Tuesdays and Friday). Masters to advise by radio prior arrival if medical attendance required aboard.

TANKERS: Oil traffic in the Port of Marseilles is limited to two functions: the supply of refined products to certain urban installations, and the degassing of oil tankers before they enter a dry dock for repairs.

The specialised facilities available are:
Saumaty Basin: Three berths are available for tank barges alongside Mole I: Lengths: Berth No. 145, 70 m.; Berth No. 146, 105 m.; Berth No. 147, 133 m. Max. draft 4.7 m.

The quayside discharge pipes are connected to the Mourepiane Oil Storage Depot located outside the port enclosure. The total capacity of this depot is 42,000 cu.m.; 16,000 cu.m. for white products and 26,000 cu.m. for black products.
North Outer Harbour: Berth No. 143 (max. draft 9.5 m.) in the North Outer Harbour has a dual function. Firstly, it can receive oil tankers of up to 550,000 tonnes and LNG carriers for degassing and treatment of water polluted by oil product residues during tank-cleaning. Secondly, it can receive small and medium-sized tankers for discharging oil products. The quayside discharge pipes of this berth are also connected to the Mourepiane Oil Storage Depot.

Also see "Port de Bouc" and "Fos".

DENSITY: About 1028.

FRESH WATER: Can be obtained from hydrants or quays or from water-boats. When delivered by barge, minimum quantity invoiced is 50 tons. Preferable order prior arrival to avoid delays. Minimum pumping rate 50 t.p.h.

FUEL: Ordinary fuel, also fuel oil max. 1000 secs., diesel and gas oil. Deliveries by barge only.

FIRE PRECAUTIONS: Special harbour fire-fighting corps, with two fire-fighting vessels.
WATCHMEN: Available but not compulsory.
HATCHES: Crew allowed open and close.
SHIP CERTIFICATES: On first call Registered Tonnage Certificate; thereafter not required unless gross/net tonnages changed.
CUSTOMS ALLOWANCES: About 200 cigarettes and limited amount spirits per man.
CARGO GEAR: No additional requirements; all gear supplied by stevedores except rain tents.
IDENTIFICATION CARDS: Not required.
AIRPORT: Marseille-Marignane is the second largest airport in France with 18 air companies serving 60 national and international destinations.

The international airport of Nimes-Garons (50 km. from Fos) serves the West region of the Marseilles district.
CONSULS: The following countries are represented in Marseilles:

Algeria
Argentina
Austria
Belgium
Bolivia
Brazil
Canada
Colombia
Costa Rica
Cuba
Cyprus
Denmark
Dominica
Ecuador
Egypt
Finland
Germany F.R.

Yugoslavia

REPAIRS: Most repairs and overhauls possible. Prior notice recommended.
SERVICES:
Mourepiane Deballasting and Degassing Station: The station is located at Berth No. 143 in the North Outer Harbour which measures 680 m.×800 m. and permits the manoeuvres of very large ships. The 90 m. long berth is dredged to a depth of 9.5 m. and can receive ships of up to 550,000 tonnes.

Facilities for deballasting and degassing oil tankers:
Storage Capacity: 17,000 cu.m.
Heated Pressurised Sea Water: 80°C, 13 bars, 200 cu.m./hr.
Pressurised Steam: 15 kg./sq.m., 34 t.p.h.
Compressed Air: 4 cu.m./min. and 18 cu.m./min.
Electric Current: 3×400 V, 250 A.
Fans.
Telephone connected to the international telephone system.
Personnel for cleaning, removing and treating solid wastes.
Facilities for degassing gas tankers:
Nitrogen: 3,000 cu.m./hr.
Burn-Off Capacity in the 15 m. High Burner: 3,000 cu.m./hr.

DRY DOCKS:

No.	Usable Length (m.)	Usable Width (m.)	Depth (m.)	Cranes (tons)	Sea Water	Telephones
1	171	19.60	5.30	2×9	–	1 line
2	135	17.30	4.20	1×9 – 1×20	–	1 line

4	80	12.50	4.75	–	–	1 line
5	122	14.60	5.30	1×9	–	1 line
6	125	15.60	5.30	1×9	–	1 line
7	200	23.00	8.10	1×9 – 1×20	–	1 line
8	320	49.00	11.00	1×6 – 1×9 1×50	800t/h	2 lines
9	250	36.00	8.50	1×6 – 1×9 1×50	800t/h	2 lines
10	465	84.00	10.00	3×25 – 1×150	10,800t/h	12 lines possible

Fresh water and power available at all berths.

One floating dock: Usable length 165 m., usable width 25 m. Depth 6 m. 2×7 tonne cranes. Fresh water and telephone available.
POLICE/FIRE/AMBULANCE: Police (disturbance of peace): Tel: 17. Marine Fire Brigade (fire, ambulance, injury, explosion, flooding, man overboard, etc.) Tel: 18. Police and Marine Fire Brigade can also be called through the Central Watch Tower (VHF CHannel 16) or Telephone: 912166 ("Marseille Port").
DEVELOPMENTS:

1. Tracked electric cranes to be reduced from 75 to 60.
2. A fourth 30 tonne (at 30 m.) mobile crane has been ordered.

SHIPMASTER'S REPORT: October 1983.
Documents: Inward declaration required for entry. This is given to Master by Pilot for handing to Agent.
Health: Routine message to "Saniport Marseille" sufficient even for vessels arriving from Ivory Coast/Senegal. This is required but not acknowledged.
Banana Discharge: Usually at Pier No. 58, starboard side to, by side doors via conveyor belts. Usual working hours: 2 shifts 0630 – 1400 hrs. and 1400 – 2000 hrs., 6 days a week. 4 conveyors available.
Fresh Water: Available at Pier No. 58 by barge only.
Security: Stealing from accommodation is rife.

AUTHORITY: Port Autonome de Marseille, B.P. 1965, 23 Place de la Joliette, 13226 Marseille Cedex 02, France. *Tel:* 91.91.90.44 – 91.91.90.66. *Telex:* 440746 Portauto Marsl. *Cables:* Portauto Marseille. *Contact:* Harbour Master.

AGENT: Jolasry (France), 20 quai du Lazaret. Tel. 91.90.86. Telex. 440821. Cables: Jolasry.

(b) **PORT DE BOUC,** including Port de Lavera 43.23 N. 05.00 E., Port de Berre 43.27 N. 05.10 E., Port de la Mede 43.24 N. 05.07 E. Caronte 43.24 N. 05.02 E. **(See Plan)**

DOCUMENTS: On arrival:
Inward Declaration (presented by Pilot on boarding).
1 Cargo Manifest or manifest in ballast.
Bill of Lading.
Ship's Register (if required).
6 Crew Lists (8 if Spanish or U.S.S.R. ship or ship bound for these countries).
3 Passenger Lists.
Health Declaration.
Derat Certificate.
Bunker's Supply (3 forms).
1 Crew Declaration of Personal effects – cameras, binoculars, radios, cigarettes, tobacco, etc. If on inspection articles or quantities not in conformity or in excess, Master held responsible, articles removed and heavy fines imposed.

PILOTAGE: Call "Port de Bouc Control" on Channel 16. Channel 12 for traffic. Pilot must be taken to enter Port de Bouc, Fos and Port St. Louis du Rhone. Contact by Marseilles Radio or pilot boat VHF (Channel 16 for calling, Channel 14 for traffic). Pilot boards in the Roads between 2 and 2.5 miles S.W. of Bouc Tower or further out if required, for entering Port de Bouc and Fos. Motor launch black hull, white cabin, white anchor on bow, "H" flag.

ANCHORAGE: It is recommended to ask for Pilot before anchoring in Outer Roads to avoid forbidden places for ships bound for Port de Bouc and Fos. Permanent watch on VHF Channel 16 is compulsory.

RESTRICTIONS: No entry restrictions for Lavera. Night transit of Caronte Canal to Etang de Berre forbidden to tankers above 6,000 g.r.t. Transit of Caronte Canal to Etang de Berre is forbidden for vessels over 180 m. (598 ft.) overall and over 24 ft. draft.

Notice: *"Port Authorities Instructions Concerning Fos/Lavera Tanker Areas.*
Special Notice No. 94/81.
Re: Berthing of Tankers Loaded with Naphtha or Gasoline.

Taking into account the recurring risks encountered with tankers discharging naphtha, super gasoline, gasoline or condensate, until further notice, it has been decided that only one vessel at a time, carrying said cargo, will be allowed to discharge in above areas of Port Autonome de Marseille.

For the time being these restrictions do not apply to coasters.

Furthermore, vessels concerned, whatsoever the year of building, will only be allowed alongside providing that pump room is clean, gas free and that no product is leaking at ship's valves or pumps.

Should above conditions not be fulfilled vessels could not be accepted in above areas".

MAX. SIZE: Lavera: LOA 275 m., draft 12.80 m.
Caronte: LOA 170 m., draft 8.84 m.
Berre: LOA 180 m., beam 24 m., draft 7.0 m.
La Mede: LOA 180 m., beam 24 m., draft 7.2 m.
HEALTH: Pratique given by Customs Officers who board on arrival. In case of suspected disease on board, notify Agents by radio before arrival.

Also see "Marseilles".
RADIO: Within 150 miles traffic through Marseille Radio/FFM, otherwise St. Lys (FFL).
VHF: Port de Bouc Radio (Harbour Office) VHF used for navigation purposes only – Channel 16 for call, Channel 12 for traffic.
RADAR: Port and approach radar station.
TUGS: Eleven tugs available from 90 h.p. to 3,000 h.p. Normally join vessel in entrance channel off Port de Bouc. Tow lines furnished if required.

BERTHING: Lavera: 19 berths (Total berthing length 3,088 m.) for public and private use. Permitted drafts: 3 berths of 2 m. to less than 3.6 m.; 4 berths of 3.6 m. to less than 5.5 m.; 1 berth of 5.5 m. to less than 6.1 m.; 5 berths of 10 m. to less than 11 m.; 3 berths of 11 m. to less than 12.5 m.; 3 berths of 9.9 m.

1×12 tonne public mobile crane.

Lavera harbour has been specifically designed and equipped to handle refinery products and the discharge of oil tankers.

Each berth has flexible pipe connections, with articulated metal arms, supported by special cranes. The type of pipework depends on the product handled (crude or refined) and is connected to the storage tanks of:—

C.F.R. and Shell
S.F.P. – B.P. Refinery at Lavera
The maritime terminal of S.P.L.S.E., which supplies the Esso Refinery at Fos.

Berths A1, A4, H Bis, H and K1 have been designed to handle the loading and unloading of propane and chemical products.

Crude: 8 public berths in 4 basins.

Name of Berth	No. of Berth	Max. Length (m.)	Max. Draft (m.)
B	721	325	12.00
C	722	325	12.00
D	723	325	11.89
E	724	325	12.20
F	725	325	12.80
G	726	325	12.80

Refined Products: 12 public berths.

Name of Berth	*No. of Berth*	*Max. Length (m.)*	*Max. Draft (m.)*
A1	711	210	10.10
A2	712	210	11.10
A3	713	210	11.10
A4	714	240	12.20
B	721	325	12.00
C	722	325	12.00
D	723	325	11.89
E	724	325	12.20
F	725	325	12.80
G	726	325	12.80
K1	701	100	6.10
K2	702	88	5.30
K5	705	100	5.80
K6	706	100	5.90

Liquid Gas: 5 public berths.

Name of Berth	*No. of Berth*	*Max. Length (m.)*	*Max. Draft (m.)*
A2	712	210	11.10
A4	714	240	12.20
H	727	200*	11.80
H Bis	—	120*	11.00
K1	701	100	6.10

*Usable length 100 m.

Annual capacity of loading or discharge: 600,000 tons based on the 4 multi-purpose berths being exclusively used for discharge of vessels bringing propane gas.

Average output per quay 600 cu.m./h. (300 t.p.h.)

Storage capacity: The storage capacity of propane gas of the Societe GEOGAZ is 120,000 cu.m (60,000 tons).

Chemical Products (exclusively): 3 public berths.

Name of Berth	*No. of Berth*	*Berthing Length (m.)*	*Permitted Draft (m.)*
A4	714	240	12.20
H	727	200*	11.80
H Bis	—	120*	11.00

*Usable length 100 m.

Berth A4 is also equipped for crude oil traffic, refined oil products and for the importation of liquid gas.

Berth H and H Bis can also accept liquid gas.

Annual capacity of loading or discharge: 2,700,000 tonnes if these 2 berths are exclusively used for chemical product traffic.

Discharge rate using vessels' pumps: 150 t.p.h. Loading rate using land pumps 150 t.p.h. to 300 t.p.h.

Storage capacity: Societe NAPHTACHIMIE: factory. Societe MAVRAC: 53,000 cu.m. Density 0.80 – 1.62.

Report: Berthing Procedures: Tugs are made fast between the 2 buoys "Lavera" and "Les Tasques", using the "On the Hook" method. Tugs watch VHF Channel 6.

Loaded or ballasted tankers are berthed heading outwards. Ships are swung off the head of the pier and backed alongside stern first. On request (ship's manifold too far, only gangway available, weather conditions, etc.) they may be moored directly and swung on departure.

Anchors are only used in case of emergency or when the ship's bow overhangs the pier's end.

Port Authorities do not advise anchoring method for safety reasons (delay if emergency departure needed).

No shore gangway is available at this terminal. Vessels must use their own gangway with safety nets and lifebuoys.

Port de Bouc/Caronte: Quay berths reserved exclusively for commercial operation of sea-going vessels: Berth Nos. 780 to 786 and 2 berths for river barges.

Total length of quays: 763 m.; Usable berthing length: 1,000 m.; Permitted draft: 2 berths for barges with draft of less than 4 m.; 5 berths of 8 m. to less than 9 m.

Berths reserved for repairs afloat (Agglomerate Quay No. 787): Total length of quays: 250 m. Max. draft 4.5 m.

Equipment:

Quay cranes: 2 cranes of 3–6 tonnes
3 cranes of 6–12 tonnes
2 cranes of 12 tonnes

Seven cranes, private, forming part of the installations of the Etablissement Maritime de Caronte et de Fos (CARFOS)

Quay gantries: 2 gantries of 10–20 tonnes, private (CARFOS) used for ores, stacking and removal from stock. Lifting capacity of the most powerful: 15 tonnes.

1 phosphate reloading gantry (CARFOS) with a capacity of 400 t.p.h.

Cranes allocated to naval repairs afloat, at the Agglomerate Quay: 2 private cranes from 6 to less than 15 tonnes. Lifting capacity of the most powerful: 4–8 tonnes.

Floating cranes: 1 private crane, with a lifting capacity of 100 tonnes.

Storage:

Quay-side sheds	8,200 sq.m.	(private)
Other sheds or warehouses	4,875 sq.m.	„
Quay-side open areas	16,000 sq.m.	„
	10,000 sq.m.	(public)
Other open areas	8,000 sq.m.	(private)

Bulk Liquids: Vegetable or animal oils and chemical products:

1 public quay under private use (Favat installation) (Berth No. 780): Verminck Quay. Useful berthing length: 120 m. Permitted draft: 7.50 m.

Discharge of oils is effected by shipboard pumps and the relay pump of the land installations – rate 200 t.p.h.

Storage capacity: 6,000 tonnes.

The Favat storage installations located outside the port area, on private property, have a total capacity of 12,000 cu.m. These installations are connected by a network of 3 pipelines of 200,150 and 100 mm. to the discharge points at the quayside. Storage Shed: 4,000 sq.m.

Chemical products exclusively: 1 private berth (Berth No. 786): Kuhlman Quay (Ets. Kuhlman). Useful berthing length: 140 m. Permitted draft: 7.50 m. Factory storage capacity: 2,500 tonnes.

Bulk Solids: Ores, coal, heavy minerals:

5 berths at the Caronte Quay (Berths Nos. 781–785) private use granted to Etablissement Maritime de Caronte et de Fos (CARFOS).

Usable berthing length: 650 m. Permitted draft: 8.40 m.

1 quay berth for loading phosphate barges, located between berth No. 785 and berth No. 780. Berthing length: 80 m. Permitted draft: 3.50 m.

The Caronte Quay has a specialised installation comprising:

3 transporting units and weighing hoppers with a unit output of 135 t.p.h.

1 transporting unit and specialist weighing hopper specialised in wagon loading: output 150 t.p.h.

2 weighing hopper towers – unit capacity: 1,200 tons per day.

2 weighbridges (40 and 80 tonnes).

The 7 scoop cranes are emptied into weighing hoppers which in turn discharge on to conveyor belts which terminate either above wagons to be loaded, into sheds or open storage areas. Hourly capacity per crane 120–150 t.p.h.

The quay is also equipped with 2 gantry cranes of 10 to 20 tonnes used for stacking and reclaiming minerals and 1 gantry crane with a capacity of 400 t.p.h. used for reloading phosphate.

Storage capacity: 63,000 tonnes.

The CARFOS storage installations include:

3 phosphate sheds of 6,800 sq.m.

1 ilmenite shed of 550 sq.m.

1 open area of 6,000 sq.m.

Oil seeds – oil cake: 2 berths (No. 784 and No. 785) at the Caronte Quay, private use granted to CARFOS

Available berthing length: 170 m. each. Permitted draft: 8.84 m.

Storage capacity: 10,000 tonnes. These berths are also used for ores, coal and heavy minerals.

Installations and equipment: Identical to those on the quays for ores, coal and heavy minerals.

Etang de Berre/La Mede:

Available berthing length: La Mede – 190 m. Berre – 560 m.

La Mede: 1 berth. Berre: 4 berths.

Access to these berths is limited by the depth of the Caronte Canal 7.32 m.

Port of La Mede: Cie Francaise de Raffinage (C.F.R.). Berth Nos. 744 and 746.

Refined oil products: 2 private berths (C.F.R.).

Name of Berth	Berth No.	Type of installation	*Available berthing length* (m.)	*Permitted draft* (m.)*
West Berth	746	50 m. mooring units set out in lake	120	7.20
4	744	Pier	70	5.40

*Access to these berths limited by depth of Caronte Canal 7.32 m.

The installations of the Compagnie Francaise de Raffinage permit loading or unloading of 100–600 cu.m./h. according to product.

The installations of the C.F.R. are connected to tanks by pipelines of varying sizes under the waters of the Berre Lake and Canal from Marseilles to the Rhone.

Storage capacity: Depot of the Refinery of C.F.R. – 1,510,000 tons of refined products to which may be added 346,500 tons of crude brought by pipeline from the berths at Lavera and Fos to the Refinery.

Port de La Pointe de Berre: Cie. de Raffinage Shell Francaise (Berths No. 751 to No. 754). Refined oil products. 4 private berths.

Access to these berths limited to 7.93 m. by the depth of the Caronte Canal.

Berth Name	Berth No.	*Max.* length (m.)	*Permitted* draft (m.)
A	751	160	7.31
B	752	160	7.01
Salins Berth	754	160	7.01
South West (coasters)	753	80	4.80

The berthing installations of the Cie. de Raffinage Shell Francaise S.A. have connections to its tanks by specialised pipelines for the various products. They provide loading and discharge outputs from 120 to 2,500 cu.m./h. according to product.

Storage capacity: Depot of the Port de La Pointe de Berre 154,000 tons. Storage area of the Shell Refinery 1,572,000 tons.

To the above capacities should be added 303,000 tons of crude oil brought by pipeline to the Shell Refinery from the Lavera and Fos berths.

BRIDGES: 1 railway bridge and 1 road bridge across Caronte Canal each having special times for opening. Ships of less than 21 m. height clearance may pass below the railway bridge. Motorway bridge over Caronte Canal with 44.60 m. clearance.

STEVEDORES: To enable Agent order gangs important obtain accurate ETA between 24 hours and 48 hours in advance. 2 shifts 0500 to 1300 hrs. and 1300 to 2100 hrs. normally 6 days a week. Confirmation to be made at 0900 hrs. for afternoon shift, and 1700 hrs. for next day morning.

MEDICAL: All hospital and medical facilities. Yellow fever inoculation made by appointed doctors. Masters to advise by radio prior arrival if medical attendance is required on board.

TANKERS: See "Berthing".

DENSITY: About 1028. Variable in Canal de Caronte and Etang de Berre owing to discharge of hydraulic plant of St. Chamas.

FRESH WATER: Available generally by pipes and hoses at the berths. Water barges available from Marseille.

FUEL: By barges for cargo ships and vessels in the Roads. Tankers at Lavera refuel by pipe-line at the berths. All grades available.

FIRE PRECAUTIONS: Oil Harbour fitted with a system of 203 mm. (8 in.) or 254 mm. (10 in.) sea water pipes at 5 bars permanent pressure. It may be increased by pumping station up to 9 bars, and supply 500 cu.m./hr. Each wharf has 5 fire hydrants with first-aid equipment: fire hoses and spray nozzle, foam nozzle with powder cans. If fire breaks out on a ship, the hose handling gantries are protected by a screen of sprayed water. All fire equipment and installations are painted red.

There is a special fire-fighting Corps with fire vessel. Call for firemen 06.21.29 or in case of fire call Port de Bouc Control – phone 06.22.26 or 06.63.39 or VHF Channel 16.

GANGWAY/DECK WATCHMEN: Available but not essential.

OPENING/CLOSING HATCHES: Always by crew.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes every 5 days; wine/spirit: limited amount per man.

IDENTIFICATION CARDS: Seamen going ashore should carry passport or identity card.

CONSULS: Norwegian, Swedish, Danish and Spanish consuls at Port de Bouc. Others at Marseille.

REPAIRS: Permission must be granted by Port de Bouc Harbour Master only.

DRY DOCKS: Nearest at Marseille.

REPATRIATION: All facilities for crew change and repatriation by railway or planes.

AIRPORT: Marignane Airport 40 km. and Nice Airport 230 km. (Nice for SAS lines).

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Same as "Marseille".

POLICE/AMBULANCE/FIRE: Police, 06.23.74 or 07.03.31; Fire, 06.21.29 or 06.28.37.

TELEPHONE: On application can be connected on board at Lavera. Telephone ashore in other places.

SHORE LEAVE: Allowed.

SHIP SUPPLY SERVICES: *Auxiliaire Maritime:* Monsieur Seguin Technical Manager – Tel: (42) 06 09 89, 20 Cours Landrivon, 13110 Port de Bouc, France. Telex: 430 274. Regular and spot launches service.

Port Service: Monsieur Erick Ganaye, Operations and Technical Manager, Place de Narvik, Port Petrolier, 13117 Lavera, France. Tel: (42) 81 62 30, Telex: 401 305. Shinc boat service, Interpreters, spot helicopter service, watching.

Societe Citerna: Anse Aubran 13110 Port de Bouc, France. Tel: (42) 06 09 90, Telex: 420 730. Bunkering (with no limits of tonnage).

Societe Ouvrages Sous-Marins et Portuaires: Monsieur Boscolo – Director, Anse Aubran, 13110 Port de Bouc, France. Tel: (42) 06 22 44, Telex: 400 035, SHinc diving operations – wet docking. Speaking English, German and Spanish.

AUTHORITY: Port Autonome de Marseille, Capitainerie des Bassins Ouest, B.P.200, 13528 Port de Bouc Cedex. *Tel:* (42) 06.22.26. *Telex:* 440164 PORFOS. *Cables:* PORFOS. *Contact:* Harbour Master.

(*c*) **FOS:** 43.24 N. 04.53 E. **(See Plan)**

DOCUMENTS:

Inward Declaration (Presented by Pilot on boarding).
1 Cargo Manifest or Manifest in Ballast.
Bill of Lading.
Ship's Register (if required).
6 Crew Lists (8 if Spanish or U.S.S.R. ship or ship bound for these countries).
3 Passenger Lists.
Health Declaration.
Derat Certificate.
3 Bunker Supply Forms.
Declaration of crew personal effects, cameras, binoculars, radios, cigarettes, tobacco, etc.

If on inspection, articles or quantities not in conformity or in excess, Master held responsible, articles removed and heavy fines imposed.

PILOTAGE: Compulsory. Contact by Marseilles radio or direct to pilot boat by VHF Channel 16 for calling, Channel 9 for traffic. Pilot boards in the roads between 2 and 2.5 miles S.W. of Bouc Tower or farther out if required. Motor launch, black hull, white cabin, white anchor on bow, flying "H" flag.

Port de Bouc Port Control, call on Channel 16, Channel 12 for traffic. Pilot boat on Channel 16 for calling and Channel 14 for traffic.

ANCHORAGE: It is recommended to ask for Pilot before anchoring in outer roads to avoid prohibited anchorages. Permanent watch on VHF Channel 16 compulsory.

RESTRICTIONS: When large tankers are proceeding in the Fos Channel, other vessels' entrance may be delayed.

Access channel for very large vessels dredged to 22 m. over a width of 250 m.

Notice: *Port Authorities Instructions Concerning Fos/Lavera Tanker Areas.*

Special Notice No. 94/81.

Re: Berthing of Tankers Loaded with Naphtha or Gasoline.

Taking into account the recurring risks encountered with tankers discharging naphtha, super gasoline, gasoline or condensate, until further notice, it has been decided that only one vessel at a time, carrying said cargo, will be allowed to discharge in above areas of Port Autonome de Marseille.

For the time being these restrictions do not apply to coasters.

Furthermore, vessels concerned, whatsoever the year of building, will only be allowed alongside providing that pump room is clean, gas free and that no product is leaking at ship's valves or pumps.

Should above conditions not be fulfilled vessels could not be accepted in above areas.

MAX. SIZE: Max. draft at Oil Jetty 22.25 m.; Solmer in Dock No. 1 – 18.6 m.; Mineral Quay in Dock No. 1 – 14.93 m. Dock No. 2 – 13.0 m.

HEALTH: Pratique given by Customs Officers who board on arrival. In case of suspected disease on board, notify Agent by radio before arrival. See also "Marseilles".

RADIO: Within 150 miles, traffic should be routed through Marseilles Radio, FFM, otherwise via St. Lys. FFL.

VHF: Channel 16 for calling. Channel 12 for traffic and Channel 14 for pilot.

RADAR: Port and approach radar station.

TUGS: Tugs normally join vessel in the entrance channel. Ship's lines are used, or from tugs if required.

GENERAL CARGO FACILITIES: *End of the Mole Between Docks 2 and 3:* 1 berth (No. 870). Serviceable length: 110 m. Max. draft: 6.50 m.

This berth permits sea-going barges to come alongside and is reserved for stern-loading Ro-Ro vessels.

Gloria Basin: On the East side of the basin: The Brule Tabac Quay for miscellaneous traffic.

3 berths (Nos. 871-873).

Berth 871: Serviceable length: 221 m. Max. draft: 11.50 m.

It is equipped with a floating ramp for Ro/Ro traffic.

Berth 872: Serviceable length: 222 m. Max. draft: 11.50 m.

Berth 873: Serviceable length: 222 m. Max. draft: 10.80 m.

It is equipped with a floating pontoon, permitting access for stern-loading Ro/Ro vessels.

Equipment: 1 quayside railway for direct transhipment; 1×40 tonne Caillard gantry crane; 2×15 tonne mobile cranes; 1×8 tonne mobile crane; a storage area of 170,000 sq.m.; a transit shed of 9,000 sq.m.

In addition to the above equipment, the Port Authority's 500/600 tonnes floating derrick "Protis" is available for use in the harbour areas of Marseilles, Port Saint Louis du Rhone and Fos.

On the West side of the basin: A deep-water quay, the Gloria, will be able to receive vessels of ever-increasing size which cannot be accommodated at the quays of Port Saint Louis du Rhone. (Phase 1 completed).

Berth 821: Solmer finished products dispatch quay.

South Dock: Length 360 m. Max. draft: 11.89 m. Equipped with 2 cranes of 50 tonnes at 26 m.

Berth 859: Private berth at the end of Dock 2, serving the installations of the Compagnie Francaise d'Entreprises Metalliques (CFEM).

Length: 120 m. Max. draft: 5.00 m.

BULK HANDLING FACILITIES: Fuel, solid minerals, ores: 3 public berths and 2 private berths.

Public Berths:

FACILITIES: 1982

3 berths Q1 (No. 851), Q2 (No. 852) and Q3 (No. 853) in Dock 1 , West Quay:

Total length of quay: 884 m. Usable length of quay: 850 m. Max. depth of water at quay side berth: 16 m.

Largest admissible ship: Deadweight capacity: 100,000 d.w.t. (approx.). Length: about 300 m. Max. draft: 49 ft. (14.93 m.).

Equipment: (Capacities for products of density = 1.3).

For discharge: 2×20 tons bucket gantry cranes (P1.P2) (2×700 t.p.h. peak output). 2×15 tons at 30 m. reach, bucket cranes (K1.K2) (2×600 t.p.h. peak output). 2×70 cu.m. hoppers connected to cranes.

For loading: 1 continuous loading gantry C1 (Aluminium Pechiney) (1,500 t.p.h. peak output). 1 continuous loading gantry C2 for ships up to 50,000 d.w.t. (1,600 t.p.h. peak output). 1 assembly loader (tilting conveyor with feeder) for ships up to 25,000 d.w.t. (1,500 t.p.h. peak output). 1 loading berth for river barges (800 t.p.h. peak output).

Conveyors: 1 fixed reversible longitudinal conveyor belt L1 (2 speeds: 1,600 and 2,000 t.p.h. nominal). 1 fixed reversible transversal conveyor belt T1 (1,600 t.p.h. nominal). 1 train of 7 mobile conveyors (PMA) with stacker (1,600 t.p.h. nominal). 1 fixed longitudinal conveyor belt LP supplying loading gantry C1. 1 fixed import transversal conveyor belt T2 (2 speeds: 1,600 and 3,400 t.p.h. nominal). 1 fixed reversible longitudinal conveyor belt L2 (2 speeds: 1,600 and 3,400 t.p.h. nominal). 1 reversible fixed longitudinal conveyor belt L3 (1,600 t.p.h. nominal). 1 second train of 7 mobile conveyors with stacker (CARFOS) (2 speeds: 1,600 and 2,000 t.p.h. nominal. 3 mobile conveyors of 36 m. (1,600 – 2,000 t.p.h. nominal).

Storage: Buffer stock: approx. 7 acres. Storage area: approx. 21 ha. Covered storage: 3,840 sq.m. shed. Whole storage capacity: approx. 900,000 cu.m. (excluding buffer stock. 25,000 tons aluminium silo (Aluminium Pechiney).

Commercial throughput subject to product specific gravity and grade, type of vessel, operating conditions.

Discharge: Three shifts daily (20 hours work) commercial rate for products from specific density 0.8 (coal) to 1.3 (bauxite, sulphur): Using 2×20 ton bucket gantry cranes: 12,000 to 16,000 t.p.day. Using 2×15 ton bucket cranes: 7,000 to 10,000 t.p.day.

Loading: Hourly commercial output for products of 0.8 to1.3 specific density: With the loading gantry C1: 600 to 1,000 t.p.h. With the loading gantry C2: 800 to 1,300 t.p.h. With combined use of assembly loader (inclinable conveyor) and feeder: 300 to 600 t.p.h. On the river barge berth: 600 t.p.h.

Annual terminal throughput capacity between 4.0 and 4.5 million tonnes per year consisting of:

3.0 to 3.5 million tonnes incoming cargo. 1.5 to 1.0 million tonnes outgoing cargo.

DEVELOPMENTS SINCE 1983.

Maximum water depth on berth Q2: Deepened to 17.50 m.

Largest admissible vessel: Deadweight capacity: 140,000 d.w.t. (approx.). Draft: 55 ft. (16.76 m.).

Equipment: For discharge: 1 Five Cail Babcock continuous unloader (P+) for vessels up to 150,000 d.w.t. Peak output: 2,200 t.p.h. (coal). 2,700 t.p.h. (bauxite).

River barge loading berth. A new river barge loading berth with commercial output reaching (100 m. long North End): 750 t.p.h.

Conveyors. 1 fixed transversal export conveyor belt T3 supplying either conveyor belt L3 to loading gantry C2 or river barge berth.

Discharging commercial output. Three shifts daily (20 hrs. work) commercial rate on a 140,000 d.w.t. bulk carrier for product of specific density 0.8 (coal). Using: 1 continuous unloader (P+) plus 1 train of mobile conveyors: 22,000 t.p.day. Using 1 continuous unloader (P+) plus 2×15 ton bucket cranes (K1.K2) plus high capacity storage installation: 28,000 t.p.day.

Annual terminal throughput capacity. Between 5.0 and 6.0 million tonnes per year consisting of: 4.0 to 5.0 million tonnes incoming cargo. 2.0 to 1.0 million tonnes outgoing cargo.

Until the high capacity storage installation is put into service, this traffic capacity can only be reached by increasing the turnover rates of existing storage areas.

A further quay and equipment is planned to handle much larger vessels to be operational in 1986.

DRY BULK EQUIPMENT: P.M.A. equipment:

2×20 tonne bucket gantry cranes. 2 cranes of 15 tonnes at 30 m. 6 fixed conveyors. 10 public and 7 private mobile conveyors. 2 stackers on tyres. 3 feeders with a capacity of 1,500 t.p.h.; 1 of these is privately owned. 1 ship loader of 1,000 t.p.h. capacity. 1 continuous unloader with a capacity of 28,000 tonnes per day will be brought into service in 1983.

Private equipment: 2 discharging gantry cranes on the Solmer import quay. 2 cranes of 50 tonnes at 26 m. on the Solmer export quay. 1 loading gantry crane of 1,500 t.p.h. conceded to a private firm (Pechiney Co.) with the obligation to give public service on the ore quay.

Private Berths: Two private berths (Nos. 811 – 812) in Dock 1 – Eastern Quay. Ste. Solmer reception quay.

Available berthing length: 640 m. Permitted draft: 18.60 m.

Annual capacity of loading or discharge:

Solid minerals, fuels – Coal: 3,000,000 tons/year.
Ores: 4,000,000 tons/year.

The Societe Solmer Quay is equipped with 2×40 ton gantries, each having an hourly rate of discharge of 2,000 tons.

Storage Capacity: Fuel, solid minerals, Coal: 350,000 tons.
Ores: 1,000,000 tons.

Societe Solmer has a quayside open area of 360,000 sq.m. for the receipt and storage of coal and ores.

LNG FACILITIES:

At Dock No. 1. (Berth No. 830) (Owned by Gaz de France).

Length available for berthing 180 m. Max. draft 9.75 m.

2 storage tanks, for LNG in the liquid phase (−160° C.), each with a capacity of 35,000 cu. m. (1,235,500 cu. ft.) and 1×80,000 cu.m.

The pumps on the LNG Carrier discharge through articulated pipes of 300 mm. diameter (11.8 in.), 3 are specifically for discharge; one is to return the methane, in the vapour phase to the carrier.

After warming up from the liquid phase, with the addition of nitrogen to conform with the value in the French Gas Grid, the gas, in the vapour phase, is despatched by pipe-line to the underground storage at Tersanne, 214 km. from Fos (134 miles), and to Marseilles and the Cote d'Azur.

LPG FACILITIES: *Propane:* Geogaz's underground storage of 120,000 cu.m. at Lavera is connected directly by pipe-line to the oil refineries and the port

Butane: Underground storage of Geobutane at Lavera. Capacity of 170,000 cu.m. can now be raised to 230,000 cu.m. following a positive geological survey.

Reshipment Traffic: The port has established an international reputation for its technically delicate operations.

CONTAINER HANDLING FACILITIES:

4 berths (Nos. 862–865) in Dock 2, Graveleau Quay.

Available berthing length: 910 m. Permitted draft: 13.00 m.

Annual loading or discharge capacity: 150,000 containers, i.e. 2,500,000 tonnes (approx.) (20 ft. and 40 ft.)

P.M.A. equipment: 5 Paceco quayside gantry cranes of 40 tonnes, capacity 20 – 25 containers p.h.

Private equipment for handling containers on ground surfaces:

2 transtainers (on tyres) capable of stradling 6 rows, 4 high, plus 1 service road and of lifting 40 tonnes; 15 front-lifters with 40 tonne lifting capacity; 6 fork-lift trucks with 12 tonne lifting capacity; 2 fork-lift trucks with 10 tonne lifting capacity; 10 fork-lift trucks with 3 tonnes lifting capacity; 32 park tractors with adjustable couplers; 77 skeleton trailers for containers.

Storage capacity: 15,000 containers i.e. 225,000 tonnes (approx.) (20 ft. and 40 ft.). Users have at their disposal a storage area with a total surface of 27 hectares.

Annual capacity of output or input: 150,000 containers (20 ft. and 40 ft.) i.e.: 2,000,000 tonnes (approx.) by lorries or railway. The French Railways Transcontainers terminal has 2 gantries on open areas with lifting capacity of 40 tonnes.

The terminal also has: A control centre of 2,000 sq.m.; 2 service areas of 200 m.×70 m.; a stuffing and unstuffing area of 3,200 sq.m. comprising 2 sheds of 25 m.×20 m. each.

TANKERS: Chicksan loading/discharge arms fitted at all berths. Ballast discharge ashore through pipe-line. Tank cleaning slop or oil residue not accepted through shore line, but can be disposed of by barge from Marseilles. Possibility of crude cleaning for vessels with inert gas system if cleaning does not exceed time of discharging operations.

Crude: 6 public berths, of which 2 are multi-purpose 0 and 0 Bis (Nos. 800 and 807).

Designation	*Berth No.*	*Berthing Length* (m.)	*Max. Draft* (m.)
0	800	250	12.80
0 Bis	807	250	12.80
1	801	370	20.58
2	802	350	18.90
3	803	420	22.25
4	804	420	14.00

Berths 0 and 0 Bis (800 and 807) are equipped to handle either export or import of refined products, or the loading of crude oil from a tanker moored at one of the berths 1, 2 or 3 (Nos. 801, 802, 803)

Berths 1, 2 and 3 (Nos. 801, 802, 803) are for receiving crude oil only. Berth 2 (No. 802) is specially equipped to tranship, by using special pipe-lines, crude oil from a vessel alongside at Berth 1 (No. 801) and No. 3 (No. 803).

Specialised lines, dependent upon the nature of the products, connect these berths to the oil depot of Fos, to the CRAU depot (Shell-C.F.R.-B.P.) to the Esso refinery and to the S.P.S.E. terminal, all located in Fos.

Shipmaster's Report: October 1986.

On Berth Nos. 1, 2 and 3 the outboard lifeboat is to be lowered down to the embarkation deck and rigged ready for immediate use.

Storage Capacity:

S.P.S.E. Terminal		2,660,000 cu.m.
CRAU Depot		1,910,000 cu.m.
Esso Refinery		1,040,000 cu.m.
	Total:	5,610,000 cu.m.

Berth 4 (No. 804): Located at Mole No. 2 of the oil terminal, offers in a primary stage a depth of water of 15 m. The berth is intended for berthing in ballast of vessels of 550,000 d.w.t. for washing out tanks prior to repair.

It also permits the reception of crude oil imports and the transhipment of crude from tankers moored at Berths 801, 802 and 803.

The maximum permissible draft is at present 14 m.

The berth is connected to the new deballasting station by a 20 in. diameter pipe-line. During the current first phase of development, this station treats only ballast of low oil content.

The berth can also be used for discharging crude from tankers with drafts up to 14.02 m., and is equipped with one 42 in. diameter discharge pipe and two 16 in. diameter discharge arms.

During the current first phase of development, this berth is not equipped with refueling pipes or boarding towers.

This berth is also used for transhipment from ship to ship (alongside each other) for crude and gas operations.

Refined Products: 4 berths of which 2 are multi-purpose – 0 and 0 Bis (Nos. 800 and 807).

Designation	*Berth No.*	*Berthing Length* (m.)	*Max. Draft* (m.)	*Remarks*
0	800	230	12.80	Public
0 Bis	807	200	12.80	Public
C.2	808	100	6.30	Public
Solmer	821A	100	5.50	Private

Independently of the receipt of crude oil, berths 0 and 0 Bis are equipped to handle either refined product import or export traffic, or the loading of crude oil from tankers berthed at berths 1, 2 and 3 (801, 802, 803).

Berth C.2 (No. 808) specialises in loading refined products on coastal vessels and the Solmer berth specialises in the receipt of fuel oil.

Storage capacity:

Fos Oil Depot		522,000 cu.m.
Esso Refinery		1,023,000 cu.m.
	Total:	1,545,000 cu.m.

Report:

Berthing Procedures: Tugs are secured in the dredged channel between Buoy Nos. 3 to 7, using the "On the Hook" method. Tugs watch VHF Channel 6.

Loaded or ballasted tankers are usually berthed starboard side to the berth and are swung on departure. But on request (ship's manifold too far displaced or only one gangway available) or in some weather conditions (S.E. winds), ships may be berthed port side alongside. The swing is always difficult and requires careful attention.

Usual parallel landing method is followed for berths 0 – 0 Bis and 4, and ship's anchor may sometimes be used in special weather conditions.

When instructed to berth at No. 1 or 2, Masters should be aware that the speed has to be carefully checked and agreed with the Pilots. When passing the last buoy of the channel (No. 11), the engine has to be put "full astern" and the effect of the propeller may bring the vessel approximately parallel to the jetty. The berth approach is then conducted at an angle of less than 30° with tugs' control.

Only Berth No. 4 is equipped with an approach velocity indicator which may be moved to No. 3 in the future.

For all the berths, ships' lines are taken ashore by mooring launches and lifted by hand on to the bollards or quick release hooks.

Spring lines are sent first, then breast lines and tugs will come alongside to push. Mooring boats make VHF contact on Channel 6.

Shore gangways are available only on Berth Nos. 1, 2 and 3, put on the ship's deck forward of the manifold (ships' lifebuoys used). On the other berth ships' gangways are needed with safety nets and lifebuoys.

Berths: Managed by the "Port Autonome de Marseille", the berths consist of concrete platforms with rubber fenders. All are equipped with counter balanced hard arms, bolted connections. Shore personnel carry out connections/disconnections and a permanent watch is maintained on the berth. This watch may be made from a control room where video surveillance is carried out for the berths by one camera mounted on the arms and another one watching the entire berth.

The outside arms can be used for bunkering and for discharge of ballast.

Storage for ballast is up to 80,000 cu.m. and discharge rate to 5,000 cu.m.p.h.

Shore lines have *No Non-Return* valves, and ships are advised to carefully close their manifold gate valves during any stops.

Port Regulations give maximum cargo temperature allowed for discharging heated cargo using crude oil lines: in these special cases, 55°C (131°F) may not be exceeded.

CHEMICAL PRODUCTS: One privately managed berth on the East quay of Dock 2, providing the facilities of the PCUK Company (Berth 858):

Serviceable length: 90 m.; Max. draft: 10.80 m.

This berth is reserved for the export of chemical products such as vinyl monomer chloride and washing soda.

BALLAST: *Deballasting station:* This station is situated to the rear of the oil jetties; in the current phase of development it treats ballast of only low oil content.

Its main characteristics are as follows:

Primary separation: 4,000 cu.m/hr., with apparatus for removing sediment and the oil recovered.

Intermediate storage in a basin of 80,000 cu.m., 320 m. long by 108 m. wide by 3.50 m. deep.

Secondary separation capable of rejecting water containing less than 5 p.p.m. of crude oil and petroleum products (by infra-red measurement) with a throughput of 250 cu.m/hr.

Storage of oil-rich mixtures (slops) 4×360 cu.m.

Auxiliary installations (fire).

Storage of oil-rich mixtures, 4,520 cu.m. will shortly be in service.

FIRE PRECAUTIONS: A special fire fighting corp. operates at Fos. Tel. 062129 or Port De Bouc Control on VHF Channel 16 or Telephone 066339.

FRESH WATER: Available by pipe-line at all berths.

FUEL: Available by barge only.

MEDICAL: All hospital and medical facilities. Yellow fever inoculation made by appointed doctors. Masters to advise by radio, prior arrival, if medical attendance required on board.

REPAIRS: Ore berth can be used as a repairs berth when not required for cargo operations. Permission must be obtained for tanker repairs. No tankers repairs if vessel is not gas free. Permission given by Harbour Master only.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes every 5 days. Wine/Spirits: limited amount allowed per man.

CONSULS: Norwegian, Swedish, Danish and Spanish Consuls at Port de Bouc. Others at Marseilles.

AIRPORT: Marseilles/Marignane Airport about 60 km. distance.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

TELEPHONES: On application, telephones can be connected on board.

AUTHORITY: Port Autonome De Marseille, Capitainerie Des Bassins Ouest, B.P. 200, 13528 Port De Bouc Cedex. *Tel:* (42) 062226. *Telex:* 440164 Porfos. *Cables:* Porfos. *Contact:* Harbour Master.

NANTES: 47.14 N. 01.34 W. (See Plan)
ST. NAZAIRE: 47.17 N. 02.12 W.
DONGES: 47.18 N. 02.04 W.
MONTOIR: 47.18 N. 02.08 W.

DOCUMENTS:

Cargo Manifest or Manifest of Ballast.
Certificate of Cargo Space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.

PILOTAGE: Compulsory for vessels longer than 225 ft. owning radar/-VHF. Starts about 4 miles North of lighthouse of Le Pilier, on lightbuoy "SN 3". Pilot boat on station day and night, if weather conditions permit, West of a line drawn between "SN 3" lightbuoy and lightbuoy of "La Couronnee" about 2 miles N.N.E. If Pilot unable to come aboard he may invite ship to follow his boat until they have reached better shelter. Ships heading for one of the Loire estuary ports should give ETA at least 24 hours before arrival to Port Captain of Saint-Nazaire. Approximate time of arrival at "SN 3" buoy, the onward destination and speed should be given. VHF contact can be made direct with St. Nazaire pilot boat or "Estuaire de la Loire" pilot station.

ANCHORAGE: When Pilot service withdrawn, anchor near "SN 3" lightbuoy or in "Rade des Charpentiers". In rough sea ships heave to off harbour. In case of doubt contact pilot boat by VHF or phone. Sometimes Pilot taken aboard on "SN 3" is relieved by another who will board near the outer port of Saint-Nazaire or bring ship upstream. Vessels are not allowed to anchor before Quay Emile Cormerais and Chevire Power Station Embankment (cables).

MAX. SIZE:

St. Nazaire: South Entrance Lock: Max. LOA 200 m. Max. draft 9.30 m. Max. beam 28 m.

Montoir: Length 270 m., max. draft 15.5 m.

Donges: Length 350 m., max. draft 15.5 m.

Nantes: Length up to 225 m., max. draft 10.05 m., minimum 8.55 m.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique Master should radio Agent before arrival, advising full details.

RADIO: St. Nazaire Radio operates on 1687 MHz. It keeps a continuous watch on VHF Channel 16 and 2182 kHz.

VHF: VHF Radiotelephone must be used for giving information and obtaining clearance to navigate from the Harbour Master.

The following Channels and frequencies are used:

Channel 16	Frequency: 156.8 MHz
Channel 12	Frequency: 156.6 MHz
Channel 6	Frequency: 156.3 MHz

The Pilots can be contacted on VHF Channels 16 and 12.

A continuous watch is maintained on Channels 16 and 12.

RADAR: The radar service can be contacted on VHF Channels 16 and 12.

TUGS: *Nantes:* 4 "Abeille" tugs 500 to 550 h.p.

Donges – Montoir – St. Nazaire: 7 tugs 1,250 to 3,200 h.p. They are provided by "Union des Remorqueurs de l'Ocean".

BERTHING:

St. Nazaire: Is a port with locks. Max. draft: 30 ft. 06 in. (vessels up to 20 – 25,000 d.w.t. in the best conditions of tides).

Dock Water Density: 1003 to 1025.

Length of Quay: 2,700 m.

Number of Berths: 15.

Numerous cranes up to 12 tons and a 400 ton derrick.

Traffic: Timber, heavy loads, metallurgical products, refined products, fertilizers, grain (capacity of the grain silo: 10,000 tons. Loading rate 400 t.p.h.), oil seeds, phosphates. Tanker berth – Deballasting station. Ro/Ro operations can be carried out.

Montoir: Port Authority use own steel cables to supplement ship's ropes.

Dock Water Density: 1000 to 1020.

Specialised Facilities: Ro/Ro Berth – Max. LOA 130 m. Warehousing and 36,960 sq.m. of back up land.

LNG: 2 privately managed berths can receive gas-carriers up to 125,000 cu.m. Also see "Shipmasters Report" dated "June 1980".

Dry Bulk: Length of quay 630 m., cranage 2×15 tons, 5×15/30 tons average throughput per crane 500 t.p.h. Storage facilities.

Traffic: Oil seeds, oil cakes, timber, coal, soya pellets, fertilisers.

Liquid Chemicals: Connections for acids and liquids, molasses average throughput: 600 t.p.h.

Container Terminal: Length of quay: 160 m., max. draft 12.0 m. Storage facilities, 2×25 ton cranes. Ro/Ro vessels with side ramps also berth. 24 power points for refrigerated containers.

Coal: A coal berth is operational to receive ore carriers up to 140,000 d.w.t., rate 2,500 t.p.h.

Donges: Mooring of vessels to Dock No. 3 is performed with ship's ropes. On Dock Nos. 4, 5, 6 and 7, Port Authority use own steel cables to which ship is secured to supplement her own ropes.

Berth Nos. 5, 6 and 7: To reduce the time of mooring a special mooring gang can be put at Master's disposal for arrival and departure. Arrangements must be made 48 hours in advance of this service. Permanent watch on VHF Channel 16 is recommended.

Tanker Berths: Can receive fully loaded tankers of 120,000 – 140,000 d.w.t. or the 280,000 d.w.t. lightened. Number of berths 7.

4 berths are designed for handling refined products and LPG. Throughput: 1,500 to 5,000 cu.m./hr.

3 berths are designed for discharging crude oil. Throughput: 10,000 cu.m./hr.

Crude Connections: No. 5 Berth 4×12 in. Chicksan arms, 12 holes type 150 lbs. No. 6 Berth 5×12 in. No. 7 Berth 5×16 in. Chicksan arms. 12 holes type 150 lbs. Reducers available, notice required prior to arrival.

Bunkering Lines: No. 5 Berth 8 in. Chicksan arm with 6 in. connection. No. 6 Berth, 6 in., 8 in., or 12 in. No. 7 Berth 16 in.

Paimboeuf: On the South Bank opposite Donges. One berth length 183 m., max. draft at LW 3.0 m. Berth can accommodate 2 small vessels of 80 m. length or 1 vessel of 120 m. length. The berth is used as a waiting berth for oil barges and small vessels.

Nantes: Vessels may be moored with bow facing up or downstream. During heavy flood periods, however, bow to face upstream.

Dock Water Density: 1000.

Quai Chevire: Traffic: Timber and containers. 3 berths. Cranes up to 25 tons. Two 15 to 25 ton cranes are able to operate together, providing a 25 ton to 45 ton lifting capacity. Spreader available for handling 20 ft. containers (about 20 containers per hour). Storage facilities.

Quai Wilson: Length 1,472 m., 13 berths. Traffic: Heavy loads and containers in the Eastern part.

Phosphates, coal, pyrites, sulphur, salt, sugar, fruits and vegetables. Storage facilities. Numerous cranes up to 60 tons capacity.

Quai Roche-Maurice: 6 berths. Cranes up to 6 tons capacity. Discharging: phosphates, grains (loading rate 700 t.p.h.), molasses, fertilizers. Storage capacity of the grain silo: 80,000 tons.

Additional facilities for discharging oil and coaltar, chemical products, wine and various cargoes, length of quays: 1,500 m.

CRANES: 60 ton heavy lift crane at Nantes. 400 ton derrick at St. Nazaire.

BRIDGES: Vessels coming up the river to Montoir, Donges and upstream pass underneath the St. Nazaire bridge: Clearance 61 m.

STEVEDORES: Available.

MEDICAL: Facilities available at any time.

TANKERS: See "Berthing".

Degassing and deballasting operations possible at St. Nazaire, capacity 1,700 cu.m.p.h.

FRESH WATER: Available at docks.

FUEL: Available in any grade or viscosity. Advance notice of at least 2 days must be given if vessel has to bunker on Saturday or Sunday. Otherwise, delivery within 36 hours by barge.

FIRE PRECAUTIONS: Usual precautions for tankers in neighbourhood of refineries. No fire, no smoking, Ground wire for ship.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Done by crew.

IDENTIFICATION CARDS: Not needed.

CONSULS:

Algeria	74.38.19	Netherlands	47.16.31
Belgium	71.57.10	Norway	71.33.35
Brazil	47.72.21 22.41.46	Portugal	73.05.04
		Spain	48.67.95
Denmark	71.89.13	Sweden	(46) 34.00.67
Finland	75.53.08	Switzerland	71.67.66
German (Fed. Rep.)	73.29.46	Tunisia	71.10.52
Greece	73.46.13	United Kingdom	71.08.50

REPAIRS/DRYDOCKS: Very good facilities exist for all types of repair work.

St. Nazaire: "L. Joubert" graving dock, length 350 m., width 50 m. Dock can accommodate ships up to 240,000 d.w.t.

Repair Pier: Dredged bed size: 720 m.×60 m; depth 8 m. Can accommodate ships up to 250,000 d.w.t. Waiting Station. Deballasting station.

Dry Docks: No. 1 Ships up to 40,000 d.w.t. No. 2 Ships up to 1,500 d.w.t. No. 3 Ships up to 6,000 d.w.t.

Nantes: One 4,500 ton floating dock accommodating ships up to 130 m. long. One careening unit of 1,700 ton accommodating ships up to 100 m. long.

CUSTOMS ALLOWANCES: Tobacco: 300 cigarettes or 75 cigars. Wine; 7 pints. Spirits: up to 22° – 5.3 pints, beyond 22° – 2.7 pints. Coffee: 26 ozs. Tea: 5 ozs.

AIRPORT: *Nantes:* Good connections with French internal network (Air Inter) and also international, mainly with stop-over Paris. 5 daily flights to the capital. Direct flights to Bordeaux, Lorient, La Rochelle, Lyon, etc. *St. Nazaire:* 2 daily flights to Paris.

TIME: GMT plus 1 hour, seasonal alteration.

HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.

POLICE/FIRE/AMBULANCE: Police 17; Fire 18; Ambulance 18.

TELEPHONE: Arrangements are possible.

SHORE LEAVE: No restrictions.

SHIPMASTER'S REPORT: June 1980.

Montoir: (Discharging ammonia) – See "Plan".

Approaches: B.A. 3216, 2989 and 2647, outer coverage not very good. Arrived in good visibility so shore lights gave good positions. Ile de Yeu does not show up very well on the radar until only about 16 miles off. The light on Ile de Yeu is listed on different charts as having different characteristics and in fact agreed with that in the Light List. The mainland showed up for some considerable distance but no worthwhile details were identified until well up to "SN1" buoy.

The light on "SN2" was seen about the same time as "SN1" and is much brighter. Both buoys were seen on radar at ten miles. As there are many fishing vessels, identification of these buoys in poor visibility would require a great deal of care.

Once in the "tanker channel" proceed to the pilot station as indicated on the chart.

NOTE: Remember the standard message to "Surnav France" for a tanker carrying hydrocarbons.

Pilotage: Contact made on Channel 16, working Channel 12. Good communications.

Pilot cutter is a large vessel which will come close alongside and send away a small boat. Pilot ladder virtually to the water.

The cutter surprised us by steaming towards us at full speed and we eventually met some 3 miles West of the boarding area.

Vessel may only berth (and unberth) at slack water at Montoir. Being loaded means having to arrive at the top of the tide, although if in ballast one may sail at low slack water. Should any supertankers be moving at that time, presumably having booked their tide first, vessel will not be allowed to sail. The Pilot could not confirm whether incoming ships had priority.

NOTE: Unberthing tugs and Pilot to be booked by 1800 hrs. for the following morning. Vessel charged if unable to meet that particular slack water after ordering.

Three tugs used for berthing and unberthing; tugs lines, 1 forward, 1 aft and 1 pushing amidships. Backsprings sent away first.

When unberthing vessel moves upstream to turn.

Mooring boat to handle ropes.

NOTE: There were a lot of buoys which are not marked on the chart due, no doubt, to extensive dredging operations and spoil ground dumping.

Length of pilotage to first line ashore 1 hour 30 minutes.

Berth: Consists of a small "T" jetty with a line of dolphins standing proud of it by 1.5 m. These extend from just forward of the accommodation to No. 1 tank dome, 150 m. approx.

Mooring arrangements were adequate and the linesmen were reasonably adept.

Shore gangway must be used.

It is necessary to rig the low extension to the liquid manifold as the shore chicksan has insufficient upreach. Invariably berthing port side alongside.

Storing: Prior to this call the berth operators allowed vessels to take on provisions and foodstuffs but port regulations forbid the loading of machinery items or heavy lifts during discharge.

The derrick only plumbs the after corner of the "T" jetty and all items have to be manhandled from the gate to the derrick hook.

If any items of machinery are to be landed or loaded, it is necessary to do this either before discharge or after completion; the port authorities insist on the chicksan being disconnected, merely stopping discharge is not sufficient.

Similarly they will not allow a fork lift truck to operate on the berth during pumping operations.

Lube oils were taken at this call and we were able to continue this during discharge, simply because the lines were connected before the chicksan and the lorry was still parked outside the jetty access.

However, after discharge, protest was made against the very low discharge rate and frequent stoppages; the berth operators were most upset by this and have sworn that NO STORING will be allowed there in future. This situation will obviously have to be checked very thoroughly in the event of having a large storing/lube oil programme. Barges are not allowed alongside during discharge.

Discharge: As already noted the low load/discharge line must be rigged on the port side prior to arrival.

There is no vapour return line. Ship supplied 10 in. reducer.

Storage capacity ashore is about 25,000 tonnes.

On arrival there was only a reported 2,000 tonnes in the shore tanks and they were therefore warm with consequent problems for the initial discharge. Apparently these tanks are loaded from the top, the liquid being allowed to free fall to the bottom. In the first 24 hours the discharge rate was little more than 80 t.p.h. and there was a total of 5 hours 29 minutes stoppages at shore request. We could not discover whether this was usual or if it was due to some uncommon machinery defect.

On boarding, the receivers quoted a maximum rate of no more than 400 t.p.h. and probably no more than 300 t.p.h. In fact, once the shore problems were resolved we rapidly increased to 550 t.p.h. and then up to 800 t.p.h. at times. At all times ship discharged to shore requirements, shore personnel at the chicksan communicating with the officer of the watch, but only by coming on board. No telephone contact, no walkie-talkie.

A telephone was put on board by the Agents.

Port Regulations require ship to maintain continuous VHF watch on Channel 16.

Receivers originally requested vessel to blow through lines on completion but this was not required.

Overall discharge rate 365 t.p.h.

Surveyor: Redwoods, figures taken on gauging of ship's tanks.

General: Fresh water available from quay, not costly.

Bunkers must come by barge, usual restrictions.

No film exchange possible unless with another vessel. If the depots at out ports have sufficient it may be possible to carry out an exchange if ample warning is given.

Chandler was quite good but closes over the weekend, plenty of warning should be given for unusual items.

Access to St. Nazaire by taxi, about 50 francs.

Papers: 2 Crew Declarations. 2 Stores and Bonded Stores Lists. Port Health Form; their own form, spares supplied. 1 Passenger Declaration, made up on board.

Applied for Radio Pratique but this was not granted prior to arrival.

Agents: Very good, very helpful with good representation on board. Local office in Donges, main office at Nantes.

Ballast: The river water is very dirty indeed, flood only being marginally less so than the ebb. High injection points only should be used.

If at all possible ballasting should only be carried out from about half flood to just beyond HW to minimise the amount of deposits within the ballast tanks. Even then an immediate programme of flushing tanks should be put into effect on clearing the river.

Density varied between 1025 and 1010.

AUTHORITY: Port Autonome de Nantes – St. Nazaire, 2 Place de L'Edit de Nantes, B.P. 1053, 44037 Nantes-Cedex. *Tel:* (40) 89.19.94. *Telex:* Poronom 700425 F. *Contact:* Harbour Master – Upstream: 18 quay Ernest Renaud, 44000 Nantes. *Tel:* 71.70.70. Downstream: 3 bis, boulevard de Verdun, B.P. 422, 44606 Saint-Nazaire. *Tel:* 40.22.08.46. *Telex:* 700912.

AGENT: Jolasry (France), 44 Boulevard Paul-Leferme, Saint Nazaire. Telex: 71931. Tel.70-01-18.

NICE: 43.42 N. 07.17 E. (See Plan)

PORT LIMITS: The Port is situated in the N.E. part of the Baie des Anges (Bay of Angels) between the castle hill and the Boron Mount which form at the Nice Cape a rocky promontory towards the South.

DOCUMENTS: The Master of a vessel, when he arrives, is required to fill out an entry declaration, a copy of which is handed to him by his Agent or by the Port Captaincy.

A Crew List and a List of Passengers intended for the Port Commissariat must be drawn up before arrival at the port.

All documents required by marine regulations, i.e. health declaration, manifest, vessel's safety plan etc., . . . are required by the port services.

PILOTAGE: The pilot station operates 24 hours a day and is attended by 2 licensed Pilots. Pilotage is obligatory for vessels of LOA 50 m. and over. Pilotage is exempt for vessels of less than 50 m., and if they are equipped with VHF, vessels of less than 70 m. The licence of Pilot is valid for vessels of a length equal to or greater than 120 m. equipped with a bow thruster and VHF. Specialised vessels carrying liquid oil, gas, and toxic products are subject to pilotage.

The pilotage area of Nice-Villefranche extends as far as 3 miles from the coast between the meridians of the left bank of the Var (07° 12′ E.) and of Cap Ferrat (07° 20′ E.). Vessels must, if possible, give warning of their arrival 24 hours in advance, particularly if they intend arriving during night-time hours.

Pilots may be called up by regulation signals during the day and night or by radiotelephone to Grasse Radio or Monaco Radio both stations on VHF Channel, telephone Nice Station (93 85 52 41) or to the Port Captaincy (Tel. 93 89 50 85).

ANCHORAGE: The coast being very rocky, does not allow anchorage close to the port. The Villefranche Roads, on the other hand, offers a sheltered zone, giving very good anchorage facilities. In the Villefranche Roads, 2 buoys can be used with the permission of the Nice Captaincy, by vessels merely calling at the port or waiting for a place on the quay at the Port of Nice. There is access for vessels of all dimensions.
RESTRICTIONS: The transport and handling of dangerous or infected materials, within the limits of the Nice Port, are subjected to the requirements of decree of the 1st February 1951 which controls the transport and handling of dangerous materials in maritime ports. There is no operation in this respect at night.

All operations, prescriptions, order and stipulations as laid down in the general regulations and the local regulation covering "Port Services" are governed by the Port Commandant.
MAX. SIZE: The commercial port is accessible to vessels of 145 m. in length and 7.0 m. draft.
HEALTH: Health control at the frontiers is subject to the measures prescribed by the international health conventions; the functions of health police and health guard are entrusted to an Agent in the service of Health. Urgent medical help can be obtained through the intermediary of the radio stations of Monaco and Grasse who establish contact directly with the department concerned.
VHF: Port Officer is on duty 24 hours a day and listens on Channel 16. Working on Channels 12 and 9.

There are two Channels, i.e. 9 and 12 for communication purposes. No communication of a private nature may be handled.
RADIO: Monaco Radio.
RADAR: None.
TUGS: None.
BERTHING: Length of usable quays 1,600 m. having a depth of 5.0 m. – 7.50 m. and 10 berths available.
CRANES: Quai Infernet: 2×5 tons cranes on rails (scoop and hook).

Ribotti: 1 crane on rails of 3 tons capacity (hook).

Commerce: (Commercial Quay) 2 cranes on rails of 6 tons capacity (scoop and hook).

Commerce: (Commercial Quay) 2 hoppers of 50 cu.m. capacity – on rails. 2 Nellen cranes on tyred wheels, capacity 4.2 tons at the end of the jib and 8 tons at 6 m. (with tackle block).
CARGO HANDLING FACILITIES:
Material Handling Equipment: All the handling equipment is supplied by the stevedores. 1 forklift of 4 tons capacity and 11 forklifts between 4 and 8 tons capacity.
Storage Facilities: 45,000 sq. m. of open air areas. Specialised equipment for the discharge of bulk equipment (pyrite, clinker, mineral etc.)

Unloading or loading capacity – cement 1,400 tons per day; various: 400 tons to 700 tons per day and per gang; ores in bulk: 1,200 tons per day with 2 hoppers, 2 cranes and 2 gangs.
Facilities for Specialised Goods: 4 adjustable platforms for Ro-Ro traffic. Height of quays 1.23 m. and 3.06 m.
BRIDGES: None.
STEVEDORES: 87 professional dockers; 10 occasional dockers.

Employer – Bureau Central de la Main d'Oeuvre (B.C.M.O.) of the Port of Nice.
MEDICAL: Hospitals are situated in the town and give excellent treatment in the case of accidents or illnesses of any nature whatsoever.

Passengers coming from foreign countries are required to abide by the prescriptions of international agreements (vaccination certificates, health certificates, etc.).
TANKERS: No facilities.
DENSITY: *Salinity:* Varies between 34 gm. and 38 gm. per litre.
FRESH WATER: It is possible to take on fresh water at all quays by connection to the main supply. Average rate of supply 15 t.p.h. – price 7.67 Fr. per ton.
FUEL: All types available.
FIRE PRECAUTIONS: The town provides fire fighting facilities. The fire station is close to the Port.
CONSULS: Algeria, Germany F.R., Austria, Belgium, Brazil, Colombia, Ivory Coast, Republic of Benin, Denmark, Dominican Republic, Spain, U.S.A., Finland, Gabon, Greece, Ireland, Iceland, Italy, Liberia, Luxembourg, Mauritania, Monaco, Niger, Norway, The Netherlands, Peru, Philippines, St. Marino, Sweden, Switzerland, Tunisia.
REPAIRS: All possible deck and engine repairs can be carried out. There is no dry dock. Hull careening is carried out by underwater procedure.
SURVEYORS: Lloyd's of London, The Coasting Mediterranean Company, The Venturer Company, Weir (S.A.), Societe Azureenne de transports et d'affretements Maritimes, Societe Nationale Maritime Corse, Mediterranee, Pittaluga & Co., Martini & Co., Cie Charles le Borgne, Cie Fabre, Cie Fraissinet, Cie Messageries Maritimes, Nautilus Line, Barry Rogliano et Cie.
HATCHES: Hatches are opened and closed by crew.
CUSTOMS ALLOWANCES: 30 cigarettes per person per day; 1 litre of aperitif per 6 persons per day.
REPATRIATION: Airport and railway network in the town.
AIRPORT: International Airport 4 km. from the Port. Principal countries are served by international airlines.
TIME: GMT plus 1 hour (Winter). Summertime kept from April to October.
HOLIDAYS: These are staggered as far as dockers are concerned so that there is continuity of operation.
POLICE/AMBULANCE/FIRE: Police Tel: 93 55 91 22 and 17; Ambulance Tel: 93 89 70 70 and 18; Fire Brigade Tel. 93 89 80 80 and 18.
TELEPHONES: Telephones can be installed on board at Papacino Quay, Entrecasteaux Quay, Quai du Commerce, Quai de la Traverse, and Quai Ribotti.
SHORE LEAVE: Crew members may disembark after checking with Police.
IDENTIFICATION CARDS: For foreign seamen a permit to come ashore is issued by the Port Police.
GENERAL: There is a bus and taxi service very close to the port also there are coastal trading entities within the Port precincts.
AUTHORITY: Departement des Alpes-Maritimes, Direction de l'Equipement, Subdivision Maritime, 2 Quai d'Entrecasteaux, B.P 3, 06 Port de Nice. *Tel:* 93 89 44 90. *Contact:* E. Bovis, L'Ingenieur des T.P.E., Chef de la Subdivision MAR. I. Port Captain, Tel: 93 89 50 85.

PARIS: 48.51 N. 02.20 E. (See Plan)

PORT LIMITS: Within 1 km. of loading or discharging berth or, if occupied by another vessel, where the Pilot will place the vessel in agreement with the consignees.
DOCUMENTS: As Rouen is considered as the frontier port for vessels entering or leaving the Seine above this port (estuary to Rouen is known as "Seine Maritime", Rouen to Paris and beyond as "Seine Fluviale"), documents relating to vessel, crew, passengers, cargo, health, etc., are exactly the same as for Rouen and must be presented to the Agent on arrival in this port. If the vessel has never traded to ports inland from Rouen, technical inspection may be carried out in Rouen on first voyage.
PILOTAGE: As for Rouen, except that in spite of Rouen Agents being notified by Le Havre pilot station of vessels' time of entry into Seine and ETA Rouen, also in most cases of the final destination of vessel, Masters should notify by radiotelephone Rouen Agents before entry into Seine of the final destination so that "Seine Fluviale" Pilots are waiting to take the vessel from Rouen to inland destination.
ANCHORAGE: See "Rouen".
RESTRICTIONS: Above Rouen, night navigation possible on request to Rouen Agents.
MAX. SIZE: 120 m. length, 15.5 m. beam, 3.5 m. draft up to Paris; beam reduced to 11.4 m. and draft to 3.0 m. on River Oise and River Marne up to Bonneuil or even 2.8 m. on River Seine beyond Paris; airdraft is limited at 8.75 m. up to Gennevilliers, at 6.0 m. beyond Paris, on River Oise and River Marne up to Bonneuil and at 5.5 m. on the upper section of River Seine (Montereau facilities).
HEALTH: See "Rouen".
RADIO/VHF: Vessels arriving in Seine Estuary are automatically notified to Rouen Agents. Any special messages to inland Agents or Receivers should be made by radiotelephone direct or via Rouen Agents, or by VHF to Rouen Agents when in "Seine Maritime". Pilot can always help Masters to send these messages via pilot stations. In the "Seine Fluviale" all locks have VHF and telephone by which messages can be relayed in case of accident, breakdown or delays. Pilot notifies inland Agents by telephone of such incidents.
RADAR: There is no radar service in the "Seine Fluviale". Bridge piles are equipped with radar reflectors.
TUGS: No offical tug service on "Seine Fluviale", but in case of breakdown, local tugs may be hired.
BERTHING: Many public or private facilities may be reached; main public ones are:

Quay	Quay Length (m.)	Draft (m.)	Shed Capacity (sq.m.)	Remarks
Bonneuil	3,500	3.0	24,000	Container terminal with 40 ton mobile crane.
Gennevilliers	8,000	3.5	89,000	Container terminal with 30, 12 and 6 ton lift trucks; Ro/Ro and heavy lift facilities.
Conflans-Ste Honorine	1,400	3.5	2,000	
Limay	1,600	3.5	21,000	3×20 ton travelling cranes; Ro/Ro facilities.
Saint-Ouen l'Aumône	200	3.0	—	
Bruyères-sur-Oise	600	3.0	—	

CRANES: All types of cranes available from leasing or handling firms.
BULK CARGO FACILITIES: 3×1,000 t.p.h. bucket wheels for coal unloading at Vitry-sur-Seine, Champagne-sur-Oise and Porcheville power stations.
SPECIALISED CARGO HANDLING FACILITIES: Containers handled at Gennevilliers and Bonneuil-sur-Marne; Ro-Ro facilities at Limay, Gennevilliers (cars) and Evry (heavy loads); reinforced quay for heavy loads at Gennevilliers.
BRIDGES: See "Max. Size".
STEVEDORES: Available.
MEDICAL: See "Rouen".
DENSITY: River fresh water beyond the first lock.
FRESH WATER: Available at most quays.
FUEL: One barge delivers fuel and water.
CONSULS: Nearly all countries represented in Paris.
REPAIRS: *Main Yards:*

Chantiers Navals d'Achères, La Croix d'Achères 78260 Achères. Tel: (1) 3911.02.27. Telex: 697703 Cnacher.

Société Française de Construction Navale, 66 quai Alfred Sisley, 92390 Villeneuve-la-Garenne. Tel: (1) 4794.64.46. Telex: 610998 Fracona.

Chantiers Navals de la Haute-Seine, rue des Voeux Saint-Georges, 94290 Villeneuve-le-Roi. Tel: (1) 4597.31.60. Telex: 691674 Auseine.
DRY DOCKS: Slips in the yards above. 1×1,250 ton synchrolift in Acheres (73 m.×13 m. platform).
SURVEYORS: Bureau Veritas, Lloyd's, American Bureau of Shipping and Norske Veritas have surveyors in Rouen or Paris.

GANGWAY/DECK WATCHMEN: Not normally considered necessary.
HATCHES: Normally opened by crew.
CUSTOMS ALLOWANCES: Same allocation per man per day as Rouen with allowance made for inland voyage.
AIRPORT: Paris "Charles de Gaulle" and "Orly".
TIME: GMT plus 1 hour (Winter), GMT plus 2 hours (Summer).
HOLIDAYS: See "Rouen".
TELEPHONES: Not available, but telephone always within short distance of quays.
SERVICES: Compass adjusting may be arranged by Rouen on outward trip.
SHORE LEAVE: Seamen's book sufficient.
AUTHORITY: Port Autonome de Paris, 2 quai de Grenelle, 75732 Paris Cedex 15. *Tel:* (1) 4578.61.92. *Telex:* 204487 Poronom, Paris. *FAX:* (1) 45.78.08.57. *Contact:* Bruno Grange, General Manager. Rémi Loth, Head of Public Relations.

AGENT: Jolasry (France) S.A., 26, Avenue de l'Opera, 75001 Paris, France. Tel: 42 96 14 15. Telex: Lasry 210905, Cables: "Jolasry Paris".

PORT-VENDRES: 42.31 N. 03.07 E. (See Plan)

DOCUMENTS:
- 3 Crew Lists.
- 5 Passenger Lists.
- 2 Store Lists.
- 1 Maritime Health Declaration.
- 4 Cargo Manifests.
- 2 Bills of Lading.
- Ship's Papers: Nationality Act, International Tonnage Certificate.

PILOTAGE: Three long blasts. ETA required for Agent, Pilot usually taken on outside unless in very bad weather. Call Pilot on Channel 16, 30 minutes before arrival.
MAX. SIZE: Max. length 150 m. max. draft 25-26 ft.
HEALTH: Usually Customs give Free Pratique. In event of suspected disease or fever on board must advise naval doctor.
RADIO: Marseille Radio (or St. Lys Radio) or Perpignan Radio.
TUGS: None available.
CRANES: 1 shore crane available only of 55 tons.
SPECIALISED CARGO-HANDLING FACILITIES: 2 Roll-on/Roll-off berths, 1 refrigerated warehouse 11,000 cu.m., and 1 warehouse of 1,200 sq.m. with temperatures regulated at 10° centigrade.
STEVEDORES: ETA to be given to Agent in order to arrange gangs (usual rate per day. 8 normal working hours). 200 tonnes per gang.
MEDICAL: Perpignan Hospital (30 km. away).
TANKERS: Berth for wine tankers with pipe-line.
DENSITY: Salt water.
FRESH WATER: Supplied by Chambre de Commerce, Port-Vendres.
FUEL: For small craft only, otherwise delivery by trucks.
DRY DOCK: 1 travelift for craft up to 150 tons.
SURVEYORS: Available from Sete or Marseilles.
OPENING/CLOSING HATCHES: Normally to be carried out by crew (or as per charter party if any).
CARGO GEAR: Load/discharge effected by ship's gear.
GANGWAY/DECK WATCHMEN: Recommended if loading dangerous cargo.
CERTIFICATES:
- Load Line Certificate.
- International Tonnage Certificate.
- Derat Certificate.

CUSTOMS ALLOWANCES: See "Calais".
IDENTIFICATION CARDS: Only seamans book required.
REPAIRS: Minor repairs only.
AIRPORT: Perpignan Rivesaltes (30 km.)
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: As for whole France – cargo work can be arranged on those days as overtime.
POLICE/AMBULANCE/FIRE: Tel. 82.00.60 or five long blasts. Officier du Port: 82.12.00.
EMERGENCY CO-ORDINATION CENTRE: Crossmed Toulon.
SERVICES: Workshop for small repairs, radio/radar repairs available, ship chandler for bonded stores, laundry.
STORING: Vessels can be stored by truck only, which are able to proceed alongside the berth. Fork lift trucks available. Customs Regulations in force.
SHORE LEAVE: Crew members are allowed ashore.
AUTHORITY: Service Maritime-Capitainerie du Port, 66660 Port – Vendres. *Tel:* 82.12.00.

AGENT: See "Paris".

PROPRIANO: Corsica, 41.40 N. 08.54 E. (See Plan)

DOCUMENTS:
- 3 Crew Lists.
- 3 Passenger Lists.
- 1 Provisions List.
- 1 Cargo List.
- 1 List of Articles (new and Customs-barred) in possession each crew member – cameras, binoculars, radios, cigarettes, spirits, etc.
- 1 Health Declaration.

PILOTAGE: Not compulsory.
ANCHORAGE: Outside port for cruise vessels.
MAX. SIZE: Draft 5 m.; length 160 m.
RADIO: Within 50 miles call Ajaccio Radio VHF Channel 16. Then connected over Channel 23 to telephone network.
TUGS: None available.
BERTHING: 3 basins, depths 4.0 m., 6.0 m. and 3.7 m. New Marina with 370 berths. Facilities include fresh water, electricity, telephone. Crane (12 tonne) available for lifting pleasure craft. Engine repairs also possible.
STEVEDORES: 24 hours accurate ETA necessary for ordering gangs. No work on Sundays and official holidays.
CARGO GEAR: Only a few nets and slings available; all other gear must be supplied by ship. Ship's derricks used.
FRESH WATER: Available at very slow pumping rate.
FUEL: Available. Tel: (95) 76-12-37.
REPAIRS/CONSULS: None.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
AIRPORT: Propriano Tavaria 6 km. Direct flights to Marseilles, Nice and Lyons in Summer. Daily connections Airport Campo del Oro/Ajaccio.
POLICE/AMBULANCE/FIRE: Tel. Gendermarie Propriano 76.00.17.
AUTHORITY: Administration du Port de Propriano, Quai St. Erasme, Propriano. *Tel:* (95) 76.10.40. *Contact:* Captain A. Duval, Port Captain.

QUIMPER-CORNIQUEL: 47.58 N. 04.07 W.

DOCUMENTS:
- Crew List.
- Passenger List.
- Customs Documents.
- Port Health Documents.
- Manifest of Cargo.
- Stores on Board.
- Ship's Papers.

PILOTAGE: Pilot Station, Tel: 910640. Contact via Le Conquet Radio or St. Nazaire Radio.

If vessel's ETA changes, telephone either the Agent or the Pilot at least 3 hours before arrival.

The pilot boat is a small black launch, white bulwarks with anchor painted on bow of each side, white cabin at the stern, one mast.

Only one Pilot on duty, but will meet ship at the time given in their ETA. Pilot boards either on the bearing 346° with Lighthouse of Benodet and du Coq in alignment, or on the bearing 000° with Lighthouses of Benodet and Combrit in alignment. Vessel should come as near as possible to the entrance, Vessels are anchored at the port entrance, or in the river, and await the tide, or proceed directly to the port.

In case of bad weather, when the Pilot may not embark, vessel to follow the pilot launch on the bearing 346° up to Plage du Trez, where boarding is possible. Vessels at anchor awaiting Pilot should get under way to approach the pilot boat on the bearing 346° when they see the launch approaching.

ANCHORAGE: Depths of 11 m. in position with the Taro Tower, bearing 245°; distance 0.8 miles.

Depths of 6 m. in position with the Point of Combrit bearing 000°; distance 0.5 miles.

Depth of 9 m., bottom sand and mud, in Du Trez Anchorage at the mouth of the Odet.

RESTRICTIONS: Vessels arriving at night must anchor outside the port entrance. It is dangerous to enter the river at night as there are no lights, and the channel is restricted by yachts at anchor.
MAX. SIZE: At spring tides: length 78 m.; breadth 12 m.; draft 4.95 m. At neap tides: length 72 m.; breadth 12 m.; draft 3.40 m.
RADIO: The Port Superintendent requires 24 hours notice of arrival.
TUGS: No tugs available.
BERTHING: At one quay there is 226 m. length for coasters. One quay of 120 m. length for discharging sand. 3 cranes available.
TANKERS: There is a fuel/oil depot at Quimper-Corniquel supplied by coastal tankers from Donges. Max. draft for tankers at Quimper is 3.50 m. to 4.10 m.
FRESH WATER: 5 drinking-water hydrants situated on the quay, loading rate 12 t.p.h.
FUEL: Can be supplied by various companies from tanker lorries.
AIRPORT: Airport of Plugussan situated 5 km. from the port. 2 regular daily flights to Paris.
AUTHORITY: Ingenieur en Chef des Ponts Chaussees, Directeur Departemental de l'Equipement.
AGENT: See "Paris".

ROCHEFORT SUR MER: 45.56 N. 00.57 W. (See Plan)

For all general information refer to Tonnay-Charente.
MAX. SIZE: Max. permissible length: 116 m; breadth: 16 m. (ships must pass through a lock of 18 m. width).

Max. draft is 18 ft. at any tide, 21 ft. at Spring tides.

Lock: Length 104 m., width 18 m., depth 9.0 m.
POLICE/AMBULANCE/FIRE: Police 17; Ambulance 46.87.10.33.
AUTHORITY: Direction Departementale de L'Equipement de la Charente-Maritime, Service Maritime, Subdivision Maritime-Hydrologie, B.P. 125, Avenue William Ponty, 17306 Rochefort-Sur-Mer Cedex. *Tel:* 48.99.01.47. *Contact:* M. Verbiege, Surveillant de Port.

ROSCOFF: 48.43 N. 03.59 W. (See Plan)

PILOTAGE: Send ETA at least 24 hours in advance. Pilot and Harbour Master listen on VHF Channel 16, 0700 – 1100 hrs., 1300 – 2200 hrs. Pilotage compulsory for vessels over 150 n.r.t.

Pilot boards 0.5 miles East of Astan Buoy.

ANCHORAGE: Anchorage and laying-by can be carried out in an area sheltered from S.E. and N.W. winds, bounded on the East by the "Basse Bloscon" and on the West by the "Menk" and "Duons" Reefs.

VHF: Pilot and tugs on VHF Channel 16 throughout 24 hours.

Signal Station on the Isle of Batz: Tel: 98.61.76.06 or VHF Channels 12 and 16.

Signal Station at Brignogan: Tel: 98.83.50.84 or VHF Channel 16.

Signal Station at Ploumanach: Tel: 98.23.21.50 or VHF Channel 16.

BERTHING: Safely accessible pier 150 m. long with 7 m. of water at lowest tides (planned: extension by 175 m.).

Quay 90 m. long with 4.5 m. of water at lowest tides.

Quay 120 m. long with 5.0 m. of water at lowest tides.

Storage warehouses (1,200 sq.m.).

Weighbridge (60 tonnes).

20 acres of parking facilities and other space.

Cranes available on request.

Electric power supply on all quays.

With strong N.E. winds, conditions in the harbour can be uncomfortable.

Minimum depths as per "Plan". Range of tide 7.6 m. maximum.

Cargoes Handled: Car Ferries – Inward: Fish and shellfish, milk, china clay, meat and cattle, steel, machine parts, paper, etc.

Car Ferries – Outward: Vegetables, fruit, meat, paper, machine parts, steel, eggs, plastics, milk powder, etc.

Freighters – Inward: Sand and marine aggregates, ammonia sulphate, fertilisers, wood, peat, shellfish, etc.

Freighters – Outward: China clay, scrap iron.

CRANES: 2.5 tonne mobile available.

FRESH WATER: Piped on to quays.

FUEL: By road tanker.

AIRPORT: Airport at Morlaix, 13 miles away, flights to Plymouth on Tuesday, Thursday and Sunday. Daily flights to London (Gatwick).

TELEPHONES: Payphones available at the Ro/Ro terminal.

SERVICES: Laundry available at Roscoff.

Chandler at Brest. The Agent can arrange for small quantities to be delivered from the hypermarket at St. Pol de Leon, 2 miles.

GENERAL: Customs are based at the Ro/Ro terminal.

Daily car ferry service to Plymouth, weekly to Cork. Local train service.

AUTHORITY: Chambre de Commerce et d'Industrie de Morlaix, 14 Place des Otages, B.P. No. 6, 29201 Morlaix Cedex, France. *Tel:* 98.88.61.74. *Telex:* 940696. *Contact:* Roscoff Port Office, Tel: 98.61.27.85. Roscoff Harbour Master, Tel: 98.61.27.84.

ROUEN: 49.28 N. 01.04 E. (See Plan)

DOCUMENTS: Cargo Manifest or Manifest of Ballast. Certificate of Cargo Space. Bills of Lading. Ship's Register. 6 Crew Lists. 3 Passenger Lists. Health Declaration. Derat Certificate or Exemption. Declaration of Crew Personal Effects. Certificate of Insurance for Oil Pollution Damages (tankers over 2,000 tons).

PILOTAGE: Vessels proceeding to the ports of Rouen and Honfleur are met by Pilot on La Carosse Roads (Rade de La Carosse). Pilotage is compulsory between the mouth of the Seine and Rouen. Vessels of 55 m. length and less can be exempt from the obligation for the lower sector of the river, and vessels of 45 m. and less for the upper sector, on condition that such vessels be equipped with suitable radar, with VHF sets and able to speak French, and that they are not carrying dangerous goods. Each vessel taking a Pilot for the downriver stage between La Carosse Roads and Caudebec, or vice-versa, and a Pilot for the upriver stage between Caudebec and Rouen, or vice-versa.

The following signals should be made for summoning a Pilot on La Carosse Roads: By Day: flag "G" of the International Code of Signals. By Night: in morse by signalling lamp. Failing this, the vessel should hoist her national ensign at the foremasthead.

The following additional signal can be made: 5 prolonged blasts (– – – – –) to call attention to Pilot.

The radio station "Rouen-Pilot", located in the radar tower at Honfleur keeps a permanent watch day and night on VHF Channels 16 and 73. Masters are requested to call this station when arriving on the Roads.

Vessels leaving harbour or shifting berth should apply for a Pilot to the Pilotage Office, 21 Avenue du Mont-Riboudet, Rouen (Tel: 35-71-68-50)

Helmsman: Masters and Owners are advised that temporary crew members including helmsmen for the river are available from the Boatmen Association of Rouen. In the case of an incoming ship, they should be requested by cable to Harbour Master at least 6 hours before arrival in roads.

ANCHORAGE: In the outer roads at La Carosse and at several places in the river.

One waiting berth on buoys at Villequier and one on dolphins at Vatteville.

RESTRICTIONS: The height of water above chart datum at Le Havre is broadcast by Honfleur VHF radar station on request.

MAX. SIZE: Vessels over 280 m. length have entered. Draft approximately 3.5 m. more than height of tide at Le Havre. Maximum about 37 ft. Port accessible to vessels of 40,000 d.w.t. fully laden and 110,000 d.w.t. partly laden.

HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive free pratique, Master should radio Agent before arrival, advising full details.

RADIO: Vessels are obliged to give their ETA and draft in salt water at least 5 hours before arrival to Rouen Information Centre via Brest – Le Conquet Radio or Boulogne Radio. The Port of Rouen Authority has introduced a VHF network of frequency modulation for port needs working on the following frequencies: Channel 16 (156.800 MHz); international safety and watch frequency. A permanent watch is maintained on this frequency at the Information Centre of the Port of Rouen.

Channel 73 (156.675 MHz) compulsory frequency to be used by all ships, boats, ferries . . . in movement between the pilot boat station and Rouen.

Channel 11 (156.550 MHz) secondary working frequency.

Special Process for Tankers and Vessels Carrying Dangerous Goods in Bulk: For oil tankers it is compulsory, before entering the 12 miles limit, to have a VHF contact with Rouen-Pilot or with Rouen-Port, and to keep permanent VHF watch till the ship is back out of this limit.

Tankers over 250 m. length or 12 m. draft must wait for Pilot 7 miles from shore, others can come to La Carosse Roads, passing half mile South of Buoy Le Havre and remaining always South of a line marked by the buoys LH and RN.

They have obligation to announce every fault in engines, anchors or windlass, steering gear, radar, mooring gear, and their Masters must sign an inquiry paper given by the Pilot when coming on board.

PORT RADAR: Two radar stations are located respectively at the East of Honfleur and on the right bank of the river 12 miles upstream at Radicatel.

Both stations are operated from Honfleur and work as navigational aids between the first buoys of the channel and Aizier, from 2 hours after until 8 hours after low water Le Havre.

To obtain information call on VHF Channel 16 (156.800 MHz) or 73 (156.675 MHz).

Information given by this radar, at ship's option, is considered as an aid only and implies no responsibility either to the Port Authority or its Agents in any subsequent recourse to such information, which is given free of charge.

TUGS: Permanently available in the Port of Rouen. Tug assistance in the River Seine is available on request.

MOORING: See "Notice".

BERTHING: The main Maritime Port of Rouen extends from the Guillaume le Conquerant Bridge as far as La Bouille over a distance of 11 miles. Quays and wharves cover the length of both banks of the Seine. There are also 5 basins in direct connection with the river without the interposition of any locks.

On the Right Bank: St-Gervais Docks; on the Left Bank: the Timber Dock, the Rouen-Quevilly Dock, the Floating Docks tidal basin, and the "Bassin aux Hydrocarbures" at Petit-Couronne.

The extent of quayage in the Maritime Port is about 38,000 ft., and in the river docks 5,900 ft.

Between the downstream limits of the Port of Rouen and the sea are a number of maritime establishments serving local requirements. The most important of these, all of them managed by the Port Authority of Rouen, being the petroleum terminal at Port Jerome and the quays of St. Wandrille (2,000 ft.) and Radicatel (1,380 ft.).

Containers: 2 berths at the Quai de l'Ouest (St.-Gervais Dock) with 2×25 ton cranes, 2 berths at Rouen Quevilly Dock with 2×25 ton cranes and 2×35 ton gantry cranes.

One private berth at Radicatel Quay with a gantry crane.

2 berths at Grand Couronne Moulineaux with 2×35 ton gantry cranes.

Roll-on/Roll-off: 4 berths in service of which 2 Roll-on/Roll-off berths at Petit Couronne and Quai de Rouen – Quevilly able to load or unload rolling heavy lifts up to 400 tons (max. draft: 10 m.)

Dock	*Quay*	*Facilities*	*Length* (m.)	*Depth at low water* (m.)

Honfleur	Honfleur		122	9.0

STEVEDORES: From Monday to Friday:

General working schedule; 0730–1130, 1330–1730, with possible overtime.

Special working schedule 0730–1330, 1330–1930, 1930–0130 or 1930–0430, 0130–0730.

On Saturday: for all ships 0730–1330 and 1330–1800.

MEDICAL: All facilities available. Vaccination Certificates required if vessels coming from a North African port. Yellow fever inoculations required if vessel coming from South of parallel 30° N.

TANKERS: Petit Couronne, Shell, 3 berths. One berth for vessels up to 250 m. length and 11 m. draft.

Port Jerome, Esso and Mobil Oil, 2 berths for vessels up to 11 m. draft (7 berths total).

Honfleur, Miroline – 1 berth for vessels up to 9 m. draft.

Deballasting facilities available at all berths.

Report: 1982.

Petit Couronne (Butane/Propane): Max. LOA 170 m. Bollards 40 m. downstream from loading arm and 30 m. upstream from loading arm. Vessels berth with bow to seaward. Max. draft 24 ft. (7.3 m.). Height of manifold above waterline 10.0 m. Max. distance between edge and manifold of ship 4.9 m. There is no special connection for the gas phase. Diameter of discharge arm 6 in. (300 ASA).

Report: 1985.

Port Approaches: Tankers carrying dangerous cargo, when approaching River Seine Ports need to be aware of the heavy traffic. When sailing inside the French Territorial Waters, these vessels have to follow special French Regulations as mentioned in Sailing Directions. For example, navigation is forbidden inside a 7 mile limit off the French coast without Pilot, except for anchoring in emergency or in some dedicated places; no crossing of Antifer, Le Havre entrance channels permitted within this 7 mile limit or during a VLCCs transit, etc.

In-Port: The Port Jerome berths' main short-comings are: The strong tide currents and the passing ships' effect when berthing/unberthing. VHF contact with Pilots of passing ships are very important as these can disturb the manoeuvre.

When berthed, moorings have to be strictly and frequently checked; they must be maintained tight as passing ships' effect is very significant, especially at LW.

Tidal Entry: The "River Seine Pilotage" issues a monthly recommended maximum draft for each HW for vessels proceeding to and sailing from River Seine ports. Water heights may be influenced by atmospheric (winds) and Hydrologic perturbations (flow of the river).

Ships have to use the tide to enter the river taking into account ship's draft, tidal currents and the possibility to moor the tanker at Port Jerome starboard side to during the last hour of flood stream. Tide also to be used when leaving Port Jerome berths.

Vessels may proceed by day or night.

In consideration of all above conditions, Pilot will advise any modification of the permissible draft taking into account a 2 ft. underkeel clearance.

DENSITY: Except at Honfleur, all berths are in fresh water.

FUEL: All grades available by barge.

CONSULS: The following countries are represented in Rouen: Algeria, Belgium, Denmark, Finland, Germany F.R., Greece, Netherlands, Norway, Portugal, Senegal, Spain, Sweden, Tunisia.

WATCHMEN: Recommended to employ watchmen on board tankers and vessels handling dangerous cargo.

HATCHES: Opening and closing hatches always performed by ship's crew.

REPAIRS: All deck, engine and radio repairs can be effected.

DRY DOCKS: Two floating docks, the largest of which is 180 m. long. 25 m. wide for vessels up to 14,000 tons.

SURVEYORS: Bureau Veritas, Lloyd's Register, Registro Italiano.

AIRPORT: Nearest Rouen-Boos. Le Havre – Octeville, 80 km. away. Paris – Orly or Paris – Roissy, 120 km. away.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Spring and Summer.

POLICE/FIRE/AMBULANCE: Police 17; Fire 18; Ambulance 15 or by VHF via Rouen-Port on Channel 73 (24 hours).

TELEPHONES: Can be connected on board at some berths.

IDENTIFICATION CARDS: Crewmen going ashore should carry passport or identity card.

HOLIDAYS: No labour available on the following days; New Year (1st January); Easter Monday; Labour Day (1st May); 8th May; Ascension Day; Whit Monday; National Day (14th July); Assumption Day (15th August); All Saints' Day (1st November); Armistice Day (11th November); Christmas Day (25th December).

SHIP SUPPLY SERVICE: In case of emergency (sick crew members, exceptionally urgent stores) a liaison can be established by launch with a ship when passing off Port-Jerome or off Caudebec.

NOTICE:

Notice to Masters:

General Instructions: Masters shall in all circumstances comply with Port Officer's orders either verbal, written, or given through the medium of Pilots and especially the orders regarding manoeuvring in the port, towage, berth, and mooring.

Mooring: The attention of Masters is particularly drawn to the provisions contained in Section 6-01 of the Police Regulation in the Port of Rouen and River Seine (issued June 26th 1974), which stipulates as follows:

1. Vessels can moor either bow upstream or downstream, unless particular orders are issued by the Port Officers.
2. Vessels must moor with a sufficient number of bow and stern ropes, breast ropes and springs according to their deadweights. If possible each line must be fastened on a different fixed point.
3. The mooring must be homogeneous, this means that the lines having the same function must have the same mechanical qualities.
4. The lines must be in good condition.
5. Keep a permanent watch upon the lines and their slack must be hauled at any time if necessary, and especially before the Spring tide flow.

According to the position of the berth and to meteorological conditions, when the expected height of high water in Le Havre exceeds 750 cm. (approx. tide coeff. 90), risk of bore exists. In this case moorings must be heaved tight one half hour before the expected time of local low water and ship's main engines must be available for immediate use.

It is recommended that a Pilot be on board at this time.

Further information may be obtained from either Pilots of Port Officers.

6. According to the deadweight of their vessels, the situation of the berths, the height of high water in Le Havre, Masters must take all necessary precautions as the tide is arriving.
7. Vessels which, to make their berthing easier have dropped their anchor, must, unless contrary to Port Officer's orders, heave it up, if they are berthed in the basins.
8. Vessels must have adequate fenders along the quay, these fenders must have a sufficient diameter to prevent the vessel being in direct contact with the quays and the cranes.
9. A sufficient free space must exist near the hatch-coaming to allow easy access to the gangway.

Gangway Ladders, Foot-Bridges Giving Access to Dry Land: The link between shore and vessel must comply with the International Convention No. 32, signed in 1932 concerning the protection of people working on board ships.

Action in Case of Accident or Fire: Anyone discovering a fire, or seeing an accident, should immediately give the alarm:

either to the Harbour Master (tel: 88.81.55 or VHF Channels 73 or 16, call sign ROUEN-Port);

or directly to the Fire Brigade (tel: 18).

Measures to be Taken on Board Vessels: Fire-fighting will be under the direction of the Master, but the operating crews from shore, especially the fire-brigade, will be under the orders of their respective chiefs.

The vessel's crew should be able to guide the assistants from shore. Plans of the ship, the cargo plan, and stowage of hazardous cargo on board, should be available on their arrival.

The Harbour Master can decide upon the shifting of the vessel, or that of neighbouring vessels. No decision such as scuttling, beaching, overloading to upset the stability, nor in general any action which may have an effect on the working of the port equipment, can be taken without the consent of the Harbour Master.

Oil tankers, or vessels loaded with dangerous cargoes, should always have a hanging wire tow-line each end ready to be hooked by a tug boat.

Cleanliness: In order to preserve the River Seine and our shore cleanliness please use plastic bags for your ship's domestic wastes.

Full bags closely fastened should be laid at the place marked by "garbage" signal. These bags will be delivered on request to your Agent.

Injury or Sickness On Board: In case of serious injury, call the fire brigade in the same way as in case of fire or the Rouen Port Station (VHF Channel 73).

In case of sickness, a doctor can be obtained quickly by the SAMU (Tel: 15) or by VHF Channel 73.

Radio Communications: Masters of vessels are advised that they can get communications by radio-telephone with telephone subscribers ashore on metric wave-lengths (VHF).

They must call:

when below Tancarville – LE HAVRE-Radio direct on Channels 26, 28, 82 or 23 Semi-duplex;

when above Tancarville – ROUEN-Radio direct on Channels 25, 27 duplex or 21 Semi-duplex.

Do not use Channel 16 for these communications.

These radio communications are authorised when alongside berth.

Furthermore it is useful to keep watch on Channels 16 or 73. LE HAVRE-Radio and ROUEN-Radio stations use Channels 16 or 73 when they call vessels.

Notice to Masters of Vessels Proceeding to Le Havre and to Rouen: The attention of Masters of vessels bound to or from the ports of Le Havre and Rouen is drawn to the regulations laid down in by-law No. 190 of the Marine Superintendant of the 1st District appertaining to anchorage and navigation of vessels in the Le Havre roadstead dated August 21st 1972.

Masters of vessels bound to or from Rouen, without calling at Le Havre, are particularly concerned with the terms of Article 2.

BORE:

1. The bore is the name given to the phenomenon caused by the arrival of the tidal wave in the river at times of high tides. The current is reversed, going from ebb to flow.

The rise in water is then very rapid, and the level of the river can rise 1 m. in less than 10 minutes.

The greater the tidal coefficient and the lower the river flow, the greater the phenomenon.

Basically, it starts to be felt in the Seine when the full tide height at Le Havre reaches or exceeds 7.6 m., i.e. for tidal coefficients equal to or greater than 90.

It is generally stronger when the coefficients are falling than when they are rising, and it is greater in Summer than in Winter.

It is also stronger when atmospheric pressure drops and West winds produce tidal heights greater than normal.

In Winter, the Seine is in flood, and the very considerable river flow attenuates considerably the effect of the bore.

On the other hand, in Summer the relatively low level of the river favours the rise in water, and the bore is then much stronger.

The bore is experienced between Caudebec and downstream of the Port of Rouen. It then weakens by virtue of various structures in the river and some basins. Upstream of the port, it is no longer present except for high tidal co-efficient.

2. Vessels berthed at quays or discharge/loading points are subject to the effect of the bore all the more when they are heavy and loaded.

Downstream of the port, vessels are wherever possible positioned with their bows downstream. They can be assisted during the passage of the flood by a Seine Pilot and possibly tugs.

The arrival of the bore is announced on VHF by the Rouen Port Station giving the time when it will pass La Bouille, which is the downstream limit of the Port of Rouen, and where a recorder is installed. It is then easy to forecast the time of its passage at different points in the port, by knowing the time taken for the flood to go from La Bouille to different berths:

Moulineaux Roulier: 4 minutes.
MRM Silo: 8 minutes.
Sogema Quay: 10 minutes.
Petit-Couronne Quay: 15 minutes.

In principle, it occurs at the time of local low-tide, but according to circumstances, it can be advanced by almost half an hour over the theoretical expected time.

3. During very high tides, the measures to be taken before the passage of the flood are as follows:

To be well berthed and tied up and to ensure opportunely that all lines are working in the same way.

Take up the gangway.

Stop handling operations in order to disengage cranes or gantries, or disconnect tankers.

Have engines ready for manoeuvring (30 minutes before theoretical time). Engines must be started up before the flood arrives and manoeuvred so as to counter the effect of the bore during its passage. Once the bore has passed, no risks exist.

The Port Captaincy carries out continuous watch on VHF Channel 73, and can give at any time all information to vessels on the bore and its strength.

DEVELOPMENTS: Dredging operations in order to accommodate vessels of 60,000 d.w.t. at Port Jerome and Honfleur.

AUTHORITY: Port Autonome de Rouen, Capitainerie, 34 Boulevard de Boisguilbert, B.P. 4075, 76022 Rouen Cedex. *Tel:* 35.88.81.55. *Telex:* 770865 Capipor. *Cables:* Poronom-Rouen. *Contact:* R. Fossaert, Le Commandant du Port.

AGENT: Jolasry (France), 52 Quai Gaston Boulet, Rouen. Telex: 77588. Tel: 88 65 15.

ST. LOUIS DU RHONE: 43.23 N. 04.48 E. (See Plan)

DOCUMENTS:

1 Cargo Manifest or Manifest in Ballast.
Ship's Register.
Bills of Lading.
6 Crew Lists (8 if Spanish or U.S.S.R. or ships bound to these countries).
3 Passenger Lists.
Health Declarations.
Derat Certificates.
3 Bunker Supply forms.
1 Declaration of Crew Personal Effects. If on inspection articles or quantities not in conformity or in excess, Master held responsible, articles removed and heavy fines imposed.

PILOTAGE: Compulsory for vessels exceeding 300 tons net. Contact Pilots by Marseilles Radio or by VHF Channel 16 for calling Port de Bouc Port Control, Channel 9 for traffic. Pilot boards 1 mile E.N.E. of the lighthouse on the jetty.

River Pilot required by vessels loading salt in the Rhone river, boards at the locks entrance to Port St. Louis basin.

ANCHORAGE: Suitable anchorage outside Port St. Louis keeping well clear of Fos channel.

RESTRICTIONS: The St. Louis Canal is 3,300 m. long and 63 m. wide, with a depth of 24 ft. 6 in. The lock has a length of 135 m., width 22 m., and depth 18 ft. Max. ship size: length 95 m. beam 16 m.

No entrance allowed between 2100 hrs. and 0500 hrs. except in emergency, although entrance may be effected up to 2400 hrs. if ordered before 2100 hrs.

Entrance may be delayed when large tankers are proceeding in the Fos Channel.

HEALTH: Pratique given by Customs officers who board on arrival.

RADIO: Within 150 miles use Marseilles Radio FFM, otherwise St. Lys FFL.

TUGS: Two tugs available of 1,060 h.p. Ship's lines are normally used.

BERTHING:

Quays	*No. of Berths*	*Draft*
Quai Ouest	3	6.20 m.
,, Nord	2	6.50 m.
,, East	3	6.10 m.
,, Hardon	1	5.50 m.
,, de la Suisse	3	7.92 m.
,, Charles	1	7.92 m.

SPECIAL CARGO FACILITIES:

Company	*Berth No.*	*Length (m.)*	*Max. draft (m.)*	*Remarks*
C.R.E.A.	924	100	4.5	2 berths – Military, refined products.
Frahvile	925	80	4.6	Capacity 17,550 tons. Refined products.
S.A.G.A.	919	100	7.0	Natural Gas – Loading and discharging. Berth also used by Medistock.
Sedipa	921	100	5.5	Public berth, storage capacity 9,000 tonnes. (Chemicals, vegetable and animal oils).
Soterm	923	150	7.0	Private berth (destroyed 1982) used by Soterm, Mazout and Deleup. Storage Capacity (still available): Mazout 15,000 tons. Deleup and Soterm 30,000 tons.
Gedemer	916	100	7.0	Private berth. Storage Capacity: 5,000 tonnes. (Liquid tar).
Basin				
Port St. Louis/Rhone	904	110	5.5	Ro-Ro
	909	130	6.0	Ro-Ro
Tellines	951	130	7.92	Ro-Ro.
"	952	147	7.92	—
"	954	147	7.92	Ro-Ro, heavy lifts. (4 ton/sq.m. – 6 ton/sq.m.).
"	953	160	7.92	Heavy lifts (4 ton/sq.m.). Private crane, 544 tonnes capacity and Port Authority floating derrick 500/600 tonnes capacity, located at this berth.

STEVEDORES: Shifts are 0800 – 1200 hrs., 1300 – 1730 hrs. Saturday afternoon, Sunday and Holidays in overtime. Shifts of 0600 – 1200 hrs. and 1300 – 1900 hrs. count as a day each.

CRANES: Also see "Berthing".

Quay cranes: 6×3-6 tonnes. One private crane at heavy lift berth, capacity 540 tonnes.

Mobile cranes: 1×6 tonnes, 1×12 tonnes.

Floating crane: Marseilles Port Authority operate a floating derrick, capacity 500-600 tonnes.

Front Loaders: 1×30 tonnes for containers.

FRESH WATER: Available from hydrants on the quays at a rate of 10 t.p.h.

FUEL: Available only by barge or railcar.

AIRPORT: Marignane Airport distant 70 km.

AUTHORITY: Port Autonome de Marseille, 23 Place de la Joliette, 13002 Marseille, France. *Tel:* 91.91.90.44. or 91.91.90.66. *Telex:* 440746 Portauto-MARSL *Contact:* M. Pechere, Director. Captain Sicard, Harbour Master.

ST. MALO: 48.38 N. 02.02 W. (See Plan)

PORT LIMITS: A vessel is considered to have arrived within the Port limits, when it is within a radius of 3 miles to the North of the Grand Jardin lighthouse.

DOCUMENTS:

Ship's Register.
Store List in duplicate (ship's stores).
2 Crew Declarations of Bonded Stores.
Health Declaration.
Manifests and B/Ls.
3 Crew Lists.
3 Passenger Lists.

One Security Form (Inwards Declaration) with vessel's details to be handed to Port Captaincy when passing through the lock.

PILOTAGE: Compulsory for vessels over 45 m. LOA and over 150 NRT.

(1) During tidal hours, 2.5 hours before and after high water, vessels may enter into direct contact with the Pilots on VHF Channel 12. Call Sign "Pilot – St. Malo".

(2) Outside tidal hours and during working hours, vessels may call the Port Office on VHF Channel 12. Call sign "Port Control – St. Malo".

When waiting for the Pilot, vessels anchor near the "Shore Buoy" and report their arrival to the Port Office.

In good weather, the Pilot boards near the "Shore-buoy". In bad weather when the wind is from N.E. or N.W. the Pilot may guide the vessel as far as Dinard Roads, where the Pilot will come aboard.

Pilot Cutters: One cutter ("Nepture" – length 13 m., speed 9 knots) fitted with radar, relief cutter ("Pilote Vayva" – length 10 m., speed 18 knots) both fitted with radio-telephone and VHF Channels 6, 12, 14, 16, 24 and 25.

ANCHORAGE: Large vessels with draft greater than 13 m. anchor by the land-buoy. Smaller vessels may anchor in St. Malo Roads, there is sufficient swinging room for vessels with draft of 7 m. It is recommended to use a Pilot to come into this anchorage.

RESTRICTIONS: Vessels are allowed to enter from 2.5 hours before to 2.5 hours after high water. To be certain of mooring, vessels should arrive at the lock (Naye Lock: Length 150 m., width 25 m.) at least 1 hour after high water.

Depth available 20 ft. to 22 ft. at Spring tides for the Bouvet and Duguay Trouin Basins.

No movements during foggy weather. Large vessels (length greater than 100 m.) approach the lock at high-tide. Tankers lock in by themselves (no other vessel allowed in the same lock) in daytime only. Movements are carried out day and night.

Vessels with hazardous cargo and large vessels (more than 135 m. LOA) enter in daytime only.

MAX. SIZE: The height of the tide, the length of the lock and width of the channel must be taken into account.

Cargo Vessels:

(a) Overall length 150 m., beam 20 m. or
(b) Overall length 135 m., beam 21.5 m.

Max. Draft: Spring tides 9 m. Neap Tides: Equal to the depth of water in the access channel according to the tide (height of water above zero of French charts) at the time when the vessel passes through the access channel to the lock (normally 8.5 m.), 2 tugs required.

Characteristics of the Channels: Permissible dimensions for vessels:

St. Malo Channel linking the Vauban Docks to Duguay Trouin and St. Servan Channel linking the Vauban Docks to Bouvet. Length 120 m., breadth 16.5 m. Depth in the docks 5 m. (sill of the channels: 5 m.)

Jacques Cartier Channel linking the Vauban Docks to Jacques Cartier. length 150 m., breadth 21 m. – at the moment – depth of the docks 3 m.

Tankers: Length 147.50 m. (443 ft.), beam 20 m. (65.6 ft.), draft see "Cargo Vessels" above. 2 tugs required if vessel not fitted with bow-thruster.

HEALTH: Customs Officers are appointed as Health Officers and deliver Pratique. In case of suspect disease, Masters must declare it at once by radio to their Agents who will contact authorities.

RADIO: Vessels coming from West use Brest le Conquest Radio, call letters FFU. Vessels coming from North should go through Boulogne Radio, call FFB.

Arrival Advice: The requirements on arrival of large vessels must be given to the Port Captaincy 8 days in advance.

For vessels with a length less than 100 m., 48 hours notice must be given.

The precise ETA mst be sent 24 hours before arrival in the Roads.

VHF:

(a) Port Office: Channels 12 and 16, 24 hours
(b) Pilot: Channels 6, 12 and 16, when awaiting a vessel.
(c) Tugs: Channels 6, 12 and 16, at the time of high tide.
(d) St. Nazaire Radio: Channels 1 or 2, for telephone communications.

Vessels call Pilot and tugs on 12 or 16 and change to Channels 6 or 8 for working.

TUGS: 3 tugs are available at St. Malo (1,500, 650 and 650 h.p.). Usually joins vessel at the end of breakwater. Ship's lines are usually used.

Towing is obligatory on entering or leaving the docks for vessels which have a length greater than 80 m., as well as for oil tankers and vessels carrying hazardous cargo whatever their size.

BRIDGES: 3 bridges can be passed during tide vacation, otherwise, notice required to open.

BERTHING: 1 Ro/Ro berth outside lock for car ferries.

Duguay Trouin Dock: Length 2,000 (commercial), 2 Ro/Ro ramps for vessels less than 120 m. (Berth Nos. 7 and 6).

1 wine store house (Berth No.13).
1 berth for molasses (Berth No. 1).
1 grain silo (Berth No. 10) 6,000 tons.

Vauban Docks: St. Louis Quay: 360 m. – marina: 700 berths.

Corsaires Quay: 385 m. comprising:
1 continuous discharging apparatus for phosphates.
2 discharge points for molasses.
1 discharge point for hydrocarbons.
1 discharge point for phosphoric acid – (1,000 t.p.h.).
2 cranes on rails – 12 tons at 14 m.
1 dry dock: 120 m. × 15.5 m.
1 Ro/Ro ramp: In the North part of the Corsaires Quay.

Bouvet Dock: 641 m. for commercial trade.
260 m. for discharging fish.
850 m. for activities connected with fishing.
1 slipway – for vessels less than 500 tons.
1 slipway for yachts.

Jacques Cartier Dock: Length 300 m., comprising:
1 dockyard (ACM).
2 electrical cranes of 24 tons.
Numerous sheds – vats for molasses and acid (6,000 cu.m.)

The installations of this quay will be clarified in due course. 2 cranes on rails are envisaged.

Grain Silos: 1 of 6,000 tons capacity with loading possibilities of 130 t.p.h. and 2 of 6,500 tons capacity each with loading possibilities about 100 t.p.h. each are situated in Bassin "Duguay Trouin".

CRANES: 8 mobile cranes, 5 – 12 tons and 9 electric cranes (on rails) 8 – 24 tons.

TANKERS: Tanker quay, extension of Quai Des Corsaires, length 130 m. Diameter of discharge pipe 200 mm., one mobile arm, vessels to supply reducers. Max. discharge rate, 650 cu.m./hour.

No deballasting facilities. Tankers wishing to effect repairs must leave port and wash out their tanks and obtain a gas-free certificate.

On completion of operations tankers must leave on the next tide. If a second tanker is waiting to berth she must wait in the roads.

Safety instructions are issued when the vessel passes through the locks.

BERTH ALLOCATION: Dependent upon goods to be discharged and characteristics of vessel. Bearing in mind the widths of the channels, their depth and dimensions at the foot of the quays, the height of the dock which varies on average between 11 m. and 12.5 m.

The largest vessels tie up at Quai Des Corsaires.

It is recommended that an advance notice be sent via Agents to the Port Office 15 days prior to arrival, so that the vessel may be received under the best possible conditions.

STEVEDORES: In order to have workers ready on arrival, Masters are kindly requested to give as accurate as possible ETA the day before arrival, especially if there are many ships discharging at same time.

Normal working hours 0800 – 1200 hrs., 1200 – 1800 hrs. and 2000 – 2400 hrs. from Monday to Saturday, except holidays. There is no night overtime. Dispensations may be made to finish a vessel so that she may catch the tide.

MEDICAL: Notice is required to obtain an appointment with doctors or dentists. Hospital is available in St. Malo.

DENSITY: Average density is 1022.

FRESH WATER: Can be delivered from quay. Rate 3 t.p.h. – 10 t.p.h.

FUEL: Bunkers delivered at St. Malo (with notice varying, depending on the Company – Shell 2 days, Esso 1 week, etc.) come from Donges by road lorries and cost of haulage is supported by the ship (expensive). D.O. can be obtained from local suppliers but out of contract.

FIRE PRECAUTIONS: Usual non-smoking precautions (a watchman is compulsory for tankers). In case of fire call Port Captain on VHF Channel 12.

GANGWAY/DECK WATCHMEN: Watchmen are not compulsory except for tankers.

OPENING/CLOSING HATCHES: This work is normally carried out by crew. Stevedores' cranes may help for the beams, but dockers will not touch them.

CERTIFICATES: As per International Conventions, all Safety Certificates, Load line, Radio, etc.

Important: All vessels entering the port must be up to date with safety certificates as required by international conventions. An attestation must be handed in by the Master when he passes through the lock.

CUSTOMS ALLOWANCES: 200 cigarettes, or 200 grams of tobacco, and 1 bottle of spirit per crew member.

IDENTIFICATION CARDS: Crew members must have an identification card or their seaman's book when going ashore.

CONSULS:

Netherlands		(16-99) 56.07.21.
Denmark	(Vice-consul)	(16-99) 56.07.21.
Norway		(16-99) 56.07.21.
Finland	(Vice-consul)	(16-99) 56.31.57.

REPAIRS: Deck and engine repairs can be carried out by shipyard or workshops. Electricians are also available. RAMAC Agency can repair radars and radios, also Radio-Ocean agency.

DRY DOCKS: One dry dock. Max. length admissible 120 m., breadth 16.0 m. and draft 8.0 m. One slipway, 500 tons. Length admissible 45 m., breadth 9 m. With sufficient notice.

REPATRIATION: Can be effected from St. Malo by train or plane.

AIRPORT: Pleutuit/Dinard Airport 10 km. from port. Wintertime, services to Jersey (C.I.), with onward flights to England and Wales. Summertime, several times per day to Jersey, London, and to Paris except week-ends.

TIME: Local time is GMT plus 1 hour. From April till September GMT plus 2 hours. ETA messages must specify GMT or Summer Time.

HOLIDAYS: French legal holidays. Stevedores do not work on Sundays or public holidays.

POLICE/AMBULANCE/FIRE: Police, 40.85.80 and 17; Ambulance and Fire, 18. Port Captaincy, Tel: 56.23.86, or VHF Channel 12.

TELEPHONES: None.

DELAYS: Berthing delay will only be due to tide. For loading or discharging, it depends what kind of cargo is handled.

Deadlines: All vessels must leave the quay once unloading has terminated. They may be towed away to another waiting berth – if need be.

Vessels are admitted to port as soon as their berth is vacant, and providing nautical conditions permit.

Time limits for loading or unloading depend on the quantity of the nature of the goods. There is no special rule governing purely port operations.

It is rare for vessels to wait in the roads.

Special Cases: Vessels are not authorised to enter or to leave the port in fog.

In storms, starting at force 8 – Pilots cannot embark, nor disembark from vessels, without danger.

With strong N.W. winds (8 to 9) the port may be ordered to be closed to prevent damage to the lock gates and to structures (bridges).

SERVICES: Compass adjusting, radar or radio repairs can be carried out.

SHORE LEAVE: Crew members are allowed ashore.

AUTHORITY: L'Ingenieur Charge de l'Arrondissement de Saint Malo, 1 Rue de la Crosse, 35400 St. Malo. *Tel:* 56.55.45. *Telex:* Dde-Atm-950-197 F. *Contact:* J. Lannou, Port Commandant, Ecluse du Naye, 35400 St. Malo. *Tel:* (16-99) 81.62.86.

AGENT: See "Paris".

SETE: 43.24 N. 03.42 E. (See Plan)

PORT LIMITS: The seaward boundaries of the Port within which a vessel is considered to be an "arrived vessel" are indicated as follows: To the South by a line with the red light of Eastward end of breakwater bearing 257°; to the East by a line with the church tower of Frontignan bearing 005°; to the North by coastline.

A second zone is a circle of 1 mile radius centered on a point located on the bearing 310° and at 2.8 nautical miles from Eastward end (Red Light) of breakwater. This zone is connected from a landing buoy (Lat. 43° 14.9′ N., Long. 03° 53.7′ E.) by a channel 1 nautical mile wide steering 326°. This area is only for large tankers from 100,000 tons up to 280,000 tons which operate at buoy IMODCO Single Point Mooring System.

DOCUMENTS:

Cargo Manifest or Manifest of Ballast.
Certificate of Cargo space.
Bills of Lading.
Ship's Register.
3 Crew Lists.
4 Passenger Lists.
Health Declaration, eventually vaccination list.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.
2 Provision Lists.

Tankers: IOPP Certificate – National Certificate of Insurance for Oil Pollution Damage.

PILOTAGE: Request Pilot by international signals (sound, flags, light signals) or telephone through Marseilles Radio or VHF by Sete Radio Channel 25, Tel: 91.73.11.14/91.90.57.30 (or pilot boat VHF Channel 12). Description of pilot boats: motor launch with black hull, white band, white anchor on hull at bow. Pilot embarks between 1 and 2 miles South of breakwater in good weather. In bad weather he embarks in the shelter of l'Epi Delon (Eastern Entrance). In this case make prior contact by radio or VHF (Marseille or Sete Radio) or Port Office VHF Channel 12. Provide a ladder on each side.

ANCHORAGE: In Roads from 0.5 miles to 3 miles to South of breakwater. (See "Port Limits" and "Tankers").

RESTRICTIONS: *Commercial Harbour:* In the Canal Maritime, length max. 145 m., breadth 20 m., draft 7.0 m. (23 ft.).

Bassin a Petrole – see "Berthing".

MAX. SIZE: *Sea Line Frontignan:* South Berth: S.B.M. Tankers 300,000 d.w.t. draft 21.80 m. (71 ft. 6 in.).

North Berth: C.B.M. Tankers up to 100,000 d.w.t. lightened draft 13.1 m. (43 ft.).

Bassin a Petrole: New Tanker Berth (P2) – 35,000 d.w.t., length 225 m., draft 11 m. (36 ft.) P1 – length 140 m., draft 33 ft. P3 – Barges.

Darse No. 2 for ore carriers 225 m. length; 13.0 m. draft (42 ft. 7 in.)

Commercial Harbour up to 11.0 m. draft (36 ft.).

Commercial Harbour in the Canal Maritime: max. length 140 m.; breadth 20 m., draft 6.85 m. (22 ft. 6 in.).

HEALTH: Pratique given by Health Officers or by Custom's Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique, Master should radio Agent before arrival, advising full details.

RADIO: Marseille or Sete Radio VHF Channel 21 or 25, Port Office Channel 12. Port Authority Telex No. 480220.

TUGS: 3 tugs (2×1,200 h.p. and 1×2,200 h.p.) to be ordered from Compagnie Setoise de Remorguage. Tel: 67.74.64.49 or VHF Channel 12. Tow line to be furnished by ships. Vessels taken in tow near the breakwaters on the North side.

BERTHING:

Bassin du Midi:	
North Quay:	Berth Nos. 16, 17, 18, 19 and 20 Draft 6.50 m. (21 ft. 04 in.) Cranes: 4 Fives Lille, 7.5 tons at 22 m. with scoop and hook. All berths: Ore.
South Quay:	Berth Nos. 14 Draft 7 m. 15 Draft 6.10 m. Ro/Ro Cranes: 2 Fives Lille, 7.5 tons at 22 m. All berths: Livestock and general cargo.
Canal Maritime:	
Quai Paul Riquet:	Berth Nos. 10 Draft 5.50 m. 11 Draft 6.40 m. 12 Draft 6.40 m. 13 Draft 6.10 m. All berths: Wine and general cargo. Cranes: Nil.
Quai Vauban:	Berth Nos. 24 Draft 3.70 m. 25 Draft 4.60 m. 26 Draft 4.10 m. Berth Nos. 25 and 26: wine. Cranes: Nil.
Quai Francois Maillol:	Berth Nos. 27 Draft 5.80 m. 28 Draft 5.20 m. 29 Draft 5.20 m. All berths: Wine. Cranes: Nil.
Quai d'Orient:	Berth Nos. 7 Draft 5.50 m. 8 Draft 5.50 m. 9 Draft 5.50 m. 5 Draft 5.00 m. 6 Draft 4.60 m. Restriction: Berth Nos. 5 and 6: breadth = 15 m. All berths: Wine and general cargo. Cranes: Nil.
Quai de la Republique:	Berth Nos. 30A Draft 5.20 m. 30B Draft 4.30 m. All berths: Wine. Berth Nos. 31 and 32 – Tugs. Berth No. 33 – Fishing repairs. Cranes: Nil.
Quai d'Alger (Algier Quay):	Berth Nos. 34 Draft 8.20 m. 35 Draft 8.20 m. 36 Draft 8.20 m. All berths: Wine. Passenger Quay: Length 200 m., draft 8.20 m. For example: German m.v. Europa.
Quai du Maroc (Morocco Quay):	Berth No. 37 Draft 7.60 m. (Ro/Ro) Length 130 m. Passengers and wine. Max. Length: 170 m.
Bassin Orsetti:	Berths B1 Draft 8.25 m. B2 Draft 8.25 m. Ro/Ro B1 and B2: Passengers General cargo. B2 Ro/Ro Gare Maritime Orsetti. *Lines:* Algeria. Baleares (Spring and Summer). Cranes: 1 Fives Lille, 6 tons at 22 m. Berths: D1 Draft 8.55 m. D2 Draft 8.55 m. D3 Draft 8.25 m. Length 152 m. Ro/Ro. All berths: General cargo. Cranes: 4 Caillard 6 tons at 22 m.
Mole Masselin:	Cereals 1 berth on 180 m. of quay dredged to 10.36 m. 1 loading gantry of a capacity of 550 t.p.h. 2 storage silos of 22,000 tons capacity. (annual 100,000 tonnes).
Dock No. 1 or Colbert Dock:	Berths E3 Draft 10.40 m. Ro/Ro. E2 Draft 10.40 m. E1 Draft 11.00 m. All berths: Containers – general cargo. Wood pulp and sawn timbers. Cranes: 3 Caillard 6 tons at 22 m. 9 tons at 19 m. 7.5 tons at 22 m. 1 container gantry crane 35 tons at 35 m. Berths G1 Draft 7.50 m. Ro/Ro. G2 Draft 11.00 m. G3 Draft 11.00 m. Ro/Ro. All berths: Sawn timbers – logs and general cargo. Cranes: 3 Callaird and 2 Peiner 7.5 tons at 22 m.; 8 tons at 30 m.
Dock No. 2 or New Dock:	Berth H2 Draft 12.91 m. Ro/Ro. No crane. Berth I3 Draft 12.91 m. Ro/Ro. Named berth for all ponderous bulk cargoes. Max. length 225 m. (Panamax). Cranes: 1 Delattre Levivier 20 tons at 44 m., 2 Peiner 12 tons at 30 m. – all with scoop and hook.

Also see "Developments".

TANKERS: Frontignan Sea Line Terminal North Berth (C.B.M.) 1 berth for tankers up to 100,000 d.w.t. lightened draft 13.1 m. (43 ft.). 2×12 in. hoses for crude oil discharge. Submarine pipe-line 28 in. diameter.

Commercial Port: 1 berth for tankers up to 35,000 d.w.t. draft 11 m. (36 ft.). Five loading arms for black and white products. 1 old berth for tankers up to 140 m. length or 10,000 d.w.t., draft 10.1 m. (33 ft.). Slop disposal facilities available up to 1,000 cu.m.p.h. Also see "Max. Size".

Frontignan Sea Line Terminal (South Berth) Mobil SBM.
Operator: Mobil Oil Francaise.
Position: Lat. 43° 22′ 12″ N., Long. 03° 46′ 49″ E.
Restrictions: Least depth of water 92.5 ft.
Max. Size: No limit on length and beam. Max. draft 21.8 m. (71 ft. 6 in.) and 300,000 d.w.t.
Pipe-line: Length, 26,000 ft. Diameter 44 in.
Hoses: 2×16 in. Bow to manifold distance should not exceed 600 ft. Connections port-side.
Max. Pressure: 125 p.s.i. at rail.
Pumping Rates: 8,500 t.p.h.
Density: 1026.
Fresh water: Not available.
Fuel: Bunker "C" available by barge, capacity 900 tons. D.O. not available.
Ballast: No facilities for receiving dirty ballast.

Vessels up to 50,000 d.w.t. normally berth at spread mooring.

Regulations and Information: When scheduled to discharge at SBM Master will receive the following standard message from Mobiltrans Ny: "Your vessel will discharge at Frontignan SBM. located 43° 22′ 12″ N., 3° 46′ 49″ E. stop 4 days prior arrival radio your Agent your ETA SETE contact "Sete Port Office" on VHF Channel 12 approximately 30 miles range advising your ETA to entrance buoy located 43° 14′ 55″ N., 3° 53′ 40″ E. Only when authorisation is granted by "Sete Port Office" you may proceed to SBM on *compulsory* route on course 326° extending 0.5 miles each side of line joining approach buoy to SBM. When proceeding on compulsory route your vessel shall exhibit additional marks by day 3 black shapes in a vertical line the highest and lowest 1 ball the middle 1 diamond every one spaced by 1.5 m. stop by night 3 all-round lights in a vertical line the highest and lowest red the middle white every one spaced by 2 m. stop. Pilot will board approximately 3 miles seawards from SBM on compulsory route".

Your Agents will forward the following cable: "Advise ETA type size your manifold flanges whether suitable reducers available and Smit's Bracket fitted on forecastle stop Boom to lift 16 in. ID floating hose and two 16 in. 150 ANSI standard flanges ready on portside. On forecastle have 2 polypropylene 8 in. messengers 150 fathom ready. Accommodation ladder on starboard and boat ropes each side."

The "approach buoy" referred to in para 1, is located in Lat. 43° 14′ 55″ N., Long. 03° 53′ 40″ E. having the following characteristics: 3 m. diameter – 7 m. height mast painted with vertical strip white and red with 2 crosswise shapes, with a white light Isophase 4 seconds – Racon – whistle. Proceeding inshore of this buoy and inside the 12 mile line is not allowed without prior authorisation granted by "Sete Port Office" on VHF Channel 12.

An approach channel exists between the approach buoy and the SBM extending 0.5 miles each side of a line joining the approach buoy to SBM and must be used as a compulsory route on a course of 326°. Same compulsory route applies for outgoing tankers leaving the SBM.

When proceeding in the approach channel the vessel shall exhibit in addition to the normal navigation signals: *By day:* 3 black shapes in a vertical line the highest and lowest 1 ball, the middle one a diamond – every one spaced by 1.5 m. *By night:* 3 all-round lights in a vertical line, the highest and lowest red, the middle one white, every one spaced by 2 m.

The Pilot boards incoming tankers and leaves outgoing tankers approximately 3 miles seawards from SBM on the compulsory route. He will stay on board during the period the vessel remains secured to the SBM.

Every vessel proceeding to or departing from the SBM which requires to anchor should use the following anchorage areas:

Anchorage A – Vessels with less than 15 m. (49 ft.) draft should anchor in the area bounded in the North by the 20 m. depth contour, and in the East and West by meridian passing through the extremities of the breakwater, and in the South by the parallel of the breakwater at 3 miles off the breakwater.

Anchorage B – Vessels having a draft of greater than 15 m. (49 ft.) should anchor in the Southern semicircle around the SBM extending between 400 m. (1,310 ft.) and 1,850 m. (6,000 ft.) from the SBM.

When a vessel is proceeding to the SBM a Marine Superintendent and a mooring team will board. Then anchors should be secured and cable pawls in the down position, deck scuppers must be plugged tight and VHF on standby on Channel 12.

Throughout the period the vessel remains at the SBM the engine should be ready and power available on deck winches and windlass.

Adequate deck lighting must be available at night, and a constant fo'c'sle watch kept on the SBM.

Propeller r.p.m. must be kept to a minimum. Intermediate ballasting may be required in order to prevent excessive strain on moorings.

While weather operational limits will depend on circumstances port regulations specify the following criteria: Vessel must cease discharge when wind is 30 knots, significant wave height 8 ft. (assumed current 2 knots) vessel must leave berth when wind is 45 knots and significant wave height is 18 ft.

The Master of every oil tanker coming to Sete to load several refined products, some of which are heated, is required to give the Port Office, a cargo plan before loading.

Masters of oil tankers are invited to follow the terms of new French Law (Arrete Prefectoral No. 23/83 du 6 Mai 1983) specially to send a message to the French Admiralty (Prefet Maritime de Toulon) 6 hours before entering the territorial waters and 6 hours before leaving the Port of Sete (even if leaving for another French port).

Shipmaster's Report: March 1985.
Berth: Vessel berthed at C.B.M. berth which is a multiple buoy mooring just outside the East Harbour Entrance in position: Lat. 43° 24.3′ N., Long. 03° 44.6′ E.

Pilot boards just S.E. of the SBM Berth, together with Mobil Representative, Cargo Surveyor and a mooring gang of 7 men. At the same time, 3 slings of equipment are placed on board on the port side, including chain stoppers for mooring aft and discharge monitoring equipment.

One tug is used, through the centre lead aft; using ship's lines (2). Vessel approaches the berth on course of approximately 030°; ship's log was used for assessment of ship's speed, the Pilot preferring to drop the first anchor at a speed of between 1.0 – 1.5 knots.

Starboard anchor is dropped first and allowed to run to 10 shackles on deck as the vessel is canted to starboard to a heading of 045°. When about 10 shackles have run, the port anchor is let go and then engine and tug used to manoeuvre the stern towards a group of 3 mooring buoys. 3×42 mm. diameter wires are picked up from these buoys, then 2 further wires from submerged clumps and finally 2×42 mm. wires from submerged clumps are secured forward. Both anchors are then hove in to about 8.5 shackles each to tension the moorings aft, vessel's head being finally 135°. Moorings, distances and dimensions are as per the berth drawing in *Guide to Port Entry* – "Plans". Mooring was very competently accomplished, the anchors being very accurately placed close to 2 small marker buoys (not on chart).

Discharge: The berth has very recently been converted to clean products only. 2×12 in. hoses are connected to the port side manifolds. Each of these is fitted with a butterfly valve, however, a noticeable amount of the previous cargo ran into the drip trays while the hoses were being connected. Connection of hoses was made by the mooring gang.

The sea bed line is 28 in. and maximum pressure permitted is 9 bar. This line has previously received crude oil at rates of up to 5,000 tonnes/p.h. so it was not surprising when vessel did not make this pressure, even at full speed. Discharge of 30,000 tonnes took a total of 15.8 hours, giving a final rate of 1,900 tonnes/p.h. This included approximately 2 hours slow pumping at the start and all the stripping time.

A 30 minute water plug was requested before discharge commenced. Mobil normally expect a vessel to be ballasted within 6 hours of completion of discharge; on this occasion, extra ballast was taken as the vessel would be unmooring in a 30 knot wind.

The Mobil Representative, Cargo Surveyor, Pilot and the 7 man mooring gang all remain on board until after completion of unmooring. Meals and accommodation should be provided.

General: Charterer's Agent, Mobil Oil Francaise, is in Paris (Telex: 610417). They operate through local agency S.N.C.M. (Telex: 490545). On clearing the Suez Canal, vessel was contacted by Ferymer Sete, (Telex: 480065) with a standard message giving full instructions for mooring at the SBM (South Berth) requesting C.O.W. Discharge Plan, etc. Agent attended on berthing and for remainder of stay contact was maintained by portable VHF which proved to be quite satisfactory.

Up to 6 boats per day for shore leave, etc. can be provided; if all 6 boats are taken the cost is high – 7,000 francs. However, for vessel's requirements some boats were required in any case.

Port Health, Immigration and Customs did not attend at any time, all their paper work being carried out by the Agent.

BRIDGES: To proceed to or leave the Bassin du Midi bridges have to be opened. Request to be made to Capitainerie du Port (Tel: 67.74.88.20/67.46.00.81) before 1700 hrs. Friday, when arrival or departure is expected during weekends.

FRESH WATER: Available on most quays or by lighter of 140 tons capacity during working hours. Advance notice required for Saturdays and Sundays.

FUEL: All qualities available subject to advance notice given.

REPAIRS: Claverie: Tel: 67.48.62.52 – Mechanical workshop for heavy repairs and boiler repairs.

Di Biase: Tel: 67.74.32.12 – general repairs.

C.R.M.: Tel: 67.74.06.83 – Electronic and radio aids to navigation repairs.

Touat: Tel: 67.48.62.37 – Electrical and generator repairs.

Farre: Tel: 67.53.41.28 – Under water work.

CONSULS:

Denmark	Tel: 67.74.30.20	Norway	Tel: 67.74.31.83
Finland	Tel: 67.48.63.16	Sweden	Tel: 67.48.63.16
Netherlands	Tel: 67.48.63.16		

Others at Marseilles.

WATCHMEN: Service necessary for ships loading or unloading dangerous merchandise. Optional for other ships. (Tel: 67.48.77.37).

CUSTOMS ALLOWANCES: 40 grammes tobacco per day per man (calculated in accordance with the length of voyage undertaken by the ship). Amount of alcohol fixed by Customs in accordance with the crew, and length of ship's stay in port. It is a matter of tolerance and not of right.

REPATRIATION: Repatriation and crew changes are easily arranged.

AIRPORT: Airport (Class B) at Montpellier-Frejorgues, located 30 km. from Sete. (30 minutes by car on the motorway), and has services to Paris, Nice, Bordeaux, Clermont-Ferrand and London. The international airport of Marseilles-Marignane is 160 km.

IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.

TIME: GMT plus 1 hour – alteration from end of March to end of September to GMT plus 2 hours.
HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); St. Louis Day (Monday, no labour available); All Saints Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available).
N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.
DEVELOPMENTS: Maximum draft at entrance and Dock No. 2 (Berths H and I) to be increased up to 13.18 m. in the near future (1986).
AUTHORITY: Capitainerie du Port de Sete, Quai du Maroc, 34200 Sete, France. *Tel:* 67.74.88.20. *Telex:* 480220. *Contact:* Commandant Pierre Guillard, Commandant du Port de Sete (Harbour Master).

AGENT: See "Paris".

STRASBOURG: 48.34 N. 07.42 E. (See Plan)

PORT LIMITS: In Strasbourg (Lat. 48° 34′ N., Long. 7° 42′ E.), the Port Autonome extends from the Km. 285 to the Km. 297 upon the Rhine, occupying an area of 1059 ha., of which 205 ha. are water areas including 15 docks (7 have a constant level, 8 a variable level), and 2 fore-harbours.

Out of these limits, the Port Autonome de Strasbourg includes 13 branches designed for the handling of building materials and cereals, and 2 ports, Marckolsheim (at Km. 242) and Lauterbourg (at Km. 349), all the branches and ports being on the left bank of the Rhine.
DOCUMENTS: The ships must hold some documents, which they have to keep at disposal of the administration or the inspection authority when required, as following:
Certificate of Survey.
Certificate of Tonnage.
Certificate of Registration.
Log-Book.
Booklet of Verification of the used oils.
Attestation for Equipments of liquified gases.
Customs Documents for the carriage of goods.
Fluvial Bill of Lading.
Rhine Manifest.
Certificate of Ability to steer the ship.
Police Regulation for the Navigation on Rhine.
A.D.N.R., regulation for carriage of dangerous goods.
the documents relating to the boilers and other tanks under pression.
PILOTAGE: The pilotage is not compulsory on the Rhine and usually the Masters do not ask for a Pilot except for Gebirge and the Haut-Rhin. A Pilot can be obtained in the port of Kehl by dialling the number 19 – 49.7851.20.70.
ANCHORAGES: The ships have at disposal an area of about 10 ha. in the North and South fore-harbours to take anchorage. Depth of water at least 5.20 m.
RESTRICTIONS: Restrictions to navigation are published by the Nautical Corporation of the Inland Water Transport.
MAX. SIZE: The max. sizes of ships allowed on the Rhine are as follows: Length: 110 m., – breadth: 11.4 m. Ships on the Rhine do not exceed a draft of 4.0 m.

Dimensions of the locks: – North lock: length 125 m., breadth: 13.5 m., South lock: length 125 m., breadth: 13.5 m.

In the constant level docks, the water depth is 3.5 m., but only along the North-South axis of the port; if not there, the water depth is 2.5 m.

In the variable level docks, which are the docks with a direct communication with the Rhine, the minimum depth is 4.30 m.

These depths are given, the Rhine being supposed at its lowest bench-mark: 135 m.
HEALTH: There is no Health Service for the Rhine.
RADIO: All communications on the Rhine are performed by radio-link and radiotelephony:

VHF Channels 10 and 13: used for ship to ship communications.

VHF Channels 20 and 22: used for transmitting of nautical advice in the way shore-ship and in the reverse order.

VHF Channels 24, 25, 26 and 27: used for public communications.
RADAR: There is no radar station on shore.
TUGS: The Port Autonome de Strasbourg put at disposal of customers two tugs and one 600 C.V. pusher according to their needs.
BERTHING: 10 km. of quays can be used for mooring. Some of these quays are situated in the constant level docks (max. draft 2.5 m.), some are in the docks that link with the Rhine (max. draft 4.30 m.). Tankers berth only in the Oil Dock Harbour.
BULK CARGO FACILITIES: Grain elevators: 2 berths for loading, and 2 berths for discharging.

Loading of gravel on the Rhine by belt-conveyors (11 facilities).

Loading and unloading of hydrocarbons in the Oil Dock Harbour by 18 facilities operating each at the rate of 300 cu.m./hr.
SPECIALISED CARGO-HANDLING FACILITIES: Containers up to 40 tonnes; heavy packages up to 350 tonnes.

The two operations are carried out at the container and heavy loads terminal at Adrien Weirich Dock and utilise a length of 180 m. of quay. Regular Rhine container lines to the North Sea ports.

A plurimodal international transport centre, "Eurofret Strasbourg", is being developed in the Southern sector of the port, close to the container terminal and including a road transport centre (10 ha.), a warehousing area (20 ha.) and an area grouping various activities (12 ha.).
BRIDGES: The head room under the bridges reaches 8.8 m. in the constant level docks.
MEDICAL: Civil Hospital, 1, place de l'Hospital, 67000 Strasbourg, Tel: 88.36.71.11.
DENSITY: The density of water is about 1000.
FRESH WATER: Fresh water is supplied by Ets. Koejac, Tel: 88.61.26.78.
FUEL: Bunkering can be arranged with the m/s *Robertsau*, G.P.S., Tel: 88.61.68.32 or m/s *Jumbo*, Ets. Koejac, Tel: 88.61.26.78.
CONSULS:

Germany F.R.	88.32.61.86
Belgium	88.35.43.63
U.S.A.	88.35.31.04
Netherlands	88.62.90.80
Switzerland	88.35.00.70
Austria	88.35.13.94

REPAIRS/SLIP: All the repairs can be carried out at: Forges de Strasbourg — Scar, Tel: 88.79.41.41. 101, rue du Rhin Napoleon, 67100 Strasbourg.

Any vessel capable of using the port can use the Forge-de Strasbourg slip.
SURVEYORS: Surveyors of the Commission de Visite, named by the Commission Centrale pour la Navigation du Rhin, can be obtained by the Master.
WATCHMEN: Ship's crew, if required.
OPENING/CLOSING HATCHES: Opening and closing of the hatches are performed by the crew or by the staff of the company freighting the ship, as any other handling. Dockers do not exist in the port of Strasbourg.
REPATRIATION: All the facilities exist for effecting crew changes and arranging any necessary repatriation.
AIRPORTS: Distances from Strasbourg: Strasbourg-Entzheim: 15 km. Strasbourg-Mulhouse: 130 km. (airport Mulhouse Bale). Strasbourg-Francfort: 220 km.
HOLIDAYS: Work is stopped during the weekends and the statutory holidays. Labour can be obtained on these days if necessary.
POLICE/AMBULANCE/FIRE: Police: 17 – Ambulance 88.33.33.33. – Firemen: 18.
TELEPHONES: Office of the P et T, 5, rue du Port du Rhin, 67000 Strasbourg. In case of emergency: La Capitainerie du Port, 5, rue du Port du Rhin – North Lock of the Port, quai Jacoutot, can be contacted at any time. Tel: 88.32.49.15. There is also a public call box at the disposal of anybody at any time.
SERVICES: For the ship: Tank cleaning: SPIRSE, 14, rue de Rouen, 67000 Strasbourg, Tel: 88.61.40.45

Supplying of material: Koejac, quai des Belges, 67000 Strasbourg, Tel: 88.61.26.78.

Electronic repairs or supplies: Radio-Metzger, 17, rue de Dunkerque, 67000 Strasbourg, Tel: 88.35.45.42.

For the crew and various formalities (customs): La Capitainerie du Port, 5 rue du Port-du-Rhin, 67000 Strasbourg, Tel: 88.32.49.15.
SHORE LEAVE: The Master must introduce himself, within the 2 hours following his arrival, to the Commissariat Special du Port, 5 rue du Port du Rhin, 67000 Strasbourg, and produce the passports of the crew. The passenger ships have to comply with the regular supervision of authority. Each member of crew must be holder of an identification card or a passport when he is ashore.
REGULATION: The Reglement Particulier de Police du Port is very helpful to the Master and will let him know the particulars of the Port of Strasbourg.
DELAYS: The commercial operations begin and finish at the dates and hours shown upon the fluvial bill of lading. Every delay is subject to the payment of penalties. Except for the passenger ships, ships do not give notice of their arrival to the authority, before they enter into the port.
AUTHORITY: Port Autonome de Strasbourg, 25 Rue de la Nuée Bleue, F-67081 Strasbourg Cedex. *Tel:* 88.32.49.15. *Telex:* 880476 F Poronome Strbg. *Contact:* M. Georges Delmas, Port Director.

TONNAY CHARENTE: 45.57 N. 00.53 W. (See Plan)

DOCUMENTS:
2 copies Crew List.
2 copies Ship's Stores Lists.
2 copies Crew Manifests (Tobacco List).
2 copies Passenger List (if any).
1 Declaration of Ballast.
Manifest form Last Port.
1 copy Bill of Lading (in case of any cargo to be landed).
Ship Register to be shown.
Derat Certificate or Exemption.
PILOTAGE/ANCHORAGE: Vessels have to proceed to about half a mile S.S.W. Isle of Aix Lighthouse and to drop anchor in the No. 115 alignment when safe anchorage is open (lowest tides; minimum depth of water 26 ft.).

River Pilot joins ships there, about 3 hours to 1 hour before HW, depending on draft and size of vessel concerned.

Pilot boat is equipped with VHF.

RESTRICTIONS: As the River Charente is unlit, movements are not possible at night. However, vessels may leave anchorage in dark and come up river at daybreak (anchorage area is about 5.5 miles from the mouth of the river).
MAX. SIZE: Max. permissible LOA about 378 ft.; max. permissible draft about 17 ft. 6 in. at any tide; max. permissible draft 21 ft. 6 in. at Spring tides.
HEALTH: Free Pratique is to be obtained on arrival at port. Usual yellow flag signal to be raised.
RADIO: Ships coming from South: Bordeaux-Arcachon Radio Station. Ships coming from North: Saint-Nazaire or Brest le Conquet Radio Stations.
VHF: No continuous listening out at the port. Nevertheless, vessels coming into the Roads can call up a correspondent by phone through Bordeaux – Radio – Channel 26.
TUGS: No tug is available. In case of need, tug may be obtained from La Rochelle-Pallice (about 20 miles).
BERTHING: 1 private berth for grain loading, which can take vessels up to 100 m. length. 1 berth 200 m. long for handling general cargo. 3 waiting berths. The central waiting berth can be used for handling small cargoes from 500 to 1,000 tonnes. Depth of water along the quays is an average of 6 m.
CRANES: 2×5 tonne cranes, 1×3 tonne crane, 2×5 tonne mobile cranes. All the cranes are capable of working with hooks or scoops.
BRIDGES: The Rochefort Bridge clearance over highest water is about 98 ft. (30 m.).
STEVEDORES: A 24-hour notice is required in order to arrange loading/unloading operations.

Discharge rates: Coal – about 1,200 tons per day of 8 hours' work.
Phosphates – about 1,500 tons per day
Zinc concentrates – about 1,400 tons per day.
Loading rates: Grain 2,000/2,500 tons per day.

OPENING/CLOSING HATCHES: This is the responsibility of the crew.
MEDICAL: The nearest hospital is at Rochefort (about 4 miles).
FRESH WATER: Fresh water may be obtained alongside, from hydrants, at the rate of about 10 t.p.h.
FUEL: Must be obtained from La Pallice (about 20 miles) by lorries.
REPAIRS: Small repairs may be carried out by local workshops. Nearest shipyard is at La Pallice.
REPATRIATION: Changing crew and necessary repatriation formalities may be effected.
AIRPORT: The nearest airport is La Rochelle (about 30 miles). Possible to reach Paris airports in a few hours by train.
POLICE/AMBULANCE/FIRE: Police: Rochefort H.Q. – Tel: 17; Tonnay-Charente Gendarmerie: Tel: 46.88.20.38; Ambulance: Tel: 46.99.30.69; Fire: Tel: 18 or 46.88.20.38.
AUTHORITY: Direction Departementale de L'Equipement de la Charente-Maritime, Arrondissement Maritime, B.P. 125, Subdivision "Maritime-Hydrologie", 17306 Rochefort-Sur-Mer Cedex.
Contact: M. Drieu, Sous-Lieutenant de Port.
AGENT: See "Paris".

TOULON: 43.07 N. 05.55 E. (See Plan)

DOCUMENTS:
Cargo Manifest or Manifest of Ballast.
Certificate of Cargo Space.
Bills of Lading.
Ship's Register.
6 Crew Lists.
3 Passenger Lists.
Health Declaration.
Derat Certificate or Exemption.
Declaration of Crew Personal Effects.

PILOTAGE: Pilot station is situated on Est Quay, address: B.P. 742, Toulon. Tel: (94) 410328. Pilotage compulsory for vessels over 150 g.r.t. Pilot boards 100 m. North of the semaphore station at Cap Cepet.

There are 3 mooring buoys in the Inner Harbour owned by the Navy. The buoys can be utilised by merchant ships on request and are able to accommodate vessels up to 30,000 tons displacement.
RESTRICTIONS: Entry can be made by day and night except for vessels loading with refined petroleum or dangerous cargoes which are not allowed to enter between sunset and sunrise.
MAX. SIZE: The port is approached by a channel 125 m. wide. The docks can accommodate without tug assistance ships up to 250 m. length and 8.80 m. draft.

Renovation and reconstruction work is being carried out, after which passenger vessels of over 300 m. length and cargo vessels of up to 11 m. draft will be accommodated.
HEALTH: Pratique given by Customs Officers who board on arrival. If any case of suspected disease on board or any reason why vessel should not receive Free Pratique, Master should radio Agent before arrival, advising full details.
TUGS: Naval Tugs. There are many harbour tugs up to 1,000 h.p. and several deep sea tugs up to 2,000 h.p. controlled by the French Navy which may be called on for assistance by the Harbour Master or Pilots.

Commercial Tugs: 2 tugs of 180 h.p. owned by the Port Authority are used to assist smaller vessels.
BERTHING: President Fournel Quay, 335 m. length, depth alongside 9 m.
East Quay, 190 m. length, depth alongside 8.50 m.
Minerve Quay, length 135 m., depth alongside 7 m.
La Seyne – Bregaillon: One Ro/Ro Berth, depth 7.0 m. Ore quay (2 berths), length 215 m., depth 9.0 m., 2×26 tonne cranes.
TANKERS: Tankers discharge at naval installations at Milhaud and Lazaret.

Total Terminal. 1 jetty berth for tankers up to 6 m. draft, and a buoy berth for vessels up to 15,000 tons displacement.
STEVEDORES: There is a permanent working force of 30 dockers which can be increased by casual labour to 60 men if required. Shifts are available for 4 hours, 8 hours or 9 hours with possibilities for overtime.
FUEL: Only available by tanker lorries.
REPAIRS: Chantiers du Nord et de la Mediterranee, Shipyard specialising in naval construction. Total length of repair quays 835 m. Heavy-lifting facilities available.

Serra Fres: Floating dock 1,700 tons, length 85 m.

All types of repairs can be carried out at the Naval Dockyard.
DRY DOCKS: Several dry docks available in the Naval Dockyard, of which 3 can accommodate vessels in excess of 250 m. length.
IDENTIFICATION CARDS: Crew men going ashore should carry passport or identity card.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year (1st January, no labour available); Easter Sunday (possibility of labour with overtime); Easter Monday (no labour available); Labour Day (1st May, no labour available); Ascension Day (possibility of labour with overtime); Whit Sunday (possibility of labour with overtime); Whit Monday (no labour available); National Day (14th July, no labour available); Assumption Day (15th August, no labour available); All Saints' Day (1st November, no labour available); Armistice Day (11th November, possibility of labour with overtime); Christmas Day (25th December, no labour available). N.B. Every Sunday and day marked "possibility of labour with overtime" can be worked at the rate of 100%.
AUTHORITY: Direction Departementale de l'Equipment, Capitainerie du Port de Toulon, B.P. 1202, 83070 Toulon Cedex. *Tel:* (94) 429000, (94) 032760. *Telex:* Equip Toulon 400272.
AGENT: See "Paris".

TROUVILLE-DEAUVILLE: 49.23 N. 00.05 E. (See Plan)

The port situated on mouth of River Touques, is composed of 2 parts: Trouville for small fishing vessels, and Deauville including 2 docks for cargo ships and pleasure boats.

DOCUMENTS:
1 Crew List.
1 Passenger List.
Tonnage Certificate.
2 Cargo Manifests.
Bills of Lading.
1 Crew Manifest.

PILOTAGE: Pilotage on entry and leaving is carried out by the Seine Pilots. Request for a Pilot must be made 12 hours in advance by radio or telephone, either to the Port Captaincy of Trouville-Deauville or to the Pilotage Office for the Seine at Le Havre or at Rouen. Vessels bound for Trouville/Deauville anchor in the "Rouen Waiting Area" Roads at Carosse where they take on the Pilot.

It is recommended to anchor near the pilot boat of Rouen and contact her by VHF for instructions.
ANCHORAGE: The best one is Rade de la Carosse (Lat. 49° 27′ 30″ N., Long. 0° 01′ E.).
RESTRICTIONS: No restrictions at night time. Draft allowed 2.80 m. Neap tides, 4.0 m. Spring tides, Entrance is dangerous with wind from N.W. to N. over force 6.

Access channel has a depth of 2.80 m. and dries out (zero on French charts). Lock gates are opened about 2 hours before time of commencement of flood tide at Le Havre. Lock gates are closed 2.5 hours after time of commencement of flood tide at Le Havre. The fore port and river quays at Trouville are uncovered at low water. The Trouville fishing port is one where craft are beached.
MAX. SIZE: Length: 210 ft. (64 m. OA); breadth: 45 ft.
RADIO: Radio-Boulogne FFB.
TUGS: No tugs available.
STEVEDORES: Loading and discharge by shore crane.
MEDICAL: All hospital facilities available.
DENSITY: 1025.
FRESH WATER: Available from quay.
FUEL: Small quantity by tank-lorry on demand.
CONSULS: See "Caen" or "Le Havre".
REPAIRS: Small repairs only.
AIRPORT: Deauville St. Gaitien 3 miles away.
AUTHORITY: Commandant du Port, Capitainerie du Port, Boulevard Cornuge, 14800 Deauville. *Tel:* (31) 88.28.71.
AGENT: See "Paris".

Gabon

CAPE LOPEZ: 00.38 S. 08.43 E. (See Plan)

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
3 Lists of Ports of Call.
2 Manifest of Ship's Stores.
Clearance from Previous Port.

PILOTAGE: No official radio station. Pilotage not necessary to approach Port Gentil Roads.

Pilotage to Cape Lopez Terminal is assumed by Elf-Gabon Pilots, while pilotage to Pointe Clairette Terminal depends on Port Gentil Harbour Authority.

For the private tanker ports at Pointe Clairette and Cape Lopez, pilotage is compulsory. On Cape Lopez Roads Pilot will board vessel 1.5 miles offshore on a line with Cape Lopez Lighthouse bearing 255° True, distance 2.4 miles in a launch carrying proper Pilot signals. The Mooring Master will stay on board throughout the vessel's time in port to assist in mooring, hose handling and loading operations.

ANCHORAGES: The waiting anchorage position is 2 nautical miles in a 075° direction from Cape Lopez Lighthouse. Depth of water 55 m.

It is necessary to guard against violent tornadoes occurring between December and May coming from the East or the North. These tornadoes occur very suddenly and are extremely strong.

MAX. SIZE: 250,000 d.w.t. and LOA 340 m. Max. draft 20.50 m. (67 ft.).

Minimum size of vessel: LOA: 215 m. (Approx. 35,000 d.w.t.).

If vessel arrives with a part cargo from another loading port the maximum arrival deadweight acceptable is 160,000 metric tons.

RESTRICTIONS: Berthing is effected day and night, however, certain vessels may be berthed in daylight only. Unberthing is effected by day or night. Vessels must arrive with sufficient ballast and correct trim in order to manoeuvre safely.

Ballast should not be less than 30% of deadweight. Fresh water and stores are not considered as ballast; draft on arrival should not be less than 50% of loaded draft. Elf Gabon reserve the right to leave vessels which do not comply with these regulations at anchor.

Berthing is not effected in rough weather. At the berth mooring lines must be in good condition and well tended. In case of storm or tornado loading operations must cease and vessel be prepared to leave the berth if so directed by the Terminal Superintendent or Pilot.

HEALTH: Formalities carried out on berthing. However, ships remaining at anchor may have Customs and health formalities carried out through their Agent.

RADIO: *Libreville Radio:* Call sign: "TRA" keeps watch on 500 kHz and 2182 kHz from 0600 – 1800 hrs. GMT.

Elf Gabon Terminal: VHF watch on Channel 16 or 72. The working Channel of the terminal is Channel 72.

When a ship is expected, a permanent watch on VHF Channel 16 is kept by the terminal for short distance communications.

All ships must contact the terminal in advance of their arrival. Elf Gabon will inform the vessel whether berthing will take place on arrival or whether it should anchor.

Arrival Advice: Advise Agent 48 hours and 24 hours before arrival, also if any appreciable alteration thereafter.

VHF: Before vessel's arrival watch is kept on Channel 16. During loading and mooring, watch is kept on Channel 72.

TUGS: Compulsory. Owned by Elf-Gabon, can be contacted on 2182 kHz or VHF Channel 72. Ship tow lines are not required, 3 tugs are available up to 3,200 h.p. There are 2 launches for handling mooring lines.

BERTHING: Anchors are not required for mooring operations but must be ready for emergency case. Vessel berths port side alongside on 6 dolphins, heading 044° True. Depth of water along the berth is 25 m. Mooring ropes used as follows: fore and aft 3 head/sternlines, 3 breastlines, 2 springs. 2, 3, or 4 tugs are used for mooring operations, in accordance with the d.w.t. Vessel's engines must be ready for immediate operation all the time vessel is at the berth. 2 or 3 tugs will remain standing by. Ship's gangway is not required, an automatic one is supplied by Terminal.

Connecting Hoses: Connection and disconnection is carried out by Elf Gabon personnel with the assistance of the crew.

The vessel's cargo derricks are not used except in the case of absolute necessity or in the case of breakdown of the platform hoisting gear.

The 4 loading arms are 16 in. diameter, with hydraulic couplers for 16 in., 14 in. and 12 in. flanges. The arms are located on either side of the dolphins' centreline.

Reducers shall be provided by the ship for the other flange diameters.

Before connecting arms, the ship will be connected to the ship-shore bonding wire, and disconnected only after loading arm uncoupling.

Hose Handling: 5 arms. Crude: 4 × 16 in. arms. Loading rate: 12,000 cu.m./hr. Finished products (Diesel and Naphtha) are loaded by means of a 5th loading arm; 2 loading arms can be used for Fuel Oil.

Loading: Communication between ships and shore loading installations, in any case (loading, fire, etc.), will be effected on VHF Channel 72.

An Elf Gabon representative, responsible for loading and safety is on permanent watch at the berth. The Master must supply him with all relevant information and assistance required to ensure operations run smoothly.

The Master will be held entirely responsible for operating the valves and for safe loading on board his ship. If necessary, pumping speed can be reduced.

At least 10 minutes before loading is finished, the terminal should be notified of the moment pumping should be stopped.

When loading is completed, the tank ullages will be taken by a ship's officer in the presence of an Elf Gabon representative.

Average samples taken from each tank from which the crude was pumped will be furnished to the ship by the terminal.

These samples will be numbered, sealed and labelled showing the origin of the crude.

Notice of Readiness: To Elf Gabon.

BALLAST: Vessels must arrive with clean ballast only. There are no facilities for discharging dirty ballast at the terminal. In no circumstances should dirty ballast be pumped overboard.

MEDICAL: Doctors and hospital facilities available. All vaccinations can be arranged.

DENSITY: Varies between 1021 and 1025.

FRESH WATER: Fresh water supplies can be obtained within a few hours from a 120 ton barge. Apply to Port Gentil.

FUEL: 1,500 secs. and 3,500 secs. fuel can be supplied by barge or at berth whilst loading, subject to 48 hours' notice.

CUSTOMS ALLOWANCES: No restrictions for quantities tobacco and spirits held on board the ship. It is prohibited to allow dutiable articles to leave the ship.

CONSULS: France, German (F.R.) and United Kingdom.

REPAIRS: There are facilities for hull and engine repairs for barges and river craft. Slipway for vessels up to 300 tons.

AIRPORT: Can be reached in 15 minutes by road. Regular services to Europe every day.

TIME: GMT plus 1 hour all the year round.

HOLIDAYS: Holidays do not affect tanker working.

POLICE/FIRE/AMBULANCE: Police tel. 17; Fire tel. 18; Ambulance tel. 23-33.

REPATRIATION: Facilities available. Contact ship's Agent.

SHORE LEAVE: Crew members are allowed ashore. There is no regular immigration control but identification papers should be carried. Bathing alongside the ship and the berth is strictly prohibited.

GENERAL: *Ships spares:* Customs require originals of invoices for clearing spares. Copies are not acceptable.

SAFETY: During the whole time the ship remains at the loading berth, the Master shall:

Maintain on board sufficient number of crew members to carry out any manoeuvre without difficulty, and to enable first fire fighting measures to be taken; maintain engines ready for manoeuvring; ensure that mooring is satisfactory without undue wear on mooring lines.

Fire Precautions: It is forbidden: To smoke, use naked flame or tools likely to create sparks outside the zones generally authorised for tankers; to carry out repairs or handling operations on deck; to turn the propellers; to use in danger areas any equipment or tools not of a type approved by a competent organisation. Elf Gabon reserve the right to take any steps considered necessary in case of danger and, in particular, to suspend loading; loading of bunkers, supplies, water, etc., will be submitted for the approval of Elf Gabon.

During loading:

All hull valves should be shut, except for those required for water circulation; all scuppers of main deck should be sealed; two fire hoses will be connected and set up, one at the bow. the other at the stern of the ship. The fire main shall be maintained under pressure at all times; two long robust steel safety ropes should be placed on the starboard side of vessel, one at the bow and one at the stern. The eyes should be maintained at the right distance from the water so that tug boats can easily catch hold of them.

Movement Restrictions:

It is forbidden to enter the zone of Elf Gabon installations without due authorisation. Smoking or use of lighters or matches are strictly prohibited.

In case of fire on board a ship moored to the loading berth, the Shipmaster shall give the alarm by sounding a series of short blasts on the siren and advise Terminal on VHF Channel 72. He is responsible for organising fire fighting and ensuring the stability and safety of his vessel, taking all the necessary steps in this respect.

Elf Gabon may order any safety measures to be taken in the general interest of everyone.

If considered necessary, during a storm, the loading operator may suspend loading and disconnect the loading arm.

Safety Look-out:

Elf Gabon have a permanent look-out on the loading platform under the orders of the chief loading operator.

Equipment at disposal of ship:

Stand-by tugs (2×2,000 h.p. minimum); mooring launches 140 h.p.; equipment permanently available at berth (water screen, hoses, etc.).

A Kleber anti-pollution barrier 500 m. in length can be launched within a few minutes.

A "Vortex" device can be used to re-pump the crude oil spilt in the sea. This crude oil is then collected in plastic tanks.

When a ship pollutes the sea, the above action and use of these devices will be charged to the vessel.

WEATHER:

Meteorology: From June to September the prevailing wind comes from S.S.E. and can reach force 6. From October to end of May, and especially during February, March and April there is a risk of tornadoes. They can come from any direction and are always very dangerous.

Tide: Mean amplitude of Spring tide is 2.20 m.

Swell: The terminal is protected from ocean swell. Wave height created by tornadoes can reach 2.50 m.

Current: Generally less than 0.5 knots but can reach 1 knot. Average direction 040° and 215°.

SHIPMASTER'S REPORT: 1977. (Updated September 1986). This vessel is an OBO carrier of 159,250 d.w.t. and called for a part cargo of 85,000 tons of Mandji Crude.

Mandji Crude has an API of between 30.0 and 30.4 and was on this occasion loaded at 97°F.

It appears to be wax-free and has a slight suspended water content.

Vessel size: Accepts vessels from 35,000 d.w.t. to 250,000 d.w.t., max. sailing draft is 67 ft.

Berth: Berth face about 420 ft. long with connected mooring posts. "Floating" type fender piles. Pilots are cautious of impacts as berth is piled into very deep soft mud. Moorings on our visit were: Forward: 3 head lines, 3 breast ropes and 2 springs. Aft: 3 stern lines, 3 breast ropes, and 2 springs. (See "Plan").

The springs were sent ashore first, fore and aft.

All lines are run, 1 at a time, by mooring boat, and there is no problem running wire rope moorings.

There is a shore gangway mounted on a tower.

Load Rate: Total max. rate of 12,000 t.p.h. using 4 chicksan loading arms. The connections are 16 in. and hydraulically coupled.

Berthing: Straight forward operation, no significant currents, vessels tie up bow out, port side to jetty.

Berthing Operations: From end of passage to all secure was accomplished in just over 3 hours, from Pilot aboard to secure took 2 hours. Connection of the loading arms used by this vessel took 1 hour.

From commencement of singling up to Pilot away took 1.5 hours.

Tugs: There are 2 modern 3,000 h.p. Kort Nozzle tugs and 1 older tug of 2,000 h.p. stationed in the port. The larger tugs made fast fore and aft, and the smaller pushed midships. On sailing only one of the larger and the smaller tug were used. The tugs normally use their own lines and remain fast until mooring is completed.

Weather: Mild and pleasant apart from tornadoes which occur from October to May, but especially February, March and April.

These spring up without notice to very violent winds in minutes, and though it is understood loading may be suspended, the tugs are used to assist vessel to remain on the berth if required.

Bunkers: A bunker line is being installed on the jetty, a barge is used temporarily, but it is understood that delays can be expected in taking bunkers, and they must be ordered beforehand from Elf Paris.

Fresh Water: Said to be available by barge from Port Gentil.

Usage: According to the Pilot, about 12 ships a month use the berth.

Slop Reception: There are no facilities, vessels must arrive with clean pumps and clean lines.

Radio: Tugs and Pilot are on VHF 16/72 and Marine and Terminal Operations are on VHF 72.

Repairs: Doubtful if any repairs could be undertaken, possibly in emergency the refinery workshops would assist.

Communications: There are regular daily flights to Libreville, and connections from there worldwide with minimal delay. Flight time Cape Lopez to Paris is said to be 7 hours.

Crew Changes: Could be carried out easily from a point of transportation, but Port Gentil only has 1 hotel and 1 guest house and they are stated to be full to capacity at all times.

Medical Service: Could not be obtained because vessel berthed on Saturday. However, there is a hospital.

Chandler: The port has a chandler, but there is no local produce whatsoever, all vegetables, etc., being airlifted from France and prohibitively expensive.

Cargo: Mandji Crude at loading temperature 95° to 100°F., API 30.25, has slight percentage suspended water.

Shore Leave: Permitted, but walking through the installation is forbidden for security reasons, and transportation is apparently difficult to obtain.

General: I understood no clearing or formalities are completed until vessel is berthed.

Pilotage: Mooring Master now performs pilotage only and leaves after berthing.

Accommodation: No longer required to provide accommodation for shore people.

SHIPMASTER'S REPORT: November 1981.

The Shipmaster's report dated 1977 still correct except for the following points.

They require 3 Birds and Animals Lists, 3 Arms and Ammunition Lists, 3 Narcotics Lists and 3 copies of Notice of Readiness.

Agency listens on VHF Channel 16 during normal working hours and they also listen at 0900 and 1500 LMT on frequency 2506. Cargo papers usually take 2 hours after completion of loading. There was no problem with crew going ashore.

AUTHORITY: Elf Gabon, B.P. 525, Port Gentil, Gabon. *Tel:* (241) 75-60-00. *Telex:* 8210 – 8216 Go Elferap. *Contact:* L. A. Jean, Operations Manager.

Terminal: Cape Lopez Terminal, B.P. 524, Port Gentil, Gabon. *Tel:* 75.63.09. *Telex:* 8210, 8216. *Contact:* Terminal Manager.

AGENT: Socopao-Gabon, BP 560, Port Gentil. Tel: 752491. Cables: "Freight Portgentil". Telex: 8223.

GAMBA: 02.50 S. 09.59 E. (See Plan)

SEA TERMINAL: SBM.

DOCUMENTS:

Last Port Clearance.
3 lists of Last Ports (during last 3 months).
3 Stores Lists.
4 Crew Lists.
3 Personnel Effects Lists.
3 Lists of Vaccinations.
1 Notice of Readiness.

APPROACHES: The approaches to the terminal are open deep water. Gamba sea terminal fairway buoy is located in position Lat. 2° 50.1′ S., Long. 9° 56.5′ E. Black buoy. Group Occ(2) 10 secs. Visibility 4 miles.

The single buoy mooring is located in position Lat. 2° 50.1′ S., Long. 9° 58.9′ E. and exhibits a white flashing light, visible for 5 miles.

Gamba Lighthouse: Lattice tower. Red and white. Height 47 m. White flash 2/10 secs. Visibility 21 miles. Position, Lat. 02° 47.0′ S., Long. 10° 01.4′ E.

READINESS: The Notice of Readiness will be received and accepted by the Berthing Master at the anchoring time if the ship is delayed on request of the Terminal (scheduled delays, awaiting cargo, awaiting orders, weather conditions, etc.) or at the time of mooring if the ship is berthed on arrival.

PILOTAGE: All tankers mooring at Gamba SBM must use the Shell Gabon Pilot who should also be used for unmooring.

Berthing Master boards tankers at the following position: Lat. 02° 50.0′ S., Long. 09° 57.0′ E.

The Berthing Master and his assistant will remain on board throughout loading. The Berthing Master also acts as ship's Agent and focal point for liaison with the shore; communications with the terminal by VHF (portable sets for ships not equipped with VHF are supplied).

The pilot boat/mooring launch which assist mooring/unmooring will stand by throughout loading. For this purpose a mooring rope will be provided aft, by the tanker.

ANCHORAGES: 2.0 miles N.W. from SBM in 60 ft. depth. Vessels anchor without assistance.

RESTRICTIONS: Heavy swell and tornadoes (October to May tornadoes can come from any direction and are always dangerous).

MAX. SIZE: Max. ship size 130,000 d.w.t., weather permitting. Max. distance bow to manifold – 465 ft. Max. draft 41 ft.

HEALTH: When advising ETA include in message whether any sickness on board. In case of emergency vessels should call before or after loading at Port Gentil for medical attendance or for crew changes. For this purpose send separate message to "Marine Gamba" and to Agency.

RADIO: Establish contact with Gamba Radio (call sign TRP 8) soon as possible (all open days or 4 days before nomination lifting date). ETA should be sent at least 4 days before arrival in Gamba to "Marine Gamba" via Gamba Radio. Thereafter keep close contact on VHF Channel 12 with Gamba Terminal.

Gamba Radio (TRP 8) Service:

Telegraphy A1	500 W On request by Gamba Marine.
Telegraphy A1 13070 kHz	2 kW General call and TFC list at 0900 hrs. Listen on 12 MHz band from 0900 – 0930 hrs. and on 16 MHz band from 0930 – 1000 hrs. Range about 6,000 miles.
6510 kHz	General call and TFC list at 1300 hrs. Listen on 6 MHz band from 1300 – 1330 hrs. and on 8 MHz band from 1330 – 1400 hrs. Range about 1,000 miles.
VHF F3	50 W. Call sign "Marine Gamba". Watch on Channel 16/12. Working on Channel 12. Range about 30 miles.

24 hours' service in French language. Watch in English language during office hours (0600 – 1100 hrs. and 1300 – 1600 hrs.).

Pilot Launch Service

20 W
Watch on Channel 12 (when at sea). Range about 20 miles.

Terminal Gamba

20 W
Watch on Channel 12. Range about 20 miles, used only for loading operations.

Radio Beacon: Continuous airplane radio beacon call sign GZ, frequency 359 kHz. Position: Lat. 02° 46.8′ S. Long. 10° 02.3′ E.

N.B. All times in GMT.

BERTHING: Berthing takes place both by day and by night. If a Shipmaster refuses to berth by night, delays will be charged to his vessel.

Depth and draft: Depth at berth: 59 ft. From this figure must be deducted the height of the manifold which is 8 ft., thus leaving a controlling depth of 51 ft. A nominal underkeel clearance of 10 ft. is allowed to take account of ship movement caused by swell. This leaves an approved safe draft of 41 ft.

SBM Description: The buoy is 8 m. in diameter, 4 m. high. A double 16 in. manifold is provided on the turntable (one pipe is blanked) 90° clockwise from the tanker securing point. The SBM is moored by means of 8 chains which are secured to the seabed by 120 tons holding power anchors.

MOORING: Recommended that vessel should be trimmed max. 8 ft. by the stern on arrival.

Ships must have ready on the forecastle, and before approaching the SBM, four synthetic mooring lines lashed two by two each side. These mooring lines will be connected to the pickup wires by the mooring launch by means of shackles and heaved up until the triangular plates are on board and are in turn connected to the mooring wires by means of forelock shackles. If vessel is not fitted with central fairlead, the most forward fairleads on either side will be used.

Vessels moor with 2×10 in. nylon ropes (length 50 m.) from SBM secured on board ship by two 2.25 in. chain cables plus two 3.25 in. wires which provided by terminal. Berthing Master will advise in detail mooring procedure.

LOADING: A derrick should be rigged with double whip and topped on the port side for loading mooring equipment and hose lifting.

Shore Line System: SBM – 1×28 in. submarine pipe-line (total length to Terminal 7.3 km. (24,000 ft.)). Reduced to 16 in. for connection to ship's manifold (total length of floating hoses: 865 ft.).

Gamba Crude Characteristics:

Density at 15°C:	0.8663	Salinity:	20 to 35 mg./Kg.
API at 60°F:	31.75	Cloud point:	39°C
BSW:	0.005%	Wax:	18%

Connection/Disconnection: Connection and disconnection are carried out by ship's crew with advice from Berthing Master. The hose is connected amidship on portside and is ended by a 16 in. reducer having A.S.A.B. 165 flanges.

If there are no suitable reducers available on board, Gamba Terminal should be advised by radio giving size of ship's manifold and pitch of bolt holes.

Loading: During the loading the Berthing Master remains on board and acts as Loading Master. He is in permanent contact with terminal by VHF.

If necessary the pumping rate can be reduced at any moment. The Loading Master will be advised at least one hour before the completion of the loading. The average loading rate is 2,500 cu.m. per hour.

Papers: The Loading Master receives by VHF shore figures from the Terminal about one hour after the completion of the loading. All documents are completed before the departure of the ship. Two sets of documents are delivered to the Master: one for his own purpose and one for the Consignee.

Engines: Engine immobilisation is forbidden at the SBM. Engines should be kept ready for use at any time at the Berthing Master's request.

MEDICAL: No medical or dental facilities at Gamba (See "Health").
DENSITY: 1025.
FRESH WATER/FUEL: Not available.
REPAIRS: No facilities available.
BALLAST: There are no facilities for discharging ballast ashore. Vessels must arrive at the loading terminal with clean ballast only, apart from contents of the slop tank.
GANGWAY/DECK WATCHMEN: Not required.
CUSTOMS ALLOWANCES: No restrictions on Tobacco/Wine.
CONSULS: None, French consul in Port Gentil.
REPATRIATION: No facilities.
AIRPORT: Gamba airport is local airstrip and is connected to Port Gentil by daily service (Except Sunday). Port Gentil airport is connected to Libreville International airport by daily services. Mail reaches any European country within seven days.
TIME: GMT plus 1 hour throughout the year.
GENERAL: The use of Channel VHF 9 is forbidden.
Ship's Spares: Customs require originals of invoices for clearing spares. Copies are not acceptable.
SHORE LEAVE: Not allowed.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Shell Gabon, Gamba Marine (GMA), B.P.146, Port Gentil, Republique du Gabon. *Tel:* 752651/52/53. *Telex:* Gls/Gma 8206 Go. *Cables:* Shell Gabon Port Gentil. *Contact:* GMA Berthing Pilot, Gamba Marine.

AGENT: See "Port Gentil".

LIBREVILLE: 00.23 N. 09.26 E.

PORT LIMITS: The seaward boundaries of the port within which a vessel is considered to be an "arrived ship" and (subject to C/P terms) laytime will commence is 2 miles off shore at Libreville Harbour.
DOCUMENTS: See "Port Gentil".
PILOTAGE: None available.
ANCHORAGES: Bottom of roads in Libreville slopes very gently down towards open sea. The greater the vessel's draft, the further out it must moor. e.g., ship of 7 m. to 8 m. draft will be moored approx. 1,500 m. from Harbour Pier. Ship 5 m. – 6 m. draft will be able to approach the Harbour Pier as near as 500 m. to 600 m. For reasons of safety, forbidden to come nearer, particularly during tornado season – February to May and September to December.
RESTRICTIONS: No restriction imposed on entering or leaving the Estuary. Channel marked by 5 buoys provided with radar reflectors and flashing lights. Sixth buoy, called a "landing buoy" moored in roads, where vessels moor.
MAX. SIZE: *Shipmaster's Report:* March 1980. Max. draft 7.4 m.
HEALTH: If there is sickness on board, Health Service warned by Consignor of vessels. Health Service can go on board to check state of crew's health. Immigration Service can also board to check crew list and condition of passengers, if any.
RADIO: *Libreville Radio:* Radio-telephony from 0600 to 1800 hrs. GMT on 2182 kHz, Radio-telegraphy from 0600 to 1800 hrs. GMT on 500 kHz, call sign TRA 22; from 0800 to 0830 hrs.on 13101 kHz, call sign TRA 8; from 1630 to 1700 hrs. GMT on 8722 kHz, call sign TRA 8.
TUGS: Tugs intended only for towing lighters, horse power 150 to 250, unsuitable for any harbour towing.
BERTHING: Only for lighters and small coasters with a draft of less than 3 m. Crews working unloading or loading of vessels in roads supplied by Consignor of the ship. Harbour Services have no radio apparatus. Shipping companies all have radio-telephone extensions, which allows them to be in permanent contact with vessel moored in roads. Unloading or loading operations of goods carried out by lighters which, towed by small tugs, ensure rotation between vessel in operation and quay. All this equipment belongs to shipping companies dealing with consignment of vessels in the roads. Every vessel arriving in roads must have its consignor.
STEVEDORES: Available.
MEDICAL: Hospital available, and in case of necessity, patient or patients will be admitted.
FRESH WATER: Water supply real problem, as there is no tanker to transport it. Therefore strongly recommended that any ship touching Douala coming from the North or Pointe-Noire coming from South, should fill up at one of these ports.
FUEL: There are fuel-tankers belonging to shipping companies. The tanker which provisions Libreville two or three times a week is brought alongside buoys in roads, (position: Lat. 0° 23′ 51″ N., Long. 9° 25′ 42″ E.); fuel is transhipped by sea-line to tank on shore.
FIRE PRECAUTIONS: No special precautions.
GANGWAY/DECK WATCHMEN: Carried out by crew.
OPENING/CLOSING HATCHES: This is done with the tacit agreement of the ship's Officer and the Consignor.
CARGO GEAR: Ship's own gear used.
CONSULS: None.
REPAIRS: Small repairs possible.
DRY DOCKS: None.
REPATRIATION: No facilities.
AIRPORT: 9 km. from the harbour. Links with French-speaking Africa, Switzerland, and France, also Johannesburg.
TIME: GMT plus 1 hour.
HOLIDAYS: 17th August, Independence of Gabon; 1st May, Labour Day – these are the only holidays in force.
SERVICES: None.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Required.
DELAYS: First come, first served method.
GENERAL: *Ship's Spares:* Customs require originals of invoices for clearing spares. Copies are not acceptable.
AUTHORITY: Capitainerie du Port.

AGENT: Socopao-Gabon, B.P.4., Libreville. Tel: 70.21.40 and 70.21.53. Telex: 5212. Cables: "Freight Libreville".

LUCINA MARINE TERMINAL: 03.40 S. 10.46 E.

(See Plan)

DOCUMENTS: See "Gamba".
APPROACHES: Navigation aids:
Platform LD 1: The flare installed on the Production platform LP 1 is very conspicuous.
Platforms: LD 2, LD 3, LD 4, LD 5, LWD 1: The beacons on these platforms consist of two white Morse code lights: Letter "U" 15 seconds.
SBM light: Position: Lat. 03° 39.6′ S., Long. 10° 46.2′ E. One flash 0.3 secs. each sec. Visibility 5 miles.
Storage tanker: The storage tanker is showing the lights of a ship at anchor and letter "U", 15 seconds. Fore and aft. During the hours of darkness all deck lights are switched on.
NOTICE OF READINESS: See "Gamba".
PILOTAGE: Berthing Master boards vessel in position Lat. 03° 39′ S., Long. 10° 44′ E. Also see "Gamba".
ANCHORAGES: Vessels must anchor without assistance. Recommended anchorage in 19 fathoms about 1.5 miles N.W. of storage tanker.
RESTRICTIONS: No draft restrictions. Depth of water can be assumed to be 114 ft.
MAX. SIZE: Max. ship size 130,000 d.w.t., weather permitting. Max. distance bow to manifold – 465 ft.
HEALTH: See "Gamba".
RADIO: All messages sent to "Marine Gamba" through Gamba Radio TRP 8 (see "Gamba").
ETA: Should be sent to "Marine Gamba" via Gamba Radio. First ETA should be sent at least 4 days before arrival.
VHF: Vessels should call Marine Gamba on Channel 16 or 12 during office hours when passing Gamba area. Permanent watch on Channel 12 or 16, on the storage tanker and the mooring launch.
BERTHING:
Description and Location: The development consists of oil producing wells, which are protected by 4 single four-pile platforms, LD 1 (Lat. 03° 41′ S., Long. 10° 44.3′ E.) – LD 2 (Lat. 03° 41.8′ S., Long. 10° 45′ E.) LD 3 (Lat. 03° 42′ 28″ S., Long. 10° 46′ 01″ E.) – LD 4 (Lat. 03° 40′ 56″ S., Long. 10° 44′ 37″ E.) – LD 5 (Lat. 03° 42′ 11″ S., Long. 10° 45′ 48″ E.) – LWD 1 (Lat. 03° 41′ 26″ S., Long. 10° 43′ 44″ E.). Production facilities are located on four-pile platform LP 1 which is connected by a bridge to the adjacent platform LD 1. An 85,000 d.w.t. "Banio", floating unit of storage is moored by means of 10 anchors in position Lat. 03° 40′ S., Long. 10° 45.8′ E. The FSU is connected with a SBM via a submarine line, length 1 km.
SBM description: The buoy is 8.5 m. in diameter and 4 m. high. Connections for submarine lines from the FSU are provided on the bottom of the centre swivel section which is free to rotate. (Other details same as Gamba).
Nylon moorings: Vessels moor with two 10 in. circ. nylon ropes from the SBM and are secured on board ship by two 56 mm. dia. stud link chains plus two 3.25 in. wires which are provided by the terminal. Both nylons are 50 m. long.
Floating hose and submarine line: 1×20 in. submarine pipe-line, length 1,100 m. from the FSU 1 floating line, length 865 ft., from SBM is reduced to 16 in. for connection to ship's manifold.
Mooring: See "Gamba".
LOADING: *Lucina Crude Characteristics:* Density at 15° C.=0.8258; API at 60° F.=39.8; B.S.W.=0.03%; Salinity=30 to 40 mg/kg; Cloud point=27°C.; Wax=14%.
Loading rate: Average loading rate 2,700 cu.m.p.h.
Connection/Disconnection: See "Gamba".
DEBALLASTING: See "Gamba".
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: No facilities. Engines not to be immobilised whilst at the SBM.
REPATRIATION: Not possible.
TIME: GMT plus 1 hour throughout the year.
SHORE LEAVE: Not allowed.
GENERAL: *Ship's Spares:* Customs require originals of invoices for clearing spares. Copies are not acceptable.
AUTHORITY: Shell Gabon, Gamba Marine (GMA), B.P. 146, Port Gentil, Republique du Gabon. *Tel:* 752651/52/53. *Telex:* Gls/Gma 8206 Go. *Cables:* Shell Gabon Port Gentil. *Contact:* GMA Berthing Pilot, Gamba Marine.

OGUENDJO TERMINAL: 01.27 S. 08.55 E. (See Plan)

LOCATION: Oguendjo Oil Terminal is located in the territorial waters of the Republic of Gabon and consists of:

1. Production Platform "B" located offshore in position Lat. 01° 26′ 44.5″ S., Long. 08° 57′ 15″ E. and Production Platform "C" located offshore in position Lat. 01° 28′ 13.5″ S., Long. 08° 54′ 00″ E.
2. An offshore loading berth composed primarily of a floating storage vessel, "Bon Bateau", permanently affixed by a "wishbone" rigid mooring arm to a single point mooring buoy.
3. A submarine pipe-line which runs from Production Platform "B" to the floating storage vessel, and a submarine pipe-line which runs from Production Platform "C" to the floating storage vessel.

The floating storage vessel is located S.W. of Port Gentil in approximately 90 ft. of water and is situated in open and unsheltered waters approximately 9.5 miles off the coast in position Lat. 01° 27′ 20.5″ S., Long. 08° 55′ 00″ E. (See "Plan".)

The Company's administrative offices are located in Port Gentil and Libreville. The Company's terminal offices, storage facilities and laboratory for testing stock are located onboard the floating storage vessel located at the loading berth.

DOCUMENTS: 4 copies each of the following documents are required when calling at Oguendjo Oil Terminal:

(a) Health Declaration and Vaccination Certificate for each crew member (vaccination against yellow fever is mandatory).
(b) Crew List.
(c) Derat Certificate/Derat Exemption.
(d) Crew Customs Declaration.
(e) Store List.
(f) Animal List.
(g) Passenger List.
(h) Narcotics List.
(i) Clearance from Last Port.
(j) Arms and Ammunition List.
(k) Manifest.

The vessel's registry and the up-to-date oil record book shall also be made available to the Mooring Master and appropriate governmental officials.

PILOTAGE: *Mooring Master:* Lifting vessels to be moored at the Loading berth will be boarded by a Mooring Master either at the customary anchorage or at the Mooring Master pick-up zone (see "Approaches"). The Mooring Master will be provided by the Company and will act as the Loading Master during loading operations. Lifting vessels will not be allowed to approach or depart from the loading berth without the assistance of the Company-designated Mooring Master. The Mooring Master will advise the lifting vessel personnel on the approaches to the loading berth; the operations of mooring and unmooring; the raising, connecting, disconnecting and lowering of the floating cargo hose, and in all other operations within the loading berth area. The Mooring Master will be in direct charge of the portable VHF radiotelephone and all the ship-to-tug and ship-to-launch communications will be by portable VHF radiotelephone. The lifting vessel's oil residue book shall be made available for inspection by the Mooring Master on his arrival at the lifting vessel. All manoeuvring of lifting vessels within the loading berth area shall be performed by the lifting vessel personnel as directed by the lifting vessel's officer in charge and in accordance with the procedure advised by the Mooring Master. the lifting vessel's Master or licensed deck officer must be on the bridge at all times while lifting vessels are manoeuvring.

Pilot Ladder: Lifting vessels are required to have a clean and efficient pilot ladder fitted with spreaders and manropes, safely and securely rigged, ready for the Mooring Master to embark and disembark on the port side of the lifting vessel and of sufficient length to reach the Mooring Master's launch. If at night, adequate lighting must be rigged overside for the Mooring Master to approach or depart from the port side of the lifting vessel and to use the pilot ladder safely. A lifebuoy with safety line and self-igniting light together with a rope messenger for the Mooring Master's bag shall also be available at the pilot ladder head. Lifting vessels shall afford a "Good Weather Lee" and shall reduce speed as directed by the Mooring Master in order to effect the safe embarking or disembarking of the Mooring Master.

Whenever, as in the case of large lifting vessels in light condition, the freeboard exceeds 30 ft., the accommodation ladder shall also be in use in conjunction with the pilot ladder and shall be lowered to about 12 ft. above the water with the pilot ladder rigged immediately adjacent to the bottom platform of the accommodation ladder. A mechanical hoist of an improved pattern shall be considered an acceptable alternative to a conventional pilot ladder for use in conjunction with the accommodation ladder, but a mechanical hoist whose operation relies upon a single wire shall not be considered of an approved pattern. The rigging of the pilot ladder for the embarkation and disembarkation of the Mooring Master shall be supervised by a licensed officer of the lifting vessel and shall be positioned so that the ladder is well clear of any overboard discharge and so that each step of the ladder rests securely against the lifting vessel's side. If, in the opinion of the Mooring Master, the pilot ladder is not safe, the Mooring Master may refuse to board the lifting vessel and any delay caused by such refusal shall be for the lifting vessel's account.

Lifting vessels shall provide food for the Mooring Master while on board the lifting vessel and shall accommodate the Mooring Master in the Pilot's cabin. Should the lifting vessel not be equipped with a pilot cabin, the Mooring Master shall be accommodated in a cabin equivalent to that required for an officer on the lifting vessel. The Mooring Master shall have access to the bridge and/or central area of the lifting vessel and such areas shall not be locked or otherwise arranged to prevent immediate entry at any time by the Mooring Master.

APPROACHES: *Approaches, Navigational Aids and Landmarks to Oguendjo Oil Terminal:* Vessels are referred to the appropriate Hydrographic Office publications, Admiralty publications and official charts for the approaches, navigational aids and landmarks to Oguendjo Oil Terminal. Caution, however, is required when navigating near the Terminal since oil installations and marine activities may be encountered and mariners are recommended to pass to seaward of all such areas and are advised not to anchor or fish in the vicinity of such oil installations or their pipe-lines. Mariners are specifically cautioned that an oil well area exists S.S.W. of Port Gentil and all navigation is restricted in the area within a line joining the following positions: Lat. 00° 44′ 30″ S., Long. 08° 45′ 00″ E.; Lat. 00° 46′ 40″ S., Long. 08° 38′ 26″ E.; Lat. 01° 09′ 22″ S., Long. 08° 28′ 36″ E.; Lat. 01° 35′ 54″ S., Long. 08° 38′ 03″ E.; Lat. 01° 35′ 54″ S., Long. 09° 12′ 35″ E. (See "Plan").

Approach to Terminal:

Anchorage Area: The customary anchorage area for vessels awaiting the loading berth at the Terminal is a rectangular area with the following co-ordinates: Lat. 01° 36′ S., Long. 08° 57′ E.; Lat. 01° 36′ S., Long. 09° 02′ E.; Lat. 01° 40′ S., Long. 08° 57′ E.; Lat. 01° 40′ S., Long. 09° 02′ E. and with its centre located about 14 miles S.S.E. of the loading berth in position: Lat. 01° 38′ S., Long. 08° 59.5′ E. (See "Plan"). Anchorage within the restricted area referred to in Section above is prohibited unless otherwise designated by the Company or the Mooring Master.

Access Lane: The access lane from the customary anchorage to the Terminal is an area approximately 1.7 miles in width and with axis which runs from the anchorage area for approximately 12 miles in a direction of 325° true to the Mooring Master's pick-up zone. (See "Plan").

Mooring Master Pick-up Zone: The Mooring Master pick-up zone is a N.W. aligned semi-circle with a radius of 2.2 miles and with a centre position at Lat. 01° 27.5′ S., Long. 08° 54″ E. Following receipt of instructions from the Company or the Mooring Master, a lifting vessel should proceed from the anchorage area through the access lane to the Mooring Master's pick-up zone where the lifting vessel will be boarded by the Mooring Master for berthing or where the lifting vessel may be requested by the Company or the Mooring Master to temporarily anchor to await permission to enter the loading berth. (See "Plan").

Terminal Safety Zone: Lifting vessels are prohibited from navigating within the safety zone at the Oil Terminal at any time unless the Mooring Master is on board. The safety zone is bounded by lines connecting the following points:

Point	*Latitude (South)*	*Longitude (East)*
(a)	01° 28.75′	08° 54.10′
(b)	01° 26.85′	08° 57.82′
(c)	01° 26.32′	08° 57.27′
(d)	01° 26.32′	08° 55.66′
(e)	01° 27.96′	08° 53.52′

ANCHORAGES: See "Approaches".

RESTRICTIONS: The Terminal is operated 24 hours a day, 7 days a week, weather and other circumstances permitting. Vessels are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, weather and other circumstances permitting.

MAX. SIZE: Max. draft 60 ft. Max. d.w.t. 170,000. Max. displacement 200,000 tons.

The Mooring Master may allow lifting vessels in excess of 170,000 d.w.t. to moor at the loading berth provided the lifting vessel first obtains the written permission of the Company to moor at the facility.

RADIO/VHF: *Initial Radio Communications:* The radio station at Libreville will handle the initial radio communications between lifting vessels and the Company. The station call sign is TRA, and, the station operates on 500 kHz from 0600 – 1800 hrs. (GMT) daily. The "Bon Bateau", call sign ELCT, is equipped with Mariset and maintains Mariset number 1241411.

Advice of Arrival: It is important that lifting vessels establish radio contact with the Company when 3 days' distance from Oguendjo Oil Terminal and maintain such contact until just prior to arrival at the Terminal. Lifting vessels should send an ETA message to the Company (Telex: 981-5569) not less than 72 hours prior to arrival at the Terminal, providing the following information:

1. The estimated time of arrival and name of local Agent.
2. The estimated draft, fore and aft, upon arrival.
3. The quality of crude oil to be loaded and the grade of such.
4. The estimated sailing draft.
5. The last port of call.
6. Whether the lifting vessel has a clean Bill of Health.
7. The distance from the bow to the centre of the lifting vessel's manifold.
8. Mooring equipment available on the bow of the lifting vessel (e.g.) Smit's bracket, chain stoppers).
9. Confirmation that hose handling gear and mooring equipment, navigation equipment, radars, steering gear, and engine propulsion are in good order and condition, that the lifting vessel can accept a 20 in. (reducing to 16 in.) diameter floating hose fitted with a 150 ASA camlock flange.
10. Whether the lifting vessel intends to load-on-top of existing slops and, if so, advise as to the quantity of slops in each tank on which cargo will be loaded-on-top.

This first ETA message should also include a definite statement of the details of any equipment required from the floating storage vessel for connecting the floating cargo hose to the lifting vessel's manifold. Further ETA messages should be sent to the Company when the vessel is 48 hours and 24 hours distance from Oguendjo Oil Terminal confirming or giving notice of any change in the 72 hour ETA and any other time after the 24 hour ETA message when a change by more than 2 hours occurs in the ETA. The 24 hour ETA message should include a positive statement regarding the lifting vessel's Readiness to Load on arrival and the number of hours that will be required by the lifting vessel to discharge clean ballast.

TUGS: The Company has a tug in the area equipped with fire fighting apparatus. Also see "Berthing – Mooring Operation".

BERTHING: *Loading Berth:* Lifting vessels are loaded by means of a floating cargo hose which runs from the floating storage vessel to the lifting vessel. The floating storage vessel is loaded by means of a submarine pipe-line which runs from Production Platform "B" and a submarine pipe-line which runs from Platform "C" to the single point mooring buoy to which the floating storage vessel is permanently affixed.

Mooring Facilities: The floating storage vessel is permanently affixed by a "wishbone" rigid mooring arm to the single point mooring buoy which has been secured to the seabed by 4 anchor legs. Lifting vessels are moored from their bow to the bow of the floating storage vessel by means of a terminal supplied 16 in. braided mooring hawser with a 20 ft. length of 3 in. chain attached to each end of the hawser. Upon completion of mooring, the mooring hawser will run from the bow of the floating storage vessel to the bow of the lifting vessel and will allow about 200 ft. of water to separate the bow of the two vessels. The loading berth will accept vessels up to 170,000 d.w.t. (also see "Max. Size"), with displacement not to exceed 200,000 tons. The floating storage vessel is equipped with anchorage lights and a red (360°) displayed on its top mast.

Mooring Operation: The Company will provide a mooring launch to assist tug to assist in the mooring and unmooring of the lifting vessel. The mooring launch and assisting tug will be based at the loading berth and will operate under the direct control of the Mooring Master. When the lifting vessel proceeds to within a reasonable distance from the loading berth and upon advice from the Mooring Master, the messenger line of the lifting vessel will be lowered to the mooring launch and will be carried by the launch to a floating buoy where the messenger line will be secured to an 8 in. circumference pick-up rope. The Mooring Master will advise the lifting vessel to heave in the ropes until the chafing chain located at the end of the pick-up rope comes aboard. This chafing chain will be secured to the lifting vessel's bitts or Smit bracket or chain stopper in such a manner that the Terminal-supplied 180 ft. long braided nylon hawser, which is affixed to the opposite end of the chafing chain, will remain outside the lifting vessel thereby allowing the chafing effect at the fairleads of the lifting vessel to be taken by the chafing chain. All mooring details in the sequence of movements shall be directed by the lifting vessel's officer in charge following consultation with the Mooring Master.

When the mooring operations have been completed, fire wires should be secured to the lifting vessel's bitts and one fire wire led out of the bow and one fire wire led out of the stern of the lifting vessel's port side. The fire wires should be of at least such a length that the eyes will be approximately 6 ft. above the surface of the water at all times so that they can be readily available to a tug in case of an emergency.

Vessel's Alertness: The loading berth is in open and unsheltered waters and the mooring is a flexible system; therefore, from the time the Mooring Master boards the lifting vessel until the lifting vessel has loaded her cargo and the Mooring Master has disembarked, full power must be available at all times on all deck winches and windlass and other gear of the lifting vessel. The lifting vessel's engines, steering machinery and other efficient manoeuvring equipment must likewise be maintained in constant readiness with full power for immediate use so as to allow the lifting vessel to manoeuvre in order to avoid a possible collision with the floating storage vessel or so as to allow the lifting vessel to depart from the loading berth at any time following a request by the Mooring Master or the Company to do so.

The lifting vessel's personnel should be at their stations and alert at all times during mooring, unmooring, hose handling and cargo loading operations. Where lifting vessels are equipped with an electric clutch control to the propeller shaft, such lifting vessels must disconnect the electrical clutch control and the manual clutch control so that there will be no possibility of the engine engaging the propeller shaft while the lifting vessel is moored. Where lifting vessels are turbine vessels are required to turn their propellers, such lifting vessel must turn such propellers in reverse motion. A constant watch in the engine room, control room, cargo control room and on the bridge shall be provided at all times aboard any lifting vessel while at/or in the vicinity of the loading berth.

Ship-to-Terminal Communications: The floating storage vessel is equipped with VHF radiotelephone using international frequencies and maintains a radio watch on the international VHF marine Channel 16. Not less than 12 hours prior to the lifting vessel's ETA at Oguendjo Oil Terminal, the lifting vessel is required to maintain a radio watch on R/T Frequency 2182 kHz and on VHF Channel 16. Masters are recommended to use this facility as soon as the lifting vessel is within range since such communications are the best means of avoiding delay in the mooring of the lifting vessel. While the Mooring Master is on board the lifting vessel, the Mooring Master will be in direct charge of the portable VHF ship-to-terminal radiotelephone and all ship-to-terminal, ship-to-tug and ship-to-launch communications will be by portable VHF radiotelephone. The Mooring Master will advise the Master and officers regarding the emergency whistle signals set up for use in the event the VHF radiotelephone units become inoperative. The use of the lifting vessel's radio station and/or battery charging equipment is prohibited during cargo loading operations.

Radio Watches: While at the anchorage awaiting the loading berth, lifting vessels should maintain a listening watch on R/T Frequency 2182 kHz and on VHF Channel 16 with the floating storage vessel.

LOADING: *Vessel's Gear:* Prior to the arrival of any lifting vessel at the loading berth, the derrick of the lifting vessel should be up and ready to lift the mooring and hose connection gear onboard the lifting vessel. The lifting vessel must be equipped on the forecastle head with all equipment recommended in the latest OCIMF publication on standards for equipment recommended for employment in the mooring of ships at single point moorings. The Smit bracket or chain stopper shall be free, open and greased and a large coil of messenger line with sledgehammer and other necessary tools for mooring must be available. In the event that the lifting vessel is not equipped with Smit brackets, snotter ropes shall be employed. The warping winches or windlass should be in good working order and condition at all times while at the loading berth and must be adequate to handle mooring lines under heavy strain and efficient stoppers must be readily available to "hang-off" the mooring lines and transfer same from the winch to the bitts.

On the starboard side opposite the lifting vessel's manifold, there must be equipment rated by an approved Classification Society and capable of lifting the floating cargo hose safely and efficiently (a 10 long ton lift) from the sea surface over the starboard rail to the lifting vessel's manifold. Lifting vessels must also have an adequate supply of nuts, bolts, gaskets and wrenches to connect the floating cargo hose. If, in the opinion of the Mooring Master, the lifting vessel is not equipped with adequate mooring or loading facilities or lines or gear, the Mooring Master must so inform the lifting vessel's Master and in such event the lifting vessel will not be bought into the loading berth until the facilities or lines or gear are deemed satisfactory by the Mooring Master.

Rate of Loading: The crude oil flow is by pump and the maximum crude oil loading rate for lifting vessels using 1×16 in. deck hose is approximately 30,000 bbls.p.h. or approximately 4,000 cu.m.p.h. In order to save vessel time and make the loading berth available for other lifting vessels, it is requested that clean ballast be pumped as fast as possible and that lifting vessels receive oil as fast as it can be delivered, with both operations having due regard for safety. It is also requested that any "Y" pieces, strainers or mud boxes restricting the flow of crude oil into the lifting vessel, be removed before the arrival of the lifting vessel at the loading berth.

Berthing: Tenders to load crude oil will normally be accepted and the loading berth will be assigned to a lifting vessel in the order of its arrival, provided the lifting vessel has a nomination for crude oil valid at the time and is in all respects equipped and ready to moor. In the event that mooring is delayed on account of weather, the lifting vessel will keep its position in line. Should the lifting vessel be required to leave the area on account of weather, the lifting vessel should keep in radio contact with the Terminal in order to make the lifting vessel available as soon as the weather moderates. The Company reserves the right to load lifting vessels "out of turn" following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other lifting vessels in line. For example, should weather make it necessary for a specific lifting vessel waiting at the loading berth or at the anchorage to vacate the area, the Company may load another lifting vessel which arrived at the anchorage after the specific lifting vessel but before the return of the specific lifting vessel which was waiting in line ahead of the other lifting vessel.

Connecting Hose: After the lifting vessel has been securely moored, the floating cargo hose will be hoisted to the lifting vessel's starboard side rail amidship by the lifting vessel's equipment. The floating cargo hose is a 20 in. (reducing to 16 in.) diameter floating hose, about 1,025 ft. in length, fitted with a 150 A.S.A. camlock flange for connection to the vessel's manifold. The lifting vessel should have adapters and fittings onboard so as to enable such floating cargo hose to be connected to the lifting vessel's manifold. The raising, connecting, disconnecting and lowering of the floating cargo hose will be performed by the lifting vessel's crew as directed by the lifting vessel's officer-in-charge who must be present at all times during such operation and in accordance with the procedure advised by the Mooring Master who will remain on board as Loading Master during the entire time the lifting vessel is at the loading berth. Particular care should be taken during all such hose operations to avoid damage to the floating cargo hose and its fittings.

Loading Readiness and Arrival Time: Upon the arrival of the lifting vessel at the customary anchorage for the loading berth, the Master or his agent shall give the Company notice by letter, telegraph, wireless, or telephone that the lifting vessel is ready to load. Laytime shall commence upon the expiration of 6 hours following the acceptance of such notice by the Company provided that the lifting vessel has been nominated to load cargo and the Terminal holds such cargo nomination and further provided that the Mooring Master has deemed the lifting vessel to be in all respects ready to moor and load. The Notice of Readiness will be accepted only between 0600 hrs. and 1800 hrs. but will not be accepted at any time when Oguendjo Oil Terminal is closed. If, however, the lifting vessel is moved to the loading berth without delay after having arrived at any time and the lifting vessel is in all respects ready to moor and load in the opinion of the Mooring Master, the Notice of Readiness will be accepted at the time the Mooring Master boards the lifting vessel. Laytime shall continue until the floating cargo hose has been disconnected from the lifting vessel's manifold.

Responsibility: Prior to the commencement of any cargo loading operation, the Mooring Master and the officer-in-charge of the loading operations for the lifting vessel shall engage in a pre-loading conference to formulate a loading plan and to ensure that the lifting vessel is in all respects ready to load. No cargo loading shall take place without the permission of the Mooring Master which permission shall not be given until the pre-loading conference and the Lifting Vessel Safety Check List, have been completed. The lifting vessel's Master shall remain responsible for the safety of the lifting vessel and all operations on board the lifting vessel at all times. The Mooring Master will advise the officer-in-charge of the loading operations for the lifting vessel with respect to the loading pressures and hazards but the Mooring Master will not direct any aspect of the loading expect as may be necessary to protect the loading berth and related facilities and equipment. The manipulation of the lifting vessel's valves is the direct responsibility of lifting vessel's personnel. The Mooring Master shall have the right to suspend cargo loading operations or to require the lifting vessel to unmoor and depart from the loading berth at any time when the mooring plan, pre-loading plan or the safety requirements and regulations set forth herein are not being followed by the lifting vessel or at any time the Mooring Master believes or becomes aware of the existence of any other reason which in his opinion shall require the suspension of the mooring or the loading of the lifting vessel.

Oil Valve Control: The incoming oil stream is controlled on the floating storage vessel and the lifting vessel's valves must not be closed against the incoming oil stream. Such a procedure creates an excessive pressure which may damage the hose or other terminal facilities and could result in a pollution incident. Lifting vessels will be held legally responsible for any damage resulting from the lifting vessel's failure to observe this precaution. Frequent checks of the cargo loading must be made by lifting vessel personnel during the loading operation so that a reduction in the loading rate, before topping-off the final tank or tanks, may be arranged through the Mooring Master by the officer-in-charge of the loading operations for the lifting vessel. A normal standby warning should be given about 20 minutes before the shutdown of the loading operations. Upon the request from a lifting vessel to shut down the loading operations, a minimum of 3 minutes will normally be required to stop the flow of crude oil. Lifting vessel's personnel shall be responsible for the call to stop the loading of the lifting vessel. When cargo has ceased to flow, the valves on the floating storage vessel will be closed and the lifting vessel's manifold valves may then be closed.

Emergency Signal: The emergency signal employed at Oguendjo Oil Terminal shall be the continuous blast on a vessel's whistle. Should normal ship-to-terminal communications fail, the emergency signal must be sounded by the lifting vessel. Steam or air should never be shut-off from the whistle of the lifting vessel during loading. Whenever the emergency whistle signal is used, the tug will be summoned to standby and all loading operations will be shut down until communications can be established with the vessel giving the signal. For this reason, it is requested that lifting vessels in the area refrain from using their whistles for other than essential purposes and that the use of the "continuous blast" whistle signal be reserved for emergency purposes only. All crew members who stand a deck watch during the transfer of crude oil are expected to know the emergency shutdown signal.

Code Flag: During all cargo loading operations, the International Code Flag "B" shall be displayed from a topmast signal halyard during daylight hours and a red light shall be displayed during the hours of darkness. The red light should be of a character as to be visible at a distance of at least 2 miles and show an unbroken light around the horizon.

Terminal Stops: Request for the terminal to stop the flow of crude oil at a predetermined tonnage must be made in writing to the Company and will be deemed to include the statement and understanding that the Company will not be responsible for (1) any errors, cost or claims arising from such request and (2) any crude oil loaded in excess of that requested will not be pumped back aboard the floating storage vessel. Some delays in stopping the flow of crude oil are always incurred when such a stop request is made.

BALLAST: *Precautions and Rules:* There are no facilities for the off-loading of dirty ballast but clean oil-free ballast may be discharged overboard from the lifting vessel. It is the responsibility of the Master of the lifting vessel to see that no oil (crude, bunker, diesel, bunker C, slops, residues, contaminated ballast water, or oily bilge water) is pumped or spilled overboard from the lifting vessel. All deck scuppers must be plugged tight and adequate drip pans with sand and sawdust must be provided where necessary on deck for use at all times, especially when disconnecting hoses, in order to prevent any such loss of oil overboard. The waters in and adjacent to the loading berth must not be polluted and only clean, oil-free, ballast may be discharged inside of a line running 50 miles from and parallel to the coastline of the Republic of Gabon.

The discharge of oil mixtures from lifting vessels while en route to Oguendjo Oil Terminal is prohibited except when the following conditions are all satisfied:

(1) The instantaneous rate of discharge of oil content of the oily mixture does not exceed 60 litres per mile.

(2) The total quantity of oil discharged on the ballast voyage does not exceed that quantity permitted by the International Convention for the Prevention of Pollution from ships 1973 as modified by the Protocol of 1978 related thereto, and

(3) The lifting vessel is more than 50 miles from the nearest point on the coastline of the Republic of Gabon.

Masters are warned that when disposing of dirty ballast or bilge water, (50 miles or more from the coastline of the Republic of Gabon), all pipelines, sea suctions, strainers and pumps which are later to used to discharged clean ballast, must be flushed clean, so that there will be no chance of even a small amount of pollution when the clean ballast is pumped overboard.

Lifting vessels must have sufficient ballast for safe manoeuvring and where practicable, should arrive at the loading berth with the propeller completely submerged amd properly trimmed. The Mooring Master may refuse to permit the mooring of any lifting vessel not in compliance with these requirements until the vessel takes on sufficient ballast and/or alters her trim to meet these requirements.

As soon as practicable after arrival, lifting vessel's tanks will be inspected for evidence of oil in ballast and during the discharge of ballast a similar inspection will take place. If evidence of oil appears at either of these inspections, the lifting vessel must vacate the loading berth and discharge such dirty ballast.

Any lifting vessel required to vacate the loading berth for the purpose of discharging dirty ballast, cleaning tanks or for any similar reason, automatically nullifies any Notice of Readiness already tendered and at the same time loses any priority held for loading. Lifting vessels must tender a new Notice of Readiness upon their return and lifting vessel will be entered for loading upon the Company's acceptance of the new Notice of Readiness.

Lifting vessels must keep a constant watch on the side of the lifting vessel from which clean ballast is being discharged for any indication of water discolouration or oil sheen. Discharge of ballast must be immediately suspended should there be any indication of discolouration or sheen and the Mooring Master shall be immediately informed of such. An investigation of any such discolouration or sheen shall be carried out by the lifting vessel and the findings reported to the Mooring Master. Discharging shall not resume without permission of the Mooring Master.

If, during any inspection or during the process of loading, it is revealed that a lifting vessel's tank is not oil-tight, the lifting vessel will be rejected by the Mooring Master and refused further loading until satisfactory evidence of effective repairs is submitted and the lifting vessel is duly certified by Lloyd's Register of Shipping, American Bureau of Shipping or another similarly recognised classification society.

In addition to the lights usually displayed, lifting vessels are required to illuminate the lifting vessel and the waters around the lifting vessel with all available and suitable searchlights and floodlights during the discharge of clean ballast and the loading of crude oil during the hours of darkness and restricted visibility. Such illumination must be to the satisfaction of the Mooring Master and must be undertaken so as to assist in the loading operations and in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Lifting vessels unable to illuminate the sea satisfactorily may not discharge ballast or engage in the loading of crude oil during the hours of darkness and any such delay shall be for the account of the lifting vessel.

Loading and Deballasting Simultaneously: Lifting vessels equipped with a separate system of ballast tanks will be allowed to discharge clean ballast and load oil simultaneously, providing that the approval of the Mooring Master if first obtained.

MEDICAL: *Emergency Medical Assistance:* Lifting vessels requiring emergency assistance should contact Oguendjo Oil Terminal by VHF radio and supply the necessary pertinent information which will be passed on to the vessel's Agent. Neither medical nor hospital facilities are available at Oguendjo Oil Terminal, but private doctors and hospital facilities are available in the town of Port Gentil.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Consular or diplomatic representatives for many nations maintain offices in the town of Port Gentil and Libreville.

REPAIRS: The Masters of lifting vessels loading at the loading berth are advised that the loading berth is located in open and unsheltered waters and under no circumstances may engines be shut down for repairs while the lifting vessel is at the loading berth or at the anchorage. There are no facilities for making repairs to a lifting vessel at the Terminal and no repairs will be allowed at the loading berth. However, arrangements can be made through the vessel's Agent to utilise the repair facilities at other ports.

SURVEYORS: *Marine Survey and Cargo Inspection Service:* No cargo inspectors or marine surveyors are based in the area, but inspectors and surveyors who reside at other ports can be arranged through the vessel's Agent.

REPATRIATION: No facilities available.

TIME: GMT plus 1 hour. Summer time not kept.

SHORE LEAVE: Lifting vessel personnel (other than medical emergency cases) are not allowed to embark or disembark from the lifting vessel at the loading berth.

WEATHER: *General:* The Company can advise of the following general environmental characteristics for the area off the coast of the Republic of Gabon, but the navigator is referred to the published sailing instructions and directions for the area for more detailed information on the climate, weather, wind, tide, current and sea.

Climate: The coast between Cape Lopez and the Congo River is dominated by the Basin of the Ogooue and is covered with a dense equatorial forest which is frequently subjected to heavy rainfall. The area exhibits a characteristic diurnal variation in cloudiness, and the climate along the coastline is heavily influenced by the heated continental interior, the extratropical storms, and the cool Benguela current. The average annual rainfall is 123 in. and ranges from a maximum of 19.9 in. in November to a minimum of 0.04 in. in July. Temperatures seldom exceed 95°F. and seldom fall below 65°F. and are moderately high throughout the year with an average yearly temperature of 79°F. and a mean maximum temperature of 86°F.

January is the stormiest month because thunder squalls (combined thunderstorms and squalls) are frequent. Summarised wind data does not indicate strong winds during this month, but gusty winds occur during the thunderstorms, these being brief and irregular. In February and March, the weather is unsettled with occasional rain. In April weather generally improves, becoming cooler and drier. In May the weather becomes fair, but by the end of the month it again becomes more settled and a breeze flows steadily from a Southeasterly direction. In June and July, the weather is very misty and gloomy, decreasing visibility significantly. In August, light breeze persist, generally cloudy and overcast conditions exists, by the end of the month, heavy mists clear away. In September, hotter weather and more Southwesterly wind develops with frequent light showers. Sea breezes become stronger to the end of the month, and thunder squalls moving from the S.E. occur. In October, the wind is still more Westerly with occasional small showers, and generally overcast skies till noon. In November and December, strong breezes move off the land sometimes with rain, thunder and lighting.

Average annual rainfall	123 in.
Average daily maximum air temperature	84°F.
Average daily minimum air temperature	74°F.
Extreme highest average monthly air temperature	99°F.
Extreme lowest average monthly air temperature	60°F.
Average relative humidity (0700 hrs.)	92%
Average relative humidity (1300 hrs.)	76%

Winds: The prevailing winds off the Republic of Gabon are characteristically light and Southerly the year around. Land and sea breezes dominate along the coast and generally blow between the S.W. and S.E. The highest offshore wind speeds occur during local thunder squalls (combined occurrences of thunderstorms and squalls) which may have brief wind gusts up to 60-70 knots. These thunder squalls may be violent, occur quickly and without warning, and are often accompanied by heavy winds, seas, swell, and rain which may reduce visibility substantially.

Tides: The tides can be predicted with reasonable accuracy, though use of the tide tables for Takoradi in Ghana, with the appropriate correction factor for Cape Lopez applied.

Currents: The Benguela current flows North along the West coast of Africa from the vicinity of the Cape of Good Hope to the Gulf of Guinea. The general direction of the current off the Republic of Gabon is parallel to the coast, although in the vicinity of Cape Lopez the main body takes a more Westerly course. The current is generally stronger during December and January when the current flows Southward at 10 to 20 miles off Cape Lopez, but during the remaining months of the year, the current generally sets in a Northwesterly direction and sometimes attains a velocity of about 2 knots. The current is usually more rapid close to the coast than it is farther offshore, but its velocity is variable because of the effect of the winds.

Seas: The coast is influenced by swells from the South and S.W., but most of the higher waves occur in association with thunder squalls. The highest collection of waves can be expected during March and April and during October and December, but waves of 6 ft. or more do not occur more than 2.5 per cent of the time.

GENERAL: *Flag:* Lifting vessels are required to fly the flag of the Republic of Gabon on the foremast during daylight hours while in the territorial waters of the Republic of Gabon. The territorial waters extend 12 nautical miles seaward from the coastline of the Republic of Gabon.

Government Officials: Governmental officials such as the Customs Officer, Quarantine Officer, Immigration Officer, Captain of the Port and the Police, are stationed in the town of Port Gentil. Should Customs guards be stationed on board the lifting vessel while at the loading berth, it is expected that the lifting vessel will provide food for these guards and other governmental officials. Lifting vessels calling at the loading berth must provide an accommodation ladder rigged on the port side for such governmental officals.

Quarantine Regulations: The rules governing the quarantine of lifting vessels are the same as those found in other parts of the world.

Supplies: Commissary supplies, steward stores, laundry services, fresh water, marine lubricants and bunkers are not available through the Company and may not be loaded at the loading berth. Any questions concerning the availability of such items from other sources and the loading of such items elsewhere should be handled through the vessel's Agent.

Agency: The Company does not perform any vessel agency functions. Lifting vessels calling at Oguendjo Oil Terminal must arrange for their own Agents.

Contraband: The Company prohibits unauthorised craft from coming alongside lifting vessels while at the loading berth without the permission of the Mooring Master. To avoid the possibility of undesirable elements getting aboard lifting vessels, it is recommended that Masters discourage any such craft from coming alongside while lifting vessels are at or in the vicinity of the loading berth.

Garbage: The dumping of garbage, sewage, and refuse overboard is prohibited and there are no facilities for receiving such at the Terminal.

Visitors: Vistors are not allowed to embark or disembark from the lifting vessel at the loading berth.

AUTHORITY: Amoco Gabon Exploration Company, B.P. 3867, Libreville, Republic of Gabon. *Tel:* 73-24-72 or 73-26-02. *Telex:* 981-5569. *Contact:* R. Gregory Rich, President/Director General.

OVENDO: 00.17 N. 09.30 E. (See Plan)

SHIPMASTER'S REPORT 1978:

Vessel, length 156 m., breadth 22.0 m. Draft at the time, 30 ft.

APPROACHES: The channel buoys showed very well on radar on the 3 and 6 miles ranges, even during heavy rain, but the lights on the red buoys are poor and all buoys occasionally unlit.

ANCHORAGES: Depths in the channel and river were found to be as stated during low water with a depth of 33 ft. over all the anchorage. Maximum draft allowed at this time was 30 ft.

The holding ground is good, 4 shackles were used for a total ship weight of 19,000 tons plus a small coaster alongside.

The tides are regular with only a very short slack water period, and run at between 4 and 6 knots.

PILOTAGE: There are 2 French Pilots who may be contacted on VHF Channel 16 when in range, they are ordered by the Agent to berth vessels only, although they will pass on advice to vessels regarding anchoring.

TUGS: There is 1 tug of approximately 1,000 h.p. which assists in berthing, either towing or pushing.

BERTHING: Well fendered modern concrete quay, 450 m. in length, laid out as per "Plan" in the "Guide". The normal practice is for there to be 2 ships of around 150 m. and one smaller ship alongside at one time. The inshore side of this quay is for small craft only.

Depths alongside Berth No. 1, 23 ft.; No. 2, 18 ft. and No. 3, 22 ft.

FRESH WATER: This is obtainable while alongside the quay but only in a dire emergency at the anchorage from the tug which can supply up to 8 tons.

REPAIRS: Only very small repairs are possible and it is suggested that a receipt is obtained for any parts sent ashore.

REPATRIATION: There are 2 planes a week from Libreville to Paris and approximately 12 planes weekly to Abidjan.

SHIPCHANDLER: There is no chandler for any form of stores, the only possibility being self-purchase at the local (Libreville) supermarket. All goods are imported and therefore very expensive.

HOLIDAYS: 12th March, Gabonese independence.

MARINE CLUB: There is a marine club about 1 km. from Ovendo in the Libreville direction (swimming pool, etc.).

SHIPMASTER'S REPORT: February 1979.

DOCUMENTS: Ship's Papers (sighted), Crew Lists (5), Passenger Lists (5), Port of Call (4), Crew's Custom Declaration (1), Marine Health (1), Arms and Ammunition (1).

PILOTAGE: Pilot boards by tug which is compulsory for docking and undocking. Vessels berthed head out for sailing.

APPROACHES: Gambia Lighthouse range 20 miles is easy to pick up, channel is well marked by buoys with good radar reflectors. No Pilot is available for the channel. After last buoy proceed directly to anchorage.

Soundings taken throughout channel showed a least depth of 20 m.

ANCHORAGES: Waiting anchorage is 0.5 to 1 mile West of the wharf.

RADIO: Agent keeps watch on VHF Channel 16.

BERTHING: A new port has been built about 4 miles South of old lighter jetties at Libreville, consisting of 1 wharf at right angles to the shore in 15 m. of water, capable of docking 2 ocean-going vessels.

STEVEDORES: Slow but efficient, about 6 tons per gang man hour.

REPATRIATION: Airport 12 miles from port, 6 flights per week direct to Paris.

TRANSPORT: Available by bus or taxi to the town.

SHORE LEAVE: Allowed.

SEAMEN'S CLUB: Within 1 mile of port with bar and swimming pool.

SHIPMASTER'S REPORT: March 1980.

PILOTAGE: Pilot compulsory. Pilot boards 1 mile S.W. of Ovendo Pier and requires 24 hours' and 12 hours' notice.

ANCHORAGE: One mile S.W. of the pier.

RESTRICTIONS: Pilot advises that vessels can only berth on slack water as a 5 – 6 knot (approx.) ebb tide runs. Vessels able to sail at any time, however, it is not advisable to manoeuvre during darkness as buoys are frequently unlit. Vessels are able to proceed from sea to anchorage at any time.

MAX. SIZE: Max. draft at Ovendo is 9.2 m. Mean tidal range 1.5 m.

TUGS: One tug available.

VHF: Pilot and Port Authority on Channel 16. Agent on Channel 9.

BERTHING: The berth at Ovendo is 20 miles from the entrance. There is one jetty 450 m. in length. The mean tidal range at the berth is 1.5 m. and the bottom in the vicinity of the berth is mud. Container vessels use the port and discharge using ship's gear. There is ample handling and storage space for containers. "Delmas" container vessels use the port frequently and they take preference over most other vessels.

SERVICES: The following are available:

Fresh water (rate 25 tonnes p.h.), airport, doctor and hospital.

The following are not available:

Fresh provisions, repair facilities, dry dock facilities, machine shop, surveyors, laundry service, fuel, lubricating oils, groceries, meats and slop facilities.

GENERAL: Arriving from a S.W. direction no difficulties were encountered, Point Gonbe was visible 18 miles on the radar and later the fairway buoy was visible at 10 miles. All the channel buoys showed up at 6 to 8 miles on radar.

The Fairway Buoy is very large, similar to the type used on the American coast. Chart used 1877 (Estuaire du Gabon).

Conspicuous wreck marked in position Lat. 0° 24.4′ N., Long. 9° 17.2′ E. is no longer visible.

On entering inward I checked the buoys' positions against the land and found:

Fairway Buoy Gp. Fl.(2) 6 secs. In position. Unlit.
(Course 090°×3.2 M) Fl. G. 4 secs. In position. Lit.
(Course 115°×2.1 M) Gp. Occ(2) G. 6 secs. In position. Unlit.
(Course 115°×2.1 M) Between { Occ. R. 4 secs. In position. Unlit.
Fl. G 4 secs. In position. Unlit. }
(Course 137°×3.0 M) Fl. R. 4 secs. Out of position. Unlit.
(Course 137°×6.1 M) Occ. 6 secs. In position. Lit.

After passing the Fl. R. 4 sec. buoy, vessel was about to set a course to the anchorage off the port of Libreville but was told that vessels carrying cars were to proceed to the new port of "Ovendo" some 8.5 miles further up the river.

On arrival I was told to anchor 1 mile S.W. of the new pier.

Quite a modern port as described in the "Guide to Port Entry".

Laying alongside the berth is not very comfortable when the ebb tide starts to flow, anything up to 6 knots within half an hour of HW, getting its force from three rivers, River Egoume, River Ikoy and the main river Komo.

Vessels always berth on slack water with the aid of a tug to push. Vessels can leave at any time. Port employs two French Pilots.

REPORT: 1982.

Ship Spares: Customs require originals of invoices G11 for clearing spares. Copies are not acceptable.

AGENT: See "Libreville".

PORT GENTIL: 00.43 S. 08.48 E. (See Plan)

LOCATION: The deep water port of Port Gentil is located between Point Clairette (Sogara Refinery) and the Alcyon Bank (CFG factory).

APPROACHES: Buoyed channel, lit at night. Minimum depth 15 m.

DOCUMENTS:

Cargo Manifest.
Store List.
Crew's Personal Effects List.
Crew List.
List of Ports of Call (not compulsory).
Health Certificate.
Ship's Official Papers.

PILOTAGE: Pilot service operates 24 hours a day. Vessels berth day and night except at Sogara Quay where berthing is daylight only.

ANCHORAGES: An anchorage area for timber vessels faces the old port. Access to the zone is by leaving to starboard a path 200 m. from the buoys of the Alcyon and Talisman Banks.

An anchorage area for waiting vessels intending to berth at the new port, or at the Sogara Refinery is to starboard of a line joining the Prince Buoy to the buoy of the Sogara route to the port.

RESTRICTIONS: See "Pilotage".

The water area in the port is clear with no obstructions apart from the Alcyon Bank running from the marker buoy to the CFG factory. Dredging carried out permits manoeuvring of vessels to Berth No. 2 of the Commercial Quay.

RADIO: Port Control on HF 2182 kHz and VHF Channel 16, Working Channel 12.

TUGS: Not required.

BERTHING: *Commercial Quay:* 350 m. of quay with 11 m. depth of water and 75 m. of quay with a depth of 2.5 m. which constitutes the barge quay. The quay bollards are spaced 30 m. apart. This quay is able to accommodate 3×20,000 tonne vessels.

Fish Quay: The fish quay runs at right angles to the Commercial Quay (107° – 287°). 80 m. with 8 m. depth of water; 197 m. with 7 m. depth of water.

This quay is reserved as a priority for fishing vessels, but can be partially used for berthing vessels of a commercial nature. The quay bollards are spaced 20 m. apart.

Storage: 6,000 sq.m. of covered storage, divided into 6 bays of 1,000 sq.m. each. 3 bays leased to COMACO (8 reefer points available). 3 bays leased to SOAEM (1 reefer point available). 1 Customs warehouse located in the SOAEM bay.

Open storage area: Current paved surfaces of open storage areas – 14,000 sq.m. One tarmac non-covered area of 10,000 sq.m. is in service. A second storage area of 10,000 sq.m. (approx.) will be brought into service at a later date.

STEVEDORES: Work in 3 shifts throughout 24 hours.

MEDICAL: The port infirmary is located in the Comaco Building.

TANKERS: To N.E. of Mole is a petroleum pipe-line unloading point for small tankers, tying up on buoys, max. length 70 m., draft 5 m.

Prince's Bay, point for unrefined petrol by sealine is available to North of Prince's Bay (see "Cape Lopez").

FRESH WATER: Available at commercial quay and fishing quay.

WATCHMEN: Available.

HATCHES: Opened and closed by crew.

CONSULS:

France	BP. 511	Tel: 20.86
Netherlands	BP. 792	Tel: 28.09
Sweden	BP. 518	Tel: 21.71
Switzerland		Tel: 20.19

REPAIRS/DRY DOCKS: Not available.

REPATRIATION: Obtainable on medical grounds. No facilities for crew changes.

AIRPORT: 4 km. distant. Regular services.

TIME: GMT plus 1 hour. No alterations.

HOLIDAYS: No work on Independence Day, 17th August.

SHORE LEAVE: Permitted.

GENERAL: *Ships' Spares:* Customs require original of invoices for clearing spares. Copies are not acceptable.

AUTHORITY: Direction du Port de Port Gentil, B.P. 43, Port Gentil, Gabon. *Tel:* 75-35-63. *Contact:* J. B. Pea, Le Directeur du Port.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Gambia

BANJUL: 13.27 N. 16.34 W. (See Plan)

DOCUMENTS:
7 Crew Lists.
7 Passenger Lists.
7 Ports of Call Lists.
Health Documents.
Derat (or Exemption) Certificate.
Yellow Fever Innoculation Certificates.
Customs Crew Declaration.
2 signed copies of Manifest.
Bills of Lading (may be sent in advance of vessel).

PILOTAGE: ETA and draft to be communicated to "Harbour Master Banjul" 48 hours before ETA and confirmed 12 hours before. Vessel arriving Monday ETA preferably not later than Saturday morning.

Pilot station situated in Harbour Master's Office has VHF station, calling Channel 16 (156.80 MHz) working Channels 12 (156.60 MHz) and 14 (156.70 MHz). Continuous listening watch kept 0800 – 1500 hrs. Monday – Thursday. 0800 – 1300 hrs. on Friday and Saturday. Listening watch at weekends if vessels are expected. Reception generally good within 100 nautical miles radius. Pilot boat has blue hull and white superstructure, exhibiting usual signals.

Pilotage from any point inwards from Fairway Buoy by request, but compulsory from No. 5 Buoy inwards.

ANCHORAGES: Good and spacious anchorages to the East and S.E. of Government Wharf in depths of 8 to 15 fathoms.

RESTRICTIONS: Vessels may enter and proceed to anchorage at all times and states of tides. Minimum depth in sea approach channel is 28 ft. LWOST. Average rise of Spring tides 6 ft., Neap tides 4 ft.

HEALTH: Vessels exhibit the appropriate International Code signals. Port Health Officer usually boards the vessel at the harbour anchorage or alongside between 0800 and 1700 hrs. daily, at all times in case of emergency.

RADIO: Banjul Radio call sign C5G. Radio Telephone 2182 kHz (calling) 2756.4 kHz. 1100 – 1200 hrs., 1400 – 1500 hrs. (weekdays) Sundays – on demand.

RADAR/VHF: Port VHF. Radar station being constructed – See "Pilotage".

TUGS: One ocean-going tug of 1,000 h.p. with VHF keeps watch on Channel 16 throughout 24 hours.

BERTHING: Banjul Wharf: Length 123 m. Breadth 19 m. Depth alongside 10 m.

Maximum permissible draft alongside; Banjul Wharf 27 ft. Government Wharf 17 ft. Government Wharf berthing face 294 ft. with 1 dolphin in line 100 ft. from North end. Mooring bollards on foreshore. Banjul Wharf berthing face 400 ft. mooring dolphin each end, set back from wharf face. Inner berth of length 335 ft. suitable for small vessels up to 17.5 ft. draft. Public Jetty berthing face 196 ft. maximum draft 11 ft.

New Banjul Wharf: Length 123 m., width 29 m., depth alongside 12 m. (outer side) and 8.0 m. (inner side). Wharf is flanked by 2 mooring dolphins at each end at distance of 24 m.

840 sq. m. of under covered cargo space. Paved area for outside storage of 8,000 sq. m. for containers and break bulk cargo.

Tankers can load ground nut oil at New Banjul Wharf.

BRIDGES: No bridges.

STEVEDORES: Normally 48 hours notice addressed to Agent. If arriving Monday preferable Agent notified requirements latest Friday. Normal working hours 0730 – 1900 hrs.

MEDICAL: Emergencies and cases requiring hospitalisation attended to at all times, giving as much advance notice and information as possible. Other cases attended to as convenient to ships after arrival. For certificates required see "Documents". Inoculation and vaccination for yellow fever given on request.

TANKERS: Tankers (discharging only) berth on Banjul Wharf. Maximum permissible draft 27 ft. Discharge of residue and bilge prohibited. Ballasting by permission of Harbour Master. Ground nut oil can be loaded at New Banjul Wharf.

DENSITY: Normally salt water at Banjul, reducing to about 1020 ozs. per cu.ft. during River Gambia flood water period: August – February.

FRESH WATER: Fresh water available at Banjul wharves from hydrant. Notice of requirements should be sent with ETA. No water barge. Tug can supply up to 18 tons of fresh water to vessels at anchorage.

FUEL: Bunkering facilities available at Banjul Wharf by road tankers for reasonable quantities. Also available at Public Jetty for small craft (11 ft. draft). Advance notification required for all bunkers.

FIRE PRECAUTIONS: For tankers and vessels carrying explosives Fire Brigade will be in attendance.

GANGWAY/DECK WATCHMEN: Recommended. By arrangement with Agent.

OPENING/CLOSING HATCHES: Usually done by stevedores.

CERTIFICATES: Registry, Articles of Agreement, Load Line, Safety, Safety Equipment Radio Licence/Certificate.

CUSTOMS ALLOWANCES: Reasonable allowance of wine/spirits and tobacco/cigarettes out of bond, as per Master's request.

CARGO GEAR: In accordance with UK Factories Act. Ship's lifting gear for loading and discharging, also 4×6 ton and 1×30 ton mobile cranes available.

IDENTIFICATION CARDS: Needed.

CONSULS: In Banjul: Belgium, Denmark, France, Lebanon, Norway, Spain, Sweden. U.S.A. has resident charge d' Affairs and U.K. has High Commissioner. Senegal has resident Ambassador.

REPAIRS: Minor hull, deck and engine repairs and welding undertaken by G.P.A. dockyard.

DRY DOCK: A slipway of capacity of 500 tons displacement is included in the dockyard facilities.

REPATRIATION: Possible.

AIRPORT: Airport 14 miles from Banjul. Regular services.

TIME: GMT kept throughout the year.

HOLIDAYS: New Year's Day (1st January); Independence Day (18th February); Good Friday, Christmas Day, Boxing Day, Islamic Festivals of Eid-El-Fitr (Ramadan) and Eid-El-Kabir. No cargo work on Islamic Holidays.

TELEPHONE: Telephones installed on board at ship's/Agent's request.

SHORE LEAVE: No restriction on normal shore leave.

GENERAL: Lighters may be hired for discharging ship at anchor and transhipments up river.

A private company operates a large fleet of lighters, mainly for transporting groundnut from river ports to Banjul. Ships stores: fresh vegetables, beef and fish, fruit (in season) and bonded stores are available.

Other Ports: River Ports: Kaur and Kuntaur at 118 and 150 miles upriver respectively from Banjul. River Pilots available at Banjul. Max. loaded draft 17 ft. 06 in.

DEVELOPMENTS: Area to be reclaimed for container handling and stacking terminal.

AUTHORITY: Gambia Ports Authority, Wellington Street, P.O.Box 617, Banjul, Republic of the Gambia. *Tel:* 266 (Managing Director). 267 and 268 (Others). *Telex:* 2235 Gamport Gv. *Cables:* Gamports Banjul. *Contact:* Captain J. F. Leigh, Managing Director.

AGENT: Elder Dempster Agencies Limited (or Successors thereof), Buckle Street, P.O.Box 257, Banjul, The Gambia. Tel: 432. Telex: 2202 GV. Cables: "Elder Gambia".

HEALTH: Pratique given on arrival. In case suspected disease or fever on board, radio details to Agent before arrival. Complete declaration of health required.

RADIO: Rugen Radio, call sign "Y5M".

TUGS: Available. Use of at least 1 tug is compulsory for vessels berthing and unberthing.

Sufficient number of tugs available, from 300 h.p. to 1,200 h.p. Tugs normally join vessel in front of the mole.

BERTHING: *Overseas Port:* Situated in Lower Warnow River about 3.8 miles from Warnemunde Sea Buoy.

Pier No. 1:	9 berths General goods depth 30 ft. to 34 ft.
Pier No. 2:	13 berths General goods depth 30 ft. to 33 ft.
Pier No. 3:	4 berths Bulk cargoes depth 30 ft. to 37 ft.
Pier No. 4:	3 berths Grain, Feedstuffs, Fish Meal. Depth 34 ft. – 37 ft.
Oil Pier:	3 tanker berths depth 30 ft. to 38 ft.

Chemical Port: 1 berth. Depth 29 ft. 7 in. Products Handled: Ammonia, Methanol and Butane.

City Docks: In Warnow River, about 6 miles from sea. Total quay length 1,600 m. depths alongside 21 ft. and 18 ft. Grain elevators shooting capacity 42 t.p.h., suction capacity 33 t.p.h.

Warnemunde: Port for passenger service. Quay length 180 m. Depth alongside 27 ft. 06 in.

Port Control to be contacted through VHF Channel 14.

Roll-on/Roll-off terminal with facilities for 20 ft. and 40 ft. containers. Max. draft 25 ft.

CRANES: *Overseas Port:* 73 cranes and 15 crane-bridges with capacities from 3.2 – 63 tons. A self-propelled floating crane "Goliath", for heavy lifts not exceeding 100 tons is available. Heavy Lifts weighing up to 300 tonnes may be handled by means of additional 100 ton yard cranes. Container facilties and container gantry crane available.

City Docks: Crane capacities 2 – 10 tons.

BULK HANDLING FACILITIES: 4 berths, length of quay 900 m. 6 bridges with 20 tons capacity and outreach of 40 m. 2 unloaders, 1×500 t.p.h. and 1×2,000 t.p.h. Storage area 13,200 cu.m. for 90,000 tons of bulk cargo.

TANKERS: 3 berths available. Max. size 50,000 d.w.t. Max. length 230 m., Max. draft 38 ft.

Berth No. 03, 31 ft. (max. LOA 215 m.)
Berth No. 04, 38 ft. (max. LOA 230 m.)
Berth No. 05, 30 ft. (max. LOA 215 m.)

Storage capacity of 120,000 cu.m. Max. discharge rate 2,900 cu.m. p.h.

MEDICAL: Doctors, hospitals available. Advance notice to Agent required if medical assistance necessary.

FRESH WATER: Available ex-shore hydrants.

FUEL: Available all grades fuel and gas oil by barge. Vessels calling for bunkers only, pay no harbour dues, and other fees are reduced.

REPAIRS: All repairs possible. Neptun Shipyard and other repair shops situated at City Docks. Warnow Shipyard and floating dock situated in Overseas Port.

Tank cleaning, boiler cleaning and repairs.

REPATRIATION: Can be arranged if identification papers in order.

TIME: GMT plus 1 hour. Summertime, GMT plus 2 hours (24th March – 29th September).

HOLIDAYS: New Year (1st January); Good Friday; Easter Sunday; 1st May; Whit Sunday; Whit Monday; 7th October; Christmas Day; 26th December.

AIRPORT: Berlin – Schonefeld.

TELEPHONES: Ship-to-shore connections available.

POLICE/AMBULANCE/FIRE: Ambulance 366-3500; Police 366-3333; Fire 366-2222.

SHORE LEAVE: Crew members permitted ashore.

DEVELOPMENTS: Plans to build a floating island in depth of 21 m. off Rostock to accommodate tankers up to 100,000 tons. Estimated discharge rates up to 3,000 t.p.h. into smaller vessels for transfer to existing oil terminal.

New container and Ro-Ro installation to be built in the Southern harbour.

Port basin to be dredged to 14.0 m.

SHIPMASTER'S REPORT: September 1980.

VHF: While the vessel is in port, telephone calls to anywhere inside or outside Germany can be made most conveniently through "Rostock Radio" on VHF Channel 16. The working Channel is 26.

Customs: The Customs only seal the cigarettes and coffee. Spirits are not sealed. Each crew member is allowed 200 cigarettes.

Immigration: Immigration are very strict. Shore passes are issued to all crew members. All supernumeraries (e.g. wives on board), have to obtain visas which cost DM5/– each, and have to be paid to the Immigration Authorities, directly by the Master. On completion of discharge the entire ship's company (with the exception of one deck watchkeeper and one engine watchkeeper) are required to remain in their cabins with Passports/Seaman's Books, until the vessel is thoroughly searched by the Authorities for stowaways.

Density: The density of the water at the berth varies from 1000 to 1010 ozs./cu.ft.

AUTHORITY: Veb Seehafen Rostock, DDR-2500 Rostock-Uberseehafen. *Tel:* 366-3200. *Telex:* 31264. *Contact:* Mr. Dietor Noll, Port Director. Port Captain *Tel:* 366-4255.

AGENT: VEB Schiffsmaklerei, Strandstr 86, Rostock. Telex: 31265 (Head Office). Port Office, City Docks. Telex: 31265. Tel: 37081 (Ext. 367). Agency Overseas Port. Telex: 31428. Tel: 366-51171.

STRALSUND: 54.18 N. 13.06 E. (See Plan)

DOCUMENTS:
Health Declaration.
6 Crew Lists.
2 Passenger Lists.
2 Currency Lists.
Stores List.
Cargo Documents.
Ship's Certificates.

PILOTAGE: Compulsory. Contact Pilot by VHF Channel 14. Pilot stations are at Barhoeft and Thiessow. Pilot boards vessel at Gellen (N.W. entrance) and Landtief (Eastern entrance).

Entry only possible from 1 hour before sunrise to 1 hour after sunset. (N.W. entrance only).

ANCHORAGES: In the roads clear of the fairway, depths 26 ft. to 30 ft.

RESTRICTIONS: Northern entrance between breakwaters is 11 ft. 06 in. depth, used by smaller vessels only. Eastern entrance, depth 17 ft. MLW passing railway bridge, which is opened about every 3 hours.

MAX. SIZE: Vessels up to 17 ft. draft.

RADIO: Rugen Radio, call sign "Y5M".

HEALTH: Pratique given on arrival. In case suspected disease or fever on board radio details to Agent before arrival.

TUGS: Available and compulsory for vessels of over 1,000 g.r.t. berthing and unberthing.

BERTHING: Depth alongside quays up to 17 ft. maximum. Length of quays 1,100 m.

CRANES:

2 cranes	10 tons capacity; reach 20 m.
2 cranes	3.2 tons capacity; reach 20 m.
1 crane	5 tons capacity; reach 22 m.
2 Elevators	capacity 25 t.p.h. each.

Also a conveyor system for handling of salt with a capacity of 250 t.p.h.

FRESH WATER: Available from shore ex pipe-line.

FUEL: Gas oil and lub oil available by barge.

REPAIRS: All deck, hull and machinery repairs by local shipyards.

REPATRIATION: All facilities exist for changing crews.

AIRPORT: Berlin (Schonefeld).

MEDICAL: Doctors, hospitals available. Advance notice to Agent required if medical assistance necessary.

TIME: GMT plus 1 hour. Summertime, GMT plus 2 hours (Last Sunday in March – Last Sunday in September).

HOLIDAYS: New Year (1st January); Good Friday; Easter Sunday; 1st May; Whit Sunday; Whit Monday; 7th October; Christmas Day; 26th December.

SHORE LEAVE: Crew members permitted ashore.

AUTHORITY: VEB Seehafen Stralsund, Hafenstrasse 15, DDR-2300 Stralsund. *Tel:* 692360, 692361. *Telex:* 317350 Dtsh Dd. *Contact:* Heinz Happ, Port Director. Harbour Master, *Tel:* 692382.

DOCUMENTS:

Health Declaration.
6 Crew Lists.
2 Passenger Lists.
2 Currency Lists.
Stores List.
Cargo Documents.
Ship's Certificates.

PILOTAGE: Compulsory from outer roads to harbour quays. Pilot boards at Wismar Sea Buoy (position: Lat. 54° 01.6′ N., Long. 11° 23.0′ E. (approx.)). International code signals used. Contact by VHF Channel 12.

ANCHORAGES: In outer roads between Hannibal Shoal and Poel Island in depths of up to 40 ft. Protected anchorage in inner roads, depths up to 30 ft.

RESTRICTIONS: Entrance to the port is through a buoyed channel 15 miles long, depth 27 ft. LW. Vessels over 125 m. LOA or 24 ft. draft enter in daylight only, turning basin 250 m. diameter.

MAX. SIZE: Length up to 170 m. Max. draft 27 ft. Vessels over 155 m. LOA, max. draft 26 ft.

HEALTH: Pratique given on arrival. In case suspected disease or fever on board radio details to Agent before arrival.

RADIO: Rugen Radio, call sign "Y5M".

TUGS: Available and compulsory for berthing and unberthing.
2 tugs of 800 h.p. Tugs join vessel according to the Pilot's instruction.

BERTHING:

Grain Quay: Max. draft 27 ft., quay length 160 m., 2 grain elevators, grain silos for 20,000 tons.

Potash Port: Max. draft 27 ft., mechanical potash loading plant, quay length 360 m., 3 loaders. Rate 600 t.p.h.

Oil Port: Max. draft 27 ft., max. length 160 m.

Timber Port: Max. draft 25 ft., quay length 400 m., 2 gantry cranes of 3.2 tons, 1 mobile crane (30 tons).

Old Port: Max. draft 16 ft., quay length 140 m., no handling operations, fishing port, waiting berths.

Seaport, Northern Quay: Max. draft 27 ft., quay length 420 m., 5 gantry cranes with a capacity from 3.2 to 12 tons. One mobile crane of 30 tons capacity and one floating crane of 100 tons capacity.

Seaport, Southern Quay: Max. draft 27 ft., quay length 500 m., 7 semi-gantry cranes with a capacity from 3.2 to 10 tons.

FRESH WATER: Available from shore hydrants at all berths.

FUEL: All grades fuel and gas oil obtainable. Vessels calling for bunkers only pay no harbour dues, and are allowed a reduction in pilotage and clearance fees. 7 days' notice required for bunkers.

REPAIRS: Repairs can be effected at Mathias-Thesen Shipyard. Floating crane available, capacity up to 100 tons.

MEDICAL: Doctors, hospitals available. Advance notice to Agent required if medical assistance necessary.

TIME: GMT plus 1 hour. Summertime GMT plus 2 hours. (24th March – 29th September).

HOLIDAYS: New Year (1st January); Good Friday; Easter Sunday; 1st May; Whit Sunday; Whit Monday; 7th October; Christmas Day; 26th December.

SHORE LEAVE: Crew members permitted ashore.

AIRPORT: Berlin, 270 km. from Wismar.

TELEPHONES: No ship to shore communications.

AUTHORITY: Veb Seehafen Wismar, DR-2400 Wismar. *Tel:* 45300. *Telex:* 318882 (Harbour Master – 318862). *Contact:* Mr. Boddin, Port Director. Harbour Master, Tel: 45552/2764.

AGENT: VEB Schiffsmaklerei Rostock, Agentur Wismar, 24 Wismar, Kopenhagener Strasse. Tel: 3308, 45230-32 Telex: 0318841.

NOTES

Please also advise Shipping Guides Ltd.

Federal Republic of Germany

GENERAL:

RIVER ELBE: **(See Plan)**

GENERAL INFORMATION ON ELBE PILOTAGE, DEEP SEA PILOTAGE, HELICOPTER AND RADAR SERVICE, ANCHORAGE ON THE RIVER ELBE.

Elbe Pilots for all ports on the River Elbe, Cuxhaven, Brunsbuttel, Butzfleth, Stadersand, HEW-Wedel and Hamburg.

Pilot Vessel: For inward bound vessels near Elbe 1 Light-vessel, a 2-masted pilot vessel with black hull and yellow funnel and "Lotse" painted in white letters on both sides of hull is stationed in approx. position Lat. 53° 59.5′ N., Long. 08° 09.0′ E. (1.5 miles E.S.E. of Elbe 1 Light-vessel).

In bad weather pilot vessels shift to East of Light-buoy "9". Such shifting is reported by Norddeich Radio in a navigational warning.

Pilot vessel can be contacted on VHF Channel 16 or 8, by showing flag "G", by sound or morse light signals.

During the night pilot vessels show the lights mandatory for pilot craft according to Rule 29 of the International Regulations for Preventing Collisions at Sea.

The vessel used for embarking Pilots will, in addition, show white flares for 30 seconds at 2-minute intervals according to Rule 36 of the International Regulations for Preventing Collisions at Sea.

Traffic Separation Scheme in the "Approaches to River Elbe": The separation zone of this traffic separation scheme also constitutes a safety zone around Elbe 1 Light-vessel. Ships are urged to give the Light-vessel a good berth when passing.

Masters are requested not to leave the traffic lane in question when taking a Pilot.

There is an anchorage lying 3 miles to the N.E. of the traffic separation scheme. Special care should be applied when approaching or leaving the anchorage. See "Anchorage".

Land-based radar contact can be requested through radar station "Elbe Approach Radar Radio", on VHF Channel 19 during bad weather conditions, e.g. when visibility drops below 3,000 m., when there are ice floes, when buoys have been removed from their respective positions or when pilot vessels are leaving their positions, for further particulars please see "Radar".

PILOTAGE: Vessels requiring Elbe Pilot must order same at least 12 hours prior to arrival at Elbe 1 Light-vessel by radiotelegram to "Elbelotse Brunsbuttel".

Cable address: "Elbelotse Brunsbuttel" via
Norddeich Radio, call-sign DAN
Telex: 28343 Ellots D
Telephone: (04852) 87295

Vessels coming from nearby ports should make the request on departure or as soon as possible.

If the ETA alters, a correction should be transmitted.

Message must include:

1. Name of vessel,
2. g.r.t,
3. ETA Elbe 1 Light-vessel, date 2 figures and time of vessel's arrival 4 figures,
4. draft,
5. vessel's destination.

(For example: 1., Eleka, 2. 12854, 3. ETA Elbe 1 02 1030, 4. 24 ft. 04 in., 5. Kiel Canal).

1 hour before arrival at Elbe 1 Light-vessel Masters are advised to contact the pilot vessel by VHF Channel 16 or 8.

Compulsory District Pilotage: Pilotage is compulsory on the River Elbe to and from Elbe 1 Light-vessel for all sea-going vessels over 1,000 g.r.t., furthermore for all oil, gas and chemical tankers and, in addition, for all such tank-vessels over 10,000 g.r.t. on their way to and from Deutsche Bucht Light-vessel.

These tank-vessels over 10,000 g.r.t. have to use the Western Approach Traffic Separation Scheme Deutsche Bucht.

Pilots for these vessels will be embarked and disembarked only at the Deutsche Bucht Light-vessel by helicopter or pilot boat. See "Deutsche Bucht Pilot Service".

Furthermore, pilotage is compulsory for all bulk carriers of more than 35,000 g.r.t. and other vessels of more than 60,000 g.r.t. on the River Elbe and on their way to and from Deutsche Bucht Light-vessel; all these vessels can embark and disembark Pilots only at the Deutsche Bucht Light-vessel by helicopter or pilot boat, they have to use the Western Approach Traffic Separation Scheme Deutsche Bucht. See "Deutsche Bucht Pilot Service".

Compulsory pilotage exists for outward-bound sea-going vessels of more than 20,000 g.r.t. other than oil, gas, and chemical tankers as far as to the outer range of the pilot vessel position at Elbe 1 Light-vessel even when, under bad weather conditions, the pilot vessel has been moved up-river.

The disembarkation of Pilots can take place by helicopter at Elbe 1 Light-vessel, if ships of the last category (20,000 g.r.t. other than oil, gas, and chemical tankers) are equipped with a properly marked winching or landing area according to International Chamber of Shipping (ICS) Guide to Helicopter/Ship Operations.

See "Deck-markings and Dimensions Plan" in Plans.

The transfer of Pilot by helicopter can also take place on container vessels, if these ships are equipped with a special platform for winching manoeuvres.

Exemptions:

The compulsory district pilotage regulations do not apply to tankers of less than 300 g.r.t. and other sea-going vessels of less than 5,000 g.r.t., provided that:

- such vessels navigate a route which the Master of the vessel in question has navigated at least 6 times within the preceding 12 months in that same vessel;
- the Master of the vessel has an adequate knowledge of the German language;
- such vessels are equipped with an operational radar as well as with an operational VHF radiotelephone installation featuring the Channels specified for the pilotage district in question.

Nevertheless, it is most advisable for any vessel to take a Pilot not only because of his local navigational knowledge but also for his familiarity with the special provisions for the River Elbe, the quarantine and Customs regulations.

In principle all vessels have to take 1 Elbe Pilot.

Bulk carriers and tankers having a draft of more than 37 ft. in salt water (38 ft. in fresh water) - regardless of size – and all vessels exceeding 60,000 g.r.t. – regardless of draft – must take 2 Elbe Pilots.

Pilotage district divided into 3 areas:

1st district: From Elbe 1 Light-vessel to Brunsbuttel (entrance of Kiel Canal) 40 miles (from Deutsche Bucht Light-vessel to Brunsbuttel 68 miles) – operated by Elbe Pilots;

2nd district: From Brunsbuttel to Hamburg Seemannshoft (entrance to Port of Hamburg) 40 miles – operated by Elbe Pilots;

3rd district: Covers the whole area of the Port of Hamburg – operated by Port Pilots.

First change of Pilots takes place at Brunsbuttel for either a Kiel Canal Pilot or a second River Pilot, the Harbour Pilot for Hamburg will embark at Hamburg – Seemannshoft.

Vessels expecting Pilot may wait in vicinity of Elbe 1 Light-vessel or Deutsche Bucht Light-vessel.

Contact either the Elbe pilot vessel or the Heligoland Pilot Station on VHF Channel 8, 13 or 16.

No restriction imposed on night entry for any vessels on the River Elbe.

Current velocity 2-3 knots; mean tidal range at Outer Bar Light-buoy "9" 9 ft. 10 in.; Brunsbuttel 9 ft. 2 in. and Hamburg 10 ft. 4 in. nature of bottom, sand and mud.

River pilotage dues (Lotsabgaben) have to be paid by all vessels exceeding 300 g.r.t., irrespective of whether they have used a river Pilot or not.

Pilotage fee (Lotsgeld) will only be charged if a Pilot is employed.

Deutsche Bucht Pilot Service: A central pilot service has been established at Deutsche Bucht Light-vessel.

Elbe Pilots will be transferred: By helicopter stationed at Wilhelmshaven-Mariensiel and Brunsbuttel-St. Michaelisdonn or by pilot vessel operating from Heligoland. There is a pilot station on the island of Heligoland equipped with VHF operating on Channels 13 and 16 and which responds to calls addressed to "Heligoland Pilot".

Vessels expecting their Pilot at Deutsche Bucht Light-vessel should stand by on VHF Channel 13 or 16 on approaching the rendezvous position.

HELICOPTERS: Helicopter Pilot service is available for vessels exceeding 10,000 g.r.t. at Deutsche Bucht Light-vessel.

The service to embark or disembark Pilots onto or from ships "at anchor" or "underway" can be provided day and night.

A twin-turbine powered Bell 212 S and/or Sikorsky S-76 helicopter is available for this service. Only suitably equipped vessels may have a Pilot transferred by helicopter.

There must be a properly marked landing area or a marked winching area available according to International Chamber of Shipping (ICS) Guide to Helicopter/Ship Operation.

See "Deck-markings and Dimensions Plan" in Plans.

If such a marking is lacking, it will not be possible for the helicopter to touch down or drop a Pilot.

These vessels have to send aforementioned information together with their ETA.

(a) Pilots for the Elbe pilotage region are to be requested 24 hours prior to arrival at the helicopter rendezvous position in the vicinity of Deutsche Bucht Light-vessel by radiotelegram to "Elbelotse Brunsbuttel".

Cable address: "Elblotse Brunsbuttel" via
Norddeich Radio, call-sign DAN.
Telex: 28343 Ellots D
Telephone: (04852) 87295

Vessels coming from nearby ports should make the request on departure or as soon as possible.

Message must include,

1. name of vessel,
2. g.r.t.,
3. ETA Deutsche Bucht Light-vessel with date 2 figures and time of vessel's arrival 4 figures,
4. draft,
5. vessel's destination,
6. whether a properly marked landing area or marked winching area is available,
7. if yes, whether to starboard or port and on which hatchway or which part of the ship.

(*For example:* 1. Terre, 2. 104468, 3. ETA Deutsche Bucht 11 1530, 4. 41 ft. 03 in., 5. Brunsbuttel Elbe-Terminal, 6. Landing area available, 7. on port side.)

(b) A corrected ETA should be sent to "Elblotse Brunsbuttel" 6 hours prior to the transfer operation at Deutsche Bucht Light-vessel.

(c) Send the exact time of arrival to "Elblotse Brunsbuttel" 2 hours before arrival at Deutsche Bucht Light-vessel.

In addition to this, vessels should keep watch on *VHF Channel 16, 30 minutes before arrival* so that the helicopter can contact the ship.

After radio contact is established (VHF Channel 9), the vessel shall advise the helicopter pilot of the vessel's position, heading, speed and the actual wind direction and speed over the deck.

It is essential that the vessel transmit direction finding signals on 410 kHz until the helicopter is over the ship. On request of the helicopter pilot an uninterrupted (locked key) transmission should be given.

When transferring the Pilot, vessels are restricted in their ability to manoeuvre according to Rule 3(g) (iii) and (iv) and may exhibit the lights and shapes as under rule 27(b) of the International Regulations for Preventing Collisions at Sea. In addition, they may inform shipping of their manoeuvres by VHF.

In cases of defect of helicopter, poor visibility, icing conditions, inadequacy of construction of ships, or no landing or winching area markings, the Pilot will have to be embarked or disembarked by the Pilot boat at the same position.

A sea-going Pilot boat is operating from Heligoland in up to Beaufort Sea Disturbance Nos. 4 – 5 for embarking and disembarking the Pilots, if the helicopter is not available, or if the ship's construction is inadequate for helicopter transfer, or if the helicopter landing or winching area of the ship has no proper marking according to International Chamber of Shipping (ICS) Guide to Helicopter/Ship Operation. See "Deck-markings and Dimension Plan" in Plans.

If due to incomplete or misleading ETA information it is found at the attempted Pilot transfer by helicopter that the vessel is not properly marked and/or fitted for such transfer and the helicopter consequently has to return to base, it will be necessary to send a Pilot by boat from Heligoland, which may involve considerable delay plus the cost of the futile flight.

General: If helicopter operation cannot take place, the ship will be informed of the fact by radio telegraph via Norddeich Radio (DAN). For that purpose a permanent radio watch should be kept on 500 kHz (512 kHz if distress traffic is in progress on 500 kHz) during the approach, starting 2 hours before reaching rendezvous position at Deutsche Bucht Light-vessel.

The Master will receive further instructions by radio message or via VHF on how to proceed, if Pilot transfer is not possible.

The Heligoland pilot station can be called on VHF Channel 16 or 13 and should be addressed "Heligoland Pilot".

Vessels expecting a Pilot at Deutsche Bucht Light-vessel will be called on 500 kHz (512 kHz during distress working) or on VHF Channel 16 or 13 for information on transfer details.

RADAR: A continuous and co-ordinated chain of radar stations has been established to cover the traffic flow along the estuary of the River Elbe from a point 4 miles before passing Elbe 1 Light-vessel as far as well into the port of Hamburg.

If visibility drops below 3,000 m. and/or if particular situations arise (e.g. ice floes, withdrawn buoys, pilot vessels leaving their positions, etc.). Masters of inward-bound vessels may request land-based radar monitoring assistance from a point *4 miles* before passing Elbe 1 Light-vessel until receiving a Pilot. This service will be rendered by Elbe Pilots and is available by contacting Elbe Approach Radar Radio, VHF Channel 19.

The same service is extended to outward-bound vessels as far as *4 miles* West of Elbe 1 Light-vessel.

Once the Elbe Pilot has come aboard he will be assisted by his land-based colleagues monitoring the shore-operated radar system.

Radar Stations along the River Elbe: Elbe Approach Radar Radio, VHF Channel 19; Neuwerk Radar Radio 1, VHF Channel 18; Neuwerk Radar Radio 2, VHF Channel 5; Cuxhaven Radar Radio, VHF Channel 21; Belum Radar Radio, VHF Channel 3; Brunsbuttel Radar Radio, VHF Channel 4; Freiburg Radar Radio 1, VHF Channel 18; Freiburg Radar Radio 2, VHF Channel 22; Steindeich Radar Radio, VHF Channel 5; Hetlingen Radar Radio, VHF Channel 21; Hamburg Radar Radio, VHF Channel 3 and 19.

Each station broadcasts periodical reports, in German and English, of visibility, ice, tide, alterations of seamarks, etc. See "Admiralty List of Radio Signals".

ANCHORAGE: A deep-water anchorage for deep-draft vessels, very large crude carriers (VLCC's), and ultra large crude carriers (ULCC's) is located South of "Deutsche Bucht" Light-vessel, approx. position Lat. 54° 05′ N., Long. 07° 27′ E. Depth of water from about 34 m. to 36 m.

In the vicinity of Elbe 1 Light-vessel (3 miles to the N.E.) for large and deep-draft vessels, North of estuary, approx. position Lat. 54° 03′ N., Long. 08° 09′ E., depth of water from about 14 m. to 19 m. below chart zero.

Neuwerk Roadstead, approx. position 53° 58′ N., 08° 30′ E., depth of water from about 8 m. to 17 m. below chart zero;

Medem Roadstead, approx. position 53° 51′ N., 08° 46.5′ E., depth of water from about 5 m. to 13 m. below chart zero;

Neufeld Roadstead, approx. position 53° 51.7′ N., 09° 00′ E., depth of water from about 8 m. to 10 m. below chart zero;

N.E. Roadstead, off Brunsbuttel, permission only for 1 tide, approx. position 53° 53′ N., 09° 12′ E., depth of water from about 13 m. to 14 m. below chart zero;

Freiburg Roadstead, approx. position 53° 50.6′ N., 09° 19.5′ E., depth of water about 13 m. below chart zero;

There are further anchorages for small vessels at Sudreede (South anchorage) off Brunsbuttel, Wischhafen, Krautsand, Grauerort – and Twielenfleth Roadstead.

The bottom at all these anchorages consists of sand and mud.

DEEP SEA PILOTAGE: Ships requiring the assistance of deep-sea Pilots in the North Sea, the English Channel, or the Skagerrak shall make use only of the service of deep-sea Pilots in possession of a Deep-Sea Pilot Card issued in accordance with the Rules and Regulations for the Good Government of Deep-Sea Pilotage in the North Sea.

German deep-sea pilotage covering the North Sea and English Channel is centralised with the Brotherhood of Elbe Pilots with its headquarters in Hamburg: Lotsenbruderschaft Elbe, Elbchaussee 330, 2000 Hamburg 52. Tel: (040) 824075.

German state-licensed Deep-sea Pilots for the above mentioned areas can thus be requested only from the Brotherhood of Elbe Pilots. All such Pilots hold foreign-going Master Mariner's Certificates.

They are on call to board vessels in all North Sea ports of the Continent and the United Kingdom and in ports along the coastlines of the English Channel.

Vessels will be boarded on request by these Pilots for pilotage in the North Sea and English Channel.

These Pilots are experienced in handling vessels of any type and size.

Advantages: Assistance to nautical staff in heavily congested areas. Exact knowledge of local conditions.

In order to ensure that vessels will get their deep-sea Pilots in time, the following periods of notice should be observed for ships berthed in

German ports:	9 hours prior to ETD
Continental North Sea ports:	24 hours prior to ETD
UK North Sea and Channel ports:	48 hours prior to ETD or to passing the local pilot station.

Request for services to be directed by radiotelegram to "Elbelotse Brunsbuttel".

Cable address:	"Germanpilot Brunsbuttel" via Norddeich Radio, call-sign DAN
Telex:	28343 Ellots D
Telephone:	(04852) 87246 – Mondays through Fridays from 0730 to 1530 hrs. (04852) 87295 – all other times

Deep-sea Pilots (not authorised as dual capacity River Pilots) are not allowed to pilot any vessels (whether subject to compulsory pilotage or not) on the River Elbe from Deutsche Bucht Light-vessel as far as the Port of Hamburg, regardless of whether pilot vessels are on position or not during bad weather conditions or whether or not Pilots can be embarked or disembarked during bad weather at the normal transfer position.

In order to avoid all the disadvantages caused by such a situation it is urgently advised to take a German Elbe Pilot or dual capacity River Pilot at the last North Sea or Channel port of departure whenever such bad weather conditions are foreseeable.

Also see "Brixham"

Extra Service:

Inward-bound vessels – especially container vessels – wishing to proceed without delay by gale or fog, etc., regardless of whether pilot vessels are in position or not during bad weather conditions, as may be caused when taking an Elbe Pilot at Elbe 1 Light-vessel or Deutsche Bucht Light-vessel, can request the Elbe Pilot to come aboard at the first Channel or North Sea port of call for approaching the river Elbe and non-stop onward upstream pilotage.

In order to avoid all the disadvantages caused by the forementioned situation – if foreseeable – it is urgently advised to request an Elbe Pilot in time.

Advantages: Assistance of nautical staff in the heavily congested area of the German Bight – especially of the approach of the River Elbe –, exact knowledge of local conditions, saving of time, reduced hazards.

Please observe these periods of notice:

Continental North Sea ports:	24 hours prior to ETD
UK North Sea and Channel ports:	48 hours prior to ETD or to passing local pilot station.

Request for services to be directed by radiotelegram to "Elbelotse Brunsbuttel".

Cable address:	"Elbelotse Brunsbuttel" via Norddeich Radio, call-sign DAN
Telex:	28343 Ellots D
Telephone:	(04852) 87246 – Mondays through Fridays from 0730 to 1530 hrs. (04852) 87295 – all other times.

Baltic Pilot – Kiel: Baltic Pilots Kiel ("Uberseelotsen Ostsee Kiel-Holtenau e.V.") is the address for ships entering the Baltic Sea via Kiel Canal or from ports of the Federal Republic of Germany which require a Deep Sea Pilot for the Baltic Sea.

The Baltic Pilots Kiel have 48 members. All members carry the "Red Licence" of BPAC which is the only licence acknowledged by all Baltic Governments.

Baltic Pilots Kiel: Tel: 0431-36 28 58 (24 hours a day) 0431-3 68 68 (office hours). Cables: Balticpilots Kiel. Telex: 299 857 bwki d. Postal Address: Uberseelotsen Ostsee e.V. Schleuseninsel 6, D-2300 Kiel 17.

BRAKE: 53.20 N. 08.29 E. (See Plan)

PORT LIMITS: The government-owned piers are the commercial area of the port. A vessel is considered to be an "arrived ship" when she is moored alongside such piers, and the customs formalities are complete. Laytime will commence according to referring charter parties.

Port Authorities distribute the free berthing places in following the "Benutzungsordnung fur den Hafen Brake" which says briefly that a vessel will get a rank position in actual arriving times:

(a) for ships coming from sea: arrival "Weser Light-vessel" plus 5 hours.

(b) for ships coming from Bremerhaven North Roads and Blexen Roads: departure plus 2 hours.

(c) for ships coming from Bremen: departure plus 3 hours.

DOCUMENTS:

2 Lists Ship's Stores.
2 Crew Lists.
2 Passenger Lists.
Health Certificate (forms obtainable from Pilot).
Ship's Register.

DEEP SEA PILOTAGE: See "General" before first German port.

PILOTAGE: Carried out by Weser River Pilots. The river Pilots also act as docking Pilots. Also see "Bremen" and "Bremerhaven".

ANCHORAGES: No anchorage in vicinity of Harbour. Anchorage in "Blexen Roads". For further details see "Bremen".

RESTRICTIONS: Vessels proceeding to Brake with a draft in excess of 24 ft. will be restricted by the tide.

MAX. SIZE: Max. length 265 m. (869 ft.); no restriction on beam. Max. draft 37 ft. in fresh water.

PRATIQUE: Free Pratique is given by Health and Immigration Officer only. If a case of fever or disease is suspected on board radio the Agent with details before arrival.

RADIO: Cable Agent via Norddeich Radio (Call sign DAN) advising ETA and cash requirements.

RADAR/VHF: Stations from Weser Light-vessel to Bremerhaven. Radar service between Bremerhaven and Brake. Radar stations have day and night service. If no fog every odd hour radar stations give on VHF or Pilot walkie-talkie report of visibility, defective buoys, anchoring ships, obstructions to navigation, and special occurrences. Direct contact between port and ship is possible on VHF.

TUGS: Available day and night in sufficient number. No extra charge for using tug's lines.

BERTHING:

New locks have been built at the inner harbour and are operating since August 1979. Dimensions: Length 95 m. (311 ft.), width 16 m. (52 ft.) Max. size of vessel to be handled will be a fully loaded vessel of 3,000 d.w.t. with a max. draft of 6.0 m.

Inner Harbour with tide-independent lock: Length of dock 1,070 m. (3,500 ft.), width 110 m. (360 ft.). Length of canal 228 m. (750 ft.), width of canal 46 m. (150 ft.), length of quay in canal 228 m. (750 ft.). Depth 4.3 m.

Riverside Berth: Total length 1,852 m. (6,075 ft.), depth at pier 13.6 m. at normal low water, tidal amplitude 11 ft. 6 in. Max. draft 37 ft. Max. length of ships not more than 265 m. (869 ft.).

This government-owned pier is divided into 2 areas. The Northern part is the crane-area with a length of 4,510 ft., the Southern part, 1,565 ft. long, is the grain-handling area.

Private Pier of the Fettraffinerie/Unimills has a length of 245 m. (804 ft.) depth 11.0 m.

SPECIALISED CARGO HANDLING FACILITIES:

Inner Harbour:

2 electric cranes to lift 1 to 5 tons.
2 bridge cranes, capacity 50 tons.
2 bridge cranes, capacity 20 tons.
1 bridge crane, capacity 15 tons. Riverside Berth.
2 whipping cranes, capacity 25 tons.
2 whipping cranes, capacity 15 tons.

South Pier:

4 grain suction units – total capacity 1,800 t.p.h.

North and Middle Pier:

4 shore unloader and loading bridges of between 16 tons and 80 tons capacity, waterside reach 32 m. to 40 m.

4 rotating tip cranes – 14 tons to 25 tons capacity – max. reach 40 m. to 46 m.

Conveyor belts 1,280 m., max. capacity 100 cu.m.p.h.
Wagon loading station: capacity 300 cu.m.p.h.
Combined ship loader: capacity 1,000 cu.m.p.h.

Loading/discharge points for vegetable and animal oils/grease, mineral oil, molasses and other liquid products: Discharge capacity: 1,500 t.p.h.

Inner Harbour:

1 rotary tip crane – capacity 16 tons. Reach 22 m. to 25.5 m.

Storage:

Silo installation and storage shed for grain: 270,000 tonnes.
Storage sheds: 54,500 sq.m.
Free storage areas: 82,000 sq.m.
Tank storage for grease, refinery and the S.S. "Elbe" 110,000 tonnes.

The government-owned pier is equipped for containers, but not for Roll-on/Roll-off traffic. The berth does not handle liquid chemicals.

STEVEDORES: ETA has to be reported to the Agent to arrange gangs. Stevedores are working 3 shifts around the clock on working days (Monday to Saturday); on Sundays and holidays 4 shifts are worked around the clock.

MEDICAL: One hospital and several doctors available at Brake. Advance notice to Agent required if medical assistance necessary.

TANKERS: Fettraffinerie Pier: Max. draft 33 ft. Discharging lines: molasses 6 in., fuel oil 8 in., diesel 10 in. and vegetable oil from 4 in. to 8 in.

DENSITY: Brake Port, Fresh water: salinity = 1002–1004.

FRESH WATER: Available both at Riverside Berth and Inner Harbour. Pumping capacity from 18 t.p.h. to 20 t.p.h.

FUEL: All grades available by bunker barges.

FIRE PRECAUTIONS: No smoking on deck. For tankers at Fettraffinerie Pier smoking only in saloon and/or messroom.

CONSULS: No Consuls; consulates at Bremen.

REPAIRS: All normal ship and engine repairs can be carried out during laytime on board.

DRY DOCKS: One dry dock at Luehring Werft, Brake, for ships with a length not in excess of 85 m. (279 ft.), nor wider than 16 m. (52 ft. 6 in.), and a max. draft of (3.98 m./13 ft. 1 in.)

SURVEYORS: Classification Societies not represented but several surveyors available at Brake Port.

GANGWAY/DECK WATCHMEN: Crew's watchmen necessary – strong tides, current-speed 3 knots.

HATCHES: Depends on the different charter parties.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle of spirits and 2 bottles of wine.

CARGO GEAR: Load/discharge normally effected by shore-gear.

REPATRIATION: Any necessary repatriation and/or crew changes can be effected by Agents at Brake.

AIRPORT: International airport served by regular airlines at Bremen. Brake to Bremen, distance 57 km. (35 statute miles).

HOLIDAYS: New Year, Good Friday, Easter Sunday and Monday; 1st May, Ascension Day; Whitsunday and Monday, Penitentiary Day, 2 Christmas Days. Cargo work can be arranged on those days, except on New Year, Easter Sunday (1st Easter day), 1st May, Whitsunday, 1st Christmas Day, and on the days before such days till 1200 and/or 1400 hours.

TIME: Local time is GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 4060; Fire 112.

TELEPHONES: No arrangements to place telephones on board.

SHORE LEAVE: Shore passes are required according to customs regulations.

IDENTIFICATION CARDS: Crew members to have valid identity cards.

DEVELOPMENTS: Weser fairway depth will be increased to 12 m. (39 ft. 6 in.).

SEAMAN'S HOSTEL: Weserstr. 1A, tel. 4490.

AUTHORITY: Niedersachsisches Hafenamt Brake, Brommstrasse 2, D-2880 Brake. *Tel:* 04401/5061. *Contact:* Port Captain.

AGENT: See "Bremen".

BREMEN (Including Farge): 53.07 N. 08.45 E. **(See Plan)**

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
Provision and Store Lists incl. fuel oil.
Dangerous Cargo Lists.
Health Declaration.
Ship's Register.
No Customs Papers if vessel laying in Freeports at Bremen.

DEEP SEA PILOTAGE: See "Brixham" or "Cherbourg" and "General" before first German port.

PILOTAGE: Compulsory for ships of more than 1,000 g.r.t. and tankers of more than 300 g.r.t. and for all ships with dangerous goods in bulk and nuclear ships, exemptions possible.

Distance from Weser Light-vessel to Bremerhaven 36 miles. Distance from Bremerhaven to Bremen 32 miles.

At least 12 hours before arrival at Weser Light-vessel Masters should cable messages to "Lotsenbruderschaft Weser zwei Bremerhaven" via Norddeich Radio. Message to include name and g.r.t. of vessel, place where Pilot required to board, day and hour of vessel's arrival, vessel's destination and fresh water draft in metres. Sea Pilots board at Weser seabuoy to Bremerhaven. River Pilots board at Bremerhaven to pilot vessels to Bremen.

Pilot station near Weser Light-vessel 54° 05′ 16″ N., 07° 50′ 00″ E., black painted motor vessel, black topped funnel, white lettering "Lotse" on hull. In rough weather, pilot boat may be found inside near buoys 77 and 79. Pilots may be contacted by Norddeich Radio, 2182 or 2614 kHz. or by VHF Channel 16.

River Pilots boarding at Bremerhaven also act as harbour Pilots to all ports above Bremerhaven.

ANCHORAGES:

1. About 1 mile S.W. of Weser Light-vessel.
2. Hoheweg Road between buoys 17 and 19.
3. Tanker Road W. of buoys 27–31.
4. Blexen Roads (South Roads) only for smaller ships.

RESTRICTIONS: Vessels proceeding to Bremen, with a draft in excess of 25 ft. will be restricted by the tide.

MAX. SIZE: Bremen: length 190 m. with draft 10.7 m., longer ships with restricted draft.

Locks: At the entrance of the Industriehafen: Length 248 m., clear width 34.1 m.

Ships passing with max. length 230 m. and 33.5 m. breadth. According to tide, docking is possible up to 9.5 m. (31 ft. 03 in.).

HEALTH: Master has to fill and sign Maritime Declaration of Health which is handed to health officer on arrival at Bremerhaven and Bremen. In case suspected disease or fever on board radio details to Port Health Bremerhaven via Norddeich Radio before arrival.

RADIO: Cable Agent via Norddeich Radio, call sign DAN, advising ETA and cash requirements.

Bremen Port Radio VHF station on Channels 3 or 16 to be used for messages to all Port Authorities including Police and Fire Brigade and Port Health in case of emergency. Bremen Lock Radio on Channel 12.

RADAR/VHF: Stations from Weser Light-vessel to the mouth of River Hunte and at the port area of Bremen. Radar service between Hunte and Bremen is planned. If no fog, every odd hour radar station gives by VHF or Pilot walkie-talkie, report of visibility, defective buoys, anchoring ships, obstructions to navigation and special occurrences.

Ships ordered for Bremen Industriehafen should contact "Oslebshausen Lock" via Channel 12 VHF after passing Bremerhaven.

TUGS: Tugs available at all stations according to ships request. Tugs' lines used (only) without charge.

BERTHING: Berthing at Bremen: The following harbours can be reached:

Harbour name:	*Quay Length* (m.)	*Depth (above chart datum)* (m.)
Europahafen	2,730	3.20 – 8.60
Uberseehafen	2,960	3.20 – 10.20
Werfhafen	700	3.20 – 7.20
Holz–und Fabrikenhafen	2,600	4.20 – 8.50
Getreidehafen	570	4.00 – 11.50
Neustadter Hafen	2,700	4.00 – 11.50
Kap Horn Hafen	725	9.00
Industriehafen	3,060	3.20 – 6.20 (plus harbour water, about 3.80 m., only Industriehafen)

Max. draft is dependent on the prevailing winds

SPECIAL CARGO HANDLING FACILITIES:
Freeports: Neustadter Hafen, Uberseehafen and Europahafen, mainly general cargo.
Quay length: 7,560 m.
Max. draft: 11.50 m.
Shed storage: 532,000 sq.m.
Porterage company: Bremer Lagerhaus-Gesellschaft.

Facilities: Air-conditioned fruit storage, refrigerated storage, consolidated cargo centre, packing centres, Ro/Ro terminals, logistics and information processing on industrial plant transports and grain handling centre.

Container Handling Facilities: Neustadter Hafen Shed 24 is equipped with 2 container cranes, suitable for 40 ft. containers. Max. lifting capacity is 45 tons. The terminal has 116 connections for reefer containers.

Shed 21 is equipped with 1 container crane, suitable for 40 ft. containers. Max. lifting capacity is 80 tons.

Roll-on/Roll-off terminal: At the head of the Europahafen, 1 berth. Max. carrying capacity 60 tons, width 8 m. Max. draft 28 ft.

At the end of shed 24 Neustadter Hafen, 1 berth. Max. carrying capacity 60 tons, width 30 m., draft 32 ft.

LASH Terminal: A LASH terminal has been appointed at Shed No. 2 Europahafen. Lash-lighter places: Lankenauer Hoft and Shed No.19 Coolhouse.

Bulk handling facilities (Industriehafen):
Bulk cargoes such as steel, and steelware, coal, coke and coke breeze, timber, ore, oil, molasses, sand, stones, phosphate and further fertiliser and chemicals are handled by companies under private management.

For entering Industriehafen see "Max. Size – Locks".

Huttenhafen: Klockner-Hutte mainly handles ore, scrap, coke and coke breeze, sand, steel and steelware as slabs and coils of Klockner Iron Mill.
Quay length: 520 m.
3 gantry cranes: 12.5, 15 and 55 tons.
Storage area: 80,000 sq.m.
Discharging capacity ore: 8,000 tons per 24 hours.
Loading capacity coils: 5,000 tons per 24 hours.
Loading capacity slabs: 6,000 tons per 24 hours.

Rhenus WTAG: Mainly handles provender, coal, coke, minerals, wood products, stones, etc.
Quay length: 450 m.
4 cranes: 25 – 56 tons.
Storage area: 21,000 sq.m.
Loading capacity coils: 6,000 tons per 24 hours.
Loading capacity plates: 5,000 tons per 24 hours.
Loading capacity coal: 6,000 tons per 24 hours.
Quarrier and riddler: 500 tons per 24 hours.

Olhafen: Oil farm for about 100,000 tons. One tank for molasses 11,000 tons.

Kohlenhafen: Gebr. Rochling mainly handles coal, coke, ore, phosphate and logs. West Africa Terminal specialises in all kinds of general cargo and container handling.
Quay length: 750 m.
7 cranes: 5 – 50 tons.
1 coal-loader: 60 tons.
Storage area: 30,000 sq.m.
Loading capacity coal: 9,000 tons per 24 hours.
Loading capacity coke: 6,000 tons per 24 hours.
Discharging logs: 1,555 tons per 24 hours (approx.).

Kraftwerk Hafen (Power Station): At this berth only coal cargoes for use by the power station are handled. Discharging rate (2 cranes) 1,250 tons per shift.

Kalihafen: Anker-Schiffahrt handles all kinds of cargo and is specialised in packing, decantation and sacking of chemical products.
Quay length: 500 m.
2 gantry cranes: 24 tons
4 special loaders
1 bridge for liquids
Storage area: 40,000 sq.m.

Tankfarm Defrol: Storage capacity 48,000 tons fuel.

Hafen E: Hansakai (Klembt) handles all kinds of cargoes and is specialised in coils, pipes, construction parts, heavy lifts, ore and containers.
Quay length: 285 m.
1 gantry crane: 15 tons.
4 cranes: up to 45 tons.
Storage area: 11,000 sq.m.

Wandel & Co: 60,000 sq..m. shed storage for grain and general cargo.

Hafen A: H. Menke & Co.: Quay length: 250 m. 1 tank for molasses 15,000 tons. Specialises in wine import with storage area for 20 million litres.

Bremer Lagerhaus-Gesellschaft:
Quay length: 300 m.
Storage area: 90,000 sq.m.

Other bulk handling facilities:
Granary (Getreidehafen) *near the Uberseehafen*
No locks, max. draft 35 ft. Lighterage is possible.
Berth "A" 3 elevators with a capacity of 400 t.p.h. max. length 275 m. Silo capacity 150,000 tons.

Kraftwerk Farge (Power Station)
Location: 10 miles downstream from Bremen. Only coal cargoes for the power station are handled.

Max. draft	29 ft. 6 in.
Max. length	200 m. = 656 ft.
Max. beam	25 m. = 82 ft.

3 cranes, total discharging capacity 200 t.p.h.

Rolandmuhle: tidal basin Holz- und Fabrikenhafen. Grain facility with:

Max. draft	22ft. at low water.
Max. length	180 m. (591 ft.).
2 stationary elevators	3,000 tons per day
1 conveyor for loading bags only	

J.H. Bachmann/J. Muller/Karl Gross (Holz- und Fabrikenhafen)
Facility for grain and occasionally, general cargo handling.

Max. draft	up to 23 ft. at normal low water.
Quay length	710 m. (2,330 ft.).
Cranes	13 Grain/General cargo
Elevators	4×250 t.p.h. each

General cargo loading installations (Kap Horn) with 2 quays, 1×320 m. long inside Industriehafen and the other 800 m. long (at the riverside). The storage area of 100,000 sq.m. is equipped with gantry crane for handling pipes, construction parts and general.

STEVEDORES: Ordered by Agent; no ETA advice to stevedores necessary.

Working hours:

Regular period: 0630–1430 resp. 0600–1400	on Sundays: (overtime)
Free Port	
1st shift: 0600–1400	1st shift: 0600–1200
2nd shift: 1430–2230	2nd shift: 1200–1800
3rd shift: 2300–0600 (overtime)	3rd shift: 1800–2400
	4th shift: 2400–0600
Industriehafen/Grain Pier	Industriehafen/Grain Pier
0630–1430	0630–1230
1430–2230 (overtime grain pier)	1230–1830
2230–0630 (overtime)	1830–2430
	0030–0630

On Saturdays:
Free Port
1st shift: 0600–1400
2nd shift: 1430–2030 (overtime)
3rd shift: 2100–0300 (overtime)
Industriehafen/Grain Pier
0630–1430
1430–2030 (overtime)
2030–0230 (overtime)

CRANES: All piers are fitted with cranes 3/7 tons. Floating cranes up to 200 tons available.

MEDICAL: All medical facilities available. Advance notice to Agent required if medical assistance necessary.

TANKERS: Draft in fresh water.

Holzhafen	one berth max. draft 28 ft. at LW
Osterott I	one berth max. draft 34 ft. 6 in. at LW
Osterott IV	four berths max. draft 37 ft. 8 in. at LW
Farge	two berths max. draft 29 ft. 11 in. at LW

For the following tanker berths see restrictions of the entrance lock Industriehafen

Oelhafen:	several berths max. draft 14 ft. to 23 ft.
Huttenhafen:	three berths max. draft 20 ft. to 24 ft.
Becken A	one berth max. 22 ft.
Kalihafen	one berth max. 31 ft. 3 in.

Fina Oil, Einswarden. Max. draft 36 ft. 6 in. Discharging lines crude oil 12 in., fuel oil 10 in., diesel 8 in.

Frisia (Gulf Oil), Einswarden. Berth for tankers up to 250 m. length, max. draft 36 ft. fresh water.

DENSITY: Fresh water.

FRESH WATER: Available by hose and barge.

FUEL: All Grades available.

FIRE PRECAUTIONS: Smoking or use of open fire not allowed all over the Port area. No smoking on deck. Tankers, smoking in saloon or messroom only.

CONSULS:	*Tel:*		*Tel:*

REPAIRS: All repairs possible.

DRY DOCKS:

Vulkan-Gravity Dock	up to 240,000 d.w.t.
and one floating Dock	up to 8,500 d.w.t.

SURVEYORS: All types of surveys possible.

GANGWAY/DECK WATCHMEN: Not considered necessary. But available when ordered.

HATCHES: Opening and closing normally by crew with stevedores assisting.

CUSTOMS ALLOWANCES: Outside freeports: 200 cigarettes for 3 days or 50 grams tobacco and 1 bottle spirits. After 3 days further same quantities. Wine not restricted. Freeports in Bremen only Europahafen, Uberseehafen and Neustadter Hafen.

CARGO GEAR: No additional requirements. Preventers necessary.

REPATRIATION: Any time.

AIRPORT: Regular national and international flights.
HOLIDAYS: New Year's Day (no work performed); Good Friday; Easter Sunday (no work performed); Easter Monday; Labour Day (no work performed); Ascension Day; Whit Sunday (no work performed); Whit Monday; 17th June; Prayer Day; Christmas Day (no work performed); Boxing Day.
POLICE/AMBULANCE/FIRE: Police help 110; Fire, First aid 112.
Pilot Station Bremerhaven: Sea Pilots 4–22–20; River Pilots 4–22–89.
Pilot Station Bremen: 39–40–44.
Port Administration Bremen: 397-1.
Waterway Police: 38–20–31.
Port Medical Services: 38–34–16.
Immigration: Call Water Police.
Foreign Calls: 0010.
TELEPHONES: It is possible to rent a telephone box from Mooring Company.
REGULATIONS: Usual Port Regulations. Special Regulations for dangerous goods and Tankers.
AUTHORITY: Hafenamt Bremen, Hafenhaus Ueberseehafen, 2800 Bremen 1. *Tel:* (0421) 3978504. *Telex:* 246089 (HABRE D). *Contact:* Harbour Master on duty.
AGENT: Wm. H. Muller Co. (Deutschland) GmbH. 37 Birkenstrasse D-2800 Bremen 1.Tel.: (0421) 14910. Telex: 244704. FAX: (0421) 12671. Cables: "Batavier".

BREMERHAVEN: 53.33 N. 08.35 E. (See Plan)

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
3 Provision and Store List incl. fuel oil.
3 Dangerous Cargo List.
Health Certificate (forms obtainable from Pilots).
Ship's Register.
No Customs Papers if vessel laying in Freeport at Bremerhaven.
DEEP SEA PILOTAGE: See "Brixham" or "Cherbourg" and "General" before first German Port.
PILOTAGE: See "Bremen".

Docking Pilots join vessels between Buoys 49 and 51A if bound for Ueberseehafen or near entrance of Geeste River if bound for Fischereihafen. Call sign is International Code flags PT with pennant below. Sound and flash signals are 3 long and 5 short. Docking Pilots can be requested via Bremerhaven Port Radio on VHF Channel 12.
ANCHORAGE: See "Bremen".
RESTRICTIONS: Vessels proceeding to Bremerhaven with draft in excess of 35 ft. will be restricted by tide.
MAX. SIZE: Length 340 m., draft 41 ft. in fresh water. Draft 42 ft. 8 in. in fresh water, special permission required.
HEALTH: See "Bremen".
RADIO: See "Bremen".
RADAR: See "Bremen".
VHF: "Bremerhaven Port Radio" on Channel 12.
TUGS: Tugs join vessel with docking Pilots. Tug's lines used at no extra charge.
BERTHING: There are two harbour-groups, Ueberseehafen North of Geeste River and Fischereihafen South of it.
Ueberseehafen:

Along Weser River:	*Depth at LW*
Columbus Quay	32 ft. – 38 ft. 08 in.
Stromkaje	40 ft. 04 in.
Dock Basins:	*Depth*
Neuer Hafen	21 ft.
Kaiserhafen I	28 ft.
Kaiserhafen II	36 ft.
Kaiserhafen III	36 ft.
Verbindungshafen	36 ft.
Nordhafen	42 ft. 08 in.
Osthafen	46 ft.

The dock basins can be reached through 2 locks:
Kaiserschleuse: length 732 ft., gate width 88 ft. without fenders; including fenders 83 ft. 7 in. depth 23 ft. at LW.
Nordschleuse: length 1,220 ft., gate width 147 ft. depth 36 ft. at LW. Max. size of vessel. length 265 m., beam 38 m. (124 ft. 07in.). Draft 42 ft. 08 in.

Fischereihafen:

Dock basins:	*Depth*
Fischereihafen I	24 ft.
Fischereihafen II	24 ft.
Handelshafen	22 ft.

Locks:
Fischereihafen-Doppelschleuse
Small lock: length 349 ft., gate width 39 ft. without fenders; including fenders 34 ft. 06 in. depth 21 ft. at LW.
Large lock: length 328 ft., gate width 98 ft. depth 21 ft. at LW.
SPECIAL CARGO HANDLING FACILITIES: All sheds are equipped with electric cranes.

With special permission of the port authorities the following maximum FW drafts are allowed.
42 ft. 8 in. = 13 m. – max. beam 40 m.
39 ft. 3 in. = 12 m. – max. beam 41 m.
35 ft. = 10.7 m. – max. beam 42 m.

The port is equipped with modern bulk, container, Ro/Ro and general cargo facilities.

4 floating cranes having lifting capacities of 100 tons – 500 tons.
Weserport (Osthafen) Ore transhipment installation, quay length 330 m.. Depth 14.0 m. 2 unloaders. Max. outreach 22.5 m. Total discharge capacity 2,000 t.p.h. Average rate 900 t.p.h.
Columbus Quay Passenger and general cargo facilities.
Quay length 1,030 m. Depth 32 ft. – 38 ft.
9 cranes – 8 tons and one heavy lift bridge of 42 tons.
Car loading installations
A car loading installation is situated in the Nordhafen. Quay length 875 m. Storage area 40,000 sq. m. for about 3,500 cars. The loading is done by ships' ramp.
The Car-Terminal Bremerhaven, situated in the Kaiserhafen II, has a quay length of 700 m. and a storage area of about 360,000 sq. m.
Container Terminals
2 container terminals, 1 at Stromkaje and 1 in the Nordhafen, are equipped with 18 container cranes, capacity 41 tons – 68 tons.

Depth alongside in river 46 ft. at LW. Depth at Nordhafen 42 ft. 8 in.
Kaiserhafen/Verbindungshafen offers 4 basins for general cargo handling. Quay length: 4,130 m. Storage capacity in modern sheds: about 38,000 sq.ft. 29 cranes with capacities from 3–8 tons. Two banana discharging installations have a capacity of over 350,000 tons per year.
LASH Carriers: Special facilities are available.
MEDICAL: Hospital facilities at all Weser ports. No vaccination normally required.
STEVEDORES: Ordered by Agent; no ETA advice to stevedores necessary.
Working hours: 1st shift: 0600–1400
2nd shift: 1400–2200
3rd shift: 2200–0500 (overtime)
on Saturdays:
1st shift: 0600–1400
2nd shift: 1400–2000 (overtime)
3rd shift: 2000–0200 (overtime)
on Sundays:
as Bremen Freeport.
TANKERS: Bominflot KG., Esso Kaje, Verbindungshafen. Max. draft 32 ft. 06 in.

There are several tank-cleaning boats available to receive slops at Bremerhaven.
DENSITY: 1008 – 1010.
FRESH WATER: Available by pipe-line at all berths.
FUEL: All grades available.
FIRE PRECAUTIONS: No smoking on deck. Tankers smoking only saloon or messroom.
GANGWAY/DECK WATCHMEN: Not considered necessary.
OPENING/CLOSING HATCHES: Normally by crew with stevedores assistance.
CUSTOMS ALLOWANCES: Outside freeports: 200 cigarettes for 3 days or 50 grams tobacco and 1 bottle spirits. After 3 days, further same quantities. Wine not restricted. Freeports only at Bremen (Europa and Ueberseehafen), and at Bremerhaven (Kaiserhafen, Columbus Kaje and Weserport).
CARGO GEAR: No additional requirements. Preventers necessary.
IDENTIFICATION CARDS: Not required.
CONSULS: Barbados, Iceland, Sweden, Senegal, United Kingdom.
REPAIRS: All repairs possible.
DRY DOCKS: There are 2 graving docks and 10 floating docks with max. capacity 75,000 tons.
SURVEYORS: (1) Caleb Brett: In Hamburg. Neustadter Weg 6, 2000 Hamburg 11. Tel: (040) 366286.

(2) Lloyd's Register of Shipping: Am Wall 102, 2800 Bremen. Tel: (0421) 310611. Also at Buckingstrasse 10, 2850 Bremerhaven. Tel: (0471) 45006.

American Bureau of Shipping: Steubenstrasse, Fahrgastanlage, 2850 Bremerhaven. Tel: (0471) 46906 daytime and (04743) 276 night time.

Bureau Veritas, District Hamburg: Spaldingsstrasse 1, 2000 Hamburg 1. Tel: (040) 230801. Telex: 02 154 26.
REPATRIATION: Any time.
AIRPORT: About 4 miles from Bremen. Regular airlines.
BANKS: (In Hamburg): Bank of America, Barclays Bank, Citibank, Lloyds Bank, Bankers Trust.
HOLIDAYS: New Year's Day (no work performed); Good Friday, Easter Sunday (no work performed), Easter Monday; Labour Day (no work performed); Ascension Day; Whit Sunday (no work performed); Whit Monday; 17th June; Prayer Day; Christmas Day (no work performed); Boxing Day.
TELEPHONE: Accidents, Police 110; Fire 112; Harbour Master and Docking Pilots 481 263/4, Telex 238564 Hba Hk D; Sea Pilots 42220; River Pilots 42289; Waterway Police 47011; Port Medical Service 40031.
EMERGENCY CO-ORDINATION CENTRE: Flottenkommando SAR Leitstelle, Meyerweg, 2392 Glucksburg. Tel: (04631) 8625-511 (Ext. 575/6).

Deutsche Gesellschaft zur Rettung Schiffbruchiger, Seenotleitung, Werderstrasse 2, 2800 Bremen 1. Tel: (0421) 504393. Telex: 0244754.
STORING: See "Prelims".
(1) Yes
(2) Yes
(3) Yes, jetties fitted with cranes, distance to remain approx. 20 ft.
(4) Yes
(5) Equal to European Community Regulations.
(6) Yes.
AUTHORITY: Hansestadt Bremisches Amt Bremerhaven, Der Hafenkapitan, P.O.Box 100469, Columbusbahnhof, Steubenstrasse 7 B, 2850 Bremerhaven 1, West Germany. *Tel:* (0471) 481 260/1 Port Captain; (0471) 481 263/4 Harbour Master. *Telex:* 238564 Hba Hk D.
AGENT: See "Bremen".

BRUNSBUTTEL 53.53 N. 09.09 E. (See Plan)

(a) General/Elbehafen/Canal Berth; (b) Elbe Terminal; (c) Brunsbuttel Oil Port; (d) Ostermoor.

(a) GENERAL/ELBEHAFEN/CANAL BERTH.

DOCUMENTS:
Health Certificate forms obtainable from River Pilot.
3 Crew Lists.
3 Personal Effects Lists.
3 Stores Lists.
Bill of Lading.
Ship's Register.

For ships entering locks of Brunsbuttel for transit traffic through Kiel Canal, only ship's register required.

DEEP SEA PILOTAGE: See "General" before first German port.

PILOTAGE: *Anchorage River Elbe:* See "General" before first German port.

Pilotage Kiel Canal: Pilotage generally compulsory, vessels over 2,500 g.r.t. must employ a wheelman.

Pilot station, Tel: 04852/8088, VHF Channel 9, ETA 6 hours prior arrival Brunsbuttel Roads by cable to "Kanallotse Brunsbuttel" via Norddeich Radio (DAN), requiring Canal or Harbour Pilot at Brunsbuttel, (for example: Brigitte 1249 ETA Brunsbuttel 29 1800 3.5 m.). Pilot will board ships off the entrance to Kiel Canal.

Pilot boats are painted black with "LOTSE" in white letters on hull. Signal for Pilots is flag "G" over numeral pennant 1, sound or morse signal, VHF Channel 9.

ANCHORAGES: Vessels waiting for entrance to the Canal may anchor in N.E. anchorage, South anchorage, or Neufeld anchorage.

RESTRICTIONS: No restrictions imposed on night entry. If draft above 31 ft. 2 in. fresh water, vessels will be piloted to Brunsbuttel with flood-tide.

Dimensions of lock: length 310 m., beam 40 m.

The Canal can be navigated by vessels up to 235 m. LOA and 32.5 m. beam and draft in accordance with table below.

Length						*Beam in metres*								
(m.)	*20*	*21*	*22*	*23*	*24*	*25*	*26*	*27*	*28*	*29*	*30*	*31*	*32*	*32.50*

Height above water-line transiting Canal must not exceed 40 m.

For Binnenhafen, as far as km. 6.00, vessels not requiring to transit Canal may enter with draft up to 10.40 m.

HEALTH: Pratique automatic for vessels entering harbour for loading or discharging, and ships passing through Canal if required and if Health Certificate forms does not show any infectious diseases.

RADIO: All messages to Agents and Pilots etc., through Norddeich Radio, call sign "DAN". Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16.

Ships reporting station is on permanent duty at Brunsbuttel, VHF Channel 14, safety and calling Channel 16.

RADAR: Radar Service from Elbe 1 to Hamburg see "General" before first German port, but no special Port Radar Service for Brunsbuttel. Radar Service in the area of Brunsbuttel available, can be contacted through VHF Channel 4, "Brunsbuttel Radar Radio".

TUGS: 6 tugs available at Brunsbuttel. Vessel's lines used. Tugs normally join vessels bound for the Elbe Harbour on river in vicinity of Canal locks.

From the approach limit up to entry into the lock, tug assistance is mandatory for vessels in Group 6 and also such vessels which manoeuvre only with difficulty. Tugs assisting ships entering locks join vessels on canal-roads.

BERTHING: Ships lying at terminals situated on Canal bank in Inner Harbour should take into consideration that vessels must moor safely, as suction of passing ships may cause breaking of lines.

Binnenhafen: Comprises the area between lock entrance and km. 5.27.

BRIDGES: Ships transiting canal must have bridge clearance of 40 m. Otherwise no obstructions.

STEVEDORES: Ordered by Agents, no ETA to stevedores necessary.

MEDICAL: Port Medical Service by Harbour Doctors. Day and night service. Inoculations have to be ordered 24 hours prior arrival. Hospital available at Brunsbuttel.

TANKERS: Elbehafen – Oil Section:

Location: At the Elbe-River bank, about 0.5 nautical miles upstream from Brunsbuttel Canal Locks.

Depth of Water: Within the approaches, 13.50 m., alongside berth 14.70 m.

Max. Ships Dimension Acceptable: Length about 400 m. Beam unlimited. Draft 12.95 m. (Sea Water).

Dirty Ballast/Slop Disposal: Shore Line Diameter: 20 in.

Max. Discharge rate/hour: 4,000 cu.m.

Max. Slop Quantity Acceptable: 35,000 cu.m.

Elbehafen for VLCC's: The safe mooring of vessels up to 250,000 d.w.t. has been proved and has become a matter of routine. Harbour Authorities have no objections to accept larger vessels but investigations have to be made with regard to safe mooring facilities ashore. Tankers with more than 37 ft. draft must arrive 2 hours prior to highwater at L/V. "ELBE I", in order to dock at Elbe Harbour with slack water or first ebb-tide. Vessels with draft not exceeding 37 ft. may dock during whole ebb-tide. Pilot vessels to be contacted via VHF radio Channels 13 and 16.

Canal Berth:

Location: Inside Kiel Canal Lock at South bank of the Inner Harbour of Brunsbuttel.

Depth of Water: Within the approaches 11.00 m. Alongside berth 8.20 m.

Max. Ships Dimension Acceptable: Length 150 m. Beam unlimited. Draft 8.00 m.

Shore Line Diameter: 12 in.

Max. Discharge rate/hour: 2,000 cu.m.

Max. Slop Quantity Acceptable: 35,000 cu.m.

BALLAST:

Dirty Ballast Disposal: Operator: Elbe Slop-Ex. GmbH & Co. KG Brunsbuttel, 2212 Brunsbuttel, Schleswigerstrasse 14. *Tel:* 87051. *Telex:* 028368 eslop d. *Cables:* Slopex. Capacity: 4,000 cu.m.p.h.

DENSITY: Brackish at Elbe Harbour and inside locks. Average density 1003.

FRESH WATER: Most berths supply by shore installations.

FUEL: All grades available.

Bunker stations on South side of Canal are:
Shell – 2 berths, gas oil only.
BP – 3 berths.
Elf – 4 berths.
Elbe-Slop-Ex – 2 berths.

and on the North side of Canal:
KuBi – Bunker Station – 1 berth, gas oil only.
Brunsbuttel Bunker Service – 3 berths.

FIRE PRECAUTIONS: No specific precautions except in Kiel Canal.

GANGWAY/DECK WATCHMEN: Services of watchmen not necessary but available day and night if required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Ships entering canal and using terminals must have international ship's register. All other certificates should be valid.

CUSTOMS ALLOWANCES: Tobacco, each crew member 200 cigarettes or 50 cigars or 250 grams of tobacco. Surplus will be sealed up by Customs. Wine and/or spirits 1 bottle of spirits and 1 bottle of wine permitted for each crew member. Beer unlimited. Ships transiting canal are not affected.

IDENTIFICATION CARDS: Normally not needed. If necessary in special cases Identification Cards will be issued by Immigration.

CONSULS: All consulates available at Hamburg. Swedish Vice-Consul at Brunsbuttel.

REPAIRS: Only minor repairs can be effected. Big yards and dry docks available at Hamburg.

REPATRIATION: Crew changes can be arranged in connection with local Immigration Office.

AIRPORT: Nearest airport Hamburg. 90 km. away.

TIME: GMT plus 1 hour.

HOLIDAYS: Cargo work can be arranged on every day.

POLICE/AMBULANCE/FIRE: Police Tel: 110 and 3041. Waterway Guard Police Tel: 1012. Passport Control Tel: 87.262. Customs Tel: 8555. Hospital Tel: 3901. Fire Tel: 112.

TELEPHONES: No facilities for placing telephone on board in Kiel Canal.

DANGEROUS CARGO: Ships with dangerous cargo or tankers not gas free have to be reported to the Port Authority 48 hrs. before arrival.

AUTHORITY: Kiel Canal Authority – Wasser-und Schiffahrtsamt Brunsbuttel, 2212 Brunsbuttel 1. *Tel:* (04852) 8011 – 8016.

Harbour Authority: Hafenbehorde Brunsbuttel, Elbehafen, 2212 Brunsbuttel. *Tel:* (04852) 87044. *Contact:* Captain Dietze, Port Captain.

AGENT: See "Hamburg".

(b) ELBE TERMINAL

LOCATION: Elbe Terminal situated outside of locks, quay length 1,100 m.

PILOTAGE: Elbe Pilots also act as docking Pilots at Elbe Terminal.

RESTRICTIONS: For vessels bound for Elbe Terminal, Brunsbuttel, there are no restrictions with regard to length, breadth and height or with regard to day or night entry. Vessels may berth and unberth day or night.

MAX. SIZE: As the fairway of the River Elbe is being dredged, it is not possible to publish any long-term draft values. The max. admissible drafts of the various sizes of vessels intending to navigate on the River Elbe must be enquired of the authorities. The Elbe Pilots will have updated information on the latest depth and draft values.

Depth of water: Oil section: 14.70 m. below chart zero; dry cargo section: 13.70 m. below chart zero. Minimum keel clearance of 3 ft. required.

BERTHING: *Dry cargo section:* One gantry crane for handling of bulk cargoes with a capacity of 25 tons and outreach of 45 m.

3 level-luffing cranes for handling of bulk and general cargoes as well as containers. By means of syncronising 2 cranes, heavy pieces up to 45 tons can be handled.

Capacity of these cranes 12/24 tons with an outreach of 40/20 m.

2 level-luffing cranes for handling general cargo only with a capacity of 6/10 tons with an outreach of 32/20 m.

1 automatic crane with a capacity of 20 tons for handling of general cargo.

3 warehouses with a floor space of total 8,000 sq.m. available.

TANKERS: 2 Mannesmann marine loading and discharging units 12 in. diameter, each with a capacity of 1,500 t.p.h.

2 Mannesmann marine loading and discharging units 20 in. diameter with a capacity of 10,000 t.p.h.

The units are driven hydraulically. Connection to the tanker manifolds by hydraulically operated clamps.

One 30 in. pipeline to Texaco Tank Storage. Pressure admissibility of the units up to 19 Atu and a temperature up to max. +50°C (Crude oil).

Liquified Gases (Propane): 1 loading/discharging arm 250 mm. diameter, 25 bar, −50°C. 1 vapour return line 100 mm. diameter.

Also see "Regulations".

Mooring:

1. Tankers must be moored with particular care on account of the current, as handling equipment will be engaged for discharging and loading operations and therefore vessels must be moored safely. All lines must be heaved tight and secured to ensure that vessels will be firmly secured at the pier at all times.

2. Tankers exceeding 35,000 g.r.t. must be moored as shown in *Mooring Plan* (See "Plan") it being understood that these are minimum requirements for normal weather conditions.

3. The cross lines (wire ropes with a breaking strength of 120 tonnes) will be provided from the shore and should be belayed on bollards.

4. If at all possible, an additional two cross lines should be provided by the vessel.

5. All lines must be in perfect condition.

6. The winches to be used must be in perfect working order and capable of holding the tensile forces for which they are rated.

7. The crew must be large enough for efficient handling of the lines according to the standards of good seamanship.

8. The Port Authority may insist on calling in additional personnel for vessels not having a large enough crew to handle lines safely and quickly.

9. The Mooring Plan is based on all line systems. If no cross lines are provided from the shore, at least 1 wire rope each must be provided fore and aft by the vessel.

Fire Warp: Once the mooring operations are completed, a sufficiently strong tow-line (wire rope) must be lowered from bow and stern on the offshore side as far down as to the water surface.

Berthing/Unberthing: (a) Tankers may be berthed and unberthed only if the wind does not exceed force 7 Beaufort scale.

(b) If the visibility is at least 1 nautical mile.

Tide: The mean range of the tide at the pier is about 2.66 m. (8 ft.). The max. ebb current is 1.75 m. per second, the max. flood current is 1.5 m. per second.

Important:

1. The shore-side loading/discharge swivel arms are equipped with an automatic drift alarms. Should the vessel drift beyond the safety limit, a loud signal will be sounded and all ship-side pumps must be stopped and the lines must be checked.

2. In case of fire the Ship Fire Alarm is as follows:

1 or more whistle blasts, each to be sounded for at least 10 seconds, in addition to sounding the General Alarm. All safety drills and precautions must be observed.

REGULATIONS: *Special Regulations for Gas Tankers:*

1. Gas must only be imported in bulk in tankers, which are suitable for such traffic from the aspects of type of construction, equipment and operation. Gas tankers must conform at least to the stipulations of the Code for the Construction and Equipment of Vessels for carrying liquid gas in bulk (IMO-Res.A.328 (IX)) in the currently valid manner.

2. Gas tankers must carry a certificate issued by their national Ship Safety Authorities or a recognised classification society in which it must be stated that the vessel conforms to the stipulations in point (1) above. This certificate must be presented to the Port Authorities, if requested.

3. For import and discharge of liquid gas, only sea-going tankers are permitted. In this connection, the following quantity limitations per vessel and per individual tank must be respected:

(a) Gas tanker with deep frozen liquid cargo
(atmospheric tanker)
and
(b) Gas tanker with semi-frozen cargo
(semi-pressure tanker)
Max. load per ship = 15,000 cu. m.
Max. load per individual tank = 6,000 cu. m.
(c) Gas tanker with liquid cargo under pressure
(full pressure tanker)
Max. load per ship = 6,000 cu. m.
Max. load per individual tank = 1,000 cu. m.

4. The quantity limitations quoted in point (3) include amounts to be carried onwards for discharge at further ports. If the cargo volume of the vessel or of a loaded individual tank permits an amount of cargo to be carried which is greater than that stipulated in point (3), the port authority must be presented with a written declaration issued by an independent, sworn competent person of authority to the effect that the stipulation quantity limitations have been upheld.

5. The release of cargo vapours for the purpose of reducing pressures and/or temperature adjustment – except in emergency cases – is forbidden.

6. Whilst gas tankers are on the River Elbe no materials like alkine (acetylene), polyine (polyacetylene), allene, kumulene, MAPP gases, may be carried on board as cargo. ("Rules for the Protection of Nuclear Power Stations against Pressure Waves Resulting from Chemical Reactions" dated 1st August, 1976).

7. Vessels to dock against ebb tide with port side to. In case this requirement cannot be fulfilled due to an eventual delay during the river passage or any other unforeseeable reasons, a turning manoeuvre in a position East of the berth must be prevented (i.e. acceptance of additional tugs).

8. A wireless telephone connection is to be established between the security vessel and the personnel on the jetty, and the fire-fighting centre and the vessel. The wireless telephone connection must secure a duplex communication. Furthermore a wireless telephone communication must be established in good time prior to vessel's berthing.

9. Sufficient and suitable mooring personnel must be arranged for mooring and unmooring. The number of crew must be large enough to secure a quick and safe mooring manoeuvre. The local Harbour Authorities can order the acceptance of additional suitable personnel for this purpose.

10. The vessel must be tied up at the Elbe Harbour in such a way that a parting of the moorings (breaking, melting, burning) may not occur. At least 3 head lines, 3 stern lines, 1 fore spring and 1 after spring are to be made fast. At least 1 head line, 1 stern line and 1 spring MUST be of steel wire construction.

11. For berthing and unberthing at the Elbe Harbour Quay in way of the fire-fighting monitors at least two tugs must be accepted. The engine capacity of the tugs must be sufficient to assist the vessel in all wind, current and ice-conditions. The engine capacity of each tug must be at least 1,600 h.p. Vessels of less than 3,000 g.r.t., equipped with a working bow thruster may unberth with one tug less, weather permitting.

12. While discharging, the passing traffic is to be observed. In case a vessel comes too close, gas discharging/loading is to be stopped.

13. While handling gases, bunkering is not permitted.

14. LPG/Carriers may not be berthed at the Elbe Harbour together with laden or non-gas-free, non-inerted tankers, whose last cargo had a flash-point of below 61°C.

15. No vessels may make fast alongside a gas tanker while handling cargo.

16. During extreme meteorological circumstances (thunderstorms, hurricanes) the handling of liquid gas is to be stopped.

17. The vessel has to leave the berth immediately upon completion of cargo operations.

BALLAST: Ballasting of oil tankers during or after discharging into non-gas-free tanks is allowed only up to a volume of 50% of each tank concerned. This does not apply for inerted tanks.

DENSITY: 1003, brackish water.

FRESH WATER: Available at all berths.

GANGWAYS: Shore gangways available; special gangway at hand for VLCCs.

FUEL: By barges. All grades available.

MINIMUM STAFF: During crude oil transfer a minimum staff shall be assigned for safe handling of cargo transfer. For tankers of 3,000 g.r.t. and more, the minimum staff shall be assigned as follows:

1 Deck Officer, 1 Engineering Officer (both familiar with cargo handling).

2 deckhands.

For tankers of 70,000 g.r.t. and more 2 additional deckhands are required.

TELEPHONE: Ship telephone connections are available at all berths.

AUTHORITY: *Port Operator:* Hafengesellschaft Brunsbuttel GmbH, 2212 Brunsbuttel, Elbehafen. *Tel:* 8840. *Telex:* 28347 eport d.

Port Authority: Hafenbehorde Brunsbuttel, 2212 Brunsbuttel, Elbehafen. *Tel:* 87044.

AGENT: See "Hamburg".

(c) BRUNSBUTTEL – Oil Port

LOCATION: Oil Port situated on North side of Kiel Canal at km. 3.5.

PILOTAGE: See Section (a) Canal Pilots also act as Docking Pilots.

ANCHORAGE: Anchoring near the compressed-air barrier is prohibited. The location of the barrier is indicated by rings with the inscription "Preßluftsperre".

MAX. SIZE: Max. allowed dimensions of vessel between the figure values (draft and beam) can be interpolated.

Max. Draft	*Max. Beam*
10.40 m. (34 ft. 2 in.)	27.00 m. (88 ft. 7 in.)
9.50 m. (31 ft. 2 in.)	29.00 m. (95 ft. 2 in.)
8.00 m. (26 ft. 3 in.)	32.50 m. (106 ft. 7 in.)

Max. LOA 235 m. (771 ft.)

Ships passing Kiel Canal: See "Restrictions" Kiel Canal.

BERTHING:

Berths: 3 berths (Nos. 6, 7 and 8) for tankers up to 10.40 m. (fresh water) draft.

2 berths (Nos. 4 and 5) for tankers up to 6 m. (fresh water) draft.

Oil Handling Facilties: Hoses of 6 in., 8 in. and 10 in. for handling of crude oil, diesel oil, gas oil, gasoline, tuluol, xylol and lub oil.

Mooring: Tankers are required to be moored at least by 1 steel wire fore and aft. The steel wire may be covered.

Restrictions: During loading and ballasting operations, it shall be ensured that a vapour/air mixture pressed out of the tanks is no longer flammable or toxic outside the port area. In order to achieve this without continuous checking, the pumping rate is fixed at 800 cu.m./hour maximum.

Minimum Staff: During cargo transfer a minimum staff shall be assigned for safe handling of cargo transfer. For tankers of 3,000 g.r.t. and more, the minimum staff shall be assigned as follows:

1 deck officer familiar with cargo handling.
1 engineer officer familar with cargo handling.
2 deck hands.

Fire Precautions: Fire hoses must be laid out and connected to fire line, which has to be under pressure during all cargo operations.

Fire wires must be paid out to the water level fore and aft.

1 lifeboat must be swung out into an embarkation position in order to provide an additional emergency escape.

Dirty Ballast Disposal: Not possible in the port. Available only at Elbe Terminal and Kiel Canal (inner harbour) by Elbe-Slop-Ex GmbH or by barges.

DENSITY: 1003.

FRESH WATER: Available at all berths.

FUEL: By barges. All grades available.

GANGWAYS: Shore gangways available.

AUTHORITY: Operator of cargo handling facilities:
Deutsche Texaco AG, Ostermoorer Str., 2212 Brunsbuttel. *Tel:* 2011. *Telex:* 028314.

Port Operator: Hafengesellschaft Brunsbuttel GmbH, Elbehafen, 2212 Brunsbuttel. *Tel:* 8840. *Telex:* 028347 eport d.

Port Authority: Hafenbehorde Brunsbuttel, Elbehafen, 2212 Brunsbuttel. *Tel:* 87044.

AGENT: See "Hamburg".

(d) OSTERMOOR.

LOCATION: Kiel Canal Km. 5.66 (South Side).

PILOTAGE: See Section (a). Canal Pilots also act as Docking Pilots.

RESTRICTIONS: If passing through Kiel Canal, see "Restrictions" in Section (a).

MAX. SIZE: LOA 235 m. (771 ft.).

Max. draft	*Max. beam*
10.40 m. (32 ft. 02 in.)	27.00 m. (88 ft. 07 in.)
9.50 m. (31 ft. 02 in.)	29.00 m. (95 ft. 02 in.)
8.00 m. (26 ft. 03 in.)	32.50 m. (106 ft. 07 in.)

BERTHING: Berth Nos. 1, 2 and 4:

Port Operator: Hafengesellschaft Brunsbuttel (PO).

Operator of Cargo Handling: AMH-Chemie GmbH (AMH).

Immigration Clearance: Will be carried out on board.

Customs Clearance: No freeport. Customs clearance will be carried out on board.

Tug Assistance: According to assignment of Port Authority.

Mooring: The use of constant tension winches is prohibited (Berth Nos. 2 and 4 only). Port Authority will allocate berth where the exact position alongside berth will be advised by AMH. The Master is responsible for safe mooring. Additional mooring may be requested by Port Authority responsible (AMH). Bow of vessel at berth in direction Kiel Canal. Exception regulation by Port Authority.

Drinking Water: Available at Berth Nos. 1, 2 and 4 against payment (PO).

Steam and Nitrogen: Steam at No. 2 Berth and nitrogen at No. 4 Berth available from ashore.

Bunker Supply: By barges only. The Port safety regulation must be observed (Northern Basin).

Ship Repairs: Permission of AMH required.

Electricity Supply: No connections available.

Garbage Disposal: Available (PO).

Dirty Ballast Disposal: Not possible in the Port. Available only at Elbe – Port Jetty and Kiel Canal (Inner Harbour) by Elbe – Slop – Ex-GmbH.

Navigating into the North Basin: (Direction by AMH) – only after stop of cargo operations at Berth No. 4.

Gangways: At Berth Nos. 2 and 4 gangways are at hand (AMH). At Berth No. 4 and at waiting place a lifeboat has to be ready at the accommodation ladder on the offside during cargo operations.

Stop of Cargo Operations in Case of Emergency: At the sound of the signal "stay away" (· –) and fire (– – –) by loudspeaker; at the instructions given by telephone or loudspeaker; when the flashing light is in operation; at the release of the disconnection couplings; in case of fire on board.

Fire on board: The Port Supervisor of AMH has to be informed immediately. Cargo operations have to be stopped immediately. Ship has to give usual whistle – Fire signal ("F").

Cargo Stop in Case of Bad Weather: Berth No. 1: rainfall, windspeed greater than 22 m./sec.; Berth Nos. 2 and 4: windspeed greater than 26 m./sec. Disconnection at windspeed greater than 22 m./sec.

ETA Messages: 72 hours prior to arrival to AMH via Agent with the following information: (1) Ship's name and call sign; (2) Arrival time; (3) Cargo (product and quantity); (4) Tankers: number and diameter of cargo manifold connections; (5) Any damage to hull, tanks or overboard valves. Vessels are dispatched according to accepted ETA. In any case ETA has to be repeated 48 and 24 hours before arrival.

Dangerous Cargoes: Ships with dangerous cargoes or tankers which are not gas-free have to be reported to the Port Authority 48 hours before arrival.

Ships requested to accomplish the Oil Liability Agreement (more than 2,000 tons oil onboard) must be in possession of a valid Oil Liability Certificate.

Regulation Covering the Transport of Ammonia through the Kiel Canal:
In the North Sea – Baltic Canal, liquid ammonia (U.N.No. 1005) may be transported in such vehicles as fulfil the following maritime police stipulations:

1. For the vehicle, an IMO suitability certificate for the transport of ammonia must be issued in accordance with the IMO Code, Resolution 328-IX (new vessels), Resolution 329-IX or for existing vessels.
2. The loading system must be so dimensioned that at an outside air temperature of +25° Celsius and 20° Celsius for water the load can be maintained for an undetermined duration without ammonia vapour being blown out via the safety valves.
3. The re-liquification plant of the vehicle must have available a reserve capacity of at least 50 per cent of the power normally required for ship's operation, in the event that ammonia is being transported, so that in the event of an accident, including damage to the insulation, heavily vapourised contents of a tank can be safely re-liquefied.
4. On vessels with tank insulation which is not of the water repellant kind (e.g. glass or mineral wool), watertight longitudinal bulkheads must be available at a distance of 760 mm. from the outer skin.
5. The loading tanks of available ships must have a clearance of at least 760 mm. from the outer skin side.
6. Vessels with a loading capacity of up to 12,000 cu.m. must be equipped in addition to the requirements of section 1 with independent loading tanks of type B or C (spherical or cylindrical). The adjustment pressure of the safety valves (MARVS) must amount to at least 0.7 bars over pressure.

Remarks: *reduced discharge rate at higher cargo temperature; †only possible in exceptional cases (discharge); ‡at following conditions: P min=3 bar, T min=+55°C. Viscosity max.=35° E/+55°C; §Compulsory during loading/discharging at Berth No. 4

7. The fulfilment of the stipulations set out in Section 1 numbers 2 to 5 and in Section 2, in so far as they are necessary, must be supported by a certificate issued by a recognised Classification Society.

8. The IMO – suitability indication in accordance with Section 1 and the certificate as per Section 7 must be kept on board the vessel.

Oil tankers of more than 2,000 d.w.t. must be in possession of a valid Oil Liability Certificate.

Cargo Handling at Berth Nos. 2 and 4: Before starting cargo operations following measures are to be taken:

Confirmation of Checklist by vessel's command.
Cargo tank inspection by AMH.
Referring to "Operation plan" by AMH.
Connection of ground-wire.
Emergency towing wires (steel) must be provided at water level (Berth No. 4 only).
Installation of telephones.
Gas detectors handed on board (Berth No. 4 only).
Fire hoses must be laid out and connected to fireline, which has to be under pressure during all cargo operations (Berth No. 4 only).

Connection and disconnection of loading arms will be done by AMH personnel.

Watchmen: During cargo operations a watchman has to be on stand-by at manifold. In case of an emergency, vessel's pumps and stop valves must be able to be shut down immediately.

Minimum Crew during Cargo Transfer Operation at Berth No. 4:

1 Deck Officer ⎫ fully qualified in cargo
1 Ass. Eng. Officer ⎭ transfer operations
2 Deckhands
1 Watch Officer for duties other than cargo transfer.

Berth No. 6:

Berth Operator: ELF-Bitumen-Werke GmbH & Co., 2212 Brunsbuttel-Ostermoor. Tel: (4852) 8880, Telex: 28313 elfbrb d.

ETA Messages: 72 hours prior to arrival to ELF via Agent with the following informations:

1. Ship's name and call sign.
2. Time of arrival.
3. Cargo (product and quantity).
4. Number and diameter of cargo manifold connections.
5. Any damage to hull, tanks or overboard valves.
6. Distance of manifold connections to bow and stern.

Vessels are dispatched according to accepted ETA.

ETA has to be repeated 48 hours and 24 hours before arrival.

Report: Ships with dangerous cargoes or tankers which are not gas free have to be reported to the Port Authority according to paragraph 8 and 9 of Port Safety Code (HSVO), 48 hours before arrival.

Certificates: Ships requested to accomplish the Oil Liability Agreement (more than 2,000 tons oil onboard) must be in possession of a valid Oil Liability Certificate.

Depth: Depth alongside Berth No. 6 – 12.0 m.

Cargohandling: Before starting cargo operations following measures are to be taken:

Installation of telephone.
Confirmation of Check list by vessel's command.
Tank and cargo inspection by ELF.
Referring to "Operations plan" by ELF.
Connection of ground wire.
Emergency towing wires (steel) must be provided at water level.
Fire hoses must be laid out and connected to fireline, which has to be under pressure during all cargo operations.

Connecting: Connection and disconnection of leading arm/hoses will be done by ELF personnel.

Watchman: During cargo operations a watchman has to be on stand-by at manifold. In case of emergency vessel's pumps and stop-valves must be ready for immediate shut down sufficient crew for warding off emergency must be onboard at all times.

Minimum Crew during Cargo Transfer Operation (Tankers 3,000 g.r.t.):

1 Deck Officer ⎫ fully qualified in
1 Ass. Eng. Officer ⎭ cargo transfer operations
2 Deckhands,
1 Watch Officer for duties other than cargo transfer.

Gangways: Available. Supervision on behalf of master. A lifeboat has to be ready at the accommodation ladder on the offshore side.

Stop of Cargo Operations in Case of Emergency: At the sound of the "emergency-stop" horn. At the instructions given by berth watchman. In case of fire onboard.

Fire Onboard: The berth watchman of ELF has to be informed immediately. Cargo operations have to be stopped immediately. Ship has to give usual whistle – Fire signal ("F").

Cargo stop in case of bad weather: Windspeed greater than 26 m./sec. (Connection and disconnection at windspeed greater than 22 m./sec.

Loading and Discharging Installations:	*Product*	*Crude*

AGENT: See "Hamburg".

BUTZFLETH: 53.39 N. 09.31 E. (See Plan)

DOCUMENTS:

3 Crew Lists.
3 Bonded Stores Lists.
3 Crew Manifests.
Maritime Health Declaration.
Ship's Register.
Discharge Books.
Passports of Crew.
Gas Free Certificate (OBO-Carriers)

Butzfleth is not a free-port. Customs, Immigration and River Police board on arrival at berth.

DEEP SEA PILOTAGE: See "General" before first German Port.

PILOTAGE – ANCHORAGE RIVER ELBE: See "General" before first German Port.

Pilotage River Terminal: Elbe Pilots also act as docking Pilots.

ANCHORAGE: Freiburg Anchorage, approx. position Lat. 53° 50.6′ N., Long. 09° 19.5′ E., depth of water up to 13 m. below chart zero; there are further anchorages for small vessels at Krautsand – and Twielenfleth Roads. (see "General" before first German Port.)

MAX. SIZE: See "Berthing".

RADAR: River Radar Service from Elbe 1 to Hamburg, see "General" before first German port, but no special Port Radar Service for Butzfleth. Radar Service in the area of Butzfleth available, can be contacted through VHF Channel 21, "Hetlingen Radar Radio" and/or VHF Channel 5, "Steindeich Radar Radio".

RADIO/VHF: All messages to Agents and Pilots, etc., through Norddeich Radio, call sign DAN. Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16.

Ships' reporting station is on permanent duty at Stadersand, VHF Channel 11, safety and calling Channel 16.

Pilot boat at "Elbe-1" can be contacted on VHF Channels 13 and 16.

TUGS: 4 tugs compulsory for mooring and unmooring. To be ordered from Hamburg and Brunsbuttel through Agent.

A fire fighting tug (1,760 hp) is available 24 hours and can be reached via VHF Channel 16, also available for assistance to vessels.

BERTHING:

Aluminium Oxid Stade GmbH. (AOS): This bauxite/oxide plant, situated on the Westbank of the River Elbe, can be reached by vessels with max. drafts of 46 ft. 06 in. FW.

Quay length		*Depth at normal Low water*
Quay outside in total	325 m.	15 m. (49 ft.)
Within reach of crane	205 m.	
Quay inside	200 m.	7 m. (23 ft.)

The oxide produced at this plant, apart from being exported, is used for the mills of V.A.W. Elbewerk GmbH., Stade-Butzfleth and of Hamburger Aluminium Werk GmbH., Hamburg Finkenwerder.

Average discharging/loading rate	
West African bauxite	550–600 m.t.p.h.
Brazilian bauxite	600 m.t.p.h.
Australian bauxite:	
from Gove	550–600 m.t.p.h.
from Weipa	750 m.t.p.h.
Petcoke	100–400 m.t.p.h.
Oxide ("Spout" loading)	500 m. t.p.h.

Ship's telephone connection (4146-1453) at AOS pier.

Dow Chemicals GmbH: This industry, situated close to the AOS plant, offers 2 berths for gas and chemical tankers. The water depth at the outside quay is: 15 m. (49 ft.) and at the inside quay: 9 m. (29 ft. 6 in.), both at MLW.

Restrictions for ships	*Products* *Inflammable*	*Non Inflammable*
Length at quay outside	270 m.	300 m.
Length at quay inside	145 m.	145 m.
Draft at quay outside (FW)	13.71 m. (45 ft.)	13.71 m. (45 ft.)
Draft at quay inside (FW)	8.0 m.	8.0 m.
Beam at quay inside	22.50 m.	22.50 m.

No bunkering permitted at the DOW-berths.

Discharging rate liquid gas	approx 200 t.p.h.
Loading rate chemical products	100–800 t.p.h.

Max. Size: Vessels loading/discharging inflammable products: Max. length 270 m. Max. draft 14 m.

Vessels loading/discharging non-flammable products: Length unlimited. Max. draft 14 m.

Vessels with liquid gas and flammable products: Max. length 145 m. Max. draft 8 m. Max breadth 22 m.

Restriction: Mooring prohibited for vessels having IMO Class 2 products (liquid and/or gaseous) on board.

Simultaneous handling of gases inside and flammable products outside not permissable.

Manifolds: (Land side to sea side).

Inside Berth:	Outside Berth:
Methanol	P.O.
Telone/Vidden	Per
P.D.C.	P.G.I.
P.O.	Tet
Propylene	Chlorothene VG/NU
Ethylene	EDC
	Naoh
	Methylene Chloride
	Trichloroethane
	Chloroform/Methanol

Supplies: Nitrogen and potable water.

Technical requirements on ships discharging C2/C3.

Ethylene: For loading arm horizontal clearance ships manifold to the nearest structure 2.10 m., vertical clearance from centre of manifold up 0.50 m. and down 0.60 m., flange 6 in. (300 ASA) discharge-temperature of Ethylene minimum −103°C.

Propylene: For loading arm horizontal clearance 2.20 m., vertical up 0.50 m. and down 0.50 m., flange 6 in. (300 ASA), discharge-temperature of Propylene maximum −20°C.

Further on Propylene, vessels to be guaranteed, that the vessels in Summertime are suitable for pump against a back pressure of minimum 13 kg. but preferably it should be 15 kg./16 kg.

MEDICAL: Hospital and doctor available.

FRESH WATER: Available.

FUEL: Supplied by barge from Hamburg or local supplier.

GENERAL: *Dirty Ballast:* No facilities.

Agent at Dow-Jetty: Messrs. Elbclearing, P.O.Box 5110; 2160 Stade 5. *Tel:* 04146/1033. *Telex:* 218158 clear d.

REPAIRS: Minor repairs can be carried out.

SERVICES: Stevedores, hold cleaning, boatmen, mooring gangs, inspectors, fitters and launches.

DEVELOPMENTS: In the northern part of the port, a new pier is currently under construction (due to be completed in 1988), and which is planned to handle general and bulk cargo. It will have a free area of approximately 20,000 sq.m.

In the southern harbour, a further discharge head platform is in operation. Maximum vessel length 160 m., beam 28.0 m. and 7.50 m. depth of water.

Apart from a floating crane of 20 tons and a mobile crane of 10 tons which are currently in use in the port, two jib cranes will also be installed each with 20 ton lifting capacity, for use with grabs or hooks.

AUTHORITY: Niedersachsisches Hafenamt Cuxhafen, Aubenstelle, Butzfleth, D – 2160 Stade 5. *Tel:* (04146) 1436. *Telex:* via 218158 clear d. *Cables:* NHC – A. Butzfleth. *Contact:* F. W. Bork, Manager. Captain W. Schroeder, Harbour Master.

AGENT: See "Hamburg".

DOCUMENTS:

Stores List.
Crew List.
Customs Manifest.
Derat Certificate.

Amerikahafen is a Customs free port.

DEEP SEA PILOTAGE: See "General" before first German Port.

PILOTAGE – ANCHORAGE RIVER ELBE: See "General" before first German Port.

PILOTAGE: Pilot station situated in Old Harbour (Alten Hafen). To obtain Pilot call "Cuxhaven Port", VHF Channel 12. Pilot signal is flag "G" of International Code, or sound signal – 2 long and 1 short blasts.

ANCHORAGE: Available off Cuxhaven Medem Roads, approx. position Lat. 53° 51.5′ N., Long. 08° 46.5′ E., depth of water about 6 m. – 12 m. below chart zero; further anchorages see "General" before first German Port.

RESTRICTIONS: Vessels can enter by day or night. No tidal restrictions.

Depths: Max. depth of water: 13.5 m. (45 ft.). Mean tide HW: NN+1.40 m. Mean tide LW: NN−1.50 m. Tide range is 3.20 m. (from +1.55 m. to —1.65 m.) (NN = approx. mean sea level).

Water depth in the basins up to 8.5 m. below MTLW. Water depth at the river quays 12 m. and 8 m. below MTLW.

HEALTH: Quarantine clearance effected at Cuxhaven. Only vessels with suspected infectious disease on board are detained.

RADAR: River Radar Service from Elbe 1 to Hamburg see "General" before first German port, but no special Port Radar Service for Cuxhaven. Radar Service in the area of Cuxhaven available, can be contacted through VHF Channel 21, "Cuxhaven Radar Radio".

RADIO: For ETA, etc., use Norddeich Radio, call sign DAN. Closer to port Elbe–Weser Radio can be contacted by VHF Channel 16.

Ships reporting station is on permanent duty at Cuxhaven, VHF Channel 12, safety and calling Channel 16.

TUGS: Tugs available and used depending on ship size and weather conditions. Cost of tugs is Hamburg Tariff plus 20%.

BERTHING:

Fahrhafen and Neue Seebaderbrucke: Modern multi-purpose Ro/Ro terminal for passengers and for handling of motor vehicles and cargo direct at the Elbe River, 300 m. quay with 8 m. depth below MTLW.

Starting point of ferries for the North Sea and the Baltic Sea, for passenger ships to Helgoland.

Ro/Ro linkspans (one of them for axle-loads up to 50 tons and for stern-door width up to 18 m.). Hard-standing and storage area of approx. 60,000 sq.m.

Alter Hafen: Multi-purpose harbour for shipyards and for boats to the seaside resorts and islands.

Alter Fischereihafen: Multi-purpose harbour with transhipment and outfitting quays for fishing cutters, offshore base and emergency port. Fish auction and fish handling sheds, fish industry, equipment firms, deep freeze house for 5,000 tons of goods.

Neuer Fischereihafen: Multi-purpose harbour with transhipment and equipment quays for trawlers and luggers, offshore suppliers, Ro/Ro ships, for ships carrying general cargo and for minor bulk cargo ships. Fish auction and fish handling sheds, fish industry, equipment firms, deep freeze house for 25,000 tons, ice production, open storage space.

Entrance and exit any time by the sea-lock. Length of lock 190 m., width of lock 24 m. and depth of lock is 9 m. below MTLW.

Amerikahafen: Multi-purpose harbour with transhipment and equipment quays for ships carrying general cargo and for minor ships carrying bulk cargo, emergency port, floating docks, transit shed, deep freeze house, open storage spaces.

Steubenhoft: Multi-purpose facility for big ocean vessels with 400 m. long quay and 14 m. water depth below MTLW. Usable for cargo, repair, trial trip and passenger ships of all sizes.

CRANES:		
	8 portal cranes	1.5 – 10 tons capacity
	1 loading bridge	8 tons capacity
	1 crane for heavy loads	50 tons capacity
	Various mobile cranes up to	20 tons capacity

Equipment also available to handle containers and Ro/Ro traffic.

MEDICAL: Doctors and hospitals obtainable day and night.

FRESH WATER: Available from shore pipe-line up to 50 t.p.h. Small quantities up to 15 tons may be obtained in Roads from bunker barge. There are no water barges.

FUEL: Bunker and gas oil available. Small quantities, up to 150 tons, may be obtained anytime. Otherwise according to conditions of supplying oil company.

FIRE PRECAUTIONS: No special restrictions. Ships with explosive cargo and liquid cargoes of danger class K1 and K2 not allowed in Cuxhaven Harbour.

CARGO HANDLING: A harbour for overseas ferries up to 150 m. length with Ro/Ro and container equipment.

GANGWAY/DECK WATCHMEN: Not obligatory, at Master's discretion.

OPENING/CLOSING HATCHES: Normally performed by crew. Stevedores must be paid if required to do this work.

CUSTOMS ALLOWANCES: 40 cigarettes, 1 bottle spirits and 2 bottles wine.

IDENTIFICATION CARDS: If no passport, shore pass required.

CONSULS:
Denmark, Tel: 38021.
Iceland, Tel: 36036/37.
Others at Hamburg/Bremen.

REPAIRS: All deck and engine repairs possible.

DRY DOCKS: Floating dock for vessels up to 140 m. length.

REPATRIATION: All facilities available.

AIRPORT: Hamburg-Fuhlsbuttel, 130 km. away; Bremen, 110 km. away.

TIME: GMT plus 1 hour.

HOLIDAYS: New Year's Day, Good Friday, Easter Sunday, Easter Monday, 1st May, Ascension Day, Whit Sunday, Whit Monday, 17th June, Atonement Day, Christmas Day, Boxing Day. Loading/unloading can be arranged on these holidays.

POLICE/FIRE/AMBULANCE: Police, Tel: 110; Harbour Police, Tel: 22072; Ambulance, tel 23125; Fire, Tel: 112.

TELEPHONES: At Steubenhoft and in the ferry harbour, telephones can be put on board.

SERVICES: Compass adjusting and radio repairs.

SHORE LEAVE: Allowed.

AUTHORITY: Niedersachsisches Hafenamt Cuxhaven, Am Schleusenpriel 2, P.O.Box 526, 2190 Cuxhaven. *Tel:* (04721) 5014–0. *Telex:* 232167 Hacux d.

AGENT: See "Hamburg".

DUISBURG-RUHRORT: 51.25 N. 06.46 E. (See Plan)

LOCATION: Duisburg-Ruhrort port area, together with Hochfeld, covers a total surface of 1023 hectares on the right bank of the river between the Rhine km. 774 and 781, the Ruhr channel – 1 km., and the Rhine-Herne canal km. 1 to 2.

MAX. SIZE: Dimensions of vessels able to use the German inland waterways:

Type	*Length (m.)*	*Beam (m.)*	*Draft (m.)*	*Capacity (tons)*	*Horse Power*
Motor dry cargo vessel	38.5 – 110	5 – 11.4	2 – 3.5	300 – 2,500	100 – 2,000
Tanker	50 – 110	6.6 – 11.4	2.2 – 3.5	400 – 3,200	250 – 2,000
Train (Pushing motor vessel and barge)	150 – 186.5	9.5 – 11.4	2.5 – 3	2,530 – 4,400	800 – 2,000
Pusher tug	10 – 35	7.6 – 13.2	1.4 – 2.2		1,000 – 6,000
Dumb barge for pushing	70 – 76.5	9.5 – 11.4	2.5 – 3.7	1,240 – 2,600	

The largest pusher tugs push six barges = 15,600 tons.

RADIO: Duisburg Port Radio, VHF Channel 13.

BERTHING:

Docks	*Theoretical Depth respectively zero level above normal zero*	*Loading Depths (approx. value) Actual water level at Ruhrort water gauge*
(a) Ruhrort. Water gauge zero.	16.13 m.	
Port Entrance, Vincke Canal, Bunker Dock, North Dock, South Dock, Kaiser Dock, Port Canal, Dock A, Dock B, Dock C and Railway Dock	15.40 m.	+ 40 cm.
Werft Dock	17.05 m.	−120 cm.
(b) Duisburg. Water gauge zero.	17.00 m.	
Parallel Dock, Outer Dock, Wood Dock and Inner Dock at Marientor up to km. 3.5	16.10 m.	+ 40 cm.
Inner Dock Eastwards km. 3.5	16.50 m.	± 0 cm.
(c) Hochfeld. Water gauge zero.	17.42 m.	
South and Kultus Dock.	16.45 m.	+ 40 cm.
(d) Canal Dock Meiderich Ruhr Dock Neuenkamp		Loading depths as per inland waterways traffic regulations

CRANES: 83 cranes and travelling bridges of up to 40 tonnes lifting capacity for bulk goods and general cargo, as well as for containers. 1 heavy lift crane with 60 tonnes capacity.

BULK CARGO FACILITIES: 1 coal mixing and discharging plant with 2 car dumpers and 3 ship loaders, daily capacity up to 26,000 tonnes.

Grain warehouses and silos with approx. 130,000 tonnes capacity, 4 conveyor belts, and 22 discharging plants.

Tank storage 1,244,645 cu.m. Liquid gas tank storage 20,000 cu.m.

SPECIALISED CARGO HANDLING FACILITIES: 2 Container terminals with facilities for all means of transport Roll-on/Roll-off installation. 66 points for handling liquid gas.

STEVEDORES: Working hours: 0730 – 1600 hrs., Monday to Friday.

BRIDGES:

Bridge	*Lowest Point of Upper Structure Respectively Zero Level above Normal Zero*	*Correction Value for Calculation of Passage Height**
(a) Ruhrort. Water gauge zero	16.13 m.	—
Bridge over Railway Dock	36.10 m.	19.70 m.
Bridge over Port Entrance	34.20 m.	17.80 m.
Vincke Canal Bridge	33.10 m.	16.70 m.
Kaiser Dock Bridge	32.60 m.	16.20 m.
Port Canal Bridge	33.80 m.	17.40 m.
Bridge over the Cut Kaiser Dock/Port Canal	30.00 m.	13.60 m.
Bridge over Dock C	38.20 m.	21.80 m.
(b) Duisburg. Water gauge zero	17.00 m.	
Cable Bridge over Outer Dock	37.80 m.	20.90 m.
Road Bridge over Outer Dock	37.00 m.	20.10 m.
Marientorbrudge (clearance between bridge counter bearings 15.80 m.)		
At rest	29.60 m.	12.70 m.
Folded	Up to 33.9 m. height Over 33.9 m. height	Clear width 15.8 m. Clear width 13.8 m.
Schwanentor Bridge (clearance between bridge counter bearings 15.80 m.)		
At rest	26.80 m.	9.90 m.
Lifted	34.90 m.	18.00 m.

*From the following values, the actual water level at the Ruhrort water gauge is to be deducted.

With water levels over 8.40 m. at the Ruhrort water gauge, the stop gate at the Marientor Lock is drawn in and therefore through passage to the Duisburg inner port/wood harbour is no longer possible.

AIRPORT: Dusseldorf (20 km.).

AUTHORITY: Duisburg Ruhrorter Hafen A.G., Alte Ruhrorterstrasse 42-52, Postfach (Postbox) 13 02 60, D – 4100 Duisburg 13. *Tel:* 8 031. *Cables:* Hafag. *Contact:* Y. Klaus van Lith or Dr.-Ing. Jochen Muller, Directors.

ECKERNFORDE: 54.29 N. 09.51 E. (See Plan)

DOCUMENTS:

Stores List.
Customs Documents.
Cargo Documents.
Crew List.

PILOTAGE: No pilot station. No tide. In East winds, water level can increase to 1.50 m. above normal.

ANCHORAGE: Good anchorage in the Roads between N.W. to N.W. by W. bearing from the port, distance 1 to 1.5 miles. Depths 18 m. – 21 m. Anchorage not allowed in harbour area.

CLEARANCE: Customs clearance at any time subject prior notice given. If suspected diseases on board inform Health Authorities.

MAX. SIZE. In Outer Harbour, up to 5 m. draft; in Inner Harbour up to 3 m. draft.

RADIO: Radio Kiel, call sign DAO, Tel: 39491.

TUGS: No tugs.

BRIDGES: Outer and Inner Harbours separated by bascule bridge, opening to 10.7 m. width at top of bridge.

MEDICAL: Doctors and hospitals available.

FRESH WATER: Available.

FUEL: Diesel oil available. No coal.

WATCHMEN: Not available.

OPENING/CLOSING HATCHES: By ship's crew.

IDENTIFICATION CARDS: Required, if no passport.

REPAIRS: Available for fishing boats or coasters. Slipway for vessels up to 200 tons.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer (end March – end September).

HOLIDAYS: Work allowed on Sundays and official holidays subject to Harbour Master's permission.

POLICE/FIRE/AMBULANCE: Police Tel: 110. Hospital Tel: 9011. Fire Tel: 112.

TELEPHONES: Public telephones in harbour area. No installation on board.

SERVICES: Other services available from Kiel.

SHORE LEAVE: Permitted.

AUTHORITY: Stadtwerke Eckernforde GmbH, Bornbrook 1, 2330 Eckernforde. *Tel:* (04351) 9050. *Contact:* Mr. Wegner, Harbour Master. Mr. Poetzsch, General Manager.

ELSFLETH: 53.14 N. 08.28 E.

PORT LIMITS: The seaward boundary of the port is the entrance of River Hunte, vessels are considered to be arrived when alongside the berth or waiting berth, and Customs formalities are completed.

DOCUMENTS:

2 Crew Lists.
2 Passenger Lists.
1 Health Certificate.
2 Provision and Store Lists.
1 Ship's Certificate.

DEEP SEA PILOTAGE: See "General" before first German port.

PILOTAGE: Pilotage is carried out by Weser River Pilots, no Harbour Pilot available.

ANCHORAGE: No anchorage in vicinity of the harbour, see Blexen Roads.

RESTRICTIONS: Max. draft in the entrance at LW is 3.20 m.

MAX. SIZE: Max. size in daytime, length 80 m. Max. size at night-time, length 60 m., draft depends on the tide.

PRATIQUE: Pratique is given on arrival by the Health Officer. If disease or fever is suspected on board it has to be reported to the Agent.

RADIO: Cable Norddeich (call sign DAN) advising ETA and cash requirements.

RADAR/VHF: No port radar service but river radar can be used for approaching port from Weser Lightvessel to Bremerhaven. VHF Channel 21 from Bremerhaven to Elsfleth. Channel 19 from Bremen to Elsfleth.

River radar can be used for approaching port from Bremerhaven to Elsfleth (entrance of River Hunte).

Bremen Port Radar Channel 12.
VHF Channel 10 from Elsfleth to Oldenburg.

The 2 railroad bridges over the River Hunte can be called on VHF Channel 19.

TUGS: Tugs have to be ordered from Bremen or Brake, they join the vessel at River Hunte Estuary. If tug lines are used there are no extra charges.

BERTHING: 1 quay with a length of 260 m., depth alongside 5 m. for 150 m. and 4 m. for 110 m. 1 waiting berth for small vessel 3 m., 1 private berth (Omni-Pac).

2 waiting berths for vessels in inland trade. 9 vessels with length from 80 m. can use these berths. One waiting berth is by the naval college (3 berths) and the other at km. 23 on the River Hunte.

SPECIALISED CARGO-HANDLING FACILITIES: 1 crane with 6.5 tons, 1 crane with 10.5 tons and 1 crane with 32 tons capacity. Bulk cargo can be handled with grabs, no other special facilities.

BRIDGES: No bridges to reach the port, but all ships bound for Oldenburg are waiting at Elsfleth for opening bridges.

A flood prevention barrier has to be passed to reach the harbour.

STEVEDORES: ETA has to be cabled to the Agents to arrange gangs. Port works 3 shifts around the clock, including Sunday and holidays.

MEDICAL: Medical service is available day and night. Hospital is available at Brake.

TANKERS: No tanker berth.

DENSITY: Fresh water.

FRESH WATER: Delivered from the quay by hose.

FUEL: Fuel is delivered by bunker barges stationed in port.

FIRE PRECAUTIONS: No fire precautions.

CONSUL: None.

REPAIRS: 1 dockyard, all ship and engine repairs can be carried out.

DRY DOCKS: 2 slipways can be used.

SURVEYORS: Classification Societies have to be ordered from Bremen, surveyors available at Elsfleth.

GANGWAY/DECK WATCHMEN: A crew watchman is necessary because of strong tidal streams, 2 – 3 knots.

HATCHES: Hatch-opening/closing to be carried out by crew.

CUSTOMS ALLOWANCES: Quantity permitted for each crew member: 100 cigarettes, 1 bottle of spirits.

CARGO GEAR: Loading/discharging is carried out by shore cranes.

REPATRIATION: Any time. Inform Agent.

AIRPORT: Airport at Bremen (50 km). Regular airlines.

TIME: Local time: GMT plus 1 hour.

HOLIDAYS: Cargo work can be arranged on those days.

POLICE/AMBULANCE/FIRE: Police: Station 2263, River 2377. Ambulance: Brake Hospital 04401 – 4060. Fire 2333.

TELEPHONES: No ship-to-shore communications.

SHORE LEAVE: Crew members are allowed ashore with valid passports.
IDENTIFICATION CARDS: No shore pass issued.
REGULATIONS: No unusual regulations for the port.
GENERAL: All ships bound for Oldenburg have to do clearance in port.
DEVELOPMENTS: A new private berth has been completed for the distillery "Pabst & Richards".
AUTHORITY: Niedersachsisches Hafenamt Brake – Hafenmeister Elsfleth, An der Straats Kaje, Elsfleth. *Tel:* 04404-2202.

EMDEN: 53.23 N. 07.13 E. (See Plan)

PORT LIMITS: The vessel is to be considered an "arrived ship" upon having berthed at the designated waiting/loading/discharging berth, depending upon Charter-Party.
DOCUMENTS: Health Declaration (form from Sea-Pilot), Derat Exemption Certificate, Bill of Lading, Cargo Manifest, Certificate of Origin (for gas-tankers only), Certificate of Quality (for gas-tankers only), Certificate of Registry, 5 Crew Lists, 2 Crew Personal Effects Lists, 4 Slop-Chest Lists, Passports/Seamen's Books, 2 German Tanker Check Lists (for tankers and gas-tankers only).
DEEP SEA PILOTAGE: See "General" before first German Port.
PILOTAGE: Compulsory. At least 12 hours prior arrival at Pilot Station, vessel to radio "Emslotse Emden" indicating vessel's name, ETA, destination and draft. Contact pilot vessel on VHF Channel 16 or MW 500 kHz or LW 2023 kHz (daytime) and 2182 kHz (night-time).

Pilot vessel located near Wester Ems Light Buoy in approx. position Lat. 53° 37′ N., Long. 06° 24′ E.

Tankers and gas-tankers above 10,000 g.r.t. with dangerous cargo have to pick up the Pilot at the TW/DB Buoy in position: 53° 59′ 18″ N., 06° 21′ 26″ E.

During bad weather periods pilot boat is withdrawn and stationed in sheltered area near the Isle of Borkum.
ANCHORAGE: Vessels may anchor in vicinity of pilot vessel 9.5 fathoms depth. Sandy bottom.

Further anchorage possibilities in the Ems fairway half way up to Emden at "Moevensteert", 45 ft. salt water at HW.
RESTRICTIONS: Vessels drawing in excess of 26 ft. salt water have to wait for high tide to proceed to Emden proper. Tide rise about 10 ft.

Vessels with LOA/beam over 255 m./35.5 m. respectively enter and leave in daylight only.
The "Great Sea Lock": The "Great Sea Lock" has a length of 260 m. (853 ft.) and a width of 40 m. (131 ft.) restricting vessels' size to 255 m. LOA and 35.5 m. beam, but upon special permission at about 256 m. LOA and 36.5 m. beam. Depending upon vessels' constructural shape even longer ships have been accepted in the past upon special application.
MAX. SIZE: Under normal tide conditions, vessels drawing 36 ft. can enter Emden directly. Vessel drawing up to 45 ft. salt water can be lightened in river inside Isle of Borkum at the unloading berth "Moevensteert" by floating cranes until appropriate draft achieved. Capacity of floating crane 1,000 t.p.h., 2 cranes available.

Length and beam restrictions imposed by locks at Emden: max. 255 m. length and 35.50 m. width. Vessels exceeding these dimensions require prior permission.
HEALTH: Pratique granted immediately on arrival at locks by Doctor or Health Official.
RADIO: Cables should be despatched via Norddeich Radio (DAN).
Gas Tankers: Entry Permission: For each gas–tanker the agent – on behalf of vessel – has to apply for an entry permission with the Lower Saxony harbour office.
Following advanced information required: 1) GRT, 2) Volume cu.m. 3) LOA, 4) Beam, 5) Year of build, 6) ETA, 7) Draft, 8) Port of Departure, 9) Cargo Grade, Quantity, Temperature, 10) Possible Deficiencies of Ship and/or Cargo, 11) Confirmation vessel in accordance with IMO Rules A328 (9) or A 329 (9).
ETA–Notices: Master to keep agents closely advised about vessels ETA at either approach buoy and any change thereof. A 7–days 96–, 48–, 24–, 12–hours notice would facilitate preparational matters with authorities, receivers etc.
VHF: Norddeich Radio (DAN): VHF Channel 16 and all known communication facilities including ship/shore telex.
Knock Radar Control Centre: VHF Channel 18.
Emden Pilot: VHF Channel 16.
RADAR: Radar service on the river "Ems" from approx. position: Lat. 53° 37.5′ N., Long. 06° 23′ E. (Westerems) or Lat. 53° 35′ N., Long. 06° 23′ E. (Hubertgat) up to port entrance. The other range (Borkumradar) works on VHF Channel 18. Further information on this Channel.
TUGS: Sufficient tugs available, stationed at Emden Locks, ranging from 790 h.p. to 3,900 h.p. Usually tugs lines used.
BERTHING: *Outer Harbour:* Quay length 1,539 m. – tidal harbour. Also see "Developments".
New Inner Harbour: Accessible through Sea Lock (260 m. × 40 m.) and Nesserlander Sea Lock only for vessels up to 111 m. in length and 14.50 m. width.
INNER HARBOUR:
South Quay:
Commodity: Iron ore, coal, coke, bauxite, fertilizers and other dry-bulk cargoes, also wood, steel, general cargo, containers, etc.
Pier Length: 932 m.
Depth Alongside: 12 m. permanent (salinity about 1.005).
Draft Allowed: 35 ft. inbound, 34 ft. outbound.
Number of Cranes: 8, 1 cokeloader.
Lifting Capacity: 1×7 tons, 4×15 tons, 2×25 tons, 1×40 tons. 4,000 tons/day.
Daily Capacity: Discharging iron ore, about 30,000 tons. Discharging coal, about 24,000 tons. Loading coal about 10,000 tons.
Outreach of Grabs: 35.5 m. (cranes), 12.5 m. (cokeloader).
Distance Waterline/Lower Edge Grab: 14 m. (cranes), 13 m. (cokeloader).
Conveyor Belt: Double belt system.
Storage Area: About 25,000 sq.m. concrete paved. About 76,000 sq.m. for bulk cargoes. About 4,000 sq.m. of covered storage for general and bulk cargoes.
Loading/Discharging: Ex vessel onto rail cars, trucks, barges.
Working Period: Monday 0600 hrs. – Saturday 2200 hrs., overtime possible.
North Quay:
Commodity: Iron ore, coal, coke, bauxite, fertilizers and other dry-bulk cargoes, also wood, steel, etc., and general cargo.
Pier Length: 520 m.
Depth Alongside: 12 m. permanent (salinity 1.005).
Draft Allowed: 35 ft. inbound, 34 ft. outbound.
Number of Cranes: 4.
Lifting Capacity: 15 tons each.
Daily Capacity: Discharging iron ore, about 30,000 tons. Discharging coal, about 20,000 tons. Loading coal, about 10,000 tons.
Outreach of Grabs: 35.5 m.
Distance Waterline/Lower Edge Grab: 14 m.
Conveyor Belt: Available.
Storage Area: About 13,000 sq.m. concrete paved. About 32,000 sq.m. for bulk cargoes.
Loading/Discharging: Ex vessel onto rail cars, trucks, barges.
Working Period: Monday 0600 hrs. – Saturday 2200 hrs., overtime possible.
Industrial Harbour:
Commodity: All kinds of dry-bulk commodities in smaller lots, iron and steel, and all kinds of general cargo.
Pier Length: Total about 1,000 m.
Number of Berths: 3.
Draft: Between 23 ft. – 24 ft. permanent (salinity 1.005) depending on berth.
Number of Cranes: 4, and 1 mobile crane.
Lifting Capacity: 1×5 ton, 1×10 ton, 1×10-20 ton, 1×30 ton, 1 mobile crane 30 ton.
Outreach of Cranes: 16 m. – 40 m. depending upon weight of load to be handled.
Distance Waterline/Lower Edge Grab: 18 m. – 20 m.
Storage: About 5,500 sq.m. covered storage space. About 50,000 sq.m. open storage space.
Loading/Discharging: Ex vessel onto rail cars, trucks, barges.
Working Period: Monday 0600 hrs. – Saturday 2200 hrs., overtime possible.
Ro-Ro Berths I and II:
Commodity: Automobiles, paper and other Ro-Ro commodities.

	Terminal I	Terminal II
Berthing Length:	325 m.	300 m.
Draft Allowed:	Max. 23 ft. permanent (salinity 1.005).	Max. 23 ft. permanent (salinity 1.005).
Number of Ramps:	1 stern ramp. 1 stern or side ramp.	1 stern ramp.
Storage:	About 43,000 sq.m. storage space.	About 31,000 sq.m. storage space

Loading/Discharging: Ex vessel onto rail cars, trucks.
Working Period: Monday 0600 hrs. – Saturday 1400 hrs., overtime possible.

OUTER HARBOUR: This port basin has direct connection to the Ems Fairway, i.e. it is a tidal port area. There are no restrictions as to length or beam.
VW Berth:
Commodity: Mainly used for handling Volkswagen automobiles.
Berthing Length: About 245 m.
Depth Alongside: 8.3 m. at low water (salinity about 1.007).
Draft Allowed: 26 ft. LW.
Tidal Range: About 10 ft.
Number of Cranes: None.
Cargo Handling: Side door Roll-on/Roll-off or ship's own gear, ex vessel onto storage, rail, truck.
Loading Rate: 1,000 – 1,500 cars/day.
Granary I and II:
Commodity: All kinds of grain products, feed stuff, etc.
Berthing Length: 450 m.
Depth Alongside: 8.3 m. at LW (salinity about 1.007).
Draft Allowed: 26 ft. fresh water at LW.
Tidal Range: About 10 ft.
Number of Elevators: 3 shore elevators, 2 floating elevators.
Outreach from Fenderline: 18 m.
Distance Waterline/Hatchcoaming: 11.5 m.
Daily Capacity: About 12,000 tons heavy grain. About 6,000 tons soya meals.
Storage Capacity: About 150,000 tons.
Working Period: Monday 0700 hrs. – Saturday 2200 hrs., overtime possible.
Ems Quay:
Commodity: General, wood, logs, containers, etc.
Pier Length: 271.7 m.
Draft Allowed: 35 ft. salt water at HW.
Tidal Range: About 10 ft.
Number of Cranes: None.
Number of Ramps: 1 quarter ramp, 1 stern ramp.
Storage Capacity: About 6,000 sq.m. of covered storage space and 25,000 sq.m. of concrete paved open storage space.

Lightening/Topping-Off of Dry-Bulk Cargoes at Emden-"Dukegat": *General:* Vessels exceeding a draft of 35 ft. salt water have the possibility to lighten/top-off at the "Dukegat" anchorage free of expense to the vessel, provided the balance of the cargo is being handled at Emden proper. On occasions also just lightening of vessels destined for other ports than Emden is performed at costs to be specifically agreed upon.
Commodity: Iron ore, coal, bauxite, etc.
Location of Anchorage/Lightening-Place (Dukegat): About 20 sea miles up-river from pilot vessel between Buoys "A12" and "A14" near the Isle of Borkum.
Dimensions of Anchorage/Lightening-Place (Dukegat): About 2,750 m. long and about 700 m. wide.
Draft: Maximum allowable arrival/sailing draft 45 ft. salt water.
Number of Cranes: 2 self-propelled floating cranes equipped with 25 ton grabs and hoppers connected with conveyor-belt.
Outreach from Fenderline: Max. 25.5 m.
Distance Waterline/Lower Edge of Grab: Max. 21 m.
Capacity: Iron ore, about 1,000 t.p.h. Coal, about 750 t.p.h. (lightening), about 500 t.p.h. (topping-off).
BRIDGES: None.
STEVEDORES: Since main commodities consist of bulk cargoes, such as iron-ore, coal, coke, bauxite, no specific requirements.
MEDICAL: Advance notice only required in urgent cases; hospital available.
BULK HANDLING FACILITIES: See "Berthing".
TANKERS: Olhafen situated in Inner Harbour. Tankers up to 34 ft. 6 in. draft discharge to Frisia Refinery, distance about 4.5 km.

Slops may only be discharged at the Tank Cleaning installation of Thyssen Nordseewerke GmbH.

Oil Harbour:
Commodity: Crude oil, naphtha, condensates, fuel oil, gas oil.
Number of Berths: 4 (2 large and 2 smaller berths).

Docking Length:	No. 1 255 m.	No. 4 200 m.
Draft Permanent:	34 ft. 6 in. (salinity about 1.005)	34 ft. 6 in. (salinity about 1.005)
Loading Rate:	500 t.p.h. light fuel 750 t.p.h. heavy fuel	500 t.p.h. light fuel 750 t.p.h. heavy fuel
Discharging Rate:	2,500 t.p.h. crude oil	1,500 t.p.h. crude oil
Connections:	2×12 in. max.	1×8 in. max.

Working Period: Around the clock, SHinc.

LPG Terminal:
Commodity: Butane, propane and its mixtures.
Location: Emden oil harbour in the "Inner Harbour" separated from the Ems Fairway by the "Great Sea Lock"
Type of Berth: Concrete finger-pier with platform and with 5 dolphins abreast and sufficient mooring bollards ashore. Max. pull 100 tons.
Depth/Tidal Range: 10.50 m. brackish water (approx. 1007). No tidal range.
Restrictions:

LOA	:	255.00 m.
Beam	:	35.50 m.
Draft	:	34 ft. 6 in. (dock density)
Distance waterline/manifold	:	19.00 m. max.
Distance ship's rail/manifold	:	5.50 m. max.
Free space to forward of manifold connection	:	1.40 m. min.

Berthing: Vessels berthing with port-side to. Ships being towed backwards into basin. Day and night mooring/unmooring.
Cargo Handling Facilities for Ref. + Semi-Ref. Cargo: 1 free floating discharging-arm, type Wiese 4/350, with one 8 in. 300 ASA liquid connection and one 3 in. 300 ASA flexible vapour return line.
Shore Heat-Exchangers/Shore Booster Pumps: 2 heat-exchangers – able to heat-up from -42°C to minimum of 0°C.
3 booster pumps – max. liquid delivery head 445 m.
Discharging/Loading Rate: Max. 500 cu.m/hr. max. about 200 cu.m/hr.
Distance Berth/Tank Farm: About 4.5 km.
Size of Cargo Line: Average diameter 8 in.
Storage Facilities: 2 buffer tanks at berth – 4,000 cu.m. net. 9 storage tanks at tank farm – 23,000 cu.m. net.
Working Period: Around the clock SHinc.
Special Vessel's Requirements:
a) All gas-tankers have to be equipped with 2 VHF wireless stations at the bridge.
b) All gas-tankers above 30,000 cu.m. cargo tank capacity have to be equipped additionally with: 2 Radar units
1 Decca navigator
1 Electronic speed-recorder
1 Rate of turn indicator

Required Valid Certificates:
a) IMO-Certificate of Fitness according IMO-Resolution A 328 (9) or A 329 (9)/Certificate of Compliance.
b) Cargo Ship Safety Construction Certificate.
c) Cargo Ship Safety Equipment Certificate.
d) Cargo Ship Safety Radiotelegraphy Certificate.
e) Ship Safety Radiotelephony Certificate.
f) Load Line Certificate.
g) Classification Certificate.
h) Oil Liability Certificate.
i) Oil Record Book filled–in.
j) Letter of Compliance where available.
k) Ship's Loading and Stability Manual.
l) Damage and Survival Stability–information.
m) Certificate of Safe Manning according IMO A 481 (XII).
n) Test Certificates for:
  Safety Relief Valves.
  Cargo Tanks.
  Cargo Pipe-lines.
  Instrument Calibration.

Documents for Clearing Purposes: The following documents are also required for clearing purposes:
a) Health Declaration (form from Sea Pilot).
b) Derat Exemption Certificate.
c) Bill of Lading.
d) Cargo Manifest.
e) Certificate of Origin.
f) Certificate of Quality.
g) Certificate of Registry.
h) 5 Crew Lists.
i) 2 Crew's Personal Effects Lists.
j) 4 Slopchest Lists.
k) Passport/Seaman's Book.
l) 2 German Tanker Check Lists

Supplies/Services:

a) Purging/Gas Freeing	Not allowed within the port area
b) Coolants (Propane)	Available (pressurised)
c) Nitrogen, Oxygen, Freon	Available from local Unitor in Bottles/Cylinders
d) Bunkers	All grades available from majors and some outsiders ex-barge prior to or after cargo operations

Lightening of Tankers: There is also a tanker lightening/anchoring place at the "Dukegat" anchorage at the location of Buoys "A10" – "A12" with an allowable draft of 41 ft. SW, dimensions 1,200 m. long and 800 m. wide.

However, lightening of tankers is not customary and has not been performed recently.

DENSITY: Average density in port 1005 – 1010.
FRESH WATER: Available, supplied by barge.
FUEL: All grades available, delivered by barge by major oil companies and others.
FIRE PRECAUTIONS: All common fire precautions to be obeyed.
GANGWAY/DECK WATCHMEN: Not compulsory.
OPENING/CLOSING HATCHES: To be performed by crew.
CUSTOMS ALLOWANCES: 40 cigarettes per day/person, 0.25 litre spirits per day/person (at "Outer Harbour" and "Old Inner Harbour").
REPATRIATION: Nearest airport to Emden is Bremen (about 150 km.). There are good train connections to and from Emden. Car transportation can also be arranged upon request to Agent. A small airport is available at Emden for domestic flights and charter flights.
CONSULS: Finland (Vice-Consul), Tel: 28800, Norway, Tel: 20118, Sweden, Tel: 21904, Netherlands, Tel: 21404.
REPAIRS: All kinds of repairs possible.
DRY DOCKS: 1 dry dock 218 m. × 30 m., 1 floating dock 176 m. × 27 m., 1 floating dock 138 m. × 16.8 m., 2 floating docks 92 m. × 16.2 m.
SURVEYORS: German Lloyd, Lloyd's Register, Norske Veritas, Bureau Veritas, Panama Bureau of Shipping Inc.
AIRPORT: Nearest airports Bremen and Hamburg, about 2 – 3 hours drive from Emden. World-wide connections. Flight Emden to Bremen or Hamburg possible by air-taxi.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (25th March-30th September in 1984).
HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (May 1st); Ascension Day; Whit Monday; June 17th; Prayer Day; Christmas Day; Second Christmas Day (December 26th). No work on New Year's Day, Easter Sunday, Whit Sunday, May 1st and Christmas Day.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 22222; Fire 112.
TELEPHONES: Telephones can be placed on board if vessel berthed Northquay, Southquay or Thyssen Nordseewerke shipyard. Public telephone boxes are available close to the berths.
SERVICES: Tank cleaning installation for slop disposal available. Oil pollution service available.
SHORE LEAVE: Shore leave possible.
IDENTIFICATION CARDS: Normally, Seamen's Book sufficient. In certain cases shore leave passes issued.
REGULATIONS: None unusual, but tankers and especially gas tankers have to apply for a special entry permission through the Agents.
DELAYS: Normally, none.
BANKS: German banks, such as Deutsche Bank, Commerzbank.
EMERGENCY CO-ORDINATION CENTRE: Local Water Police, Tel: 04921-27169/51681.
STORING: See "Prelims".
1. Yes.
2. Throughout loading operations, except for gas tankers.
3. Mainly yes.
4. Mainly yes.
5. Stores have to be cleared through Customs.
6. Yes.

DEVELOPMENTS:
New Port Development (Dollarthafen): A construction programme has been developed to build a new port basin, including a new lock (380 m.× 62 m.), on the River Ems, called the "Dollarthafen-Projekt". With such a new port basin and entrance it is aimed to take fully laden vessels of 80,000/90,000 d.w.t. with a draft of 45 ft. without lightening. Sizewise, ships of about 250,000 d.w.t. could be accommodated. Building of the project is expected to be started in 1985 – construction period about 10 years. This port expansion will create entire new industrial areas of more than 500 Hectares.

AUTHORITY: Niedersachsisches Hafenamt, Friedrich–Naumann Str. 7–9, 2970 Emden, West Germany. *Tel:* (04921) 897–0. *Telex:* 27966 NHA–E–D.. *Contact:* Captain W. Kuhn, Tel: 897–140 or Captain A. Brinkmann, Tel: 897141.

AGENT: Johs. Fritzen & Sohn-GmbH, Neptunhaus, PO Box 1552, 2970 Emden, West Germany. Tel: 04921 20011 (day and night). Telex: 27821 Frizn d. FAX: (04921) 20013. Cables: Fritzenagent Emden.

FLENSBURG: 54.48 N. 09.26 E. (See Plan)

PORT LIMITS: The seaward boundary is the line between two special boundary-stones on the West and East side of the port entrance.
DOCUMENTS: 2 Crew Lists, 2 Passenger Lists, 2 Stores Lists (bonded stores), Cargo Lists, Bills of Lading, General Declaration, Ship's Certificates.
PILOTAGE: Pilot Station Flensburg, Schiffbrucke 12, D-2390 Flensburg, Tel: (0461) 25150. Advance notice 5 hours before arriving Buoy "Flensburger Foerde" by Kiel Radio or Agent (3 hours before leaving port). Pilot boards at Buoy "Flensburger Foerde". Pilot will board in all weather if possible, otherwise pilot-boat will lead vessel to that position where Pilot can board. Not necessary to anchor. Pilot-boat is a fishing-boat with "Lotse" written in white letters on both sides. Boat will show lights prescribed by international regulations and is fitted out with VHF Channels 6, 10, 16, 25, 26, 27.
ANCHORAGES: Just outside harbour entrance, N.E. of Mittelgrund and West of Kielseng leading lights. Depths of water between 12 m. and 19 m. muddy ground; same position for Quarantine Anchorage.

The other anchorage is at Buoy "Flensburger Foerde", depth of water between 20 m. and 27 m. Bottom is mud and sand.
RESTRICTIONS: No specific restrictions; no tide, water-level variations depending only on the wind.
MAX. SIZE: Max. draft up to 7.0 m. at normal water-level.
HEALTH: Generally Free Pratique for ships in the North Sea and Baltic Sea trade, ships coming from overseas ports pratique granted on arrival. Inform Pilot if any suspected diseases on board. He will make necessary arrangements. A valid Derat Exemption Certificate has to be on board.
RADIO: Kiel Radio, call sign DAO, tel. (0431) 39011, telex 02-0081.
VHF: None in Flensburg Port.
RADAR: There is no Port Radar Service.
TUGS: Harbour tugs are not available. If required, Flensburger Schiffbau-Gesellschaft can supply one tug 470 h.p., provided at least 3 hours notice given, ship's lines are used.
BERTHING: Powerstation-Quay length 170 m. depth of water 7.30 m. Harnis Quay length 460 m. depth of water 6.00 m. Harnis Quay length 240 m., depth of water 7.0 m. Schiffbrucke Quay length 210 m. depth of water 6.50 m. Schiffbrucke Quay length 130 m., depth of water 5.0 m. Depths of water refer to normal water-level.
CRANES: Powerstation Quay 1 crane 5 tons and 1 crane 10 tons lifting capacity; Harnis Quay 4 cranes 3 – 5 tons lifting capacity; all cranes are usable for general and bulk cargo.
BULK CARGO FACILITIES: 3 elevators for feedstuff.
SPECIALISED CARGO-HANDLING FACILITIES: Not available.
BRIDGES: There are no bridges at Flensburg Port.
STEVEDORES: Agents make all arrangements. Unloading rates depend on type of cargo. Bulk cargo discharge up to 160 t.p.h. per gang.
MEDICAL: Doctors, hospitals, ambulances available day and night.
TANKERS: 2 berths for tankers up to 1,000 g.r.t. with depths of water 5.70 m. and 5.00 m.; diameter of discharge lines are NW 200; average discharge of fuel and gasoil 300 cu.m. per hour.
DENSITY: Winter-time 1015; Summer-time 1012.
FRESH WATER: Available at all berths, delivery rate about 20 cu.m./hr. from shore hydrants.
FUEL: Diesel available in any quantity. Fuel oil subject to 5 hours advance notice from tank lorries.
FIRE PRECAUTIONS: No specific precautions.
CONSULS: Denmark, Nordergraben 19; others at Hamburg.
REPAIRS: Flensburger Schiffbau-Gesellschaft carry out all ship repairs; outfit section equipped with one crane of 42 tons lifting capacity.
DRY DOCKS: Two floating docks with 7,500 and 1,500 tons lifting capacity.
SURVEYORS: All main Classification Societies are present at Hamburg.
GANGWAY/DECK WATCHMEN: No watchman service available.
HATCHES: Opening/closing normally done by crew. Stevedores will perform this for additional payment.
CUSTOMS ALLOWANCES: For consumption on board merchant vessels for each crew member per day 40 cigarettes or 20 whiffs or 10 cigars or 50 grams tobacco *and* 0.25 litre spirits *and* 3 litres wine are duty-free. If the ship stays for 3 days or longer it is usual to allow three-fold of the mentioned quantity. For shore leave 20 cigarettes are permitted for each person only. If a crew member leaves the ship for at least 3 days the regulations for tourists are applicable.
CARGO GEAR: All loading and discharging done by shore cranes, except elevator-work.
REPATRIATION: Possible at any time without difficulties.
AIRPORT: Hamburg-Fuhlsbuttel, 175 km. distant; 2.5 hours by train.
TIME: Winter-time GMT plus 1 hour, Summer-time GMT plus 2 hours.
HOLIDAYS: See "Hamburg". No work on official holidays.
POLICE/AMBULANCE/FIRE: Police Tel: 110, Fire/Ambulance Tel: 112.
TELEPHONES: No installation on board ships.
SERVICES: No tank cleaning and slop disposal services. Compass adjusting possible, advance notice necessary.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
REGULATIONS: No particular or unusual regulations.
DELAYS: Normally no delays.
AUTHORITY: Stadtwerke Flensburg GmbH, P.O.Box 2751, Batteriestrasse 48, D-2390 Flensburg. *Tel:* (0461) 487301. *Telex:* 22653 Stawfl. *Contact:* T. Lauritzen, Harbour Master.

AGENT: See "Hamburg".

GLUCKSTADT: 53.45 N. 09.25 W.

PORT LIMITS: Line drawn between seaward ends of North and South moles.
DOCUMENTS:

Ship's Papers.
Cargo Papers.
Despatching Papers.
Crew Lists.

PILOTAGE: Pilot to be ordered via Agent.
MAX. SIZE: Vessels up to 4.5 m. draft can pass through lock to Inner Harbour.
BERTHING: Outer Harbour: 400 m. quayage, depth 6 m. at HW.

Inner Harbour: 300 m. quayage, depth 4.5 m. at HW.

Dimensions of lock between Outer and Inner Harbours are: Max. depth 5.76 m. HW, width 13.85 m., usable width 12.85 m.
CRANES: 1×14 ton jib crane, 1×18 ton mobile crane, 1×14 ton caterpillar crane, 1×28 ton jib crane (privately owned).
STEVEDORES: Working Hours: Monday to Thursday 0700 – 1200 hrs., 1230 – 1600 hrs. Friday 0700 – 1300 hrs. Overtime to be agreed.
DRYDOCKS: One slipway for inland waterway vessels up to 500 d.w.t.
AIRPORT: Hamburg.
AUTHORITY: Amt fur Land-und Wasser Wirtschaft Itzehoe, Breitenburger Strasse 25, 2210 Itzehoe. *Tel:* 04821-660 662138. *Telex:* 28226 Alwitzd. *Contact:* Harbour Master, Hafenamt Gluckstadt, 2208 Gluckstadt. *Tel:* 04124-2087.

HAMBURG: 53.33 N. 09.59 E. (including Altona, Harburg and Wilhelmsburg) (See Plan)

DOCUMENTS:

6 Crew Lists
6 Passenger Lists.
2 Provisions and Stores Lists including Fuel Oil.
3 Dangerous Cargo Lists.
Health Certificates (forms obtainable from Pilot).
General Cargo Declaration.
Ship's Register.
Oil Liability Certificate for more than 2,000 tons of oil.

DEEP SEA PILOTAGE: See "Brixham" or "Cherbourg" and "General" before first German port.
PILOTAGE:
Pilotage-Anchorage River Elbe: See "General" before first German port.
Pilotage Port of Hamburg: Harbour Pilots board the ships close to the Seemannshoft Station. Harbour Pilots can be called by VHF, Channel 9, call "Hamburg Pilot", morse or sound signal "G" (2 long and 1 short) or flag "G". Pilotage is compulsory for vessels with dangerous cargo and over 1,000 g.r.t.
Exceptions: Pilotage is not compulsory for vessels with dangerous cargo up to 300 g.r.t. and vessels up to 5,000 g.r.t., if: (1) the Master has called at the Port of Hamburg with his ship 6 times within the last 12 months, and (2) he speaks German fluently. Advisable to use Pilots in port.
ANCHORAGE: Available at several places between Elbe 1 and Hamburg. See "General" before first German port.
RESTRICTIONS: No restrictions imposed on night entry for any vessels.
MAX. SIZE: *Inward Bound:* Vessels allowed max. draft of 46 ft. in salt water on arrival Elbe 1 Lightvessel, may enter only on rising tide under normal weather and tide conditions.

Container ships exceeding 37 ft. draft in salt water on arrival Elbe 1 Lightvessel may enter only on rising tide.
Outward Bound: Vessels up to 35 ft. draft in fresh water on departure from Hamburg may leave at any time.

Vessels exceeding 35 ft. draft in fresh water and up to 38 ft. on departure from Hamburg-Finkerwerder Port Pilot Station may leave 1 hour after LW until 2 hours before next following HW.

Container ships up to 38 ft. draft in fresh water on departure from Hamburg may leave at any time.

Container ships exceeding 38 ft. draft in fresh water and up to 41 ft. on departure from Hamburg-Finkerwerder Port Pilot Station may leave 1 hour to 2 hours after LW but required to anchor at Brunsbuttel N.E. Anchorage depending on tide.
Inward Bound: Vessels exceeding 300 m. length or 45 m. breadth allowed max. draft to 41 ft. in salt water on arrival Elbe 1 Lightvessel, may enter only on rising tide.
Outward Bound: Vessels allowed draft to max. 35 ft. in fresh water on departure from Hamburg-Finkerwerder Port Pilot Station may leave 1 hour after LW until 2 hours before next following HW. Underkeel clearance of 10% of draft required.

Vessels demanding the rising tide will proceed according to tidal conditions in order to reach Finkerwerder Pilot Station 1 – 1.5 hours before HW.

The following Harbours can be reached:

Harbour Name	**Max. draft subject to tide and berth (ft.)*	*At any time up to (ft.)*
Dradenau Hafen	41	31
Petroleum Hafen	23 – 36	27
Griesenwerder Hafen	30 – 34′ 02″	25
Waltershofer Hafen	38 – 43	28 – 35
Kuhwerder Hafen	30 – 37	27 – 29
Obere Hafen	20 – 41	18 – 31
Rethe Neuhof HGL	44′ 03″	36
Kattwyk Hafen	43	34
Neuhofer Hafen	39	36
Rethe Hansamatex	39 – 43	31 – 33
Rethe Kruse	43	33
Rethe Mackprang	42	33
Rethe Stroh	42	32
Schluisgrove Hafen	26′ 11″	17
Hansaport	47	37
Harburg Seehafen 4	25 – 30	21
Harburg Seehafen 3	33	25
Harburg Seehafen 2	30 – 38	30
Harburg Seehafen 1	24 – 30	21 – 25
Kraftwerk Wedel	32 42.5	32
Blumensandhafen	43	32

*Max. draft with 10% underkeel clearance.

The max. draft is dependent on the prevailing Easterly or Westerly winds.

Also see "Shipmaster's Report".

Report: October 1984.

The following salt water drafts are permitted:

46 ft. 00 in. S.W., for vessels up to 300 m. LOA and/or 45 m. beam.
44 ft. 06 in. S.W., for vessels up to 315 m. LOA and/or 47 m. beam.
43 ft. 06 in. S.W., for vessels up to 330 m. LOA and/or 49 m. beam.
42 ft. 06 in. S.W., for vessels up to 345 m. LOA and/or 54 m. beam.
41 ft. 06 in. S.W., for vessels up to 360 m. LOA and/or 63 m. beam.

BULK HANDLING FACILITIES:

Grain

	Draft	*Maximum Length*	*Number of elevators*	*Capacity total/hour*
Hamburg-Kuhwerder Hafen	38 ft.	656 ft.	4	900 tons
Hamburg-Rethe/Stroh	42 ft.	886 ft.	3	1,000 tons
Hamburg-Rethe/Kruse	43 ft.	820 ft.	3	900 tons
Hamburg-Rethe/Makprang	42 ft.	886 ft.	11	1,300 tons
Hamburg-Neuhof	44 ft. 03 in.	902 ft.	4	1,300 tons

There are 11 floating elevators with a capacity of 350/450 t.p.h.

	Quay length (ft.)	*Max. safe draft (F.W.)*	*Max. height discharging gear above high water level (ft.)*
Coal and Minerals:			
Hamburg-Harburg II	1,720	40 ft.	66
Elbehafen Brunsbuttelkoog Gmbh	1,968	37 ft.	98
Coal:			
Hamburg-Strandhafen	560	36 ft. 6 in.	No restriction
Hamburg-Wedel	1,050	42 ft. 6 in.	No restriction
Fertilisers:			
Neuhof-Kalikai	1,215	40 ft.	60
Minerals:			
Hamburger-Stahlwerke	1,340	40 ft.	82
Hansaport	1,850	45 ft.	No restriction

Hamburger Aluminium Werk Gmbh	600	36 ft.	No restrictions
Bauxite/Oxide:			
Aluminium Oxid Stad Gmbh (AOS)	1,080	43 ft.	62

ETA: Master's telegrams via Norddeich Radio, call sign DAN, are passed on to Agent 24 hours a day, week-ends and holidays inclusive. For this reason it is advisable that Masters communicate with Agent via Norddeich Radio.

In order to avoid delay and extra charges Masters should cable their ETA at least 12 hours prior to arrival at pilot station Elbe 1 to "Elbelotse Brunsbutelkoog" via Norddeich Radio, stating the following details:

1. Name of vessel.
2. Gross register tons.
3. Date (2 figures).
4. Time (4 figures).
5. Place where Pilot is required.
6. Place of destination.
7. Draft in metres (4 figures).

For example:

Eta Fjordaas	41079	12	1600	Elbeone	Hamburg	1214
(1)	(2)	(3)	(4)	(5)	(6)	(7)

1 hour before arrival at Elbe 1 Lightvessel Masters are advised to contact the pilot cutter by VHF Channel 13 or 16.

BRIDGES: To be passed by vessels bound for basins South of Kohlbrand.

Bridge	*Situated*	*Max. breadth (ft.)*	*Height above normal H.T. (ft.)*	*Depth at normal H.T. (ft.)*
Kohlbrand Brucke (a high-bridge)	across the Kohlbrand near Neuhof	558	175.5	48
Kattwyk Brucke (a drawbridge)	across the Suder Elbe, before Harburg	328	168	43.6
Rethe Brucke (a drawbridge)	across the Rethe, near Reiherstieg	164	130.3	41

HEALTH: Master required complete health certificate when Pilot boards. Only vessels with infectious diseases are subject to detention.

RADIO: All messages to Agents, etc., through Norddeich Radio, call sign "DAN". Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16.

Ships reporting stations are on permanent duty:

Cuxhaven: Call "Cuxhaven Elbe Port Radio" on VHF Channel 12, safety and calling Channel 16.

Brunsbuttel: Call "Brunsbuttel Elbe Port Radio" on VHF Channel 14, safety and calling Channel 16.

Stadersand: Call "Stadersand Elbe Port Radio" on VHF Channel 11, safety and calling Channel 16.

Hamburg: Call "Hamburg Elbe Port Radio" on VHF Channel 12, safety and calling Channel 16.

Hamburg Port Radio (Port Authority): VHF Channel 14 and 16.

RADAR: River Radar Service from Elbe 1 to Hamburg, see "General" before first German port.

Hamburg Radar Service "Hamburg Radar Radio", VHF Channels 3 and 19 at the lower end of Seemannshoeft, VHF Channels 80 and 7 at the Western and Southern part of harbour, VHF Channels 63 and 5 at upper part East of Koehlbrand.

TUGS: Normally join incoming vessels at Harbour pilot station at Finkerwerder. Vessels' lines usually used. If tugs lines required, an extra charge is made.

STEVEDORES: Ordered by Agents, no additional ETA's required.

Working hours

Monday to Friday	First shift 0650 to 1500 hrs. Second shift 1500 to 2310 hrs. Third shift 2310 to 0650 hrs.
Saturdays, Sundays and holidays	First shift 0700 to 1300 hrs. Second shift 1300 to 1900 hrs. Third shift 1900 to 0100 hrs. Fourth shift 0100 to 0700 hrs.

Work performed after 1500 hrs. Monday to Friday, on Saturdays after 1300 hrs., on Sundays and holidays is at overtime rates.

CONTAINER HANDLING FACILITIES:

	Burchardkai	*Tollerort Terminal (SHED 90/91)*	*Africa Terminal*	*Euro-Kai KG aA Griesenw. Damm*	*Unikai (SHED 73)*	*Unikai (SHED 75 and 77)*

TANKERS:

	No. of berths	*Max. Draft (FW)*
Kohlfleethafen (Esso/B.P.)	2	40 ft.
Petroleumhafen (B.P.)	10	36 ft.
Kattwyk Hafen (Shell)	2	43 ft.
Kattwyk Hafen	1	43 ft.
Blumensandshafen	1	43 ft.
Neuhof (Hansamatex)	4	35–43 ft.
Neuhof (Schindler)	1	41 ft.
Harburg Seehafen 4 (Esso)	3	30 ft.
Tankerlager Moorburg	1	40 ft.
Stadersand (Lower Elbe)	1	35 ft.

Tanker cleaning and gas freeing facilities at Neuhof Hansamatex, Kattwyk Hafen (Shell) and some dolphin berths by boats.

Koehlfleethafen Terminal: Cautionary Advice: Ships approach the berth at HW or shortly thereafter with the ebb current just starting. At any other time, it is very difficult to enter the harbour due to the current conditions at the entrance. The ship's speed at the entrance should be as low as possible.

Berthing Procedure: Tankers for the North Berth are berthed starboard side to and at the South Berth port side to. The ship's approach on a heading parallel to the berth. Usually the spring lines are run out first. An anchor may be used when approaching the berth.

Moorings: All lines are secured on quick release hooks. Average tidal range at berth is about 8 ft.

Harburg, Seehafen IV, Berths 2 and 6: Cautionary Advice – Approaches: All ships approaching or leaving Harburg IV have to transit the narrow Kohlbrand Fairway. The ship should manoeuvre at reduced speed. A good helmsman and quick response of the engine are important.

Cautionary Advice – Manifold Connections: Due to the design of the loading arms, care must be taken that the ship's lines are tight and the ship is not allowed to make any movements alongside the berth during cargo handling operations.

Restrictions: There is a lifting bridge crossing the Kohlbrand. This bridge will open for every ship which is tide bound. Other ships and all ships sailing from Harburg IV have to pass the bridge on scheduled opening times at all even hours from 0600 hrs. – 2200 hrs. and at 0530 hrs.

There are numerous berths at the banks which have to be passed at slow speed.

Tugs: 4 tugs will normally make fast after the Pilot has boarded. The tugs should be fast before entering into the Kohlbrand. They tow "on the hook." It is recommended to use tugs lines at an extra charge.

Berthing: Deep-drafted vessels berth at HW only. Caution should be exercised when turning from Kohlbrand into the Seehafen IV Basin.

Berth No. 6 is the first T-head jetty on the starborad side when entering Seehafen IV, and Berth No. 2 is the innermost T-head jetty on the same side. Vessels are always starboard side alongside and port anchor may be used to control vessel's movement in approaching the berths. When close to the berth, the 2 tugs on the starboard side will let go and push on the port side.

Both berths have wooden breasting dolphins and care should be taken to land parallel to the fender face with minimum approach speed.

Kattwykhafen, Shell Terminal: Cautionary Advice – Approaches: All ships approaching or leaving Kattwykhafen transit the narrow Kohlbrand Fairway and have to pass through the Rethe Harbour. Ships should proceed with reduced speed. A good helmsman and quick engine response are of importance.

Restrictions: There are numerous berths in the Rethe Harbour which have to be passed at slow speed.

Tugs: 4 tugs will normally be made fast after Pilot has boarded. The tugs should be fast before entering into the Kohlbrand. The tugs, 2 forward and 2 aft are made fast "on the hook." It is recommended to use tugs lines at an extra cost.

Berthing: Deep-drafted vessels berth at HW only. Vessels should be almost stopped in the water when swinging into Kattwykhafen. Tugs will assist in controlling vessel's speed and swing.

When close to and parallel to the berth, the 2 inside tugs will let go and push on the outside until vessel is alongside. Maximum approach speed at impact is 10 cm./sec. for a 100,000 d.w.t. vessel landing on both breasting dolphins.

Moorings: The mooring lines are taken ashore by 2 mooring boats and lifted to the dolphins by hand. Only 2 head lines are secured on quick-release-hooks.

Hansamatex, Berth Nos. 1, 2, 3 and 4: Cautionary Advice – Approaches: Ships approaching or leaving the Hansamatex Berths have to transit Kohlbrand Fairway and have to pass through the Rethe Harbour. Ships should proceed at reduced speed. A good helmsman and quick engine response are of importance.

There are numerous berths in the Rethe Harbour which have to be passed at slow speeds.

Tugs: The number of tugs used is according to the Master's request and Pilot's advice. The tugs should be fast before entering into the Kohlbrand. The tugs will be made fast "on the hook." It is recommended to use tugs lines at an extra charge.

3 tugs are normally used for vessels of less than 20,000 d.w.t., and 4 for all other vessel's except VLCCs.

Berthing: Berth No. 1 is located on the North bank of the Rethe. Ships are towed stern first into the berth. The spring lines will be run out first. Maximum draft ships should arrive with HW. Due to the narrow manoeuvring area at Berth No. 1, the approach speed of the ship should be minimal.

Berth No. 2 is located on the North bank of the Rethe. The ships are manoeuvred close to the berth, and the spring lines will be run out first. Max. draft ships should arrive with HW.

Berth No. 3 is located on the North bank of the Rethe. Ships up to 250,000 d.w.t. are berthed for tank cleaning purposes. The draft should be confirmed by the Pilots before arrival at the Sea Buoy. The ship manoeuvres close to the berth, and the spring lines will be run out first. Max. draft vessels should arrive with HW.

Berth No. 4 is located on the East side of the Neuhofer Harbour. Ships of up to 100,000 d.w.t. may berth with part cargo or for tank cleaning. Ships arriving for this berth will turn in the Rethe heading to the South and will then be towed stern first into the berth. Spring lines will be run out first. Max. draft vessels should arrive with HW.

DENSITY: Fresh water.

FRESH WATER: Available from shore at most berths. Also supplied by barge.

FUEL: All grades available from oil berths, or supplied by barge.

WATCHMEN: Can be hired for all purposes. Normally arranged by Agent.

OPENING/CLOSING HATCHES: Normally by crew with the assistance of stevedores; otherwise, according to charter party.

CUSTOMS ALLOWANCES: No restrictions in the freeport area on board a ship. While not on board the ship in the freeport area or outside the freeport during shore leave or temporary leaving the ship up to 3 days, each Crew member allowed 20 cigarettes, 5 cigars and 50 grams tobacco. These quantities change when paying off – up to 200 cigarettes or 50 cigars or 250 grams tobacco.

REPAIRS: All deck, hull and machinery repairs can be carried out by local shipyards at Hamburg. Underwater repairs and cleaning can be effected by divers with special equipment.

DRY DOCKS: *Blohm and Voss,* tel. 3061: 6 floating docks with lifting capacities up to 50,000 tons. Graving dock, capacity up to 320,000 d.w.t.

Howaldtswerke Deutsche Werft, tel. 7411: 9 floating docks, with lifting capacities up to 53,000 tons.

Norderwerft, tel. 311001: 2 docks, for vessels up to 4,000 tons d.w.t. and slipway for vessels up to 60 m. length.

There are other slipyards providing floating docks with lifting capacities of up to 5,000 tons.

SURVEYORS: Cargo inspectors available, contact Agent.

Lloyd's Register, American Bureau, Bureau Veritas and Salvage Association are represented.

REPATRIATION: Crew changes and repatriation can be carried out without difficulty.

AIRPORT: Distance 15 km., served by Lufthansa with flights worldwide.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (May 1st); Ascension Day; Whit Monday; National Day (June 17th); Prayer Day; Christmas Day; Boxing Day. No work on New Year's Day, Easter Sunday, May 1st, Whit Sunday and Christmas Day.

POLICE/FIRE/AMBULANCE: Police 110; Fire 112; Ambulance 110; Port Medical Service 321021 (or call Hamburg Port Radio on VHF Channel 14).

TELEPHONES: Telephones can be placed onboard at all berths. No telephone connections for vessels at dolphins.

EMERGENCY CO-ORDINATION: Call Police (Tel: 110) or Hamburg Port Radio on VHF Channel 14.

BANKS: Deutsche Bank, Adolphsplatz 7, 2000 Hamburg 11. Tel: 040-3771. Telegraphic Address: Deutbank Hamburg. Telex: 212535.

Commerz-Bank AG, Ness 7, 2000 Hamburg 7. Tel: 040-361311. Telegraphic Address: Commerzbank Hamburg. Telex: 212391.

Dresdner Bank AG, Jungfernstieg 22, 2000 Hamburg 36. Tel: 040-3581. Telegraphic Address: Dreba Hamburg. Telex: 212098.

And others.

TIME: GMT plus 1 hour. There is summertime from 28th March (0300 hrs.) until 26th September (0300 hrs.) – GMT plus 2 hours.
STORING: See "Prelims".

1. Vessels can be stored by barge or truck.
2. Vessels can store from barge during loading or discharging, except on tanker berths.
3. The truck can proceed alongside at the berths.
4. Fork lift trucks can be used for handling stores.
5. No Customs regulations in the Freeport area, outside the Freeport arranged by Agent.
6. Local riggers can be employed, arranged by Agent or ship chandler.

SHORE LEAVE: No restriction.
IDENTIFICATION CARDS: No shore passes issued. Seaman's Book or Passport is sufficient.
DEVELOPMENTS: Silo capacity for bulk cargo handled by pneumatic elevators is increased up to 500,000 tons. Capacity of further 500,000 tons is available. Max. depth for bulk cargo vessels 40 ft. – 44 ft. See "Max. Size".
Dredging of the Lower Elbe to 13.5 m. at mean low tide completed.
Port Extension Area. An industrial port area of 4,600 ha. with access for large sea-going vessels up to 120,000 d.w.t. is under development.
Hansaport: The new ore/coal terminal at Sandauhafen (operational from 1977) has a capacity of 15 million tons p.a. Length of the two berths: 560 m; depth of water: 15 m. (MLW). Vessels up to 270,000 d.w.t. (partially lightened) will be able to berth.

SHIPMASTER'S REPORT: 1978.
Recently vessel called at Hamburg to load a full load of steel beams for Iran under Time Charter. Originally charterers had asked me to calculate the full load with maximum S.W. draft of 38 ft. 00.875 in. with 10.5 in. F.W.A. and the weight came to more than 39,000 long tons. But later when we arrived at Hamburg, while checking with Port Authorities it was learnt that though vessels are allowed to come in with 42 ft. – 43 ft. drafts fresh water, no vessels excepting, at times fast container vessels are allowed draft more than 36 ft. fresh water. This is generally not known to many operators even in Hamburg.

HOLTENAU, Kiel Canal: 54.22 N. 10.09 E. (See Plan)

For entrance from Baltic, refer to "Kiel".
For entrance from Elbe, refer to "Brunsbuttel".
LOCATION: Holtenau is a part of the town of Kiel, it is located on the Northern side of the entrance to the Kiel Canal.
BERTHING: The outer harbour of Kiel-Holtenau (Lat. 54° 22.2′ N. Long. 10° 09.2′ E.) in the N.E. part of the old lock fore port, with water depths of 3.5 to 4.5 m. and 280 m. long quay location serves vessels up to 3.5 m. draft, 85 m. long and 13 m. beam as a berthing point. At the quay not more than 3 ships with a total beam of 28 m. can lie next to each other. To the West of this, is a 125 m. long berthing pier, known as Kumobrucke, with 4.5 m. draft alongside for vessels up to 3 m. draft, 40 m. long and 8.5 m. beam. No more than 2 vessels may lie alongside each other.
Between this pier and the shore is a yacht harbour for pleasure craft.
The inner harbour, to the East of the Holtenau Road-bridge, can only be reached through the lock of the Kiel Canal. From the berths in the inner harbour, vessels may not enter the locks without a Pilot if they are obliged to take on a Pilot for the Kiel Canal.
The Gasworks quay, just to the West of the New Locks, has a length of approx. 210 m. and a nominal depth of 10.4 m. The quay has cranes with a lifting capacity up to 8.5 tons. Vessels up to 160 m. in length and up to 9.7 m. draft can tie up at the Gasworks quay. To the West of it, is an approx. 94 m. long quay with piers for Wik-Holtenau passenger ferries.
To the East of the Holtenau Road-bridge is an approx. 536 m. long quay belonging to Zerssen and Co. This location is used mainly for fitting out and bunkering of vessels. On the North side of the inner harbour ships with dimensions permissible for the Kiel Canal can tie up at the dolphins but only with special permission of the Kiel Canal Authority.
SERVICES: In Holtenau are a Service Station of the German Hydrographic Institute, a pilot station, a border police station, a water police station, Customs control, Port Doctor, Sailors' Central Control, Sailors' engagement office, and a sailors' hostel.
An office for marine charts and nautical publications is located at the lock; good facilities exist for the quick supply of ships' equipment, victuals and fuels. Repairs to machinery installations, radar and wireless apparatus, supply of spare parts, and also the exchange of crews can be arranged without long voyage delay virtually whilst a vessel is passing through the canal. Shipbrokers' services are available.
AUTHORITY: Wasser-und Schiffahrtsamt Kiel-Holtenau, Schleuseninsel 2, P.O.Box 8068, 2300 Kiel 17. *Tel:* (0431) 385-1. *Telex:* 02-92836.

ITZEHOE: 53.56 N. 09.33 E. (See Plan)

DOCUMENTS:
2 Bonded Stores Lists
2 Crew Manifests
2 Crew Lists

PILOTAGE: Pilot available. Pilot boards at the entrance to the River Stor.
RESTRICTIONS: Entering River Stor at HW only. Proceeding to Itzehoe during daylight only. Departure from Itzehoe about 1 hour prior to HW.
MAX. SIZE: Length: 80 m. due to bends in river. Beam 12 m. Airdraft 18.50 m. due to height of Stor bridges. Draft 3.80 m.
RADIO/VHF: Elbe-Weser Radio on VHF Channel 16.
RADAR: *Radar Chain River Elbe:*
From "Elbe 1" Light-vessel to entrance River Stor:
Elbe – Ansteuerung-Radar VHF Channel 19
Neuwerk – 1-Radar VHF Channel 18
Neuwerk – 2-Radar VHF Channel 5
Cuxhaven – Radar VHF Channel 21
Belum – Radar VHF Channel 3
Brunsbuttel – Radar VHF Channel 4
Freiburg – 1-Radar VHF Channel 18
Freiburg – 2-Radar VHF Channel 22
Also see "General" before first port.

BERTHING: Total length: 450 m.
Depth alongside: At HW 4m.; at LW 1.90 m. (tidal range 2.10 m.). Bottom consists of soft mud.
CRANES: 2×3.5 tons lifting capacity and about 13 m. outreach and 1×5 tons lifting capacity and 12.5 m. outreach are available.
BULK HANDLING FACILITIES: *Grain:*
Loading: By conveyor-belt about 40 – 50 t.p.h. for heavy grain.
Discharging: By suction with 1 elevator pipe about 35 – 40 t.p.h. heavy grain. By grab/conveyor-belt 50 – 60 t.p.h. heavy grain.
Grain silos of 35,000 tons capacity.
STEVEDORES: Cargo service, 2212 Brunsbuttel. Tel: 04852-87077. Telex: 28383 HTKB D.
MEDICAL: Medical, hospital and dental facilities available.
DENSITY: Fresh water.
FRESH WATER: Available.
FUEL: All grades available by road tanker.
REPAIRS: Radio, radar, nautical equipment, engine, electrical and minor hull repairs possible.
SURVEYORS: Caleb Brett and SGS available from Hamburg.
Independent Marine Surveyors available at Brunsbuttel and Hamburg.
CUSTOMS ALLOWANCES: Customs allow each crew member 200 cigarettes and 1 bottle of spirits for consumption onboard.
OPENING/CLOSING HATCHES: Usually by crew.
REPATRIATION: Possible.
AIRPORT: Nearest airport at Hamburg.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: 1st January, Good Friday, Easter Monday, 1st May, Ascension Day, Whit Monday, 17th June, Prayers Day, 25th/26 December.
POLICE/AMBULANCE/FIRE: Police Tel: 110. Fire and Ambulance Tel: 112.
SERVICES: Provisions, stores, nautical publications and charts available.
AUTHORITY: Stadtwerke Itzehoe, Gasstr. 18, D-2210 Itzehoe, West Germany. *Tel:* 04821-7740. *Telex:* 28107 SWIZ D. *Contact:* Mr. Besel.
AGENT: Sartori & Berger, P.O.Box 1140, 2212 Brunsbuttel. Tel: (04852) 8091. Cables: Sartoriberg Brunsbuttel. Telex: 028324.

KAPPELN: 54.40 N. 09.56 E.

PILOTAGE: Pilot station at Kiel Lighthouse.
RESTRICTIONS: Depth of water between Schleimunde and Kappeln from 4.5 m. to 14 m. at normal water level. Distance from Schleimunde to Kappeln about 3.5 nautical miles.
Passage width of the swing bridge is 22.5 m.
MAX. SIZE: *North Harbour:* Max. LOA 130 m., max. beam 18 m., max draft 5 m.
South Harbour: Max. LOA 150 m., max. beam 18 m., max. draft 5 m.
BERTHING: *North Harbour:* There is 1 grain silo available with a storage capacity of 4,500 tons. The loading/discharging rate is 40 t.p.h. 1 quay for discharging/loading cargo.
South Harbour: One grain silo available with a storage capacity of 4,000 tons. Loading/discharging rate 40 t.p.h. one quay for loading/discharging cargo.
CRANES: *North Harbour:* Two hydraulic mobile cranes available, 1×3.5 tons and 1×5 tons capacity.
South Harbour: Two hydraulic mobile cranes available 1×3.5 tons and 1×5 tons maximum capacity.
STEVEDORES: *Working Hours:* Monday to Friday 0700 – 1800 hrs. Saturday 0700 – 1200 hrs.
BULK HANDLING FACILITIES: See "Berthing" and "Cranes".
FRESH WATER: Available.
FUEL: Not available.
REPAIRS: Possible. Contact Alfred Eberhardt, Langestr. 2341 Arnis.
AUTHORITY: Shipbroker Artur Koch, Dehnthof 21, P.O.Box 1131, 2340 Kappeln. *Tel:* (04642) 2354 and 4154. *Telex:* 22681 Koch D. *Cables:* Arturkoch Kappeln. *Contact:* H. A. Koch, Harbour Master.

KIEL: 54.19 N. 10.10 E. (See Plan)

DOCUMENTS:

Stores List.
Bills of Lading.
Manifest.
Crew List.
Health Declaration.
Derat Certificate.
If loading/unloading cargo, following also required:
Ship's Stores List.
Crew Possessions List.
Cargo Manifest.
Bills of Lading.
Customs Declaration.

Local Agents will advise Master on board regarding these Clearance Documents.

PILOTAGE: For Kieler Forde, vessels over 1,000 g.r.t. and oil, gas and chemical tankers must take a Pilot.

Vessels proceeding in the approach area or through the Kiel Canal are obliged to take on a Pilot.

Vessels and push-type trains, as well as tug trains, having the greatest possible max. draft of 3.1 m. and belonging to traffic group 1 are exempted from the obligatory pilot service. Vessels with a breadth in excess of 15 m. or with a gross tonnage of over 2,500 tons (maximum tonnage) must take on recognised helmsmen (canal helmsmen) for the canal passage. Pilot station, tel. 362858. ETA required in advance. Pilot boat can be found near Kiel Lighthouse and also off the entrance to Kiel Canal. Pilot boats are yellow with "Lotse" painted on both sides. Signal for Pilot is flag "G" over numeral pennant 1. Pilots for Kiel Harbour also available and recommended if port is not familiar. Also see "Shipmaster's Report".

ANCHORAGE: Safe anchorages at Holtenau-Reede and at Heikendorf-Reede for vessels up to 9.7 m. draft.

RESTRICTIONS: Non gas-free tankers must give advance notice of arrival and will require chemist's certificate before entering harbour area.

Speed limit 10 knots South of line Bulk/Ehrenmal Laboe. Also see "Shipmaster's Report".

MAX. SIZE: For Nordhafen and ships passing Canal, 235 m. length, 32.5 m. beam and 40 m. above the water level. For vessels up to 160 m. in length, the max. permitted draft is 9.5 m. In the case of vessels with length in excess of 160 m. and over 20 m. breadth, the max. permissible draft are shown in the following table (draft data in dm.).

Vessel Length (m.)	*Vessel's Breadth (m.)* 20	21	22	23	24	25	26	27	28	29	30	31	32	32.5

Depth at harbour quays: Binnenhafen 10 m.; Scheerhafen, 10.30 m. Bulk carrier of 35,000 d.w.t. draft 35 ft. has discharged at Scheerhafen.

HEALTH: If suspected infectious disease on board, inform harbour authorities by radio in advance.

RADIO: Kiel Radio, call sign DAO. Tel. 39011.

VHF: Kiel Port radio on continuous watch during office hours on Channel 16, working on Channel 11.

TUGS: If required tugs normally join vessel just off berth. Can be ordered by Kiel Radio or through Agents.

BERTHING: No particular restrictions except for vessels in distress, or carrying explosives or tankers not gas-free. In these cases special permission of Harbour Authorities required for berthing.

Binnenhafen: Length of quay 2,500 m. Depths up to 10 m. 4 cranes with capacity up to 24 tons, also 2 mobile cranes 12 tons and 45 tons.

There is a mobile Roll-on/Roll-off bridge, 18 m. wide. Max. axle pressure 70 tons and 3 berths with immovable ramps for Ro/Ro transhipment.

At Sartori-Kai there is a silo with a capacity of 16,000 tons, and at mouth of the River Schwentine another with capacity of 17,000 tons and discharge rate of 80 t.p.h.

Oslo-Kai: The terminal is for the exclusive use of passenger and car ferries. Depth of water 7.5 m.

Schweden-Kai: The terminal is for exclusive use of passenger and car ferries.

Scheerhafen: Length of quay 300 m. Depth 10.3 m. There are 2 modern high capacity cranes capable of lifting up to 10 tons. There is also a privately owned tanker unloading facility with storage capacity of about 70,000 cu. m. and facilities for receiving dirty ballast.

Nordhafen: Situated in the Kiel Canal. Length of quay 2,000 m. depth 11 m. Facilities available include a floating Roll-on/Roll-off bridge with permissible axle pressure of 60 tons, 6 cranes with capacities up to 25 tons, a 70,000 ton silo with drying capacity of 70 t.p.h. and 2 elevators each with capacity 125 t.p.h. 1 mobile crane 40 tons.

MEDICAL: Doctors, hospitals, ambulances available. Advance notice to Agents recommended if medical assistance required. Vessels coming from European ports need Derat Certificate. Vessels from other ports need in addition International Vaccination Certificates.

For all cases of poisoning needing special and urgent treatment telephone 597 3268, Medical University Clinic, Schittenhelmstrasse.

TANKERS: Unloading/Loading/Bunkering berths operated by private companies; slop discharge facilities available.

FRESH WATER: Available at all quays.

FUEL: All grades available. Preferable to order in advance through Agents.

FIRE PRECAUTIONS: Tankers should be prepared to leave port at any time. To be berthed with bow heading seaward. A valid Gas-free Certificate given by chemist in Kiel district is required before entering harbour area.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Normally by ship's crew. Can be arranged by stevedores if required.

CUSTOMS ALLOWANCES: 20 cigarettes per man per day. No alcohol.

IDENTIFICATION CARDS: Not required.

CONSULS:

Belgium	tel. 75079	Netherlands	tel. 3017235
Chile	tel. 30932	Norway	tel. 706600
Finland	tel. 3011601	Panama	tel. 51296
Liberia	tel. 63060	Sweden	tel. 3017/235

REPAIRS: All types of repairs possible.

DRY DOCKS: *Floating Docks.* No. 1, 1,500 tons; No. 2, 22,500 tons; No. 4, 6,000 tons; No. 9, 6,000 tons; No. 20, 1,700 tons.

Dry Docks: No. 5, 794 ft. long, 95 ft. wide; No. 6, 661 ft. long, 95 ft. wide; No. 7, 1,018 ft. long, 164 ft. wide; No. 8, 951 ft. long, 144 ft. wide. No. 8A, 1,395 ft. long, 292 ft. wide.

REPATRIATION: No restrictions. Can also be arranged in the locks of Kiel Canal by local Agents. Valid passports required.

AIRPORT: At Kiel, local flights to Hamburg. Nearest international airport at Hamburg, about 100 km. away.

TIME: GMT plus 1 hour. Summertime plus 2 hours.

HOLIDAYS: New Year's Day, Good Friday, Easter (2 days), Ascension Day, Whitsun (2 days), 17th June, Atonement Day, Christmas (2 days). Work can be arranged on above holidays except Good Friday and Christmas Eve.

POLICE/FIRE/AMBULANCE: Police, tel. 110, alternatively 51171; Ambulance, tel. 44112, alternatively 61036; Fire, tel. 112.

TELEPHONES: Installed on wharves and Oslo quay (ferries to Scandinavia). Public phones near quays.

SERVICES: All services available.

SHORE LEAVE: Allowed.

GENERAL: *Garbage/Sewage Removal:* Container for discharging of garbage must be taken. Barges for discharging of sewage/slops and bilge water are available.

DEVELOPMENTS: Ro-Ro facility to be built in the Eastern part of the port.

SHIPMASTER'S REPORT: 1980.

"KIEL PILOTS" can be contacted on VHF Channel 16 and Channel 14, 2 hours before arriving at Kiel Lighthouse, for a Pilot for Kiel Harbour.

For vessels intending to transit the canal, send a message at least 3 hours in advance to "FORDE LOTSE – KIEL" by radio giving ETA, draft, g.r.t. and destination. Any request to arrange a Pilot at the other end of the canal may also be included in the message.

The maximum air draft allowed in the canal is 40 m. (from water line to highest point of the ship).

AUTHORITY: Hafenkapitan, Hafenamt der Stadt Kiel and Hafen und Verkehrsbetriebe der Stadt Kiel, Bollhornkai I, P.O. Box 2367, D 2300 Kiel 1. *Tel:* 901 1073. *Telex:* 292511 HVBKI D.

Wasser-und Schiffahrtsamt Kiel-Holtenau, P.O.Box 8068, 2300 Kiel 17. *Tel:* (0431) 385-1. *Telex:* 02-92836.

AGENT: See "Hamburg".

KIEL CANAL: (See Plan)

For entrance from Baltic, refer to "Kiel".
For entrance from Elbe, refer to "Brunsbuttel".

DEEP SEA PILOTAGE: Baltic Pilots Kiel ("Uberseelotsen Ostsee Kiel-Holtenau e.V.") is the address for ships entering the Baltic Sea via Kiel-Canal or from ports of the Federal Republic of Germany which require a Deep Sea Pilot for the Baltic Sea

The Baltic Pilots Kiel have 48 members. All members carry the "Red Licence" of BPAC which is the only licence acknowledged by all Baltic Governments.

Baltic Pilots Kiel: Tel: 0431-36 28 58 (24 hours a day). 0431-3 68 68 (office hours). Cables: Balticpilots Kiel. Telex: 299 857 bwki d. Postal Address: Uberseelotsen Ostee e.V. Schleuseninsel 6 D-2300 Kiel 17.

Also see "General-Deep Sea Pilotage" before first port.

RADIO: Advise ETA at Elbe I Lightvessel (or Kiel Lighthouse). Confirm ETA 12 hours before arrival at Pilot Station.

VHF: Approaching from the Baltic Sea, Kiel Radio listens on Channel 16 VHF and will notify the Kiel Pilot.

GENERAL:
Additional information required prior to Kiel Canal transit: As a result of security regulations which became effective in 1978, the following regulations issued by the competent Authorities must be complied with when transiting the Kiel Canal.

Vessels which are potentially dangerous, which include pushing and towing units, carrying material listed in the special material list in bulk (see "Wilhelmshaven"), or after discharging mineral oil or petroleum products with a flash point below 35°C and still not gas free or inert, including Reactor vessels, must report as follows:

1. Coming from the North Sea or from a port within the River Elbe District.

24 hours before entering the River Elbe, in writing, at the latest after clearing the last port:

(a) to the Wasser-und Schiffahrtsamt (Cuxhaven),
Deichstrasse, 2190 Cuxhaven. Telex: 233154.

And additionally when transiting the Kiel Canal:

(b) to the Wasser-und Schiffahrtsamt Kiel-Holtenau,
Schleuseninsel, 2300 Kiel 17. Telex: 292836.

With the following information:

1. Name and Call Sign of vessel. Estimated arrival time at first reporting position (day, date, local time).
2. Nationality of vessel.
3. Overall length and draft of vessel.
4. Port of departure and destination port.
5. Details and quantity of cargo with particulars of the stated dangerous cargo according to the special material list.
6. If chemicals are carried, a declaration that the vessel is in possession of a certificate as required by the IMO code for Chemical Tankers as "New Ship".
7. A declaration of any known defect in the vessel or its cargo.
8. Name of the Owners of the vessel.

2. Coming from the Baltic Sea

24 hours before entering Kiel Bay, in writing, at the latest after clearing the last port:

To the Wasser-und Schiffahrtsamt Kiel-Holtenau,
Schleuseninsel, 2300 Kiel 17 – Telex 292836

giving the same information as required in 1. above for vessels entering the River Elbe.

3. Coming from a port within the Kiel Canal Range

Reports as per 1. and 2. have to be given.

To conform with the pilotage regulations for Kiel Bay and the River Elbe, the above mentioned vessels which are potentially dangerous are obliged to engage the services of a Pilot.

Further instructions are in force for above mentioned vessels when navigating within the River Elbe and Kiel Bay, as well as when transiting the Kiel Canal, or passing certain points. Pilots will advise the Masters of vessels of the relevant regulations and assist.

Potentially dangerous sea-going vessels of up to 300 g.r.t. and inland water-craft will be exempted from the requirement to take a Pilot if:

(a) they are fitted with an operational radar set ready for use in addition to VHF radio with Channels 12, 14, 15 and 22.

(b) the Master on board has made at least 6 voyages within the last 12 months through the pilotage district.

AUTHORITY: Wasser-und Schiffahrtsamt Kiel-Holtenau, Schleuse, 2300 Kiel 17. *Tel:* (0431) 385-1. *Telex:* 02-92836.

AGENT: See "Hamburg".

LUBECK (including Travemunde): 53.52 N. 10.40 E. (See Plan)

DOCUMENTS:

2 Crew Lists.
1 General Declaration for Arrival and Departure.
1 Health Declaration.
2 Cargo Manifests.
2 Stores Lists.
1 Ship's Particulars form.
Crew Manifest.
Bills of Lading.
Customs Declaration.
Derat Certificate.

PILOTAGE: Compulsory for vessels over 300 g.r.t. Pilot station situated at Travemunde, near foot of Nordermole. Pilots board vessels in anchorage area. International signals used by Pilots and by vessels requiring a Pilot. Contact by VHF Channel 13 and 20.

RESTRICTIONS: Channel from Lubeck "A" buoy to Stadthafen is well lit and navigable by vessels fitted with radar in all weathers.

Depths: from "A" buoy to Travemunde (Nordermole) 10.5 m.; from Nordermole to Siechenbucht, 10 m.; channel to NWK power station, 9.5 m.; channel to Stadthafen 9.5 m. The river Trave narrows from 130 m. at seaward end to 90 m. at Stadthafen.

MAX. SIZE: Dependent on berth depth and approaches. Vessels up to 15,000 d.w.t. can reach Stadthafen. Also see "Restrictions".

HEALTH: Radio Pratique possible. Pilot will ask Master to complete Health Declaration.

RADIO: Lubeck Radio, VHF Channel 27. Harbour Radio service used by Pilots, tugs, and other vessels.

TUGS: At Stadthafen vessels over 1,600 g.r.t. require 1 tug and vessels over 2,500 g.r.t. require 2 tugs.

BERTHING:
Travemunde: Passenger ferry harbour. North side river berths I and II, 7.5 m. depth; Kaiserbrucke, 100 m. length, 9.0 m. depth; Ostpreussenkai, 190 m. length, 7.0 m. depth; Priwall (South side), 180 m. length, 5 m. depth. 7 berths for Roll-on/Roll-off and passenger traffic each 140 m. – 220 m. length, 7 m. – 9.5 m. depth.

1 berth with railway connection. (Berth No. 6.)

Industriehafen: Depth alongside, 7.8 m.

N.W.K. Power Station: Depth alongside, 9.5 m.

Stadthafen: 27 km. from sea. Total length of quays 7.6 km. The harbour depth is 6 m. – 9.5 m.

Elbe Lubeck Canal: Navigable by barges up to 1,200 tons.

CRANES: 1 – 200 ton floating crane, 1 – 25 ton, 1 – 12 ton, also 3 ton cranes.

BRIDGE: Herrenbrucke is 56 m. wide and 22 m. above water level. Can be opened for vessels requiring higher clearance.

MEDICAL: All facilities available. Hospital near docks at Travemunde, and at Lubeck.

TANKERS: Two berths, length 150 m. Max. draft 8 m. and 8.5 m.

FRESH WATER: Available by barge at any location.

FUEL: Gas oil by barge, fuel at berth at Scandinavia Kai in Travemunde.

CONSULS: Denmark, Norway, Austria, Sweden, Iceland and Finland.

REPAIRS: Several shipyards available for deck and engine repairs.

DRY DOCKS: Floating docks for vessels up to 13,500 tons (45,000 tonnes d.w.t.).

SURVEYORS: Addresses of inspectors and classification society representatives can be obtained from the Chamber of Commerce and Industry at Breite Strasse 6 – 8, Lubeck.

Germanischer Lloyd, Schwartauer Allee 84a.

OPENING/CLOSING HATCHES: By crew.

REPATRIATION: All facilities available.

AIRPORT: Hamburg, 1.5 hours by bus or train.

TIME: GMT plus 1 hour.

HOLIDAYS: 1st January, Good Friday, Easter Sunday, Easter Monday, 1st May, Ascension Day, Whit Sunday, Whit Monday, 17th June, Atonement Day, Christmas Day, Boxing Day.

POLICE: Lubeck River Police, tel. 3 34 40; Travemunde River Police, tel. 74141.

BANKS: *Lubeck:* Commerzbank, Breite Strasse 52/54. Dresdner Bank, Breite Strasse 83/87. Handelsbank in Lubeck, Kohlmarkt 7 – 15. Deutsche Bank, Sandstrasse 11 – 15.

Lubeck-Travemunde: Commerzbank, Vorderreihe 50. Deutsche Bank, Vorderreihe 35. Handelsbank in Lubeck, Vorderreihe 62.

STORING: See "Prelims".

1. Vessels can be provisioned by lighters and lorries at all berths.
2. No limitation of time for provisioning.
3. Lorries can go right alongside vessels, provided the loading and unloading operations permit.
4. At virtually all berths (with exception of the Wood Pier at Lubeck-Travemunde) fork lifts can be used.
5. Customs procedure as in all German ports.
6. There is always the possibility of obtaining riggers.

TELEPHONES: Ship telephone connections at Ro/Ro berths.

SHORE LEAVE: Allowed.

AUTHORITY: Hafen und Seemannsamt, Hafenkapitan, (Port Captain), An der Untertrave 107, 2400 Lubeck 1. *Tel:* 0451 – 12 – 23600. *Telex:* 026893 Hllueb D.

AGENT: See "Hamburg".

NORDENHAM: 53.29 N. 08.29 E. (See also Bremen and Bremerhaven) (See Plan)

DOCUMENTS:

Cargo Papers & Ship's Certificates.
1 Stores List.
3 Crew Lists.
2 Personal Manifests.
Derat Certificate.

DEEP SEA PILOTAGE: See "General" before first German port.

PILOTAGE: Pilot boards off the Weser Light Vessel. Docking Pilot will board off Bremerhaven.

ANCHORAGE: Sea anchorage off Weser Lightvessel or the Hoheweg Light for all types of vessels. River anchorage off Blexen, 1 mile above Bremerhaven for vessels up to 100 m. LOA.

RESTRICTIONS: No restriction except vessels with a length exceeding 260 m. and a draft of 38 ft. Vessels with a draft exceeding 30 ft. will be controlled by tidal conditions. Controlling depth in channel 11 m. MLW. In the port 9 m. to 12 m. at MLW (Midgard Pier).

MAX. SIZE: (The max. drafts are estimated).

Midgard Pier: (a) Bulk cargo berth, total length 1,068 ft., max. draft 42 ft. 08 in. (FW).

(b) Oil Berth No. 1 (combined with Southern part of 'a'), max. length 850 ft., beam 120 ft., draft 42 ft. 08 in.

(c) Oil Berth No. 2, max. draft 42 ft. 08 in. (FW).

(d) Granary, quay length 188 m., draft 38 ft. – 40 ft. (FW) weather permitting.

Midgard Terminal (Blexen): Max. length 820 ft. (250 m.) up to a draft of 38 ft. 06 in. (FW).

Guanowerk, max. length 550 ft., max. draft 30 ft. (FW) (approx.).

Preussag, max. length 550 ft., draft 27 ft.

Also see "Tankers".

HEALTH: Pratique granted immediately on arrival in port by Health Official.

RADIO: Norddeich Radio (DAN) or Elbe-Weser Radio (VHF Channel 16).
RADAR: No port radar available. Radar for entrance see "Bremerhaven".
TUGS: Ample available from Bremerhaven. Tug's lines used.
BERTHING: The following industrial works and companies within the port area of Nordenham possess a berth each for sea-going vessels which serve only their private supplies and requirements. These berths are situated North of Midgard Pier.

1. Norddeutsche Seekabelwerke Aktiengesellschaft, (production of cables).
2. Felten & Guilleaume Schatanlagen GmbH (production of electric appliances, motors, etc.).
3. Preussag Boliden. Length of quay 230 m., depth of water 32 ft. 10 in. (approx.) 2 cranes of 10 and 5 tons. Capacity 200 and 90 t.p.h. respectively. Storage capacity, 50,000 tons (coal or ore). 10,000 tons (metal blocks), 5,000 cu.m. (sulphuric acid).
4. Guano-Werke Aktiengesellschaft (s.a.) (phosphates and fertilisers). Length of quay 165 m. 1 gantry crane and 1 mechanical unloader for bulk cargo.
5. Erdolwerke Frisia Aktiengesellschaft (tanks for the storage of mineral oils).
6. MBB (production of airplanes).
7. Weser Tanklager Gesellschaft GmbH (storage of mineral oils, bunker oil station of BP).
   Connections: Gas oil 2×8 in., fuel 1×8 in.
8. Titangesellschaft GmbH (production of titandioxide).

SPECIAL CARGO HANDLING FACILITIES:
Midgard Pier:

No. 1. Bulk cargo berth for discharging and loading. Length of quay 710 m. Depth 12 m. Five bridges with a lifting capacity up to 22 tons. Max. outreach 27 m. Capacity: 30,000 tons ore per 24 hours. 25,000 tons of coal per 24 hours. Connections for mineral oil and molasses.

No. 2. Oil berth. Length of quay 170 m. Depth 9.5 m. Three pipelines 10 in. to 12 in. diameter for fuel oil, diesel oil and gas oil. No shore steam or facilities for dirty ballast available.

No. 3. Granary. Length of quay 188 m. Depth 12 m. Two elevators with a total discharge capacity of 700 t.p.h. Loading rate to vessels 300 t.p.h. Storage capacity of 46,000 tons.

No. 4. Midgard Terminal (Blexen): Length 210 m. Extra mooring dolphins North and South of wharf 50 m. from each end of wharf. Depth alongside 12.5 m. at MLW. 2 mechanical unloaders for discharge. Special storage facilities for bulk cargoes.

STEVEDORES: 24 hours' notice required. Notice required Friday morning for week-end work.
1st shift: 0600 – 1400 hrs.
2nd shift: 1400 – 2200 hrs.
3rd shift: 2200 – 0600 hrs. (overtime).
On Saturdays:
1st shift: 0600 – 1400 hrs.
2nd shift: 1400 – 2200 hrs. (overtime).
3rd shift: 2200 – 0600 hrs. (overtime).
On Sundays:
1st shift: 0600 – 1200 hrs. (overtime).
2nd shift: 1200 – 1800 hrs. (overtime).
3rd shift: 1800 – 2400 hrs. (overtime).
4th shift: 2400 – 0600 hrs. (overtime).

MEDICAL: Hospital available; advance notice only required if urgent cases.
TANKERS: Diameter of lines 8 in.
Shell Berth: Max. draft 34 ft.
Weser Tankerlager: Max. size 200 m., length 32 ft. draft at LW.
T-shaped mooring lines attached to pontoons fore and aft, middle lines are attached to the shore. Length of lines 100 m.
Also see "Special Cargo Handling Facilities".
DENSITY: Average density of water 1005 – 1012.
FRESH WATER: Fresh water available at a rate of 15 t.p.h. per hose price DM 5.40 per ton.
FUEL: All grades available; delivery by barge; 2 days' notice required.
FIRE PRECAUTIONS: Special regulations for vessels loading or discharging explosives.
CONSULS: See "Bremerhaven".
REPAIRS: Minor repairs can be carried out. Ample facilities for major repairs at Bremerhaven.
DRY DOCKS/SURVEYORS: See "Bremerhaven" or "Bremen".
WATCHMEN: Not necessary but available if required by Master.
OPENING/CLOSING HATCHES: Normally by crew but if by stevedores extra charges will apply.
CUSTOMS ALLOWANCES: Each crew member 200 cigarettes or 30 cigars or 30 grammes of tobacco and 1 bottle of spirits for a running period of 3 days.
CARGO GEAR: In most cases loading and discharging is effected with shore gear. Special equipment can be ordered from Bremerhaven.
REPATRIATION: Possible by air via Bremen or Hamburg.
AIRPORT: Bremen, distance 70 km., 1 hour by car. Hamburg, 200 km., 3 hours by car.
POLICE/AMBULANCE/FIRE: Police 110; Ambulance 2052; Fire 112.
TELEPHONES: Available on request.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Not issued.
REGULATIONS: Port regulations for the Midgard Pier including special regulations for handling of explosives.
DELAYS: None except waiting for high tide (see "Restrictions").
AUTHORITY: "Midgard" DSAG, Midgardstr. 50, D-2890 Nordenham. *Tel:* 4731/810. *Telex:* 238317. *FAX:* 88564. *Cables:* Midgard Nordenham. *Contact:* Mr. Werner, Board Member. Mr. Gocht, Pier Inspector.
AGENT: See "Bremen".

PAPENBURG: 53.06 N. 07.23 E. (See Plan)

LOCATION: Papenburg is 20 nautical miles above Emden on the Ems seaway at km. 0.0 and on the inland waterway Dortmund – Ems canal at km. 225.82.
PILOTAGE: The Sea Pilot is taken on board from the pilot cutter at Westerems and the district and Port Pilot at the Emden Pilot Station. All vessels over 1,000 g.r.t. (sea-going), and all oil, gas and chemical tankers require a Pilot.
RESTRICTIONS: *Lock operating times:* From 1st March to 30th September, Monday to Saturday, from 0600 to 2000 hrs.

From 1st October to 28th February, Monday to Saturday, from 0700 to 1800 hrs.

Lockings outside operating times, and on Sundays and Holidays must be promptly reported, at the latest half an hour prior to normal lock operating times, by telephone 04961/2640 or via VHF Channel 13.

Also see "Bridges".
MAX. SIZE: Vessels with a max. draft of 4.8 m. can reach the port during MHWST. Vessels with a greater draft must discharge at Leerort.
VHF: Communications with the bridges and lock-keeper are on Channel 13.
BERTHING: The port is connected to the Ems by a lock 40 m. wide and 152 m. long. The port has a foreport (300 m. long and 80 m. wide), the sluice canal (1,900 m. long and 65 – 90 m. wide), the Southern Industrial Port (500 m. long and 100 m. wide), the Dever Port (450 m. long and 80 m. wide), the railway dock (300 m. long and 50 m. wide), the Werft Port 200 m. long and 100 m. wide), the Turm Canal (300 m. long and 35 m. – 60 m. wide, which can be reached through a 17.6 m. wide railway bridge), and the yacht marina. Depths vary from 3.5 m. to 6 m.

Of the 3,700 m. of the Spundwand Quay, 2,500 m. are devoted to cargo handling.1,200 m. of this is provided with railway lines. The total length of the port railway facility is 6,700 m. 40,000 cu.m. of open free storage space can be used for bulk cargo accommodation. Further open and covered storage areas, together with silo facilities, for approx. 11,000 tonnes cargo are available through companies operating within the port.
CRANES: In the port area there are 2 heavy lift cranes up to 120 tons (a total 230 ton capacity), 1 heavy lift crane 140 tons, 1 heavy lift crane 50 tons, 7 jib cranes 3 – 15 tons, 1 gantry crane 6 tons with a 52 m. long traverse, 1 crane 6.5 tons, 1 crane 5 tons, 2 cranes 1 ton, 2 mobile cranes 11 tons and 40 tons, 1 floating crane 6 tons, 1 mobile conveyor belt 100 t.p.h., 2 grain handlers 30 t.p.h. and 40 t.p.h.
BRIDGES: At Ems km15.02 the Leerort road rotary bridge has to be passed; West opening 29 m. and East opening 31 m. passage width. Opening times from sunrise to sunset and after prior report by telephone 0491/2992 and VHF Channel 13.

At Ems km6.9, the railway folding bridge has to be passed (Weener). The passage width is 24 m. Opening times are as per the current traffic plan. The bridge is manned daily, also Sundays and holidays, from 0400 to 2200 hrs. Telephone 04951/2065 and VHF Channel 13.

Both bridges have a passage height when closed of 3.50 m. at MHWST.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Vessels up to 30,000 tons, length 250 m. and width 35 m. can be repaired at the local shipyards.
DRY DOCKS: A drydock of 250 m. length and 36 m. width is available.
POLICE/AMBULANCE/FIRE: Water Police Tel: 04961/4144 or 04961/2634 (After hours).
DEVELOPMENTS: The port installations are currently being extended by the Industry Port – North which will be approximately 1,000 m. long (300 m. finished) and 100 m. wide.
AUTHORITY: Hafenamt Papenburg-Ems, P.O.Box 14 40, 2990 Papenburg 1, West Germany. *Tel:* 04961 821.

Hafenamt Papenburg, An der Seeschleuse, 2990 Papenburg 1, West Germany. *Tel:* 04961/2640. *Contact:* W. Hermanns, Harbour Master. (A.O.H. *Tel:* 04961-3169).

STADERSAND: 53.37 N. 09.32 E.

Oil Terminal in Elbe River operated by PreussenElektra Aktiengesellschaft.
DOCUMENTS:
3 Crew Lists.
2 Personal Effects Lists.
1 Stores List.
1 Tobacco List.
Cargo Documents.
Ship's Register.
DEEP SEA PILOTAGE: See "General" before first German port.
PILOTAGE: See "General" before first German Port.
RESTRICTIONS: Draft calculated by adding 31 ft. to height of tide and allowing 3 ft. underkeel clearance.
MAX. SIZE: Max. LOA 230 m. Max. beam 32 m. Max. draft (M.H.W.) 11.50 m. Max. size 60,000 d.w.t.
HEALTH: Health Certificate brought on board by River Pilot for Master to complete.
RADIO: All messages to Agents, etc., through Norddeich Radio, call sign DAN. Closer to port Elbe-Weser Radio can be contacted by VHF Channel 16.

Ships' reporting station is on permanent duty at Stadersand, VHF Channel 11, safety and calling Channel 16.
RADAR: River Radar Service from Elbe 1 to Hamburg see "General" before first German Port, but no special Port Radar Service for Stadersand. Radar Service in the area of Stadersand available, can be contacted through VHF Channel 21, "Hetlingen Radar Radio".
TUGS: Available. Meets vessel off the berth.

BERTHING: 1 tanker berth at T-head jetty. 1 pipe-line × 300 mm. diameter, 2 hoses × 200 mm. diameter, permissible pressure 12 bars. Max. discharge rate 1,200 t.p.h.
DENSITY: Brackish.
FRESH WATER: Only obtainable by barge from Hamburg. Minimum quantity supplied is 200 tons.
FUEL: Only obtainable by barge.
CUSTOMS ALLOWANCES: 100 cigarettes and 1 bottle wine/spirits per man.
CONSULS AND GENERAL INFORMATION: Refer to "Hamburg".
AUTHORITY: *Operator:* PreussenElektra Aktiengesellschaft, Tanklager Stadersand, P.O.Box 1780, 2160 Stade. *Tel:* 04141/15–1 and 15–460. *Telex:* 218140. *Cables:* Fiatlux Stade.

WILHELMSHAVEN: 53.31 N. 08.10 E. (See Plan)

DOCUMENTS: Tanker check list with statement of vessel's deficiencies to be provided and delivered to the Sea Pilot before commencing pilotage.

Oil Port	2 Crew Lists. 1 Health Declaration (Form supplied by Pilot). Derat Exemption Certificate. Passports/Seamen's Books. Vaccination List. Tanker Check List
Harbour Docks	2 Crew Lists. 1 Health Declaration. 2 Cargo Manifests. 2 Stores Lists.

DEEP SEA PILOTAGE: See "General" before first German port.
PILOTAGE: There is a central pilot station near "Deutsche Bucht" Light vessel, where certain ships (see below) embark or disembark Jade, Weser and Elbe Pilots from/to helicopter or, weather permitting, boat. Jade (and Weser) Pilots are on board a 2-masted pilot vessel with yellow funnel with black top and white letters "LOTSE" (=Pilot) on black hull, flying the flag "H" of International Code.

Pilot vessel is usually stationed near unmanned "Weser" Light vessel.

To call Jade Pilot, following signals are to be used:
- By day: flag "1" below flag "G" of International Code;
- By night: the foregoing signals, given by morse lamp and/or whistle;
- In bad visibility signals by whistle;
- In all cases former VHF contact is recommended.

When pilot boat operations are impracticable due to bad weather, pilot vessels will move inward to a position between Weser lightbuoys 17-H/Reede and 19-H/Reede.

Inward bound vessels with draft exceeding 16 m. or with gross tonnage exceeding 60,000 g.r.t. may take the Harbour Pilot only seaward of Jade lightbuoys 28 and 31.

ETA required 12 hours prior arrival at pilot station at "Weser" Light vessel (unmanned) and 24 hours prior arrival pilot station at "Deutsche Bucht" Light vessel. Pilot vessel transmits and receives on VHF Channel 16.

Pilots for *Outward* bound vessels are to be ordered as follows:
1. At least 2 hours, prior to ETD.
2. For departures between 1900 hrs. and 0800 hrs. the Pilot has to be ordered by 1700 hrs.

Pilotage is compulsory as follows:
1. On navigation stretches inward of the respective outer position of pilot vessel, Wilhelmshaven Roads excluded for:
   (a) oil, gas and chemical tankers
   (b) other vessels exceeding 1,000 g.r.t.
2. On navigation stretches between pilot station at "Deutsche Bucht" Light vessel and the respective outer position of pilot vessel for:
   (a) oil, gas and chemical tankers exceeding 10,000 g.r.t.
   (b) other seagoing vessels exceeding 60,000 g.r.t.
3. On navigation stretches between the position of the pilot vessel shifted up the Weser due to bad weather and "Weser" Light vessel for:
   (a) Vessels exceeding 20,000 g.r.t.; oil, gas and chemical tankers excluded.
   (b) Car carriers and Ro-Ro vessels exceeding 10,000 g.r.t.
4. Federal Government vessels and Federal navy ships are exempted.

Ships up to 5,000 g.r.t. and tankers not exceeding 300 g.r.t. are exempted from compulsory pilotage if:
- the Master and his ship have performed 6 voyages on the river within the last 12 months;
- the ship is equipped with radar and VHF (including all river working Channels);
- the Master has sufficient knowledge of the German language.

The Waterway and Shipping Authority may exempt ships, tankers excluded, exceeding 5,000 g.r.t. from compulsory pilotage on application for 12 months if ;
- the Master and his ship have performed 36 voyages on the river within the last 12 months and
- the other foregoing requirements are fulfilled.

The same Authority may give exemption from compulsory pilotage only in special cases (e.g. distress situation etc.).

Vessels exempted from compulsory pilotage have to order shore based radar assistance at visibilities less than 3,000 m. from the radio station of the Wilhelmshaven Radar and Information Centre (Revierzentrale) when navigating the stretches between "Weser" Light vessel (unmanned) and Wilhelmshaven. This station is to be called "Jade-Radar" on VHF Channels 16/63/20.

Shore based radar assistance will be given:
- when the visibility is less than 3,000 m. between "Weser" Light vessel (unmanned) and Wilhelmshaven or;
- when the pilot vessel is moved up the River Weser due to bad weather or;
- when the lightbuoys are withdrawn during heavy ice drift periods or;
- when required by ship's command or;
- when made obligatory by instruction of Shipping Authority.

Vessels confined to the dredged channel due to their draft and/or exceeding 60,000 g.r.t. take 2 Sea Pilots at "Deutsche Bucht" Light vessel.

Helicopter pilot service is available for vessels above 50,000 g.r.t. at "Deutsche Bucht" Light vessel.

ANCHORAGE:
1. Deep water Roads for large tankers South of "Deutsche Bucht" Light vessel.
2. Roads for large and deep-draft vessels S.E. of unmanned "Weser" Light vessel.
3. Tanker Road Schillig for tankers not exceeding 250,000 d.w.t. and/or 13.5 m. draft.
4. Schillig Roads for all vessels – tankers exempted – not exceeding 13.5 m. draft.
5. Quarantine anchorage for vessels under quarantine. Max. draft 13.5 m.
6. Explosives anchorage for vessels carrying explosives or ammunition. Shifting of location is planned for 1987. Notices to Mariners to be observed.
7. Tanker Roads North, S.E. of Lightbuoy 40 for tankers which are loaded or waiting for loading berth. A safety distance of at least 300 m. between vessels at anchor has to be maintained. Max. draft 13.5 m.
8. Tanker Roads South, South of Lightbuoy 48/A1/Reede 2 for tankers being unloaded and not yet gas free and not exceeding 280 m. length. Max. draft 13.5 m. When anchored vessels are turning with the tide, measures like tug assistance against covering the Arngast light sector or drifting to the West side of the fairway to diminish time and circle of turning.
9. Wilhelmshaven Roads, usually for smaller vessels waiting for sea lock passage.
10. Road for small vessels up to 20 m. in length.
11. Actual sounding plans are to be observed because changes of depths are possible.

Transhipment of goods according to IMDG Code Nos. 1 (explosives), 2 (gases) and 3 (inflammable liquids) is prohibited on the Jade including Roads.

Request for bunkering permit is to be addressed to "Wasser- und Schiffahrtsamt Wilhelmshaven" via radio station "Jade-Revier-Radio" on Channel 16/68/20 VHF.

RESTRICTIONS: No restrictions on night entry. Unless notified by waterway and shipping authority. Vessels draft exceeding 55 ft., will be controlled by tidal conditions and vessels navigate according to specified schedule.

Also see "General".

Traffic Safety Measures for Large Vessels:

Vessels with draft exceeding 17 m. will be guided by police vessels showing quick flashing blue light when navigating the Precautionary Area between lightbuoys DB 18/Jade and DB 19/Jade. All other vessels are requested to give way to these vessels restricted by their draft.

During the navigation of vessels exceeding 200 m. in length in the Precautionary Area, the radio station "Deutsche Bucht-Revier-Radio" transmits navigational warnings every 15 minutes on VHF Channel 80 in German and English language. Warnings will be announced on VHF Channel 16.

Obligatory ships reporting system scheme in operation. See "Notices to Mariners", "Sailing Directions" and "Admiralty List of Radio Signals" part 6 and 6A.

Shipping Regulations and Restrictions:

1. Vessels, including those being towed or pushed, carrying dangerous goods in accordance with the Annex No. 1 (list of substances – see Annex No. 1 before "Authority") to the traffic regulations for waterways navigable by seagoing vessels in the Federal Republic of Germany or being not de-gassed or not inerted and vessels with nuclear propulsion must report 24 hours before navigating the Jade, however not later than departure from last port of call, to "Wasser- und Schiffahrtsamt" Wilhelmshaven.

Report must contain following statements:
(a) Name and call sign of vessel.
(b) ETA at lightbuoy "TW 9" or "3" (Jade).
(c) Nationality.
(d) Length and draft.
(e) Last port of call and destination.
(f) Type, quantity and IMDG Code No. (see Annex I).
(g) When carrying chemicals or liquefied gases, indication whether a valid certificate according to IMO Code for chemical tankers or gas tankers is existing on board.
(h) Declaration about deficiencies of ship or cargo.
(i) Ship's owner or authorised Agent.

This report must be given in written form to Wasser- und Schiffahrtsamt Wilhelmshaven.

Conditions, stipulations and restrictions for the navigation of:
(a) Tankers carrying cargoes in bulk according to Annex 1 (list of substances), i.e. gases, dangerous chemicals, mineral oil and mineral oil products;
(b) empty tankers after discharging of mineral oil or mineral oil products, if the flash point of the last cargo was below 35° C, remaining slop excluded, whose tanks are not cleaned, gas freed or inerted;
(c) empty tankers of above named type, if the flash point of the last cargo was above 35° C., and before that a cargo with a lower flash point was carried, whose tanks are not cleaned, gas freed or inerted;

(d) Nuclear powered vessels:
1. Visibility must exceed 1,000 m.
2. Continuous radio contact with radio station "Jade Revier Radio" on VHF Channels 16/63/20 must be made safe, also when communicating with other stations;
3. A faultless working radar device has to be in operation and must be under permanent observation by an experienced person at reduced visibilities;
4. Use of automatic steering gear is only allowed under conditions published by Waterway and Shipping Authority;
5. Tank covers must be kept closed.
Exception: No. 1 applies to vessels up to a cargo capacity of 2,000 tons (metric) at visibilities exceeding 500 m., if they carry or have carried mineral oil or mineral oil products with a flash point above 35° C. after the last tank cleaning or gas freeing, providing that they are equipped with a gyro compass or a tested magnetic compass.
6. Further prohibitions and restrictions:
(1.) At least one VHF device must be operable from wheelhouse.
(2.) Tankers exceeding 12,000 d.w.t. which carry substances as per No. 1 of Annex 1 (list of substances) – i.e. gases, ethylene, dichloride or vinyl chloride monomer may not navigate on the Jade;
(2.1) These vessels must comply with following additional stipulations:
a) existing or valid IMO Code Certificate on board – if carrying liquid gases according IMO Resolution 328-IX or 329-IX, – if carrying chemicals according IMO Resolution A 212-VII.
b) A faultless working gyro compass to be kept in operation.
c) At wind forces which do not allow safe manoeuvring navigation on the Jade is not permitted, this does not apply for passage to next admitted roads.

2. All vessels specified exceeding 50 m. in length have to report to radio station "Jade-Revier-Radio" on VHF Channel 16/63/20 when passing the following positions:
a) Light buoy 3,
b) Lighthouse Minsener Oog - breakwater A (Buhne A),
c) before entering and when leaving the waterway Jade inward Light buoy 3,
d) Light buoy 35/Hooksiel 1,
e) on arrival or departure from anchorage or jetty and when entering or leaving a harbour area.

Note: Various numbering changes of the Jade buoyage are to be expected in 1987 in the course of fairway straightening in the area of buoy 35/Hooksiel 1.

Reports must contain ship's name, position, speed and passing time.

Lock Restrictions:

The sea lock opening times for No. 4 dock are announced in daily maritime bulletins. Coastal radio station "Wilhelmshaven Lock Radio" working on Channel 13 VHF during official service hours.

Dimensions of lock: 390 m. long, 57 m. wide and depth of 11.47 m. MLW. However, only smaller vessels use dock harbour as bollards for mooring larger ships not yet available.

See "Annex No. 2" before "Authority".

MAX. SIZE: Max. size fixed for navigating the Jade:
(a) Draft, entering: 20 m. (65 ft. 07 in.)
leaving 19 m. (62 ft. 04 in.)
(b) Length: 350 m.
(c) Beam: 52 m.

Vessel exceeding these dimensions must apply for a permit of navigation to "Wasser- und Schiffahrtsamt Wilhelmshaven".

See "Annex No. 3" before "Authority".

Keel clearance of at least 8.5% (see "Annex No. 3") of draft required. Also see "Tankers".

HEALTH: Radio Pratique possible. Sea Pilot will hand Health Declaration to Master. If one of the questions is answered "Yes", Pilot will advise Port Health Officer. A valid Derat Exemption must be produced.

RADIO: Norddeich Radio, call sign DAN. Elbe-Weser Radio can be contacted by VHF Channel 16.

Radio advice prior to arrival: Advise Agent 7 days before arrival:
1. Ship's name and call sign, ETA in GMT.
2. Nationality.
3. Draft forward and aft.
4. Cargo on board and slop information.
*5. Number and diameter of cargo manifold connections.
6. Discharge rate per hour.
7. Loading rate per hour.
8. Quantity of ballast on board.
9. Ballasting rate per hour.
*10. Leaks in the hull or overboard valves, if any.
*11. Inert or non inert gas report.
*12. Request for crude wash.
*13. Request for repairs.
14. Valid oil liability certificate.
15. Heli-landing/winching area.
16. VHF Channel 20 in good working order.
*Details must be with Agent at least 48 hours before arrival.

ETA to be confirmed 72 hours before arrival, and whenever ETA changed by more than 30 minutes.

Notify Agents of tug requirements.

RADAR: *Jade Radar, Wilhelmshaven Radar and Information Centre (Revierzentrale Wilhelmshaven):*

Jade Radar Chain extends from lightbuoy DB 19/Jade to lightbuoy 56. Radar information and shore based radar assistance is available to all ships. The Wilhelmshaven Radar and Information Centre is continuously in service and to be called "Jade-Radar" concerning radar services or "Jade-Revier-Radio" in all other cases on VHF Channels 16/63/20. This area station performs radar control and observations and is executing traffic regulations and all other traffic affairs on the navigable waters of the Jade. Information about traffic movements, dredging activities, disturbances, tidal and weather conditions will be given on request and is transmitted as situation report every even hour (H + 15 m.) in German language on VHF Channel 63/20. The orders issued by this station are to be observed.

TUGS: Compulsory. Tankers normally require at least 4 tugs of minimum 1,500 h.p. for berthing. Tugs meet tankers at anchorage near Buoy "43". Only tug lines are used, charge inclusive. Tugs join vessels at Buoy "35" when proceeding to Mobil Oil Terminal.

VLCCs meet the tugs at Buoy "33" (Mobil Oil) or at Buoy "39", when they are bound for NWO.

BERTHING: *Wilhelmshaven Dock Harbour:*

The following dock harbours can be reached:

Harbour Name	*Max. draft*		*Quay length*
Handelshafen	16 ft. 05 in.		600 m.
Grosser Hafen	20 ft. – 26 ft.	Bontekai about	500 m.
Verbindungshafen	18 ft.	Sudwestkai about	200 m.
Nordhafen			
Hannoverkai	38 ft. (11.6 m.)		312 m.
Luneburgkai	26 ft. (7.9 m.)		205 m.
Lay-up Berth (Dolphins)	41 ft. (12.5 m.)		350 m.
Ausrustungshaven			
Schleusenhaupt			
Ehem. 3 Einfahrt (Lay-up berth)	19 ft.		140 m.

SPECIAL CARGO HANDLING FACILITIES: There is no Container or Roll-on/Roll-off-traffic at Wilhelmshaven.

BULK HANDLING FACILITIES: Figdor is the operator of cargo handling in the Handelshafen with its connection to railway, road and canal-system.

Equipment: Two modern gantry cranes of 8 – 15 tons and efficient mobile cranes. Storage facilities for bulk cargo to an amount of 70,000 tons, 1 silo with a capacity of 720 cu.m. and 2,000 sq.m. storage sheds for bulk and general cargo.

Also see "Tankers" – Niedersachsenbrucke.

CRANES: Bontekai and Sudwestkai without shore cranes, but mobile cranes available. One floating crane for heavy lifts up to 100 tons is also available.

Lueneburgkai has 1 portal crane with capacity 15 tons – 18 tons.

TANKERS: *Nord-West Oelleitung Terminal:* Position Lat. 53° 33′ N., Long. 08° 08′ E. Distance from "Weser" Light vessel, 24 miles. Type of Berth, Finger Pier "T" head. Density 1025. Current velocity, 3-4 knots. Mean tidal range, 12 ft. 08 in. Nature of bottom, sand and mud. Vessels may berth and unberth day or night. Vessels exceeding 55 ft. draft enter only on rising tide. Fresh water available, Diesel and Fuel "C" available. When discharging, full capacity of ship's pumps required. Normal residues and sediments are acceptable without any water. Shore gangway available. Vessels berth port or starboard side alongside.

No limit on length or beam. Max. draft, Berth No. 1 and No. 2 – 52 ft. 06 in. and Berth No. 4 – 65 ft. 04 in.

Berth Number	*Grades Handled*	*Pipe-lines No/Dia.* (in.)	*Length* (ft.)	*Load – Discharge Rate* (t.p.h.)	*Maximum Pressure* (lbs.)	*Hoses* (in.)
No. 1	Crude Oil	1×30	4920	8000	220	4×12
No. 2	Crude Oil	1×30	4595	8000	220	4×12
No. 4	Crude Oil	1×40	5500	12800	375	4×16
No. 1	Fuel Oil	2×6 (hoses)	5920	250/500	110	1× 6
No. 2	Fuel Oil	2×6 (hoses)	5575	250/500	110	1× 6
No. 4	Fuel Oil	2×10 (hoses)	—	14,000 (discharge)	110	various

Use of berths is only allowed for transhipment of inflammable liquids of subclasses 3.1, 3.2 and 3.3 with low (< −18° C), medium (−18° to +22.9° C) and high (+23° to +61° C) flash point.

Mobil Oil Terminal: Mobil Oil Terminal is closed, re-opening uncertain.

Latest soundings are showing suspicious differences between present and charted depth.

Berth Nos. 1 and 1A. Position Lat. 53° 37′ 28″ N., Long. 08° 08′ 30″ E. Distance from "Weser" Light vessel, 20 miles. Type of berth, Sea Island. Density, 1025. Current Velocity, 3-4 knots. Mean tidal range 10 ft. 6 in. Nature of bottom, sand and mud. Least depth of water from port entrance to berth, 18.5 m. (60 ft. 09 in.) at MLW. Vessels may berth or unberth day or night. Vessels exceeding 55 ft. draft enter only on rising tide. Fresh water available by barge. Fuel "C" and Diesel available. Dirty ballast facilities available, capacity 29,000 cu.m. seawater, 17,900 cu.m. fresh/brackish water, discharge rate 2,400 cu.m./hr. Vessels berth port or starboard side alongside. All ballast, including clean ballast, to be discharged ashore.

Shore gangway available. An under keel clearance of 1 m. is required at Berth No. 1A at MLW.

Berth No. 1. Max. LOA, 1,150 ft. Min. length, 800 ft. Max. draft, 65 ft. Depth at MLW 68 ft. 11 in.

Berth No. 1A. Max. LOA, 650 ft. Min. length, 500 ft. Max. draft at HW, 48 ft. 2 in. Depth at MLW, 41 ft.

Berth Number	*Grades Handled*	*Pipe-lines No/Dia.* (in.)	*Length* (m.)	*Load – Discharge Rate* (cu.m./h.)	*Hoses* (in.)
No. 1	Crude Oil	1×44	5000	17500	4×16
	Heavy Fuel Oil	1×30	3000	3200	2×16
No. 1A	Heavy Fuel Oil	1×30	3000	3200	3×12
	Light Fuel Oil	1×20	3000	3200	2×12
	Gasoline	1×12	3000	950	1×10

Use of Island Jetty (berth 1/1A) is only allowed for transhipment of inflammable liquids of subclasses 3.1 and 3.3 with low (less than −18°C) and high (+23° to +61°C) flash point.

Berth Nos. 2 and 3. (Also see "Shipmaster's Report").Position Lat. 53° 37′ 12″ N., Long. 08° 07′ 36″ E. Distance from Weser large sea buoy, 20 miles. Type of berth, "L"-head jetty. Density, 1025. Current velocity, 3 – 4 knots. Mean tidal range, 10 ft. 6 in. Nature of bottom, sand and mud. Least depth of water from port entrance to berth 7.5 m. (24 ft. 7 in.) at MLW. Vessels may berth or unberth day or night. Vessels up to 21 ft. 4 in. may berth and unberth any time. Fresh water by barge. Diesel and Fuel "C" available. Dirty ballast facilities same as Berth Nos. 1 and 1A. Max. deballasting rates, Berth No. 2, 2×10 in. 1,800 cu.m./hr. Berth No. 3, 2×8 in. 500 cu.m./hr.

All ballast, including clean ballast, to be discharged ashore. Min. distance ship's side to manifold, 1.5 m. If reducer required to match shore flanges, at least 1.8 m. Shore gangway available. A keel clearance of 1 m. is required at MLW until silting developments after dredging can be firmly assessed. Vessels berth port or starboard side alongside.

Max. LOA, 400 ft., min. LOA, 263 ft. will be reduced to 180 ft. Beam, no limit. Max. draft, 31 ft. 8 in. (at HW). Depth of water at MLW 24 ft. 7 in.

Berth Number	*Grades Handled*	*Pipe-lines No/Dia* (in.)	*Length* (m.)	*Load – Discharge Rate* (cu.m./h.)	*Hoses* (in.)
No. 2	Heavy Fuel Oil	1×20	2000	2600	2×10
	Light Heating Oil	1×20	2000	2400	2×10
No. 3	Heavy Fuel Oil	1×16	2000	475	1× 8
	Light Heating Oil	1×20	2000	550	1× 8
	Gasoil	1×10	2000	550	1× 8
	Gasoline	1×12/1×10	2000	950/550	2×10/8
	LPG	1×8	2000	400	1× 6

Use of berth No. 2 is only allowed for transhipment of inflammable liquids of class 3 with flash point < −18° to +61°C.

Use of berth No. 3 is only allowed for transhipment gases (class 2) and inflammable liquids of subclasses 3.1, 3.2 and 3.3 —flash point see above under Nord-West Oelleitung Terminal).

Voslapper Groden Jetty (ICI-Jetty):

Position: Lat. 53° 37′ 59″ N., Long. 08° 05′ 46″ E.

Traffic Bridge of 1,346 m. length ends in L-shaped cargo handling pier of 675 m. length. Traffic bridge is fitted with two tracks of 5.5 m. and 3.5 m. width, all cables and pipes are led lengthwise upon the bridge to the pier connections.

Berth No. 1 at the seaward end is provided for 1 tanker of 20,000 d.w.t. – 60,000 d.w.t., but not yet in operation. Berths No. 2 and 3 (inner side) are provided for tankers of 400 d.w.t. – 12,000 d.w.t., limited by a maximum depth of 8.5 m. at MLW.

Use of Berth No. 2 is only allowed for transhipment of ethylene (class 2, UN No. 1038).

Use of Berth No. 3 is only allowed for transhipment of vinyl chloride monomer (class 2, UN No. 1068) and its residue LE and HE or ethylene dichloride (subclass 3.2, UN No. 1184).

Under following conditions Berths No. 2 and 3 can be used by ships from 7,000 - 12,000 d.w.t.:

ship's length not more than 130 m.

single tank size of ship:

a.) with Ethylene dichloride cargo not more than 3,100 cu. m.

b.) with vinyl chloride monomer cargo and ethylene not more than 2,900 cu. m.

Ships of more than 120 m. length must be berthed with 1 additional Atlas-spring line fore and aft. The lines are available from shore, if the ship does not have her own.

Berths may only be used by gas and chemical tankers which conform with IMO recommendations and which have a valid certificate to that effect as follows:

1. Resolution A 328 (IX) Code for the Construction and Equipment of Ships carrying liquefied Gases in Bulk,
2. Resolution A 329 (IX) Recommendations concerning Ships not covered by the Resolution 328 (IX),
3. Resolution A 212 (VII) Code for the Construction and Equipment of Ships carrying dangerous chemicals in Bulk.

All stores, fresh water exempted, must be taken onboard from seaward side. These activities are prohibited during cargo handling or taking ballast.

Also see under "General".

Harbour areas (NWO, Mobil Oil and ICI) may be exceptionally navigated by auxiliary and supply vessels if this is absolutely necessary for the transhipment or ship operations according to Port Regulations, providing these vessels comply with the safety requirements. All other vessels are excluded.

Niedersachsenbrucke: (Lower Saxony Bridge) The "Niedersachsen Bridge" which belongs to the state of Lower Saxony is equipped with a fuel oil discharge unit for supplying a large nearby plant. The land-side berth of the loading pontoon running parallel to the Ufer has about 12 m. depth, so that loaded tankers up to a size of 35,000 d.w.t. can come alongside this pontoon. Furthermore, on this pontoon a loading installation for caustic soda is available. A bulk discharger unit with a hourly capacity of 1,200 tons serves coal to a large nearby plant. Vessels of 80,000 d.w.t. and a draft up to 15 m. can be accommodated. Vessels up to a maximum deadweight tonnage (approx. 135,000 tons) must apply for a special permit to be issued by Port Authority.

Drinking water in adequate quantities is available at all shipment pontoons in the Jade.

Bunker and diesel oil is available in adequate quantities from Nord-West Ollleitung. At the "Niedersachsen Bridge" it is necessary to order a bunker vessel in advance.

Also see "Developments".

Report: *Berth Approaches:* The main affect on ships approaching the berth results from the flood or ebb current setting South or North parallel to the berth. Only ships up to 42 ft. draft will be handled at LW. All other ships will be handled at peak HW. It is of extreme importance that a ship which has to turn before berthing reduces speed in ample time and does not commence turning until its speed over the ground is reduced to zero. Ships scheduled to berth port side to NWO Berth No. 4 should start the turning manoeuvre in the fairway about 800 m. North of the berth.

NWO-Terminal (Nordwest-Olleitung): Cautionary Advice: Due to the strong current at the berths of up to 4 knots, extreme care should always be taken to keep the ship moored safely alongside the berth with all mooring lines tight. Especially during off-setting strong winds and with the tide changing, the moorings must be watched carefully.

Berthing Procedures: Berth No. 1: The ship may be berthed with port or starboard side alongside depending on the direction of the current. The ship is always moored with the head into the current. Max. draft ships will be moored only during nearly slack water at high tide. If necessary, the ships will be turned off the jetty.

Berth No. 2: Same procedure is followed as at Berth No. 1.

Berth No. 3: Ships over 30,000 d.w.t. will be berthed only at flood tide. For these ships, the starboard side will always be shore side. If necessary, the ships will be turned S.E. of the jetty.

Berth No. 4: All max. sized ships planned for this berth will run on a time schedule without anchoring from Weser Light vessel to the berth. Ships are normally scheduled to arrive at the turning position about 800 m. North of the berth some minutes before HW, then turned and backed up to the berth mooring port side to. It is emphasised that the ship should be stopped over the ground before commencing the turn and ships must not be turned off the berth itself. If the ship is behind schedule and the ebb current has started to run, the ship will then berth without turning and moor starboard side to.

Berthing Speeds/Angles: On Berth Nos. 1, 2 and 3, the max. berthing speed for 100,000/140,000 d.w.t. tankers is 15.0 cm./sec.

On Berth No. 4, the max. berthing speed for a 250,000 d.w.t. tanker is 12.5 cm./sec. The bending way of the dolphins is recorded on a chart. Signal lamps on the pier indicate, during berthing approach, speed of the vessel as follows:

red for 8cm/sec.,
yellow for 6 cm./sec.,
green for 4 cm./sec.

The angle of approach should be as small as possible.

DENSITY: Brackish water.

BRIDGES: 3 swing bridges affect entering dock harbour; these are opened to coincide with lock opening times.

STEVEDORES: 24 hours' notice required. Bulk cargo discharge rate about 150 t.p.h.

MEDICAL: All medical facilities available.

FRESH WATER: Available by pipe-line.

FUEL: All grades available. 2 days' notice required.

REPAIRS: Jadewerft Wilhelmshaven Dockyard (Handelshafen) for small repairs and a floating dock with a capacity of 1,100 tons.

GANGWAY/DECK WATCHMEN: Shore watchman recommended to attend telephone.

OPENING/CLOSING HATCHES: Usually by ship's crew.

CUSTOMS ALLOWANCES: Oil port is Customs free port. In dock harbour each man allowed 5 cigars or 40 cigarettes, or 50 grams tobacco and 50 pieces of cigarette paper; 1 unopened bottle wine/spirits.

IDENTIFICATION CARDS: Required in oil port.

CONSULS: Denmark Tel: 41061. Sweden Tel: 26266. Finland Tel: 8021.

REPAIRS: Facilities available for all deck and engine repairs. Repairs affecting main engine or steering gear intended to be carried out at the berths or at Wilhelmshaven Anchorage, must be authorised by NWO, Mobil Oil A.G. and Port Authorities, when sufficient security tugs will be ordered to stand by. No additional charge for tugs if ordered before arrival. Permission for repairs depends on prevailing weather conditions and should be requested before arrival.

DRY DOCKS: Floating docks for vessels of 8,000 and 1,000 tons respectively. 1 small dry dock 50 m. by 10 m. by 2.8 m.

REPATRIATION: All facilities available.

AIRPORT: Local airport at Wilhelmshaven-Mariensiel, available for helicopters and small aircrafts. Nearest international airport at Bremen, distance 102 km.

TIME: GMT plus 1 hour. GMT plus 2 hours from last Sunday in March until last Sunday in September.

HOLIDAYS: 1st January; Good Friday; Easter Sunday; Easter Monday; 1st May; Ascension Day; Whit Sunday; Whit Monday; 17th June; Atonement Day; Christmas Day; Boxing Day. Work may be arranged on Easter Monday, Ascension Day, Whit Monday and Boxing Day.

Not observed in oil ports.

POLICE/AMBULANCE/FIRE:

Police: Tel: 110.
NWO Oil Port: Fire/Ambulance Tel: 621.
ICI: Jetty Operator Tel: 882 460.
Fire/Ambulance Tel: 882 310.
Niedersachsen Bridge: Fire/Ambulance Tel: 50308 or 26121.
Dock Harbour: Tel: 112 or 26121.

TELEPHONES: May be placed on board all tankers in oil port. At some locations in dock harbour, installation by Post Office, who require 2 days' notice.

SERVICES: All services available including tank-cleaning, diving, compass adjusting, etc.

SHORE LEAVE: Allowed.

GENERAL: *Federal Republic of Germany. Jade. Measures to direct traffic during the passage of LPG:* On the River Jade from the sea to Wilhelmshaven all vessels are to observe, with effect from February 19th, 1981, the following regulations during the passage of LPG and chemical tankers.

Prohibition of head-on passage and overtaking; navigation distances, right of way:

1. Absolute prohibition of head-on passage for vessels confined to the dredged channel with each other.
2. Local prohibition of head-on passage for vessels amongst themselves with
   a) draft exceeding 13.5 m.,
   b) length exceeding 250 m.,
   c) extraordinary pushing and towing units
   within following fairway areas:
   - between buoy pairs 17/14 and 21/18 (circumnavigation Minsener Oog)
   - course change areas at buoy pairs 5/2a (channel entrance) 35-Hooksiel 1/34, 39/38 and 43/42.
3. Vessels confined to the dredged channel may navigate with the same tide phase only when keeping a longitudinal distance of 5 nautical miles amongst each other within the channel.
4. Prohibition of head-on passing and over-taking for tankers carrying cargoes as per No. 1 of Annex 1 (list of subtances) i.e. gases, ethylene dichloride or vinyl chloride monomer with each other and with all other vessels exceeding 3,000 d.w.t. within following navigation stretches:– between buoy pairs 1/2 and 7/4, 17/14 and 23/20, 33a/32 and 42/40.

4.1. Vessels confined to the dredged channel, i.e. constrained by their draft, have right of way on the above mentioned stretches.

5. The observance of these directions will be controlled and, if necessary, regulated by the above-mentioned VHF radio station, whose instructions are to be followed.

Urgent shipping police measures may also be executed by Water Police (operating with blue hulled vessels with inscription "WASSERSCHUTZPOLIZEI" within the Territorial waters of the Federal Republic of Germany).

6. Continuous radio contact with radio station "Jade Revier Radio" must be made
   - between buoy 3 or river entrance inward and buoy 35/Hooksiel 1 on VHF Channel 63;
   - between buoy 35/Hooksiel 1 and all waterway areas inward of this position on VHF Channel 20.
   Remark: Shore based radar assistance will be given on the respective VHF channels.
7. When vessels are meeting on reciprocal or nearly reciprocal courses each shall alter her course to starboard.
   During the passage of vessels carrying cargoes as per No. 1 of Annex 1 (list of substances) with each other or with other vessels the greatest possible lateral distance has to be kept.
8. Vessels proceeding within the fairway have right of way against vessels which
   a) enter the fairway,
   b) cross the fairway,
   c) turn within the fairway,
   d) leave their anchorages.
9. Particular attention is drawn to the observance of the obligation to the shipping authorities prescribed as per Section A, Part II, No. 3 of the additional regulations to the traffic regulations for waterways navigable by seagoing vessels in the Federal Republic of Germany of the Wasser- und Schiffahrtsdirektion Nordwest in the version of 7th July, 1985.

Regulations Within the Entrance to the Sea Lock – New Outer Harbour – (Neuer Vorhafen) and the Sea Lock in Wilhelmshaven (extract of rules):

1. Areas within the Outer Harbour and the Sea Lock belong to the safety zone of Naval Base.
2. Port Authority within these areas is the Naval Port Captain.
3. Traffic direction inward and outward Sea Locks is performed by Wasser- und Schiffahrtsamt Officials.
4. Use of port facilities may be restricted or refused in consequence of certain reasons if deemed necessary by Port Authorities.
5. Vessels with dangerous cargoes have to obtain special authorisation issued by Port Authorities and civil permission before entering.
6. Vessels exceeding 150 g.r.t. may be obliged to take a Harbour Pilot.
7. Vessels are obliged to give notice to the radio station "Wilhelmshaven-Lock" on VHF Channels 16/13 before entering. Naval radio station is operating on VHF Channels 16/11.
8. Lock signals and preliminary lock signals are to be observed. This applies also to signals given by Naval Authorities.
9. Military safety zones must be passed at reduced speed but without delays. Bow anchors must be kept ready to drop.
10. Sailing vessels may not hamper other vessels.
11. Only in cases of distress is it allowed to go alongside within the Outer Harbour.
12. Photographing, fishing, bathing, diving, use of pyrotechnics and operation of position-finding devices and ship's wireless station – exempt for navigational use – is not allowed.
13. Pollution of water within harbour areas is prohibited.

DEVELOPMENTS: *Liquid Gas Berth:* To the North of Mobil Oil A.G. The existing ICI Terminal (see "Tankers") is planned to be extended for transhipment of L.N.G.

"Lower Saxony Bridge" (Niedersachsen Bridge): The "Niedersachsen Bridge" is to be extended. It is planned to provide facilities for the loading and discharge of large vessels up to 250,000 d.w.t. with dry and liquid bulk cargoes.

Dredging: Maintenance dredging in progress.

ANNEX NO. 1:

(List of dangerous substances which have to be reported) Annex III to the traffic regulations for waterways navigable by seagoing vessels in the Federal Republic of Germany:

1. *Liquefied Gases*	*IMDG Code No.*

ANNEX NO. 2: *Data of Wilhelmshaven Sea Lock:*

Operation hours of Wilhelmshaven Sea Lock:

Monday-Friday	0600 – 1830 hrs.
Saturdays	0630 – 1600 hrs.
Sundays and holidays	0800 – 1600 hrs.

Beyond these hours the lock will be operated when service is ordered well in advance to the Lock Master.

VHF Channel 16/13 or Tel: 30 40 84/26 311) as follows:

Monday-Friday	0500 – 0600 hrs.
and	1830 – 2200 hrs.
Saturdays	0500 – 0630 hrs.
and	1600 – 2200 hrs.
Sundays and holidays	0600 – 0800 hrs.
and	1600 – 2000 hrs.

Dimensions of Wilhelmshaven Sea Lock:

Length between gates	390 m.
Length usable	360 m.
Breadth between lock-basin walls	60 m.
Breadth between fenders	57 m.
Depth (above mean high tide)	14.75 m.

(Vessels in ballast up to 250,000 d.w.t. have passed without difficulties.)

In case of doubt, German text of lock regulations is authoritative.

ANNEX NO. 3

Standard Form **Issued 1986**

Wasser- und Schiffahrtsamt
Wilhelmshaven Wilhelmshaven, the......... of 1986
3-31-332.3/4 /84

Official Permit of Navigation
No. /86

The Master of the tanker "........................." has been granted official permission to navigate the Jade shipping channel on the grounds of the application made by the Agency............................., dated the .... of .... 19...... and in accordance with the stipulations contained in §57 subparagraph 1, No. 1 of the National Maritime Shipping Routes regulations (Seeschiffahrtsstrassen-ordnung) of the 3.5.1971 (Federal Gazette Bulletin 1, page 641), amended by the sixth ordinance for the amendment of the national maritime Shipping Routes Regulation dated the 9.1.1985 (Federal Gazette Bulletin 1, pages 38-39). The transfer of this permit is forbidden unless authorised by the Waterway Authority (Wasser- und Schiffahrtsamt) Wilhelmshaven.

The validity of this permit expires on the .... of .... 19...... and applies to a single passage of the shipping channel in both directions. Such permission does not authorise the holder to encroach on or to prejudice the rights of third parties or to encroach on or to take into use objects being in possession of others neither does it supercede any necessary administrative measures in connection with any other lawful regulation or any agreements of a private and legal nature which may be, if occasion arises, concluded with the Government of the Federal Republic of Germany.

The above permit has been granted in accordance with the instructions laid down in the following documents:

(a) The application submitted by the Agency .... dated the........... of .... 19......
(b) The National Maritime Shipping Routes Regulation of the 3.5.71 (Federal Gazette Bulletin 1, page 641) in the version of the 16.3.1985 (FGB 1 pages 38-39).
(c) The proclamation of the Waterway and Shipping Directorate (Wasser- und Schiffahrtsdirektion Nordwest) in connection with the National Maritime Shipping Routes Regulation dated the 1.3.1983 in the version of the 4th of March 1985 (official gazette No. 49 of the 12th of March 1985).
(d) The common proclamation of the Waterway and Shipping Directorates Nord and Nordwest (Wasser- und Schiffahrtsdirektionen Nord und Nordwest) in the version of the 14th of February (official gazette No. 42 of the 1st of March 1985.)
(e) The International Regulations for Preventing Collisions at Sea 1972 (SeeStrO), (Federal Gazette Bulletin 1 1977, page 813) in the version of the 1.6.1983 (FGB 1 page 521-524).
(f) The Schedule of Costs of the Federal Maritime Authorities dated the 13.2.1985 (Federal Gazette Bulletin 1, pages 376-381.)
(g) The Pilot Ordinance Weser/Jade dated the 17th of December 1985 (official gazette No. 241 of the 31.12.1985) in force since 1st of January 1986.

This permit is issued subject to the following conditions and stipulations:

1. Shore based radar assistance has to be ordered well in time before commencement of river passage at the Wilhelmshaven Radar and Information Centre (Revierzentrale) via "Jade-Revier-Radio" (VHF Channel 16/20/63).
2. In case of a visibility of less than.............. the entrance into the Jade shipping channel or the departure from a berth or anchorage is not permitted.
3. In case of wind in gale force (Beaufort 8-9) or more, the commencement of river passage is not permitted.
4. The relative speed of 10 knots laid down in the tidal navigation schedule for the Jade up to the light-buoy "............." must be complied with, taking into account the maritime traffic in the channel.
5. Before commencement of the passage in the channel, tidal gauge must be obtained sufficiently well in advance to ensure that the tide will permit an underkeel clearance, expressed as percentage of the maximum draft of the ship during the passage until vessel is taken over by the tugs, as follows:
   (a) Inward bound:
   from sea to buoy No. 25: 10%
   from buoy No. 25 to jetties: 8.5%
   (b) Outward bound: 15%
6. Before commencement of the passage, it is essential to ensure that the complete propulsion and steering equipment as well as all other manoeuvre and anchor devices are capable to operate without any restrictions, even when subjected to the increased stresses resulting from extreme manoeuvring conditions. Should, for any reason whatsoever, the passage in the channel need to be interrupted, the immediate assistance of sufficient tugs must be requested in order to maintain the ship on its course in the shipping channel, or if necessary, to allow the ship to be turned within the channel, taking the draft into account.
7. The turning or mooring manoeuvre must be carried out with adequate assistance of tugs in the manner mandatory in the harbour of Wilhelmshaven. Up to fresh breeze (5 Beaufort) total pulling force of at least ....tons is necessary.
   With strong breeze (6–7 Beaufort) a pulling force of at least ....tons is necessary.
   When mooring at low tide (to be considered only at a draft less than 16 m.) the total pulling force has to be increased respectively at least for another ....tons additionally.
   The total pulling force must be distributed among at least 6 tugs.
8. The stipulations contained in the above paragraphs 1–7 apply also to the casting-off manoeuvre and to the subsequent return seaward passage. For the casting-off manoeuvre, depending on wind conditions and with agreement of the pilots, the number of tugs and total pulling force may be reduced, as long as the safe execution of the manoeuvres is ensured.

This permit is issued subject to the following stipulations and instructions.

The right to issue any future necessary additions, amendments or supplements to the above instructions, or the right to cancel the permit are reserved, should this be deemed necessary to ensure the safety and the easy flow of shipping traffic or the prevention of dangers caused by shipping operations.

This permit can be cancelled immediately when one of the above specified conditions and for stipulations is not observed.

Charges:

In connection with the issue of this permit and in accordance with the scale of charges (No. 2) of the Schedule of Costs of the Federal Maritime Authorities dated the 13.2.1985 (Federal Gazette Bulletin I, pages 376-381) finally amended 23rd December 1982 (FGB I page 2092)
a fee of ....DM
has been laid down.
In addition and in accordance with §2 (2)
of the above schedule, expenses of ....DM
The total sum due is ....DM

These charges should be made payable to account number 290 010 11 of the Bundeskasse Bremen with the Landeszentralbank Bremen, quoting the following cash remark "1203 – 111 01 WSA Wilhelmshaven", free of charge to the recipient, not later than the ....

Payments to any account other than that quoted will be disregarded.

Advice in respect of judicial right:

An appeal against this decree can be lodged with the local maritime authorities, Wasser- und Schiffahrtsamt Wilhemshaven, Mozartstrasse 32, within one calendar month, either in writing, or by appearing in person to register an appeal.

In cases of doubt, the German issue of this permit is authoritative.

NOTES

Please also advise Shipping Guides Ltd.

SHIPMASTER'S REPORT: Mobil Sea Island (Platform):
Position: Between Jade River Buoy Nos. 18 and 19.
Pilotage: Sea Pilots (2) board/leave at Deutsch Bucht Light Vessel by helicopter.

Berthing Pilots (2) board/leave about 2 to 3 miles North of Sea Island by launch.

Pilotage straightforward to Weser Light Vessel where river passage begins.

Two bad bends here make strict attention to steering and helmsman necessary.

Passage Time:

Inward (VLCC – half cargo)

Sea Pilotage	3 hours 50 minutes
Berth Pilotage	54 minutes
Mooring	57 minutes
Pilotage distance	41 miles

Outward (VLCC – Ballast)

Berthing Pilotage	39 minutes
Sea Pilotage (to 8 miles South of Light Vessel)	2 hours 24 minutes
Pilotage distance	31 miles

Helicopters: Base for the 3 German rivers at Wilhelmshaven.

First contact 1 to 2 hours before arrival at Deutsch Bucht Light Vessel via Norddeich Radio Channel 16-27 when ETA confirmed and that vessel is familiar with helicopter procedures.

Thereafter continuous watch on Channel 16 VHF until helicopter contact will require continuous calling on 410 kHz and listening out on Channel 9 VHF until operation completed.

Berthing/Unberthing: Carried out at slack water only. Deep laden VLCCs on HW only. Ballast or half-loaded VLCCs on either slack water. Deep laden VLCCs can only proceed inward on flood tide.

River passage at Buoy No. 3 begins about 4 hours before local HW at Wilhelmshaven and is proceeding according to fixed tide schedule.

Minimum underkeel clearances to be observed:

1. Inward bound:
   (a) from sea to Buoy No. 25: 10%.
   (b) Buoy No. 25 to jetties: 8.5%.
2. Outward bound:
   jetties to sea: 15%.

Tugs: Six tugs used for any VLCC movement, 1 forward, 1 aft and 4 "pushers". Additional tugs have to be ordered well in advance.
Moorings: Standard VLCC mooring arrangement. Springs run out first.
Cargo: 4×16 in. Chicksan booms available. Discharge rates compatible with modern VLCC facility. Official outturn figures average 1.5% less than ship figures.
Crude Oil Washing: Subject prior permission this is allowed.
Air Pollution: Monitoring of gas emission from tank venting system carried out during ballasting. If readings high, ballasting rate must be adjusted to keep readings within set parameters (parameters not known).
Documentation: As per "Guide". *Important that Certificate of Financial Responsibility is on board otherwise vessel fined (up to a maximum of D.M. 10,000).*
Shore Leave: Permitted. Ferry is on call when required from Island to mainland berth. Refinery jeep is then on call from Gate House. It is forbidden to walk in Refinery area. Taxis can be called from Gatehouse.
General: The Sea Island is in the "free port" area, therefore, no personal effects lists or other customs problems. Authorities inflexible if certification problems arise (Certificate of Financial Responsibility).

ADD S.M.R.

2. Port Authority: (Competent for harbour affairs within harbour limits, exempt municipal and military areas). Niedersachsisches Hafenamt (Lower Saxony Port Office), Wilhelmshaven, Kieler Strasse 31, 2940 Wilhelmshaven. *Tel:* (04421) 26247 Port Captain. *Contact:* Captain Boege or Captain Pape.
3. Municipal Port Authority: (Competent for harbour affairs within municipal harbour limits) Stadt Wilhelmshaven, Rathausplatz, 2940 Wilhelmshaven. *Tel:* (04421) 297786. *Contact:* Captain Muehlinghaus.

AGENT: See "Bremen".

Ghana

GENERAL:

HEALTH: *Pratique Procedure:*

1. The Port Health Officer or authorised officer shall grant Pratique to a ship as soon as the following conditions have been properly complied with:

(a) The Master shall complete accurately to the best of his knowledge and belief a Maritime Declaration of Health Form.

The Declaration shall be countersigned by a ship's surgeon if one is carried and shall be delivered to the Port Health Officer or authorised officer.

(b) The answers to the questions in the Declaration shall clearly indicate the absence of any infectious disease on board during the voyage or on arrival of the ship, and that the ship has not called at any infected area or had direct contact during the voyage with any ship from any infected area or having on board any case of infectious disease, and shall satisfy that Port Health Officer or authorised officer that the granting of Pratique shall not be attended by any danger.

(c) The Master or any other person on board including a ship's surgeon, if one is carried, shall accurately and, completely answer any other questions put to him by the Port Health Officer or authorised officer in regard to the sanitary condition of the ship, the health of the passengers and crew or of any ship with which there has been direct contact during the voyage, and shall furnish any such officer with all such information and assistance as he may reasonably require.

2. In the event of any suspected disease or fever on board a ship before arrival at the port and any other circumstances requiring the attention of the Port Health Officer, the Master shall:

(a) If the ship is equipped with a suitable radio transmitting apparatus and is due to arrive at a radio receiving port, send before arrival, either directly to the Port Health Officer or through an Agent approved by him, a radio message to that effect.

(b) If the ship is not so equipped or is due to arrive elsewhere than at a radio receiving port, notify the Port Health Officer immediately on arrival of the presence on board of such infectious disease, or suspected conditions.

Any radio message sent shall:

(a) embody such of the items of information as are applicable;

(b) be sent so as to reach the Port Health Officer not more than 12 hours, and not less than 4 hours, before the expected arrival of the ship;

(c) if it is in code, conform with the section relating to standard quarantine messages of the International Code of Signals.

3. Any ship arriving at its first port of call in Ghana from a foreign port shall be deemed to have come from an infected local area, and shall be required to comply with the provisions as to flags and signal lights as prescribed until granted Free Pratique by the Port Health Officer or authorised officer.

The following signals are to be shown on arrival within 3 miles of land, by vessels requiring or required to show their state of health:

(a) in the daytime i.e. during the whole of the time between sunrise and sunset.

(i) "Q" flag signifying "my ship is 'healthy' and I request free Pratique" or;

(ii) "Q" flag over first substitute ("QQ") signifying "my ship is 'suspect', i.e. I have had a case or cases of infectious disease more than 5 days ago, or there has been unusual mortality among the rodents on board my ship" or;

(iii) "Q" flag over "L" flag ("QL") signifying "my ship is infected" i.e. I have had a case or cases of infectious disease less than 5 days ago.

(b) by night i.e. during the whole of the time between sunset and sunrise, a red light over a white light, the lights being not more than 6 ft. apart shown at the peak or where the signal can best be seen from the shore, and exhibited only when the ship is within the presence of a port signifying "I have not received Free Pratique".

(c) Any ship displaying the appropriate signal in accordance with the provisions of paragraph (3) above shall, as soon as practicable, be visited by the Port Health Officer or authorised officer, who shall grant Pratique or take such other steps as may be necessary before granting Pratique.

4. A ship which has been granted Free Pratique at its first port of call in Ghana which has not been declared an infected area shall not be required to obtain further Pratique at another port in Ghana.

Vaccination requirements in respect of persons arriving in Ghana

All officers, crew and passengers of every ship arriving at any port in Ghana shall be in possession of valid Certificates of vaccinations against yellow fever and cholera.

Where a person arrives at any port in Ghana and is unable to produce a valid Certificate as required, the Port Health Officer or the authorised officer shall require such person to be vaccinated on the spot or to present himself at a place or places for the purposes of being vaccinated.

Under no circumstances should any officer, crew or passenger disembark if he is not in possession of any valid Certificate against yellow fever and cholera.

CUSTOMS REGULATIONS: *Pre-Entry System:*

Customs Authorities have introduced a 'Pre-Entry System' whereby importers are expected to process their Customs Bills of Entry in advance, at least 7 clear days prior to vessel's arrival, failing which a penalty is imposed by Customs on importer/consignee. To avoid a situation where importers will hold Agent/Owners responsible for refund of penalties for late submission of Manifest with Customs, it is essential that shipowners are requested to let Agent receive all cargo manifests at least 10 days prior to vessel's arrival in order for Agent to lodge with Customs Authorities advance manifest for the benefit of importers. Recently, most cargo documents have been received late and in some cases manifests have been received when vessel is in port. It is suggested that manifests are airfreighted to ensure early receipt.

SALTPOND (Bonsu): 05.05 N. 01.00 W.

LOCATION: 9 km. South of Saltpond village in position Lat. 05° 04′ 47″ N., Long. 01° 00′ 25″ W.

TUGS: One tug available to assist with berthing and connecting hoses.

BERTHING: Ship to ship transfer through 1,200 ft. floating hose. Depth of water 85 ft.

The platform "Agpi" is permanently moored. The storage vessel is named "Farmer". Loading time for 20,000 tons is 24 hours. Product is named "Saltpond Crude" or "Bonsu Crude".

OPERATOR: Agripetco Ghana Inc.

TAKORADI: 04.53 N. 01.45 W. (See Plan)

PORT LIMITS: Are shown on Admiralty Chart 3102 and covers an area of about 1.5 miles to 2 miles outside harbour entrance.

DOCUMENTS:

Customs:

2 Stores Lists.
2 Lists Crew Personal Effects.
1 Bill of Health.
6 Crew Lists with dates of yellow fever inoculations (use Ghanian Form No. 62 which is supplied by Agent).
6 Passengers Lists or 'Negative'.
6 Vessel's Itinerary Lists.
1 Freighted Cargo List.
1 Unfreighted Cargo List.
1 Set Bills of Lading.
1 Clearance from last Port.
1 List of Narcotics.
1 List of Stowaways (state 'nil' if so).
1 List of Arms and Ammunition (state 'nil' if so).
1 List of Mail (state 'nil' if so).
1 List of Animals on board (state 'nil' if so).

Immigration Officer:

1 Crew List (Ghanian Form No. 62).
1 List Ports of Call.
1 List of Passengers, if any.
All crew and Passengers' Passports.
Advice to Immigration of any stowaway.

PILOTAGE: Pilotage compulsory for ships berthing alongside or on the moorings. Pilot boards within port limits. International code signals used. Pilotage for entering vessels from 0600 – 1800 hrs. and for leaving anytime.

ANCHORAGES: Vessels may anchor outside the harbour without Pilot. Depth at moorings 22 ft. to 35 ft.

RESTRICTIONS: Depth at harbour entrance 35 ft. MLW.

MAX. SIZE: Up to 28 ft. draft for berthing alongside. Up to 33 ft. at buoys. Also see "Tankers".

HEALTH: See "General" before first Ghana port.

RADIO: Radio Takoradi. The station is a Coast Station and only operates on HF and MF equipment. The call sign for this station is 9GA.

VHF: Signal station Channel 14. 24 hour service for all information with regard to Pilots, berthing, etc.

RADAR: No radar services available.

TUGS: Tugs normally join the vessel outside port entrance. Tugs' assistance is compulsory to be ordered through Signal Station. 1 tug of 1,350 h.p. available.

BERTHING:

Berth	*Max. Length Vessel*	*Max. Draft*
Manganese	520 ft.	28 ft. 0 in.
2 Wharf	550 ft.	26 ft. 0 in.
3 Wharf	500 ft.	28 ft. 6 in.
4 Wharf	600 ft.	28 ft. 0 in.
5 Wharf	270 ft.	28 ft. 0 in.
*6 Wharf	500 ft	29 ft. 0 in.
Bauxite	505 ft.	32 ft. 0 in.
Coal Wharf	250 ft.	14 ft. 0 in.
Oil Wharf	600 ft.	29 ft. 3 in.
1 Buoy	550/610 ft.	F.32 ft. 6 in. A.34 ft. 0 in. (If ship 610 ft. max. 27 ft. 6 in.)
2 Buoys	550 ft.	F.30 ft. 6 in. A.31 ft. 0 in.
3 Buoys	570 ft.	27 ft. 0 in.
4 Buoys	520 ft.	F.27 ft. 0 in. A.30 ft. 0 in.
5 Buoys	510 ft.	F.24 ft. 0 in. A.27 ft. 0 in.
6 Buoys	480 ft.	F.24 ft. 0 in. A.26 ft. 0 in.
7 Buoys	450 ft.	F.23 ft. 0 in. A.25 ft. 0 in.
8 Buoys	400 ft.	F.21 ft. 0 in. A.22 ft. 0 in.
9 Buoys	340 ft.	18 ft. 0 in.

*No. 6 Wharf obstructed by sunken fishing vessel which is expected to be moved in 1986.

CRANES: There are 35 Portal Cranes at the Port. Of these 15 cranes of 3 tons each and 1 crane of 15 tons lifting capacity are at the wharf berths for loading and discharging vessels, but most are out of order. The remaining 19 cranes – 6 of 10 tons, 1 of 7 tons, 1 Butters crane of 15 tons and 9 of 3 tons are placed at the West Wharf to cater for the loading and discharging of logs and other commodities. Two of 5 tons are at the Cargo Platform to load and discharge other commodities. In addition there are 20 gantries for loading and discharging sawn timber.

There are no cranes at the buoy berths and ships are expected to use their own gear. Also, there are no floating cranes at this Port.

BULK CARGO FACILITIES: There are 2 berths for the loading of dry-bulk cargo – manganese ore and bauxite. In the case of grain, coal, fertilisers, sulphurs, copra, etc., discharge can be done at any of the wharf berths. The loading rate of manganese ore is approximately 333 long tons per hour; and the loading rate of bauxite is 330 long tons per hour.

SPECIALISED CARGO HANDLING FACILITIES: The port does not have container or Ro/Ro handling facilities.

BRIDGES: There are no bridges at the port.

STEVEDORES: Berthing meetings are held daily between the Port Authority and all Port Operators with the view to determining ETA and ETD of vessels to enable the stevedoring companies to arrange for gangs and determine the relevant rates and charges.

Normal working hours: weekdays 0700 hrs. to 1200 hrs. and 1400 hrs. to 1700 hrs. Saturdays 0700 hrs. to 1200 hrs.

Gangs required for Sunday work should be ordered before 1130 hrs. previous day. For weekday work, gangs should be ordered before 1500 hrs. previous day.

MEDICAL: It is absolutely necessary for the Agents to be notified in advance of the required medical attention so that necessary arrangements for medical exercise be carried out immediately on the vessel's arrival. Also see "General – Health".

TANKERS: Oil tankers moor on the North side of Lee breakwater. 1 berth suitable for ships of 600 ft. length, draft 29 ft.

Pipe-line: 805 m. long, pipe size 8 in. for all grades of petroleum and Bitumen.

Discharge Rate:

Petroleum	–	Premium Mogas	150 t.p.h.
		Regular Mogas	150 t.p.h.
		A.G.O.	200 t.p.h.
		Kerosene	200 t.p.h.
Bitumen	–	80/110–142 cu.m./hr.	
		60/70 –154 cu.m./hr.	
		12/18 –337 cu.m./hr.	

DENSITY: Salt water.

FRESH WATER: Delivery at berths and buoys is by means of water barge of 448,000 gallons capacity. The rate of delivery is 11,000 g.p.h.

FUEL: 2 grades available, fuel and gas oil. Advance notice is necessary.

Fuel – supplied through pipe-lines.
Gas Oil – supplied by mobile tanker.

FIRE PRECAUTIONS: 6 firemen ordered to standby with fire engine. "No Smoking" notices are posted at considerable distances from the tankers.

CONSULS: Italian Consul only. High Commissioners and Ambassadors are in Accra.

REPAIRS: Minor repairs can be effected, slipway for vessels up to 500 tons. Small dry dock for vessels up to 100 ft. length.

DRY DOCK: There is no large dry dock in this port but there is 1 small dry dock capable of accommodating vessel of 100 ft. long, 25 ft. wide and 8.5 ft. draft.

SURVEYOR: Lloyd's, ABS, GL, BV, Panama Bureau of Shipping and Bureau of Maritime Affairs (Liberia) represented by Wiltex Ltd. (consulting engineers and marine surveyors).

GANGWAY/DECK WATCHMEN: Provision of Gangway, Deck and Hatch Watchmen is absolutely necessary to prevent stealing, pilferage and smuggling on board ships.

HATCHES: Hatches are normally opened and closed by the stevedoring gangs or, at times, by the ship's crew.

CUSTOMS ALLOWANCES: Quantity permitted for each member of the crew to be held Out of Bond is as follows: Tobacco 100 grammes; Spirit 0.75 litres; Wine 0.75 litres.

CARGO GEAR: Load/discharge is affected by the Port Authority's shore gear. There is 1 heavy lift crane of 15 tons capacity which is used for heavy lifts. Where the cargo exceeds the lifting capacity of the shore crane, the ship's jumbo derrick is sometimes used.

REPATRIATION: The Immigration Department is responsible for signing on and off on the advice of the shipping company.

AIRPORT: The distance of the airport from the Port is approximately 2 miles. It is served by regular airline to and from the capital city of Accra; and the number of flights is 2 per week.

TIME: The Greenwich Meridian Time is applied to this Port as the Greenwich Meridian passes through this country.

HOLIDAYS: The holidays at the Port are as follows; New Year's Day (1st January); Redemption Day (13th January); Independence Day (6th March); Good Friday (non-working day); Holy Saturday; Easter Monday; Republic Day (1st July); Christmas Day (25th December) (non-working day); Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Telephone 999 for all 3 services.

TELEPHONES: Presently no arrangements exist for installing telephone on board ships.

SERVICES: There is no special service for tank cleaning, tank-washing or compass adjustment.

SHORE LEAVE: Every member of the crew is free to go ashore at any time of the day or night after the Immigration Officer has issued shore passes to that effect on the ship's arrival.

IDENTIFICATION CARDS: Seamen's Book or Passport is sufficient to identify any seaman. Also see "Shore Leave".

REGULATIONS: Ship's are not allowed to discharge on board explosives or petroleum without prior approval of the Port Manager. Ships are not allowed to berth after 1800 hrs.

DELAYS: Delays in berthing a ship occur when all berths are occupied; delays also occur when repairs are being carried out on any of the berths.

AUTHORITY: Ghana Ports and Harbours Authority, P.O.Box 1, Takoradi, Ghana. *Tel:* 3220. *Cables:* Harbours Takoradi. *Contact:* Captain J. E. Quansah, Harbour Master.

AGENT: Scanship (Ghana) Limited, P.O. Box 329, Takoradi. Tel: 35.31, 36.50, 35.33. Telex: 2181 and 2182 Accra. Cables: "Scanship Takoradi". Radio: Contact possible after leaving Tema on R/T 6,500 kHz and VHF Channel 9.

TEMA: 05.38 N. 00.01 E. (See Plan)

DOCUMENTS:

Arrival.

2 copies List of Stores.
2 copies Crew Declaration Forms (Ghana Form No. 62).
1 Bill of Health.
6 Crew Lists with vaccinations lists for yellow fever.
6 copies of Passenger List (or "nil" passenger list).
Valid certificates for cholera and yellow fever vaccinations.
6 Lists of Ports of Call.
1 List of Narcotics.
1 List of Stowaways (state 'nil' if so).
1 List of Arms and Ammunition (state 'nil' if so).
1 List of Animals on board (state 'nil' if so).
2 Freighted Cargo Manifest.
7 Unfreighted Cargo Manifest.
1 B/L's set.
Port clearance from Last Port.

Departure – Port clearance visaed by Customs.

PILOTAGE: For Main Harbour pilotage for all vessels of more than 100 net tonnage, when arriving or leaving harbour, or shifting berth, but for both Fishing Harbours obtainable on request.

Time of pilotage as follows for Main Harbour:

(*a*) Dry cargo vessels: arrivals 0600 – 1800 hrs.; departure 0600 – 2300 hrs.
(*b*) Tankers: arrivals daylight only; sailings 0600 – 2300 hrs.
(*c*) Valco-carriers: all handling, during daylight only.

For fishing harbours: during daylight only.

Vessels arriving or wishing to enter harbour must await Pilot between E. and S.W. off outer water light, about 1 mile distance. Ships embarked by Pilots from 0600 hrs., according to time of arrival Quarantine Anchorage.

ANCHORAGES: Good anchorage, three-quarters to two miles from E.N.E. to S.W. off main entrance with depth 30 ft. to 60 ft., with good holding ground. Eastern area of anchorage is more comfortable, without additional swell reflected from main breakwater.

Shipmaster's Report: July 1986.

Tema Port Control advises vessels to anchor 7 to 8 miles from harbour "to avoid piracy". We anchored 5 miles S.E. of harbour entrance in 25 fathoms of water with sandy bottom. No difficulties encountered.

RESTRICTIONS: Ships' Arrival, 0600 – 1800 hrs. (on special request to 2000 hrs.). Ships' Departure, 0600 – 2300 hrs.

MAX. SIZE: Ships up to 800 ft. and draft of 32 ft.

HEALTH: All crew require valid certificates of vaccination against yellow fever which are inspected by Port Health Authorities. In case of any suspected disease or fever on board. Agent of the vessel should be notified in advance by radio. Also see "General" before first Ghana Port.

TIDES: Maximum tides rise 6 ft. 2 in., minimum tides rise 3 ft.

PREVAILING WINDS: Light to fresh breeze from W. and S.W. during all year, except December to February when N.E. Harmathan is dominating with poor visibility. Dangerous winds are tornadoes from East, May to July, but occasionally isolated tornadoes are to be expected from January to December. There is a swell in harbour, especially after tornadoes, when lying alongside the berths.

HARBOUR: Harbour consists of 3 basins:

(*a*) The large basin of Main Harbour, formed by Main Breakwater 6,250 ft. long, and Lee Breakwater, 3,650 ft. long.
(*b*) Outer Fishing Harbour, East of Lee Breakwater.
(*c*) Inner Fishing Harbour on Northern side of former one.

Entrance to Main Harbour 800 ft. wide and together with the approaches has minimum depth of 35 ft. (Admiralty Chart Datum to which all depths refer).

Ships entering Harbour 2 – 3 cables before entrance roll heavily, up to 4°–8° during some seasons. Ships deeper than 30 ft. enter only during high tide with maximum possible draft limit 32 ft. during neap tide. Bottom of harbour consists of sand and mud, with frequent hard rocky ground. Depth increases in direction of Main Breakwater. Two pairs of mooring buoys in depth of 34 ft. – 36 ft. Inside harbour, alongside Lee Breakwater is an Oil Wharf for tankers with depth of 34 ft.

Obstruction: Sunken fishing vessel at No. 3 Buoy to be removed in 1986.

TUGS: Use of 1 tug compulsory for all ships over 2,000 g.r.t. and 2 tugs over 5,000 g.r.t. (but at Pilot's option), and 2 tugs compulsory for tankers and Valco-carriers. 2 Diesel Tugs 1,380 h.p. and 1 new diesel tug 2,000 h.p. in service. 2 tugs available for duty between 0600 and 2100 hrs., otherwise 1 tug. Ship's lines to be used.

BERTHING: Quay No. 1 – 4,300 ft.; Quay No. 2 – 2,900 ft.

Berths	*Length*	*Max. Draft**
1	600 ft.	31 ft. 6 in.
2	600 ft.	28 ft. 6 in.
3	480 ft.	25 ft. 0 in.
4	600 ft.	25 ft. 9 in.
5	600 ft.	25 ft. 6 in.
6	600 ft.	24 ft. 6 in.
7	600 ft.	26 ft. 0 in.
8	600 ft.	25 ft. 0 in.
9	600 ft.	25 ft. 0 in.
10	600 ft.	25 ft. 0 in.
11	600 ft.	25 ft. 0 in.
12	600 ft.	25 ft. 6 in.
Oil Berth	Ships up to 800 ft.	32 ft. 0 in.
Valco Berth	Ships up to 575 ft.	32 ft. 0 in.

Berths No. 6 and 7 for loading cocoa-beans, equipped with 4 high-speed conveyers, transporting bags directly to ship's hold, from 4 cocoa sheds (totalling 2,400,000 cu. ft.) situated at Westerly corner of harbour.

Usually ships moor starboard side to berths No. 1, 2, 6–9 and portside to berths No. 3, 4, 5, 10–12.

*Max. drafts may be less than indicated as dredging has not been carried out for many years. Dredging and surveys to be carried out in the near future.

RADIO: All messages to Agents through their own VHF radio – Channels 6, 12 and 20.

VHF: The ports are equipped with VHF radio telephones, Channels 13, 14 and 16. Channel 16 is the international listening channel and Channel 14 is the port working channel. Channel 13 can be used if required, or if the other channels are not available. Signal station request LOA and draft in feet and last port of call.

SPECIALISED CARGO HANDLING FACILITIES: 3 special berths for bulk cargoes only: Berth No. 10 for grain only. It is equipped with 1 elevator for sucking/discharging, not operational at present.

Valco Berth for handling bulk cargoes such as alumina, pitch/coke and aluminium fluoride. It is also equipped with 2 elevators for sucking/discharging.

Berth No. 8 is partly for pumping/discharging of liquid/bulk chemicals such as tallow and alicane.

Cranes, Outloaders:

3 new cranes of 8 tons in use. 2 cranes in use on Quay No. 1 and 1 at Quay No. 2. 4 new cranes on order.

Cocoa Conveyor System: 4 Outloaders, each 30-35 t.p.h.
or : 2 Outloaders on high speed =70 t.p.h.

STEVEDORES: Available. Dry cargo is handled from 0730 hrs. to 1230 hrs. and from 1400 hrs. to 1700 hrs. on normal working hours, and overtime after 1700 hrs. to 2000 hrs. (for finishing ships 2030 hrs.) and on Saturdays p.m., Sundays and holidays. Oil Wharf and Valco Berth are working around the clock.

Gangs required for Sunday work should be arranged before 1130 hrs. previous day. For weekday work, gangs should be arranged before 1500 hrs. previous day.

Stevedores provided by Ghana Handling Company Ltd., Atlantic Port Services and Speedline Stevedoring Company Ltd.

TANKERS: Tankers always moored starboard side to dolphins, and ropes to breakwater and bow-buoys. Crude oil pumped to refinery, by ship's pumps, a distance of 18,000 ft.

North of Oil Wharf about 2 cables on same breakwater is Valco Berth for discharging of bulk materials for "Valco" aluminium smelter (mostly alumina). Narrow channel 250 ft. wide with depth 33 ft. 6 in.

FRESH WATER: Water pipes alongside all wharves, and under State's sanitary control.

FUEL: Fuel and diesel-oil available by tanker-trucks only. No coal-bunkers available.

DENSITY: 1025.

FIRE PRECAUTIONS: Oil tankers when moored alongside must have "Fire Wires" hanging over the bow and stern on the outboard side of the vessel. These must be lowered to the water's edge and securely made fast on board so that they can be used to tow the ships away if necessary in an emergency. Two large fire fighting pumps and "snorkels" are mounted at the oil wharf. A floating boom to prevent the spread of oil spillage must be put in position around tankers loading and discharging. The Master of the ship should be warned to lower the guy ropes securing the boom to the ship, so that the boom is afloat at all times and not lifted up as the vessel's draft changes.

REPAIRS: There is no dry dock activity.

DRY DOCKS: There are two (2) drydocks.

Drydock No. 1: Serviced by 60 tonnes and 20 tonnes travelling cranes. Capacity: 100,000 d.w.t. Length: 910 ft. (277.4 m.). Width (entrance): 149 ft. (45.4 m.) Width (inside wall): 155 ft. (47.2 m.). Draft (entrance): 22 ft. (6.7 m.) (to be deepened in future). Flooding time empty dock: 2 hours (approx.). Dewatering time: 4 hours (approx.).

Drydock No. 2: Serviced by 45 tonnes and 25 tonnes mobile cranes. Length: 350 ft. (106.7 m.). Width: 44 ft. (13.4 m.). Draft (entrance): 18 ft. (5.5 m.). Flooding time of empty dock: 4 hrs. (approx.). Dewatering time: 4 hrs. (approx.).

Also there is one slipway with length 127 ft. (38.7 m.); width: 41 ft. (12.5 m.) and hauling capacity: 150 tonnes.

Fitting out quay: 600 ft. (182.9 m.). Draft: 14 ft. (4.3 m.) to be deepened. Crane: 15 ton travelling crane.

SURVEYORS: Lloyd's, NKK and Bureau Veritas are represented at the port.

GANGWAY/DECK WATCHMEN: Services of watchmen necessary and compulsory.

HATCHES: Opening/closing of hatches is normally carried out by stevedores or crew.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle of spirits and wine and beer in reasonable quantities.

REPATRIATION: Facilities exist for effecting crew changes.

AIRPORT: Situated 18 miles from the port.

TIME: GMT. No alterations during the year.

HOLIDAYS: New Year's Day (January 1st); Independence Day (March 6th); Good Friday; Holy Saturday; Easter Monday; Labour Day (May 1st); PNDC Government (June 4th); Republic Day (July 1st); Christmas Day (December 25th); Boxing Day (December 26th). Cargo work can be arranged on those days on request.

SHORE LEAVE: Every member of the crew is free to go ashore at any time of the day or night after the Immigration Officer has issued shore passes to that effect after clearing inwards.

IDENTIFICATION CARDS: Shore passes issued are sufficient.

REGULATIONS: No unusual regulations for the port.

POLICE/AMBULANCE/FIRE: Telephone Nos: Police: 999 and 2936; Ambulance: 999; Fire: 999 and 2822.

GENERAL: Recommended to send ETA message as early as possible advance. Essential that ETA message reaches Agent's office before 1430 hrs. Monday-Thursday or before 1000 hrs. Friday for weekends because of booking of gangs. Ships from Abidjan should also send 48 hours ETA message.

DEVELOPMENTS: Provision of Container Depot.

Rehabilitation of equipment, plant and civil structures. Modernisation of oil berth.

SHIPMASTER'S REPORT: (1976) Updated 1986.

Good W/T. D.F. signals are obtained from Accra and Lome and with this vessel's equipment Marconi Type 758E will give a reliable position to within 2 miles. The 100 fathom contour line was accurate to within 1 mile where we crossed it. Within 20 miles the land definition is excellent on Radar. Native fishing craft are met with from about 10 miles offshore and show lights when fishing at night but reliability regarding these lights is doubtful.

VHF contact with the port Signal Station is good, although there was very heavy traffic during our stay outside but I was allowed to use the main transmitter when berthed to inform Owners that we were alongside, at anchor no restrictions are placed on vessels using their wireless transmitters.

The entrance to the Harbour is good, plenty of water all about if you have to wait for the Pilot, which we did. (He was moving a fishing vessel, and we had to cruise for about twenty minutes, after having come to the entrance on instructions that he would board there).

There were never less than 18 ships waiting for berthing.

W/T contact with Portishead was good.

SHIPMASTER'S REPORT: (1977) Updated 1986.

From Southwards – a strong Easterly set experienced 24 hours prior to arrival and along the coast to Cape Palmas after departure.

Radar (in our case) of the land poor until 15 miles off when ships at anchor off the port gave the first and the best targets. Breaksea Point light good and sighted at full range.

Ship really needs to be on "standby" with engines ready on approach to the 100 fathom line, when the first of the many mainly unlit and poor radar target fisherman are encountered, and really are in dense packs all along the coast in the shallower waters. There is no point in adjusting speed for a daylight arrival, the earlier the better as port operates on a mainly first-come basis. Equally of little point to try and pick a selected anchorage, ships are to be found anchored over quite a wide area – avoid as per pilot book the "prohibited anchorage" and the 10 fathom rocky shoulder that runs parallel with the coast. There are invariably 12 ships or more at anchor even some large ships completely unlit and possibly unmanned.

The port as other Masters have reported is well run, Pilots, tugs etc., well trained and competent under normal conditions. Essential to be well moored and precautions taken against the scend and surge that enters the harbour under certain conditions.

Communication: W/T HF poor and ship unable to make direct radio contact with Ghana until well within M/F range.

VHF: All port signals are given on Channel 14, and VHF discipline on this frequency poor when local ships are at anchor or in the near vicinity. Liner Agencies reputedly keep watch on Channel 16, but we were unable to raise them or make any contact before berthing.

Stevedores: Worked well throughout, though some delay initially experienced whilst fork-lift trucks small enough to work in our hatches and under the coamings were obtained, some pallets having to be broken down in stow to be discharged. Hours of work – actual – this is without the ship being consulted in any way, but seemingly common practice throughout the port, were 0730 hrs. non-stop through to 1930 hrs. Some pilferage – mainly of spilt milk powder, no visible signs of any security control as such. Discharge rate overall (crane and ships gear) milk powder 13 tons per gang per hour; frozen meat 8.64 tons per gang hour.

Stevedores Toilets: Essential that ship arrives with overside latrines bow and stern ready and rigged.

Noting Protest: It might well be wise to include need to Note Protest in arrival message. We berthed late Friday to find Consulate in Accra closed as from midday for the weekend.

Stores: Good quality but expensive. It is advisable to ask for samples to be brought on board before ordering.

Shore leave: Ship was warned by other ships, the Agents, Mission Staff etc. not to go ashore at all with muggings and robberies commonplace even in daylight (wrist watches prime targets). The Agency lays on a minibus seemingly as a matter of course, to run ships' staff to and fro. We in fact with use of the above bus and local taxis did not experience any problems and found local people friendly and hard working.

AUTHORITY: Ghana Ports Authority, P.O.Box 150, Tema, Ghana. *Tel:* 2631–9 *Cables:* "Harbours". *Contact:* Gp. Captain E. A. Awuvri, Port Director. Captain E. D. Ziem, Harbour Master.

AGENT: Scanship (Ghana) Ltd., P.O.Box 64 Tema. Tel: 26.51 and 25.71. Cables: "Scanship Tema". Telex: 2181 and 2182 Scanship Accra.

Gibraltar

GIBRALTAR: 36.08 N. 05.21 W. (See Plan)

DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
Arrival Report, to be completed when receiving Pratique.
International Maritime Declaration of Health.
Ship's Register.
Load Line Certificate.
Derat Certificate.
Ship's Articles.
Certificate of Insurance in respect of Civil Liability for Oil Pollution Damage.
Stowaway Report.

PILOTAGE: Pilotage compulsory for all navigation (except direct *departure* from anchorage). Give notice of arrival through Agents 24 hours in advance furnishing maximum draft. Ships approach off Rosia Bay where Pilot (available day and night) boards vessel. Pilot boat painted black and flies international Pilot flag. To call Pilot: sound, and fly flag "G" or call Gibraltar Port on VHF Channel 16 and pass message on Channel 12.

ANCHORAGES: In open bay, good safe anchorage, depths vary from 5 to 40 fathoms. Vessels normally anchor in area West of Harbour Moles.

RESTRICTIONS: *Note:* British waters in the Bay of Gibraltar extend to the Median Line drawn in accordance with the 1958 Geneva Convention on the Territorial Sea and Contiguous Zone (see Admiralty Chart D 1448). However, part of those waters, lying North of 2 Qk. fl. buoys, are considered by the Spanish Authorities to be within the limits of the Port of Algeciras/La Linea (Spanish Notice to Mariners 49/1563/67 of 9 December 1967), and the Spanish Authorities have claimed Spanish port dues in respect of vessels anchoring between the Median Line and the line of buoys.

The waters in dispute form only a small part of the anchorages available to shipping calling at Gibraltar.

MAX. SIZE: If anchoring in bay, any size. Max. draft alongside, 31 ft. 6 in.

HEALTH: Vessels are usually boarded by Port Authorities off the Southern end of the Detached Mole: if everything found satisfactory Pratique is granted immediately. Masters should advise Agents by radio before arrival of any illness on board so that Port Doctor may board vessel with Port Authorities.

RADIO: Gibraltar Radio, call sign ZDK.

VHF: Communicate with Port Authorities by VHF international calling Channel 16, pass message on Channel 12, many other channels available (24 hour service).

TUGS: 6 tugs, 500 h.p. – 2,600 h.p. When required for berthing alongside, tugs meet vessels off Mole. Ship's ropes sometimes used.

BERTHING: Cruise Liners and vessels calling for bunkers or water can be berthed on both sides of Western Arm. Outer side is 490 m. long with draft up to 9.60 m. The inner side is 450 m. long and max. draft is 8.53 m. Ships of deeper draft can be accommodated on half tide basis according to tide. Vessels calling for repairs or lay up can be berthed at the Detached Mole. There are also 5 berths of 100 m. in length available to vessels discharging general and bulk cargoes.

Masters required to advise ship's draft when giving ETA. Cruise ships are only charged 25% of normal berthing charge.

Ships calling for bunkers and/or fresh water and not conducting operations involving passengers or cargo are only required to pay 12.5% of the normal berthing charges. Such vessels may, at the discretion of the Captain of the Port, be allowed to be berthed for a period not exceeding 8 hours whilst such vessel is not bunkering or taking on supplies or fresh water.

Vessels coming in solely for bunkers are exempted from tonnage dues.

CARGO HANDLING: Container berth at No. 2 Jetty available for vessels up to 350 ft. in length, max. draft 26 ft. Containers are also discharged at No. 1 Jetty.

STEVEDORES: Agents automatically advise stevedoring company on receipt of ETA from ship.

MEDICAL: Masters should advise Agents when giving ETA if medical attention is required on board. Adequate hospital facilities available.

TANKERS: Max. draft at discharging berths 31 ft. 06 in. Diameter of discharging lines 14 in. fuel oil, 10 in. diesel oil and gas oil.

DENSITY: 1025.

FRESH WATER: Available at Mole from pipe-lines, delivery rate 60/80 t.p.h. Water can also be delivered at anchorage from barge, delivery rate 40/50 t.p.h.

FUEL: A quick and efficient bunkering service is provided on a 24-hour basis at alongside and anchorage berths. Ships arriving at night are required to give prior notice before 1600 hrs. on the day of arrival. The requirement is the same on Sunday and weekdays.

Fuel of various grades is supplied to shipping throughout the year from piped installations at all alongside berths (with the exception of the Detached Mole) using the latest metered bunkering techniques. The grades include marine fuel, thin, fuel, marine diesel fuel and gas-oil. Ships at the Detached Mole and in the Commercial Anchorage are serviced by lighters. This supply to ships is handled as a joint venture by the Shell International, Mobil, Chevron, Texaco and B.P. oil companies and is managed by the Shell Company of Gibraltar Limited, who own the main share of the installations.

The bunkering installation at Gibraltar, which was the first in the world to provide metered deliveries at shipside, includes 2 Fisher-in-Line blending units to ensure rapid delivery of fuel oils of any viscosity. Oil bunkers are normally delivered at 200 – 250 t.p.h. per connection subject to the ship's acceptance capacity. Similar rapid bunkering is provided in the anchorage by a lighter of 880 tons fuel capacity and a total capacity of 1,000 tons including bulk lubricants.

GANGWAY/DECK WATCHMAN: Not necessary but available if required.

OPENING/CLOSING HATCHES: Normally effected by stevedores.

CUSTOMS ALLOWANCES: No restriction whilst on board. Crew members may bring ashore small quantity for their immediate personal use.

IDENTIFICATION CARDS: Not required.

International Direct Dialling (I.D.D.) in operation.

REPAIRS: Deck and engine repairs possible. Underwater operations including repairs and cleaning of vessel's hull.

DRY DOCKS: 3 dry docks available. Largest 871 ft.×125 ft. Max. vessel size 245 m.×36 m. Dry docks operated by Gibraltar Shiprepair Ltd.

REPATRIATION: Facilities exist for repatriating Crew members.

AIRPORT: Regular flights to London (Gatwick). Distance to airport about half mile.

TIME: GMT plus 1 hour in Winter, plus 2 hours in Summer.

HOLIDAYS: New Year's Day; Good Friday; Easter Monday; May Day; Commonwealth Day (24th May); Spring Bank Holiday; Summer Bank Holiday; Queen's Birthday; Christmas Day; Boxing Day. Cargo work can be effected at overtime rates on these holidays except on Good Friday and Christmas Day when no cargo work is carried out. Bunkering is effected on any of these holidays except on Good Friday and Christmas Day.

POLICE/AMBULANCE/FIRE: Police and Ambulance 199; Fire 190.

TELEPHONES: Telephone can be placed onboard at cruise ship berth. Telephones can also be placed on vessels under repair at the Detached Mole, through Admiralty Telephone Exchange, cost about £10.

DEVELOPMENTS: An unstuffing shed is under construction at the Container Terminal. This shed will give a covered area of 1,200 sq.m.

Due to its deteriorating state the viaduct bridge is being replaced by a causeway. This should be completed in Summer (1986). Reclamation East of jetty continues and has commenced at Waterport Basin (see "Plan").

GENERAL: Advisable that vessels calling for bunkers and only stopping in port for few hours should radio their requirements prior to arrival to ensure avoiding delay.

SHIPMASTER'S REPORT: 1980: Offport Call. (Updated 1982).

VHF: Lloyd's on Channels 16 and 14. Port and Pilots on Channels 16 and 12.

Pratique: Cable for Free Pratique 18 hours ahead. Standard message. Do not expect reply.

Pilot: Boards from small black hulled motor boat off Rosia Bay. Good lee required. Contact when South of Europa Point.

Anchoring: Not necessary for offport call with under 1 hour's wait. One anchor required ready with forecastle party on stand-by.

Agent/Quarantine Officer: Board off South end of Detached Mole.

Procedure: Require 5 Crew Lists and 1 Health Declaration. They also look at Register and Derat Certificate.

For British crew joining and leaving ALC3 and ALC5 are required to be filled in, so joining members must sign on immediately.

Time: Depends on numbers and ranks joining and leaving, but in October 1980, 9 officers left and 6 joined, procedure took 30 minutes with total off hire of 1 hour and 32 minutes.

General: Money: Sterling easily available in all denominations but make sure you cable in for Agent to arrange during bank hours.

Films: Walport from 'Restano' films and Vidpak – 48 hours' notice.

Agent: Very efficient, on prior request supplied British newspapers and up-to-date Lloyd's Index.

Anchorage: Northern limit of tanker anchorage – East to West line 1 cable South of North End Detached Mole (Qk. Fl. G.), ("C" Head) – good anchorage 3–5 cables off mole – single anchor good holding.

For ships awaiting repairs or orders, North limit – East to West line North End South Mole (Fl. 2 sec.) – "A" Head.

Current: (From Pilot). Strong Southerly setting current up to 4 knots, with East wind, off moles.

Lloyd's signal station: Approaching Gibraltar, will pass all messages to Pilots and Agent.

Port expenses: Agent quoted total off port (including Pilot) £650.

AUTHORITY: Captain of the Port, Port Office, North Mole, Gibraltar. *Tel:* 77254/78134. *Telex:* 2223 Admsec Gk. *Cables:* Gibport. *Contact:* Captain F. J. Hayward, Captain of the Port.

AGENT: Lambert Brothers (Gibraltar) Ltd., 47 Irish Town. Cables: "Lambert-Gibraltar". Tel. 72685. Telex 2222. Ship's Agents, Insurance Agents, Travel Agents.

Greece

ACHLADI: 38.53 N. 22.50 E.

DOCUMENTS: See "Stylis".

PILOTAGE: Compulsory. Pilot station is in Achladi Village port about 2 miles from the factory. Pilot is a practical seaman who has experience and knowledge of local waters. There is a pilot boat, painted white, flying the International Pilot flag "H". VHF is installed, working frequency Channel 12. Pilot also serves Stylis port and Agia Marina.

ANCHORAGES: The waters which surround the port are free from dangers. Good holding ground with depths from 25 to 30 fathoms.

MAX. SIZE: Max. draft alongside is 60 ft.

VHF: Port Authority on Channels 7 and 12.

TUGS: For large vessels, tugs must be ordered from Volos.

BERTHING: Achladi port is a new construction belonging to the factory of Agroinvest S.A. It is a private berth about 200 m. in length standing about 2 m. above sea level and is well protected by rubber fenders. It was constructed in order to serve factory for loading and/or discharging their products, such as animal food, flour, wheat, maize, etc. Maximum permissible draft along the pier is 60 ft.

The factory is visible just after passing Akra Tapia. It is a conspicuous building due to the height of silos and warehouses. Two fixed green lights show the ends of the berth.

CRANES: Loading/discharging by ship's gear. Mobile cranes may be hired by arrangement with local Agent.

STEVEDORES: Working hours for unloading 0700 hrs. – 1430 hrs. and 1700 hrs. – 2300 hrs. Loading carried out 24 hours.

Loading rate for grain 100 t.p.h. Unloading rate up to 280 t.p.h.

FRESH WATER: Available but quite expensive. Vessel will be supplied by truck/barge only.

FUEL: Not available.

REPAIRS: Minor repairs can be carried out in Stylis or Lamia.

GENERAL: No stores or provisions available.

DEVELOPMENTS: A silo for grain is under construction on the pier.

AUTHORITY: Stylis Harbour Authority, Stylis, Greece. *Tel:* (0238) 22329.

AGHIOS NIKOLAOS (St. Nikolo-St. Nicholas), Crete: 35.12 N. 25.43 E.

DOCUMENTS:

4 Crew Lists.
1 Passenger Lists.
1 Cargo Manifest.
1 Spares List.
1 Stores List.
1 List Crew Personal Effects.
Maritime Health Declaration.
1 Provisions List.

PILOTAGE: Not compulsory. No Pilot station. Private Pilot who can be used if needed. However, not always available. Area of Pilot's boarding is N.E. or S.E. of Aghioi Pandes Islet, depending weather conditions. Anchorage waiting place in same area. Call Pilot with signal "G". Small fishing vessels (length 13.0 m.) fitted with VHF can indicate position of anchorage if advised by Agent.

ANCHORAGES: (a) Harbour of Aghios Nikolaos, depth 3 – 5 fathoms. (b) Usual anchorage for vessels over 500 tons gross, South or S.E. of Nikolo Islet (Admiralty Chart No. 2536 B) and at a distance of 0.5 – 1.0 miles from the mainland, depth 10 – 40 fathoms respectively. (c) Poros Bay for small and large vessels, only when North and N.W. fresh gales, depth 16 – 27 fathoms.

RESTRICTIONS: Care to be taken off North entrance to port owing to rocky shoals, depth 5 m. Entrance from the S.W. is free of obstructions.

MAX. SIZE: Vessels of up to 100 m. length and 9.0 m. draft can enter the port. At oil bunkering installation outside the port, vessels of any size can be accommodated.

HEALTH: If from another Greek port free pratique is automatic and access to and from vessel granted on permission of Port Authorities. Port doctor visits all other vessels.

RADIO: No local radio station. Cables to Agent or Port Authority through "Athinai Radio", "Heraklion Radio" or "Rhodes Radio".

TUGS: One tug available.

BERTHING: Berthing position designated by Port Authority.

STEVEDORES: 10 permanent port stevedores available, but further 5 men can be engaged. Cargo worked by vessel's own gear.

MEDICAL: No advance notice of medical attendance required. Medical attention by town doctors available. Government hospital with all facilities.

TANKERS: No tanker berths. Vessels moor to buoys. Oil line 6 in. diameter.

DENSITY: 1025.

FRESH WATER: At new pier 3 hydrants, hose diameter 2.5 in. for supplying water. At the bunkering installation at Katsini Bay there is water storage tank capacity 500 cu. m. for supply to deep-sea vessels. Loading rate about 49 t.p.h. Delivery by flexible hose connection from the mooring buoys. Fresh water not available at the present time at the bunkering installation as they have ceased operating.

FUEL: Small quantities transported by tank truck are available from the pier.

HATCHES: Opened/closed by stevedores.

CUSTOMS ALLOWANCES: 2 packets cigarettes per crew member per day.

CARGO GEAR: No shore facilities. All cargo worked with ship's own gear.

CONSULS: None.

REPAIRS: Only minor repairs.

SURVEYORS: None.

REPATRIATION: Crew replacement and repatriation available.

AIRPORT: At Iraklion distance 66 km. 2 or 3 flights per day to Athens.

TIME: GMT plus 2 hours. GMT plus 3 hours late March to late September.

HOLIDAYS: In addition to standard Greek holidays, local holidays are Ascension Day (date not fixed), and St. Nicholas Day (6th December).

POLICE/AMBULANCE/FIRE: St. Nicholas Police tel. 100. State Hospital, tel. 22369. Fire tel. 22674 or 28905. Port Police tel. 22312. Area code for St. Nicholas 0841.

TELEPHONES: Available for yachts only.

SERVICES: Tank cleaning and hold cleaning.

SHORE LEAVE: Permitted with Port Authority pass.

STORING: Possible by truck or barge. Trucks may proceed alongside. No fork lift trucks available. Riggers available.

REGULATIONS: *(a)* Vessels are not allowed to approach Aghioi Pandes (goat reserve). *(b)* No refuse or other waste matter of any description allowed to be thrown overboard from vessel. *(c)* No visitors permitted without Port Authority permission.

DEVELOPMENTS: During next 5 years *(a)* deepening of Port Basin, *(b)* Provision of 1 shore crane, *(c)* construction of breakwater — length 200 m.

AUTHORITY: Port Authority of Aghios Nikolaos, Crete.

Contact: M. Iconomakis (Lieut-Commander), Harbour Master.

AGIA MARINA: 38.54 N. 22.36 E.

DOCUMENTS: See "Stylis".

PILOTAGE: Compulsory. Pilot can be boarded at Stylis Anchorage or Agia Marina. Pilot and pilot boat is the same as for the port of Stylis.

VHF: Stylis Port Authority on Channels 7 and 12.

TUGS: See "Stylis".

BERTHING: Agia Marina Port is an open port on the North side of Maliakos Kolpos. It is a private port belonging to Metalia Voxitou Elefsinos A.E. (Skalistiris Enterpr. S.A.).

The port of Agia Marina is visible just after passing Akra Drepanon and is 2 miles West of the main port of Stylis. A red fixed light shows the head of the elevator.

The berth, consisting of poles only, can accommodate cargo vessels up to 30 ft. draft for loading bauxite and/or chrome ore in bulk, cargoes come from the mines of Mount Parnassos and Mount Iti. Vessels calling at Agia Marina have to make fast to poles and are secured alongside the poles. Communication with the shore is effected only by motor boat which can be hired through local Agents. The loading takes place using an electric elevator and the rate is about 1,000 tons daily.

The port is lee to the wind and it has been reported that even with a Force 8-9 wind, vessels can stay in position without any difficulty. The vessel has to drop anchor in order to facilitate shifting(s) as elevator is immovable, also for better securing. The waters around are clear, with good holding bottom, the depth of which varies from 7 to 13 fathoms.

STEVEDORES: Working hours – 24 hours daily.

FRESH WATER: Not available. Can be obtained at Stylis, where max. draft allowed is 18 ft. 6 in.

FUEL: Not available. See "Stylis".

REPAIRS: Minor repairs can be carried out at Stylis or Lamia.

GENERAL: Stores and provisions available in limited quantities.

AUTHORITY: Stylis Harbour Authority, Stylis, Greece. *Tel:* (0238) 22329.

AGIOI THEODOROI: 37.55 N. 23.05 E. (See Plan)

DOCUMENTS:

7 copies Crew Lists (European and Asian).
2 copies Dates of Vaccinations/Inoculations.
1 copy Cargo Manifest.
2 copies List of Provisions and Stores (these are supplied on forms issued by Agent printed in Greek/English).
2 copies Officers'/Crews' personal declaration, on forms supplied by Agent in Greek/English, covering all high duty items, radios cameras, etc.
1 copy declaration of ships' cash on board, form supplied by Agent in Greek but made out in front of Master.
2 copies of Masters' declaration that all high duty goods have not been put under seal, and that he is responsible for any loss or landing of same without proper authority.

All passports and/or Seamen's books to be produced *if* requested by Immigration.

On completion of loading, documentation takes about 2 hours.

PILOTAGE: Compulsory. Pilot boards S.S.E. of port, about 1 mile off the outer jetty. No pilot boat as such; uses either a tug or mooring boat. Pilot is arranged by Agents who are based in Piraeus (1 hour by car). No means of radio contact between vessel and Pilot station.

ANCHORAGES: A reasonably safe anchorage can be obtained in position 0.5 mile off the outer jetty in a depth of 20 to 25 fathoms with a sandy bottom.

MAX. SIZE: Max. draft 70 ft.

TUGS: 2 tugs used for berthing, and 1 on sailing.

BERTHS: There are 3 main berths with 2 smaller berths for coastal vessels. The largest and outermost berth can accommodate vessels of 250,000 tons fully loaded, maximum discharge/loading rate at this berth being 5,000 t.p.h. The other berths can accommodate vessels of up to 50,000 tons fully loaded with maximum discharge/loading rate of 3,000 t.p.h. All berths are equipped with four 10 in. Chicksans. They are situated in an open position for winds from the South and West but provided ample moorings are put out, there should be no cause for concern.

Vessels can berth at any time day or night.

MOORINGS: Standard moorings on to dolphins which are well fendered and hold the vessel about 4 feet clear of the manifold complex. Vessels require their gangway but no derricks are required. 1 or 2 anchors are used depending on the berth used.

FRESH WATER: Fresh water for other than drinking purposes is available from the jetty, but drinking water has to come by barge from Piraeus for which 2 days' notice is required.

FUEL: Available alongside. Rate 3,500 cu.m./hr. for fuel oil and 600 cu.m./hr. for diesel.

REPAIRS: No facilities. Nearest port for repairs is Piraeus.

CUSTOMS: Bonded locker is sealed. Allowance 200 cigarettes or equivalent in tobacco or cigars per man (7 days) and a part bottle of wine and spirits is permitted per man (7 days). All Tobacco/cigars/cigarettes placed under seal. Crew excess must be declared on provision list in separate column for same.

SHORE LEAVE: Shore leave is allowed, passes being issued on arrival which must be handed in prior to sailing.

SHIPMASTER'S REPORT: December 1984.

Documents: Crew Lists must be IMO standard forms.

Pilotage: Oil Company has its own private Pilots. There are 4 Pilots stationed here, of which 2 are on call. Pilotage is compulsory. Pilot comes out by tug.

VHF: About 4 miles from the jetty, start calling "Pier Master Theodoroi", on Channel 14 VHF. He will give information about berthing and/or anchoring.

Anchorage: Reasonable safe anchorage Westward of jetty, about 3.5 cables from shore, in 20 – 25 fathoms of water.

Tugs: 4 tugs available.

Berthing: See "Plan". Ships always moor heading West, so only Berth "B" Inner is moored portside to. Each berth has 4 chicksans. Connections ranging from 8 in. to 12 in. Connecting and disconnecting is done by shore crew.

Fresh Water: Drinking water is also laid on to the jetty.

Provisions: Are available. Are brought alongside by tug for which a separate bill has to be signed.

AUTHORITY: Motor Oil (Hellas) Refineries.

ALEXANDROUPOLIS: 40.51 N. 25.54 E.

DOCUMENTS:

Port Authority:

2 Crew Lists.
1 Passenger List (if any).
If from abroad Maritime Declaration of Health.
If Greek flag, articles and log book, and declaration of foreign exchange.

Customs:

3 Lists of Stores and Provisions.
1 Crew List.
Master's personal declaration that all stores not held in bond will remain on board.

PILOTAGE: No pilot service. If Master requires pilotage assistance an experienced local boatman is available, but Agent must be advised of ETA in advance order to arrange for this Pilot to await vessel about 1 mile outside port.

ANCHORAGES: Depth inside port 18 ft. 06 in., mud bottom. Depth increases outside port to about 10 m. at distance of 1 nautical mile.

Area around port subject to strong S.E./S. winds especially during Winter. During strong winds vessels can seek shelter off Samothraki Island. In strong winds port is considered safe but because of occasional large waves loading is stopped. Winds from other directions do not affect port work.

MAX. SIZE: Vessels with draft not exceeding 18 ft. can enter safely.

HEALTH: Vessels from foreign countries can enter harbour and obtain Free Pratique during the period from sunrise until 2200 hrs. Vessels having suspected contagious disease on board should remain outside harbour until visit of medical officer, and await further instructions.

TUGS: None.

BERTHING: At least 24 hours notice of ETA to be passed to Agent in order to obtain allocation of berth from Port Authority.

STEVEDORES: Prior notice to be passed to Agent order arrange gangs. Rate of cargo working: General cargo about 100 tons per gang every 8 hours. Bagged cargo about 100 tons per gang every 8 hours. Coal about 80 tons per gang every 8 hours. Timber about 120 cu.m. per gang every 8 hours. Vessels must use own gear for loading/discharging.

MEDICAL: No advance notice required. 1 Government General Hospital, 3 clinics. Doctors' services readily available.

TANKERS: There is a floating pipe-line. Tankers with a draft of 18 ft. can discharge diesel oil and gasoline.

FRESH WATER: 10 hydrants available. Delivery rate about 5 t.p.h. (each), but delivery rate reduced when 2 or more hydrants in use.

FUEL: No bunker C fuel available. Supplies of diesel oil possible from road tankers.

FIRE PRECAUTIONS: No port fire brigade. In emergency fire brigades must be called from Alexandroupolis.

WATCHMEN: Not available, and if required must be supplied by vessel.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: 1 packet cigarettes allowed out of bond for each crew member, for each day in port. Wine/beer no restrictions. Spirits, Master allowed 1 bottle.

CARGO GEAR: Load/discharge by ship's own gear.

IDENTIFICATION CARDS: Shore pass issued against crew list and seamen's book. Passes obtainable from Port Authorities.

CONSULS: Consul-Agent of France Tel. 26–720. Consul-Agent of Italy Tel: 28–384.

REPAIRS: Only minor repairs available.

REPATRIATION: Facilities for crew changes and repatriation.

AIRPORT: 5 km. distant. 2 daily flights to and from Athens.

TIME: GMT plus 2 hours. Summertime GMT plus 3 hours.

HOLIDAYS: 1st January; 6th January; Whit Monday; 25th March; Good Friday; Easter Monday; 1st May; 14th May (local); 15th August; 28th October; 6th December; 25th December; 26th December, and all Sundays. Cargo work can be arranged on these days, subject to payment of additional charges.

POLICE/AMBULANCE/FIRE: Police station, 26352; Security Police, 26220; Ambulance, 25272; Fire, 26222. Port Police, 26468 (VHF 12).

TELEPHONES: No facilities for telephones on board.

SHORE LEAVE: Permitted.

DEVELOPMENTS: (a) Supplementary works are being performed outside along the West breakwater.

(b) Dredging works has begun inside the port.

AUTHORITY: Port Authority of Alexandroupolis. *Tel:* 26468 (VHF Channel 12). *Contact:* G. Tsironis (Lieut-Commander), Harbour Master.

ARGOSTOLI, Cephalonia: 38.12 N. 20.29 E.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
Customs Clearance.
2 Cargo Manifests.
Bills of Lading (copy).
4 Ship's Stores List.
4 Lists of Crew's Personal Effects.
Ship's Papers.
Crew Vaccination List.

PILOTAGE: No Pilot station.

ANCHORAGES: Vessels anchor in roads 0.5 miles N.N.W. from Entrance light. Max. channel draft 19 ft.

MAX. SIZE: Up to 19 ft. draft.

HEALTH: Free Pratique given by Port Health doctor.

RADIO: Patras Radio. No VHF.

TUGS: None available.

MEDICAL: Advance notice not required except in urgent cases. For vessels arriving from foreign countries crew require vaccination certificates.

TANKERS: Small tankers discharge at DEH Power Terminal.

FRESH WATER: Can be supplied from the pier using ship's hoses.

FUEL: Small quantities available, but only for yachts.

OPENING/CLOSING HATCHES: Performed by ship's crew.

CUSTOMS ALLOWANCES: 50 cigarettes allowed for each crew member.

CONSULS: No local representation.

REPAIRS: Only minor machinery repairs can be carried out.

REPATRIATION: By air to Athens (once daily) or by ferry-boat.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summertime.

HOLIDAYS: Local holidays are 21st May, 16th August and 20th October, in addition to national holidays. Work may be arranged at double rates.

POLICE/FIRE/AMBULANCE: Police 22200; Ambulance 22515; Fire service available.

TELEPHONES: Can be connected on board vessels without charge.

SHORE LEAVE: Allowed.

AUTHORITY: Cephalonia Harbour Office.

ASPROPYRGOS: 38.02 N. 23.36 E. (See Plan)

DOCUMENTS: All usual certificates including Registry, Safety, Cargo Gear, Radio, Derat, Last Port Clearance and:

9 Crew Lists
2 Vaccination Certificates
Cargo Manifest
List of Spares
Maritime Declaration of Health
1 Vaccination List
4 Crew Effects Declaration
Passenger List
Cargo Documents
2 Special Customs Forms in triplicate
2 Store Lists

PILOTAGE: Cable Agent 72, 48, 24 hours in advance advising ETA. Agent informs Pilot Office of vessel's arrival time. Piraeus Pilots can be contacted on VHF Channel 12 for calling. Pilot boards vessel 0.5 miles S.E. of Piraeus Breakwater.

ANCHORAGES: See "Eleusis" and "Piraeus".

RESTRICTIONS: Max. 60,000 d.w.t., max. permissible draft to enter Eleusis Bay is 35 ft. 9 in.

HEALTH: Pratique is in accordance with International Regulations. Pratique automatic if arriving from another Greek port.
RADIO: Athens (SVA).
VHF: Operative throughout 24 hours on Channels 16, 12, 7 for Pilots and 16, 12, 7, 19 for Eleusis Coastguard. Aspropyrgos Refinery on Channel 8.
RADAR: None.
TUGS: Usually join vessel at the entrance of the channel, ship's lines always used.
BERTHING: Position of berth: Lat. 38° 01′ 34″ N., Long. 23° 35′ 36″ E. Pilot will advise Master of berthing place in accordance with Port Authority instructions. Usually berthing with port side to at crude oil berth; with starboard side to at oil products berth and with the stern to at LPG berth.

According to the Pilot it is preferable to use ropes for mooring.

Also see "Tankers".
MEDICAL: Advance notice not required; clinic available in town of Eleusis if required.
TANKERS: One berth, depth 38 ft. 9 in. with 3 unloading arms (8 in. diameter each) for discharging crude oil. The max. acceptable pressure at the unloading arms is 9 kg./sq.m.

One berth, depth 38 ft. 9 in., with 3 loading arms (8 in. diameter each) for oil products.

One berth, depth 23 ft. 8 in., for loading LPG and oil products with flexible hoses, 6 in. diameter each.

There is one pier for small tankers (coasters) with max. depth 26 ft.
DENSITY: 1025.
FRESH WATER: Can be supplied from the piers (up to a maximum quantity of 300 cu.m. per vessel).
FUEL: Not available at present.
FIRE PRECAUTIONS: Fire wires rigged fore and aft on outboard side of vessel. Deck scuppers plugged. Spark arresters to be fitted on tank openings. Earth connections made. Patrols made by Port Officers.

In the case of a storm, the Dock Master can stop discharge of vessels. The refinery fire fighting procedure is followed.
CONSULS: None.
REPAIRS: While alongside, maintenance of any kind on board is strictly prohibited. In case of an emergency, the issuing of a special written "cold or hot work" permit is necessary.
DRY DOCKS: See "Eleusis".
GANGWAY/DECK WATCHMEN: Not required.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 open bottle of wine/spirit allowed per crew member.
REPATRIATION: All facilities available for crew changes and repatriation.
AIRPORT: Direct overseas flights available via Athens airport at Hellinicon.
TIME: GMT plus 2 hours; Summertime (March to September) GMT plus 3 hours.
POLICE/AMBULANCE/FIRE: All emergency services are available through the terminal office. Fire alarms are installed throughout the jetty. Fire tel: 300. Ambulance tel: 311, Police tel: 353.
SERVICES: Compass adjusting. Electronic equipment services.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Shore passes issued by Port Authority.
AUTHORITY: *Operators:* Hellenic Aspropyrgos Refinery, 18 Hermou St., P.O.B.3649, T.K. 10210 Athens, Greece. *Tel:* 5573252. *Telex:* 21.5442, 21.5443 (Ref Gr). *Cables:* Refaspr. *Contact:* A. Tzouros.

CHALKIS: 38.27 N. 23.36 E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests.
2 Stores and Spares Lists.
2 Crew Personal Effects Lists.
Health Certificate.

PILOTAGE: Pilotage is compulsory.

Application for Pilot to be made by radio through Agent to Chalkis Port Authority. ETA required at least 8 hours before arrival.

Apply for Pilot through VHF Channel 12, or through radio/telephone on 2364 kHz calling Harbour Master, Chalkis.

Pilot boards from black motor-boat with white horizontal stripes, about 10 m. length, in a position about 1 mile – 1.5 miles North of the light buoys of the Northern Port.

The pilotage area extends from 1 mile North of red and green light buoys, North of Evripos Bridge, and to the South of Euboea, 2.5 miles from Bourtzi Point.

The anchorage for vessels coming from the North of Euboea and awaiting Pilot is at the centre of the Euboean coast off Lighthouse Kakokefali, North of the 2 light buoys and outside the bearing 020°/200° which is the axis of vessels passing in and out of Evripos Strait.

Safe anchorage for vessels coming from South of Euboea and awaiting Pilot is 1 nautical mile South of Bourtzi Point.
ANCHORAGES: *(a)* In the basin of South Port clear of vessels passing in the Straits. Depths over 21 ft.

(b) In North Port between the light buoys and Kakokefalis lighthouse and outside the axis of course 020°/200°. In depths of 10–15 fathoms.

(c) Anchorage mentioned in "Pilotage" above, depths of 10 fathoms.
RESTRICTIONS: Entry restricted only by depth. Max. draft 21 ft. For vessels intending to pass Evripos Strait having draft 19 ft., passage possible only at slack tide or with following tide. Full details in Evripos Straits Operations Regulations.

There is also a restriction in Steno Straits where there is an overhead cable 38 m. above sea-level.
MAX. SIZE: Max. draft 21 ft. in daytime and 19 ft. at night for vessels entering port. For vessels navigating Evripos Strait max. length 110 m., max. draft 19 ft., breadth 20 m. and subject to local regulations.
HEALTH: Pratique not required if coming from another Greek port. Otherwise International Pratique regulations are applied.
RADIO: No local radio, all messages should be passed through Athinai Radio.
TUGS: 1 tug available, joins vessel off the berth. Ship's tow lines used. Tug is compulsory for vessels over 1,000 g.r.t. Tug used only for berthing and unberthing.
BERTHING: Berthing in both the North Port and the South Port can only be effected at slack water subject to available tide.
BRIDGES: Passage above Evripos Bridge can only be effected at slack water or with following tide.
STEVEDORES: Loading, discharging, carried out with ship's gear. Notice must be given by Agent to stevedores not less than 6 hours before vessel's arrival.

Cargo working rates: General cargo 80 tons – 100 tons every 8 hours. Bagged cargo 100 tons – 150 tons every 8 hours. Timber 70 cu.m. – 90 cu.m. every 8 hours.
MEDICAL: Agent should be advised beforehand if medical assistance required on arrival. Clinic facilities available. Vaccination certificates required.
DENSITY: Average 1025.
FRESH WATER: Drinking water can only be supplied in small quantities by tanker lorry.
FUEL: Can be supplied in small quantities by tanker lorry.
WATCHMEN: Not required.
HATCHES: Opening and closing hatches can be effected by ship's crew or by workers if requested.
CUSTOMS ALLOWANCES: Crew members each allowed 1 packet of cigarettes per day. Only the Master is allowed 1 or 2 bottles of alcohol while vessel in port.
IDENTIFICATION CARDS: Shore passes are issued by Port Authorities.
CONSUL: France, Tel: 2574.
DRY DOCKS/REPAIRS: Chalkis Shipyards S.A., P.O.Box 18, Chalkis, Greece. Tel: (0221) 31502, 31512. Telex: 272143, 272180.

Shipyard has 3 floating docks (max. size 48,000 d.w.t.) and a lay-by berth for major repairs.
REPATRIATION: No difficulties as there are excellent communications with Piraeus. Also see "Shipmaster's Report".
AIRPORT: Nearest is Athens International Airport.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: 1st January; 6th January; 25th March; 21st April; Good Friday; Easter Monday; Easter Sunday; 21st May; 15th August; 28th October; 6th December; 25th and 26th December. Local holiday 26th July.
POLICE/FIRE/AMBULANCE: Port police 22580; Fire 23333; Ambulance 22282.
TELEPHONES: Cannot be connected on board.
SHORE LEAVE: Allowed.
DELAYS: Only waiting for suitable tides.
DEVELOPMENT: A pier 240 m. is under construction at Vourkos in the South Port; depth alongside 26 ft.

SHIPMASTER'S REPORT: June 1981.

The name appears to be pronounced Halkis but according to local people the spelling can be Chalkis, Khalkis, Halkis or Kalkis.

To repatriate Indian crew Agent requires names of those persons leaving at least 48 hours in advance. Crew usually cleared through Immigration 48 hours beforehand and through Customs when they leave the vessel. Immigration office closes at 1300 hrs. and all day Sunday. For British personnel, Immigration can be arranged 24 hours beforehand. All personnel must ensure that anything declared on the manifest such as cameras, radios, etc., are crossed off on being taken ashore otherwise vessel will be fined if these items not sighted by Customs when vessel sails.

The bridge lowers and retracts under the road on the South side.

According to the Pilot the maximum tidal rate is 4 knots although it does appear faster at times.

AUTHORITY: Chalkis Port Authority.

CORFU (Kerkyra): 39.37 N. 19.56 E.
(including Kalifoka and Kefalomandouko)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
Maritime Declaration of Health.
3 Stores Lists.
3 Spares Lists.

PILOTAGE: At least 24 hours before arrival ETA should be passed to Port Authority on 2182 kHz, answering on 2830 kHz also VHF Channels 7 or 12 and Telex No. 33111. Vessels requiring Pilot during daytime should hoist letter "G" of international code, and sound letter "G" in the morse code on ship's whistle at intervals. Vessels should await Pilot in position Lat. 39° 38′ N., Long. 19° 57′ E. nearest to the coast of Ptychia Island (Vido) and Corfu, depending on weather conditions.

ANCHORAGES: Safe anchorages in the area between Vido Island and coasts of Corfu, depth about 30 m. During strong N.W. winds there is safe anchorage in the roadstead at Garitsa Bay at a distance of 0.5 miles from the shore where depth in excess of 20 m.
RESTRICTIONS: Only during unfavourable weather conditions or lack of berthing space.
MAX. SIZE: Draft 7.0 m.
HEALTH: Port Health Officer boards vessel on arrival and examines health declaration. In cases of suspected disease or fever on board the Health Officer will examine entire crew and passengers.
RADIO: Radio Kerkyra. 2182 and 2830 kHz.
VHF: Radio Kerkyra on Channel 26. Port Authority on Channels 7 and 12.
TUGS: One tug – "Hermes".
BERTHING: Vessels should prepare fenders prior going alongside berth.
STEVEDORES: At least 24 hours advance notice of ETA required order arrange gangs. There are 2 silos for the discharge of bulk grain at Mandouki.
MEDICAL: Agent should be advised in advance of any medical requirements. Medical clinics available.
DENSITY: 1025. Max. height of tide 0.6 m.
FRESH WATER: Available through 2 in. hoses. Cost 200 drachmas per ton (approx.).
FUEL: For yachts in the new harbour there is a diesel-oil tank, capacity 10 tons. Also available from road tanker for all vessels alongside.
FIRE PRECAUTIONS: Loading/discharging of inflammable liquids and explosives generally forbidden without permission of Port Police. The anchorage for vessels carrying inflammable liquids or explosives is between Lazareto Islet and N.W. of breakwater point.
WATCHMEN: Required.
HATCHES: Opened and closed by stevedores. Hold cleaning service available.
CUSTOMS ALLOWANCES: Crew of Greek vessels are not allowed more than immediate requirements out of bond. Seamen signing off and passengers leaving the vessel are allowed 200 cigarettes.
IDENTIFICATION CARDS: Required.
CONSULS:
Belgium: S. Savanis, 44 Alexandras Av. Tel: 33788.
Brazil: K. Palatianos, 124 Kapodistriou St. Tel: 30767.
Denmark: V. Patras, 140 Xen. Stratigou St. Tel: 38712.

Sweden: Adam Bogdanos, 5 Donzelot St. Tel: 29469.
United Kingdom: I. Karidi-Patrikioy, 11 Alexandras Av. Tel: 30055.
REPAIRS: Facilities for minor repairs only.
DRY DOCK: Largest dry dock 20 m. length, 2 m. depth.
REPATRIATION: Facilities for crew changes and repatriation available.
AIRPORT: 2 km. from port. During winter 2 flights daily to Athens. During summer frequent daily flights to Athens, Thessalonika and abroad.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: Local holidays are 21st May, 11th August and 12th December. In addition Corfu observes standard Greek holidays.
POLICE/AMBULANCE/FIRE: Port Police, tel: 32655, 30481; Police, tel: 38661; Ambulance, tel: 39403, 30033, 30562; Fire, tel: 39533.
TELEPHONES: Telephones only available for placing onboard for special cases.
GENERAL: Prevailing wind is from the N.W. Anchorage in the new harbour unsatisfactory due to mud bottom.
SHORE LEAVE: Allowed.
REGULATIONS: Forbidden to approach Lazareto Islet.
AUTHORITY: Port Authority of Corfu, Xenofontos Stratigoy 2, GR 491 00 Corfu, Greece. *Tel:* 32655, 39513, 30481. *Telex:* 33111. *Contact:* Harbour Master.

ELEUSIS (including Skaramanga): 38.02 N. 23.33 E.

(See Plan)

DOCUMENTS:
4 Crew Lists.
4 Passenger Lists.
Bill of Lading.
2 Lists of Stores and Provisions.
PILOTAGE: Piraeus Pilot Station regulations are operative.
ANCHORAGES: Port offers safe anchorage. Bottom mud and sand.
RESTRICTIONS: After sunset and for vessels intending to enter Eleusis port through Salamis Channel, it is imperative to give 6 hours notice of expected time of arrival to Port Authorities of Eleusis, in order to obtain special permission from the naval yard of Salamis.
MAX. SIZE: No limitations to length and breadth at the installations or at the main port. Max. permissible draft of vessel entering Eleusis Bay is 35 ft. Max. draft at berths is 33 ft. Also see "Tankers".
HEALTH: For vessels arriving from other Greek ports, Pratique is automatic. Vessels arriving from foreign ports boarded by Health Officer who grants Free Pratique.
RADIO: Athinai, 2182 kHz.
TUGS: Join vessel outside Piraeus Harbour and formalities much same as Piraeus.
BERTHING: Overall length of jetties and quay at Eleusis 715 m. Max. depth over 80 m. of jetty length is 33 ft. with depths of 26 ft. elsewhere.
SPECIALISED CARGO-HANDLING: Loading/discharging of iron ore is carried out by *(a)* Holivourgiki Co., (See "Shipmaster's Report" - August 1985) which owns a pier of 180 m. long and from 26 ft. to 36 ft. depth, equipped with 4 cranes with average discharge rate of 6,000 t.p.h., and *(b)* by Metallia Voxitou Elefsinos Co., which offer a special anchorage with buoys. Loading is effected by means of silo.

Loading/discharging of fluid chemicals or liquid gas are carried out by Petrogas Co. to their private pier of 35 m. long and 15 ft. depth.
MEDICAL: Advance notice not required. Clinic available in town of Eleusis if required.
TANKERS: Operating companies supply reducing pieces. No facilities for residue discharge. *(a)* Esso Pappas: length 160 m.; breadth 30 m.; depth at pier 30 ft. *(b)* Greek Refineries: length 93 m.; breadth 12.70 m.; depth 7 m. *(c)* Texaco: length 80 m.; breadth 6 m.; draft 4.50 m. *(d)* Mamidakis: length 40 m.; breadth 5 m.; draft 27 ft.
Shipmaster's Report: June, 1981.

Petrola petroleum harbour just West of Elefsis town.

Petrola is owned by John Latsis Co. The terminal has their own VHF Channel 66 alpha, also use Channel 12 but this usually congested.

Moorings: Normally 3, 2, 1. Normally 2 tugs. Pilots employed by Petrola and come on board after Sea Pilot has taken vessel through the Bay. Fresh water available from jetty.
DRY DOCKS:
Hellenic Shipyards Co.

Skaramanga Shipyard: Situated on the coast between the Port of Piraeus and Eleusis Bay. Shipyard is 8 miles by road from Athens and 7 miles from Piraeus; driving time 25 and 20 minutes respectively.

Mailing address: Hellenic Shipyards Co. Athens: 4 Academias St. Tel: 36.11.142. Cables: Shipyard, Athens. Telex: 215123.

Skaramanga: Tel: 55.73.351, 55.73.471. Cables: Shipyard, Athens. Telex: 215293, 215396.

Office hours at Skaramanga: 0815 hrs. to 1715 hrs. (weekdays), 0815 hrs. to 1345 hrs. (Saturdays).

Floating Docks

Main Particulars	*Dock No. 1*	*Dock No. 2*	*Dock No. 3*
Lifting capacity	30,000 tons	22,000 tons	25,500 tons
Docking capacity (d.w.t.)	72,000 tons	37,000 tons	60,000 tons
Length overall	826 ft.	673 ft.	760 ft.
Length on keel blocks	760 ft.	605 ft.	693 ft.
Breadth inside banks	121 ft.	105 ft.	111 ft.
Breadth outside banks	147 ft.	129 ft.	136 ft.
Ht. of WL above keel blocks	28 ft.	28 ft.	28 ft.
Pumping time (Minutes)	120 ft.	80 ft.	100 ft.

Skaramanga Yard's 3 floating docks have been designed in such a way as to eliminate delays of any kind in the raising of large vessels and to ensure that the work is carried out in minimum time and with the least possible inconvenience to the crew living on board.

The basic equipment of the docks is the following; 2×5-ton cranes, 2 fire extinguishing pumps 120 cu.m. per hour at 90 m. WC, DC current supply to ships 1200 A 220 V, AC current supply to ships 600 A 440 V 60 cycles, multipoint welding rectifier 2500 A, 2 oil pumps for supply of fuel oil from the dock to the vessel 60 cu.m. per hour at 50 m., 2 compressors 17 cu.m. per minute at 7 atu, emergency diesel generator set 200 KVA, foam fire extinguishing system, steam boiler and water distilling plants.

Shipmaster's Report: 1978.
Tankers may discharge residue at the deballasting station of Hellenic Shipyards, max. output 500 cu.m./hour.
Graving Docks
1. Capacity 500,000 tons. Length 420 m., breadth 75 m., depth 9.5 m.
2. Capacity 250,000 tons. Length 327 m., breadth 53.6 m., depth 9.25 m.

Ships are manoeuvred at the dock entrance with the assistance of 2×5-ton capstans situated on each side of the entrance gate. They are then shifted inside the docks by 2×15-ton auto-tensioning winches and hauling-in trolleys (mules) running on tracks on each side along the dock subway.

The dock floor is fitted with specially designed keel blocks for easy fitting and removal and with electrically operated side blocks.

The Graving Dock is served by 2×100-ton cranes, 1×50-ton crane and a small 5-ton crane.

A fleet of 5 powerful tugs is on hand at Skaramanga Yard to assist docking and undocking operations of all vessels calling at the yard.

Eleusis Shipyards S.A. is located 27 km. outside Athens. The site was chosen on account of the several advantages it presents. The bay is well protected from strong winds, sources of raw materials are available in the vicinity of the yard, and adequate transportation, power, and telecommunication facilities can service the needs of yard.

Athens Office: 67 Athinas Street, Athens 112. Tel. 349 053. Cables "Helnafel Athinia". Telex 215215 Esc Gr.

Yard: Eleusinia, Eleusis. Tel. (01) 5535111. Cables "Helnafel Eleusis". Telex 215684 Yard Gr and 215690 Yard Gr.

Floating Docks: Three floating docks are available with the following specifications:

	No. 1	*No. 2*	*No. 3*
Length	162 m.	227.5 m.	252 m.
Breadth at entrance	23 m.	33 m.	41 m.
Draft over keel blocks	6.30 m.	8 m.	9.40 m.
Lifting capacity	11,500 m. tons (20,000 d.w.t)	20,000 m. tons (60,000 d.w.t.)	30,000 m. tons (115,000 d.w.t)
Cranage	5 t at 15 m.	12 t at 20.6 m.	12 t at 20 m.

Quay Wall: The 640 m. long quay wall is equipped with 40 and 15 ton cranes, range 30 m.; power 220 volts DC 100 amp. – 42 volts DC 25 amp. – 280 volts AC 630 amp. Floating crane, 50 tons capacity.
Tugs: Available for manoeuvring purposes at all times.
FRESH WATER: Barge delivery available.
FUEL: Available ex-wharf at tanker installations subject advance notice. Can be supplied by barge at other locations.
FIRE PRECAUTIONS: The usual precautions applicable to oil installations. During operations of white liquid (petrol, spirits, etc.) regulations require a tug to be standing by.

HATCHES: Usually opened and closed by crew and subject additional payment by stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits allowed per Crew member out of bond.
CONSULS: None.
REPAIRS: All grades of repairs can be carried out at Eleusis shipyard, and also at Skaramanga (see "Dry Docks").
AIRPORT: Athens Airport. Regular international flights.
HOLIDAYS: Cargo operations can be effected during usual Greek holidays, following submission of application to Harbour Workers' Union and subject cost increase of 75% above normal.
POLICE/AMBULANCE/FIRE: Eleusis Police Station 46674; Ambulance 46503; Fire Brigade 0199.
SPECIAL PRECAUTIONS: See "Piraeus".

SHIPMASTER'S REPORT: August 1985.
Berth of Chalivourgiki S.A.
Vessel: 20,500 d.w.t.
Max. Size: LOA 165 m. max. draft 39 ft.
Products Handled: Steel.
Anchorage: Eleusis Roads.
Pilotage: Pilot boards and disembarks at Piraeus.
Tugs: From Piraeus only.
Cranes: 2×20 tons.
Fresh Water: Available alongside.

AUTHORITY: Eleusis Port Authority.

IRAKLION (Heraklion), Crete: 35.20 N. 25.10 E. (See Plan)

DOCUMENTS:
- 4 Cargo Manifests.
- 4 Crew Lists.
- 4 Passenger Lists.
- Declaration of Crew's Personal Effects.
- List of Stores and Provisions.
- Maritime Declaration of Health.
- Vaccination Certificates.

PILOTAGE: Pilotage area extends 0.5 to 1 mile N.E. of breakwater. Advance notice of ETA should be passed to Agents order arrange Pilot. Contact may be made with Pilot station on VHF Channel 12 during daylight, also when within distance of 3–12 miles, and subject prior agreement of calling time, communication can be effected by radio–telephone via Radio Iraklion – Pilot station telephone 286133. International pilotage signals apply. Pilot boat is wooden boat 12 m. length, hull colour black, with white deckhouse, carrying black board with word "Pilot" in white letters. In bad weather vessels should proceed close to entrance of port for Pilots boarding.

A cement pillar has been installed on the end of the extension of the North breakwater. Fl. G. every 3 seconds, visible 9 miles. The pilot boat is equipped with VHF, range 50 miles.
ANCHORAGES: Anchorage East of port entrance is forbidden owing to numerous underwater cables. In good weather conditions anchorage to be found 0.75 mile Northwards of North breakwater with Enetic Castle bearing 180°. In bad weather conditions, best anchorage is at a distance of about 5 nautical miles to the W. of the North breakwater and at a distance of 3 miles from the coast (Ellinoperamaton Haven); depth of water requires a big scope of anchor chain.
MAX. SIZE: Max. length 250 m., draft 29 ft. – 29 ft. 6 in. Usual rise and fall of tide 1 ft. but increasing with South winds and decreasing with North winds.
HEALTH: International regulations apply for obtaining Free Pratique. In the event of suspected disease vessel will remain under quarantine until cleared. Pratique is automatic if arriving from another Greek port.
RADIO: Radio Iraklion – SUH 2128 kHz.
TUGS: Tug of 1,300 h.p. operated by Nicolas E. Vernicos. Telephone Piraeus 4527812-4522337 (24 hours).
BERTHING: Pilot will advise Master of berthing position.
STEVEDORES: Port Authority owns 3 cranes but they are seldom used. Cargo operations usually conducted by use of ship's own gear. Discharge rates per gang in 8 hours: bulk cargo 100 tons, bagged cargo 140 tons, liquid cargo subject ship's equipment – transportation by barges, timber 100 cu. m.
MEDICAL: Advance notice should be passed to Agents if requiring medical attention. Clinics and medical treatment available.
TANKERS: Only very small tankers discharge in Iraklion Port and Ellinoperamaton Haven. At Iraklion, tankers discharging liquid fuel are required to berth at East breakwater (fuel pier). Attendance of fire brigade and 1 tug standing by is compulsory.
DENSITY: 1020.
FRESH WATER: Available ex-berth or ex-barge. Rate of delivery ex-berth about 500 tons per 24 hours.
HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: 2 packets of cigarettes per day per crew member allowed out of bond, and one 500 ml. bottle wine/spirits for whole time of vessel's stay in port.
IDENTIFICATION CARDS: Shore passes issued by Port Authorities.
CONSULS:

Belgium	tel. 282520 and 282296
Denmark	tel. 282253
Finland	tel. 284860 and 283860
France	tel. 282347
Germany F.R.	tel. 282266 and 285400
Netherlands	tel. 282615
Norway	tel. 282667
Sweden	tel. 282476 and 285859

REPAIRS: Minor repairs available by machine shops in town of Iraklion. No facilities for deck repairs.
AIRPORT: Distance 5 km. Now an international airport with numerous flights.
TIME: GMT plus 2 hours, GMT plus 3 hours end March – end September.
HOLIDAYS: Usual Greek holidays plus local holidays of 25th August and 11th November. Cargo work can be arranged on holidays subject additional costs.
POLICE/AMBULANCE/FIRE: Police, tel. 282241, 282430, 282316; Ambulance, tel. 282894, 282638; Fire, tel. 283555, 282333.
AUTHORITY: Port Fund of Iraklion.

ISTHMIA, Corinth Canal (including Sousakion and Corinth): 37.55 N. 23.00 E. (See Plan)

DOCUMENTS: (For Sousakion only).
Port Authorities
- Crew List.
- Passenger List.
- Ship's Certificates.
- Health Certificates.
- Certificate of Anchorage Dues.

Customs
- Customs papers and declarations.
- Cargo Papers.
- List of Stores and Provisions.
- List of Crew's Personal Effects.

PILOTAGE: There are 16 Pilots for the Corinth Canal. Cables: "Corinth Canal", tel: 0741-24452, telex: 232164 Dico Gr. Master of vessel must give at least 4 hours' notice of ETA in order to avoid delay. For Pilot signals, etc., see article 7 of the New Company of the Corinth Canal "Regulation of Navigation and Tonnage".
ANCHORAGES: Open anchorage in Isthmia Bay.
RESTRICTIONS: Corinth Canal closed every Tuesday from 0600 hrs. to 2000 hrs. in order for maintenance work to be effected.
MAX. SIZE: The max. draft of ships negotiating the Canal, in relation to their width, is defined as below, assuming normal water level and normal weather conditions.

Width	*Maximum draft*
16.0 to 16.5 m.	6.2 m.
15.5 to 16.0 m.	6.2 m.
15.0 to 15.5 m.	6.6 m.
14.5 to 15.0 m.	6.8 m.
14.0 to 14.5 m.	7.0 m.

The max. draft for vessels of less than 14.0 m. width is 7.2 m. The max. width must not exceed 18.3 m. (60 ft.).

Special instances will be examined by the Master and the Canal Service in collaboration.
HEALTH: (For Sousakion only). Pratique effected by health department of the Port Authority assisted by temporarily engaged doctor. In cases of suspected contagious disease vessel will be held under quarantine and if necessary fumigation will be conducted at Piraeus.
VHF: Corinth Canal Pilots on VHF Channel 11. Harbour Master at Isthmia on Channel 19. Harbour Master at Corinth on Channels 19 and 12.
TUGS: Join vessel near Canal entrance at Isthmia and Possidonia. Ship's lines always used.
BERTHING: In Sousakion at private factory pier. No berths at Isthmia.
MEDICAL: Agent should be advised in advance of number of crew needing medical assistance, also information of any vaccination required.
FRESH WATER: Not available either at Sousakion or in the Canal.
FUEL: No fuel available at Corinth.
CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarettes out of bond and 1 bottle wine/spirits.
CARGO GEAR: Loading/discharging by ship's gear.
AIRPORT: 100 km. distance.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
POLICE/FIRE/AMBULANCE: Telephone Harbour Master of Isthmia No. 22129.
DELAYS: Possible delay up to 1.5 hours in transiting Canal if another vessel already transiting canal from opposite direction.
GENERAL: Passage via the Corinth Canal is a *Transit*.

SHIPMASTER'S REPORT: (Corinth) 1977.
Vessel: 5,700 g.r.t., 9,200 d.w.t., Summer draft 24 ft. 07 in., LOA 409 ft. 05 in.
Documents: No special entry papers required and if anchoring to await the berth Customs and Immigration will usually board at anchorage.
Port of Corinth: The port has no VHF communications but messages can be passed through the Corinth Canal Pilot Station on Channel 11. Pilot will then telephone Agents.

Anchoring off the port in the case of delay is possible but cannot be described as safe due to the close proximity of land or shoal water. Holding ground, however, is good. This vessel anchored with Corinth Breakwater light bearing 248° in about 16 fathoms of water using 6 shackles of cable. Vessel rode out a force 7/8 gale from the North without dragging but with the cable fully stretched the bridge was only 2.3 cables from the breakwater and too close for comfort. A second anchorage was used with the breakwater light bearing 232° and the ship's bridge 5.6 cables from the breakwater in about 18 fathoms of water. Again with the cable fully stretched this gave a clearance off the nearest shoal water of 3 cables, 6 shackles of cable being used. This is a slightly more comfortable position and again gale force winds were experienced without dragging. The vessel did drag in this position but not until winds were gusting to force 9 as a prelude to very severe storm conditions in which no anchorage of this nature would have been satisfactory. The bottom is stiff grey mud and care must be taken when anchoring not to impede the traffic approaching the canal entrance. Anchoring further to the Westward in order to increase the clearance from shoal water, etc., is not recommended as in addition to the much greater depth of water the holding ground deteriorates, becoming crumbly mud.

A boat can be provided by the Agents for use as a liberty boat when at anchor and there is no objection on the part of the Authorities to using the ship's boats for runs ashore.

A first examination of the chart (B.A. Chart No. 1600) will not indicate anywhere to berth a vessel of this size. However, dredging work has been carried out and the berth is on the S.E. side of the breakwater where there is room for a vessel of this size and for one small coaster in addition. The breakwater itself is slightly different in shape from that shown on the chart and building and dredging work are still in progress at its seaward end. The green flashing buoy shown on the chart is no longer in position but a light of similar characteristics is now shown from a structure on the breakwater end.

Maximum draft for berthing is 6.7 m. (22 ft.) and on this vessel's first call soundings between ship and quay when alongside indicated depths of between 24 ft. and 26 ft., depths outside the ship being some 5 ft. greater.

A Pilot is available, and is of great assistance. He is an experienced shipmaster and has very good local knowledge. A small tug is presently employed shifting barges and cranes employed in harbour works and it is sometimes possible to use his services. This is dependent upon the tugmaster. He is particularly useful when undocking to hold the stern off the quay.

Initial approach to the berth is bow on until the starboard anchor has been let go which should be done at such a distance from the berth so as to allow 4 shackles of cable in the water when the vessel is alongside. Vessel is gradually swung on the anchor, long head and stern ropes are run by boat, and vessel is so brought alongside port side to.

The undocking operation is straightforward, the bow being pulled off the quay by means of the anchor. The only danger is that of the propeller coming into contact with the quay and here the services of the tug are valuable.

Docking and undocking in strong winds from any direction would be hazardous and in many cases impossible. Docking is always done in daylight and I do not recommend undocking at night either although this would be possible under calm conditions. An added disadvantage of undocking in evening time would be that the vessel would arrive at the Narrows ferry crossing in the dark.

The Pilot agrees with this appraisal of the situation.

The quay itself is smooth concrete usually well fendered with rubber tyres and with good mooring posts. Vessel should be well secured as strong winds from a Northerly direction are experienced particularly in Winter.

There is a concrete apron some 3 metres wide alongside the ship and clear of this a considerable unsurfaced area on to which cargo is discharged. This area is very wet and dirty during rain.

Fresh water is available but 7 lengths of ship's hose are necessary to reach the outlet. A permanent water main is in the process of being laid alongside the ship.

Cargo operation: This is controlled by the 'Carton Pack' plant manager, there being no stevedore as such. Ship's gear is used and normally 3 gangs of stevedores.

The working day is from 0800 to 1700 hrs., evening overtime being unusual. Seven day working is possible but all overtime is subject to the plant working to receive the cargo.

Stevedores can discharge rapidly from the ship lifting 2 rolls of linerboard at a time but there are frequent stoppages due to congestion on the quay which reduces the overall discharge rate to about 25–27 rolls per gang hour. Although head and end clamps are provided by Charterers (carried on board) stevedores refuse to use these and all discharge is by rope sling. Rolls are landed on wooden platforms (timber supplied by Charterers) and then rolled by hand clear of the concrete apron. Two or possibly 3 fork lifts are used to load rolls from here onto lorries for transportation to the plant a short distance away.

Damage rate is high due to rolls becoming wet and dirty on the unsurfaced quay with bands being broken and outer layers torn. Further damage is caused by the fork lifts when loading the lorries.

No improvement in discharging conditions can be seen unless the quay is surfaced with proper drainage and unless Charterers are prepared to provide clamp machines for handling the rolls on the quay. Care should be taken when signing final outturn report as of course damages are written up to make it appear that they took place before discharge.

Weyerhaeuser are fully conversant with the situation.

Agents: Situated in Piraeus which is some 90 km. away. They use sub-Agents in Corinth.

The sub-Agents are not geared for handling a foreign-going ship. To obtain action on major items it is best to telephone Agent in Piraeus direct.

Bunkers: Basically not available but diesel oil has been taken, having been brought from Piraeus by road tanker and with ten days ordering notice.

Repairs: These cannot be carried out except by bringing repairers from Piraeus at very high cost.

Lloyds' surveyor is obtainable from Piraeus, this being best arranged directly by the ship.

Provisions: These can be obtained locally and are of acceptable quality. There is no ship chandler as such and the system is for the Catering Officer to visit various suppliers with the Agents, pick his purchases and then leave Agents to collect and deliver to the ship.

Shore Leave: Passes are required and are renewed each visit. They should be available for return to Immigration on departure.

Corinth Canal: This vessel passed through the canal on the 4th November, 1977 on a draft of 3.6 m. forward and 4.74 m. aft.

Application should be made in advance to the Canal Authority quoting the minimum draft obtainable.

The transit presented no difficulties.

SHIPMASTER'S REPORT: (Corinth) December 1984.
Pilotage: One private Pilot.
Restrictions: Berthing daytime only. Unberthing anytime day or night.
Loading/Discharging: Vessel loaded iron pipes, rate 600 tons to 700 tons per gang, per 8 hour shift by ship's gear. Working only during daytime (never night-time).

Vessel discharged iron plate in coils, rate 600 tons per gang, per 8 hour shift by shore crane.
Cargo Handled: Vessel loaded iron pipes, porcelain in powder and fruit in boxes. Vessel discharged iron plate in coils and paper for boxes in rolls.

ITEA: 38.26 N. 22.25 E.

DOCUMENTS:
6 Crew Lists.
4 Passenger Lists.
Cargo Manifest.
Bills of Lading.
2 Lists of Ship's Stores and Spares.
Health Declaration.
Ship's Certificates.

PILOTAGE: Vessel should advise ETA at least 24 hours before arrival through the telegraphic office of Itea. Pilots are called with the assistance of the Port Authority on VHF Channel 12.

Pilot boards 1 mile S.E. jetty lighthouse. Pilot boat painted black with white deckhouse, the word "Pilot" is painted in white letters on both sides. On the bow is painted "PY21".

In bad weather vessel should enter harbour without Pilot and anchor using both anchors.

ANCHORAGES: Available inside the harbour and in Aggolis Gulf. Safe anchorage in the vicinity of the jetty head in depths of 8 m. – 10 m.
RESTRICTIONS: Vessel may enter harbour day or night. Harbour anchorage suitable for vessels up to 60 ft. draft.
MAX. SIZE: Max. LOA 130 m., Max. draft 6.0 m. Also see "Berthing."
HEALTH: Pratique is given on arrival by the port medical officer.
RADIO: Contact possible through Hellas coastal radio.
VHF: Contact with Port Authority and Pilot made on Channel 12.
TUGS: None available.
BERTHING: One pier. East side can accommodate one vessel with max. LOA 83 m. and draft 6.0 m. West side can accommodate one vessel max. LOA 130 m. and draft 6.0 m.
Parnassos: Bauxite loading facility. Max. size 30,000 d.w.t. Loading by conveyor.
Elefsinos: Bauxite loading facility. Max. size 10,000 d.w.t. with tide of 25 cm. – 60 cm. Loading by conveyor.
STEVEDORES: Gangs should be ordered in advance by Agents on basis of Master's ETA. Loading and discharging is effected by ship's gear.
MEDICAL: 24 hours' notice preferred if any medical requirements. Vaccination can be arranged within 24 hours. Hospital in Amfissa, 13 km. from the port.
TANKERS: There are no special installations for loading/discharging tankers.
FIRE PRECAUTIONS: There are no specific precautions.
GANGWAY/DECK WATCHMEN: Required, Master to appoint crew member.
CARGO GEAR: Loading/unloading by ship's gear.
AIRPORT: Nearest airport at Athens, distance approximately 210 km.
DENSITY: 1025.
FRESH WATER: Not available.
FUEL: Not available.
HATCHES: Hatches are opened and closed by ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 opened bottle of alcohol is allowed each man.
IDENTIFICATION CARDS: Needed for crew men going ashore.
CONSULS: No local representation.
REPAIRS: No facilities for repairs.
REPATRIATION: Can be arranged.
TIME: GMT plus 2 hours. End March to end September GMT plus 3 hours.
HOLIDAYS: Cargo work can be effected on all holidays on payment of overtime.
Official Holidays: January 1st; January 6th; Holy Monday; First Monday of Lent; Good Friday; Easter Sunday; Monday after Easter; 25th March; 1st May; Ascension Day; 6th August; (Local Holy Day); 15th August; 28th October; 6th December; 25th December; 26th December.

POLICE/AMBULANCE/FIRE: Police: Tel. 32222; Ambulance: Tel. 28400; Fire: Tel. 28199.
TELEPHONES: Not available.
REGULATIONS: There are general and specific regulations for the Port of Itea.
DELAYS: Delays in loading can seldom be expected.
DEVELOPMENTS: Extension and widening of the existing breakwater and the construction of a second breakwater.
AUTHORITY: Port Authority of Itea.

KALAMAKI: 37.52 N. 23.01 E.

SHIPMASTER'S REPORT:

DOCUMENTS: See "Piraeus".
PILOTAGE: Arranged by Agent.
MAX. SIZE: Max. draft 38 ft. (Additional 1 ft. of draft by arrangement).
TUGS: Berthed without tug. Agent can arrange small tug from Corinth Canal.
BERTHING: Berth for discharging soya beans at Kalamaki Soya Mills (Refinery).

Bulk Handling facility: Fixed steel tower with 2 suction pipes capable of a total of 250 tonnes/p.h. but generally slower. Vessel to shift from hatch to hatch. Outreach of arms about 16 m.

The berth is not marked on the chart – B.A. 1600 and U.S. D.M.A. 54289. It is situated on the North shore of the Sarnikos Kolpos near the Eastern entrance to the Corinth Canal (Dhiorix Korinthou). When alongside, the Canal Breakwater Lt. Ho. was bearing 253°×0.64 miles and Akra Sofia 195°×1.14 miles. Starboard side to.

Mooring bollards are adequate, there being 4 suitable for backsprings on the short face (about 64 m.) of the 'T' jetty and 1 on shore for the headlines. At the Eastern side of the berth there is a new berth set in from the line of the jetty consisting of 4 concrete dolphins each with a bollard and 3 of our sternlines were made fast to these. Between this new berth, which is for discharging logs, and the leg of the 'T' jetty there is a facility for loading the products of the Soya Oil refinery into coasters. Tyre fenders on the 'T' jetty are few.

On approaching the berth from Eastwards it is recognisable by the dark grey ribbed metal silos and the lattice steel tower of the discharging unit.
FRESH WATER: Obtainable by truck 15 tonne capacity or by barge from Piraeus. Pipe for loading water from trucks will have to be extended by ship's hoses particularly if working cargo in forward hatches. Cost per truck about 3,000.00 Drachmas. Agent says price for barge supply is comparable to truck if a large quantity is required.
STEVEDORES: *Working Hours:* Continuous – Workers supplied by plant.
AGENT: *Sub-Agents:* G. Karagiorgis of Corinth. Cables: "Kaskoutas Corinth".

ADD S.M.R. ✓

KALAMATA: 37.02 N. 22.07 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port within which a vessel is considered to be an "arrived vessel" and (subject to Charter-Party Terms) laytime commences to count is 0.5 mile from the breakwater red light, where Pilot boards.
DOCUMENTS:

3 Crew Lists, plus 3 additional for passenger vessels.
3 Crew personal effects lists, plus 3 additional for passenger vessels.
3 Deck, Engine and Steward department store lists.
1 Cargo Manifest.
All ship's official documents.
2 Crew vaccination lists, plus 2 additional for passenger vessels.
1 Health declaration.

The above are not necessary for incoming vessels from Greek ports.
PILOTAGE: Notice of ETA required 48 hours before arrival. There is VHF listening and transmitting on Channel 12 on continuous basis. Range 30 miles.

Pilot boards 0.5 miles East of the breakwater red light, weather permitting.
ANCHORAGES: Vessels awaiting Pilot may anchor 0.75 miles East of the breakwater red light.
MAX. SIZE: Vessels up to 29 ft. draft may enter harbour, for berthing alongside.
HEALTH: Port Health doctor boards vessel on arrival or alongside the berth. Master required to produce Fumigation Certificate, vaccination list and Declaration of Health. Health visit not necessary for vessels coming from a Greek port or West European ports.
RADIO: Athens Radio, call sign SVA, on R/T which covers the Kalamata region also R/T stations of Patra Kerkyra and Hiraklion.
TUGS: No tugs available.
BERTHING: Agents require details of vessel's draft in advance to get berthing permission from Harbour Authorities. Total length of piers – 1,200 m. Covered storage: 3,500 sq.m. Open storage: 22,000 sq.m.
SPECIALISED CARGO-HANDLING FACILITIES: There is a silo for grain. 2 electric pumps for liquids; 1 mobile crane, lifting capacity 40 tons; 2 forklifts.
STEVEDORES: Number of gangs required to be advised Agent in good time.
MEDICAL: Doctors and medical assistance available. Also private and public hospitals.
FRESH WATER: Available in any quantity at berths. No barges.
FUEL: Can only be supplied by road tankers – subject to advance notice.
DENSITY: 1018.
WATCHMEN: If required can be arranged from shore.
HATCHES: Can be opened and closed either by crew or by stevedores subject to regulation payments for this work.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per man.
CONSULS: France, Finland and Sweden.
REPAIRS: Minor repairs can be effected in shore machine shops. No dry docks.
REPATRIATION: Can be arranged by car, train or air.
AIRPORT: Situated 6 miles away. Flights to Athens 1/2 times a day.
TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer (end March – end September).
HOLIDAYS: Additional local holidays are Ascension Day and St. Dionysio's Day.
POLICE/FIRE/AMBULANCE: Police tel. 22218; Fire tel. 28273/4; Ambulance tel. 25555/27420; Tourist Police tel. 23187. District Code Number 0721.
SHORE LEAVE: Allowed. Shore passes issued by Harbour Authorities.
DEVELOPMENTS: In the near future a Free Zone will exist. A mobile crane with sufficient capacity to handle loading/unloading of containers is to be purchased. Additional open storage to be available.
AUTHORITY: Kalamata Port Office, Kalamata. *Tel:* 0721/22-218. *Cables:* "Kalamata Port Office". *Contact:* Lt. Com. A. Gelopylos, Harbour Master.

KALI LIMENES, Crete: 34.56 N. 24.49 E.

DOCUMENTS: Vessels may arrive for bunkering without obtaining free pratique. However, if pratique is effected, vessels should have ship's papers ready for inspection, also 4 Crew Lists, 4 Passenger Lists, Cargo Manifest and a List of Stores and Provisions.
PILOTAGE: 1 private Pilot employed by the bunkering company SEKA who undertakes pilotage for vessels calling for bunkers. Pilot boat is a small boat equipped with signal lamp. Pilot boards about 1 to 2 miles S.S.E. of Aghios Pavlos (St. Paul) Islet. Vessels awaiting Pilot may anchor 1.5 miles East of Aghios Pavlos Islet.
ANCHORAGES: (See "Pilotage") Vessels may anchor in area between Aghios Pavlos Islet and Mavronissi, which is a safe anchorage.
MAX. SIZE: Vessels in ballast of up to 280,000 d.w.t. and max. draft 14 m. can enter port.
HEALTH: Vessels arriving from foreign ports wishing to obtain free pratique should cable Agents to arrange for boarding of Health Inspector. Free pratique automatic if arriving from another Greek port.
TUGS: There is 1 tug, but it is seldom used.
MEDICAL: Agent should be advised well in advance if medical assistance required. There are no hospitals or other local facilities and doctor has to be called from nearest town. Hospitals at Iraklion, 75 km. distant.
TANKERS: 3 berths North of Aghios Pavlos Islet (position Lat. 34° 55′ 45″ N., Long. 24° 48′ 30″ E.), max. draft 14 m.
FRESH WATER: Unlimited supplies available.
FUEL: Unlimited supplies, all grades of fuel (1,000 cu.m.p.h.), diesel (200 cu.m.p.h.) and luboils available subject adequate advance notice. Supplied by Seka S.A. Telegraphic address: Seka Kalilimenes. Telex: 0262180 Vila GR.
FIRE PRECAUTIONS: Portable foam fire extinguishers.
CUSTOMS ALLOWANCES: 200 cigarettes permitted to each crew member to be held out of bond, and 1 bottle of wine/spirits.
CONSULS: None.
REPAIRS: None.
AIRPORT: At Iraklion, 75 km. distant.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
SHORE LEAVE: Permitted if free pratique requested and granted.

SHIPMASTER'S REPORT: 1976. (Updated 1984).
Pilotage: Pilot boards about 1 mile South of Aghios Pavlos.
Anchorage: Half a mile E.N.E. of Mavronissi, depth of water 30 ft.
Max. Size: According to Pilot; 300,000 d.w.t. in ballast and max. draft 44 ft.
Pumping Rate: Fuel – 1,000 t.p.h., diesel – 200 t.p.h.
ETA: Send ETA 48 hours in advance through Radio Athens. The bunker station can be reached direct on VHF Channels 16 – 14.

KATAKOLON: 37.39 N. 21.20 E. (See Plan)

DOCUMENTS:

Maritime Health Declaration.
Usual Ship's Certificates.
3 Crew Lists.
3 Passenger Lists.
2 Lists of Stores and Provisions.
2 Lists of Crew's Personal Effects.

PILOTAGE: Not compulsory. Port has 1 private Pilot whom vessel may use provided sufficient advance notice passed through Agent.
ANCHORAGES: Vessels can anchor at a distance of 2 cables from the head of the breakwater (bearing 300°). Safe anchorage for vessels of up to 30 ft. draft between positions Lat. 37° 40′ N., Long. 21° 19′ E. and Lat. 37° 40′ N., Long. 21° 20′ E.
MAX. SIZE: Max. safe draft 24 ft.
BERTHING: One pier. Length 204 m. Depth alongside 26 ft. Berthing possible on both sides of the pier.
STEVEDORES: No advance notice required. No shore facilities. Vessels load/discharge with own gear.

MEDICAL: No medical assistance in Katakolon, but facilities exist at the town of Pyrgos 13 km. distant.
FUEL: Not available ex-berth, but can be delivered by tank truck from Patras or Kalamata.
FRESH WATER: Available. Capacity 20 cu.m./hr.
HATCHES: Usually opened and closed by crew but this work can be carried out by stevedores subject consent of Port Authority. Cost as agreed between Master and stevedores.
IDENTIFICATION CARDS: Passes issued by Port Authority.
CONSULS: None.
REPAIRS: Not available in Katakolon. Small quantities of engine spares available in Pyrgos.
AIRPORT: Andravis Airport 26 km. distant. Flights to Athens twice weekly.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: Usual Greek holidays plus local holidays of 6th December and 17th December.
POLICE/AMBULANCE/FIRE: Police and Immigration, Tel: 41202; Fire Brigade (Pyrgos), Tel: 22633; Ambulance (Pyrgos), Tel: 22344.
TELEPHONES: No facilities for placing on board.
SHORE LEAVE: Permitted.
AUTHORITY: Port Authority of Katakolon.

KAVALLA: 40.55 N. 24.25 E.

DOCUMENTS:
5 Crew Lists.
2 Lists of Foreign Exchange.
4 Passenger Lists.
2 Cargo Manifests.
2 Lists of Crew Personal Effects.
Copies of Bills of Lading and usual Ship's Certificates.

PILOTAGE: Compulsory. 24 hours' notice of ETA to be passed to Agents or direct to Port Authorities. Vessels requiring Pilot should contact Harbour Master/Pilot on VHF Channel 12 (24 hour service). Pilot usually boards about 0.5 mile from breakwater light from new 14 m. length pilot boat. If strong South or S.W. winds prevailing, vessels recommended take refuge Eleftheron Bay. Vessels awaiting a Pilot may anchor 0.5 mile South of Kavalla Lighthouse and stand-by on VHF Channel 12.
ANCHORAGES: 0.5 to 2 miles South of Kavalla Lighthouse, depth 30 m. to 40 m. Bottom sand and mud.
RESTRICTIONS: Berthing during daytime. Unberthing possible anytime.
MAX. SIZE: Max. length 200 m. with proportionate breadth. Max. draft 27 ft. 06 in. Tidal range 2 ft.
HEALTH: Doctor boards vessel with Port Officer. Maritime Declaration of Health and Derat Certificate required. In case suspected disease or fever on board, Master should radio Port Authorities in advance. Pratique is automatic if arriving from another Greek port.
RADIO: No local radio station. Cables may be routed through Athinai Radio.
VHF: Harbour Master's office equipped with VHF Channel 12 and 16 (24 hour service).
MEDICAL: Advance notice of medical requirements necessary. General hospital in Kavalla and numerous private clinics.
TANKERS: See "Prinos".
DENSITY: 1025.
FRESH WATER: Available at berth.
FUEL: Small quantities available by truck.
HATCHES: Opened and closed by crew.
CARGO GEAR: Vessel should have cargo gear ready on arrival in order to avoid delay.
CONSULS:

France	Tel: 3163	Netherlands	Tel: 3265
Finland	Tel: 3467	Sweden	Tel: 3669

REPAIRS: Minor repairs available.
AIRPORT: Distance 30 km. One or two flights daily to Athens.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: Standard Greek holidays. Local holiday 29th June.
POLICE/FIRE: Police, Tel: 3291; Fire, Tel: 1999.
AUTHORITY: Kavalla Port Authority, Kavalla, Greece. *Tel:* 051-223716. *Telex:* 045 2140 LIKA. *Contact:* P. Zachariou, Harbour Master.

KYMASSI: 38.49 N. 23.32 E. (See Plan)

LOCATION: Lat. 38° 48.6′ N., Long. 23° 31.5′ E.
The port is on the Northern part of Nissos Evvoia. Vessels load magnesite in bulk, and firebricks on pallets.
DOCUMENTS: Crew list and usual documents for Greece.
PILOTAGE: Pilot boards about 5 cables off the berth.
APPROACHES: See "Shipmaster's Report".
RESTRICTIONS: No berthing during night-time.
RADIO: ETA and other relevant information sent by radio to the Sub-Charterer's Agents, Financial Mining Industrial and Shipping Corp., in Athens. Cable Address: "Epichiris, Athens".
VHF: Approaching Kymassi VHF contact only with Harbour Master's Office on Channel 12 during working hours (and Channels 14 – 16).
TUGS: There are no tugs in the area, except pilot boat.
BERTHING: Safe draft alongside is 26 ft. 6 in., salt water. Ship berths alongside 2 dolphins which are very well fendered with numerous rubber tyres. On approach the port anchor is let go and as the ship snubs round to port an off-shore mooring line is run by the pilot boat aft to the off-shore mooring buoy, to which the ship's line is made fast. The next line is run to inshore mooring buoy the same way. Then vessel is made fast to strong bollards.
LOADING: Carried out via a sophisticated conveyor system, the main tower of which is on curved track, thus allowing flexibility in loading either forward or aft for all the length of the vessel without any shifting, this is necessary only when loading palletised cargo. Also see "Shipmaster's Report".
BANKS: National Bank of Greece in Mandoudi. Foreign banks in Chalkis.
EMERGENCY CO-ORDINATION CENTRE: Nearest at Chalkis 60 km.
STORING: See "Prelims".
1. Yes.
2. Yes, vessel can store from barges during loading.
3. Trucks can proceed alongside.
4. Yes.
5. Declaration to Customs.
6. No.

SURVEYORS: Cargo inspectors and surveyors come from Piraeus.

SHIPMASTER'S REPORT: March 1979.
The port is on the Island of Nissos Evvoia. Vessel loaded a cargo of bulk magnesite ore (deadburned).
Documents: Crew List. Usual documents for Greece. However, as the ship had already cleared into Greece at Corinth, the Bond had to remain sealed from that port to Kymassi. Leaving Corinth a photo-stat copy of all papers handed in at that port was placed on board duly stamped by Customs for production at Kymassi. Register and usual certificates were taken by Agent to authorities and returned with Pilot plus clearance before sailing.
Pilotage: Pilot boards about 5 cables off the berth. He gave advance advice about the time the other ship was to sail and when he expected to board.
Approaches: Although no large scale British Admiralty Chart of the area or port on board, the approach was made without any difficulty. The 100 fathom line runs approximately 1 to 1.5 miles off the land. The ore loading berth is on the South side of the Bay with fairly steep to land on the Northern side. As ship has to swing to lie head out to sea, it is better according to the Pilot to approach keeping towards the North side of the Bay. Anchoring is not advised unless very good weather due to depth of water and poor holding ground. The Pilot, via VHF, advised us to lie off as the berth was occupied when we arrived. The ship berthed was due to sail around 1200 hrs., we arrived at 0900 hrs.
Radio: ETA and other relevant information was sent by radio to the Sub-Charterer's Agents, Financial Mining & Industrial Corp., in Athens. Cable address 'Epichiris – Athens'. There were no problems clearing messages.

Approaching Kymassi there was no response on VHF until the ship was within 4 miles of the port, when the Pilot answered on Channel 16 and we worked on Channel 12.
Berthing: Ship heads towards the loading jetty, a high concrete structure of "Y" shape with the ship berthing against the two arms. Both these are well fendered with numerous rubber tyres. On approach the port anchor is let go and as the ship snubs round to port an off-shore mooring line is run by the boat aft to the off-shore mooring buoy. This buoy has a slip toggle arrangement to which the ship's line is made fast. The next line run is the inshore after line which is taken to a mooring buoy inside the line of the berth. A head rope was then run to the pier and to a strong bollard.

The anchor cable was slacked and ship hove alongside by the head and stern ropes, the offshore stern rope being slacked as required. Back-spring was led to a bollard on the jetty as was the spring from aft. A further headrope was run to the bollard on the pier and aft a second rope to the inshore buoy plus a bight to a bollard on the pier.
Loading: Carried out via a sophisticated conveyor system, the main tower of which is on a curved track, thus allowing flexibility in loading either forward of aft in a hatch. It is necessary to shift ship to load each hatch.

Two grades of magnesite were loaded. One grade in No. 2 hatch, (first loaded), then the other grade between No. 1 and No. 3 hatches. When No. 2 was completed it was necessary to warp the ship astern to load No. 1 and later warp ahead to load No. 3 hatch.

Loading commenced at 1540 hrs. on the 17th and was completed at 0650 hrs. on the 18th. Allowing for shift ship plus change of gangs ashore it averaged out at a loading rate of 556 tonnes per hour.

The loader has an adjustable spout which ensures that the cargo can be readily trimmed to ensure a good flat stow on completion of space without any need for trimmers. The loader is operated with regard to the spout and slewing from a control box situated on the draw-bridge section of the loader. A very dusty cargo.
General: Whilst the vessel was alongside a small ship berthed using a Mediterranean moor, two anchors down and stern moored to a buoy. This berth is further inside the Bay. The vessel loaded her cargo from lighters.
Agents: The Agent from the Financial, Mining and Industrial Corp. was most helpful and attentive to his duties. He appears to work long hours as he also supervises the loading and works continuously. He also attends to advising when it is necessary to shift ship.

AUTHORITY: Harbour Master of Kymassi, Mandoudi, Evia Island, Greece. *Tel:* 0227-22020. Also VHF Channels 12, 14 and 16. *Contact:* George Sakalis, Harbour Master.

LAVRION: 37.42 N. 24.04 E. (See Plan)

DOCUMENTS:
Maritime Declaration of Health with Crew's Vaccination Cards.
Cargo Manifests.
4 Crew Lists.

PILOTAGE: Address of pilot station, Port Authority of Lavrion. Pilot boat is a motor launch 8 m. long, black hull with white stripe flying code flag "H". Vessels requiring Pilot should flash or sound letter "G". Pilot boards about 0.5 miles from Green Light (Ak. Ergastiria). In event of bad weather, boarding position is inside the buoy. Vessels awaiting Pilot should anchor close to the Green Light depending on vessel's size.

ANCHORAGES: See "Pilotage".

MAX. SIZE: Max. length 130 m. (approx.), max. draft 21 ft.

HEALTH: Health Officer and Port Officer board vessel on arrival. Maritime Declaration of Health should be submitted to Health Officer who examines any sick crew. Free Pratique is not automatic.

VHF: Pilot boat equipped with VHF.

BERTHING: Harbour open to S.E. winds, but otherwise sheltered and safe. There are two quays: one 330 ft. length, depth alongside 20 ft., and one of 260 ft. length, depth alongside 13 ft.

Mining company owns bridge elevator with capacity of 700 tons per day.

STEVEDORES: Advance notice required in order to arrange gangs. No shore cargo equipment, and cargo operations effected by ship's gear.

MEDICAL: Medical assistance available.

FRESH WATER: Can be supplied to vessels alongside berth from tanker trucks.

FUEL: Only small quantities available as existing fuel tank only 10 tons capacity. Can be supplied by tank trucks from Piraeus.

HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes per crew member allowed out of bond.

REPAIRS: Minor repairs only.

AIRPORT: Athens Airport, distance 45 km.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

POLICE/AMBULANCE/FIRE: Police, Tel: 25218; Ambulance, Tel: 25340; Fire, Tel: 25249.

HOLIDAYS: Local holiday 26th July.

AUTHORITY: Port Authority of Lavrion.

MEGARA (Agia Trias): 37.58 N. 23.24 E. (See Plan)

BERTHING: Pier owned by Hellenic Aspropyrgos Refinery S.A. in position Lat. 37° 58′ 11″ N., Long. 23° 24′ 17″ E. (working 24 hours.)

Pier projecting 205 m. from shore with berthing head 63 m. long. Single berth with depth of 42 ft. 6 in. at S.W. end. 44 ft. at N.E. end. 46 – 50 ft. available at 1 m. from the berth.

With suitable fendering berth can accommodate vessels up to 65,000 d.w.t.

Tankers discharge cargoes by 3 flexible hoses of 8 in. diameter each.

The maximum acceptable pressure at the unloading hoses is 8 – 9 kg./sq.cm.

FRESH WATER: Not available.

FUEL: Not available.

For additional information see "Pachi Oil Terminal".

AUTHORITY: *Operator:* Hellenic Aspropyrgos Refinery S.A., 18 Hermou Street, P.O.Box 3649, T.K. 10210 Athens, Greece. *Tel:* 5573252. *Cables:* Refaspr. *Telex:* 215442, 215443, Ref Gr. *Contact:* A. Tzouros.

MILAKI (Aliveri Bay): 38.22 N. 24.04 E. (See Plan)

SHIP'S OFFICER'S REPORT: December 1985.

LOCATION: Aliveri Bay is about 2 km. N.N.E. of Karavos in position Lat. 38° 22′ 30″ N., Long. 24° 04′ 10″ E. Milaki is the name of the berthing facility.

PILOTAGE: Pilot boards 1 nautical mile S.W. of the berth. Pilot boat painted white. Call "Katerina" on VHF Channel 14 to make contact, also works on Channel 12.

ANCHORAGE: Vessels may anchor in Aliveri Bay.

MAX. SIZE: Vessels up to 120,000 d.w.t. and 240 m. LOA handled.

VHF: See "Pilotage".

TUGS: One tug "Achileus", 1,200 h.p. Additional tugs available from Khalkis (Chalkis).

BERTHING: Berthing instructions obtainable from "Katerina" on VHF Channels 14 or 12.

One pier, length 13 400m. and width approximately 50 m.

Depths alongside: North side: 18 m. at seaward end and 14.9 m. at inner end.

South side: 23 m. at seaward end and 13 m. at inner end.

The North side is for unloading coal and slag and the South side for loading coal and cement.

Cargo discharged by grab (gantry) and loaded by pipe.

MEDICAL: There is a small hospital in Aliveri.

FRESH WATER: Available by truck.

REPAIRS: Facilities available at Khalkis.

AIRPORT: Athens International Airport.

GENERAL: *Publications and Charts:* B.A. Mediterranean Pilot Volume 4 and B.A. Chart No. 1597.

Note: The pier and light on N.W. corner (OQ(R)) of pier not marked on Chart No. 1597 edition 1983, with corrections done for 1983 and 1985.

AUTHORITY: Port Authority of Karavos. *Tel:* 0223-22318.

MILOS ISLAND (Adamas, Voudia Bay): (See Plan)

LOCATION: Adamas Harbour: Lat. 36° 42.5′ N., Long. 24° 26.5′ E.

Voudia Bay: Lat. 36° 44.6′ N., Long. 24° 32.8′ E. (on the N.E. side of Milos Island).

A vessel is considered to be an "arrived ship", when at and/or anchored close to the above positions.

DOCUMENTS:

4 Crew Lists.	Derat Certificate.
3 Passenger Lists.	Certificate of Registry.
3 Provisions Lists.	Load-line Certificate.
4 Personal Effects Declarations.	Safety Equipment Certificate.
2 Cargo Manifests.	Radio-telegraphy Certificate.
Ship's Gear Book.	Certificate of Measurement.
Vaccination Certificates.	

PILOTAGE: No pilot station. Vessels requiring a Pilot should make contact with Adamas Harbour Control by VHF Channel 12. Vessels calling at Voudia Bay can make contact on Channel 8 VHF during office hours (0700 – 1500 hrs.local time) for general information and Pilot arrangements. Pilot arrangements are generally done through Agent's who may contact Pilot in advance by telephone. Pilot boards from a small motor-boat.

ANCHORAGES: Safe anchorage in all parts of Milos Bay, where Adamas port is situated. Main anchorage in Milos Bay is on E.S.E. side of Bombarda Cape, which has a lighthouse showing a Fl. R. 4.5 secs. light.

The Voudia Bay Anchorage is located 6 cables S.E. of Voudia Light within a circle of 3 cables radius. Ship's calling to Voudia Bay should use this anchorage.

MAX. SIZE: Any size vessel may enter Adamas Port, but berthing alongside the Ore Loading Berth at Kanaba or the private Ore Loading Berth of Mycobar Ore Mining Co. is restricted for vessels of more than 26 ft. draft.

Ore loading berth at Voudia Bay (Privately owned by Messrs. Silver and Baryte Ore Mining Co.) is able to facilitate berthing of vessels of up to 185 m. long (610 ft.) and max. draft 33 ft. Restriction exists for this berth, also for the height of vessel's freeboard. (The highest point of the vessel's side along the deck including rails or any other fixed constructions, must not exceed the 10.9 m. (36 ft.) from the sea level).

Loading-discharging dock at Voudia Bay with installations for mechanical loading of cargo in bags. This dock has a length of approximately 75 m. and the max. draft of the vessel alongside cannot exceed more than 6 m. (20 ft.).

No facilities for tankers.

HEALTH: Authorities require 24 hours' notice of arrival in order to grant Free Pratique to vessels arriving from a non-infectious country. Free Pratique cannot be granted at Milos to vessels having disease on board nor to those arriving from an infected area. Such vessels are required to proceed to a main Greek port (Piraeus, Syros, etc.) to obtain health clearance.

RADIO: Athens Radio and Heraklion Radio.

TUGS: Not available.

STEVEDORES: Loading/discharging at Adamas Port (Kanaba) is by means of ship's gear, reaching a loading rate of 1,000 – 1,300 tonnes per working day. At the private berths of Mycobar Ore Co. in Adamas and Silver and Baryte Ore Co. at Voudia Bay the bulk ore is loaded by means of a conveyor belt at a rate of 500 tonnes p.h. maximum.

MEDICAL: No hospitals or private clinics available (1 small public hospital is under construction and is expected to start services in 1987). There are 3 doctors and 2 dentists resident on the Island. There is an airport on the Island with daily services to Athens. Also in case of illness, the possibility of an emergency service.

FRESH WATER: Available to vessels alongside using ship's hoses. Delivery alongside up to 30 cu. m. in 12 hours.

FUEL: Small quantities of lubricants available.

OPENING/CLOSING HATCHES: Opened and closed by crew.

CUSTOMS ALLOWANCES: Customs Office at Adamas Harbour. Tel: 0287-22.282.

(a) Vessel arriving from European Common Market Ports: 300 cigarettes, or 150 small cigars, or 75 big cigars, or 400 gm. tobacco. 1.5 litres of spirits of 22° vol. or more, or 4 litres of wines of less than 22° vol. Perfumes 75 gm.

(b) Vessel arriving from any other port: 200 cigarettes, or 100 small cigars, or 50 big cigars, or 250 gm. of tobacco. 1 litre of spirit of 22° vol. or more, or 2 litres of wines of less than 22° vol.

REPAIRS: Minor oxy-acetylene repairs possible.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: Sundays and customary holidays. Cargo work can be arranged on these days at 75% increase on tariff rates.

TELEPHONES: Police: 0287-21.204. Port Authority: 0287-22.100. Agent of Silver and Baryte Ores Co.: 0287-41.277. Pilot: 0287-22.265 or 22.086.

SHORE LEAVE: Permitted.

DELAYS: Strong Southerly winds may delay berthing, or force vessel to leave loading berth at Voudia Bay.

DEVELOPMENTS: Intentions to construct a conveyor belt for ore cargo loading on the Kanaba Dock (Adamas).

SHIPMASTER'S REPORT No. 1: *Voudia Bay:* Fresh water is available using vessel's own hoses. Limited quantity of provisions are available. Hire of polypropylene ropes of 150 m. length is possible.

It is advisable to close ventilators before loading due to excessive dust.

Pilot remains on board during loading.

Cargo: Perlite.

Loading rate for bulk: 250 t.p.h.

Loading rate for bags: 18–20 t.p.h.

SHIPMASTER'S REPORT No. 2: *Voudia Bay and Milos Island:* Situated on the N.E. corner of the island of Milos. When approaching from the S.E. the most prominent features are the scarred terrain, the factory building and the silo which is situated just above the berth. The loading gantry has both fixed red and white lights on it and is conspicuous.

Anchorage: The vessel anchored in a position with the loader bearing 302° T. distance 7.5 cables in 48.5 m. of water using 5 shackles of cable, the holding appeared to be good. The recommended anchorage is in a position with the loader bearing 328° distance 5 cables where holding is reported to be good. There was another vessel in that position at the time.

Caution: This anchorage is not recommended in strong South to S.E. winds due to the seas that build up in the Bay. Vessels are recommended to go to the North of Pilonisi Island and anchor in a position N.W. of the North West point, a distance of not less than 3 cables. This island is now joined to the main island by rubble from the factory, this is not shown on the Chart (1832).

Method of Berthing: (See "Plans"). Approach to the berth is made heading in a N.W.'ly direction, keeping the Northernmost buoy (A) close to the starboard side and when the bow is passed about a third of the ship's length, the starboard anchor is let go and let run until about 4 shackles on deck, then it is checked, in the meantime a boat will take a breast rope from for'd, run from the port shoulder lead (1). Once this is ashore and the vessel begins to cant to starboard, the bow is worked into position by heaving on the breast rope and slacking the cable until there is about 6 shackles on the latter. Meanwhile, a line is run from the starboard quarter (2) to buoy (B). A word of caution here, the berth is designed to take vessels up to 23,000 tons, so for a small vessel it will be necessary to have 2 ropes joined together for moorings (2), (4) and (5). The next line sent away is one from the Port Quarter to ashore as a breast rope (3), the stern is then brought into position in a similar manner to the bow. As the prevailing wind is from ahead usually, the next rope sent away is the head line (4) and finally the stern line (5). The latter two are used for shifting the vessel under the loader. Directly under the loading gantry, there is a dolphin arrangement to keep the vessel off the cliff, but on completion of mooring, the vessel should end up about 6 ft. to 10 ft. off this.

Caution: In strong South to S.E. winds, the berth becomes dangerous and vessels have to leave and go to anchor and it is often necessary to leave the ropes on the buoys etc. as it is not possible to let them go. It is also advisable to retain some ballast on board for berthing.

There are 2 Pilots, both speaking English, the younger, an ex-Chief Officer has the better command of English and was the source of a lot of this information.

On leaving the berth, the last rope to be let go is (2) and with a smaller vessel, this can safely let go while weighing anchor. Vessel will then proceed to another anchorage close to, to secure, obtain clearance and clean up.

Loading Procedure: Loading is done by a chute and at an approximate rate of 300 tonnes per hour. The cargo is very dusty and everything should be securely battened down and it is strongly advisable to wear goggles and protective masks on deck as the dust is choking and if it gets in the eyes, they should not be rubbed as it is abrasive and can cause permanent damage. Eyes should be washed out. The ship will advise what weight she can take, and as the weighing procedure ashore is liable to break down after the first 500 tonnes, vessel is loaded according to draft, which has to be carefully checked, as when stipulating amounts required per hatch, they will not necessarily keep to this unless told. A boat is available for checking the draft, 1 blast on the whistle will summon it. Only method of getting ashore is by boat, so it is necessary to have the starboard gangway down. Both foreman and boatman have a fair knowledge of English, but foreman does not come aboard but stays on the loader, so it is necessary to shout instructions etc. The foreman will advise on shifting for position required, this is done with the aid of frequent blasts on a pocket whistle. Only one man comes aboard and that is to tend the chute.

There appears to be a continual short swell which makes draft reading a little difficult.

Entry and Clearance: Agent, Doctor, Customs and Harbour Master boarded the vessel at anchor and entered her there. Forms on board were not acceptable, but they transferred them to their own. I understand that the only acceptable forms are the standard IMO forms, and if there are any of these on board they should be used.

Forms required:
2 Crew Declarations.
3 Crew Lists.
2 Bonded Stores List.
2 Stores Lists.
1 Vaccination list (Including Cholera).

There are various other forms to sign, but these are prepared by the Agent. The Health Declaration is made out by the doctor in his book. The Agent, who is from the Mining Company, spoke very good English.

Weather: Northerly winds predominate during the Summer and can become quite strong during September, mainly from midnight to noon.

AUTHORITY: Port Authority of Milos, Adamas Harbour, Milos Island, Greece. *Tel:* 0287-22.100.

Silver & Baryte Ores Mining Co., 21a Amerikis Street, Athens 135, Greece. *Tel:* 3628.432 or 3626.064.

Local: Silver & Baryte Ores Mining Co., Voudia Bay, Cyclades, Milos 84800, Greece.

MITILENE (incl. Geras Bay and Pamfyllon): 39.06 N. 26.35 E. (See Plan)

PORT LIMITS: A vessel is considered to be an "arrived ship" and laytime will commence at the working hours that follow the delivery of the Master's Notice of Readiness.

DOCUMENTS:

Quarantine:
Maritime Declaration of Health.
Valid Derat Certificate.
International Vaccination Certificates.

Customs:
2 Crew's Effects Declarations.
2 Bonded Goods Declarations.
2 Ship's Stores Declarations.
2 Crew Lists.

Immigration:
1 Crew List.

Port Authority:
1 Crew List.
Ship's Certificates or Memorandum.
1 Passenger List.
Ship's Papers.

PILOTAGE: It is not compulsory, but, if required, the services of experienced Mercantile Marine officers, having knowledge of the port, can be obtained.

ANCHORAGES: Off the Outer Port, in depths of about 18 m.; extreme end East of Kastro Peninsula (or Fokiotrypa) light, bearing due North.

RESTRICTIONS: Entry is not allowed after sunset.

MAX. SIZE: Length 120 m. – draft 17 ft. at Inner Port; length 160 m. – draft 28 ft at Outer Port.

HEALTH: The Authorities must receive a 24 hour advance notice for the ETA of the vessel with information about the port of origin, the cargo, the number of crew and passengers and the port of destination; details of any suspected disease or fever on board must be included in that notice. Pratique is automatic only for vessels entering after calling at another Greek port.

RADIO: "Athinai (Athens) Radio", "Limnos Radio", "Chios Radio". call signs SVA, SVL, SVX respectively.

VHF: Port Authority's VHF radiocommunication; Channel 12 for calling.

BERTHING: See "Plan". For drafts see "Max. Size".

STEVEDORES: At least 8 hours' advance notice for the number of stevedores required.

MEDICAL: In case of illness on board the Master should cable details prior to arrival. Hospital and dental facilities are available. Vaccination cards required.

TANKERS: At Geras Bay (Mamidakis) and Pamfila (Purfina).

FRESH WATER: Available from the quay through pipes. Cost per ton about 200 Drs.

FUEL: Supplied by tanker trucks only; advance notice required.

FIRE PRECAUTIONS: No more than the usual ones.

CONSULS:

Belgium	Tel. 28494	Netherlands	Tel. 28760
France	Tel. 28151	Sweden	Tel. 28494

REPAIRS: Local machine shops undertake very minor repairs.

SURVEYORS: Lloyd's Register.

HATCHES: Opening and closing is normally carried out by crew.

CUSTOMS ALLOWANCES: For each member of the crew: tobacco, 50 grams; cigarettes, 40 pieces; small cigars, 20 pieces. Wines, 2 litres. Spirits, 0.75 litre.

CARGO GEAR: Load/discharge effected by ship's own gear.

REPATRIATION: There are facilities for effecting crew changes and arranging any necessary repatriation.

AIRPORT: Distance 8 km. It is regularly served by "Olympic". Flights to Athens and Thessaloniki.

TIME: GMT plus 2 hours. GMT plus 3 hours during Summertime from April to September.

HOLIDAYS: January 1st, New Year's Day; January 6th, Epiphany; Ash Monday; March 25th, National Holiday; Good Friday; Easter Monday; May 1st, Labour Day; Whit Monday; August 15th, Assumption; October 28th, National Holiday; December 25th, Christmas Day; December 26th, Boxing Day.

Cargo work can be arranged on these days after consultation with the union of stevedores.

POLICE/AMBULANCE/FIRE: Police, Tel. 100 and 22021; Hospital, Tel. 28412 and 22005; Fire Brigade, Tel. 199 and 22055.

EMERGENCY CO-ORDINATION CENTRE: Hellenic Coast Guard Emergency Co-ordination Centre (S.A.R. Chamber) in Piraeus. Telephones: 4112500 and 4173238. Telex: (021) 2022, 2273 and 2239 Yen Gr.

BANKS:
Bank of Greece, Prokymaia Telex: 297110 Bngr Gr.

Credit Bank, P. Kountouriotou 33. Telex: 297151 Ccb Gr.

STORING: Vessel can be stored by truck only. Trucks can proceed alongside at the berth.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Shore passes are issued.

DELAYS: Normally there are no delays.

SHIP SUPPLY SERVICE: Ant. Picoulos Shipping Agency, Prokymaia, Mitilene. Office Tel: 23720, 27000, 24933. Home Tel: 22341. Telex: 297120.

A launch of 11 m. length available for ship to shore transport of personnel and/or essential stores and/or sick crew members if allowed.

AUTHORITY: Hellenic Coast Guard, Island of Lesbos Port Authority, Mitilene Port Authority, Prokymaia, Mitilene 81100, Greece. *Tel:* 28827, 28647, 24115. *Telex:* 290142 LXM GR. *Cables:* Limenarchio, Mytilene. *Contact:* Commander B. Ch. Antypas.

MYKONOS: 37.26 N. 25.25 E.

Vessels in excess of 22,000 d.w.t. have been accommodated. Loading of Barytes ore at rates up to 5,000 tons per day. In Winter when North winds prevail conditions are satisfactory for loading: however, loading position considered unsafe when S.W. or West winds prevailing. When sufficient cargo is available vessels can load in 2 days.

PACHI: 37.58 N. 23.23 E. (See Plan)

DOCUMENTS: All usual certificates including Registry, Safety, Cargo Gear, Radio, Derat, Last Port of Clearance and:

9 copies Crew Lists.
2 copies Vaccination Certificates.
1 copy Cargo Manifest.
1 copy List of Spares.
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
4 copies Crew Effects Declaration.
1 copy Passenger List.
1 copy Cargo Documents.
2 Special Customs Forms in triplicate.
2 copies Stores Lists.

PILOTAGE: Cable Agent 72, 48, 24 hours in advance advising ETA. Agent informs Pilot Office of vessel's arrival time. Piraeus Pilots can be contacted on VHF Channels 7 and 12. Pilot boards vessel North of Kanaria Islands.

ANCHORAGES: See "Piraeus".

RESTRICTIONS: None.

MAX. SIZE: Pachi Oil Terminal is able to accept vessels for discharging crude oil from 20,000 d.w.t. to 600,000 d.w.t., max. draft 29 m. The depth at the head of the pier is 31 m.

HEALTH: Pratique is in accordance with International Regulations. Pratique automatic if arriving from another Greek port.

RADIO: Athens (SVA).

VHF: Piraeus Pilots and Eleusis Coastguard operate a 24 hour service on Channels 16, 12 and 7. Hellenic Refinery operates on Channel 16.

RADAR: None.

TUGS: Usually join vessel near to the berth. Ship's lines always used.

BERTHING:

Location of berth: Lat. 37° 58′ 25″ N., Long. 23° 22′ 50″ E.

Pilot will advise Master of berthing place in accordance with Port Authority instructions. Usually berthing with starboard side alongside with 3 head lines, 4 breasts, 2 springs, 3 stern lines, 4 breasts and 2 springs depending on the size of the vessel. According to the Pilot, it is preferable to use ropes for head and stern lines.

MEDICAL: Advance notice not required; clinic available in town of Eleusis if required.

TANKERS: There is one berth with 4 unloading arms 16 in. diameter each. The maximum and minimum height of the manifolds to the ship is 35.5 m and 2 m. respectively above sea level.

The maximum accepted pressure at the unloading arms and of the crude oil system is 11 bars (150 p.s.i.) and the maximum accepted flow rate through each unloading arm is 4,000 cu.m./.hr. (Total for all four unloading arms 16,000 cu.m./.hr.).

DENSITY: 1025.

FRESH WATER: Not available at present.

FUEL: Not available at present.

FIRE PRECAUTIONS: Fire wires rigged fore and aft on outboard side of vessel. Deck scuppers plugged. Spark arresters to be fitted on tank openings. Earth connections made. Patrols made by Port Officers.

In the case of a storm, the Dock Master can stop discharge of vessels. The refinery fire fighting procedure is followed.

CONSULS: None locally. Consuls at Athens and Piraeus.

REPAIRS: While alongside, maintenance of any kind on board is strictly prohibited. In case of an emergency, the issuing of a special written "cold or hot work" permit is necessary.

DRY DOCKS: See "Eleusis".

GANGWAY/DECK WATCHMEN: Not required.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 open bottle of wine/spirit allowed per crew member.

REPATRIATION: All facilities available for crew changes and repatriation.

AIRPORT: Direct overseas flights available via Athens airport at Hellinicon.

TIME: GMT plus 2 hours. Summertime (March to September) GMT plus 3 hours.

HOLIDAYS: None affecting cargo operations.

POLICE/AMBULANCE/FIRE: All emergency services are available through the Terminal Office. Tel: 26480 – 26580. Fire alarms are installed throughout the jetty. Eleusis Coastguard (01) 5543504.

TELEPHONES: This service is available aboard ship by prior arrangement through the Agents. Standard rates apply.

SERVICES: Compass adjusting. Electronic equipment services.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Shore passes issued by Port Authority.

AUTHORITY: *Operators:* Hellenic Aspropyrgos Refinery, S.A., 18 Hermou St., P.O.Box 3649, T.K. 10210 Athens, Greece. *Tel:* 5573252. *Telex:* 215442, 215443. *Cables:* Refaspr. *Contact:* A. Tzouros.

Eleusis Port Police.

PATRAS (including Rio): 38.14 N. 21.45 E. (See Plan)

DOCUMENTS: Port Authorities: 2 Crew Lists, Customs: Declaration of Cargo and Passengers.

PILOTAGE: Compulsory. Advance notice of ETA to be passed to Agents who arrange Pilot. Vessels without Agents should advise authority of ETA through Athens Radio, or on arrival outside harbour make International Code sounds and signals for vessels requiring a Pilot. Pilot boat is small boat carrying pilot flag. Pilot usually boards less than 1 mile outside harbour entrance. VHF contact possible with Port Authority and Pilot on Channel 12.

ANCHORAGES: Patras Roads are usually safe; when very strong W./N.W. winds blow, vessels may anchor at Nafpaktos Roads.

RESTRICTIONS: Port entrance has depth of 34 ft. At main harbour vessels having draft in excess of 28 ft. cannot berth. The limit at the new berth is 34 ft. draft. There are 2 red buoys at the entrance to the port.

MAX. SIZE: Vessels of less than 34 ft. draft. No restrictions on length or breadth. Height of tide, max. 0.55 m., does not affect size of vessel.

HEALTH: Pratique in accordance with International Regulations.

RADIO: Athens Radio.

TUGS: Two tugs, 900 h.p. and 1,200 h.p. Use of tug compulsory for all vessels over 1,000 tons gross. Joins vessel at entrance to harbour. Ship's lines used.

Tugs also available on request to Nicolas E. Vernicos. Tel: Piraeus 4527812-4522337 (24 hours).

BERTHING: In accordance with allocation given by Port Authority. See "Plan" for lengths and depths. Also see "Developments".

STEVEDORES: Advance notice of ETA required in order to arrange berth and order number of gangs to commence work immediately. General cargo rate about 80 – 100 t.p.h./gang, bulk cargoes 75 – 90 tons. 7 mobile cranes, capacity up to 25 tons available. One mobile crane capacity 118 tonnes with container handling facilities.

TANKERS: No facilities at Patras, but Texaco-Restis berth at Rio for vessels up to 18 ft. and 2,500 tons alongside. No residue discharge facilities.

FRESH WATER: Supply line connected to all berths. Rate 30 t.p.h.

FUEL: Deliveries by tank trucks at Patras. Available at Texaco-Restis berth at Rio.

FIRE PRECAUTIONS: Vessels refuelling or discharging explosives or flammable materials must apply to Port Fire Brigade to stand by.

WATCHMEN: Advisable to employ night-watchmen on large vessels.

HATCHES: Usually opened and closed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits allowed out of bond for each Crew member.

IDENTIFICATION CARDS: Crew are supplied with passes by Port Authority.

CONSULS:

Belgium
Denmark
Finland
France
Germany F.R.
Italy
Netherlands
Sweden
Switzerland

REPAIRS: Very minor repairs only.

REPATRIATION: All facilities for crew changes and repatriation.

AIRPORT: None.

TIME: Summertime GMT plus 3 hours end March to end September, otherwise GMT plus 2 hours.

HOLIDAYS: In addition to general Greek holidays and Sundays, local holidays are 8th September, 30th November. Work can be arranged on these days subject to payment of additional charges.

POLICE/AMBULANCE/FIRE: Port Police, tel. 277–622; Patras Police Station, tel. 277–261; Ambulance, tel. 274–444; Fire Brigade, tel. 199. The port has a fireboat.

TELEPHONES: Facilities for connecting on board.

SHORE LEAVE: Permitted.

DEVELOPMENTS: *(a)* Outer breakwater to be extended by 90 m. at South end.

(b) St. Nicolas Pier – length: 200 m. – is now available for berthing ships on both sides. Depths alongside are equal to those in North and South basins.

(c) Astingos Pier is now ready, having a 160 m. length on the South side and a 180 m. length on the North side. Depths alongside are same as in the basins.

(d) There is a new wharf under construction at the North Entrance with depth 12 m.

AUTHORITY: Port Authority of Patras, St. Othonos Amalias 85, Patras, Greece. *Tel:* 061-277 093. *Contact:* P. Bousbouras, Technical Manager.

PIRAEUS: 37.57 N. 23.38 E. (See Plan)

(Including AGHIOS GEORGIOS 37.57 N. 23.36 E.; DRAPETZONA 37.56 N. 23.37 E.; and PERAMA 37.58 N. 23.35 E.)

DOCUMENTS: All usual certificates including Registry, Measurement, Inspection, Load-line, Fumigation, Passenger Safety, Cargo Gear, and Radio.

9 Crew Lists.
2 Vaccination Certificates.
Cargo Manifest.
List of Provisions and Stores.
List of Spares.
Maritime Declaration of Health.
1 List of Vaccination Dates.
1 Crew Effects Declaration.

Customs:

2 Special Forms in Triplicate.
1 Stores List.
Master's Declaration of typewriters and adding machines, etc.
Crew Passports, or Seamen's Books.
Passenger Passports.

PILOTAGE: Cable Agent well in advance advising ETA. Agent informs pilot office of vessel's arrival time.

Pilots can be contacted on VHF Channel 16 for calling, Channels 7 and 12 for communication. Pilot boat is a wooden vessel about 10 m. length with black-painted hull, word "Pilot" painted in white.

Vessels requiring Pilot should signal letter "G" by morse light or by ship's whistle. Pilot boards vessel about 1.5 miles off entrance to harbour, except when very strong South winds prevailing, in which case vessel advised by VHF or by signal light that conditions impossible for Pilot boarding, and whether vessel permitted enter harbour at Master's risk.

If awaiting Pilot, anchorage is possible inside pilotage area of Piraeus – Aghios Kosmas – Piraeus Anchorage – Perama Anchorage – Megara Anchorage (Pachi).

ANCHORAGES: As above. Depths between 9 and 35 fathoms.

RESTRICTIONS: No restrictions for Aghios Georgios Harbour or Drapetzona excepting draft. Harbours open throughout 24 hours for entry and departure subject prevailing weather conditions. No tidal restrictions.

MAX. SIZE: (also see "Tankers") Aghios Georgios max. draft 32 ft. Drapetzona max. draft 38 ft. Piraeus max. draft 36 ft.

RADIO: Athinai Radio – SVA.

TUGS: Usually join vessel outside harbour, always using ship's lines. Over 30 tugs available. 10 of less than 1,000 h.p. and remainder over 1,000 h.p.

Nicolas E. Vernicos Shipping Co. Ltd., operate 10 tugs, 500 – 4,000 h.p. Available for towage and salvage. Tel: 4527812, 4522337 (24 hours). Telex: 212450 Vern Gr. VHF Channel 6.

BERTHING: Agent must advise Piraeus Harbour Authorities in order to secure berth allocation. 20,000 m. of quay space. 9 Ro/Ro ramps available.

CRANES: 3 container cranes, lifting capacity 41 tons.

56 electric wharf cranes with capacities of 2 to 27 tons installed along the wharf of the main port and at the dry and floating docks.

51 mobile cranes with capacities of 3 to 20 tons.

19 Straddle-carriers for containers, capacity 30 tons each.

4 floating cranes with capacities of 15, 30 and 2×100 tons.

BULK HANDLING FACILITIES: Silo suction-duct installations capable of moving grain at up to 130 t.p.h. and storage facility for 40,800 tons, as well as 2 mobile suction-duct units for bulk grain-cargoes.

One gantry crane lifting capacity 10 tons, used for coal and bulk cargoes installed at Hercules Port. Pier length 200 m., max. LOA 160 m., max. beam 17 m., max. draft 10 m. Average daily rate for coal 1,000 – 1,200 tonnes.

STEVEDORES: Agent must submit letter of application to Piraeus Port Authorities for number of gangs required also time required to commence cargo work. Discharge usually effected with ship's own gear.

Normal work on loading/discharge of goods in the port is carried out by 2 regular shifts, the morning shift (0800 – 1400 hrs.) and the afternoon shift (1500 – 2100 hrs.). Likewise, upon application of the interested parties (ship-owners, Agents, consignees, shippers, etc.), and provided approval of the competent P.P.A. Service is obtained, a third, night shift can be assigned to the job if the necessary workers and operators are available. This shift is again of 7 hour duration, from 2100 – 0330 hrs. or can be extended to the morning hours if necessary. Exceptionally in the case of work on refrigerator vessels, on which work during the Summer period is limited to the afternoon hours, the Service can assign workers and operators of loading/discharge machinery, starting from 1630 hrs., for a 7 hour period which can be extended, if conditions warrant, to the morning of the next day. Loading/discharge work may also be undertaken on Sundays and other non-working days (holidays) such work being considered as totally extra, being burdened with extra charges accordingly.

MEDICAL: All medical and hospital facilities available. No advance notice required except in special cases.

TANKERS: Discharging effected at private installations.

Shell	max. draft 32 ft.	Petrolles	max. draft 29 ft.
B.P.	max. draft 36 ft.	Fina	max. draft 28 ft.
Elvyn	max. draft 26 ft.	Mobil	max. draft 48 ft.

D.E.H. max. draft 36 ft. (outside steam generator factory, no facilities for going alongside).

DENSITY: 1025.

FRESH WATER: Available alongside berths. For vessels at anchor, water can be delivered by barges (capacity 150 – 240 tons) belonging to Piraeus Harbour Authority at 50% additional cost.

FUEL: Gas oil, fuel oil and mixtures of both to a certain viscosity available. Advance notice of requirements should be sent to Agent order complete customer's requirements.

WATCHMEN: Required.

HATCHES: Opened and closed by stevedores.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per crew member allowed out of bond. Wine/spirits, 1 bottle.

CARGO GEAR: Before commencement of loading or discharge, cargo gear is examined by Piraeus Harbour Authorities.

IDENTIFICATION CARDS: Passes required for seamen going ashore.

SERVICES: Compass adjusting, tank cleaning. No facilities for discharge of tank residues.

SHORE LEAVE: Permitted.

SPECIAL PRECAUTIONS:

Ship's Speed in Port: Incoming or outgoing vessels must keep speed steady, provided weather conditions and vessel's manoeuvrability allow to do so, but never to exceed 5 knots.

Pollution in the Harbour: Throwing overboard of ballast, objects of any kind, oil, food rejects, and dirt in general is strictly prohibited. All such rejects can be jettisoned after ship's exit from the harbour and at a distance not less than 16 miles from the nearest coast. Alternatively, all such rubbish can be thrown in a special rubbish-collecting vessel in the port.

Sea Pollution by Bunker Oil or Sediments: The jettisoning of oil products generally in any port or roadsteads less than 50 miles from the coast is strictly prohibited. Similarly prohibited is the pollution of the sea by jettisoning of oil-sediments during dry-docking or repairs of boilers of vessels.

Pollution of the Air: Strictly forbidden is the de-sooting of boilers of all vessels at Greek ports. Similarly prohibited is the exit of gases in the form of smoke, which poisons the atmosphere and endangers public health.

Overloading: If upon arrival or sailing the Port Authorities ascertain overloading of the vessel, heavy fines are imposed.

DEVELOPMENTS: Hercules Port Container Terminal under construction. Length 1,100 m. in 1st phase and on completion 2,300 m., depth 14 m. Scheduled for completion 1989.

AUTHORITY: Port of Piraeus Authority, 2, II Merarchias Street, Piraeus. *Tel:* 4520-910/919. *Telex:* 21-2187 Olp Gr. *Cables:* Olp – Piraeus. *Contacts:* Alexandros Zarkadas, Chairman; George Klavdianos, General Manager, Tel: 4520-944; Dion Stathopoulos, Exploitation Service Head; Emmanuel Peloponissios, Harbour Master.

PRINOS: 40.56 N. 24.31 E.

SHIPMASTER'S REPORT: May 1984.

ANCHORAGE/PILOTAGE: Tankers using this terminal are required to anchor approximately 0.5 miles South of the breakwater at Kavalla town if a waiting period is involved but other than that vessels pick up the Pilot and Loading Master in the vicinity of the berth. Vessels which have had to anchor off Kavalla pick up the Pilot and Loading Master from Kavalla and proceed to the berth with them.

TUGS: Two tugs are available to assist with mooring operations.

BERTHING: B.A. chart No. 1086 shows a tanker mooring of superbuoy size which is incorrect. Actual berthing arrangement is an open sea moor using both anchors forward run out to about 9 shackles on each anchor and aft making fast to 3 buoys using 3 lines to each buoy. The buoys are orange in colour exhibiting an orange light flashing every 5 seconds.

LOADING: Product is stabilised crude. API 31.12. Average temperature 72°F. Loading rate approx. 1,700 t.p.h. Manifold connection 1×10 in. hose. There are no dirty ballast facilities. At the end of loading there may be a delay of up to 3 hours whilst waiting for cargo papers.

PROTI ISLAND: 37.05 N. 21.32 E.

SHIPMASTER'S REPORT: July 1981.

LPG Transfer Anchorage:

CHART: B.A. 719.

LOCATION: About 12 miles North of Pilos. Ship has to go to Pilos inwards and generally outwards to clear Customs and Immigration.

ANCHORAGES: For ship-to-ship transfers, only two anchorages are allowed – to West and North of Proti Island, both in deep water of 60 fathoms.

The Western anchorage is safe in Northerly or Easterly winds, very unsafe in Westerly or Southerly winds. Northern anchorage used in West or Southerly winds. Prevailing winds in Summer are from the North. Generally reasonably good position can be found 0.5 miles off the coast in both cases.

In bad weather vessels are allowed to shelter to the East of the Island, which is an excellent anchorage in all winds with little to no swell and good holding ground. Unfortunately the local population do not like ships in the area and exert pressure on the local authorities to move the vessel if it can be seen, as it can, when anchored to the East of Proti Island.

VHF: Pylos Port Authority on Channel 12.

CURRENT: Generally sets at 0.5 knots, but can be variable.

FENDERS/HOSES: Stored at Marathos, the local fishing village, during the Summer season.

PERIOD: The area is used for LPG transfers from May to December. Between December to May Karamata Bay is used.

SERVICES: Agents: J. Vrettakos and J. Giannopoulos have office in Marathos manned when a ship is working at Proti Island.

Stores: Small quantities can be brought out by the local fishing boats. Large quantities have to come up from Pilos by tug. Stores can be warehoused at Pilos, until required.

Doctor: For Cholera injections, comes from Kalamata, charge $34.00 plus $4.50 per person. Doctor will come out to ship in calm weather otherwise injections done in Agent's office. Yellow Fever can only be done in Athens. For general medical attention, there is a doctor in the village, or hospital at Karamata one hour away.

Water: Fresh water can be brought from Pilos at $10.00 per tonne, minimum 200 tonnes. The sea water is so clean that ship's plant can make fresh water.

Money: Customs rule, no Greek Drachmas to overseas seamen, they must use their own currency and exchange.

Reliefs/Crew Exchange: For large scale crew changes this has to be planned well in advance with permission from Athens. This is because the local population do not like a lot of foreign seamen moving about, Marathos is not an immigration landing point (Comes under Karamata) but the ship clears inwards and outwards at Pilos, a different district. A few officer changes present no problems.

The total number of joining/leaving with their documents numbers, nationality, flight numbers (arrival and departure), must be telexed by Owner to Agent at least four days in advance of movement.

Customs Allowance: Very strict (every 10 days), advisable to take full crew issue to cut costs of visits.

Lloyd's Surveyor: From Piraeus, minimum 2 days, charge US $1,500.00 per 2 days.

Cargo Surveyor: Redwood from Kalamata. Surveyor checks inward and outward for quantity transhipped (not individual shipments). Cost $340.

Boat Service: Standard charge $82.00, basis 4 round trips per day to Marathos. Local boatmen use fishing boats who are generally very good. Last boat back 2300 hrs.

Local Facilities: Marathos is a quiet fishing village with a few tourists in Summer. The local population do not like any trouble from ships' crews and will get the authorities to stop shore leave at the slightest sign of trouble.

Storing Costs: Tug from Pilos on small amount basis	$800.00
Tug from Pilos on 40 tonne basis	$2,500.00
Riggers at Pilos per tonne	$25.00
Customs at Pilos	$83.00
Barge Pilos Bay per tonne	$33.00
Crane Hire Pilos – straight charge	$333.00
Pilot at Pilos in and out	$250.00

Generally most facilities and items are obtainable in this area as long as sufficient notice given.

Cargo Transhipment: 'Naftomar' the Greek company have sole rights to transhipment in the area. Their representative (a former LPG Master and Mate) stays in Marathos when a ship is working off Proti Island. He does all the co-ordinating. Contact can be made on VHF Channel II call sign "Nestor".

The representative is very helpful. Usually about a day's notice is given for a ship and as they all have to call at Pilos before coming to Proti Island a further 4 hours' notice is given.

NO coming alongside at night. Vessels leave at night with complete safety.

All the vessels are around 3,000 cu.m. (semi-pressure vessel type). Propane can be taken at about 150 m.t.p.h. and Butane at 250 m.t.p.h.

Various ships are used – generally Greek under 'Naftomar' flag but Panamanian, Norwegian and Japanese. Generally co-operation good.

We obtained a receipt for each shipment signed by 'Naftomar' representative. A local fishing boat transfers lines on coming alongside.

Hose connection/disconnection done by ship's crew. The hoses we had were new 'British Compoflex' like our own and no trouble. They also gave us some old hoses as vapour return which we did not use.

Fenders: 3×2 m. Yokohama type as primary and old truck tyres as secondary. We kept the fenders at all times except when weather bad with ship alongside when she took them with her to get away and fishing boats brought them back to us.

AUTHORITY: Port Authority of Pylos, Pylos Messinias, Greece. *Tel:* 0721-22225. *Telex:* 252101. *Cables:* Limenarchon-Pylos. *Contact:* Harbour Master.

PYLOS (including Sfaktiria and Navarino Bay): 36.55 N. 21.42 E.

DOCUMENTS:

For Port Authorities

1. For ships under the Greek flag and foreign flag vessels of Greek ownership.
   Inspection of all Ship's Papers.
   7 Crew Lists with full details of crew members' home addresses.
   For passenger vessels – 6 Passenger Lists including passport details, that is, number, date of issue and nationality.
2. Foreign Flag Vessels.
   Inspection of all Ship's Papers.
   3 Crew Lists.

For Customs

Crew Personal Effects List.
1 Crew List.
Passenger List.
Lists of goods or effects to be sent ashore.
3 Lists of Stores and Spares.
Bills of Lading.
Cargo Manifest.

PILOTAGE: No pilot station. There is a private Pilot employed by the bunkering company named G. Mamidakis Limited. Agent and/or bunkering company should be advised in advance of vessel's ETA order arrange Pilot to meet vessel at entrance of Navarino Bay and take vessel to oil installations at Sfaktiria Bay.

ETA should be passed by radio telephone at least 48 hours before arrival and thereafter confirming ETA within 24 hours of arrival. If ETA has not been passed by radio, vessel should wait at entrance to Navarino Bay, and request Pilot by signalling letter "G" by flashing light or ship's whistle.

ANCHORAGES: Safe anchorage may be made in all areas of Navarino Bay except within red sector of Helonaki Islet light.

MAX. SIZE: Any size vessel can enter and anchor in Navarino Bay. The small harbour of Pylos is only suitable for small vessels.

HEALTH: Doctor visits vessels that require Free Pratique, and those coming from infected ports. Master and Health Officer together sign Maritime Declaration of Health. Free Pratique continues when vessel arrives from another Greek port. A vessel in transit must have Free Pratique if remaining in port more than 24 hours. Infected vessels or suspected vessels remain under quarantine in accordance with existing health regulations.

RADIO: Athinai Radio.

TUGS: No tugs available.

STEVEDORES: Labour requirements passed by radio at least 24 hours prior arrival. No shore loading/discharging facilities and this work effected by ship's gear. Average rate load/discharge 100 tons per gang every 8 hours.

MEDICAL: Agent should be advised by cable prior arrival of medical and medicant requirements. There are two chemists and a Red Cross hospital. Yellow-fever and cholera vaccination certificates required.

TANKERS: Sfaktiria Island Installation (ESAPP. G. Mamidakis Limited). 2 flexible hoses diameter 6 in. and 1 gas oil hose diameter 2.5 in. No facilities for residue discharge. At Pylos small harbour there is a jetty 100 m. length, the head of which is reserved for small tankers carrying wine and spirits, which moor stern to quay. At head of pier, depth of water about 4 m., but within short distance from pier, depth increases to 10 m. Only 1 vessel of 12 ft. to 15 ft., draft can moor stern to quay at any time. Loading/discharging is effected through flexible and portable pipelines belonging to Gialovi Wine Factory at Pylos, and cargo is transported by special tank trucks.
DENSITY: 1023 in harbour basin and whole of Navarino Bay.
FRESH WATER: Master or Agent must apply in writing to Customs Authority, and application is to include notice from water supplier giving quantity to be supplied and cost of supply. Water barge capacity 200 tons. Rate of supply 160 t.p.h. by canvas hoses. Barge belongs to Maritime Agency I. Vrettakos, Pylos. Water also available alongside Pylos harbour quay.
FUEL: Mamidakis Fuel Installations at Sfaktiria Island. Vessels should give 48 hours' notice to Mamidakis (Athens Office, address: Eleftheriou Venizelou 56; Tel. 622543) Pylos Tel. 22282.
FIRE PRECAUTIONS: No unusual fire precautions at Sfaktiria Installations, but at main port of Pylos authorities do not allow loading/discharging of 2 vessels at same time, as the only 2 berths available are very close to each other.
WATCHMEN: Usually not necessary to employ watchmen, but if required, available.
HATCHES: Usually opened and closed by crew.
CUSTOMS ALLOWANCES: 2 packets of cigarettes per crew member/day allowed out of bond according to duration in port and this quantity to be declared on Stores List. Store orders for supply of additional quantities are allowed on the basis of the number of crew and the length of voyage, basis 2 packets per day per crew member. 1 opened bottle wine/spirits allowed out of bond.
IDENTIFICATION CARDS: Shore passes issued against submission of seamen's books.
REPAIRS: 3 workshops for minor repairs.
REPATRIATION: Crew changes and repatriation facilities available.
AIRPORT: Kalamata Airport, 40 km. from Pylos. Kalamata/Athens flights every day at 17.50 hrs. Athens/Kalamata every day flights at 19.10 hrs.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: *(a)* Standard Government Holidays; *(b)* Local holidays: 9th May (St. Nicholas) holiday for port workers; 24th September; 20th October (Anniversary of Battle of Navarino). During these holidays, cargo work can be arranged subject overtime payment.
POLICE/AMBULANCE/FIRE: Police (Pylos) 223-16; Greek Red Cross Hospital Pylos 223-15; Kalamata Fire Brigade 28373.
TELEPHONES: No facilities for placing on board.
GENERAL: Very severe fines imposed on oil pollution.
SHORE LEAVE: Allowed.
DEVELOPMENTS: Work in progress to extend existing Pylos harbour pier to 215 m. length, 20 m. width, and 15 m. depth at head of pier. Depth inside pier to be 10 m.

SHIPMASTER'S REPORT: July 1981.
Time: GMT plus 2 hours Winter, plus 3 hours Summer as per A.L.R.S. Vol. No. 5.
Chart: Pilos/Navarine Bay – BA 211.
General: Pilos: A fairly busy port for ships taking stores and water and changing personnel.

Navarine Bay is well sheltered and generally deep.

Bay can be entered and left with safety as long as vessels keep well up to Pilos Island (Baba Island) off Cape Kypri, shoals exist on the Southern shore.
Pilot: Advise Agent 24 hours in advance. Pilot boards about 1 mile outside heads in calm weather, otherwise inside, from slow motorboat.

Pilot speaks little English, uses mostly sign language but seems competent.
VHF: Pilos Port Authority and Pilot on Channel 12 when expecting vessels. Agents work Channel 11, Call Sign "Nestor" when expecting vessels (unofficial).
Anchorage: In area 8.5 cables N.W. of Pilos Jetty (5 shackles).
Bay: Navarine Bay is good and sheltered. An 8 fathom patch in centre as per BA Chart 211.

Agent says 300,000 d.w.t. tankers drawing up to 15 m. draft have anchored in Bay.

New jetty for small craft at Pilos.
Current: Outside Heads generally South going at rate of 0.5 knots.
Tug: 1 tug (1,000 h.p.) owned by principal Agency, called "Nestor", sometimes not at Pilos but at Karamata.
Agents: Principal Agents: J. Vrettako and J. Giannopoulos with offices in Athens, Karamata, Pilos and Marathos.

Pilos office: Telex: 252152 Vret GR. Tel: 0723-22-255/22-219. Cables: "Tainaron".

Very good and helpful.
Services/Supplies: Pilos: A 20 tonne crane on jetty owned by Agents.

Water: Fresh Water is plentiful at $4.00 per tonne minimum 20 tonnes in Navarine Bay.

Supplies: Generally good, although advance notice required. If frozen provisions required this must be stipulated.
Unitor Gas: Limited range held by Agents. Oxygen/acetylene, R22/12 has to come from Athens area (2 days' notice).
International Paint: From Piraeus full range (2 days' notice).
Lub Oil: Most brands including Chevron from Piraeus in drums (2 days' notice).
Repairs: Very limited at Karamata about one hour away, otherwise full range at Piraeus. Parts for repair can be sent by truck to Piraeus and return the next day if an emergency, but generally allow three days.
Fuel: Very limited supply H.O. and D.O. in Pilos but negotiations under way to expand local facility.
Walport Films: By arrangement with Agency in Skaramanga (2 days' notice).
Airport: At Karamata – local airport one hour away. Olympic Airways daily flight from and to Athens. Arrives at 1800 hrs. and leaves at 1900 hrs. (40 minute flight).

International flights from Athens. To catch internal flight to Karamata you must land in Athens not later than 1600 hours.
Communications: Roads poor, takes 6 hours to get to Athens. Telephone services – internal reasonable, overseas poor.
Boat Service: From anchorage to town in Navarine Bay easily arranged at $5.00 per ship per trip.
Customs/Immigration: Customs very strict. Basic issue only allowed but best take out for all crew members. Immigration check all crew books inward and outward. Greek shore passes required with crew members photo attached. Forms: All on Greek Papers.
1 copy Ship's Particulars.
2 copies General Stores Declaration.
2 copies Bond Store Declaration.
1 copy Crew Declaration.
6 copies Crew List (U.S.A. style).

AUTHORITY: Port Authority of Pylos.

RHODES (including Akantias): 36.25 N. 28.17 E.

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
1 Cargo Manifest.
1 Stores and Provisions List.
Usual Ship's Documents.
PILOTAGE: 24 hours' notice required by Rhodes Port Authority. Pilot boards 1 mile from port.
ANCHORAGES: Suitable anchorage up to a distance of 300 m. from the port East of the pier extension.
RESTRICTIONS: Port entry can be difficult and sometimes impossible with strong North or N.E. winds.
MAX. SIZE: Up to 24 ft. draft.
RADIO: Rodos Radio, 2182 kHz.
BERTHING: Pilot will advise Master of berthing place in accordance with Port Authority instructions.

2 diesel motor-driven cranes capacity 2 tons and 3 tons available for discharging. No facilities for containers.
STEVEDORES: 24 hours advance notice required in order to arrange gangs.
MEDICAL: General hospital and private clinics available.
FRESH WATER: Available – supplied by canvas hoses.
FUEL: Deliveries only by tank trucks.
HATCHES: Opened and closed by crew.
CUSTOMS ALLOWANCES: 60 cigarettes per day per crew member and 1 bottle wine/spirits per crew member allowed out of bond.
CONSULS:

France	Tel. 2318	Sweden	Tel. 3379
Germany	,, 7479	Turkey	,, 3362
Italy	,, 7432		

REPAIRS: Minor repairs only.
AIRPORT: Distance 15 km. During Winter, flights twice daily to Athens, and during Summer, flights 5 times daily.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: 1st January, 6th January, 7th March, 25th March, Good Friday, Easter Monday, 21st May, 15th August, 28th October, 8th November, Christmas Day, Boxing Day.
POLICE/AMBULANCE/FIRE: Police, tel. 7690 or 2220; Ambulance, tel. 2555; Fire Brigade, tel. 3333.
DELAYS: Sometimes necessary to remain outside harbour up to 3 hours to allow coastal passenger vessels to berth if other berths are full.
DEVELOPMENTS: Extension of the Merchant Port Pier by 110 m. to North and 140 m. to S.E. Also an extension of the new harbour (Akantias) pier, to the East of the Marine Harbour. Length to be 480 m. with a depth of 6.5 m. alongside.
AUTHORITY: Central Port Authority of Rhodes.

STYLIS: 38.55 N. 22.37 E.

DOCUMENTS: The usual Documents for all Greek Ports are required i.e. Cargo Manifest, Crew List, Store Lists, Personal Effects, Ship's Certificates, Oil Book, Cargo Gear Book, Exchange Declaration.
PILOTAGE: Compulsory. Pilot can be boarded at Stylis anchorage which is half a mile South of the Island of Kaloyiros. Pilot is a practical seaman who has experience and knowledge of local waters.

Vessels entering Stylis port must pass through the channel of 2 flashing green and 2 flashing red sea buoys and be in the line with the main light situated on the pier, flashing orange.

There is a pilot boat painted white flying the international Pilot's letter "H". VHF is installed and the working frequency is Channel 12.

There are 4 white launches available for hire (capacity 10 – 20 passengers). VHF is installed and the working frequency is Channel 10. These are for Pilots and Crew Members of anchored vessels.

ANCHORAGES: See "Pilotage".

The Gulf of Maliakos is a safe anchorage for laid up vessels. Position should be given upon request to the Ministry of Merchant Marine, Piraeus.

MAX. SIZE: Max. draft 18 ft. 6 in.

VHF: Port Authority on Channels 7 and 12.

TUGS: No tugs are available. For large vessels being laid up at Maliakos Kolpos tugs and Pilot must be ordered from Volos.

BERTHING: Stylis port is an open port on the North side of Maliakos Kolpos and consists of berths on the North side and of shallow waters on the South side which break at low tide. The berths total about 450 m. in length, forming the Greek letter π. The draft varies along the 3 berths with a max. of 18 ft. 6 in. at HW and 17 ft. at LW.

CRANES: No crane railway system is installed. Loading and/or discharging operations take place only by ship's gear or by mobile cranes which can be hired through the local Agents from Stylis/Lamia and/or Volos.

STEVEDORES: Working hours: 0800 hrs. – 1700 hrs. daily.

FRESH WATER: Fresh water available 24 hours. Rate 30 cu.m.p.h. Vessels must use their own hoses.

FUEL: No bunkers available. Vessels can be supplied only by barge and/or trucks ordered from Volos/Athens/Salonica.

REPAIRS: Minor repairs can be carried out.

STORING: A limited quantity of stores and provisions are available in Stylis. Transit stores are not available.

HOLIDAYS: Aghios Athanassios on January 18th, Aghios Nikolaos on December 6th.

GENERAL: No warehouses are available on the docks.

The main exported goods are olives and olive oil in tins/drums, reels of cables, cotton, etc. The imported goods are timber, machinery, paper, etc.

DEVELOPMENTS: A dredger is widening the channel and deepening the Harbour in order to accommodate vessels up to 20 ft. draft.

AUTHORITY: Stylis Harbour Authority, Stylis, Greece. *Tel:* (0238) 22329. *Contact:* Lieutenant Commander John Kioupis, Harbour Master.

SUDA BAY, Crete: 35.29 N. 24.09 E.

PORT LIMITS: Suda Bay.

DOCUMENTS:

3 copies Crew List.
Cargo Manifest.
Agency Manifest.
Transit Manifest.
Ship's Store or Instruments Manifest.
Clearance from the last Port of Call.
All the necessary certificates according to International Laws and Conventions.

PILOTAGE: Not compulsory – pilotage service is non existent.

ANCHORAGES: Safe anchorage area in the Port of Suda according to the Port Authority instructions.

RESTRICTIONS: Permission for departure or arrival after sunset is given by the Suda Navy Base.

MAX. SIZE: Permissible length 200 m., breadth 10 m.

HEALTH: Pratique is compulsory for all ships coming from ports outside Greece.

VHF: Helles Radio VHF Channel 16.

TUGS: None.

BERTHING: Cargo pier, depth up to 32 ft. Grain silo with similar depth alongside.

CRANES: None.

BULK CARGO FACILITIES: Bulk cargo discharging gear available.

SPECIALISED CARGO-HANDLING FACILITIES: Fork lift trucks available.

BRIDGES: None.

STEVEDORES: Available.

MEDICAL: Hospital facilities available.

TANKERS: There are no oil discharging installations or facilities for tankers.

FRESH WATER: Installations for the supply of fresh water available.

FUEL: Available in limited quantities.

FIRE PRECAUTIONS: Fire brigade service at Chania.

CONSULS: Germany F.R. and France.

REPAIRS: Limited facilities.

DRY DOCKS: None.

SURVEYORS: None.

WATCHMEN: Services of watchmen are not necessary and are non existent.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle of spirits.

CARGO GEAR: Only with ship's gear.

REPATRIATION: Two flights and one passenger ship daily for Athens.

AIRPORT: Airport 15 km. from Suda Bay. Regular air service, two flights per day.

TIME: In Winter GMT plus 2 hours, in Summer GMT plus 3 hours.

POLICE/AMBULANCE/FIRE: Police 89271, Ambulance 22550, Fire 22432.

TELEPHONES: Arrangements do not exist for placing telephones on board.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Shore passes are required.

REGULATIONS: Taking photographs of Suda Bay is strictly prohibited.

EMERGENCY CO-ORDINATION CENTRE: The Port Authority of Chania.

STORING: See "Prelims".

1. Yes.
2. Yes.
3. Yes.
4. Yes.
5. —
6. Yes.

DELAYS: Short delays only.

DEVELOPMENTS: No plans for new installations.

AUTHORITY: Port Authority of Chania, Chania, Crete, Greece. *Contact:* F. Psaras, Harbour Master.

SYROS: 37.26 N. 24.56 E.

DOCUMENTS: *Ships under the Greek flag* – documents required are:

Ship's Register.
Seaworthiness Certificate.
Log Books and Ship's Papers.
Load-line Certificate.
Radio Station Licence.
Fumigation Certificate.
4 Crew Lists.
2 Passenger Lists.

Ships under foreign flag, Greek owned – documents required are:

Ship's Articles.
Load-line Certificate.
Seaworthiness Certificate.
Ship's Papers.
Radio Station Licence.
Fumigation Certificate.
4 Crew Lists.
1 Passenger List.

Ships under foreign flag – documents required are:

Seaworthiness Certificate.
Fumigation Certificate.
Load-line Certificate.
Radio Station Licence.
2 Crew Lists.
1 Passenger List.

PILOTAGE: Pilot to be ordered by ship's Agent at least 24 hours before arrival notifying approximate ETA. Pilot boards from private motor launch, about 0.5 miles off the port, weather permitting. In bad weather Pilot boards in harbour entrance.

ANCHORAGES: Vessels awaiting Pilot anchor outside the harbour South of a line between the green breakwater light and the North end of Gaidaros Island. Anchorage in the Southern part of the harbour in depths of 20 m. – 30 m.

MAX. SIZE: Length 200 m. Vessels of shallow draft may go alongside the Neorion Pier or moor stern to the pier. Deeper-draft vessels remain at anchor in the harbour.

HEALTH: Free Pratique is given when ship's declaration of health has been endorsed by a Health Officer.

RADIO: Loutsa Radio.

TUGS: 2 tugs available. Tugs usually join vessel 1 mile from harbour entrance. Payment for use of tug's line is obligatory.

STEVEDORES: At least 1 day's notice required to arrange gangs.

MEDICAL: No advance notice required if medical assistance needed. Hospital and general clinic available.

TANKERS: Discharge alongside terminal of A. E. Seica at Lazareta, near the entrance to the harbour.

DENSITY: 1026.

FRESH WATER: Limited quantity can be supplied by private company. Delivered by barge.

FUEL: Can be supplied by A. E. Seica, by barge or pipe-line.

WATCHMEN: Not required.

HATCHES: Opened and closed by ship's crew.

CUSTOMS ALLOWANCES: Each man allowed 40 cigarettes per day for period not exceeding 5 days. Each man allowed 1 opened bottle of spirits. No restrictions for wine.

IDENTIFICATION CARDS: Shore passes are issued on production of seamen's books or passports.

CONSULS: France – Tel: 3–62. Netherlands – Tel: 7–20.

REPAIRS/DRY DOCKS: Neorion Syros Shipyards can undertake any kind of engine and hull repairs and alterations. Holds LTC licence for piston reconditioning.

	Floating Dock 1	*Floating Dock 2*
Capacity	75,000 d.w.t.	40,000 d.w.t.
Lifting Capacity	25,000 tons	15,000 tons
Length overall	230 m.	195 m.
Width between sidewalls	35 m.	33.5 m.
Pumping Time	160 minutes	100 minutes
Cranes	2×10 tons	1×15 tons 1×10 tons
Quay Space	1,800 m.	
Floating Cranes	1×70 tons capacity and 1×200 tons capacity	
Travelling Cranes	Up to 40 tons capacity	

Tank cleaning station with storage capacity of 7,000 tons and separator capacity of 3,000 tons of dirty ballast and slops per hour.

4 tugs of which one is an ocean going salvage tug.

Machine shop, plate shop, foundry containing the most modern equipment.

Gritblasting.

Service Agency for Sulzer Bros. Ltd., Lister Ltd., B+W, Caterpillar SA, SKL Ltd., MWM, MAN.

Resident Classification Surveyors: Lloyd's Register of Shipping, American Bureau of Shipping.

Neorion Shipyards Syros Ltd., Syros, Greece. Telex: 0293123 Neorion Syros. Tel: 010-281 22001.

REPATRIATION: Can be arranged.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
REGULATIONS: Port Captain should be contacted for any queries not covered by lists of regulations provided on arrival.
HOLIDAYS: Work may be arranged on all holidays on payment of 75% additional to tariff.
POLICE/FIRE/AMBULANCE: Police 6-10; Fire 3-33; Ambulance 5-55.
TELEPHONES: Cannot be connected on board.
SHORE LEAVE: Crew may go ashore after pratique is given, carrying shore leave passes issued by Port Authority.
DEVELOPMENTS: Port being dredged to permit entry of larger vessels. Shipyard installing facilities for building vessels up to 15,000 tons.

SHIPMASTER'S REPORT: February 1983.

Vessel called for bunkers only.

Documents: Not required for bunker call.
Pilotage: Recommended, not known whether compulsory or not. Vessel could undock without Pilot, however, Pilot necessary for docking.

Pilot boards 1 mile East of harbour entrance.

Chart: B.A.1833 – Plans in the Kirkladhes.
Restrictions: No restrictions on night berthing at bunker dolphin. No tidal restrictions.
Radio: Limnos and Athens. Cable address "Sekavin Syros" for bunkers.
VHF: Pilot and Bunker Agent operate on Channel 12.
Tugs: One medium size tug used aft for mooring and unmooring. Vessel cannot moor/unmoor without aid of tugs.
Berthing: 'Seka' bunker dolphin 214°T×3 cables from Fl.G. 3s. breakwater light. Berth is 2.5 cables from harbour entrance.

Vessel berthed head 040°T, with 7 shackles out on each anchor. Bunker dolphin just forward of bridge, starboard side. 4 mooring lines run from main deck and 1 spring from poop. All short nips from main deck.

Berth appears unsafe but we found that vessel remained alongside in strong winds.

Soundings taken at stern when moored gave 13 m. of water.

Vessel is restricted by draft, and distance from manifolds to dolphin.

Density: 1025.
Fuel: Bunker fuel oil and diesel available. Rate 200 t.p.h.

Shore installation used 6 lengths of hose (6 in. diameter) which were lifted aboard by shore derrick from bunker dolphin. The hoses were manhandled forward to the vessel's midship manifold. Same hoses used for both products.

No lighters available for bunkering.

Repairs: Facilities available.
Dry Docks: Available.
Airport: No local airport.
Authority: No authorities boarded.
Agent: No Agent in attendance for bunker call.

AUTHORITY: The Harbour Office of Syros.

THESSALONIKI (Salonica): 40.38 N. 22.56 E.

(See Plan)

PORT LIMITS: A vessel is considered as an "arrived vessel", when she has passed the line connecting the Small Kara Point and Paliomanna light buoy.
DOCUMENTS: For Greek flag and Greek-owned vessels:

List of Foreign Exchange.
Crew list (additional for Port Authority).

All vessels:

4 Crew Lists (Port Authority, Customs, Immigration and Health).
1 List of Stores.
1 List of Personal Effects.
Copies of Bills of Lading and Cargo Manifest.

PILOTAGE: Apply for Pilot through VHF Channel 12 or by international code signals. Pilot meets vessel about 1,000 m. S.E. of breakwater light (white). Pilot boat is small motor-boat carrying pilot flag.
ANCHORAGES: Area from 500 m. to 1,000 m. S.E. of port offers safe anchorage.
MAX. SIZE: Average safe depth of water 9.50 m. Two berths with depth 11.50 m.
HEALTH: Health Officer boards vessels from foreign ports to grant Free Pratique.
RADIO: Radio Thessalonika. 24 hours' notice of ETA required to obtain berth and stevedores.
VHF: Operative throughout 24 hours on Channel 12, Central Port Authority. Tugs on Channel 8. Pilots on Channels 12 and 7.
TUGS: 3 tugs from 500 h.p. – 1,800 h.p. owned by Nicolas E. Vernicos, also available for salvage and towage contracts.
MEDICAL: Advance notice not required – all facilities available.
SPECIALISED CARGO-HANDLING FACILITIES: The port has silos of capacity 20,000 tons (rate 150 t.p.h.).

AGET Installation: 1 berth for discharging cement in bulk by specially constructed ships equipped with automatic discharging gear. Max. draft 30 ft.

CRANES: 36 electrically driven dock cranes of 3 tons–27 tons capacity. 22 mobile cranes of 3.5 tons–30 tons capacity. 1 floating crane of 70 tons capacity. 87 forklifts up to 25 tons. 2×35 ton straddle carriers. 24 payloaders up to 3.5 cu.m.
TANKERS: 1. *Esso-Pappas installation. (a)* Sea Island berth capable of accommodating 2 vessels of 24,000 tons and 14,000 tons respectively. Max. draft 32 ft. 8 lines, diameter 16 in. (1); 10 in. (3); 4 in. (3); 6 in. (1). *(b)* 7 buoy mooring for vessel of up to 80,000 tons. Max. draft 44 ft. Submarine 34 in. pipe-line for crude oil discharge. 2 flexible discharge lines 10 in. diameter.

ALSO SEE → S.MAL

2. *Mamidakis Installation.* Stern discharge berth. Max. draft 32 ft. 2 submarine lines enable 2 grades of cargo to be discharged through 8 in. line at 200 t.p.h. and 6 in. line at 160 t.p.h.

DIRTY BALLAST: 2 tanks of 600 tons each and 1 of 6,000 tons are available for the reception of dirty ballast at Esso-Pappas installation.

The discharge overboard of any oil or oil contaminated water is strictly forbidden and every precaution must be taken to avoid pollution.

DENSITY: 1025.
FRESH WATER: Unlimited supplies available alongside. 2 water barges also available.
FUEL: Unlimited quantities available. Usual notice required. Suppliers B.P., Shell, Esso-Pappas, Mamidakis.
FIRE PRECAUTIONS: One firefighting launch of 2 × 480 h.p. and one fire fighting station.
WATCHMEN: If required, cost by private negotiation.
HATCHES: Opened/closed by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits allowed out of bond for each crew member.
CARGO GEAR: Adequate shore gear available.
IDENTIFICATION CARDS: Passes issued to crew members of foreign vessels.
CONSULS:

Austria
Belgium
Bulgaria
Chile
Denmark
Finland
France
Germany F.R.
Italy
Japan
Mexico
Netherlands
Norway
Peru
South Africa
Spain
Sweden
Switzerland
Turkey
U.K.
U.S.A.
Yugoslavia

REPAIRS: Only minor repairs.
REPATRIATION: Facilities for crew changes and repatriation available.
AIRPORT: Distant 12 km. S.E. of town. 6 flights daily to Athens.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: (National): 1st January, 6th January, 25th March, Good Friday, Easter Monday, 1st May, 15th August, 28th October, Christmas Day, Boxing Day. (Local): 26th October. Work may be arranged on holidays at double costs.
POLICE/AMBULANCE/FIRE: Port Police, tel. 531-502; Ambulance, tel. 531-531; Fire, tel. 199.
TELEPHONES: Facilities available for placing on board.
SHORE LEAVE: Permitted without restriction. For tankers, the Master should arrange transport with Agent for seamen to the landing pier in Thessaloniki Harbour. Seamen will not be permitted to pass through refinery area.
DEVELOPMENTS: 6th Pier under construction, completion 1988. Length 660 m., width 600 m. and depth 11.5 m. One section will be used as a container terminal.

5 new heavy duty multi-purpose dock cranes and 1×40 ton gantry crane for container handling under construction.

AUTHORITY: Port Authority of Thessaloniki, Thessaloniki 10467-54110, Greece. *Tel:* 031-526221 (ext. 112). *Telex:* 412-536 Thpa Gr. *Contact:* E. Sophianopoulos or Panos Mamalis, General Manager. D. Papadopoulos, Technical Service Director.

VOLOS: 39.21 N. 22.56 E.

(See Plan)

DOCUMENTS:

Nationality Certificate.
Measurement Certificate.
Crew Lists (5 copies).
Derat Certificate.
Health Documents of Crew.
Cargo Gear Book.
Safety: (a) Passenger Ship Safety Certificate.
(b) Cargo Ship Safety Construction Certificate.
(c) Cargo Ship Safety Equipment Certificate.
(d) Cargo Ship Radiotelegraphy or Radiotelephony Certificate.
(e) Exemption Certificate.
(f) Nuclear Passenger Ship Safety Certificate.
(g) Nuclear Cargo Ship Safety Certificate.
International Load Line Certificate (1966).
Certificate for Inspection of Life Raft.
Oil Book and International Sewage Pollution Prevention Certificate (1973).

PILOTAGE: Compulsory. Pilot boards about 1 mile outside port. Pilot boat is small launch coloured grey and black.
ANCHORAGES: Suitable anchorage situated 1–2 miles outside harbour in depths of 14 m. to 20 m.
RESTRICTIONS: Vessels in excess of 10,000 tons unable enter at night.

MAX. SIZE: Max. draft 30 ft., no limitation on length or breadth.
HEALTH: Port Officer acts as Health Officer and Pratique effected on doctor's advice. If arriving from another Greek port, Pratique automatic.
VHF: Port Authority on Channel 12.
TUGS: Join vessel at entrance to harbour. 7 tugs, 280 h.p., 380 h.p., 465 h.p., 480 h.p., 640 h.p., 860 h.p. and 1,080 h.p.
BERTHING: Ro/Ro facilities available.

Dock	*Length*	*Depth*
K	600 m.	8.0 m.
1	1,000 m.	9.7 m.
11	980 m.	9.7 m. (under construction)
R	270 m.	7.0 m. (under construction)

CRANES:

1	Mobile crane (For containers)	— Capacity 35 tons
1	Mobile crane	— Capacity 35 tons
3	Mobile cranes	— Capacity 10 tons
3	Crawler cranes	— Capacity 4 tons
1	Rail mounted crane at Dock 1	— Capacity 27 tons at 17 m. and 16 tons at 30 m.

Cranes under construction:

Dock 1	4 cranes	— Capacity 8 tons at 20 m. and 6 tons at 25 m.
Dock 11	2 cranes	— Same capacity as Dock 1

BULK HANDLING FACILITIES: 2 silos, capacity 15,000 tons, loading ability 370 t.p.h. Discharging ability 250 t.p.h.
STEVEDORES: Advance notice required order arrange gangs. Cargo operations handled with ship's gear and with 14 shore cranes.
MEDICAL: Advance notice of required medical attention is necessary. Hospital and medical facilities available.
TANKERS: One berth, depth alongside 27 ft.
DENSITY: 1025.
FRESH WATER: Available at all the piers of the harbour. Also available from special barge (capacity 300 tons).
FUEL: Order through Agent. Oil delivered by small tanker "KEA" at all berths capacity 182 tons fuel.
GANGWAY/DECK WATCHMEN: Ship's gangway used. Usually ship's crew.
HATCHES: Usually opened and closed by crew, but if by stevedores, additional costs apply.
CUSTOMS ALLOWANCES: 1 to 2 packets cigarettes allowed per crew member per day. 1 bottle wine/spirits allowed out of bond.
CONSULS: Germany F.R., Tel: 25379, France, Tel: 25870, Sweden, Tel: 22611, Italy Tel: 26048, Belgium Tel: 23318, Netherlands Tel: 23494.
REPAIRS: Minor repairs can be effected.
SURVEYORS: Cargo inspector: Hellenic Register of Shipping.
REPATRIATION: Crew changes and repatriation can be carried out.
AIRPORT: No airport locally.
TIME: GMT plus 2 hours, Winter. GMT plus 3 hours in Summer.
HOLIDAYS: Usual Greek holidays. Local holiday 6th December; cargo work can be arranged subject to additional cost with the exception of 6th December.
POLICE/AMBULANCE/FIRE: Police, Tel: 23652; Ambulance, Tel: 27531; Fire, Tel: 33191.
EMERGENCY CO-ORDINATION CENTRE: Ministry of Mercantile Marine (Piraeus) Tel: 1/4112500-4173238.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Shore passes are required.
SERVICES: Divers available for surveys and underwater repairs.
DEVELOPMENTS: Construction of a new dock at the grain silo.

SHIPMASTER'S REPORT: 1977. (Updated 1984).
Restrictions: Draft restrictions on new quays subject to maximum depth of water of 32 ft. and on the original town quays a maximum depth of water of 28 ft. East side, 26 ft. West side, 26 ft. Head. (Thus draft will have to be about 2 ft. less than depth.)
Stevedores: Working hours 0730 – 1400 hrs. and 1400 – 2100 hrs. on overtime.
Berths: Town quay (K) with approx. 800 ft. frontage on each side and cross berth approx. 385 ft. on end. No. 1 quay – "L" shaped berths with base to the shore with frontages approx. 600 ft. on North side, 1,570 ft. on East side, 505 ft. on head and 1,210 ft. on West side.

No. 2 quay – "L" shaped berths with base to the shore with frontages approx. 500 ft. on North side, 1,385 ft. on East side, 330 ft. of head and 1,520 ft. on West side (Not yet finished, see plan).
Pollution: Port regulations prohibit the scraping and scaling of ships side and the pollution of sea or port area by painting.

AUTHORITY: Volos Central Port Authority, 380 00 Volos, Greece. *Contact:* Lieutenant E. Kalabalikis, Harbour Master. *Tel:* 421-24179. Vice Harbour Master, *Tel:* 421-20115. Port Police Office, *Tel:* 421-24179. Safety Navigation Office, *Tel:* 421-24758. *Telex:* 282170.

YALI ISLAND: 36.40 N. 27.08 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Cargo Manifest.
Bills of Lading.
List of Ship's Stores and Spares.
Health Declaration.
Ship's Certificates.

PILOTAGE: A Mooring Master is available from Piraeus. Mooring Master boards at the anchorage.
ANCHORAGES: Safe anchorage in the roads (36° 39′ N., 27° 09′ 30″ E.) except in strong Southerly winds.
MAX. SIZE: Max. LOA 230 m., max. beam 24 m., max. draft 11 m.
HEALTH: Port Authorities will board by launch from Nissyros to arrange Free Pratique. Any sick crew members will be disembarked to Nissyros by the same launch.
VHF: Contact Yali Quarry on Channel 8 and Harbour Master's office on Channel 12.
TUGS: Available.
BERTHING: The vessel is moored at loading berth on 8 buoys in addition to port anchor. During loading operations vessels have to be shifted from hatch to hatch.
BULK CARGO FACILITIES: Loading Berth is located at the end of the conveyor belt shiploader. The shiploader is on a cement construction, about 500 m. offshore. The cargo is carried by conveyor belt to the spout. The raising and slewing of the spout is controlled by the operator from the control desk to allow trimming of the cargo.
STEVEDORES: Workers are employed by private loading company.
MEDICAL: Nearest medical and hospital facilities are at the island of Kos, 7 miles North of Yali.
FRESH WATER: None available.
FUEL: Not available.
HATCHES: Opened and closed by ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 opened bottle of spirits are allowed for each man.
CONSULS: No local representation.
REPAIRS: No facilities exist.
AIRPORT: Nearest at Kos with 2-3 flights daily to Athens during the Summer and a daily flight in Winter.
HOLIDAYS: Sundays and Public Holidays.
SHORE LEAVE: Allowed.
GENERAL: *Pilots Recommendations for Mooring:*

1. Pilot's motorboat at position P1 (see "Plan") when direction of wind N.E., North, N.W., West, S.W.W. or when wind force is less than Force 3 on the Beaufort scale. Pilot's motorboat at position P2 (see "Plan") when direction of wind East, S.E., South, S.W. and with wind Force over Beaufort 3.
2. Vessels are always berthed with starboard side towards the loading station.
3. Have ready following moorings:
   (a) Fore – Portside 1 × 200 fathoms manila or nylon ropes – Starboard side 2 × 200 fathoms manila or nylon rope and
   (b) Aft – Portside 2 manila or nylon ropes (should be 200 fathoms long) – Starboard side 2 × 200 fathoms manila or nylon rope.

Note: The 200 fathoms aft starboard side ropes are required only in the initial stage of mooring to bring the ship in her final position.

4. Secure lines as follows:
   (a) Manila or nylon ropes to each of Buoy Nos. 3, 4, 5, 6, 7, 8.
   (b) Manila or nylon rope(s) to either Buoy No. 1 or No. 2 according to ship's size.
5. Vessel to have portside anchor chain lowered (1.5 shackles) when vessel is about 400 yards away from anchoring point.
6. On arrival have portside gangway ready for immediate use.

Expedite Loading:

1. As a rule loading commences from midship holds. Vessel to be ready to shift back and forth at all hours of day and night for loading of other holds on 30 minutes' notice.
2. Have all hatches open.
3. Broom swept and washed clean holds, hold ladders and supporting beams.
4. Arrive at Yali fully ballasted.
5. If arriving at Yali 4-5 hours before sunset loading may commence before dark.
6. Shipper intends to work around the clock.
7. In case of tween decker, before arrival, remove all tweendeck hatch beams also 2 or 3 adjacent beams from the centre of Nos. 2, 3 and 4 main deck hatches.

AUTHORITY: Harbour Master at Mandraki, Port of Nissyros, Nissyros Island, Dodekanissa (Dodecanese), Greece. *Tel:* (0242) 31222. *Cables:* Limenarchion, Nissyros, Greece. *Contact:* Mr. Stergios Remopoulos, Harbour Master.
OPERATOR: Lava Mining & Quarrying Co., 49-51 Sof., Venizelou St., Lycovrissis, Attica, Greece. Tel: (01) 8088111. Telex: (21) 5168-9. Contact: N. G. Simeonides, Manager.

Quarry: Yali Island, Nisyros Dodecanese. Tel: (0242) 31280. Telex: (29) 2195. Contact: Mr. G. Niskopoulos, General Manager.

Greenland

GENERAL:

CUSTOMS: The Master is not allowed to distribute tax-free cigarettes or other tax-free tobacco in a Greenland port.

DOCUMENTS: Following documents must be on board:
Speed Certificate.
Crew List.
Radio Station Certificate.
Safety Equipment Certificate.
Clearance Certificate.
Health Declaration.
Tonnage Certificate.
Certificate of Registry.
Derat Certificate.
Sailing Orders.

RESTRICTIONS: Foreign-flag vessels have access to Greenland ports. The crew may go ashore subject approval of Port Authorities.

All vessels arriving at ports must give a 24 hour ETA to Port Authority and Master should immediately after arrival make a presentation of Health Certificate and allow a medical check on board.

All ships have to pay harbour dues.

ICE INFORMATION: Ice Centre Narssarssuaq transmits daily at 1200 hrs. 1400 hrs. and 2200 hrs. GMT the latest information of the ice in Southern Greenland Waters. Information is transmitted in Facsimile (Mufax) on frequency 125.00 kHz drum speed 120. Ships can, free of charge, request telegraphic ice information from following coastal radio stations:
OZL—Ammassalik
OXF—Qaqortoq

Ice information also transmitted in Facsimile (Mufax) on frequency/time (GMT) as follows:

9,360 kHz	0003-0025 GMT.
5,850 kHz	0028-0050 GMT.
5,850 kHz	0943-1005 GMT.
9,360 kHz	1008-1030 GMT.
13,855 kHz	1218-1240 GMT.
9,360 kHz	1243-1305 GMT.
13,855 kHz	1308-1330 GMT.
17,510 kHz	1333-1335 GMT.
13,855 kHz	1803-1825 GMT.
9,360 kHz	1828-1850 GMT.

WATCHMEN: Ship is required to appoint a crew member as ship's guard on board.

TIME: GMT minus 3 hours. Permanent. Except at Thule Air Base and N.E. Greenland.

HOLIDAYS: As applicable to Denmark.

CONSULS: None.

WORKING HOURS: Normally from 0600 hrs. to 1800 hrs. with 2 meal breaks.

RADIO: In ports where there is a local radio station, vessels are prohibited from using ship's station for sending messages.

HEALTH: Before commencing voyage to Greenland, at the port of departure, Master is required to obtain a Health Certificate from an authorised medical practitioner, stating that there are no dangerous or contagious diseases on board, such as pest, cholera, yellow-fever or typhus. The crew list is to be included in this certificate stating that there are no venereal or other contagious diseases amongst the crew members. The Health Certificate is only valid if it has the stamp and signature of the Royal Danish Consul or Vice-Consul of the district in which the port of departure is situated. On arrival at the first Greenland port, the Master is to present the Health Certificate to the Port Authorities. Health Certificate may also be issued by a doctor in the first Greenland port of call.

REPORT: Immediately upon arrival of a vessel in Greenland, the Master must report to the Port Authorities.

WASTE DISPOSAL: It is forbidden to throw waste material of any description overboard into port waters.

AUTHORITY: Kalaallit Niverfiat, Post Box 1008, 3900 Nuuk, Greenland. *Tel:* 21111. *Telex:* 90627. *Cables:* Handel Nuuk/Godthaab. *Contact:* Trafikvirkom Heden.

AASIAAT (Egedesminde): 68.43 N. 52.53 W.

(Also see "General Information" at beginning of Greenland Section)

DESCRIPTION: Roadstead, Inner Port (inside Bay), Anchorage, Boat Port, and Atlantic Quay.

DAYLIGHT: Polar darkness from 2nd December to 11th January, and midnight sun from 22nd May to 23rd July.

CONDITIONS: *(a)* Current: flows Eastwards between the islands at Aasiaat from 3 hours before, to 3 hours after high water, following which, current flows Westwards for 6 hours. *(b)* Ice: Winter ice normally occurs from mid-December to early May, but can occur earlier, in November. New ice in the port can be up to 60 cm. thick; 1st January covering ice up to 30 cm and by 1st February about 45 cm. Icebergs sometimes enter port area and stop all shipping movement. *(c)* Tide: high tide height 2.6 m. (max. 3.1 m.). Low tide height 1.5 m. Direct West wind causes 0.3 m. rise above tidal height, and South or S.E. wind about 0.5 m. below.

PILOTAGE: No official port Pilot, but assistance arriving and sailing may be obtained from a local seafarer having good knowledge of the area. This local assistance should be ordered if required in ETA cable to Port Authority at least 24 hours prior arrival. The Port Manager usually acts as local expert as part of his normal duties.

There is VHF radio installation in office of Port Authority and it is usually possible to obtain VHF contact within 30 miles of Aasiaat.

Local area expert will board vessel from port boat at meeting place usually arranged just outside entrance to port.

No special pilotage regulations and no Outer Anchorage where Pilot may be taken on board. However, in waters North and N.E. of port entrance vessels may stop or proceed at very slow speed in order to embark local expert.

ANCHORAGES: No special anchorages, and vessel is only allowed to anchor for a short period at the entrance to port subject permission of Port Authority.

MAX. SIZE: Largest vessel to berth alongside Atlantic Quay was length 136 m., breadth 20 m., draft 7.5 m.

ENTRY: Day or night.

TUGS: None. 1 port boat to take lines and assist mooring.

RADIO: Local radio station "OYR". RDF station beacon East of the town. Radio link between Aasiaat and Transitoen, and between Transitoen and Roeveo.

BERTHING: Atlantic Quay: Length 70 m., depth alongside 8.1 m., at medium low tide and 10.7 m., at medium high tide. Height of quay at medium tide about 1.5 m., above w/l. 2 × 10 ton mobile cranes and fork-lift trucks used in discharging.

MEDICAL: Hospital, doctor and dentist available.

FRESH WATER: Available at Atlantic Quay and at tank-station.

FUEL: Only gas-oil available for local fishing vessels from the tank-station.

REPAIRS: Shipyard for repairs to wooden fishing vessels. Machine shop also available. Slip for small vessels (250 tons).

AIRPORT: Heliport.

SALVAGE: Salvage-station in the area.

AUTHORITY: Kalaallit Niverfiat, Niels Egedes Plads, 3950 Aasiaat, Greenland. *Tel:* 42244, 42147. *Telex:* 91000. *Cables:* Handelchefen Aasiaat. *Contact:* Handelchefen.

FAERINGEHAVN (Polaroil): 63.41 N. 51.34 W.

(Also see "General Information" at beginning of Greenland Section).

DOCUMENTS: Bill of Health: Doctor's certificate mentioning each member of crew by name to be free of contagious diseases. This document to be signed by Consulate in the port of delivery to be prepared by competent authority, passengers excluded. One Manifest with Bill of Lading. Ordinary Ship's Papers.

PILOTAGE: As a rule Pilot can be ordered in the months May-October, notice 12 hours before arrival is required.

ANCHORAGE: Inside fjord area.

RESTRICTIONS: None.

MAX. SIZE: Oil-carriers about 26,000 d.w.t., draft 40 ft. General cargo-ships 20 ft.

HEALTH: Master to apply with documents at harbour office for Free Pratique.

RADIO: Nuuk Radio: OXI, connected Faeringehavn by Telex and Telephone.

VHF: Oil company and fishing company are listening on VHF during working hours.

TUGS: None. 1 harbour boat for assisting with mooring and taking lines.

BERTHING: Natural port, anchorage for the largest vessels. Wharf, 225 m. with 5 m. at L.W.

STEVEDORES: None, but fishing and service company "Nordafar" may act as stevedores.

MEDICAL: For medical service, apply to Nuuk.

TANKERS: Load/discharge lines 6 in. and 8 in. Smaller diameters for bunkering when necessary.

FRESH WATER: Only available May to November.

FUEL: Available. Light fuel, gas oil, aviation turbine fuel A1, gas oil, oct. 97. But only with permission of Kalaallit Niverfiat at Nuuk.

GANGWAY/DECK WATCHMEN: Not required (ship's crew).

OPENING/CLOSING HATCHES: Must be carried out by ship's crew.

IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: Small repairs only.

REPATRIATION: Available, via Nuuk by air to Copenhagen.

AIRPORT: Nearest airport is Nuuk distance 35 miles regular airlines.

TIME: GMT minus 3 hours.

HOLIDAYS: Danish holidays and Greenland holidays.

POLICE/AMBULANCE/FIRE: Police tel. Nuuk 21448.

TELEPHONES: Not available on board.

GENERAL: Bunker station open all year; during Winter-time sometimes difficulties caused by ice.

SHORE LEAVE: Allowed.

DELAYS: Bunker station closes for arrivals between 2200 hrs. and 0600 hrs. local time.

AUTHORITY: Kalaallit Niverfiat, Polaroil, 3900 Nuuk, Greenland. *Tel:* 22527. *Cables:* Polaroil. *Contact:* Kalaallit Niverfiat, Nuuk.

ILULISSAT (Jakobshavn): 69.13 N. 51.06 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port is a narrow open bay, entrance to the N.W., having outer port and inner port. In outer port is Atlantic Quay and bunkering station, and inner port has another quay and a fishing harbour.
CONDITIONS: *(a)* Tide: height of average high tide 2.8 m. (max. 3.3 m.) low tide 1.6 m. *(b)* Wind: usually East to N.E. In Autumn winds are strong especially in the morning. *(c)* Ice: impression can be gained when approaching port that port is closed due to icebergs. On closer approach channels between icebergs will be found but if these openings appear too narrow a wider passage should always be found to the North. *(d)* "Kanele": a natural phenomenon that occurs at this port causing regular and heavy swell, height up to 2 m. Wave characteristic, long and flat, frequency about 6 minutes. Pilot should be consulted for full information.
ENTRY: Port usually open day and night, from mid May to end November.
DAYLIGHT: Polar darkness between 1st December and 12th January and midnight sun between 21st May and 24th July.
PILOTAGE: A local Pilot (Kendtmand) should always be used by larger vessels and request made to Port Authority in ETA cable. Pilot boarding place to be agreed with Authority.
MAX. SIZE: Largest vessel to berth at Atlantic Quay was length 93 m., draft 6.8 m.
RADIO: Aasiaat Radio.
TUGS: None. Port boats take lines and assist mooring.
BERTHING: Outer port depth 6.5/7 m., inner port 5.5/6 m. Atlantic Quay length 40 m. Depth alongside Atlantic Quay 7 m. at average low tide. Height of quay about 1.1 m. above w/l. Permission to enter port should be obtained prior arrival from Port Authority. Mobile crane capacity 10 tons, also fork-lift trucks.
MEDICAL: Hospital, doctors and dentists available.
FRESH WATER: Obtainable alongside Atlantic Quay.
AIRPORT: STOL airstrip available for internal flights.
REPAIRS: Machine workshop. Crane for lifting small vessels, capacity 50 tons.
GENERAL: Police, Fire Brigade, Port and cable office.
AUTHORITY: Kalaallit Niverfiat, Noah Molgaardsvey, 3952 Ilulissat, Greenland. *Tel:* 43244. *Telex:* 91204. *Cables:* Handelchefen Ilulissat. *Contact:* Handelchefen.

IVIGTUT: 61.12 N. 48.10 W.

(Also see "General Information" at beginning of Greenland Section)
OPERATORS: A/S Kryolitselskabet Oresund.
CONDITIONS: *(a)* Current: strongest about 3 hours before and 3 hours after high water, and vessels arriving and sailing should take this into consideration. *(b)* Tide: height of average high tide 3 m. (max. 3.4 m.), low tide 1.6 m. *(c)* Wind: calm for about half the year otherwise winds are usually from South or S.E. The dangerous winds for moored ships are the infrequent storms from North or N.E.; these storms seldom occur but if they do occur they do so in the Autumn. *(d)* Ice: Winter ice usually occurs from December onwards in the fjord outside Ivigtut and disappears in the beginning of April. Outside Ivigtut Winter ice always occurs, sometimes reaching a thickness of about 1 m. Information concerning ice conditions always obtainable on telegraphic request to GLK.
ENTRY: Day and night and usually all year round.
PILOTAGE: No official Pilot but an acting Pilot can be arranged through connection with Port Authority, cable address "Manager Ivigtut", at least 24 hours prior arrival.
MAX. SIZE: Largest vessel to have berthed at Kryolit Pier was length 102 m., breadth 14 m., draft 6.2 m.
RADIO: Qaqortoq Radio "OXF" or Gronnedal Radio "OVC".
VHF: Gronnedal Radio listens on VHF 24 hours.
TUGS: None. Motor-boat will assist mooring.
BERTHING: Kryolit Quay, depth alongside about 7 m. height of pier about 2 m. above w/l. Berthing during daylight only. Kryolit not exported from mid-December to end March. Crane capacity 3 tons.
FRESH WATER: Available.
FUEL: Deliveries of small quantities of gas-oil for local vessels only.
REPAIRS: No facilities.
MEDICAL: Hospital in Ivigtut, but doctors and dentists are in Gronnedal.
AUTHORITY: Ivigtut Cryolite Mines, Ivigtut 3930, Greenland. *Tel:* 17677. *Contact:* General Manager.

KANGERLUSSUAQ (Sondre Stromfjord): 66.58 N. 50.57 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Port is used for the supply of an American base and for air communication to Copenhagen. Port has a quay and a sea terminal for tankers.
DAYLIGHT: Camp Lloyd is situated South of the border for polar darkness but has a midnight sun from 15th June to 1st July.
CONDITIONS: *(a)* Current: the current at entrance and at the West of Sondre Stromfjord is N.E. at flood tide, and S.W. at ebb tide, and can reach a speed of 7 knots. *(b)* Tide: high water at Camp Lloyd is about 3 hours later than at the entrance of Sondre Stromfjord. Height of average high tide 3 m. (max. 3.6 m.). Low tide 1.6 m. *(c)* Ice: Sondre Stromfjord is frozen during winter throughout whole of inner harbour, but about 55 miles from Camp Lloyd, ice thickness varies from 5 cm. to 90 cm. *(d)* Winds: strong winds can occur from East and S.E.
ENTRY: On account of ice, the fjord is closed from beginning of December to end-June, but can be used day or night from beginning of July to end-October.
PILOTAGE: No authorised Pilot, but Harbour Master will assist berthing.
ANCHORAGES: Good anchorages about 2 miles S.E. of Emmons Pynt in depth of about 40 m. Great care should be taken in anchoring, since sea bottom is shelving.
RADIO: ETA should be given well in advance of arrival to the Royal Greenlandic Commercial Representative and also to the Port Authority. The arrival should be reported at least 24 hours in advance through GLK. The Harbour Master can be contacted on 2716 kHz and this contact should be established at least 1 hour before vessels arrival.
BERTHING: *(a)* A quay which is located North of Emmons Pynt, depth alongside only 3 m. *(b)* Tanker sea terminal about 700 m. S.S.E. of Emmons Pynt where there is mooring with discharge lines. Depth of water 24 m. – 26 m. on the South side of the mooring position; 15 m. at the mooring, and 10 m. on Northern side of mooring with rapid shelving to the North.

The Port Authorities should be contacted before mooring at the sea terminal. There are mobile cranes with lifting capacity up to 5 tons, and fork-lift trucks.
MEDICAL: Hospital, doctor and dentist available.
REGULATIONS: Camp Lloyd is an American Defence Area and entry is restricted. American supply ships have preference in mooring at all installations.
AIRPORT: Heliport and airstrip.
AUTHORITY: U.S. Air Force, 3910 Kangerlussuaq, Greenland. *Tel:* 11153.

MANIITSOQ (Sukkertoppen): 65.25 N. 52.54 W.

(Also see "General Information" at beginning of Greenland Section)
LOCATION: Harbour situated on S.E. side of Maniitsoq Island, and has Atlantic Quay.
CONDITIONS: *(a)* Tide: height of average high water 4.2 m. (max. 4.8 m.), low water 2 m. *(b)* Ice: Winter ice occurs from December to April. *(c)* Wind: advisable not to enter harbour area if winds are strong. Most obstructive winds are storms from South or S.W.
ENTRY: Port open day and night, normally all year round.
PILOTAGE: Pilot is arranged by cable to Nuuk Radio when giving ETA, which should be sent well in advance. Pilot will meet vessel as arranged outside the harbour, or at Faltings Skoer.
RADIO: Extended from Nuuk "OXI".
TUGS: None. Port motor-boats assist mooring.
MAX. SIZE: Largest vessel that can berth at Atlantic Quay is length 100 m., draft 6 m. Vessels up to 4,000 tons have used the port.
BERTHING: Depth in harbour is about 27 m. and alongside Atlantic Quay. Length 60 m. with depth of about 8.2 m. Height of quay is about 2 m. above w/l. Cranes up to 5 tons capacity and fork-lift trucks.
FRESH WATER: Available at quay.
REPAIRS: Repair workshop for repairs to wooden fishing vessels. Machine shop available. Slip for small vessels (225 tons).
MEDICAL: Hospitals, doctors and dentist available.
AIRPORT: Heliport.
GENERAL: Telex, telephones, Police, Fire Brigade.
AUTHORITY: Kalaallit Niverfiat, A. W. Nielsensvej, 3912 Maniitsoq, Greenland. *Tel:* 13244. *Telex:* 90701. *Cables:* Handelchefen Maniitsoq. *Contact:* Handelchefen.

MARMORILIK: 71.07 N. 51.17 W. (See Plan)

DOCUMENTS:
International Load Line Certificate.
Safety Raid Certificate.
PILOTAGE: Optional for coastal vessels entering Davis Strait. Agents are to make arrangements if Pilot required.
GENERAL DESCRIPTION: The berth is located at the North end of the West side of Agfardlikavsa Fjord.

Agfardlikavsa Fjord, West Greenland, (entrance approximately Lat. 51° 18′ W., Long. 71° 08′ N.) is located at the end of the larger Qaumarujuk Fjord.

Qaumarujuk Fjord, the Northeastern arm of Ingnerit, has its entrance between Qegertanguit and the Western extremity of Akuliarusikavsak, a mainland projection about 2.5 nautical miles S.E. Ingnerit is one of the largest of the branch fjords and flows into Umanak Fjord. It is entered between Tuperssuatsiait, the S.E. extremity of the Alfred Wegener Peninsula, and Akuliaruseq, a point about 4 miles S.S.E. The waters of the Umanak Fjord flow into the Nordost Bay.

The Agfardlikavsa Fjord is separated from the Qaumarujuk Fjord by a shallow, narrow bar. Depth at the centre of the sill is approximately 30 m.

There is a considerable surface water run-off along the Fjord walls including occasional rock slides. The bottom of the Fjord is filled with 6 to 8ft. of fine silty material.

Marmorilik (Lat. 71° 08′ N., Long. 51° 18′ W.) lies on the S.E. side of the Qaumarujuk Fjord at the Western entrance point of the Agfardlikavsa Fjord.

The larger fjords and Nordost Bay are encumbered with islets and rocks requiring extreme care in navigation. In particular, a shoal is known to exist some 350 m. N.W. of Marmorilik Point and extra care is required in this vicinity.
ANCHORAGE: There is an anchorage at Agfordlikowsa in depths of 20 m. to 35 m. Tankers can anchor near the berth in depths of 24 m. to 50 m., but must be aware of an unmarked 6 m. shoal about 300° True, and 375 m. (approx.) from the discharge point.

MAX. SIZE: Max. d.w.t. 36,500. Min. depth alongside ore terminal is 12.5 m. at LW.
RADIO: Ship-to-shore communications will be maintained using the following frequencies: 2182 kHz, 2210 kHz and 2738 kHz.

Information on ice conditions in the fjord can be obtained from shore personnel. During loading operations, Greenex will supply the vessel with 2 portable radio transceivers for communications between the carrier and the loading control station.
TUGS: 1 tug available, 720 h.p. The tug will assist with berthing and unberthing if required, and will break up any thin ice in the vicinity of the berth and entrance to the fjord.
BERTHING: The Marine Terminal is used for loading ore carriers up to 36,500 d.w.t. The berth consists of 4 breasting dolphins with bollards for springs and breast-lines. On the shore are 7 bollards for head and stern lines spread over a distance of 366 m. The min. depth of water alongside is 12.5 m. at LW.

Vessels normally berth port-side alongside and use the starboard anchor to assist in berthing. No. 1 hatch is lined up under the loader as it is the first hatch to be loaded.

Initially the headlines go to the Northernmost dolphin and stern lines to the Southernmost bollard on the shore.

Loading: Zinc and lead are loaded with a luffing and slewing ship-loader. The ship-loader is fitted with a 20 ft. conveyor to distribute the cargo in the hold. Communication is maintained between the vessel and control room by portable radios. The average loading rate is 500 metric t.p.h.

Notice of Readiness will not be accepted at time of arrival at the dock unless the vessel is in all respects ready to load.

General Cargo: Unloaded into barges with vessel's gear and towed ashore to a separate lightering dock located about 500 m. N.E. of the ore terminal.
MEDICAL: Emergency medical and dental treatment can be arranged and should, when possible, be requested by the vessel's Master in his ETA message to the mine site office.
TANKERS: Diesel fuel oil and turbo-fuel are stored in a tank farm located on-shore about 500 m. West of the point at Marmorilik on Qaumarujuk Fjord, at an elevation of 50 m.

Vessels usually berth using both anchors, 5 shackles on the port anchor, and about 4.5 shackles on the starboard anchor, using a heavy chain from the stern to the S.E. point of the oil installation. The chain is available from the shore. Tankers can also moor to the N.N.W. of the oil installation, but must remain outside the 6 m. line.

The tanker hoses are connected to an 8 in. flange connection for diesel oil or a 4 in. hose adaptor with dust-cap for turbo-fuel. The static head on the lines is about 70 m. when the tanks are full. An anti-static cable is provided.

On the shore, there are two 50 ton bollards and one 20 ton stock. No breasting or mooring dolphins are provided.
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: No facilities.
TIME: Standard time is GMT minus 3 hours.
GENERAL: *Repairs:* While alongside the dock, no repairs are to be undertaken that will prevent the main propulsion machinery from being activated at very short notice.

Vessel's Whistle: The vessel's whistle shall be operational during operations. One long blast on the whistle means "Emergency – stop operations".
AUTHORITY: Greenex A/S, 3963 Marmorilik, Greenland. *Tel:* 48311. *Telex:* 91500, 91507. *Cables:* Greenex. *Contact:* General Manager.

NARSSARSSUAQ (Isrecognosceringsstation):
61.08 N. 45.26 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Ice outlook station, with quay.
CONDITIONS: *(a)* Current: occasional strong N.W. current.
(b) Tide: average height of HW 3 m. (max. 3.6 m.) LW 1.6 m.
(c) Wind: S.E. wind sometimes reaches typhoon strength.
(d) Ice: in Winter ice thickness sometimes reaches 1 m. Ice breaker not available.
PILOTAGE: Not available. Base representative should be advised of ETA well in advance of arrival.
TUGS: None.
MAX. SIZE: Largest vessel to berth at quay was length 130 m., draft 8 m.
ENTRY: Open season from mid-May to mid-October. During season, port open day and night.
RADIO: Qaqortoq Radio "OXF".
VHF: Extended from Qaqortoq.
BERTHING: Quay length 140 m., depth alongside (West) 6 m. – 11 m. (East) 5 m. – 8 m. Height of pier 2 m. above w/l. 2 vessels may berth, 1 on either side of quay. Heavy mooring equipment on the quay, and should be used by larger vessels. Mobile cranes capacity up to 4 tons, and fork-lift trucks.
FRESH WATER: Obtainable at quay, about 80 tons per single off-take.
AIRPORT: Landing-strip for aircraft. Ice station usually uses Twin Otter aircraft and S61 Helicopter.
AUTHORITY: Gronlands Tekniske Organisation, Direktoratet, Hauser Plads 20, 1127 Copenhagen K, Denmark. *Tel:* (01) 13 84 72. *Telex:* 22979. *Cables:* Gronlandteknik.

Station Manager, 3926 Narssarssuaq, Greenland. *Tel:* 35266.

NORTH STAR BUGT (Thule Air Force Base):
76.36 N. 68.52 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Supply port for the Thule Air Force Base. Port is operated by and belongs to the U.S. Air Force.
DAYLIGHT: Polar darkness from 1st November to 10th February and midnight sun from 23rd April to 20th August.
CONDITIONS: *(a)* Ice: port is frozen over from end October to beginning July. From beginning of November, large areas of compact ice appear, and these can sometimes be up to 20 miles wide. During May, compact ice areas commence breaking up; however, large quantities of drift ice remain along the coast until end July. Winter ice is normally about 180 cm. thick. *(b)* Temperature: in January and February average temperature is 29° below zero. In June, July and August, average temperature is usually above freezing-point, but for the rest of the year it is below freezing. *(c)* Tide: mean Spring tide is 3 m. (max. 3.4 m.). Mean neaptide 1.7 m.
ENTRY: Normally, port is open early July depending upon ice situation.
PILOTAGE: No authorised Pilot, but American Port Authority assists in mooring and should be advised of ETA well in advance.
ANCHORAGE: Good holding ground in depth between 20 m. and 40 m., but anchoring should only be carried out following advice of Port Authority.
MAX. SIZE: Largest vessel to berth alongside quay was length 130 m., and draft 7 m.
TUGS: None. Port boats assist mooring.
BERTHING: 2 vessels may berth at the quay. Depth alongside about 7 m. Height of pier about 2 m. above MHW. Mobile cranes and fork-lift trucks; however, equipment varies from year to year and Port Authorities should be contacted well in advance. 3 amphibious craft for vessels discharging in the roadstead.
FRESH WATER: Available alongside quay.
AIRPORT: Two rescue helicopters stationed at this base.
REGULATIONS: The area is a Military Defence area and special permission is necessary to enter the port. Shore leave is prohibited.
MEDICAL: Hospital, doctor and dentist available.
AUTHORITY: U.S. Air Force, North Star Bugt, Greenland. *Tel:* 50091.

NUUK (Godthab): 64.10 N. 51.44 W.

(Also see "General Information" at beginning of Greenland Section)
DESCRIPTION: Narrow entry to port, but well protected, with good modern berths and anchorages.
CONDITIONS: *(a)* Current: sometimes strong between anchorage and the berths. *(b)* Ice: only very occasional large quantities of ice reach the port and into the fjord. If ice in area South of Nuuk, S.W. storms force drift ice into the fjord. In recent years the port has begun to freeze over in Winter, and small vessels have at times become icebound. *(c)* Wind: S. and S.W. storms spring up suddenly but only last for brief periods. *(d)* Tide: height of high water 4.4 m. (max. 5.1 m.); low water 2.1 m.
ENTRY: Port open day and night all year round.
DAYLIGHT: Nuuk situated South of the border for midnight sun and Polar darkness.
PILOTAGE: Port Manager normally acts as Pilot for ships, but is not an authorised Pilot. Pilotage may be arranged by VHF contact with Authority during normal working hours with 24 hours notice.
ANCHORAGES: Good anchorages available inside fjord. Larger vessels should anchor close to Rypeo and in Malene Bugt.
MAX. SIZE: Largest vessel to berth at Atlantic Quay was length 135 m., breadth 17 m., and draft 7 m.
TUGS: None. 1 port boat to take lines and assist mooring.
RADIO: Local radio station "OXI". 24 hours notice of ETA should be passed to Authority, cable address "Handelschefen Nuuk". Radio beacon at Kookoerne.
BERTHING: Larger vessels should contact Port Authority before approaching port at night-time. Atlantic Quay, length 170 m., has a depth alongside 7 m., approx. for the most Northerly 120 m., and between 4.5 m. – 5 m. at MLWS for the most Southerly 50 m.

Vessels normally berth starboard side alongside, unless fitted with bow thrusters, when a port side berthing is feasible. Mobile cranes capacity 10 tons.

Schooner Quay is 55 m. long, with a depth of 4.0 m., approx. Vessels normally berth bow Westward.

On the Coastal Passenger Quay length 40 m., depth 5.4 m., vessels usually berth with bow to the North.

There are several other small quays for the use of trawlers, and cutters, and a sand discharging berth length 30 m., depth 5 m.
TANKERS: Tankers can anchor and stern moor out from the gas installations, using an oil pipe-line connection. A mooring arrangement has been established for tankers of 25,000 – 30,000 d.w.t. below the tank and gas farm on the hillside.
MEDICAL: Hospital, doctors and dentists available.
FRESH WATER: Available at Atlantic Quay.
FUEL: Small quantities gas-oil available at Atlantic Quay after receiving permission from Port Authority.
REPAIRS: Slip for small vessels (40 tons) and minor repairs. Slip for vessels up to 1,860 tons, repairs possible for steel and wooden ships.
AIRPORT: Runway 950 m. × 30 m.
GENERAL: Police, Fire Brigade, radar and radio technicians, radio station post, and cable office.
AUTHORITY: Kalaallit Niverfiat, Skibshavnen, Post Box 1008, 3900 Nuuk, Greenland. *Tel:* 21125, 21144. *Telex:* 90627. *Cables:* Handelchefen Nuuk. *Contact:* Handelchefen.

PAAMIUT (Frederikshab): 61.59.7 N. 49.40.8 W.

(Also see "General Information" at beginning of Greenland Section)

LOCATION: The port is in the inner part of a small bay.

DESCRIPTION: Atlantic Quay; fishing quay; anchorage.

CONDITIONS: *(a)* Current: none. *(b)* Ice: big ice reaches to the North of the port; smaller ice reaches the port especially to the North, but South of the port it is usually ice-free. The best period of finding the port ice-free is between March/April and the end of August. *(c)* Tide: height of average high water is 3.8 m., low water 2.0 m. (max. 2.4 m).

PILOTAGE: Pilot should be requested in ETA cable via Nuuk Radio. Pilot will meet vessel at Satuarssugssuaq (Fyroen).

ANCHORAGE: S.E. of Skarvo. Holding ground is not good and anchoring should be carried out at very slow speed and only in good weather conditions.

MAX. SIZE: Length 100 m., draft about 6 m.

ENTRY: Day or night.

TUGS: None. Port boats assist in mooring.

RADIO: Radio station Nuuk "OXI". RDF station beacon East of the town.

BERTHING: Atlantic Quay. Length 90 m., depth alongside at average low tide, 7 m., depth in harbour about 10 m. Cranes up to 5 tons capacity and fork-lifts trucks used in discharging.

MEDICAL: Hospital, doctor and dentist available.

FRESH WATER: Available alongside Atlantic Quay.

FUEL: Refuelling quay, depth about 5 m., Gas-oil and diesel oil available for small vessels.

AIRPORT: Heliport.

REPAIRS: Workshop for repairs to wooden fishing vessels. Machine shop available. Slip for small vessels (250 tons).

GENERAL: Police Station, Fire Brigade.

AUTHORITY: Kalaallit Niverfiat, Poul Ibsensvej 1, 3940 Paamiut, Greenland. *Tel:* 17044. *Telex:* 90503. *Cables:* Handelchefen Paamiut. *Contact:* Handelchefen.

QAQORTOQ (Julianehab): 60.43 N. 46.02 W.

(Also see "General Information" at beginning of Greenland Section)

DESCRIPTION: Port is an open bay, facing South with Atlantic Quay.

CONDITIONS: *(a)* Current: flows N.W., but in Southern part of port from little current effect. *(b)* Tide: average height of high tide 2.8 m. (max. 3.2 m.); low tide 1.4 m. *(c)* Ice: drift ice between January and July occasionally fills whole port. *(d)* Wind: the most frequent wind is from East or N.E., normally occurring as storms during Winter months and as strong winds in Summer. Winds can be violent and cause rapid rise in temperature. Very secure moorings are advisable.

PILOTAGE: Port office is equipped with VHF which should always be used to contact Port Authorities before arrival, and to arrange Pilot's boarding position.

MAX. SIZE: Largest vessel to berth at Atlantic Quay was length 110 m. and draft 7 m.

ENTRY: Port open day and night normally throughout year, but from 1st January to 1st August, only available to specially constructed tonnage.

TUGS: None. Port boats take lines and assist mooring.

RADIO: Local radio station. Radio beacon station at Simiutaq about 10 miles West of entrance to Julianehab Fjord.

BERTHING: Atlantic Quay – length 60 m., depth alongside between 7/9 m. on average high tide and 1 quay, length 60 m., depth alongside 4.8 – 7.2 m. for small vessels. Height of quay is 1.3 m. above w/l. Mobile cranes, lifting capacity up to 5 tons.

MEDICAL: Hospital, doctor and dentist available.

FRESH WATER: Available from Atlantic Quay during Summer months.

FUEL: Gas-oil available at Atlantic Quay.

REPAIRS: At repair quay there is a stationary crane lifting capacity 35 tons. Slip for small vessels (250 tons) and minor repairs. Machine shop available.

AIRPORT: Heliport.

AUTHORITY: Kalaallit Niverfiat, Torvevej, Qaqortoq, Greenland. *Tel:* 38244. *Telex:* 90202. *Cables:* Handelchefen Qaqortoq. *Contact:* Handelchefen.

QEQERTARSUAQ (Godhavn): 69.14 N. 53.32 W.

(Also see "General Information" at beginning of Greenland Section)

DESCRIPTION: Port consists of a mooring inside a bay and a 12 m. quay with depth 4 m.

DAYLIGHT: Polar darkness from 25th November to 15th January, and midnight sun between 19th May and 26th July.

CONDITIONS: Ice: Winter ice is fast from November–December until end May or beginning of June. Thickest observed Winter ice is about 100 cm.

ENTRY: Day or night. Port is open from May to November. Between mid-April until May the port can only be used by specialised tonnage.

PILOTAGE: Boarding point arranged with Port Authority in ETA advices.

ANCHORAGE: Good anchorage in the bay – outer port.

MAX. SIZE: Largest vessel to date length 100 m., draft 6.5 m. at quay with length 60 m. and depth 4 m.

TUGS: None. Port boats assist with mooring.

RADIO: Extended from Aasiaat "OYR". RDF Station beacon.

BERTHING: Quay length 12 m. depth alongside 4.0 m. at MLWS. Vessel moors to 2 anchors and stern-lines to the shore. Mobile cranes on shore capacity up to 5 tons. Depths in bay about 6.82 m.

MEDICAL: Hospital. Doctors and dentist available.

GENERAL: Arctic Scientific Station, Fire Brigade, Cable Office.

AUTHORITY: Kalaallit Niverfiat, Holten Mollersvej 3, B 3953 Qeqertarsuaq, Greenland. *Tel:* 47244. *Telex:* 91401. *Cables:* Handelchefen Qeqertarsuaq. *Contact:* Handelchefen.

SISIMIUT (Holsteinsborg): 66.56 N. 53.40 W.

(Also see "General Information" at beginning of Greenland Section)

LOCATION: Harbour is situated on Northern side of Tommermandsoen.

CONDITIONS: *(a)* Tide: average height of high tide 3.5 m. (max. 4.4 m). low tide 2 m. *(b)* Ice: Winter ice up to 1 m. thick. Ice normally occurs from December to March or April.

ENTRY: Port open day and night, and normally all year round.

PILOTAGE: Arrange with Authority through Aasiaat Radio, cable address "Director of Commerce Sisimiut". Pilot meets vessel at Jakobs Skaer, 2 miles S.W. of Mollersoe.

ANCHORAGE: Large vessels can anchor outside port and discharge into barges.

MAX. SIZE: Largest vessel that can berth alongside Atlantic Quay, length 136 m., breadth 20 m., draft 7.2 m.

TUGS: None. Port boats take lines and assist mooring.

RADIO/VHF: Radio station extended from Aasiaat "OYR". VHF connection in Port Director's office. Radio technicians available, cable address "Polar Radio".

BERTHING: Atlantic Quay, length 60 m., depth alongside 7.8 m., at average low water. Height of quay 2 m., above w/l. If berth occupied, loading/discharging of larger vessels at anchorage with barges. At Atlantic Quay there is a mobile crane with capacity of 10 tons and fork-lift trucks. Belt conveyor for coal.

Offshore Quay: Length 20 m. with depth of 6 m. at LW.

MEDICAL: Hospital, doctors and dentists available.

FRESH WATER: Obtainable at Atlantic Quay.

REPAIRS: Slip for small vessels (250 tons). Repairs possible to wooden ships. Machine shop available.

AIRPORT: Heliport.

GENERAL: Post and cable offices. Telephones not normally available for connection on board, but vessels at anchor can call Port Director's office on VHF during daytime.

AUTHORITY: Kalaallit Niverfiat, Frederiks Den 9 Plads, 3911 Sisimiut, Greenland. *Tel:* 14055, 14044. *Telex:* 90805. *Cables:* Handelchefen Sisimiut. *Contact:* Handelchefen.

NOTES

Please also advise Shipping Guides Ltd.

Grenada

ST. GEORGE'S: 12.02 N. 61.46 W.

DOCUMENTS:
Port Authority: 1 Crew List, 1 Passenger list.
Health Authority: Health Declaration.
Customs: Stores List, Crew Declaration, 2 Crew Lists, Passenger List, Clearance from last port.
Immigration: 2 Crew Lists, 2 Passenger Lists.

PILOTAGE: Compulsory for anchoring and berthing for vessels over 450 g.r.t. Notice must be given before 1500 hrs. for vessels requiring berthing between 1700 hrs. and 0700 hrs. the following day.

Pilot boards at Pilot Station 0.5 miles N.W. of the red flashing buoy.

ANCHORAGE: Vessels anchor in position 12° 02′ N., 61° 46′ W.

RESTRICTIONS: Vessels are berthed between 0700 to 1700 hrs. Unberthing may be done in certain circumstances outside of the above hours.

MAX. SIZE: Single screw vessels up to 600 ft. LOA, approximately, depending on type and machinery equipment of the vessel, this size may be increased. Max. draft 28 ft.

VHF: 25 Watt base station – Grenada Ports Control (J3YA) Channels 6, 11, 12, 13, 16, 22A, 26, 68. Hours: 0800 – 1600 hrs., Monday to Friday.

Mobile station(J3YA) 5 Watt, Channels 6, 11, 12, 13, 16, 22A. Hours flexible but mainly limited from 0600 to 2200 hrs. Monitors Channel 16.

St. Georges Pilot (J3YB) Channels 6, 11, 12, 13, 16 and 22.

TUGS: Not Available.

BERTHING: Length of berth 791 ft. Depth alongside 30 ft. (minimum). Berth owned by the Government of Grenada.

Berthing in hours of darkness is carried out if advice received before 1500 hrs. Palletised and container cargoes are loaded and unloaded by ship's gear.

MEDICAL: Doctor and general hospital available.

STEVEDORES: Available.

TANKERS: A tanker berth exists at the bulk storage terminal at Grand Mal approximately 1.5 miles North of St. George's. Another terminal, Queens Park Terminal, exists 100 yard South of Green Bridge at the Northern limit of the town of St. George's. A minimum depth of 26 ft. exists between the mooring buoys at this Terminal.

Due to shallows, manoeuvring in the area of the Grand Mal Terminal is difficult and is not carried out during the hours of darkness. It is also not recommended to attempt berthing at the Queens Park Terminal during the hours of darkness due to lack of navigation ranges.

FRESH WATER: Available.

FUEL: This can be arranged with sufficient notice.

SURVEYORS: Michael Forshaw. Tel: 2881.

AIRPORT: Air services provided by Leeward Island Air Transport with regular services to and from Grenada.

HOLIDAYS: New Year's Day, Corpus Christi, Independence Day (February 7th), Good Friday, Easter Monday, Labour Day (May 1st), Whit Monday, August Bank Holiday (Monday), Christmas Day, Boxing Day.

TELEPHONES: No dockside telephone available.

GENERAL: *Charts:* B.A. Chart No. 2830.
Fire Service: Local fire service near docks (36 m.).

DEVELOPMENTS: New port developments being carried out by the Grenada Ports Authority, comprising 250 ft. schooner wharf in basin behind finger pier, equipment for container handling being supplied. Container storage space being provided under Development plan.

SHIPMASTER'S REPORT: April 1982.
Anchorage: Anchored in position with George Pt. 120°(T), distance 0.5 m.
Restrictions: Contrary to report dated January 1979 Pilot boarded at 2015 hrs. and vessel alongside at 2130 hrs. Length of vessel 165 m. Entry possible up to 2300 hrs., after which there are no Linesmen. Vessels able to sail at anytime by special arrangement.

AUTHORITY: Grenada Ports Authority, Burns Point, St. Georges, Grenada, West Indies. *Tel:* 3013, 3418. *Telex:* 3418 Min. *Cables:* Grenada Port Authority. *Contact:* Michael T. Forshaw, Port Manager. Sydney Coard, General Manager.

NOTES

Guadeloupe

BASSE TERRE: 15.59 N. 61.44 W. (See Plan)

DOCUMENTS:
6 Crew Lists.
6 Manifests.
Health Declaration Form.
6 Lists of stores on board.
Passenger List.
Clearance from last port.

PILOTAGE: Not available.

ANCHORAGE: On an 18 fathom bank North of the pier 2 cables from the shore.

RESTRICTIONS: Vessel can berth and unberth at any stage of the tide, but if vessel's first call, recommend berthing during daylight only.

MAX. SIZE: Max. LOA 300 m. Max. beam 30 m. There is 32 ft. – 36 ft. alongside but an allowance should be made for a 3 ft. swell, therefore would suggest max. draft approx. 29 ft.

HEALTH: Authorities require 24 hours notice of the vessel's arrival.

RADIO: Fort-de-France call sign "FFP" (high frequency) and Destrellan call sign "FFQ" for medium wave.

VHF: Port Authority on VHF Channel 16.

TUGS: Not available, however a small boat will assist in running lines if the Port Authority is advised in sufficient time on VHF Channel 16.

BERTHING: The extension is in operation. The old S.E. arm of the quay and 3 remaining banana elevators were so badly damaged in a hurricane of 1979 that they are to be removed. The new quay is solid-filled and extends to a reclaimed shore thus providing considerable container stacking area. The berth is approximately 300 m. long and is well fendered with rubber fenders.

CRANES: 30 ton mobile crane available.

STEVEDORES: Working hours: 0700 – 1100 hrs. and 1300 – 1700 hrs. Extension possible.

FRESH WATER: Available.

MEDICAL: Doctors and hospital available.

DENSITY: 1025.

CONSUL: None, nearest consuls at Pointe-a-Pitre.

SERVICES: Fresh provisions, groceries and meats available. The following are not available: repair facilities, dry dock, machine shop, airport, surveyors, laundry services, bunker fuel oil, diesel oil, lubricating oil and slop tanks.

WEATHER: The swell is between 3 ft. and 4 ft. from a S.E. direction. The wind is mainly from an Easterly direction.

AUTHORITY: Guadeloupe Port Authority, Place Cours Nolivos, 97100 Basse-Terre, Guadeloupe. *Tel:* 81-09-15 and 81.11.21. *Telex:* 919710 GL. *Contact:* Mr. Claude Julienne, Port Director.

POINTE-A-PITRE: 16.13 N. 61.32 W. (See Plan)

DOCUMENTS:
6 Manifests. See (a).
6 Crew Lists.
3 Stores Lists.
3 Crew Declaration. See (b).
6 Passenger Lists.
4 Declaration of Health.
2 Bills of Lading.
1 Clearance from Last Port.
6 Entrance Declaration.

(a) In addition, 2 sets of Manifests must be airmailed to arrive 72 hours before arrival in Pointe-a-Pitre.

(b) This Declaration must indicate all new and used personal effects.

PILOTAGE: Pilot meets vessels at "Mouchoir Carre" buoys. Advance notice of ETA to be passed 24 hours, and VHF Channel 16, 1 hour before arrival.

ANCHORAGE: Consult charts.

RESTRICTIONS: Max. length 230 m. Max. draft 10.0 m.

MAX. SIZE: See "Restrictions".

HEALTH: Port Health board on arrival.

RADIO: Destrellan Radio, also on VHF.

TUGS: None available.

BERTHING: 9 berths available, 8 additional for petroleum, sugar, cement, flour mill, bananas, ro-ro and containers.

Tourist Port:
Quay No. 1: Length 150 m., depth 8.6 m.
Quay No. 2: Length 177 m., depth 9.20 m.
Quay No. 3: } Quay No. 4: } Length 283 m., depth 9.20 m.

Commercial Port:
Quay No. 5: } Quay No. 6: } Length 320 m, depth 7.80 m. Ro-Ro, General cargo.
Quay No. 7: } Quay No. 8: } Length 306 m., depth 8.20 m. General cargo.

Industrial Port:
Quay No. 9: Length 180 m., depth 7.6 m. Mineral Berth.
Quay No. 10: Length 110 m., depth 7.20 m. Storage capacity 30,000 cu.m.
Quay No. 11: Length 100 m., depth 8.6 m. Sugar Berth. Storage capacity 70,000 cu.m. Loading rate 750 t.p.h.
Quay No. 12: Length 105 m., depth 8.60 m. Grain vessels, flour and feed, general cargo.
Quay 12 Bis: Length 45 m., depth 5.60 m. Ro-Ro.
Quay No. 13: Length 160 m. depth 10.0 m. General cargo, Containers.
Quay No. 14: See "Container Terminal".

Industrial Area: The industrial area of Jarry offers 40 hectares of open storage at the water's edge.

Container Terminal:
Quay No. 14: Length 787 ft., depth 36 ft.
The container terminal is equipped with 2 × 40 ton Paceco-ACB cranes.

STEVEDORES: 24 hours advance notice of ETA required (72 hours if vessel arrives on Monday). Working hours 0700–1030 and 1315–1645. At container terminal hours are 0630–1300 and 1400–2030.

MEDICAL: Clinics and Hospital facilities available. Hospital Tel: 82.88.88, 82.98.80.

TANKERS: Only tankers having less than 7.2 m. draft can enter the harbour.

FRESH WATER: Available day and night if requested in advance.

FUEL: Available F.O. 350 seconds Redwood, D.O. for gas oil. Delivered by road tankers.

CONSULS:
Belgium
Denmark
Ecuador
Haiti
Italy
Lebanon
Netherland
Norway
Spain
Sweden
United Kingdom
Venezuela

REPAIRS: Workshops available.

GANGWAY/DECK WATCHMEN: Available on request.

HATCHES: Usually opened and closed by crew. Stevedores will at Master's request but at ship's expense.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle per man.

CARGO GEAR: Ship's gear used.

REPATRIATION: All facilities available.

AIRPORT: 3 miles from the harbour with daily flights to Paris, Miami and New York.

TIME: GMT minus 4 hours. No alterations during the year.

HOLIDAYS: New Year's Day; Shrove Tuesday; Ash Wednesday; Carnival; Good Friday; Easter Monday; Labour Day (1st May); Ascension Day; Whit Monday; National Day (14th July); Souls' Day; Armistice; Christmas Day.

POLICE/AMBULANCE/FIRE: Police: 82.00.05 or 82.13.17 or 17; Ambulance and/or Fire Department: 83.00.28 or 17.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: I/D or passport required.

REGULATIONS: No particular regulations.

DEVELOPMENTS: Berth Nos. 11 and 12 to be connected. Berth No. 13 to be strengthened to take Paceco ACB cranes. Infilling to provide 10 hectares of Foreign Trade Zone underway.

AUTHORITY: Guadeloupe Port Authority, Quai Lardenoy, (P.O.Box 485), Pointe-a-Pitre 97165, Guadeloupe. *Tel:* (590) 916313. *Telex:* 919710 GL. *Contact:* R. Anne-Rose, Harbour Master. J. C. Cren, General Manager.

NOTES

Please also advise Shipping Guides Ltd.

Guam

GUAM (Apra Harbour): 13.26 N. 144.39 E. **(See Plan)**

DOCUMENTS: Guam is a United States Territory in the Western Pacific and official documentation is as for mainland U.S. ports, including visaed crew list completed at port of departure prior to Guam. Vessels should have a stock of American Crew Lists Form I-148 and Form I-95A. The American Alien Crewman Landing Permit is acceptable and preferred. This is the plastic identification card previously issued on the U.S. coast.

Required on arrival:

Vaccination Cards.
Visaed Immigration Crew List.
4 Crew Lists.
4 Passenger Lists.
1 Store List.
Clearance from last port.
Cargo Papers.

Have ready Immigration Form I-94 for each passenger and Form 1-95 for each alien unless they have I-184 plastic Identification Card. Shore Passes not required. Crew Customs Declaration not required.

PILOTAGE: It is advisable to have on board U.S. charts for Guam: C & GS 4197 Apra Harbour. 4196 Guam Approaches.

Pilot available 24 hours a day. Weather permitting, Pilot will board outside breakwater upon Master's request.

APPROACHES: Make for the unmarked approach point designated "AH" (Alpha Hotel) 2 miles from entrance at 13° 26′ 8″ N., 144° 34′ 09″ E. where Pilot boards, weather permitting. From position AH, the entrance range line is 084° with the leading marks in line. Because of depths, anchoring outside the harbour is impossible. If vessel must wait for the Pilot cruise back and forth in this area.

Port entry: On occasions, weather and sea conditions are considered unsuitable for Pilots to board outside. Under such circumstances vessel may be requested to proceed inwards and pick up the Pilot in the harbour area. The Harbour Master's permission for vessel to enter is mainly based on the traffic situation and does not necessarily take into account whether it is actually safe for vessel to enter under such conditions. It is not advisable to enter without a Pilot due to strong cross currents.

Pilots are very willing to assist arriving tankers and whenever the weather situation at point AH is prohibitive for boarding, they may request the Master to proceed Southwards in Agat Bay to look for a more sheltered boarding ground.

Before entering, the Harbour Master and the Pilot should be consulted to ensure that no outgoing traffic will be encountered in the harbour entrance. It is also advisable to obtain from the Harbour Master the positions of vessels which may be anchored in the harbour area.

Under the influence of N.E. Trades the prevalent set of the current (reaching 3 knots) off the entrance is to the South or S.W. regardless of the tidal currents. During the summer months, when Westerly winds prevail occasionally, a Northerly set may be experienced (reaching 1.5 knots). The current velocity fluctuates during a daily period under the influence of tidal currents. Entry should be made during periods when cross currents are expected to be at a minimum. The Pilot should be consulted on this matter.

Strong cross currents may require an approach speed of up to 8 knots. In view of the relatively short distance from the entrance to the berth, the speed must be substantially reduced as soon as the influence of the cross current has subsided. In relation to this, the manoeuvring characteristics of vessel should be carefully taken into consideration.

ANCHORAGE: Harbour – range 084° True, 2 green lights. Strong set across harbour entrance, Navy recommends 10 knots entering. Quarantine Anchorage at Middle Ground, Outer Harbour, depth 45 ft.

Inner Anchorage: Tidal range in the harbour is about 2 ft. Currents are weak. Deep drafted vessels should exercise caution as to the patch indicated as "Middle Ground" and the 42 ft. patch situated Westward of "Middle Ground". On rare occasions vessels may be requested to anchor. In these instances, deep drafted vessels may use the Naval Anchorage between and to the North of buoys 951 and 704. Officially, this anchorage is reserved for Navy vessels, however, the Navy has not objected to commercial vessels using this anchorage occasionally. Smaller vessels should have no difficulties in finding anchorage. In each case, anchorage location is determined by the Harbour Master in consultation with the Pilots. The bottom is mainly coral and is not a good holding ground.

RESTRICTIONS: The Harbour Master of the Port Authority of Guam, is in complete control of the approaches to Guam and it is essential to obtain clearance and permission to enter Guam from "Harbour Master" Port Authority, call sign KUF-810 at least 24 hours prior to arrival. Permission is readily granted with the condition to request permission again 2 hours prior to arrival at Guam. This time from Guam Control, call sign KUF-810 and NRV (USCG).

MAX. SIZE: Max. LOA 230 m. (Berths "F4", "F5" and "F6"). Depth alongside Berth "F5" – 10.97 m. at HW.

Berth "F3". Max. LOA 182.80 m. Depth 9.75 m. at HW.

Max. beam for container vessels is 33.55 m.

HEALTH: If from suspect port, Inspector boards at anchorage or at pier for thorough check. Inspector grants Pratique.

TUGS: 3 tugs (1,200 h.p.) available throughout 24 hours. Tugs can be contacted direct on VHF Channels 16, 13 and 19.

BERTHING: Vessels may berth Port or Starboard side upon request of the Master or Agent at "F3", "F4", "F5" except "F6" port side to, 1 large tug and 1 small tug normally used. Ship's gangway is required. Local information from Pilots states that after completion of Berth F-1 (Gorco Oil Berth), a submerged wreck was discovered, said to be a 500 ft. long cargo vessel, and lies across and below the vessel in this berth, on the Eastern side of the jetty. It is advisable not to drop anchors – should they have to be used – until vessel has passed over the wreck. There have been instances of forward springs or breastlines becoming fouled in this wreck during operations.

RADIO: Harbour Master Radio Station, call sign KUF-810 ship/shore watching 24 hours. Use of USCG Station "NRV" for best service if unable to reach KUF-810 due to limitation of range.

Notice to Ship's Agents: (20th August, 1980)

The Harbour Master's Control Tower is operating on a 24 hour basis. The following VHF frequencies are guarded and monitored:

156.8 MHz – Channel 16
156.6 MHz – Channel 12
156.65 MHz – Channel 13

In addition, Control Tower personnel will be monitoring S.S.B. with the following procedure:

2182.0 kHz continually.

4143.6 kHz – (4B). Every hour on the half hour for a period of 5 minutes.

8291.1 kHz – (8A). Every hour at 35 minutes after the hour for a period of 5 minutes.

12432.3 kHz – (12B). Every hour at 40 minutes past the hour for a period of 5 minutes.

The Port Authority solicits your co-operation in the matter of keeping the Harbour Master advised of all arrivals, departures, and other pertinent information whereby we may best serve the maritime industry.

VHF: Masters of vessels approaching should keep watch on Channels 12, 13 and 16.

TANKERS: *Mobil Pier:* Berth "G". Depth alongside 39 ft.

The terminal consists of a T-head pier, with 2 breasting dolphins. Head and stern lines are secured to shore-based bitts. No breast lines can be used. Therefore, caution should be exercised when off-berth winds occur.

The pier is within the blast zone of the Navy ammunition pier. When a vessel is working ammunition, or when ammunition is on that dock, U.S. Coast Guard will not ordinarily permit a vessel to lie at the Mobil Pier. If U.S. Coast Guard does give permission, U.S. Navy authorities require a "Hold Harmless" agreement before permitting vessel to berth at the Mobil Pier. To this effect the Agent assists and offers guidance.

Berthing: Vessels usually berth on port side. There are no particular difficulties with berthing a vessel but approach speed and impact on the dolphins should be kept to a minimum. 2 mooring launches are utilised. There are no capstans for hauling mooring lines.

Beam winds may affect vessels when alongside. Because of the lack of breasting lines, Northerly winds tend to push the vessel off the berth. Southerly winds cause excessive pressure on breasting dolphins when the vessel is in a light condition. Ballasting while discharging should be considered and Terminal operators will advise the Master on this. In case ballasting is necessary prior to completion of discharge, U.S. Coast Guard permission must be obtained.

Cargo Handling: Only refined petroleum products are handled at this pier.

Flexible rubber cargo hoses are used. No shore crane is available. Ship's manifold is to be ready with blanks removed and reducers rigged if necessary. Cargo booms should be operational prior to arrival, in order to lower the ship's gangway as soon as the vessel is secured to the pier. Different grades can be discharged simultaneously. ← ALSO SEE "SMR"

Gorco Berth: "F1". Depth alongside 55 ft.

The terminal consists of a T-head pier with 2 breasting dolphins at each end and 2 mooring dolphins on the West side.

On the East side there are quick-release hooks along the shore line. All mooring points are provided with quick-release hooks and capstans for hauling the mooring lines.

Berthing: Ships always berth port side to. Vessel is to proceed at slow speed towards the berth passing North of buoy No. 2 (on some charts designated as buoy RB "A") and East of the patch of 57 ft. reported in 1970. Tugs are in attendance. 2 mooring boats strong enough to handle (100,000 d.w.t.) wire ropes are available. Some difficulties have been reported when running lines ashore at the Eastern side since the mooring launch, because of shallow water, cannot get close to shore and rope pick-up winches at times are malfunctioning. Additional messenger lines are normally required from the vessel. The use of wires as headlines should be avoided.

Cargo Handling: Both crude oil and petroleum products are handled at this pier. For crude discharge 4×10 in. ASA hoses are used. Distance to tanks 7 miles. Ship's port side manifold to be ready with blanks removed and adaptors fitted if necessary.

Ballast/slop facilities are available and consists of 1×12 in. line of about 1,000 ft. long with a tank capacity of 80,000 bbls. The maximum acceptable quantity, however, is restricted to 50,000 bbls.

CRANES: 1 (Manitowoc) × 140 ton, 1 (P&H) × 40 ton and 1 × 35 ton.

2 Paceco rail mounted container gantry cranes for handling 20 ft., 27 ft. or 40 ft. containers. 30 fork lifts, capacity 3 – 20 tons, including a Hystainer with special spreader for handling containers.

SECURITY: Guam Government Official usually boards at pier, examines vaccination cards and inspects Steward's stores and slop chest. Also represents U.S. Customs. Requires 1 Crew List, 1 Passenger List, 1 Store List, Clearance from last port, later issues new clearance from Guam which Agents bring to ship. Normally does not seal stores or slop chest.

MARINE GUARD: Required when docked at Ammunition Pier, requires 1 Crew List.

FUEL: Marine Diesel Oil available by truck at any pier and by pipe-line at Berth "F3". Black oil available by pipe-line at Berth "F6". Both products also available by pipe-line at Berth "F1" (Gorco Pier) and the Mobil Pier. The distribution companies are Exxon, Gorco and Mobil. Infrequent fuel delivery restriction occurs when ammunition vessel working.

FRESH WATER: Very good, available any quantity, meter service.

STORES: Available but considered expensive. Produce from U.S.A.; meats from U.S.A. and N.Z.; milk is recombined in quart cartons, white, chocolate or buttermilk. Order milk day prior to delivery; tropical fruits seldom available; ice in blocks or cubes. Prices wholesale, except under 1 case lots when at retail. Delivered to ship's gangway or hook.

LAUNDRY: Also dry-cleaning available 3 days service at U.S.A. prices. 1-day service extra. Delivered to ship's gangway or hook.

IMMIGRATION:

1. *Prior to Departure for Guam:*
   - A. Visaed Crew List: Prepare 1 Crew List on U.S. Form I-418 and have it visaed by a U.S. Consulate at a port prior to Guam. Without this, crew shore leave may be denied.
   - B. Passengers must have a valid passport and also must have an appropriate U.S. Visa whether landing or not on Guam.
   - C. Intransit passengers do not need U.S. visa if the Owners of the vessel have signed a contract called "Immediate and Continuous Transit Agreement" with the Commissioner of Immigration at Washington, D.C.
2. *Prior to Arrival at Guam:*
   - A. Passenger List, Form I-418 prepare 3 copies of Passenger List on U.S. Form I-418 (for Immigration, Customs and Agent).
   - B. Passenger Landing Card: Form I-94. Prepare or have on hand, 1 U.S. Form I-95A for each alien crew member. Not required if crew member is a permanent resident with U.S. I-184 laminated "Crewman's Landing Card". Not required of U.S.A. Citizens. Please present form I-95A in appropriate Seaman's passport or identification book. Form I-95A can be used repeatedly for future arrivals of same crewman on same ship at any United States Port.
3. *Upon Arrival at Guam:*
   - A. U.S. Federal Immigration Inspector boards upon arrival at pier, must see all passengers with their passport and Form I-94 and all crew members with their passport or identification books and Form I-94A or Form I-184.
   - B. Passengers and crew are required to be ready for inspection immediately upon docking at Guam.
   - C. No shore leave and no visitors or stevedores may board until this Immigration inspection is complete. The Inspector will advise Master when he has completed his inspection of passengers and of crew.
4. *Prior to Departure from Guam:*
   - A. Intransit Passengers: Pick up from intransit passengers the Form I-94 and hand to Agent before departing from Guam. These must be returned by Agent to U.S. Immigration as passenger departure records.
   - B. Alien crew member joining at Guam: Pick up from them the Form I-94 which they used to enter the U.S.A. These must be returned to U.S. Immigration by Agent as permanent records.

MEDICAL: Foreign ships use Guam Memorial Hospital or other clinics in town. American ships use U.S. Naval Dispensary in Harbour area, or in emergency U.S. Naval Hospital near Agana, 10 miles distant. Certificates required signed by Master. Patient returns to vessel by taxi at vessel's expense. Dispensary hours for merchant seamen Monday to Friday 0800 – 1200 and 1300 – 1600 hrs. At other times, if emergency, use the U.S. Navy Hospital. Doctors will not normally visit ships.

Dentists: Private dentists only. Usual hours 0900 – 1700 hrs., Saturday to 1200 hrs.

REPAIRS: Commercial Yard and Casamar Yard available. Navy Yard, repairs by U.S. Naval Ship Repair Facility (SRF), subject to prior Navy commitments, and requires cash deposit in advance. Payment to be made for work done successfully or not. "No Cure No Pay" does not apply.

TIME: GMT plus 10 hours.

POLICE/FIRE/AMBULANCE: Ambulance U.S. Naval Dispensary, Harbour Area, Tel: 339-4224/4227. Fire Tel: 22222. Police – Naval Station Security, Harbour Area Tel: 333-2988. Police – Guam Civilian Police, Tel: Agana 777-9811

BANKS: Bank of America, Bank of Guam, Bank of Hawaii, Chase Manhattan Bank, Citibank, First Hawaiian Bank, Hong Kong and Shanghai Banking Corp.

WEATHER: *Tropical Typhoons:* The Navy Fleet Weather Centre of Guam broadcasts typhoon warnings. Weather forecasts are good and reliable; however, due to the particular geographical position of Guam it is impossible to definitely determine the track of approaching turbulence. These turbulences usually generate a few hundred miles South or S.E. and may easily divert when passing near Guam. There are four typhoon warning conditions.

Condition 4:
Typhoon winds possible within 72 hours;
Condition 3:
Typhoon winds possible within 48 hours;
Condition 2:
Typhoon winds possible within 24 hours;
Condition 1:
Typhoon winds possible within 12 hours.

During the typhoon season months of August through December condition 4 exists at all times.

In case of a typhoon warning, (condition 2) the U.S. Navy invites all Masters for a meeting to discuss the action plan for evacuating the port.

It is considered very dangerous to remain alongside or anchored within the port when a typhoon is approaching Guam.

AUTHORITY: Port Authority of Guam, Government of Guam, 1026 Cabras Highway, Suite 201, Piti, Guam 96925. *Tel:* 477-9931/32/33/34. *Telex:* 7431687. *Contact:* Frank R. Perez, General Manager. Frank G. Santos, Harbour Master.

Guatemala

GENERAL

DOCUMENTS:

Consular Documents:

Masters are required to:

1. Obtain a health and clearance permit, issued by the competent authority at the last port of call, and certified by the Guatemalan Consul, and;
2. Submit 5 copies of a general manifest of articles carried to each port of the country, approved by the Guatemalan Consul at the port of loading, and also, separate copies of the manifest for in-transit articles unloaded.

If no articles bound for the country are carried, a ballast manifest should be submitted.

Prior to Arrival:

Arrival Notice:

There is no minimum period for advance notice of the vessel's arrival, because Authorities exercise a degree of flexibility. However, it is recommended that notice be submitted in writing to the following sometime in advance: The Captain of the Port, Customs Administration and Customs Supervision of Unloading, Migration Delegate, Maritime Health, Plant Health Delegate and Port Watch. Notification must also be sent to the following agencies of the Port Authority: Port Administrator, Office of the Chief of Operations, Office of the Chief of Docks, Import Division, Export Division, Invoicing Division, Container Section (if any) and Pilots Division.

Information on Cargo for the Port:

If the vessel carries cargo to be discharged at the port, the following information will be submitted to the Port Authority:

Stowage Plan.
Cargo Distribution List.
Heavy Cargo List.
Amount of Exports.

If containers are carried to the port, 8 copies of the list of container contents and 8 copies of the list of complete shipments and of mixed shipments (for more than one consignee) are to be submitted to the Container Section.

This information may be submitted upon the vessel's arrival, so that no delays in the work will be experienced for that reason.

On Arrival:

Type of Documents	*Number and Distribution of Documents*						
Basic Forms	*Captain of Port*	*Customs*	*Security*	*Maritime Health*	*Immigration*	*Plant Health*	*Port Authority*

(a) Delivered to Post Office.
(b) According to the number of stevedores requested, more than 2 copies.

Other Requirements:

Requests for permission to load and unload are submitted to Customs, each on stamped paper and also, when appropriate, a request for overtime work.

Prior to Departure: The clearance permit is requested from the Captain of the Port 4 hours in advance, after obtaining clearance from Customs, on a clearance permit application, which is submitted on stamped paper.

UNIFORMS: Vessels have been fined when officers have not been wearing uniforms when boarded by officials for clearance inward.

CHAMPERICO: 14.17 N. 91.55 W.

DOCUMENTS:

Clearance from Last Port.
Travel Memorandum (original and 4 copies).
Declaration of Maritime Health.
Derat Exemption Certificate.
5 Crew Lists.
5 Passenger Lists or "no passengers" Declaration.
5 Provision Lists.
5 Dangerous Cargo, inflammable or explosives declaration.
5 Mail Lists or "no Mail" Declaration.
Manifests of Cargo from each port (original and 11 copies).
Bills of Lading from each port.
Vaccination Certificates for whole crew.
12 Ballast Manifests, if no cargo on board.

PILOTAGE: None.

ANCHORAGES: Without limit but recommended *not to anchor* less than 1 km. from beach.

MAX. SIZE: Vessels work cargo at anchorage in depth consistent with vessel's draft.

HEALTH: Give notice of any suspicious illness or fever on board when the doctor comes for official visit.

RADIO: ETA cables through Cristobal (Panama).

VHF: Channel 16.

TUGS: No tugs required.

STEVEDORES: No advance notice necessary. Possible to arrange gangs within an hour.

MEDICAL: Adequate advance notice required depending on gravity of case. Hospital 30 minutes away and possible to arrange transport for patient, also to arrange for doctor on board. Crew must have current International Vaccination Certificates.

TANKERS: No facilities for tankers.

DENSITY: Changes from 1.0226 gr./cu.cm. in October to 1.0270 gr./cu.cm. in April. Percentage of salt: Changes from 30.5 parts per thousand in October to 36.4 parts per thousand in April. Temperatures: an annual average of 28.5° C.

FRESH WATER: Free within port limits.

FUEL: No facilities.

GANGWAY/DECK WATCHMEN: Available upon request.

OPENING/CLOSING HATCHES: Either by crew or by stevedores.

CUSTOMS ALLOWANCES: Without limit on board. Prohibited to take tobacco, wine or spirits ashore.

CARGO GEAR: Ship's gear used for loading/discharging.

IDENTIFICATION CARDS: Not needed.

CONSULS: None.

REPAIRS: Minor repairs only.

REPATRIATION: All facilities available.

AIRPORT: International airport 3 hours distant with regular flights all over world.

TIME: GMT minus 6 hours. No alterations to clock during year.

HOLIDAYS: No work on 1st January, Maundy Thursday and Good Friday, 1st May and 25th December. The rest of the year work day and night.

POLICE/AMBULANCE/FIRE: All available.

TELEPHONES: Cannot be placed on the vessels.

GENERAL: Possible to supply provisions, especially vegetables and shell-fish at good prices.

SHORE LEAVE: No restrictions.

DELAYS: Some days in April and October the surge is very strong and work has to be suspended.

DEVELOPMENTS: Project to build a modern port with an entrance channel, artificial bay and capacity for 8 merchant vessels and facilities for fishing ships and tourist ships.

AUTHORITY: Empresa Portuaria Nacional de Champerico, 10A Calle 3-31, Zona 1, Guatemala City, Guatemala. *Tel:* 25-4-47, 85-2-16, 53-54-57. *Cables:* Epnac. *Contact:* Cnel. Antonio Batres Barreda, President. Gregorio Cifuentes, Administrator.

PUERTO BARRIOS: 15.44 N. 88.36 W.

DOCUMENTS:

Clearance from Last Port.
Crew List, 1 legalised and 9 copies.
Passenger List 1 legalised and 7 copies or negatives.
Cargo Manifest, 1 legalised and 21 copies.
Stores/Provisions List 3 copies.
Voyage Memorandum 4 copies.
Bills of Lading, 2 sets.
Declaration of Health.

PILOTAGE: Pilot boards 2 miles off Puerto Barrios, from small unmarked launch. If awaiting Pilot, vessel may anchor about 3 miles North of Puerto Barrios, keeping port entrance clear. No VHF.

ANCHORAGE: In Santo Tomas Bay, depths up to 6 fathoms.

MAX. SIZE: Length 600 ft., draft 30 ft.

HEALTH: Advise Agent in advance if any fever or contagious disease suspected on board. Otherwise Pratique granted on arrival. Officials board only between 0600 hrs. and 1800 hrs.

RADIO: Coastal radio in Costa Rica, call sign TIM operating on 8485 kHz.

TUGS: No tugs available.

BERTHING: One pier owned by International Railway used to discharge fuel oil. 1,000 ft. berthing length on each side. A flag is shown on the pier to indicate where vessel will berth. Berthing recommended during daylight hours only. Tankers discharge on South side of the pier.

See "Shipmaster's Report" at Santo Tomas de Castilla.

FRESH WATER: Available at the pier.

FUEL: Not available.

MEDICAL: Doctor available. All crew require International Vaccination Certificates.

CUSTOMS ALLOWANCES: Normal daily consumption on board. No tobacco, wine or spirits to be taken ashore.

IDENTIFICATION CARDS: Required.

TIME: GMT minus 6 hours; no alterations during the year.

SHORE LEAVE: Allowed.

AUTHORITY: Commandante del Puerto.

PUERTO QUETZAL: 13.55 N. 90.47 W. (See Plan)

PILOTAGE: Pilotage is compulsory for all vessels berthing and sailing, but not for shifting.

ANCHORAGE: A vessel approaching from sea is permitted to anchor in front of the harbour not closer than 1 nautical mile without using a Pilot.

RESTRICTIONS: *Safe draft over the bar and channel:*

Maximum safe draft is 11 m. (36 ft.), the width of the channel is 210 m. (689 ft.).

Depth in channel and turning basin is 39 ft.

Docking of vessel at any time of the day: Docking is permitted by the Port Authority when the required documents have been presented and provided the vessel is to commence work. Vessels may dock at any time, but such movements are normally scheduled to fit in with time of granting of Free Pratique and of commencement of work.

Clearance of a vessel outward: This is normally signed by the Port Captain during hours prior to completion of work.

Restriction on sailing time: No restriction.

MAX. SIZE: LOA 210 m. Beam 32 m. Max. draft 10.5 m.

HEALTH: Free Pratique is normally granted all day, including Sundays and holidays.

Free Pratique at anchorage or at the wharf: Free Pratique is given either at the anchorage or after berthing. Where wharf space is available and vessels' documents have been presented, she would normally dock on arrival or at scheduled time for clearance, and receive Free Pratique at the wharf.

Free Pratique in Puerto Quetzal is granted when the party of officials visit the vessel to clear her inwards. These officials represent:

- Port Captain
- Customs Administrator
- Port Health Authority
- Stevedores Agent
- Quarantine Officer
- Port Authority
- Customs Guard (Guarda Hacienda).

A representative of the vessel's Agent is present and the offer of refreshments or soft drinks assists things along.

Where a vessel is cleared at anchorage, every effort should be made to lower a gangway, rather than expect the officials to use a pilot ladder.

In case the vessel does not have a Guatemala national flag aboard, a vessel would be well advised to cable his Agent to bring one to the vessel on arrival.

TUGS: Tugs are compulsory for berthing and sailing, but not when shifting without engine.

BERTHING: Berthing facilities in Puerto Quetzal consist of one wharf of 800 m. (2,624 ft.) of length, 56 m. (184 ft.) width including a ramp of 30 m. (98 ft.) length and 25.5 m. (84 ft.) width for Ro-Ro vessels. Depth alongside 11 m.

Fenders: The 800 m. wharf has rubber fenders with approximately 2×1.2 m. (4 ft.) diameter, spaced at 20 m. (66 ft.)

Equipment: 1×36 ton forklift; 3×30 ton lighters with tugs (12 hours notice required to Stevedoring Co.).

CARGO OPERATIONS: Average outturn per hour based on modern type vessels with large hatches, good winches/cranes:

Containers 20 ft. or 40 ft.	8 units/hr.
Iron & Steel products	50 tonnes
Iron & Steel products pre-slug	60 tonnes
Bagged cargo	30 tonnes
Drums	20 tonnes
General cargo	16 tonnes

These figures are subject to many variables, e.g. size of parcel, stowage, separation of marks, etc. Also when working iron and steel products pre-slinging would do much to assist.

Gear supply for handling cargo: The stevedore firms supply all necessary gear such as rope and wire slings, nets, forklifts of different sizes. Presently following forklifts in good condition exist: 1×36 ton unit, 1×15 ton, 3×7 ton, 3×4 ton, 3×3 ton and 2×2 ton units all owned by the stevedoring firms.

STEVEDORES: Normal working hours 0600 – 1700.

Labour: Presently there are about 1,200 stevedores in the City of San Jose which is always sufficient.

The average gang has the following personal:

General Cargo:	Containers:
14 stevedores	8 stevedores
1 hatchman	1 hatchman
1 winchman	1 winchman
1 foreman	1 foreman

Change of gangs: The first shift of labour works from 0700 hrs. to 1430 hrs., the second shift from 1430 hrs. to 2130 hrs. and the third shift from 2130 hrs. to 0700 hrs. At midnight there is a break of 30 minutes for meals.

Advance notice to call a gang for commencement of work:

1. For the morning shift – Recommended to advise the night before, latest 2000 hrs.
2. During the day – 3 hours advance notice.
3. At night – Advise before 1700 hrs.

MEDICAL: Hospital facilities in Esquintla (54 km.) and Guatemala City (100 km.).

FRESH WATER: Available.

FUEL: Fuel oil, kerosine, diesel oil and gas oil available by road tanker.

REPAIRS: Minor repairs possible.

DRY DOCKS: None.

SURVEYORS: Lloyd's Register: Franklin Ltda. 12 Calle "A" 2-34, Zona 1, Guatemala City. Tel: 8-32-33, 53-68-26.

General Superintendence Co.: Centrans S.A. 6a. Ave 20-25, Zona 9. Attention: Mr. H. Preuss. Tel: 370134/35.

P & I Club's Representation: Ing. Jack Sigal, Torre Professional No. 1, Guatemala City. Tel: 531452.

GANGWAY/DECK WATCHMEN: Private watchmen are available but are not compulsory for either on board or ashore.

Uniformed guards of the Customs Police (Policia de Hacienda) are stationed at the gangway free of charge.

However, it is recommended to keep vigilance to prevent cabins and storerooms, etc., being entered.

Vessels at anchor (however, presently there is no port congestion nor is any expected in the near future) should also keep a strict watch for boarders.

No meals are required to be supplied by vessels in Puerto Quetzal to Customs, guards or any other persons.

HOLIDAYS: *Legal and Local Holidays:*

December 31st 1800 hours until January 2nd 0600 hours	New Year's Day
March 19th 0000 hours until March 20th 0600 hours	Local Holiday
Wednesday 1200 hours until Saturday 0600 hours	Easter
May 1st 0000 hours until May 2nd 0600 hours	Labour Day
June 30th 0000 hours until July 1st 0600 hours	Revolution 1871
September 15th 0000 hours until September 16th 0600 hours	Independence Day
October 20th 0000 hours until October 21st 0600 hours	Revolution 1944
November 1st 0000 hours until November 2nd 0600 hours	All Saints Day
December 24th 1800 hours until December 26th 0600 hours	Christmas Day

Due to the present situation (being a new harbour) the port works 365 days per year, however this could change later.

GENERAL: *Authorisation of lowering boat:* Lowering of boats requires permission which is normally granted by the Port Captain.

Regulations regarding explosives and ammunition at Puerto Quetzal:

Explosives and ammunition are only allowed to be discharged on a scheme whereby they leave the port area immediately and a notice of 24 hours should be given prior to arrival.

Cargoes remaining on board are not covered by any particular regulations.

Local guidance on stores and availability of items:

Deck Stores: The few available items are expensive.

Engine Room spare parts: Even well-known makes are almost non-available.

Lubricating Oils: The commonly used ones are available in small quantities, but special ones are not obtainable.

Stewards Department: Most dry stores are expensive with few exceptions and quantities are limited.

Fresh fruits, vegetables, seasonally available in moderate quantities, at reasonable prices, likewise fish, poultry, fresh beef and pork. (Beef bought in Guatemala is accepted as safe in the USA, but not so the pork – confirm with respective Authorities.)

Laundry service: Available at a reasonable cost.

Radio/Navigational Aids: Spares are not generally available and service of a very limited nature only. Better service can be obtained in Guatemala City. (Each case should be investigated by Agent.)

Important: Ship's spare parts can be sent to a vessel calling at Puerto Quetzal by air – or by sea freight but care must be exercised in their addressing and marking, as otherwise local import duties may be imposed. All such items should be clearly addressed to the vessel, in care of the vessel's Agent, and must say the Spanish for "in transit", the phrase "EN TRANSITO". This ensures that the goods can be treated and may be exported on the receiving ship without problems.

Any such movement should always be co-ordinated with the local Agents, who should be kept fully advised of same.

REGULATIONS: The following is a translation from Spanish.

Operation Regulations for the Provision of Services in the Port of Quetzal:

Article 4: Programming Arrivals:

Eight (8) days prior to the end of the month, Ships' Agents must present in writing or by telex to the Commercial Department a programme with the approximate date of arrival of vessels for the coming month, and keep this programme up to date.

Article 5: Request for Guarantee Deposit:

Ships' Agents must request the Commercial Department for the amount of the guarantee deposit as established by Article 5 of the Government Agreement 825 – 83.

Article 6: Guarantee Deposit:

In exceptional cases, the guarantee deposit can be lodged at the Fiscal Treasury Office of the Port Services Division in Puerto Quetzal.

Article 7: Request for Services:

Ships' Agents must present to the Port Services Division the request for services 24 hours in advance of the arrival of the vessel, when she is coming from Acajutla or Champerico. When the vessel is coming from other ports, the Agent must comply with Article 6 of the Government Agreement 825-83, by means of the General Request for Services form. In both cases, Authority must be requested to contract a specific stevedoring concern.

Article 8: Authorisation of Request for Services:

The Request for Services will be authorised after it has been verified that the corresponding regulations have been complied with.

Article 9: Confirmation of Arrival:

Ships' Agents must submit in writing to the Port Services Division confirmation of arrival of their vessels 12 hours in advance, with the exception of vessels coming from Acajutla or Champerico, in respect of which confirmation may be given 6 hours in advance.

Article 10: Documents required prior to the provision of services:

Ships' Agents must provide in advance to the Port Services Division the following documents in an accurate and legible form:

(a) for imports of general cargo:
- 2 stevedoring stowage plans
- 2 sets of bills of lading
- 2 tally books for each hold of the vessel to be worked and 2 for the office
- 4 cargo manifests.

(b) For imports of solid bulk cargo:
- 2 sets of bills of lading
- 3 sets of cargo manifests.

(c) For imports of containers and lorries:
- 2 stowage plans
- 2 sets of bills of lading
- 4 container listings (sequency lists)
- 1 packing list per container
- 4 cargo manifests.

(d) Imports of Vehicles:
- 2 stowage plans
- 2 sets of bills of lading
- 4 tally books
- 2 cargo manifests

(e) For exports:
- 3 complete shipping lists authorised by the Customs
- 3 export mainfests
- 3 container lists
- 1 packing list per container.

Article 11: Period for delivery of documents:

Import documentation must be presented at least 3 days prior to the arrival of the vessel, the order for shipment and the list of containers to be loaded 12 hours prior to commencement of the operation, and the export manifest within 12 hours after sailing.

Article 12: Goods not covered by the manifest:

Discharge of goods which are not on the manifest is not permitted without due written authorisation from Customs. Once discharge operations have been completed and not later than 12 hours afterwards, the Ship's Agent must present the corresponding additional manifest to the Port Services Division.

Article 13: Letter of Correction:

Where there are discrepancies between the bill of lading and the cargo manifests, the Ship's Agent must present to the Port Services Division a letter of correction within a period not longer than 24 hours after delivery of the documentation indicated in Article 10 of these regulations.

SHIPMASTER'S REPORT: December 1984.

Limited operations commenced on 18th March, 1983.

Currently, services are provided with the following minimum organisation:

Port operations.

Maritime and Communication operations.

Financial and Administrative Services, and the additional personnel to provide other support services.

These offices operate in module buildings constructed for this purpose in the port area.

Services to Vessels:
- Right to berth.
- Aids to navigation.
- Service of pilot launch.
- Pilotage.
- Mooring, berthing, and vice versa.
- Stay in port.
- Anchorage.

Protection Works: The sheltered area is formed by a major (West) breakwater 1,140 m. long, the minor (East) breakwater 307 m. long, and a secondary North Dock with a length of 367.54 m. These works ensure a minimum of rough water inside the port and maximum safety for vessels.

Access Channel: The access channel to the dock provides safety and facilitates entry and leaving of vessels to and from the sheltered area. It has a minimum width of 210 m. and a depth of 12 m. at the lowest tide.

Manoeuvring Basin: This offers safety and facilitates manoeuvring of vessels. It is circular with a diameter of 400 m., and a depth of 12 m. at the lowest tide.

Berthing: The main quay, situated in the Eastern part, was planned as a multi-purpose terminal. It has a length of 800 m., and a free platform of 56 m. width. It includes a ramp 30 m. long and 25.5 m. wide, provided with two mooring devices at the sides with capacity of 100 tonnes, and with a predominant slope of one in ten for serving Ro/Ro vessels. It is located at the Northern extremity.

The whole quay is provided with rubber defences and bitts for mooring vessels. Its crown dimension is +4.5 m., and a depth of −11 m., giving a total of 15.5 m.

The South Quay has a length of 170 m., for berthing smaller ships. Its crown dimension is +4.5 m. and its depth is −5 m., giving a total of 9.5 m.

The Service Quay is 50 m. long and is for servicing small craft. Its crown dimension is +4.5 m. and its depth is −5 m.

Types of vessels handled:
- General cargo.
- Solid bulk cargo.
- Containers.
- Ro/Ro.
- Barges.
- Tourist passenger vessels.

Stevedores: Cargo handling services are provided by private concerns duly authorised by the Port Authority.

Ship's Agents and brokers arrange cargo handling with the stevedoring companies who in turn are authorised to provide such services.

The following services and direct cargo handling are available:
- Receipt and clearance.
- Loading and unloading.
- Handling on quay.
- Storage in the open.

Storage: It has been planned to place at the disposal of users a multiple use warehouse 90 m. long and 80 m. wide. This warehouse will have an area covered by metal structures and concrete walls, and fitted with fire-fighting equipment.

Attached to the warehouse will be a module housing the warehouse guard, Customs inspection, port checkers and wharfingers.

Airport: There is an airport with capacity to receive any type of commercial aircraft 8 km. away.

There is also the runway of the Aeroclub de Guatemala and the installations of the Tourist Complex of Likin.

General: Puerto Quetzal is a terminal of the system of inter-ocean communication with the ports of the Atlantic, which are 406 km. distant by road and 443 km. by rail.

The new port is reached by land via the asphalted highway CA9 at a distance of 110 km. from the capital. There is also rail connection, and both means of communication connect with the country's network of roads and railways. The motorway from Escuinta to Puerto San Jose has yet to be built.

SHIPMASTER'S REPORT: January 1985.

Fresh Water: Said to be possible, ex road tankers. Very expensive.

Painting: No painting and/or scraping either on board or on hull can be done. Granting of permission takes at least 2 days.

AUTHORITY: Empresa Portuaria Quetzal, 7A Avenida 3-74, Zona 9 (60 Nivel), Ap. Postal 206-A, GUATEMALA CITY Guatemala, C.A. *Tel:* 319101, 319133 and 319152. *Telex:* 6134. *Contact:* Ing. Luis Felipe Toledo Saenz, General Manager.

AGENT: Agencias Intermodal S.A., Avenida Reforma 3-48, Zona 9 (Apartado Postal 455-A), Guatemala City, Guatemala. Tel: 318780. Telex: 5676 Anstel Gu.

SAN JOSE: 13.55 N. 90.50 W. (See Plan)

NOTE: Very little cargo handled. Vessels now proceeding to Puerto Quetzal.

DOCUMENTS:
- Clearance from Last Port.
- Crew List, 1 legalised and 4 copies.
- Passenger List, 1 legalised and 7 copies.
- Passengers in Transit List, 4 copies.
- Cargo manifest, 1 legalised and 19 copies.
- Stores/Provisions List, 3 copies.
- Voyage Memorandum, 4 copies.
- Cargo Check Lists, 18 copies.
- Mail List, 7 copies.
- Bills of Lading, 2 sets.
- Baggage Declaration, per passenger, 4 copies.
- Declaration of Health.

PILOTAGE: Not required and no resident Pilots available, except for Tankers where services of a Pilot could be made available upon request.

ANCHORAGE: San Jose is a lighter port (open roadstead). Vessels anchor about 0.25 mile from pierhead in 8–9 fathoms of water.

RESTRICTIONS: Normally no pratique granted after 1900 hrs., although in some instances and if prior arrangements made, vessels could be received by Port Authorities up to 2300 hrs. Tankers moor in daylight only.

MAX. SIZE: Size immaterial since no docking facilities. Cargo transported from vessel to pier and vice-versa by means of steel lighters or barges of 35 tons capacity each. This applies to dry cargo only. Bulk, liquid cargo at respective terminals (oil and oil by-products, imports, and molasses export), where vessels proceed after pratique.

HEALTH: Pratique automatic (0700 hrs. to 1900 hrs.), irrespective of previous port of call. Master's obligation to notify Authorities on arrival of any suspected disease and/or fever on board, in order that adequate precautions taken.

RADIO: Messages should be routed via Guatel.

TUGS: None available or required for manoeuvring vessels.

BERTHING: New port 2 miles East of San Jose Pier (See "Puerto Quetzal.")

STEVEDORES: No gangs available after 2100 hrs., unless another vessel is working in port. Rate of discharge/loading: dry cargo: 15–20 tons per gang hour. Max. gangs available: 3. Bulk cargo handled ten times faster.

MEDICAL: Hospital available. No vaccination/fever certificates required.

TANKERS: 2 buoy berths for tankers. Discharging lines 8 in. diameter. Esso Terminal: Mooring Master assists berthing. IRCA Terminal: Stern discharge.

FRESH WATER: None available.

FUEL: None available.

GANGWAY/DECK WATCHMEN: None required or necessary.

OPENING/CLOSING HATCHES: By stevedores.

CUSTOMS ALLOWANCES: On board, no restrictions, but no crew member allowed to bring ashore more than amount required for personal use.

CARGO GEAR: Ship's gear used for loading and discharging dry cargo. Vessels must bring own lines to tie lighters alongside.

IDENTIFICATION CARDS: Necessary for those on shore leave.

CONSULS: All Consulates located in Guatemala City, where vessels' Agents, when and if required, have special documents legalised. Normally, however, Agents can take care of regular certifications required, through port officials, who are authorised to certify documents in absence of a consul of a particular nation.

REPAIRS: No facilities available.

REPATRIATION: Possible. Usually arranged by Agents in cooperation with vessel's Agent in Guatemala City.

AIRPORT: Nearest airport Guatemala City, 108 km. due North of San Jose. Daily flights to and from all parts of world.

TIME: Central Standard Time, GMT minus 6 hours. No changes during year.

HOLIDAYS: January 1st; Holy Thursday; Good Friday; Easter Saturday; March 19th; May 1st; June 30th; July 25th; September 15th; October 20th; November 1st; December 24th; December 25th; December 31st.

POLICE/AMBULANCE/FIRE: These can be contacted through Agent at San Jose and/or Guatemala City.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Allowed.

DELAYS: Only 2 dry-cargo vessels can work simultaneously. A third vessel must await departure of 1 of the first 2. Only 1 tanker can work at each bulk liquid cargo terminal.

SHIPMASTER'S REPORT: September, 1978.

Approach was direct from the Pacific. A good landfall was made. San Jose main Light was observed to be Isophase, rather than Occulting, every 20 seconds.

Anchorage: Vessel anchored in a position with the head of the Iron Wharf bearing 011°(T) – 8 cables. We lay to 4 shackles of cable on the starboard anchor, in 13 fathoms of water. Despite a considerable swell at times, the vessel did not drag her anchor. If anchoring, vessels do not take a Pilot.

Berthing: Ocean-going vessels and at times, due to the swell, almost any vessel, cannot berth alongside the wharf. While we were at San Jose a tanker of about 20,000 d.w.t. berthed stern-on with both anchors down, to load molasses.

I understand that, if no tanker is expected, general cargo ships are sometimes berthed in this manner. The tanker employed a Pilot.

Communications; If at anchor, it is best to keep radio watches and maintain long-range communications in this way. When working cargo, the Supervisor is in VHF communication with the Agents, but this facility is not available outside of working days.

Charterer's Agents: Transmares S.A., of Guatemala City, who send a representative to San Jose while a ship is there. They are efficient and helpful.

Documents: As per "Guide to Port Entry". It was not possible to get any documents legalised prior to arrival, but this was arranged by Agents, as also was legalisation of documents for subsequent Central American ports.

Cargo Work: Continuous, weather and the supply of lighters permitting. There are only 3 general cargo gangs in the port and only 2 ships can be worked at a time. The first ship gets 2 gangs, the second ship 1 gang. Many delays were experienced waiting for lighters, and 2 full days discharging time were lost due to the size of the swell.

This is not a very serious problem alongside the ship, but makes discharge of the lighters at the wharf impossible.

Rate of discharge of coiled steel rods was 55 tons per gang-hour, net of delays awaiting barges.

Pratique: Granted on arrival.

Provisions: Not purchased.

Fresh Water: Unobtainable at the anchorage.

Shore Leave: Permitted, but one has to take one's chances of getting a ride to and fro on the lighters. Not many people went ashore and fortunately none were stranded when work was suspended.

SANTO TOMAS DE CASTILLA: 15.42 N. 88.37 W.

(See Plan)

DOCUMENTS:

The following are the documents required from each port at which cargo is loaded for discharge in Guatemala, all to be in the Spanish language.

	In Advance	*On Board*	*Consularised*
Consular Clearance	—	—	—
Cargo Manifests, copy	—	35	1
Cargo Manifests, freighted	—	1	—
Copy Bills of Lading (not freighted)	—	3	—
Cargo Plans	—	3	—
Hatch List	—	3	—
Crew List	—	8	1
Stores Lists	—	8	1
Passenger Declaration*	—	8	1
Arms Declaration*	—	8	1
Mail Declaration*	—	8	1
Clearance from last port	—	1	—
Maritime Declaration of Health	—	1	—
Crews Personal Effects Lists	—	4	—

* Where these are negative, may be combined in one form.

Consularised documents may be put aboard the vessel, or sent with advanced documents. Above requirements do not include the Agents need such as distribution of Bills of Lading to customers and his own needs for accounting and files purposes. *Consularised documents are not necessary as the fine imposed locally consists of maximum quezales 40.00 per port,* as Guatemalen Consulates may not be at a specific port of loading or their offices are closed.

PILOTAGE: Compulsory for all vessels arriving, leaving and manoeuvring within the port limits and available 24 hours a day. Pilot is taken on board 3 miles off the quay.

The pilot station and the Control Office of Maritime Traffic of the Navy maintains listening on R.T. frequencies 2738 kHz, and Channel 16 VHF.

The pilot craft are painted white, flying a red and white flag by day, and red and white lights by night, they have VHF radio, but no radar.

The pilot craft base is the Santo Tomas de Castilla Quay, as well as the pilot station, and they will proceed to provide service once requested by the Ship's Agents.

The ladder for the Pilot to board must be positioned on the lee side of the vessel 1 m. above the water, but any alternative may be agreed between the Pilot and the Master of the vessel.

ANCHORAGE: Vessels with a draft up to 24 ft. can anchor about 1 mile to the North of Villedo Lighthouse, leaving the main channel free, but vessels drawing more water should anchor a little further away from the lighthouse.

The Pilots will anchor vessels with less than 24 ft. draft in the inner bay, i.e. nearer to the port, depending on the position of vessels anchored.

APPROACHES: As aids to navigation, there is a lighthouse at Cabo Tres Puntas, Ox-Tongue Lighthouse, Heredia Lighthouse, Villedo Lighthouse, the access channel together with the manoeuvring basin being marked by light buoys, driven by batteries recharged by solar energy.

Note: The channel buoys have been changed (1985) to the International Rules (Inbound starboard - green) with radar-reflectors placed on them (7 buoys).

Lighthouse: A radio-tower is located in Pto. Barrios with a visibility of approximately 20 miles (Fl. 10 sec.), well marked on the chart.

Chart: Approach to Santo Tomas de Castilla – U.S. chart GUA 03 28165. 1st Ed. Jan. 84.

RESTRICTIONS: The channel has a depth of 32 ft., at the marginal quay there is a depth of 33 ft.

Docking/Undocking: Docking is permitted by the Port Authority when the required documents have been presented and provided the vessel is to commence work. Vessel may dock at any time, but such movements are normally scheduled to fit in with time of granting of Free Pratique and of commencement of work.

Once docked a vessel can stay at the wharf waiting for cargo during a longer period of time, for example overnight. However if space is needed to work another vessel with cargo available then the vessel losses its dock space.

There is no restriction on time of sailing.

Clearance is normally signed by the Port Captain during hours prior to completion of work.

MAX. SIZE: Max. draft 27 ft. – 30 ft. Max. LOA 750 ft.

HEALTH: Free Pratique is normally granted all day, including Sundays and Holidays.

Free Pratique is given either at the anchorage or after berthing. Where wharf space is available and vessels' documents have been presented, she would normally dock on arrival or at scheduled time for clearance and receive Free Pratique at the wharf.

Free Pratique in Santo Tomas is granted when the party of officials visit the vessel to clear her inwards. These officials represent:

Port Captain
Customs Administrator
Port Health Authority
Quarantine Officer
Port Authority
Customs Guard (Guardia Hacienda)

A representative of the vessel's agent is present and the offer of refreshments or soft drinks assist things along.

Where a vessel is cleared at anchorage, every effort should be made to lower a gangway, rather than expect the officials to use a pilot ladder.

In case the vessel does not have a Guatemala national flag aboard, a vessel would be well advised to ask his Agent to bring one to the vessel on arrival.

RADIO: ETA cables to Agent and Receiver made through Lantana Radio, Florida (WDE) in the U.S.A.

VHF: The distance at which VHF communication can be established with the Santo Tomas de Castilla pilot station is 16 nautical miles, i.e. the distance at which Cabo Tres Puntas (Three Points Cape) is from the port.

When the Pilot is manoeuvring, communication with the tugs is via Channel 12 VHF.

TUGS: It is compulsory to use at least 1 tug for any type of manoeuvre; depending on the size, structure, location where the manoeuvre is being executed, and the state of the weather, the Pilot will decide upon the use of a second tug. The port currently has available 3 tugs - 1×1,200 h.p., 1×1,100 h.p. and 1×700 h.p.

BERTHING: The quay is marginal with a length of 914.51 m., being divided into 6 berths of 152.40 m. (approx.) each. The depth of water alongside the quay is 33 ft., the water is saline, and for discharge and loading of goods, facilities are available for day and night work. The vessel's own gear and equipment is used, and in special cases shore equipment. It is necessary that prior to the arrival of the vessel's relevant and general information be provided regarding the cargo carried by the vessel, so as to allocate the corresponding berth, as well as equipment and storage warehouses.

CRANES: The port currently has 3 mechanical scoops (type P&H), 2 with a lifting capacity of 35 tons and 1 with a capacity of 7.5 tons. A mobile jib crane on rails capable of covering a distance of 400 m. approx., and with a lifting capacity of 30 tons. There is also a fixed crane with a lifting capacity of 50 tons. The Authority has no floating cranes.

The port can work conventional vessels, container and Ro/Ro ships, solid and liquid bulk carriers, and for operating solid bulk carriers, the Authority has a Buhler unit with a capacity of 100 t.p.h. discharge and mechanical scoops with grabs. Liquid bulk carriers visiting the port discharge and load products via tubes and hoses, conveniently installed along the quay.

SPECIALISED CARGO HANDLING FACILITIES: There are 4 berths for Ro/Ro vessels operation.

For handling container ships there is 2 Straddler carriers with a lifting capacity of 40 tons and stowage at 3 high, 2 Raygo-Wagner fork-lifts with 40 tons lifting capacity and stacking height to 3 high, 2 spreaders, 1 for 40 ft. and 1 for 20 ft. containers, 9 winches and 8×40 ft. platforms.

79 forklift trucks up to 8,000 lb. capacity. 15 reefer points available.

STEVEDORES: The Port Authority provides the stevedoring service in accordance with the applications for service submitted by port agents.

Labour:

a. Amount of gangs available to work:
Presently there are about 2,000 stevedores in the City of Puerto Barrios (5 km. from Santo Tomas) which is always sufficient.

b. Amount of stevedores employed in a ship's gang:
General 14 stevedores
Cargo: 1 hatchman
2 winchman (even if only one is required)
1 foreman

Container and Trailer vessels:
Same amount of men per gang, which can be used for different cranes/hatches at the same time.

c. Change of gangs:
The first shift of labour works from 0700 to 1700 hours, the second shift from 1800 until 0600 hours.
Breaks for meals are as follow:

Breakfast	0600 - 0700 hrs.
Lunch	1200 - 1400 hrs.
Supper	1700 - 1800 hrs.
Break	0000 - 0100 hrs.

d. Advance notice to call a gang for commencement of work:
1. For the morning shift - the day before lastest 1700 hrs.
2. During the day - 3 hours advance notice
3. At night - advise before 1530 hrs.

e. Average outturn per hour based on modern type vessels with large hatches, good winches/cranes:

Containers 20 ft. or 40 ft.	8 units/hr.
Iron & Steel products	25-30 tonnes/p.h.
Iron & Steel Products pre-slung	60 tonnes/p.h.
Bagged cargo	20-25 tonnes/p.h.
Drums	20-25 tonnes/p.h.
General cargo	15 tonnes/p.h.

These figures are subject to many variables, e.g. size of parcel, stowage, separation of marks, etc. Also when working iron and steel products pre-slinging would assist.

MEDICAL: No advance notice necessary. Hospital facilities and ambulance service available. International vaccination certificate required.

TANKERS: Diameter of pipe-lines 16 in. and load/discharge lines 14 in. No slop discharge facilities. Only 1 mooring berth for tankers and max. draft permitted 30 ft. Also see "Shipmaster's Report".

DENSITY: 1015.

FRESH WATER: Pipe-lines alongside quay. Delivered by hoses belonging to port. Rate 15 t.p.h.

FUEL: Available by lorry no advance notice required. Products available: Fuel oil, kerosene, diesel and gas oil.

FIRE PRECAUTIONS: No specific precautions for tankers. Hydrants and fire brigade available to combat fires, besides tug's services and Coast Guard ships of Navy. Dangerous areas to be clearly signposted.

GANGWAY/DECK WATCHMEN: Private watchmen are available but are not compulsory. The cost is approximately Quetz. 1.50/hr. during the day and Quetz. 2.25/hr. at night.

Uniformed guards of the Customs Police (Policia de Hacienda) are stationed at the gangway free of charge.

However it is recommended to keep vigilance to prevent cabins and storerooms etc. being entered.

Vessels at anchor should also keep a strict watch for boarders.

No meals are required to be supplied by vessels in Santo Tomas for Customs, guards or any other persons.

OPENING/CLOSING HATCHES: Normally by crew.

CONSULS:

El Salvador
Germany F.R.
Honduras
Italy
Mexico
Netherlands
Sweden

REPAIRS: Only minor deck and engine repairs.

SURVEYORS: Lloyd's Register in Guatemala City. Tel: 8-32-33, 53-68-26.

General Superintendence Co. Tel: 370134/35.

Jack Sigal (P&I Representative) Tel: 531452 in Guatemala City.

REPATRIATION: Possible.

AIRPORT: In Puerto Santo Tomas de Castilla there is no airport. There is an airport at Puerto Barrios 8 km. away, and flying time from there to the capital, Guatemala City, is 45 minutes. There is no regular airline, but it is possible to hire air taxis.

TIME: GMT minus 6 hours.

HOLIDAYS: *Legal and local holidays:*
December 31st 1800 hrs. until January 2nd 0700 hrs. (New Year's Day); March 23rd 0000 hrs. until March 24th 0700 hrs. (Dignidad Nacional); Wednesday 1200 hrs. until Saturday 0600 hrs. (Easter); May 1st 0000 hrs. until May 2nd 0700 hrs. (Labour Day); June 30th 0000 hrs. until July 1st 0700 hrs. (Revolution 1871); September 15th 0000 hrs. until September 16th 0700 hrs. (Independence Day); October 20th 0000 hrs. until October 21st 0700 hrs. (Revolution 1944); November 1st 0000 hrs. until November 2nd 0700 hrs. (Saints Day); December 24th 1200 hrs. until December 26th 0700 hrs. (Christmas).

No work on Good Friday from 0600 hrs. until Saturday 0700 hrs. and December 24th from 1200 hrs. until December 26th 0700 hrs. with exception of perishible goods when the port can work on December 24th until 1800 hrs.

On all other holidays work can usually be arranged, with advance notice, and at overtime rates.

CUSTOMS ALLOWANCES: Tobacco, Wine and/or Spirits: No definite quantity and usually regulated by the Master.

IDENTIFICATION CARDS: Passes issued to each crew member.

TELEPHONES: No facilities for placing telephones on board.

BANKS: Central Bank of Guatemala.

SHORE LEAVE: Possible.

DELAYS: Maximum delays 3-4 days could occur at most 5 times during a year. Container vessels and reefer vessels have preference if they carry perishible cargo, same as vessels which carry coffee or load coffee with limitations in their sales-terms (L/C) such as 15th and end of a month.

GENERAL: *Dunnage Wood:* Dunnage wood is not available in the port however with enough advance notice it can be brought from Zacapa, approximately 150 km. (94 miles).

Local guidance on stores and availability of items:

Deck stores: The few available items are expensive.

Engine room spare parts: Even well-known makes are almost non-available.

Lubricating oils: The commonly used ones are available in small quantities, but special ones are not obtainable.

Stewards department: Most dry stores are expensive with few exceptions and quantities are limited.

Fresh fruits, vegetables: Seasonally available in moderate quantities, at reasonable prices, likewise fish, poultry, fresh beef and pork. (Beef bought in Guatemala is accepted as safe in the USA, but not so the pork – confirm with respective authorities).

Laundry service: Available at a reasonable cost.

Radio/Navigational aids: Spares are not generally available and service of a very limited nature only. Better service can be obtained in Guatemala-City. (Each case should be investigated first by Agent).

IMPORTANT: Ships spare parts can be sent to a vessel calling at Santo Tomas de Castilla by air or sea freight but care must be exercised in their addressing and marking, as otherwise local import duties may be imposed. All such items should be clearly addressed to the vessel, in care of the vessel's Agent, and important to state the Spanish for "in transit" the phrase "EN TRANSITO". This ensures that the goods can be treated and may be exported on the receiving ship without problems.

Any such movement should always be co-ordinated with the local Agents, who should be kept fully advised on same.

Regulations ruling explosives and ammunition at port:

Explosives and ammunition are only allowed to be discharged on a scheme whereby they leave the port area immediately and a notice of 48 hours should be given prior to arrival.

Cargoes remaining on board are not covered by any particular regulations.

Before working a vessel the Port Authority requests a deposit from the Agent, based on a Proforma. This is calculated by the manifest of inbound cargo and the expected exports. Without this deposit the vessel is not allowed to work.

SHIPMASTER'S REPORT: 1976

Approaches: No difficulty once position is ascertained approaching the Gulf of Honduras. The Pilot boarded 3 miles North of the Villedo Shoal Beacon. Pilots have VHF Channel 16 call Porto Barrios Pilots. Only 1 pilot speaks English so if he is on duty there is no difficulty in communications.

The lights on the approach beacons are said to be unreliable but all were found to be good radar targets.

At the present time a dredger is working on a new approach channel to give a 32 ft. buoyed channel past Puerto Barrios up to Santo Tomas de Castilla.

General: The area is still recovering from the severe earthquake some 8 months ago in which the finger pier at Puerto Barrios was destroyed. This now constitutes a submerged hazard while in the channel on the approaches to Santo Tomas de Castilla. The channel is poorly marked and at present there are numerous survey buoys which can be confusing.

The berth is stern to at the Eastern end of the cargo jetty at Santo Tomas using 2 anchors and backing up to 10 ft. off the jetty from where the hose is passed up to the stern line by a mobile crane. The connection is made by the ship's crew. There is a 1 × 8 in. hose for all grades into a 10 in. shore line which is approximately 5 km. long. The requested back pressure of 8.5 kg. was easily maintained using 2 pumps.

AUTHORITY: Empresa Portuaria Nacional – Santo Tomas de Castilla, *Tel:* 0480060, 0480611, 0480588, 539098. *Telex:* Stomas GU 719. *Contact:* Carlos Tan. G, Deputy Manager.

AGENT: See "Puerto Quetzal".

Republic of Guinea

CONAKRY: 09.30 N. 13.44 W. (See Plan)

DOCUMENTS:
7 Crew Lists – Crew list with vaccination date for health service.
5 Passenger Lists.
5 Lists Port of Call (the last ports).
3 Stores Lists.
2 copies List of Medicines and Drugs.
3 Lists Crew Declaration (personal effects).
5 Manifests of Cargo (if any).
2 Copies of Bills of Lading.

PILOTAGE: Telegraphic address pilot station: "Harbour Master's Office, Conakry". Pilot meets vessels N.E. of Sea Buoy Tonnelier in position Lat. 9° 27.3′ N., Long. 13° 44.05′ W.

ANCHORAGE: Safe deep anchorage.

RESTRICTIONS: No entry at night. Channel depth 8 m. MLW.

MAX. SIZE: 600 ft. long. Max. draft for tankers 31 ft. – 32 ft. HW.

HEALTH: Valid yellow fever inoculation certificates.

RADIO: Conakry Radio 2182-2586 kHz.

TUGS: 2 new tugs, 27 tons bollard pull, recently delivered. Tugs normally connect to starboard side. Ship's lines used.

BERTHING: All tankers berth according to HW. No berthing at night. Berthing 0700 hrs. to 1900 hrs. 10 berths, max. depth 11.5 m.

STEVEDORES: ETA to "Navalguinee" in order arrange gangs.

MEDICAL: Advance notice required for medical service, hospital facilities available.

TANKERS: Pipe-line 5,280 ft. long, 10 in. diameter. 2 tanker berths, 31 ft./32 ft. high-water max. draft at these berths.

See "Shipmaster's Report – June 1985".

DENSITY: 1016 in the port with particular relation to state of tide.

FRESH WATER: Available by connection from pier. Rate of delivery with good pressure 30 t.p.h.

FUEL: Not available.

FIRE PRECAUTIONS: Special fire service for tankers.

GANGWAY/DECK WATCHMEN: Compulsory, particularly for tankers.

Piracy: Large gangs of thieves have boarded vessels in daylight in the port and have stolen cargo from containers and holds.

OPENING/CLOSING HATCHES: Normally by crew. Stevedores if requested by Master.

CERTIFICATES: Derat Certificate, Log Book.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes out of bond. Wine and/or Spirit, 1 litre of spirit and 1 litre of wine per day out of bond.

IDENTIFICATION CARDS: Necessary.

CONSULS: All major maritime nations.

REPAIRS: None available.

REPATRIATION: All facilities exist for effecting crew changes and arranging repatriation to Europe.

AIRPORT: International airport distant 15 km. served by regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: New Year's Day (1st January); Women's National Day (9th February); Labour Day (1st May); 1958 Referendum Day (28th September); Independence Day (2nd October); All Saint's Day and Guinea Army's Day (1st November); Anniversary of the Basic Law of 8th November 1964 (8th November); Assumption (15th August); Anniversary of Youth's Creation (J.R.D.A.) (26th March); Christmas (25th December).

Varying holidays which depend on the position of moon: Ramadan – End of fasting; Tabaski – Pilgrimage day at Mecca; Mahouloud – Day after Prophet Mahomed's Birthday.

Work available during holidays, except Labour Day, Independence Day, Ramadan and Tabaski.

POLICE/AMBULANCE/FIRE: Police 17; Ambulance 16; Fire 18.

TELEPHONES: Not possible to place telephones on board.

SERVICES: None.

SHORE LEAVE: Crew allowed ashore.

SHIPMASTER'S REPORT: 1974.

There are no shore or harbour lights in operation. The Tonnelier Buoy is off station together with all channel buoys other than Nos. 3, 6 and 9 all of which are unlit. There is no plan to replace or re-light these navigation marks.

Only 1 tug is available.

Fresh water can only be obtained by Fire Brigade Tanker truck of 4 tonnes capacity at a cost of £1.60 per tonne. This water if received needs chlorination and boiling before use.

Consuls – There is no British Consular Officer resident in this port. The nearest is located at Dakar in Senegal.

Repatriation of crew members by air is possible but difficult. Procedure is as follows;

Air ticket must be purchased outside Guinea. Airline then advises their office at Conakry that purchase has been made. Airline office at Conakry in turn advise ship's Agents when ticket and flight are available. Only then can Immigration formalities be commenced. Entry and exit visas are required and the overall operation may take up to one week.

Time – GMT is kept.

In the rainy season vessels should be prepared for the African Tornado. This usually occurs at night and produces winds reaching 90/100 knots from calm in a matter of minutes. It is as quickly over. The best indication of approach of this weather is a steep rise in the barometer, the highest winds usually Northerly being experienced during the rise.

Vessels berthed at the banana berth should be well fendered as they are subject to considerable movement due to invisible ground swell. A slight starboard list when alongside is an advantage.

SHIPMASTER'S REPORT: 1975.

Radio: Conakry Radio not working on radio telephony as stated, although same information given in List of Coast Stations. (Freetown Radio helped me with the relaying of my messages to Conakry and Europe).

Fresh Water: Only available by truck loads and after written application to Harbour Master, stating exact amount required. (Water is very expensive).

Identification Cards: Seamen's Books or passports used. (No landing permits issued).

Time: GMT.

SHIPMASTER'S REPORT: June 1985.

Anchorage: To South of Isle de Los, good holding ground.

Approach: Straightforward. Chart coverage of area is poor.

Communications: Very poor. Conakry Radio was heard once on Atlantic passage. Port Kamsar Radio was heard more frequently. Dakar Radio and Freetown Radio both heard but not helpful. Telexes via Portishead apparently arrived but were never answered.

On arrival Port Control was contacted on VHF Channel 16, but reception was very poor unless they used the VHF on one of the ships alongside.

Depths: No one is very sure about what depths there are in the approaches or alongside. Echo-sounder trace on way in 1 hour before HW at 32 ft. draft showed a minimum of about 1 ft. under keel for a few hundred yards North of No. 2 buoy and the same clearance just past Phare de Boulbine. Depths alongside at LW by soundings as per "plan" (which see). Bottom at Berth Zero (Bauxite Berth) was very soft bauxite waste. At LW ship was still surging to the low ground swell and did not appear to be suffering from close proximity to bottom.

Pilots: Local Pilots with a West German instructor in attendance. Careful and competent. Pilot boat is modern and powerful – black hull, orange cabin.

Tugs: Two new powerful tugs and one old tug.

Berth: Berth Zero: Used for handling bauxite and has 2 mobile elevators. Straight concrete berth with plenty of bollards but no fenders. As ship surges gently all the time it is recommended to rig whatever fenders are on board.

Due to position of other ships further up the wharf shore hose would not reach manifold so 3 ship's hoses had to be used.

Berth very dirty and dusty with mounds of bauxite everywhere.

Stern was clear of end of wharf so moorings were set as best as possible.

Theft: At least 2 ship's watchmen are required at all times. All removable items (ropes, drums, clothing, etc.) must be kept under lock and key at all times.

Port Officials: Polite and efficient. Documentation required as in "Guide to Port Entry" with one exception. List of Medicinal Narcotics was checked meticulously.

Port Control Officials will board sometime and check all certificates and ask to see Test Certificate of CO_2 system and Oil Record Book.

Night Movements: Head Pilot would not recommend it as there are no lights on navigation aids and only lighting in port area is provided by ships. Prefer to consider that this is a daylight port.

General: I was informed at first that the berth has 28 ft. at LW. As this required us to discharge about 3,500 tonnes to stay afloat between berthing and the next LW I insisted on berthing on a rising tide. I called off first attempt when Pilots were still not in sight at HW. Next day was better timed and ship was all fast 30 minutes before HW. Despite assurances that all would be ready for immediate start it was necessary to provide ship's hoses and discharge started 65 minutes after HW and as discharge line was now 6 in. the rate was not sufficient to keep ship off bottom. Bottom is very soft and no damage was suffered.

Services:
Fresh Water: Not available.
Fuel: Not available.
Hoses: 1×10 in.×100 ft. Discharge hose for caustic but may not be long enough to reach manifold. Max. pressure allowed is 7 kg./sq.cm.
Ballast Facilities: None.
Surveyors: None available.

AUTHORITY: Harbour Master.

012

PORT KAMSAR: 10.39 N. 14.37 W. (See Plan)

DOCUMENTS:
1 Vaccination List.
1 Maritime Declaration of Health.
6 Crew Lists.
6 Passenger Lists (If any passengers onboard).
1 Crew Declaration (Personal effects) List.
1 Stores List.
6 Last Ports of Call Lists.
12 Manifests of Cargo (General cargoes only).
2 Copies Bills of Lading (General cargoes only).

To ensure the best possible turn-round for general cargo vessels complete sets of the required cargo documents should be made available to the authorities by hand of the Master. Delays have been occasioned by the late arrival of documents sent by post. It would be of help for the Master to send hatch distribution and the amount of refrigerated cargo, if any, at the same time as ETA.

Quarantine, Immigration and Customs: Representatives of the departments board after the vessel has been made fast alongside. The Quarantine Flag "Q" should be flown by arriving vessels.

ARRIVAL ADVICE: Masters are required to send ships ETA, addressed to OFAB Shipping Agency and/or to Harbour Master and/or Shipping Superintendent C.B.G., through Port Kamsar Radio Station, 7 days, 5 days, 3 days and 1 day before arrival at Port Kamsar.

APPROACHES:
Approaches to Rio Nunez: Port Kamsar formerly known as Kakande is located on the East bank of the Rio Nunez river and is approximately 17 km. from the sea.

Vessels bound for Port Kamsar will find there are few natural features to aid a landfall. The most prominent feature is Cape Verga situated to the Eastward of the Rio Nunez entrance. This cape can be observed by radar at a distance of approximately thirty miles. At present the light on Cape Verga is extinguished.

To the Westward of the Rio Nunez entrance are the Compony Shoals and Conflict Reef. These are screened by a series of light buoys and vessels approaching from the West should keep them well on the port hand. (See "Buoyage System" below).

Another prominent feature is Gonzales Rock on the starboard side close to the entrance to Rio Nunez. During daylight the hull and superstructure of a wreck stranded 765 ft. bearing 049.75° from the old Gonzales light structure is visible and may be picked up by radar at a distance of between ten and fifteen miles. A light buoy is positioned screening the rocks and is identified as buoy No. VII. The true position of the wreck is: 10° 24′ 24″ N., 14° 41′ 18″ W.

Vessels proceeding to Port Kamsar should anchor and await the arrival of the Pilot in the area bounded by Latitudes 10° 26′ N. and 10° 28′ N. and Longitudes 14° 44′ W. and 14° 46′ W.

Kamsar Buoyage System: Approaches to Rio Nunez – Sea Buoys

		Position			*Visi-bility*
No.	*Shape–Colour*	*N.*	*W.*	*Characteristic*	*(miles)*
I	Red cylindrical	10° 20.0′	15° 28.5′	GP. FL. 3 Ev. 15 sec.	5

VII	Black conical	10° 23.5′	14° 44.5′	GP. FL. G 4 Ev. 10 secs	2.6
VIII	Red cylindrical	10° 29.5′	14° 43.9′	FL. 10 secs	5

Charts of the area are as follows:
British Admiralty:
600 Cacheo River to Iles de los.
1562 Rio Nunez and Riviere Compony.
United States Naval Oceanic Office:
51580 Ponta Caio to Cap Verga.
Service Hydrographique de la Marine (These charts are recommended by the Port Captain):
6148 Embouchure du Rio Nunez.
6228 Acces au Rio Nunez.
6288 Abords du Port Kakande.

Rio Nunez Transit: The channel from the mouth of Rio Nunez to the bauxite loading wharf at Port Kamsar is 17 km. in length and 120 m. wide and is well marked by 21 light buoys. The channel is subdivided into an inner and outer channel, the bottom of which consists of mud and sand.

The inner channel extends from the bauxite wharf to point "F" and is dredged to between 8.25 and 8.50 m. below Reference Datum Level (R.D.L.) which is defined at +0.15 m. above the lowest water registered (British Admiralty Tide Tables LLWS = 0.00).

The outer channel extending from point "F" seaward is dredged to a depth of 9.00 m. below R.D.L. increasing to a depth of – 12.00 m. from km. 15.3 to the sea.

The turning, waiting basin for inbound vessels is dredged to −7.75 m. below R.D.L. the bottom of which is mainly mud and it is good holding ground.

PILOTAGE: Pilotage service is compulsory for all vessels over 150 ft. LOA. Vessels under 150 ft. LOA will also be required to have a Pilot aboard on their first calls, but may be exempt thereafter by consent of the Harbour Master and approval of the Port Director.

Pilots are supplied from the Director's Office. Pilots board vessels in the designated waiting area. When conditions are too unfavourable for a Pilot to board the vessel at the designated area the Pilot will pass instructions by VHF radio, Aldis lamp or loud hailer from the pilot boat, and the vessel will follow the pilot boat in until conditions are suitable for boarding.

Pilot boats are fitted with VHF radio can be contacted on Channel 16 or 12.

ANCHORAGE: See "Approaches".

RESTRICTIONS: Pilots are now berthing ore carriers of any size (up to 229 m. LOA, which is the largest size of ship calling at Port Kamsar) at any stage of tide, including with the half ebbing current of Spring tides during the dry season. However, this performance can be limited during Spring tides in the rainy season.

MAX. SIZE: Max. LOA 229 m. Shipmaster reported max. draft at LW 42 ft. 8 in.

HEALTH: Authorities board when vessel is alongside the berth. Yellow fever and Cholera vaccination certificates required.

BERTHING: Located 17 km. from the channel entrance is the bauxite wharf.

The area alongside the wharf has been dredged to a depth of 13.5 m. below R.D.L. Fendering is separate from the wharf proper, and consists of 12 flexible steel dolphins spaced 21.6 m. apart and protruding 4 m. from the face of the wharf.

A vessel proceeding to the bauxite wharf will normally swing off the berth and make fast port side to, heading seaward, during the flood tide. If the berth is occupied the vessel will be anchored in the turning basin to await the berth.

There is a single loading berth at the wharf. The longest vessel berthed had a LOA of 229 m., which is considered to be the maximum length permissible.

The mobile shiploader has a travel of 165 m., and an outreach of 21 m. from the outside face of the fendering. It is rated at about 4,000 tonnes/hour.

A vessel's air draft, i.e. distance from the waterline to the top of the hatch coaming, must not exceed 13.72 m. (45 ft.) at Highest High Water.

Weight of bauxite loaded is determined by a formula using deadweight survey and weightometer. The weightometer is used for loading runs.

Stowage factor of the dried bauxite is 28 cu.ft./long ton.

Bauxite vessels sail from Port Kamsar during the flood tide. Maximum departure draft is regulated according to tidal conditions.

Facilities for the discharge of petroleum products are also available on the bauxite wharf. Attached to the shiploader is a chicksan arm with an 8 in. connection. This feeds 2 main lines, 1×16 in. line for Bunker "C", and 1×8 in. line for Diesel. Discharge rates average about 450 tonnes/hour at 100 lbs. per sq. in. back pressure at the ships pumps.

Storage facilities are three 10,000 tons Bunker "C" tanks, and two 3,000 tons diesel tanks.

At the same wharf there is a 6 inch line for the discharge of petrol (gasoline) by the same tankers bringing diesel oil. Discharge rates average 60 cu.m.p.h. The storage facilities are two 1,400 cu.m. tanks.

There are 2 small general cargo wharves located at the entrance to the Dougoufissa Creek, where vessels of up to 100 m. LOA with a maximum draft of 6 m., may berth. As there is only 3.5 m. at Lowest Low Water, these vessels will be aground at low water periods.

One of these wharves is equipped with a heavy lift crane – derrick with a maximum S.W.L. of 110 tons. Safe Working Loads are as follows:–

Radius of derrick (metres)	*Lifting capacity (tons)*	*Height under hook (metres)*
16.5	110	29
26	75	23
32 (max.)	45	11

The derrick is also equipped with a secondary hook with a capacity of 20 tons.

Two 400 tons and two 200 tons barges are available for loading and discharging midstream.

TUGS: Two tugs in service (1×825 h.p., 1×2,800 h.p.).

RADIO: The Port Radio Station is operated by the Post, Telegraph and Telecommunications Department. The equipment includes a 5 kW. transmitter (both voice and telegraph) with the following frequencies.

A.	*Frequency*	*Power*	*Mode*	*Call Letters*
	6383 kHz	5,000 Watts	A 1	3X0 27
	8702 kHz	5,000 Watts	A 3	3X0 28
	12885 kHz	5,000 Watts	A 3	3X0 29
	484 kHz	1,000 Watts	A 1	3X0 30
	500 kHz	1,000 Watts	A 1	3X0

NOTE: *Watchhours are at the GMT times shown below:*

0800 – 0850	500 kHz
0850 – 0950	6383 kHz
0950 – 1100	500 kHz
1100 – 1200	6383 kHz
1600 – 1700	500 kHz
1700 – 1800	6383 kHz
2000 – 2100	500 kHz
2100 – 2200	6383 kHz

B. *Port Operations:*

(1) A new SSB radio telephone set has been installed and is operating on the following frequencies and watchkeeping hours:

Frequency	*Power*	*Mode*	*Call Letters*	*Watch Hours*
2182 kHz	150 Watts	A3H	3X04	8000–1200,
8702 kHz	150 Watts	A3J	3X028	1330–1730
12885 kHz	150 Watts	A3J	3X029	and as required

(2) VHF Channels 16 and 12. Watchkeeping hours: 0800 – 1200; 1330 – 1730 and as required.

C. A Radio Direction Finder has been installed and is operating with the following characteristics:

Position: 10° 39′ 41″ North
14° 36′ 25″ West
Frequency: 308 kHz
Signal: KAM — · — · — — —
Power: 100 Watts
Range: 150 miles (approx.)
Operating Time: Continuous

D. A further means of communication is through Port Kamsar Post Office through which international connections may be made.

Telegraphic address: BCTR KAMSAR.
Telex : 817 Kamsar.

WIND/WEATHER/TIDE: In the Rio Nunez approach area waves up to 4 m. can be encountered. At the entrance to the fairway or channel they are generally less than 1 m. high during the rainy season, and less than 0.5 m. high in the dry season. Waves and swell in the inner channel and harbour area are generally very moderate.

The tide, in the the proximity of the buoyed channel, runs N.N.E. and S.S.W. at 2.5 knots under normal conditions, but can reach 4.5 knots during Spring tides in the rainy season.

The flood tide runs parallel with the line of the bauxite loading wharf at a speed of up to 4 knots. The ebb tide, augmented by water coming out of the Dougoufissa Creek, runs through the bauxite wharf at an angle of approximately 20° at a speed of up to 4.5 knots on spring tides in the rainy season, tending to set the vessel off the wharf. It is therefore absolutely essential to tend moorings continuously, particularly on the stern of a loading vessel.

The density of the Rio Nunez at the bauxite loading wharf varies between 1013 (rainy season) and 1028 (dry season) at high water.

Port Kamsar has a typical tropical climate, which is characterised by two separate seasons.

Rainy season from June to October

Maximum rainfall	is during July and August mainly at night.
Relative humidity	is 70 to 80% during the day and 90 to 95% at night.
Temperatures	range from 17°C to 38°C, with an average of between 22°C to 28°C.
Wind conditions	Variable from between South and West, Force 3 to 6 Beaufort Scale. Possible tornados from between North and N.E. with wind reaching force 10 Beaufort Scale for short periods.

Dry season from November to May

Little rainfall.	
Relative humidity	is 30% to 50% during the day, and 80% to 90% at night. There is often coastal fog in the mornings.
Temperatures	range from 15°C to 42°C, with an average of between 20°C to 35°C.
Wind conditions	Light breezes from the Southwest to West, force 1 to 3 Beaufort Scale.

MEDICAL: Hospital facilities at Port Kamsar are available only on an emergency basis.

TANKERS: See "Berthing".

FRESH WATER: Available in limited quantity on an emergency basis.

TIME: GMT.

HOLIDAYS: New Year's Day (1st January); Second Republic Day (3rd April); Labour Day (1st May); Independence Day (2nd October); Christmas Day (25th December); Tabaski (variable date); Ramadan (Id il Fitri) (variable date); Maouloud (variable date).

All Sundays are also declared Public Holidays. The President may also, at his discretion, declare any other day to be a Public Holiday.

The loading of bauxite is generally continued without stoppage for Public Holidays.

General cargo will not, except in special circumstances, be worked on above named Public Holidays. All other Public Holidays are normally worked.

SHORE LEAVE: Crew members are granted shore leave. Shore leave passes are issued by Immigration Officer at ship's gangway.

PIRACY: Acts of piracy have taken place at Conakry.

GENERAL: *Stores:* Provisions are scarce and therefore not available to calling vessels.

Gangways: Vessels must provide and attend their own gangways. A vessel berthing at the bauxite wharf should have its gangway swung out and ready to lower.

Normal practice of the port is for the foot of the gangway to be heaved out and landed on the wharf after the vessel is fast alongside.

Port Director's Office: The office of the Port Director is solely responsible for the operation of Port Kamsar, which includes the provision of Pilotage, tugs and launches.

The Office acts as sole Agent for all vessels calling at Port Kamsar, including the normal ships business functions performed by ships Agents.

SHIPMASTER'S REPORT: 1974 – Updated 1986.

Density: Varies from 1013–1028 according to season.

Fresh Water: Available, rate 20 t.p.h.

Repairs: Small repairs can be carried out in an emergency.

Airport: Nearest airport is Conakry which is 8 hours away by car.

SHIPMASTER'S REPORT: August 1983 (Updated 1986).

Documents:

1 Vaccination List.
1 Maritime Declaration of Health.
6 Crew Lists.
1 Crew Declaration.
6 Passenger Lists (If any onboard).
6 Ports of Call Lists.
12 Manifests of Cargo (Cargo ships only).
2 copies Bills of Lading (Cargo ships only).
1 Stores List.

1 Dept.
1 Sept.
Bob Swift

Agent, Doctor, Customs, Immigration, Navy Officer and Shipper's Representative board on arrival alongside to clear vessel. Later during office hours a gentleman from the Maritime Inspection Department will board to inspect vessel's certificates etc. On ship's first visit he will issue a numbered chit which should be *retained* for future visits. A shippers' representative will board on arrival to carry out a deadweight survey. He usually accepts Chief Officer's figures for ballast, bunkers, fresh water, etc., which he should have ready. 2 Immigration and 1 Customs Officer live on board for the duration of vessel's stay alongside.

Approaches: Are fairly straightforward following the pecked line route on Charts B.A. 600 and 1560, however this with the benefit of a 'Satnav'. Currents in that area were found over several voyages to be unpredictable and at times quite strong. No. III Buoy is equipped with a Racon which can be detected at distances of between 13 and 18 miles and should be passed keeping it to the South, thence inwards keeping to the South likewise of Nos. IV and V Buoys (also pecked line route) proceeding to the anchorage after passing Buoy V, or if entering port directly from sea to the pilot station usually about 1 mile South of No. 8 Buoy. Here the pecked line (Charts B.A. 1560 & 1562) should be adhered to in order to avoid the shoal patch S.S.W. of No. 8 Buoy.

Buoy III appears to be about 3 miles South of charted position and Buoy IV even further out of position. At the time of writing the light on Buoy III is extinguished, however the Racon is working well. Ile Binari and Ile Gonzales show up well on the radar. Rocher Gonzales upon which lies a conspicuous wreck, shows on the radar as a double blip and has been found most useful for obtaining fixes. Unfortunately neither the light or Racon on the reef work. Most of the buoys show up well on the radar and are visible for about 6 miles (conditions allowing). Off the river mouth flood tide sets Northeasterly and the ebb Southwesterly.

Pilotage: 3 pilots available. Pilots should be called on VHF Channel 16 about one and a half hours before arrival, they are supposed to keep a 24 hour watch, however if many vessels are waiting at anchor this is not always the case.

If berth is unoccupied, Pilot will meet vessel 1 mile South of No. 8 Buoy and conduct vessel through an 8.25 mile channel, well buoyed, 120 m. in width with a least depth of 8.25 m. to the inner anchorage and turning basin dredged to 10.0 m. Both anchors should be run out ready and a man standing by them for the channel passage. If entering on the flood tide (on which vessels must berth) immediately on entering the basin, vessel is swung to port and port anchor let go to one shackle (in water) until vessel has swung to flood, she is then dredged astern to a position N.W. of and handy to the berth, when anchor is weighed and vessel proceeds to berth. An adequately powerful tug assists in the operation. On weighing port anchor the starboard anchor must be ready in case of need on berthing.

If berth is occupied but no other ships waiting, vessel will enter as above, but when in position pay out cable and come to anchor. Holding ground is reputed good. As vessels of or near this size must sail one hour before high water Pilot rejoins about 1.5 hours before high water, cable is shortened and vessel dredged astern as above to await the sailing of berthed ship.

Anchorages: As will be seen on the charts the anchorage and pilot station area indicated is close to shoal water. I therefore found it preferable to anchor about 5 miles West of Rocher Gonzales. The holding ground is reputed to be good though I have never had opportunity to put this to the test.

Radio: Early ETAs have to be sent via Portishead Radio, however as these have to pass through Conakry and overland communications are poor, it is not unusual for these to be lost or badly delayed. It is therefore important to establish communication via Kamsar Radio as early as possible. Our earliest has been about 3 days from the port, when I have considered it worthwhile to repeat the 3 day ETA direct. The evening watch hours seem to be the best. Agents do not reply to requests for 'prospects'. First advice therefore is from the Pilots.

VHF: See "Pilotage".

Tugs: See "Berthing".

Berthing: If more than one vessel, waiting turn, order is: Vessel berthed, next on turn at inner anchorage, the rest anchored outside awaiting turn. Turns are not necessarily in order of arrival. If a ship is without laydays she must wait until laydays are allotted or until ships within laydays have loaded even though may have arrived later.

Bauxite Berth: An L shaped jetty extending about 6.25 cables from shore, it is well fendered with modern sprung fenders, depth alongside 13 m. Vessel berths port side to the quay head to flood. Tie up, forward 6 head ropes and 2 springs, aft 6 stern/breast ropes and 2 springs. On Spring tides and particularly during the rainy season, a very strong ebb sets at an angle across vessel's stern setting it off the quay. If need be the tug 'Dougoufissa' can be called on VHF Channel 16, either direct or via Pilots (depending on one's French) to stand by and/or assist by pushing vessel to quay.

There is no shore gangway. Ship's gantry must be landed on quay. As usual the space for it to run is restricted and it must be carefully kept out of the way of the loader.

Berth is equipped with a travelling loader with an outreach of 21 m. Max. airdraft to coamings (hatchcovers for siderollers) is 45 ft. Loading rate is up to 60,000 tons per day working around the clock. However during the rainy season and particularly if there is a run of ships, loading rate is limited by the capacity of the driers, about 1,500 t.p.h. for ships loading dry ore.

Max. sailing draft varies with height of tide and river, and will be calculated by the Pilot before he leaves the ship on berthing.

On sailing, Pilot will board 1.5 hours before high water (day or night) at which time vessel should be ready to single up as she must leave the berth promptly 1 hour before high water.

Fresh Water: Available in limited quantities and on an emergency basis only.

Repairs: No facilities for repairs.

Shore Leave: Permitted.

Crew Mail: Mail left with Agents is forwarded to Brussels direct by air every Monday.

AUTHORITY: Port Director, Direction du Port.

- List of Cargo (inside sealed envelope).

PILOTAGE: Pilot's base and radio beacon located at Caio Point, (small island at the entrance of Geba's Channel). To call the Pilots and/or the radio beacon, send telegram to Servicosmarguine, informing of the ETA at Caio; pilotage is compulsory.

ANCHORAGE: Between Bissau and the Ilheu do Rei.

MAX. SIZE: Draft 26 ft.

HEALTH: Visit of Port Doctor compulsory if ship has no doctor, or if permission for exemption has not been requested; permission can be requested by radio. When needed, the health services in Bissau can be used by passengers or crew members. Yellow fever vaccinations required.

RADIO: Station call sign CQF weekdays on at 0900, 1300, 1600, 1800 hrs. GMT. Sundays 0900 and 1100 hrs. GMT. Frequency 500 kHz, CW.

TUGS: 1 tug of 320 h.p. and 1 of 800 h.p. available.

BERTHING: Ponte, Cais de Bissau, length 131 m., width 25 m., depth 8 m.

Equipment: 4×6 ton cranes; 2×12 ton stacker trucks; 2×4 ton stacker trucks; 4×2 ton stacker trucks; 2×6 ton towing tractors 16×6 ton trucks; 1×35 ton towing tractor; 1×25 ton platform; 1×50 ton towing tractor; 1×50 ton platform; 2 suction machines for 80 t.p.h.; 2×35 m. conveyor belts; 1×40 m. conveyor belt.

STEVEDORES: 1,500 stevedores available for loading and unloading cargo.

FRESH WATER: Available; pumping rate, 10 t.p.h.

FUEL: Diesel available; pumping rate, 6 t.p.h.

CONSULS: Algeria, Brazil, China, Cuba, Egypt, France, Germany F.R., Democratic Republic of Korea, Lebanon, Libya, Netherlands, Nigeria, Portugal, Sweden, U.S.A., U.S.S.R.

REPAIRS: Small repairing work can be done on machinery or ship's hull.

AIRPORT: 7 km. from Bissau; 2 flights to Lisbon per week, 1 flight per week to Moscow, 1 flight per week to Algiers and 4 flights per week to Conakry.

TIME: GMT minus 1 hour all year round.

HOLIDAYS: *National Holidays:* 1st January; 20th January; 8th March; 1st May; 3rd August; 24th September; 14th November; 25th December, Days of Ramadan and Tabasky.

POLICE/AMBULANCE/FIRE: Police, tel. 213957; Fire, tel. 118.

TELEPHONES: Line connection land-ship, if requested to the Post Office Authorities.

DEVELOPMENTS: "T" shaped general cargo pier length 290 m. with head length 260 m. under construction, completion 1987.

SHIPMASTER'S REPORT: November 1979.

Vessel from Dakar; bound for Bissau. Speed 14 knots, draft 6.10 m.

Report on the River Entrance to Bissau:

The vessel was proceeding on course 172° (T) and positions taken at various intervals as follows:

0920 hrs.: Cabo Roxo Lt. Ho. Brg. 054° (T) × 20.5 miles
0930 hrs.: Cabo Roxo Lt. Ho. Brg. 047° (T) × 22.0 miles

At 0920 hrs. minimum sounding was taken at 4.0 m. under the keel and Westerly set was applied.

At 0930 hrs. the vessel altered course to 137° (T).

1025 hrs.: Pta. Cabaceira Pt. Brg. 081° (T) × 31 miles
1145 hrs.: Pta. Cabaceira Pt. Brg. 057° (T) × 26.1 miles
1210 hrs.: Pta. Cabaceira Pt. Brg. 048° (T) × 21.5 miles

From 0930 hrs. onwards, poor fixes due to poor radar targets of land points.

From 1020 hrs. the vessel steered various courses to the Fairway Buoy at Lat. 11° 47.3′ N., Long. 16° 41.8′ W., due to strong currents.

At 1145 hrs. Fairway Buoy was found not in position and the vessel altered course and steered heading for pilot station at Caio Island. Caio Island Western Point was picked up on radar at about 16 nautical miles.

Visibility throughout was hazy and poor, about 3-4 nautical miles due to sand dust. Radio beacon at Caio Island was not working. Aero Radio Beacon at Bissau appeared to be unreliable.

1345 hrs.: Vessel anchored South of Caio Island awaiting Pilot.

1415 hrs.: Pilot onboard.

Pilot station at Caio Island had no VHF or other possible means for communication with the vessel. Vessel had to anchor and await Pilot. The Pilot boat is small with a weak engine and at times not working. The Pilot may have to be picked up by own lifeboat. The River Pilot did not speak any English, only Portuguese and was unable to give proper orders to the helmsman. Navigation in River Geba to Bissau was mostly done by the vessel's officers. Entrance and departure from Bissau cannot be done during the night, as most lights and buoys are unlit. On arrival at Bissau the vessel has to anchor 4 cables N.E. of the jetty and await Harbour Pilot.

1808 hrs.: Vessel anchored at Bissau, 4 cables N.E. of jetty.

1900 hrs.: Vessel berthed at Bissau, starboard side alongside the jetty.

The Harbour Pilot was able to communicate in English. Berthing and unberthing is preferred on flood tide. Current alongside berth up to 3.5 knots. Maximum depth alongside at low water was 20 ft. 3 soundings were taken at low water alongside the wharf: West end: 7.40 m., middle: 6.10 m., East end: 9.30 m., length of wharf 131 m.

Discharging was slow. The vessel stayed 4 days in port to discharge 1,364 tonnes flour in bags of 50 kg. Cargo worked from 0800 hrs. to 2300 hrs. daily. No cargo work at night due to heavy pilferage from the cargoes, ship's watchmen were kept in all hatches during discharging.

Day of Departure:

0715 hrs.: Vessel left berth.
1210 hrs.: Vessel anchored at Caio Island.
1220 hrs.: Pilot disembarked by ship's lifeboat.
1305 hrs.: Vessel continued voyage.

On departure the pilot boat at Caio Island was not working and the vessel had to use her own lifeboat to disembark the Pilot.

Max. Size: LOA 131 m.

Anchorage: Good anchorage 4 cables N.E. of the wharf. Depth 6 – 7 fathoms, holding ground was good.

Pilotage: Pilot station on Caio Island which is 50 nautical miles West of Bissau. Request for pilotage is compulsory, via Agent.

Restrictions: Entry by night is difficult as most lights are unlit and the current rises at up to 3.5 knots on the flood and ebb tides, also the navigation aids are poor.

Tugs: Not available.

Berthing: Length of wharf 131 m., depth alongside at LW 20 ft. (FW).

Cargo Handling Facilities: General cargo only handled, there are no lighters, container or Ro/Ro facilities.

Cranes: 2 mobile cranes, maximum capacity 15 tonnes.

Repairs: Not possible.

Fuel: Not available.

Fresh Water: Supply to the wharf is unreliable.

General: Provisions not available.

Medical: No services available.

Airport: There is a twice weekly air service from Bissau to Europe. Distance to airport 7 km.

AUTHORITY: Junta Autonoma dos Portos da Guine-Bissau, P.O.Box 382, Bissau, Guinea-Bissau. *Tel:* 2797 (Administrator's Office), 2783 (Secretariat). *Cables:* Porto, Bissau. *Contact:* Port Director.

Guyana

ESSEQUIBO RIVER (Bartica): 06.24 N. 58.37 W.

DOCUMENTS: See "Georgetown".
PILOTAGE: Pilots are stationed at Georgetown. ETA to be given 24 hours in advance to pilot station. Pilotage compulsory. Pilot boards from black cutter 5 cables N.W. of the Outer Georgetown Light.

Essequibo Light (steel framework tower with red and white horizontal bands) marks seaward end of Essequibo Main Ship Channel. Vessels in vicinity of Demerara Pilot Station should listen for pilot boat on VHF Channel 16.
RESTRICTIONS: The Essequibo Bar is composed of hard mud and sand. The least depth of water is 3 ft. less than for Demerara Bar. Vessels should not attempt to cross the Essequibo Bar drawing more than 3 ft. less than that predicted for the Demerara Bar.
MAX. SIZE: Controlled by Bar draft predictions.
HEALTH: Pratique given at Georgetown when Pilot boards. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.
RADIO: Demerara Radio call sign 8RB operating on 2182 kHz. Georgetown Lighthouse operates VHF Channel 16 and HF 2738 kHz 24 hours a day. Also SSB 8281.2 kHz.
TUGS: Not available.
MEDICAL: Hospital at Georgetown and Bartica.
DENSITY: 1000, fresh water.
FRESH WATER: Not available.
FUEL: Not available.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.
CONSULS: At Georgetown.
REPAIRS: Government dry dock situated at Mazaruni, approximately 40 miles up river at junction of Essequibo and Mazaruni Rivers. Extreme dimensions; 160 ft. by 35 ft.
AUTHORITY: Harbour Authority, Transport and Harbours Department, Water Street, Stabroek, Georgetown, Guyana. *Tel:* 02-67842. *Cables:* Transport Guyana. *Contact:* Captain I. N. Roman, Harbour Master.

GEORGETOWN: 06.49 N. 58.10 W. (See Plan)

PORT LIMITS: Seaward by an arc of a circle with radius 1 nautical mile, with the Georgetown Lighthouse as centre.
DOCUMENTS:
Certificate of Registry.
8 Crew Lists.
8 Provisions and Stores Lists.
4 Passenger Lists.
Customs Documents:
2 Reports of Ship's Stores (Form C1).
2 Lists of Crew Personal Effects (Form C2).
1 List of Unmanifested Cargo (Form C3).
12 Health Declaration Forms (W.H.O.2)
Health Documents for Crew (1 copy for each crew member).
5 Cargo Manifests.
5 Bills of Lading.
PILOTAGE: Vessels apply for Pilots through local Agents or direct to Chief Pilot, Georgetown, through "Demerara Radio, 8 Romeo Bravo", 12 hours in advance of ETA at pilot station when vessel is proceeding in to Georgetown Harbour. Pilot boarding ground is in Northwestern quadrant of circle with radius 5 cables and centre the Outer Georgetown Light. Normal international day or night signals for "I require a Pilot" are used. All pilot cutters are painted black (hull) and white (superstructure) with the word "Pilot" painted in white on black ground. Cutters are approximately 60 ft. in length.
ANCHORAGES: There are 5 with a least depth of approximately 20 ft. MLWS named A to E from North to South. Vessels are safely anchored at any of the above anchorages 1.5 cables to 2 cables from Georgetown park line. Bottom is soft mud and provides good holding ground.
RESTRICTIONS: No entry restrictions except those on draft imposed by the bar at estuaries.
MAX. SIZE: Draft 20 ft. 6 in.
HEALTH: Radio Pratique is not given, and Pratique is only given at Georgetown. This normally involves a visit from the Health Authorities if the vessel is clear. If a vessel is "suspect" or "infected" Master should advise Harbour Authority by special message through Demerara Radio or Georgetown Lighthouse and await advice of Port Health Officers; meanwhile, if in the vicinity of Georgetown, vessel may anchor at the specified quarantine anchorage near the Outer Georgetown Buoy as entry into the limits of the port without the authority of the Ministry of Health is prohibited if the vessel is suspect or infected.
RADIO: Name of radio station "Demerara Radio", call sign "8RB", always standing by on 2182 kHz., will give latest weather report or RDF bearings on request. Georgetown Lighthouse operates VHF Channel 16, HF 2738 and SSB 8281.2 kHz.
RADAR: No service available.
TUGS: At present, vessels dock stem on to the tide without aid of tugs. However, tugs could be provided if urgently required.
BERTHING: There are 6 main wharves privately and government owned, situated along the river frontage at Georgetown and varying in length from 210 ft. to 730 ft. Depths alongside range from 16 ft. to 20 ft. a LWS, but as the bottom is soft mud vessels may safely lie aground alongside. Ships work cargo with their own appliances.
BULK HANDLING FACILITIES: The sugar berth is 416 ft. in length with least depth alongside of 18 ft. MLWS and can accommodate vessels up to 530 ft. in length. Loading rate is 500 t.p.h. using 2 chutes. Vessels should not be more than 63 ft. beam.
CRANES: No heavy lift cranes available. Ship's gear has to be used. No floating cranes.
BRIDGES: Demerara Harbour Bridge: Floating bridge with retractor span situated 4.2 miles from mouth of river. Arrangements for passing are made by Agents. Bridge operators keep radio watch on VHF Channel 16.
STEVEDORES: Ship's Agent normally arranges for gangs in accordance with cargo plans or Master's cable advice. Gangs are unionised. Stevedores work around the clock every day of the week though they are paid overtime between hours of 1600 and 1900 and they earn time-and-a-half or double time on public holidays according to which one of the 12 public holidays they work.
MEDICAL: No special advance notice of required medical attention is necessary, and hospital facilities are always available.
TANKERS: There are no residue discharge facilities at this port. There are 4 tanker berths in the Georgetown area.
Rome Terminal (Shell) – depth alongside is 11 ft.
Ramsburg Terminal (Esso) – depth alongside 16 ft.
Ramsburg Terminal (Texaco) – depth alongside 11 ft.
Providence (Guyoil) – depth alongside 8.5 ft.
Size of pipe-lines: 6 in.
DENSITY: Average density in port is 1015, though during the rainy season (March-May; October-December) density of water may be as low as 1000 at LW in the harbour.
FRESH WATER: Fresh water is available, and is delivered alongside. The ship is required to pay for labour, overtime, etc., involved in the delivery.
FUEL: In case of emergency, providing advance notice is given by Master, vessels may be partially bunkered at any of Shell, Texaco or Esso installations. Vessels may be required to go alongside 2 hours before HW and leave not later than 1 hour after HW at the above-mentioned installations. Grades of fuel available are "Bunker C" and diesel fuel.

FIRE PRECAUTIONS: There are no stated precautions other than regulations against pumping out residual heavy oil (e.g. "Bunker C"). Ships having cargoes of ammunition, high explosives, dynamite, etc., are required by Harbour Regulations to anchor North of Georgetown Lighthouse prior to proceeding alongside wharf to unload and/or proceeding up river.
GANGWAY/DECK WATCHMEN: Services of watchmen are compulsory and are obtained through a watchman's pool by ships' Agent.
Piracy: Armed gangs of robbers have boarded vessels from shore and from canoes and stolen quantities of ship's stores.
OPENING/CLOSING HATCHES: Normally carried out by ship's crew.
